(c) "eligible retirement plan" shall mean (i) an individual retirement account described in Section 408(a) of the Code, (ii) an individual retirement annuity described in Section 408(b) of the Code, (iii) an annuity plan described in Section 403(a) of the Code, (iv) a qualified plan the terms of which permit the acceptance of rollover distributions, (v) an eligible deferred compensation plan described in Section 457(b) of the Code that is maintained by an eligible employer described in Section 457(e)(i)(A) of the Code that shall separately account for the distribution, (vi) an annuity contract described in Section 403(b) of the Code or (vii) an individual retirement plan described in Section 408A(b) of the Code; provided, however, that (x) with respect to a plan described in clause (vii), for transfers occurring before January 1, 2010, the eligible distributee meets the requirements of Section 408A(c)(3)(B) of the Code and (y) with respect to a distribution (or portion of a distribution) to a person who is not the Participant or the surviving Spouse of the Participant, "eligible retirement plan" shall mean only a plan described in clause (i) or (ii) or, effective January 1, 2010, clause (vii), that, in either case, is established for the purpose of receiving such distribution on behalf of such person.

5.11. Special Lump Sum Payment Option. (a) Eligibility. A Participant (but not his or her Beneficiary) may elect to receive, during the election period described in Paragraph (b), his or her deferred Accrued Benefit ("Deferred Annuity") under Section 4.4 of the Plan in the form of a lump sum payment ("Special Lump Sum Payment") or, an "Immediately Commencing Annuity" (as defined below); provided, however, that:

(i) the Participant has a termination of employment on or prior to June 30, 2012 and does not die and is not rehired during the period beginning July 1, 2012 and ending on the date payment is made or commences in accordance with this Section 5.11;

(ii) such termination of employment is not on account of the Participant's disability, following which the Participant is receiving long-term disability payments under any long-term disability program of an Employer, including on June 30, 2012;

(iii) the Participant's Deferred Annuity is not subject to a qualified domestic relations order as defined in Section 414(p) of the Code;

(iv) the Participant is not immediately, as of his or her termination of employment, eligible for early retirement benefits in accordance with this Article IV;

(v) the Participant is not on a leave of absence or layoff from an Employer on June 30, 2012;

(vi) the Participant is not 70 ½ years of age or older as of October 1, 2012; and

(vii) the Participant can be located, after a diligent search, as necessary, by the Plan Administrator before July 1, 2012.

For each such Participant described in this Paragraph (a), the term "Immediately Commencing Annuity" shall mean, as applicable, either:

(i) with respect to a Participant eligible to commence receipt of his or her Deferred Annuity as of December 1, 2012, in accordance with the requirements of Section 4.4, any applicable optional form of annuity described in Article V; or

(ii) with respect to any other Participant, a single life annuity, 50% "qualified joint and survivor annuity" (within the meaning Section 417(b) of the Code) or a 75% "qualified optional survivor annuity" (within the meaning Section 417(g) of the Code).

(b) Election and Election Period. To receive the distribution of benefits described in Paragraph (a), an eligible Participant must voluntarily elect to receive a distribution pursuant to this Section 5.11 by completing an election form and spousal waiver, if required, provided by the Administrator, and submitting such forms to the Administrator after October 1, 2012 and before the following dates, as applicable,

(i) November 15, 2012, with respect to a Participant who elects a Special Lump Sum Payment; and

(iii) December 15, 2012, with respect to a Participant who elects an Immediately Commencing Annuity,

or such other period during 2012 determined by the Administrator.

The Administrator shall provide each eligible Participant, not less than 30 days and not more than 180 days before the Benefit Commencement Date, an application form including a general description of the material features, as well as an explanation of the relative values and financial effect, of the optional forms of benefit available under this Section 5.11, in a manner that satisfies the notice requirements of Section 417(a)(3) of the Code and the regulations thereunder. The form shall indicate the Participant's right to waive a survivor annuity, his or her surviving Spouse's right to consent to such waiver or refuse such consent, and the right to revoke any waiver, within the 180 day period preceding the Benefit Commencement Date, and shall include a description of the right of the Participant, if any, to defer receipt of a distribution and the consequences of failure to defer such receipt, in accordance with Treasury guidance under Section 411(a)(11) of the Code.

(c) Amount of Payment. The Special Lump Sum Payment shall equal the actuarial equivalent of the Participant's nonforfeitable Deferred Annuity, based on the following factors:

(i) the applicable interest rate described in Section 417(e)(3) of the Code for August of 2011;

(ii) an assumed commencement date of the later of (A) age 65, and (B) the Participant's age as of December 1, 2012; and

(iii) the applicable mortality table, as defined in Section 417 of the Code and the regulations promulgated thereunder.

The Immediately Commencing Annuity shall be calculated:

(i) in accordance with the applicable terms of the Plan, for a Participant who is eligible to immediately commence benefits under the terms of the Plan as of the payment date set forth in Paragraph (d); and

(ii) as the actuarial equivalent of the Special Lump Sum Payment, for each other Participant.

(d) Payment of Benefit. If an eligible Participant elects the distribution of his or her Deferred Annuity in accordance with this Section 5.11, payment shall be made, or commence to be made, on or before December 1, 2012, or as soon as administratively practicable thereafter.

(e) Death and Rehire. If an eligible Participant elects the distribution of his or her Deferred Annuity in accordance with this Section 5.11 and subsequently dies or is rehired as an Employee before distributions commence, his or her election shall be null and void and the Participant's benefit shall be paid pursuant to the Plan without regard to this Section 5.11. Notwithstanding anything contained herein to the contrary, upon distribution of a Special Lump Sum Payment or an Immediately Commencing Annuity made to an individual in accordance with this Section 5.11, in the event of the individual's rehire with an Employer following the date such distribution is made, the individual shall not be eligible to participate in the Plan during such period of rehire and may be eligible to participate in the Exelon Corporation Cash Balance Pension Plan or the Exelon Corporation Pension Plan for Bargaining Unit Employees (or such other plan that applies to employees of an Employer hired on or after December 1, 2012), as applicable, in accordance with their terms and conditions.

ARTICLE VI. Breaks in Service.

6.1 Whenever used in this Article:

(a) "One-Year Break in Service" means a calendar year in which an Employee completes 500 or fewer Hours of Service.

(b) "Reemployment Date" means the first day on which an Employee who has had a Separation from Service completes an Hour of Service in a calendar year that is not a One-Year Break in Service.

(c) "Reemployment Eligibility Computation Period" means an Eligibility Computation Period determined as if the Employee's Employment Date were his Reemployment Date.

6.2 If an Employee has a Separation from Service before he has met the requirements for retirement under Sections 4.1-4.3 or for a deferred annuity under Section 4.4, he shall be deemed to have received a distribution of his entire nonforfeitable Accrued Benefit of zero dollars upon such Separation from Service and his Eligibility Years, Accrued Benefit, Benefit Years, and Vesting Years shall be canceled.

6.3 If an Employee completes at least 1000 Hours of Service in a Reemployment Eligibility Computation Period he shall be credited with an Eligibility Year.

6.4 (a) The Eligibility Years of an Employee whose Eligibility Years have been canceled shall be restored if:

(1) he is credited with an Eligibility Year with respect to a Reemployment Eligibility Computation Period that begins on or after his Reemployment Date; and

(2) he again becomes an Employee at a time when the number of consecutive One-Year Breaks in Service he has incurred is less than the greater of five or the number of Eligibility Years the Employee had to his credit on account of his employment prior to the first One-Year Break in Service.

(b) If a former Employee whose Eligibility Years were not canceled under Section 6.2 or are restored under this Section becomes an Eligible Employee, he shall become an Active Participant as of the later of the day he so becomes an Eligible Employee or the day he would have become an Active Participant under Article II if he had been an Eligible Employee at all times since his prior Separation from Service. If a former Employee whose Eligibility Years were canceled under Section 6.2 and are not restored under this Section becomes an Eligible Employee, he shall become an Active Participant as provided in Article II, except that his Reemployment Date shall be treated as his Employment Date.

6.5 The Benefit Years and Accrued Benefit of an Employee whose Benefit Years have been canceled shall be restored upon his reemployment if his Eligibility Years are restored under Section 6.4. If a Participant's Benefit Years and Accrued Benefit were not canceled pursuant to Section 6.2 upon his prior Separation from Service, his Benefit Years earned prior to his Separation from Service shall be aggregated with his Benefit Years earned after his Reemployment Date for purposes of determining the Participant's Accrued Benefit; provided, however, that:

(a) if the Participant previously received a single-sum distribution under Section 5.6 on or before the close of the second Plan Year following the Plan Year in which the Participant's Separation from Service occurred, the Participant's Benefit Years earned prior to his Separation from Service shall be disregarded upon his reemployment; or

(b) if the Participant received a single-sum distribution under Section 5.6 on a date later than that described in Paragraph (a), the Participant's Accrued Benefit determined on and after his reemployment shall be reduced by the Actuarial Equivalent of the distribution received by the Participant under Section 5.6 upon his prior Separation from Service.

6.6 The Vesting Years of an Employee whose Vesting Years have been canceled shall be restored if:

(a) he is credited with a Vesting Year after his Reemployment Date; and

(b) he again becomes an Employee at a time when the number of consecutive One-Year Breaks in Service he has incurred is less than the greater of five or the number of Vesting Years the Employee had to his credit on account of his employment prior to the first One-Year Break in Service.

6.7 Notwithstanding any provision in the Plan to the contrary, effective January 1, 1996, an Employee who was transferred to COPCO and whose benefits were transferred from the Plan in connection with the sale of COPCO shall receive, upon such Employee's Reemployment Date, credit for years of service with the Company prior to such transfer for purposes of calculating Eligibility Years and Vesting Years (but not Benefit Years).

ARTICLE VII. Contributions.

7.1 Contributions by the Company. The Company shall contribute each year an amount actuarially determined to be sufficient to provide the benefits under the Plan. All Company contributions to the Plan are conditioned upon their deductibility for Federal income tax purposes. The Company reserves the right, however, to reduce, suspend or discontinue its contributions under the Plan for any reason at any time. Except as provided in this Section or Section 9.2, it shall be impossible for any part of the Company's contributions to revert to the Company, or to be used for, or diverted to, any purpose other than for the exclusive benefit of Participants, annuitants and their beneficiaries. In the case of a contribution (a) made by the Company as a mistake of fact, or (b) for which a tax deduction is disallowed, in whole or in part, by the Internal Revenue Service, the Company shall receive a refund of said contribution within one year after payment of a contribution as a mistake of fact, or within one year after disallowance of a tax deduction, to the extent of such disallowance, as the case may be.

7.2 Source of Benefits. All benefits under the Plan shall be paid exclusively from the Fund, and the Company shall have no duty to contribute thereto except as provided in this Article.

ARTICLE VIII. Administration.

8.1 The Administrator. (a) In General. The Company acting through its Vice President, Health & Benefits, or such other person or committee appointed by the Chief Human Resources Officer from time to time (such vice president or other person or committee, the "Administrator"), shall be the "administrator" of the Plan, within the meaning of such term as used in ERISA. In addition, the Administrator shall be the "named fiduciary" of the Plan, within the meaning of such term as used in ERISA, solely with respect to administrative matters involving the Plan and not with respect to any investment of the Plan's assets. The Administrator shall have the following duties, responsibilities and rights:

(i) The Administrator shall have the duty and discretionary authority to interpret and construe this Plan in regard to all questions of eligibility, the status and rights of Participants, Retirees, Beneficiaries and other persons under this Plan, and the manner, time, and amount of payment of any distributions under this Plan. The determination of the Administrator with respect to an Employee's years of Credited Service, the amount of the Employee's Earnings, Highest Average Annual Pay, Federal Benefit and any other matter affecting payments under the Plan shall be final and binding. Benefits under the Plan shall be paid to a Participant or Beneficiary only if the Administrator, in his discretion, determines that such person is entitled to benefits.

(ii) Each Employer shall, from time to time, upon request of the Administrator, furnish to the Administrator such data and information as the Administrator shall require in the performance of his duties.

(iii) The Administrator shall direct the Trustee to make payments of amounts to be distributed from the Trust under Article 6 (relating to Service Annuity forms). In addition, it shall be the duty of the Administrator to certify to the Trustee the names and addresses of all Retirees, the amounts of all Service Annuities, the dates of death of Retirees and all proceedings and acts of the Administrator necessary or desirable for the Trustee to be fully informed as to the Service Annuities to be paid out of the Trust.

(iv) The Administrator shall have all powers and responsibilities necessary to administer the Plan, except those powers that are specifically vested in the Investment Office, the Corporate Investment Committee or the Trustee.

(v) The Administrator may require a Participant or Beneficiary to complete and file certain applications or forms approved by the Administrator and to furnish such information requested by the Administrator. The Administrator and the Plan may rely upon all such information so furnished to the Administrator.

(vi) The Administrator shall be the Plan's agent for service of legal process and forward all necessary communications to the Trustee.

(b) Removal of Administrator. The Chief Human Resources Officer shall have the right at any time, with or without cause, to remove the Administrator (including any member of a committee that constitutes the Administrator). The Administrator may resign and the resignation shall be effective upon delivery of the written resignation to the Chief Human Resources Officer or upon the Administrator's termination of employment with the Employers. Upon the resignation, removal or failure or inability for any reason of the Administrator to act hereunder, the Chief Human Resources Officer shall appoint a successor. Any successor Administrator shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor. None of the Company, any officer, employee or member of the board of directors of the Company who is not the Chief Human Resources Officer, nor any other person shall have any responsibility regarding the retention or removal of the Administrator.

8.2 The Investment Office. The Investment Office shall be the "named fiduciary" of the Plan, within the meaning of such term as used in ERISA, solely with respect to matters involving the investment of assets of the Plan and, any contrary provision of the Plan notwithstanding, in all events subject to the limitations contained in Section 404(a)(2) of ERISA and all other applicable limitations. In addition to the duties, responsibilities and rights of the Investment Office set forth in Article 8, the Investment Office shall have the following duties, responsibilities and rights:

(i) The Investment Office shall be the "named fiduciary" for purposes of directing the Trustee as to the investment of amounts held in the Fund and for purposes of appointing one or more investment managers as described in ERISA.

(ii) The Investment Office shall submit to the Corporate Investment Committee annual manager review results and such other reports and documents as may be necessary for the Corporate Investment Committee to monitor the activities and performance of the Investment Office.

(iii) Each Employer shall, from time to time, upon request of the Investment Office, furnish to the Investment Office such data and information as the Investment Office shall require in the performance of its duties.

8.3 The Corporate Investment Committee. The Company acting through the Corporate Investment Committee shall be responsible for overall monitoring of the performance of the Investment Office. The Corporate Investment Committee shall have the following duties, responsibilities and rights:

(i) The Corporate Investment Committee shall monitor the activities and performance of the Investment Office and shall review annual manager review results and any other reports and documents submitted by the Investment Office.

(ii) The Corporate Investment Committee shall have authority to approve asset allocation recommendations of the Investment Office, and approve the retention or firing of any investment consultant (but not any investment manager), custodian or trustee, as recommended by the Investment Office.

(iii) The Corporate Investment Committee and the Company’s Chief Investment Officer shall have the right at any time, with or without cause, to remove one or more employees of the Exelon Investment Office or to appoint another person or committee to act as Investment Office. Any successor Investment Office employee shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor.

The power and authority of the Corporate Investment Committee with respect to the Plan shall be limited solely to the monitoring and removal of the employees of the Investment Office and approval of the recommendations specified in clause (ii) above. The Corporate Investment Committee shall have no responsibility for making investment decisions, appointing or firing investment managers or for any other duties or responsibilities with respect to the Plan, other than those specifically listed herein.

8.4 Status of Administrator, the Investment Office and the Corporate Investment Committee. The Administrator, any person acting as, or on behalf of, the Investment Office, and any member of the Corporate Investment Committee may, but need not, be an Employee, trustee or officer of an Employer and such status shall not disqualify such person from taking any action hereunder or render such person accountable for any distribution or other material advantage received by him under this Plan, provided that no Administrator, person acting as, or on behalf of, the Investment Office, or any member of the Corporate Investment Committee who is a Participant shall take part in any action of the Administrator or the Investment Office on any matter involving solely his rights under this Plan.

8.5 Notice to Trustee of Members. The Trustee shall be notified as to the names of the Administrator and the person or persons authorized to act on behalf of the Investment Office.

8.6 Allocation of Responsibilities. Each of the Administrator, the Investment Office and the Corporate Investment Committee may allocate their respective responsibilities and may designate any person, persons, partnership or corporation to carry out any of such responsibilities with respect to the Plan. Any such allocation or designation shall be reduced to writing and such writing shall be kept with the records of the Plan.

8.7 General Governance. The Corporate Investment Committee shall elect one of its members as chairman and appoint a secretary, who may or may not be a member of such Committee. All decisions of the Corporate Investment Committee shall be made by the majority, including actions taken by written consent. The Administrator, the Investment Office and the Corporate Investment Committee may adopt such rules and procedures as it deems desirable for the conduct of its affairs, provided that any such rules and procedures shall be consistent with the provisions of the Plan.

8.8 Indemnification. The Employers hereby jointly and severally indemnify the Administrator, the persons employed in the Exelon Investment Office, the members of the Corporate Investment Committee, the Chief Human Resources Officer, and the directors, officers and employees of the Employers and each of them, from the effects and consequences of their acts, omissions and conduct in their official capacity with respect to the Plan (including but not limited to judgments, attorney fees and costs with respect to any and all related claims, subject to the Company's notice of and right to direct any litigation, select any counsel or advisor, and approve any settlement), except to the extent that such effects and consequences result from their own willful misconduct. The foregoing indemnification shall be in addition to (and secondary to) such other rights such persons may enjoy as a matter of law or by reason of insurance coverage of any kind.

8.9 No Compensation. None of the Administrator, any person employed in the Exelon Investment Office nor any member of the Corporate Investment Committee may receive any compensation or fee from the Plan for services as the Administrator, Investment Office or a member of the Corporate Investment Committee; provided, however that nothing contained herein shall preclude the Plan from reimbursing the Company or any Affiliate for compensation paid to any such person if such compensation constitutes "direct expenses" for purposes of ERISA. The Employers shall reimburse the Administrator, the persons employed in the Exelon Investment Office and the members of the Corporate Investment Committee for any reasonable expenditures incurred in the discharge of their duties hereunder.

8.10 Employ of Counsel and Agents. The Administrator, the Investment Office and the Corporate Investment Committee may employ such counsel (who may be counsel for an Employer) and agents and may arrange for such clerical and other services as each may require in carrying out its respective duties under the Plan.

8.11 Claims Procedures. Any Participant or distributee who believes he is entitled to benefits in an amount greater than those which he is receiving or has received may file a claim with the Administrator (or its delegate). Such a claim shall be in writing and state the nature of the claim, the facts supporting the claim, the amount claimed, and the address of the claimant. The Administrator (or its delegate) shall review the claim and, unless special circumstances require an extension of time, within 90 days after receipt of the claim, give notice to the claimant, either in writing by registered or certified mail or in an electronic notification, of the decision with respect to the claim. Any electronic notice delivered to the claimant shall comply with the standards imposed by applicable regulations. If it is determined that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 90-day period and in no event shall such an extension exceed 90 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which it is expected that the benefit determination will be rendered. The notice of the decision with respect to the claim shall be written in a manner calculated to be understood by the claimant and, if the claim is wholly or partially denied, shall notify the claimant of the adverse benefit determination and shall set forth the specific reasons for the adverse determination, the references to the specific Plan provisions on which the determination is based, a description of any additional material or information necessary for the claimant to perfect the claim, an explanation of why such material or information is necessary, and a description of the claim review procedure under the Plan and the time limits applicable to such procedures, including a statement of the claimant's right to bring a civil action under Section 502 of ERISA following an adverse benefit determination on review. The notice shall also advise the claimant that the claimant or the claimant's duly authorized representative may request a review by the Administrator (or its delegate) of the adverse benefit determination by filing, within 60 days after receipt of a notification of an adverse benefit determination, a written request for such review. The claimant shall be informed that, within the same 60-day period, he (a) may be provided, upon request and free of charge, reasonable access to, and copies of, all documents, records and other information relevant to the claimant's claim for benefits and (b) may submit written comments, documents, records and other information relating to the claim for benefits. If a request is so filed, review of the adverse benefit determination shall be made by the Administrator (or its delegate) within, unless special circumstances require an extension of time, 60 days after receipt of such request, and the claimant shall be given written notice of the final decision. If it is determined that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 60-day period and in no event shall such an extension exceed 60 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which the determination on review is expected to be rendered. The review shall take into account all comments, documents, records and other information submitted by the claimant relating to the claim, without regard to whether such information was submitted or considered in the initial benefit determination. The notice of the final decision shall include specific reasons for the determination and references to the specific Plan provisions on which the determination is based and shall be written in a manner calculated to be understood by the claimant.

8.12 Actuary to Be Employed. The Company or the Investment Office shall engage an actuary to do such technical and advisory work as the Company or the Investment Office may request, including analyses of the experience of this Plan from time to time, the preparation of actuarial tables for the making of computations thereunder, and the submission to the Company or the Investment Office of an annual actuarial report, which report shall contain information showing the financial condition of this Plan, a statement of the contributions to be made by the Employers for the ensuing year, and such other information as may be requested by the Company or the Investment Office.

8.13 Funding Policy. The board of directors of the Company shall establish a funding policy and method consistent with the objectives of this Plan and the requirements of Title I of ERISA and shall communicate such policy and method, and any changes in such policy and method, to the Investment Office.

8.14 Notices to Participants, Etc. All notices, reports and statements given, made, delivered or transmitted to a Participant or any other person entitled to or claiming benefits under this Plan shall be deemed to have been duly given, made or transmitted when mailed by first class mail with postage prepaid and addressed to the Participant or such other person at the address last appearing on the records of the Administrator.

8.15 Notices to Employers or Administrator. Written directions, notices and other communications from Participants or any other person entitled to or claiming benefits under this Plan to the Employers or Administrator shall be deemed to have been duly given, made or transmitted either when delivered to such location as shall be specified upon the forms prescribed by the Administrator for the giving of such directions, notices and other communications or when mailed by first class mail with postage prepaid and addressed to the addressee at the address specified upon such forms.

8.16 Records. Each of the Administrator, the Investment Office and the Corporate Investment Committee shall keep a record of all of their respective proceedings, if any, and shall keep or cause to be kept all books of account records and other data as may be necessary or advisable in their respective judgment for the administration of the Plan, the administration of the investments of the Plan or the monitoring of the investment activities of the Plan, as applicable.

8.17 Responsibility to Advise Administrator of Current Address. Each person entitled to receive a payment under this Plan shall file with the Administrator in writing such person's complete mailing address and each change therein. A check or communication mailed to any person at such person's address on file with the Administrator shall be deemed to have been received by such person for all purposes of this Plan. Although neither the Administrator nor the Trustee shall be obliged to search for or ascertain the location of any person, the Administrator shall make reasonable efforts to locate any missing Participant or Beneficiary entitled to benefits hereunder. If the Administrator is in doubt as to whether payments are being received by the person entitled thereto, it shall, by registered mail addressed to the person concerned at his last address known to the Administrator, notify such person that all future payments will be withheld until such person submits to the Administrator evidence of his continued life and proper mailing address.

8.18 Electronic Media. Notwithstanding any provision of the Plan to the contrary and for all purposes of the Plan, to the extent permitted by the Administrator and any applicable law or Regulation, the use of electronic technologies shall be deemed to satisfy any written notice, consent, delivery, signature, disclosure or recordkeeping requirement under the Plan, the Code or ERISA to the extent permitted by or consistent with applicable law and Regulations. Any transmittal by electronic technology shall be deemed delivered when successfully sent to the recipient, or such other time specified by the Administrator.

8.19 Correction of Error. If it comes to the attention of the Administrator that an error has been made in the amount of benefits payable, or paid, to any Participant or Beneficiary under the Plan, the Administrator shall be permitted to correct such error by whatever means that the Administrator, in its sole discretion determines, including by offsetting future benefits payable to the Participant or Beneficiary or requiring repayment of benefits to the Plan, except that no adjustment need be made with respect to any Participant or Beneficiary whose benefit has been distributed in full prior to the discovery of such error.

8.20 Applicable Law. Except to the extent preempted by applicable federal law or otherwise provided under the terms of the Plan, the Plan and all rights hereunder shall be governed by and construed in accordance with the laws of the State of Illinois.

8.21 Statute of Limitations for Actions under the Plan. Except for actions to which the statute of limitations prescribed by Section 413 of ERISA applies, (a) no legal or equitable action relating to a claim for benefits under Section 502 of ERISA may be commenced later than one year after the claimant receives a final decision from the Chief Human Resources

Officer (or such other officer designated from time to time by the Chief Human Resources Officer) in response to the claimant's request for review of the adverse benefit determination and (b) no other legal or equitable action involving the Plan may be commenced later than two years from the time the person bringing an action knew, or had reason to know, of the circumstances giving rise to the action. This provision shall not be interpreted to extend any otherwise applicable statute of limitations, nor to bar the Plan or its fiduciaries from recovering overpayments of benefits or other amounts incorrectly paid to any person under the Plan at any time or bringing any legal or equitable action against any party.

8.22 Forum for Legal Actions under the Plan. Any legal action involving the Plan that is brought by any Participant, any Beneficiary or any other person shall be litigated in the federal courts located in the Northern District of Illinois or the Eastern District of Pennsylvania, whichever is most convenient, and no other federal or state court.

8.23 Legal Fees. Any award of legal fees in connection with an action involving the Plan shall be calculated pursuant to a method that results in the lowest amount of fees being paid, which amount shall be no more than the amount that is reasonable. In no event shall legal fees be awarded for work related to (a) administrative proceedings under the Plan, (b) unsuccessful claims brought by a Participant, Beneficiary or any other person, or (c) actions that are not brought under ERISA. In calculating any award of legal fees, there shall be no enhancement for the risk of contingency, nonpayment or any other risk nor shall there be applied a contingency multiplier or any other multiplier. In any action brought by a Participant, Beneficiary or any other person against the Plan, the Administrator, the Investment Office, the Corporate Investment Committee, any Plan fiduciary, the Chief Human Resources Officer, any Plan administrator, the Company, its affiliates or their respective officers, directors, employees, or agents (the "Plan Parties"), legal fees of the Plan Parties in connection with such action shall be paid by the Participant, Beneficiary or other person bringing the action, unless the court specifically finds that there was a reasonable basis for the action.

ARTICLE IX. Amendment and Termination.

9.1 Amendment. Exelon Corporation may amend the Plan at any time for any reason. Each amendment to the Plan shall be adopted by Exelon Corporation's Board of Directors (or a committee thereof); provided, however, that in the case of any amendment or modification that would not result in an aggregate annual cost to the Company of more than $50,000,000, the Plan may be amended or modified by action of the Chief Human Resources Officer (with the consent of the Chief Executive Officer in the case of a discretionary amendment or modification expected to result in an increase in annual expense or liability account balance exceeding $250,000) or another executive officer holding title of equivalent or greater responsibility. If an amendment changes the vesting provisions of the Plan, any person who is a Participant on the later of the date the amendment is adopted or becomes effective shall have at all times a vested interest in his Accrued Benefit as of that date determined without regard to the amendment. In addition, within a reasonable period determined by the Exelon Corporation in accordance with regulations issued by the Secretary of the Treasury, any Participant who has at least three Vesting Years to his credit on the last day of the election period may elect to have his vested interest in his entire Accrued Benefit determined without regard to the amendment. Except as otherwise permitted by law, no amendment shall reduce a Participant's Accrued Benefit nor result in the elimination or reduction of a benefit "protected" under Section 411(d)(6) of the Code.

9.2 Termination. Exelon Corporation may terminate or partially terminate the Plan through resolutions adopted by Exelon Corporation's Board of Directors. If the Plan is terminated or partially terminated, the assets of the Plan shall be allocated, subject to Section 9.3, as provided in Section 4044 of the Employee Retirement Income Security Act of 1974 (as it may be from time to time amended or construed by any appropriate governmental agency or corporation), without subclasses. Any amount remaining after all fixed and contingent liabilities of the Plan have been satisfied shall be returned to Exelon Corporation. Allocations under this Section shall be nonforfeitable. Except as otherwise required by law, the time and manner of distribution of the assets shall be determined by Exelon Corporation by amendment to the Plan pursuant to Section 9.1.

9.3 Limitation on Benefits. The following provisions shall be effective with respect to distributions made on or after May 14, 1990; distributions made prior to May 14, 1990 shall be subject to the restrictions described in Treas. Reg. §1.401-4(c).

(a) In the event of Plan termination, the benefit payable to any Highly Compensated Employee shall be limited to a benefit that is nondiscriminatory under Section 401(a)(4) of the Code. If payment of benefits is restricted in accordance with this Paragraph (a), assets in excess of the amount required to provided such restricted benefits shall become a part of the assets available under Section 9.2 for allocation among Participants and beneficiaries of Participants whose benefits are not restricted under this Paragraph (a).

(b) The restrictions of this Paragraph (b) shall apply prior to termination of the Plan to any Participant who is a Highly Compensated Employee and who is one of the 25 highest paid employees or former employees of the Company and all Affiliates for any Plan Year. The annual payments made from the Plan on behalf of any such Participant shall be limited to an amount equal to (1) the payments that would have been made under a single life annuity that is the Actuarial Equivalent of the sum of the Participant's Accrued Benefit and any other benefits under the Plan (other than a social security supplement) and (2) the payments that the Participant is entitled to receive under a social security supplement.

(c) The restrictions in Paragraph (b) shall not apply:

(1) if, after the payment of benefits to or on behalf of such Participant, the value of the Plan assets equals or exceeds 110 percent of the value of the current liabilities (within the meaning of Section 412(l)(7) of the Code);

(2) if the value of the benefits payable to or on behalf of the Participant is less than one percent (1%) of the value of current liabilities before distribution; or

(3) if the value of the benefits payable to or on behalf of the Participant does not exceed $5,000.

ARTICLE X. Miscellaneous.

10.1 Forfeitures. All forfeitures arising under the Plan shall be used as soon as possible to reduce the Company's contributions and shall not be applied to increase the benefits any person would otherwise receive under the Plan.

10.2 Mergers, Etc. No merger or consolidation with, or transfer of any of the Plan's assets or liabilities to, any other plan shall occur at any time unless each Participant and annuitant would (if the Plan had then terminated) receive a benefit immediately after the merger, consolidation, or transfer which is equal to or greater than the benefit he would have been entitled to receive immediately before the merger, consolidation, or transfer (if the Plan had then terminated).

10.3 Nonalienation of Benefits. Except (a) to the extent permitted by the Employee Retirement Income Security Act of 1974, (b) pursuant to a qualified domestic relations order, (c) to the extent required to satisfy a Federal tax levy made pursuant to Section 6331 of the Code, or (d) effective as of January 1, 1997, pursuant to Section 401(a)(13) of the Code, to the extent a judgment relates to the Participant's conviction of a crime involving the Plan, or a judgment, order, decree or settlement agreement between the Participant and the Secretary of Labor or the Pension Benefit Guaranty Corporation relates to a violation of part 4 of subtitle B of title I of ERISA, no benefit under this Plan may be voluntarily or involuntarily assigned or alienated. Notwithstanding the above, a Participant may authorize the Administrator to deduct from benefit payments under the Plan up to 10% of each such payment as contributions to a Company political action committee. Any such authorization shall be revocable by the Participant at any time.

10.4 Effect on Employment. This Plan shall not confer upon any person any right to be continued in the employment of the Company.

10.5 Facility of Payment. If the Company deems any person incapable of receiving benefits to which he is entitled by reason of minority, illness, infirmity, or other incapacity, it may direct that payment be made directly for the benefit of such person or to any person selected by the Company to disburse it, whose receipt shall be a complete acquittance therefor. Such payments shall, to the extent thereof, discharge all liability of the Company and the party making the payment.

10.6 Lost Payees. If a Participant, Spouse or other beneficiary to whom a benefit is payable under the Plan cannot be located following a reasonable effort to do so by the Administrator, such benefit shall be forfeited. Whether or not efforts to locate a Participant have previously been made, the Administrator shall make reasonable efforts to locate the Participant (or the Spouse of a deceased Participant) during the one-year period preceding the Participant's Required Beginning Date. If such efforts fail to locate the Participant or Spouse, such Participant or Spouse shall be presumed dead as of the Required Beginning Date and any benefit payable to the Participant or Spouse shall be forfeited. In any case, if a claim for a forfeited benefit is subsequently filed by the Participant, Spouse or beneficiary, such benefit shall be reinstated and paid in accordance with the appropriate provisions of the Plan.

10.7 Effective Date. The provisions of this instrument apply only to individuals who complete an Hour of Service on or after the effective date stated under the title of the Plan on page one. The eligibility and benefits of any other person shall be determined under the Plan as in effect when he last separated from service except as expressly provided with respect to him by amendment adopted thereafter; and except that the provisions of Section 2.10 (relating to rehire of Employees), Section 2.11 (relating to change in employment status or transfer to affiliate), Section 4.6 (relating to maximum annuity), Section 4.12 (relating to benefit restrictions as a result of funding), Article VIII (relating to administration), Article IX (relating to amendment and termination of the Plan), and this Article X (relating to miscellaneous provisions) shall be effective for all such persons.

10.8 Expenses. The expenses of the Trustee in the administration of the Trust, including compensation, if any, to the Trustee for its services, shall be paid by the Company or the Employers. All costs and expenses incurred in the operation of the Trust, to the extent not described in the preceding sentence, and all costs and expenses incurred in the operation of the Plan and the Trust, including, but not limited to, “direct expenses” incurred in administering the Plan and the Trust (including compensation paid to any employee of an Employer or an Affiliate who is engaged in the administration of the Plan or the Trust), the expenses of the Administrator, the Investment Office and the Corporate Investment Committee, the fees of counsel and any agents for the Trustee, the Administrator, the Investment Office or the Corporate Investment Committee, and the fees of investment managers that manage assets of the Trust shall be paid by the Trustee from the Trust in such proportion as the Investment Office, in its sole discretion, shall determine, to the extent such expenses are not paid by the Employers and to the extent permitted under ERISA, Regulations and other applicable laws. Any such expenses that are borne by the Employers shall be paid out of their own funds in such proportions as the Administrator shall determine. In the event that the Company or any other Employer advances money on behalf of the Trust for the payment of any expenses incurred in the operation of the Plan, the Trustee shall reimburse the Company or such other Employer from the Trust for any amount so advanced, without interest or fees.

ARTICLE XI. Top-Heavy Provisions.

11.1 Definitions. Whenever used in this Article:

“Determination Date” means, with respect to any Plan Year, the last day of the preceding Plan Year.

“Key Employee” means any Participant who, at any time during the Plan Year or any of the four preceding Plan Years, is an individual described in Section 416(i) of the Code and the regulations thereunder.

“Permissive Aggregation Group” means a group of qualified retirement plans maintained by the Company or any Affiliate, which group consists of the Required Aggregation group and any other plan or plans which, considered together with the Required Aggregation Group, meet the requirements of Sections 401(a)(4) and 410 of the Code.

“Required Aggregation Group” means the group of qualified retirement plans maintained by the Company or an Affiliate, including a frozen plan or a plan that has been terminated during the five-year period ending on the Determination Date, which group consists of this Plan, each other plan in which a Key Employee is a participant (or, in the case of a terminated plan was a participant in such five-year period) and each other plan that enables any such plan to meet the requirements of Section 401(a)(4) or 410 of the Code, but only if such group includes this Plan. Otherwise, the Required Aggregation Group consists of this Plan only.

“Top-Heavy Plan Year” means a Plan Year that begins after December 31, 1983, in which the Plan is top-heavy. The Plan is top-heavy for a given Plan Year if for that Plan Year (1) the Required Aggregation Group is top-heavy, and (2) the Required Aggregation Group is not part of a Permissive Aggregation Group that is not top-heavy. The Required Aggregation Group or a Permissive Aggregation Group (the “Group”) is top-heavy for a given Plan Year if the present value of the cumulative accrued benefits (or, the aggregate of the accounts, in the case of a defined contribution plan included in such Group) of participants who are Key Employees exceeds 60% of the like amount determined for all participants in all plans included in such Group. For purposes of this definition:

(a) the present value of the accrued benefit or the account of any participant shall be increased by the amount of all plan distributions to such participant during the five year period ending on the Determination Date; provided that no such increase shall arise from any rollover contribution or plan-to-plan transfer from this Plan that is not initiated by the participant or is made to another plan maintained by the Company or an Affiliate;

(b) the present value of the accrued benefit or the account of a participant who has been a Key Employee but no longer is a Key Employee shall not be taken into account;

(c) the present value of the accrued benefit or the account of any Participant who has not performed services for the Company or an Affiliate at any time during the five-year period that ends on the Determination Date shall not be taken into account;

(d) any rollover contribution or plan-to-plan transfer to this Plan that is initiated by a participant and made from a plan that is not maintained by the Company or an Affiliate after December 31, 1983 shall not be taken into account;

(e) the five year period referenced above shall be changed to a one year period for all distributions made on account of a severance from employment, death, or disability; and

(f) the present value of accrued benefits shall be determined, effective January 1, 1987, under the method used for accrual purposes for all plans maintained by the Company and all Affiliates if a single method is used by all such plans, or, otherwise, the slowest accrual method permitted under Section 411(b)(1)(C) of the Code.

11.2 Top-Heavy Operating Rules. Anything in the Plan to the contrary notwithstanding, the following rules shall apply in a Top-Heavy Plan Year:

(a) For purposes of determining benefits under this Article XI, “compensation” shall mean compensation as reported on Forms W-2 by the Company or any Affiliate for such Plan Year and the maximum amount of compensation of any Participant who is an Employee during such Plan Year shall be $150,000, or such other amount as may apply to such Participant pursuant to Section 401(a)(17) of the Code and regulations issued thereunder.

(b) For purposes of determining the maximum annuity in Section 4.6 for Plan years beginning before January 1, 2000, “1.0” shall be substituted for “1.25”, wherever it appears.

(c) The Accrued Benefit which each Participant who is an Employee but not a Key Employee under this Plan derives from contributions by the Company shall be increased by the amount necessary to cause the Accrued Benefits payable to each Participant in such year, when expressed as a benefit payable annually in the form of a Single Life Annuity, to equal at least the required minimum benefit, where the required minimum benefit is the product of:

(1) the average of the Participant’s compensation for the five consecutive Plan Years that yield the highest average, disregarding Plan Years which begin before January 1, 1984, and Plan Years which are not Top-Heavy Plan Years, and

(2) the lesser of:

(A) 2 percent multiplied by the number of Vesting Years with the Company which were also Top-Heavy Plan Years and which were completed after January 1, 1984; or

(B) 20 percent.

For purposes of determining whether an increase in benefit accrual is required, all plans included in the Required Aggregation Group shall be treated as one plan.

(d) Anything in the Plan to the contrary notwithstanding, in any Top-Heavy Plan Year, a Participant who does not otherwise have a nonforfeitable right to 100% of his Accrued Benefit shall have a nonforfeitable right to a percentage of his Accrued Benefit in accordance with the following schedule:

Vesting Years	Nonforfeitable Percentage
2	20
3	40
4	60
5	100

In any Plan Year following the last Top-Heavy Plan Year, any Employee who is a Participant on the last day of the last Top-Heavy Plan Year shall have at all times a vested interest in his Accrued Benefit as of that date determined under the schedule set forth above. In addition, within a reasonable period determined by the Company, any Participant who has at least three Vesting Years to his credit on that date may elect to have his vested interest in his entire Accrued Benefit determined under the schedule set forth above.

ARTICLE XII. Post Retirement Health Benefits.

12.1 Eligibility

(a) Effective December 1, 1994, post-retirement health befits may be paid under this Article, to the extent the Company elects to fund benefits under this Article, to any Participant, who is receiving or has received pension benefits under this Plan, and if applicable, to the Spouse or dependents of such Participant; provided, however, that the Company may, in its discretion, decide not to provide post-retirement health benefits under this Article for Key Employees (as defined in Section 11.1) and, if applicable, their Spouses and dependents.

(b) In addition to satisfying the requirements of Subsection (a), any person claiming post-retirement health benefits under this Plan must meet all applicable requirements imposed in the post-retirement health plans maintained by the Company. All determinations of benefit levels and eligibility for benefits shall be made pursuant to the terms of such post-retirement health plans.

(c) The establishment of an account under this Article XII to provide payment for post-retirement health benefits shall not obligate the Company to maintain its post-retirement health plans, and the Company shall retain the same ability to amend or terminate such post-retirement health plans as if this Article XII did not exist.

Notwithstanding the foregoing, post-retirement health benefits shall not be available for any Power Team Employee.

12.2 Benefits Provided.

(a) Benefits under this Article shall include all health benefits provided by the post-retirement health plans maintained by the Company, including payment of Medicare Part B premiums to the extent provided by such post-retirement health plans, to the extent such benefits are not otherwise provided by the Company.

(b) Benefits under this Article shall be provided using any method or combination of methods as the Company shall deem appropriate, including, but not limited to , purchase of insurance and the payment of premiums for such insurance, direct reimbursement of costs incurred by the provider of such benefits or reimbursement to the individual to whom such benefits were provided.

(c) Benefits and coverage under this Article shall not be discriminatory in favor of officers, shareholders, supervisory employees or highly compensated employees.

12.3 Establishment of Accounts.

(a) A separate account shall be maintained with respect to the contributions to fund benefits under this Article. This account is to be maintained for accounting purposes only. Funds accounted for in such account may be invested on a commingled basis with pension benefit contributions under this Plan without identification of which investments are allocable to each account, provided that earnings on all Plan assets are allocated in a reasonable manner.

(b) If the Company elects to fund post-retirement health benefits for Key Employees under this Article, as separate account shall be maintained for post-retirement health benefits payable to each Key Employee, his Spouse and dependents. Benefits under this Article shall be payable to such Key Employee, Spouse and dependents only from such account. The separate account maintained under this Subsection (b) shall be a true separate account, and not maintained merely for accounting purposes. Commingling of assets held in such account with any other Plan assets is not permitted. For purposes of Section 415 of the Code contributions allocated to any separate account under this Subsection (b) shall be treated as an annual addition to a defined contribution plan.

12.4 Funding.

(a) Contributions to provide benefits under this Article may be contributory or non-contributory, in accordance with the terms of the post-retirement health plans maintained by the Company.

(b) Amounts contributed to fund post-retirement health benefits shall be reasonable and ascertainable. The total amount contributed to fund post-retirement health benefits under this Article shall not exceed the cost of providing such benefits. The total cost of providing such benefits shall be determined in accordance with a generally accepted actuarial method selected by the Company which is reasonable in view of the provisions and coverage of the Plan, the funding medium and other relevant considerations, including, but not limited to, applicable Treasury regulations. For purposes of determining the cost of providing post-retirement health benefits, the actuarial method may take into account reasonable projected increases in the cost of providing health benefits. Forfeitures, if any, under this Article shall be applied as soon as possible to reduce employer contributions to fund benefits under this Article.

(c) Post-retirement health benefits provided under this Article, when added to life insurance protection provided under the Plan, shall be incidental and subordinate to pension benefits provided under the Plan. For purposes of this Article, post-retirement health benefits shall be considered incidental and subordinate if the aggregate of the contributions for post-retirement health benefits provided under this Article plus the contributions for life insurance protection under this Plan does not exceed 25 percent of the total contributions to the Plan (other than for past service credit) made on or after December 1, 1994.

(d) Until the satisfaction of all liabilities to be provided under this Article, neither amounts contributed to fund post-retirement health benefits under this Article nor earnings thereon shall be used for or diverted to any purpose other than providing such benefits or payment of necessary or appropriate expenses attributable to the administration of post-retirement health accounts under this Article. Any amounts contributed to fund medical benefits under this Article remaining in a post-retirement health account after the satisfaction of all liabilities arising under this Article must be returned to the Company.

(e) Nothing in this Article shall obligate the Company to pay benefits described in Section 12.2 to the extent those benefits exceed assets contributed to the Fund to provide post-retirement health benefits under this Article. Furthermore, nothing in this Article shall imply that amounts contributed to the Fund to provide pension or other benefits (other than post-retirement health benefits) available under the Plan will be used to provide post-retirement health benefits under this Article. The Company may, in its discretion, fund all or any part of the benefits described in Section 12.2 from other sources or may pay such benefits out of its general assets as the benefits become payable.

(f) If in any proceeding subsequent to December 1, 1994, under Section 1308 of the Pennsylvania Public Utility Code, the Company is not permitted to fully recover in rates the contributions made to the separate account maintained to fund benefits under this Article, the Company, at its discretion, may elect to defer or discontinue funding the benefits under this Article.

IN WITNESS WHEREOF, the Company has caused this instrument to be executed by its duly authorized officer on this ____ day of December, 2012.

Title ______________________________

SERVICE ANNUITY PLAN

APPENDIX A

Actuarial equivalence under this Plan shall mean a benefit of equivalent value when computed using a 7% interest rate and the mortality tables attached to the Plan as Exhibit A (for pensioners) and B (for beneficiaries, if applicable), with such exceptions as specifically set forth in the Plan.

For distributions on and after December 1, 2012, the lump sum Actuarial Equivalent of a Participant's Accrued Benefit for purposes of Section 5.6 only shall be determined using (i) the interest rate used shall be the interest rate as defined in Section 417(e)(3)(C) of the Code for the fifth month (or, if more favorable to the recipient of a lump sum payment between December 1, 2012 and December 1, 2013), the second month) preceding the calendar year in which such distribution is made or commences and (ii) the mortality table shall be the mortality table specified by the Commissioner of the Internal Revenue Service for purposes of Section 417(e)(3) of the Code as in effect on the first day of the Plan Year in which the Benefit Commencement Date occurs. For distributions on or after January 1, 2008 and on or before November 30, 2012, the lump sum Actuarial Equivalent of a Participant's Accrued Benefit for purposes of Section 5.6 shall be determined by using (i) the interest rate as defined in Section 417(e)(3)(C) of the Code for the second month preceding the calendar year in which such distribution is made or commences and (ii) the mortality table specified by the Commissioner of the Internal Revenue Service for purposes of Section 417(e)(3) of the Code as in effect on the first day of the Plan Year in which the Benefit Commencement Date occurs.

For distributions on or after January 1, 2000 and on or before December 31, 2007, the lump sum Actuarial Equivalent of a Participant's Accrued Benefit for purposes of Section 5.6 shall be determined using the annual rate of interest on 30-year Treasury securities as specified by the Commissioner of the Internal Revenue Service pursuant to Section 417(e)(3)(A) of the Code and regulations issued thereunder for the second full calendar month preceding the first day of the Plan Year containing the date of distribution, and the mortality table shall be the mortality table prescribed by the Commissioner of Internal Revenue Service pursuant to Section 417(e)(3)(A) of the Code on the date as of which the single sum payment is being determined, if the use of such assumptions would result in a greater benefit.

For the period beginning on or after January 1, 2000, and ending on or before December 31, 2001, and ending on the date of adoption of this amendment and restatement, the lump sum Actuarial Equivalent of a Participant's Accrued Benefit for purposes of Section 5.6 shall be determined on the basis of the assumptions which would be used as of the first day of the Plan Year containing the date of distribution by the Pension Benefit Guaranty Corporation for purposes of determining the present value of a lump sum distribution upon plan termination, if the use of such assumptions would result in a greater benefit.

EXELON CORPORATION

EMPLOYEE SAVINGS PLAN

Amended and Restated Effective as of January 1, 2013

EXELON CORPORATION EMPLOYEE SAVINGS PLAN

TABLE OF CONTENTS

ARTICLE 1

TITLE, PURPOSE AND EFFECTIVE DATES

The title of this Plan shall be the “Exelon Corporation Employee Savings Plan.” This Plan is an amendment and restatement of the Plan as in effect on December 31, 2012, and shall be effective January 1, 2013 in respect of Participants whose employment terminates on or after such date, provided, however, that any provision that specifies a different effective date shall be effective as of such date; and provided, further that, the provisions of Article 9 (relating to participants’ stockholders rights), Article 10 (relating to special participation and distribution rules relating to reemployment of terminated employees and employment by related entities), Article 11 (relating to administration), Article 14 (relating to miscellaneous provisions) and Article 16 (relating to amendment and termination of the Plan) shall be effective for all such persons.

This Plan is designated as a “profit sharing plan” within the meaning of section 1.401-1(a)(2)(ii) of the Regulations; and is also designated as an ERISA section 404(c) Plan within the meaning of section 2550.404c-1 of the Regulations. In addition, the portion of the Plan invested in the Employer Stock Fund described in Section 6.2 is designated as an “employee stock ownership plan” within the meaning of section 4975(e)(7) of the Code and, as such, is designed to invest primarily in “qualifying employer securities” as defined in section 4975(e)(8) of the Code.

ARTICLE 2

DEFINITIONS

As used herein, the following words and phrases shall have the following respective meanings when capitalized:

(1) Administrator. The Company acting through its Director, Employee Benefit Plans & Programs, or such other person or committee appointed pursuant to Section 11.1 (relating to the Administrator, the Investment Office and the Corporate Investment Committee).

(2) Affiliate. (a) A corporation that is a member of the same controlled group of corporations (within the meaning of section 414(b) of the Code) as an Employer, (b) a trade or business (whether or not incorporated) under common control (within the meaning of section 414(c) of the Code) with an Employer, (c) any organization (whether or not incorporated) that is a member of an affiliated service group (within the meaning of section 414(m) of the Code) that includes an Employer, a corporation described in clause (a) of this subdivision or a trade or business described in clause (b) of this subdivision or (d) any other entity that is required to be aggregated with an Employer pursuant to Regulations promulgated under section 414(o) of the Code.

(3) After-Tax Contributions. Contributions made by a Participant pursuant to Section 5.1.

(4) After-Tax Contributions Account. The account established pursuant to Section 7.1 to which shall be credited (i) a Participant's After-Tax Contributions, (ii) any after-tax contributions transferred to the Plan from the PECO Energy Company Employee Savings Plan (including any after-tax contributions transferred to such plan from the Philadelphia Electric Company Tax Reduction Act Stock Ownership Plan) on behalf of such Participant and (iii) earnings (or losses) thereon.

(5) Before-Tax Contributions. Contributions made on behalf of a Participant pursuant to Section 4.1. The term "Before-Tax Contributions" includes Designated Roth Contributions, if any, including Catch-Up Contributions.

(6) Before-Tax Contributions Account. The account established pursuant to Section 7.1 to which shall be credited (i) a Participant's Before-Tax Contributions other than Catch-Up Contributions, (ii) any before-tax contributions transferred to the Plan from the PECO Energy Company Employee Savings Plan on behalf of such Participant and (iii) earnings (or losses) thereon.

(7) Beneficiary. The person or persons entitled under Section 8.5 to receive benefits in the event of the death of a Participant. For any period in which the Plan is not an "ERISA section 404(c) Plan" as defined in the Regulations under section 404(c) of ERISA, each Beneficiary shall be a "named fiduciary" within the meaning of section 402(a)(1) of ERISA for the sole purpose of directing the Trustee with respect to the exercise of shareholder rights pursuant to Article 9 (relating to Participants' stockholder rights).

(8) Catch-Up Contributions. Before-Tax Contributions made pursuant to paragraph (d) of Section 4.1 (relating to Catch-Up Contributions) by a Participant who has attained age 50 before the close of the relevant Plan Year.

(9) Catch-Up Contributions Account. The account established pursuant to Section 7.1 for each Participant who has attained age 50 to which shall be credited a Participant's Catch-Up Contributions

(10) CEG. Constellation Energy Group, Inc. and any of its affiliates that was an affiliate immediately before the Effective Time (as such term is defined in the Merger Agreement).

(11) Code. The Internal Revenue Code of 1986, as amended.

(12) Common Stock. The common stock, without par value, of Exelon Corporation.

(12) Company. Exelon Corporation, a Pennsylvania corporation, or any successor to such corporation that adopts the Plan pursuant to Article 13 (relating to continuance by a successor).

(13) Compensation. The normal base pay under the applicable Exelon East or West payroll of an Employee from an Employer for personal services rendered, including (i) nuclear license premiums for management employees, (ii) meter readers' bonuses, (iii) payments attributable to worker's compensation received from an Employer, (iv) taxable payments received by an employee under the Exelon Corporation Disability Benefit Plan, (v) solely for employees who are employed by Exelon Boston Services LLC who are represented by Local 369 of the Utility Workers Union of America, AFL-CIO, overtime pay, (vi) solely for employees who are represented by IBEW Local Union 15 and covered under the collective bargaining agreement between Commonwealth Edison Company and IBEW Local Union 15, overtime pay, but only amounts paid with respect to hours worked in excess of an Employee's normally scheduled hours, (vii) effective January 1, 2009, differential wage payments (as defined in section 3401(h) of the Code), and excluding (i) salary continuation or lump sum payments under a severance benefit plan, or other severance arrangement, of an Employer, (ii) bonuses or incentive awards (other than meter readers' bonuses), (iii) overtime pay for management employees, (iv) shift premiums, (v) fringe benefits, (vi) other extraordinary payments and (vii) payments made in a form other than cash, but without reduction on account of the Employee's election to have his or her pay reduced pursuant to a qualified cash or deferred arrangement described in section 401(k) of the Code (including any such election to make a Designated Roth Contribution), a qualified transportation fringe benefit program described in section 132(f) of the Code or a cafeteria plan described in section 125 of the Code. For purposes of the preceding sentence, the normal base pay of an Employee who works and is compensated based on a shift schedule other than a basic work week consisting of five regularly scheduled eight-hour work days shall be computed by multiplying the number of regularly scheduled basic work hours for which such Employee is paid by his or her basic hourly rate, determined without regard to any premium payments made at an overtime rate for such work. An Employee's "compensation" (within the meaning of section 415 of the Code) for any Plan Year in excess of the applicable dollar limitation contained in Section 401(a)(17) of the Code (as adjusted for changes in the cost of living pursuant to section 401(a)(17) of the Code), shall be not be taken into account for any purpose under the Plan. Notwithstanding the preceding, effective January 1, 2003, normal base pay shall also include lump sum merit increases to base pay. Notwithstanding the foregoing, an amount classified as Compensation under the preceding paragraphs shall not be Compensation for purposes of the Plan if such amount is paid to an Employee after the Employee's severance from employment unless (i) such amount is regular compensation for services during the Employee's regular working hours or compensation for services outside the Employee's regular working hours and (ii) such amount is paid on or before the later of (A) 2 ½ months after the Employee's severance from employment and (B) the last day of the Plan Year during which the Employee's severance from employment occurs. Finally, in no event shall Compensation for purposes of this Plan include any amount that is not "compensation" within the meaning of section 415(c)(3) of the Code and section 1.415(c)-2 of the Regulations.

(14) Corporate Investment Committee. The Company acting through the Committee consisting of the executives or other persons designated from time to time in the charter of such Committee.

(15) Designated Roth Contributions. Before-Tax Contributions designated as Roth contributions pursuant to Section 4.2(e) (relating to Untaxed Contributions and Designated Roth Contributions) by a Participant.

(16) Designated Roth Contributions Account. The account established pursuant to Section 7.1 for each Participant to which shall be credited all Designated Roth Contributions made on behalf of such Participant pursuant to Section 4.2(c) for Plan Years beginning on or after January 1, 2006 and earnings (or losses) thereon for each Participant who is not represented by IBEW Local Union 15 and covered under the collective bargaining agreement between Commonwealth Edison Company and IBEW Local Union 15 ("Local 15 Member") and (b) for Plan Years beginning on or after January 1, 2009 and earning (or losses) thereon for each Participant who is a Local 15 Member.

(17) Disability. A physical or mental condition which, in the judgment of the Administrator, based upon medical reports and other evidence satisfactory to the Administrator, permanently prevents a Participant from satisfactorily performing his or her usual duties or the duties of such other position available to him and for which he is qualified by reason of his or her training, education or experience.

(18) Effective Date. January 1, 2010.

(19) Eligible Employee. An Employee other than (i) an Employee the terms of whose employment are subject to a collective bargaining agreement that does not provide for participation in this Plan, (ii) an Employee on an unpaid leave of absence (except as required by applicable law respecting Military Service), (iii) an Employee paid on the temporary payroll of an Employer who has never completed 1,000 Hours of Service in any period of twelve consecutive months beginning with the Employee's date of employment or any anniversary thereof, (iv) an individual rendering services to an Employer who is not on the payroll of any Employer, (v) as of the Effective Time, an individual who was employed immediately prior to the Effective Time (as such term is defined in the Merger Agreement) at CEG or a facility owned immediately before the Effective Time by CEG and (vi) an individual who is newly employed on or after the Effective Time (as such term is defined in the Merger Agreement) at a facility owned immediately before the Effective Time by CEG. It is expressly intended that an individual rendering services to an Employer pursuant to any of the following agreements shall be excluded from Plan participation pursuant to clause (iv) of this subdivision even if a court or administrative agency determines that such individual is an Employee: (a) an agreement providing that such services are to be rendered as an independent contractor, (b) an agreement with an entity, including a leasing organization within the meaning of section 414(n)(2) of the Code, that is not an Employer or (c) an agreement that contains a waiver of participation in the Plan.

(20) Employee. An individual whose relationship with an Employer is, under common law, that of an employee.

(21) Employer. The Company and any other Affiliate set forth on Appendix I hereto that, with the consent of the Company elects to participate in the Plan in the manner described in Article 12 either with respect to all Employees or a particular group of Employees of such Affiliate and any successor Affiliate that adopts the Plan pursuant to Article 13. If any entity described in the preceding sentence withdraws from participation in the Plan pursuant to Section 12.2, such entity shall thereupon cease to be an Employer.

(22) Employer Matching Contributions. Contributions made by an Employer pursuant to Section 4.3.

(23) Employer Matching Contributions Account. The account established pursuant to Section 7.1 to which shall be credited (i) any Employer Matching Contributions made on behalf of a Participant, (ii) any employer matching contributions transferred to the Plan from the PECO Energy Company Employee Savings Plan (including any employer matching contributions transferred to such plan from the Philadelphia Electric Company Tax Reduction Act Stock Ownership Plan) on behalf of such Participant and (iii) earnings (or losses) thereon.

(24) ERISA. The Employee Retirement Income Security Act of 1974, as amended.

(25) Hour of Service. Each hour for which an Employee is directly or indirectly compensated by, or entitled to receive compensation from, an Employer. For purposes of this subdivision, compensation shall mean the total earnings paid, directly or indirectly, to the Employee by an Employer, including any back pay, irrespective of mitigation of damages, either awarded to the Employee or agreed to by an Employer. The computation of Hours of Service and the periods to which Hours of Service are credited shall be determined under uniform rules adopted by the Administrator in accordance with Department of Labor regulations §2530.200b-2(b), (c) and (f).

(26) Investment Office. The Company acting through the Exelon Investment Office.

(27) Merger Agreement. That Agreement and Plan of Merger, dated as of April 28, 2011, by and among Exelon Corporation, Bolt Acquisition Corporation and Constellation Energy Group, Inc.

(28) Military Service. The performance of duty on a voluntary or involuntary basis in a “uniformed service” (as defined below) under competent authority of the United States government and includes active duty, active duty for training, initial active duty for training, inactive duty training, full-time National Guard duty, and a period for which a person is absent from employment for the purpose of an examination to determine the fitness of the person to perform any such duty. For purposes of the preceding sentence, the term “uniformed service” means the Armed Forces, the Army National Guard and the Air National Guard when engaged in active duty for training, inactive duty training, or full-time National Guard duty, the commissioned corps of the Public Health service, and any other category of persons designated by the President of the United States in time of war or emergency.

(29) Participant. An Eligible Employee who satisfies the conditions set forth in Section 3.1 (relating to eligibility for Participation). An individual shall cease to be a Participant upon the complete distribution, or transfer of his or her account under the Plan. For any period in which the

Plan is not an "ERISA section 404(c) Plan" as defined in Regulations under section 404(c) of ERISA, each Participant shall be a "named fiduciary" within the meaning of section 402(a)(1) of ERISA for the sole purpose of directing the Trustee with respect to the exercise of shareholder rights pursuant to Article 9 (relating to Participants' stockholder rights).

(30) Plan. The plan herein set forth, and as from time to time amended.

(31) Plan Year. The twelve-month period beginning on each January 1.

(32) Qualified Reservist. The term "Qualified Reservist" shall mean an individual who is (i) a member of a reserve component (as defined in chapter 1 of title 37, United States Code) and (ii) ordered or called to active duty for a period in excess of 179 days or for an indefinite period, after September 11, 2001.

(33) Regulations. Written final or temporary promulgations of the Department of Labor construing Title I of ERISA or the Internal Revenue Service construing the Code.

(34) Rollover Account. The account established pursuant to Section 7.1 to which shall be credited (i) any rollover contribution made by or on behalf of an Eligible Employee or a Participant, (ii) any rollover contribution transferred to the Plan from the PECO Energy Company Employee Savings Plan on behalf of such Participant and (iii) earnings (or losses) thereon.

(35) Spouse. The individual who is a husband or wife of a Participant as the result of a legal union between one man and one woman, within the meaning of the Defense of Marriage Act.

(36) Termination Date. (a) The date an Employee quits, retires, is discharged from employment by an Employer or dies, (b) the date the Employee's employer ceases to be an Employer on account of its sale to a party or parties that do not qualify as an Affiliate of any Employer, (c) the first anniversary of the Employee's first date of absence from employment by an Employer for any other reason, except as provided in clause (d) or (e) below, (d) in the case of an Employee who is absent from employment for maternity or paternity reasons, the second anniversary of the first date of such absence or (e) the last date following a period of Military Service as of which the Employee has reemployment rights under applicable law. For purposes of this subdivision, an absence from employment for maternity or paternity reasons means an absence (1) by reason of the pregnancy of the Employee, (2) by reason of the birth of a child of the Employee, (3) by reason of the placement of a child with the Employee in connection with the adoption of such child by such Employee or (4) for purposes of caring for such child for a period beginning immediately following such birth or placement. Notwithstanding the foregoing sentences, an Employee's absence from employment for maternity or paternity reasons or for Military Service shall not be considered in determining the Employee's Termination Date unless the Employee, upon the Administrator's request, provides certification that the leave was taken for one of the reasons enumerated in the preceding sentence.

(37) Trust. The trust created by agreement between the Company and the Trustee, as from time to time amended.

(38) Trust Fund. All money and property of every kind of the Trust held by the Trustee pursuant to the terms of the Trust agreement.

(39) Trustee. The trustee that executes the Trust instrument provided for in Article 6, or any successor trustee or, if there is more than one trustee acting at any time, all of such trustees collectively.

(40) Untaxed Contributions. Before-Tax Contributions not designated as Designated Roth Contributions pursuant to Section 4.2(e) (relating to Untaxed Contributions and Designated Roth Contributions) by a Participant.

(41) Untaxed Contributions Account. The account established pursuant to Section 7.1 for each Participant to which shall be credited (a) all Before-Tax Contributions that are made on behalf of the Participant pursuant to Section 4.2 for Plan Years beginning prior to January 1, 2006 with respect to a Participant who is not a Local 15 Member and for Plan Years beginning before January 1, 2009 with respect to a Participant who is a Local 15 Member, (b) any before-tax contributions transferred to the Plan from the PECO Energy Company Employee Savings Plan on behalf of such Participant, (c) all Before-Tax Contributions that are Untaxed Contributions made pursuant to Section 4.2 for Plan Years beginning on or after January 1, 2006 with respect to a Participant who is not a Local 15 Member and for Plan Years beginning before January 1, 2009 with respect to a Participant who is a Local 15 Member, and (d) earnings (or losses) thereon.

(42) Valuation Date. Each business day, as determined by the Trustee, or such other days as the Administrator may designate.

(43) VRU. The telephonic voice response unit designated by the Administrator, which may be used to make certain elections under the Plan. The VRU shall require each Participant, or Beneficiary, as the case may be, to provide such identification data as may, from time to time, be required by the VRU. The Administrator shall cause to be kept such records of VRU activity as it shall deem necessary or appropriate, and such records shall constitute valid authorization of the elections made by each Participant and Beneficiary for all purposes of the Plan and applicable Regulations. No written authorization shall be required from a Participant or Beneficiary after an election has been made by calling the VRU.

ARTICLE 3

PARTICIPATION

Section 3.1. Eligibility for Participation.

Each Eligible Employee who immediately before the Effective Date was a Participant in the Plan shall continue to be a Participant as of the Effective Date. Each other Eligible Employee who is a member of a bargaining unit represented by IBEW Local Union 15 shall be eligible to become a Participant on the first day of the payroll period coinciding with or next following the date he or she has completed three months of employment with an Employer (regardless of the number of Hours of Service actually performed). Each other Eligible Employee who is not a member of a bargaining unit represented by IBEW Local Union 15 shall be eligible to become a Participant on the first day of the payroll period coinciding with or next following the date of his or her employment.

Section 3.2. Applications for Before-Tax Contributions and After-Tax Contributions.

(a) Regular Payroll Before-Tax and After-Tax Contributions. Each Eligible Employee who desires to commence Before-Tax Contributions or After-Tax Contributions shall make a request in the manner prescribed by the Administrator specifying the Employee's chosen rate of Before-Tax Contributions for each payroll period or his or her chosen rate of After-Tax Contributions for each payroll period, or both. Such request shall authorize the Employee's Employer to reduce the Eligible Employee's Compensation by the amount of any such Before-Tax Contributions, to make regular payroll deductions of any such After-Tax Contributions or both, as the case may be. The request shall also specify the Employee's investment elections pursuant to Section 7.1(b) and shall evidence the Employee's acceptance of and agreement to all provisions of the Plan. In addition, an Eligible Employee who is not a member of a bargaining unit represented by IBEW Local Union 15 on the date of his or her employment may elect, in accordance with the provisions of this paragraph (a), to become a Participant on the first day of the payroll period coinciding with or next following such date. All requests to commence contributions pursuant to this paragraph (a) shall be effective as of such time after the Administrator (or its delegate) receives such request as shall be established by the Administrator, provided, that all such requests shall be effective on the first day of a payroll period commencing not more than 30 days after receipt thereof by the Administrator (or its delegate).

(b) Quarterly Incentive Award Before-Tax Contributions. With respect to quarterly incentive awards earned prior to January 1, 2002, each Eligible Employee may request, in the manner prescribed by the Administrator, to reduce his or her compensation by an amount equal to 100 percent of any such quarterly incentive awards that would otherwise be paid to such Participant; provided, however, that for the 2001 Plan Year, such reduction shall be available solely with respect to quarterly incentive awards payable on or after the later of (i) March 31, 2001 and (ii) the first date thereafter which the Administrator determines is administratively practicable with respect to Employees of such Participant's Employer. Before-Tax Contributions pursuant to this paragraph (b) shall be invested in accordance with the Participant's investment election under paragraph (a) of this Section 3.2 (or, if no such election is in effect, in accordance with an investment election made by such Participant in the manner prescribed by the Administrator).

(c) Automatic Enrollment for Certain Employees. (i) Deemed Election of Default Before-Tax Contributions. A Participant whose hire date is on or after April 6, 2009 and who does not make an election pursuant to paragraph (a) of this Section 3.2 to make Before-Tax Contributions or After-Tax Contributions shall be deemed to have elected to make Before-Tax Contributions ("Default Before-Tax Contributions") equal to 3 percent ("Default Percentage") of his or her Compensation for each payroll period and to have his or her Employer reduce his or her Compensation by the amount thereof. Such Participant's Default Percentage will increase by 1 percent each Plan Year, beginning with the second Plan Year that begins after the Default Percentage first applies to the Participant, until it reaches 5 percent. The increase will be effective March 1 of each applicable Plan Year. Notwithstanding the foregoing, in the event a Participant's initial Default Before-Tax Contribution occurs during the period commencing on December 1 and ending the last day of February, the initial increase to such Participant's Default Percentage shall commence on the March 1 of the calendar year following the first anniversary of the Participant's initial Default Before-Tax Contribution. The effective date of such Participant's deemed election shall be 90 days after the Participant receives a notice of his or her rights and obligations under this paragraph (c)(i) (the "Automatic Enrollment Notice"). During the 90-day period after the Participant receives the Automatic Enrollment Notice, the Participant shall have an opportunity to make an affirmative election to (1) not have any Default Before-Tax Contributions made on his or her behalf or (2) have Before-Tax Contributions made in a different amount or percentage of Compensation by giving direction to the Administrator (or its delegate) in the manner prescribed by the Administrator. Any deemed election described in this paragraph (c)(i) shall be effective only with respect to Compensation not currently available to the Participant. Each Participant whose hire date is on or after April 6, 2009 shall be a "covered employee" for purposes of section 1.414(w)-1(e)(3) of the Regulations, regardless of whether such Participant makes an affirmative election regarding Before-Tax Contributions. Notwithstanding the foregoing, an Employee who on or after April 6, 2009 becomes eligible to participate in the Plan as a result of the Employee's rehire by an Employer shall not be deemed to have made an election automatically to have Before-Tax Contributions made on his or her behalf pursuant to this paragraph (c)(i) or deemed to be a "covered employee."

(ii) Withdrawal of Default Before-Tax Contributions. A covered employee deemed to elect Default Before-Tax Contributions pursuant to paragraph (c)(i) may elect, no later than 90 days after the first payroll date that the first Default Before-Tax Contributions on behalf of the covered employee occurs, to receive a distribution equal to the amount of all such contributions (adjusted for earnings and losses and reduced by any applicable fees) made with respect to the covered employee through the earlier of (1) the pay date for the second payroll period that begins after the covered employee's withdrawal request and (2) the first pay date that occurs after 30 days following the covered employee's request. An election by a covered employee to withdraw Default Before-Tax Contributions pursuant to this paragraph (c)(ii) shall be deemed to be an election by the covered employee, as of the date of the withdrawal election, to reduce his Before-Tax Contribution percentage to 0 percent (subject to any affirmative election by the covered employee to the contrary).

Section 3.3. Transfer to Affiliates.

If a Participant is transferred from one Employer to another Employer or from an Employer to an Affiliate, such transfer shall not terminate the Participant's participation in the Plan and such Participant shall continue to participate in the Plan until an event occurs that would have terminated his or her participation had the Participant continued in the service of an Employer until the occurrence of such event; provided, however, that a Participant shall not be entitled (i) to make contributions to the Plan, or (ii) to have contributions made on his or her behalf to the Plan during any period of employment by any Affiliate that is not an Employer with respect to such Participant. Periods of employment with an Affiliate shall be taken into account only to the extent set forth in Section 10.4 (relating to employment by Affiliates). Payments received by a Participant from an Affiliate that is not an Employer with respect to such Participant shall not be treated as compensation for any purposes under the Plan.

ARTICLE 4

EMPLOYER CONTRIBUTIONS

Section 4.1. Before-Tax Contributions.

(a) Initial Election Respecting Regular Payroll Before-Tax Contributions. Subject to the limitations set forth in Sections 4.2 (relating to the 402(g) annual limit on Before-Tax Contributions), 4.4 (relating to limitations on contributions for highly compensated Eligible Employees), 4.5 (relating to the limitation on Employer contributions) and 7.4 (relating to limitations on allocations imposed by section 415 of the Code), each Employer shall contribute (i) on behalf of each Participant who is an Eligible Employee of such Employer and is a member of a bargaining unit represented by IBEW Local Union 15 an amount equal to a whole percentage not less than 1 and not more than 15 percent of such Participant's Compensation for each payroll period as designated by the Participant in his or her request pursuant to Section 3.2(a), and (ii) on behalf of any other Participant who is an Eligible Employee of such Employer an amount equal to a whole percentage not less than 1 and not more than 20 percent and, effective as of January 1, 2006, 50 percent, of such Participant's Compensation for each payroll period as designated by the Participant on his or her request pursuant to Section 3.2(a). Before-Tax Contributions described in the preceding sentence shall be delivered to the Trustee no less frequently than bi-weekly. In addition, if back-pay is awarded to a Participant who is an Eligible Employee and any portion of such back-pay constitutes Compensation as defined in subdivision (13) of Article 2 (relating to the definition of Compensation), the Employer of such Participant shall contribute on behalf of such Participant an amount equal to the Before-Tax Contribution percentage, which was most recently chosen by the Participant in his or her request pursuant to Section 3.2(a), of such back-pay that constitutes Compensation. A Before-Tax Contribution described in the preceding sentence shall be treated under the Plan in the same manner as all other Before-Tax Contributions and shall be delivered to the Trustee as soon as practicable after the back-pay is paid to the Participant.

If a Participant receives a hardship withdrawal pursuant to Section 8.1(a), then: (1) all Before-Tax Contributions made on behalf of such Participant pursuant to this Section 4.1 and After-Tax Contributions made by the Participant pursuant to Section 5.1 shall cease beginning with the first payroll period beginning after the date on which the Participant receives such hardship withdrawal; and (2) such Participant shall not again be eligible to elect such contributions until the first payroll period that coincides with or follows the date on which contributions ceased by six months.

(b) Changes in the Rate or Suspension of Regular Payroll Before-Tax Contributions. A Participant's Before-Tax Contributions pursuant to paragraph (a) of this Section 4.1 shall continue in effect at the rate designated by a Participant in his or her request until the Participant changes such designation or suspends such contributions. A Participant may change such designation at any time by giving direction to the Administrator (or its delegate) in the manner prescribed by the Administrator. Any such direction shall be limited to the contribution rates described in paragraph (a) of this Section 4.1.

A Participant may suspend future Before-Tax Contributions pursuant to paragraph (a) of this Section 4.1 by giving notice to the Administrator (or its delegate) in the manner prescribed by the Administrator. A Participant who has ceased Before-Tax Contributions pursuant to this subsection may resume Before-Tax Contributions by so directing the Administrator (or its delegate) in the manner prescribed by the Administrator. All such directions to change the rate of, suspend or resume Before-Tax Contributions shall be effective as of such time after the Administrator (or its delegate) receives any such direction as shall be established by the Administrator, provided that such direction shall be effective on the first day of a payroll period commencing not more than 30 days after receipt thereof by the Administrator (or its delegate).

(c) Elections Respecting Quarterly Incentive Award Before-Tax Contributions. With respect to quarterly incentive awards earned prior to January 1, 2002, and subject to the limitations set forth in subdivision (13) of Article 2 (relating to the $170,000 limitation on Compensation) and Sections 4.2 (relating to the 402(g) limit on Before-Tax Contributions), 4.4 (relating to limitations on contributions for highly compensated Eligible Employees), 4.5 (relating to the limitation on Employer contributions) and 7.4 (relating to limitations on allocations imposed by section 415 of the Code), each Employer shall contribute on behalf of each Participant who has filed a request in accordance with Section 3.2(b) an amount equal to 100 percent of the amount of any such quarterly incentive awards payable to such Participant on or after the effective date of such request. A Participant's Before-Tax Contributions pursuant to this paragraph (c) shall continue in effect until the Participant suspends such contributions. A Participant may suspend such contributions by giving direction to the Administrator (or its delegate) in the manner prescribed by the Administrator. Any such direction to suspend Before-Tax Contributions pursuant to this paragraph (c) shall be effective beginning with the quarterly incentive award payable in the calendar quarter immediately following the calendar quarter in which such direction is received by the Administrator (or its delegate). Before-Tax Contributions pursuant to this paragraph (c) shall be delivered to the Trustee not later than the fifteenth business day of the month following the month in which the related quarterly incentive award is payable.

(d) Catch-Up Contributions. Effective for payroll periods beginning on or after August 1, 2002, each Participant who pursuant to paragraph (a) of this Section 4.1 is eligible to make Before-Tax Contributions for any Plan Year and who shall attain age 50 before the close of such Plan Year shall be eligible to have Before-Tax Contributions made in addition to those described in paragraph (a) of this Section 4.1 ("Additional Before-Tax Contributions") if no other Before-Tax Contributions to be made pursuant to paragraph (a) of this Section 4.1 may be made to the Plan for such payroll period by reason of the limitations of Section 4.2 (relating to the 402(g) annual limit on Before-Tax Contributions). Notwithstanding the preceding sentence, in no event shall the amount of Additional Before-Tax Contributions exceed (i) in the case of a Participant who is represented by IBEW Local Union 15 and covered under that certain Collective Bargaining Agreement dated September 15, 2000 between Commonwealth Edison Company and IBEW Local Union 15, 40 percent of such Participant's Compensation for any payroll period, and (ii) in the case of any other Participant, 50 percent of such Participant's Compensation for any payroll period. Such Additional Before-Tax Contributions shall be elected, made, suspended, resumed and credited in a manner similar to that described in paragraphs (a), (b) and (c) of this Section 4.1 and in accordance with and subject to such additional rules and limitations of section 414(v) of the

Code and otherwise as the Administrator determines. To the extent such Additional Before-Tax Contributions are not “Catch-Up Contributions” as defined for purposes of section 414(v) of the Code, they shall be taken into account, and to the extent such Additional Before-Tax Contributions are Catch-Up Contributions they shall not be taken into account, for purposes of Article 4 or 7 or other provisions of the Plan implementing the required limitations of sections 401(k)(3), 401(k)(11), 401(k)(12), 402(g), 404, 410(b), 415 or 416 of the Code, as applicable.

Section 4.2. 402(g) Annual Limit on Before-Tax Contributions.

(a) General Rule. Notwithstanding the provisions of Section 4.1 (relating to Before-Tax Contributions), a Participant’s Before-Tax Contributions for any calendar year, together with amounts contributed under all other plans and arrangements maintained by an Employer or Affiliate and described in sections 401(k), 408(k), 408(p) or 403(b) of the Code, and excluding any Additional Before-Tax Contributions made to the Plan pursuant to paragraph (d) of Section 4.1 which are Catch-Up Contributions described in such paragraph or Default Before-Tax Contributions that are withdrawn pursuant to paragraph (c)(ii) of Section 3.2, shall not exceed the applicable dollar amount under section 402(g) of the Code (as adjusted for cost-of-living increases in accordance with section 402(g)(5) of the Code) for such calendar year.

(b) Correction of Excess Before-Tax Contributions. If for any calendar year a Participant determines that the aggregate of the (i) Before-Tax Contributions to this Plan, excluding any Additional Before-Tax Contributions made to the Plan pursuant to paragraph (d) of Section 4.1 which are Catch-Up Contributions described in such paragraph, and (ii) amounts contributed under other plans or arrangements described in sections 401(k), 408(k) or 403(b) of the Code will exceed the limit imposed by paragraph (a) of this Section 4.2 for the calendar year in which such contributions were made (“Excess Before-Tax Contributions”), such Participant shall, pursuant to such rules and at such time following such calendar year as determined by the

Administrator, be allowed to submit a written request that the Excess Before-Tax Contributions plus any income and minus any loss allocable thereto be distributed to him or her. The request described in this subsection shall be made in the manner and form prescribed by the Administrator and shall state the amount of the Participant's Excess Before-Tax Contributions for the calendar year. The request shall be accompanied by the Participant's written statement that if such Excess Before-Tax Contributions are not distributed, such Excess Before-Tax Contributions, when added to amounts deferred under other plans or arrangements described under sections 401(k), 408(k), or 403(b) of the Code, excluding any contributions which are Catch-Up Contributions described in section 414(v) of the Code, will exceed the limit for such Participant under section 402(g) of the Code. A distribution of Excess Before-Tax Contributions (reduced by any amounts recharacterized or distributed pursuant to paragraph (e)(1) of Section 4.4 (relating to adjustments to comply with section 401(k)(3) of the Code)) shall be made no later than the applicable time period set forth in the Code and Regulations thereunder following the end of the Plan Year for which such Excess Before-Tax Contributions were made, plus any income and minus any loss allocable thereto through the end of such Plan Year. The amount of any income or loss allocable to such Excess Before-Tax Contributions shall be determined pursuant to applicable Regulations. If Excess Before-Tax Contributions are distributed pursuant to this Section 4.2, any corresponding Employer Matching Contributions allocated to the Participant's Employer Matching Contributions Account, adjusted for income or loss pursuant to Regulations, to which such Participant would be entitled under Section 8.3 (relating to distributions upon termination of employment) if such Participant had terminated employment on the last day of the calendar year during which contributions were made (or earlier if such Participant actually terminated employment at an earlier date) shall be distributed to such Participant and any remaining amount of such corresponding Employer Matching Contributions, adjusted for income or loss, shall be forfeited.

Notwithstanding the provisions of this paragraph, any such Excess Before-Tax Contributions shall be treated as “annual additions” for purposes of Section 7.4 (relating to limitations on allocations imposed by section 415 of the Code) and shall not be disregarded as Before-Tax Contributions for purposes of determining the average deferral percentage described in Section 4.4(d)(1) or, to the extent applicable, the average contribution percentage described in Section 4.4(d)(2), except that in the case of a non-highly compensated eligible employee, as that term is defined in Section 4.4(d)(4), such Excess Before-Tax Contributions shall be ignored to the extent that such contributions are prohibited pursuant to section 401(a)(30) of the Code, which requires that Before-Tax Contributions not exceed the limit described in paragraph (a) of Section 4.2 (relating to the annual limit on Before-Tax Contributions). Any distribution of Excess Before-Tax Contributions to a Participant shall be treated as a distribution of the Untaxed Contributions, up to the extent Untaxed Contributions have been made by such Participant to the Plan for such Plan Year and, to the extent that distributions of Excess Before-Tax Contributions to such Participant exceed the Participant’s Untaxed Contributions for such Plan Year, the distributions of Excess Before-Tax Contributions shall be treated as Designated Roth Contributions made by the Participant to the Plan for the Plan Year.

(c) Untaxed Contributions and Designated Roth Contributions. Effective for Before-Tax Contributions made (i) in the case of a Participant who is not a Local 15 Member, for the 2006 Plan Year and thereafter, and (ii) in the case of a Participant who is a Local 15 Member, for the 2009 Plan Year and thereafter, an election made by a Participant to commence, change, suspend or resume Before-Tax Contributions pursuant to this Section 4.2 shall designate the portion of such contributions that are to be Designated Roth Contributions includible in the Participant’s gross income when made pursuant to section 402A of the Code. Such designation is irrevocable with respect to contributions made or to be made with respect to Compensation currently available. Any such election made by a Participant which does not expressly designate a portion of Before-Tax Contributions as Designated Roth Contributions shall be deemed to designate no portion of Before-Tax Contributions as Designated Roth Contributions. Any Before-Tax Contributions that are not Designated Roth Contributions are referred to herein as Untaxed Contributions.

Section 4.3. Employer Matching Contributions.

(a) Amount of Contributions. Subject to the limitations set forth in Sections 4.4 (relating to limitations on contributions for highly compensated Eligible Employees), 4.5 (relating to the limitations on Employer contributions) and 7.4 (relating to limitations on allocations imposed by section 415 of the Code), and except as otherwise provided below, each Employer shall contribute the following for each payroll period on behalf of each Participant who is an Employee of such Employer:

(i) Effective beginning with the first payroll period in January 1, 2009, for each Participant who is a member of a bargaining unit represented by IBEW Local Union 15, an amount equal to 100 percent of Matched Contributions, as defined below, but only to the extent that Matched Contributions do not exceed 5 percent of the Participant's Compensation for the payroll period;

(ii) For each Participant who is covered under the collective bargaining agreement between Exelon Power Services LLC and Local 369 of the Utility Workers Union of America, AFL-CIO, if such Participant has completed less than 5 months of service with an Employer, no contribution shall be made; if such Participant has completed more than 5 months of service but fewer than 12 months of service with an Employer, an amount equal to 50% of Matched Contributions, as defined below, but only the extent that Matched Contributions do not exceed 3 percent of the Participant's Compensation for the payroll period; if such Participant has completed at least 12 months of service with an Employer, an amount equal to 100% of Matched Contributions, but only to the extent that Matched Contributions do not exceed 3 percent of the Participant's Compensation for the payroll period. For purposes of this paragraph, a month of service shall mean a consecutive period of employment during which the Employee is employed by an Employer ending on the monthly anniversary of the Employee's date of hire. A Participant who is credited with an additional month of service during a pay period and becomes eligible to receive an increased Employer Matching Contribution, shall not be entitled to receive an increased Employer Matching Contribution until the first full payroll period following the payroll period in which such Participant is credited with such additional month of service;

(iii) For each Participant who is classified as a non-exempt craft employee or clerical employee assigned to the Peachbottom, Limerick, Outage Services East or Texas generating plant, an amount equal to 100 percent of Matched Contributions, as defined below, but only to the extent that Matched Contributions do not exceed 5 percent of the Participant's Compensation for the payroll period; and

(iv) For each other Participant, an amount equal to 60 percent of Matched Contributions, as defined below, but only to the extent that Matched Contributions do not exceed 5 percent of the Participant's Compensation for the payroll period.

In addition, each Participant described in clause (iv) of the preceding paragraph shall be eligible to receive a "Profit Sharing Matching Contribution," provided that such Participant either (i) is an Employee of such Employer on the last day of such Plan Year, (ii) is not employed on such day as a result of an approved unpaid leave of absence during such Plan Year, (iii) terminates employment during such Plan Year (1) after attaining age 50 and completing at least 10 years of service, as determined by the Administrator, (2) as a result of circumstances entitling the Participant to separation benefits under an Employer's severance benefit plan, (3) as a result of a disability that entitles the Participant to benefits under an Employer's long-term disability plan, or (4) on account of the Participant's death. The "Profit Sharing Matching Contribution" shall be an amount (if any) determined by the Board of Directors of the Company (or the Compensation Committee thereof) in its sole discretion based on attainment of specified performance goals, and not exceeding 60% of a Participant's Matched Contributions, as defined below, for each payroll period, but only to the extent that such Matched Contributions do not exceed 5 percent of the Participant's Compensation for the payroll period.

For purposes of this Section 4.3, “Matched Contributions” means the sum of (i) the Before-Tax Contributions made on behalf of the Participant for a payroll period, excluding Before-Tax Contributions made with respect to any quarterly incentive awards pursuant to paragraph (b) of Section 3.2, excluding Additional Before-Tax Contributions which are Catch-Up Contributions described in section 414(v) of the Code and excluding Default Before-Tax Contributions distributed pursuant to paragraph (c)(ii) of Section 3.2 (relating to withdrawal of Default Before-Tax Contributions), and (ii) the After-Tax Contributions made by the Participant for such payroll period. Any Employer Matching Contributions made by an Employer with respect to Default Before-Tax Contributions that are withdrawn pursuant to paragraph (c)(ii) of Section 3.2, plus any earnings, shall be forfeited and used to reduce future Employer Matching Contributions made by an Employer pursuant to this Section.

In addition to the Employer Matching Contributions described above, in the case of a New England Plan Participant, as defined in Supplement IV attached hereto, whose Before-Tax Contributions exceed the limit described in Section 4.2 (relating to the 402(g) annual limit on Before-Tax Contributions), an additional Employer Matching Contribution shall be made on behalf of such Participant in an amount equal to the amount described in clause (iii) above assuming that such Participant had continued making the same rate of Before-Tax Contributions that were in effect with respect to such Participant at the time such Before-Tax Contributions exceeded the limit described in Section 4.2.

(b) Special Part-Time Employees. Notwithstanding paragraph (a) hereof, no Employer shall make a contribution pursuant to this Section 4.3 on behalf of any Participant who is a “part-time regular employee” as defined in an Agreement dated July 23, 1993 between the Company and the System Council U-25, I.B.E.W. (the “July 23, 1993 Agreement”), unless one of the following applies:

(1) the Participant had in effect on July 23, 1993 an authorization to make contributions under the Plan as then in effect and elected pursuant to the July 23, 1993 Agreement and request by the Company to become a part-time regular employee during the initial staffing period that began July 23, 1993 and ended December 31, 1993 (the “Initial Staffing Period”);

(2) the Participant had in effect on the date the Participant became a part-time regular employee an authorization to make contributions under the Plan as then in effect and chose the Option II Benefits Package as described in the July 23, 1993 Agreement, as amended;

(3) the Participant did not have in effect on the date the Participant became a part-time regular employee an authorization to make contributions under the Plan as then in effect and elected pursuant to the July 23, 1993 Agreement and request by the Company to become a part-time regular employee during the Initial Staffing Period; provided such Participant had in effect on any date after December 24, 1995 and before February 20, 1996 an authorization to make contributions under the Plan; or

(4) the Participant elected other than pursuant to the July 23, 1993 Agreement to become a part-time regular employee during the Initial Staffing Period; provided that such Participant had in effect on any date after December 24, 1995 and before February 20, 1996 and authorization to make contributions under the Plan.

(c) Time of Delivery of Contributions. Employer Matching Contributions for any Plan Year shall be delivered to the Trustee at the same time the Before-Tax contributions or After-Tax Contributions to which such Employer Matching Contributions relate are delivered to the Trustee.

Section 4.4. Limitations on Contributions for Highly-Compensated Eligible Employees.

(a) Limits Imposed by Section 401(k)(3) of the Code. Notwithstanding the provisions of Section 4.1 (relating to Before-Tax Contributions), if the Before-Tax Contributions for a Plan Year fail, or in the judgment of the Administrator are likely to fail, to satisfy both of the tests set forth in paragraphs (1) and (2) of this subsection, the adjustments prescribed in paragraph (e)(1) of this Section 4.4 shall be made.

(1) The average deferral percentage for the group consisting of highly compensated eligible employees of all Employers does not exceed the product of the average deferral percentage for the group consisting of non-highly compensated eligible employees multiplied by 1.25.

(2) The average deferral percentage for the group consisting of highly compensated eligible employees of all Employers (i) does not exceed the average deferral percentage for the group consisting of non-highly compensated eligible employees by more than two percentage points, and (ii) does not exceed two times the average deferral percentage for such group.

Effective for payroll periods beginning on or after August 1, 2002, any Additional Before-Tax Contributions which are "Catch-Up Contributions" described in paragraph (d) of Section 4.1 shall not be considered as Before-Tax Contributions for purposes of determining whether the tests set forth in paragraphs (1) and (2) of this subsection are satisfied or for purposes of making any adjustments prescribed in paragraph (e) of this Section 4.4.

(b) Limits Imposed by Section 401(m) of the Code. Notwithstanding the provisions of Section 4.3 (relating to Employer Matching Contributions) and Section 5.1 (relating to After-Tax Contributions), if the Employer Matching Contributions and After-Tax Contributions for a Plan Year fail, or in the judgment of the Administrator are likely to fail, to satisfy both of the tests set forth in paragraphs (1) and (2) of this subsection, the adjustments prescribed in paragraph (e)(2) of this Section 4.4 shall be made.

(1) The average contribution percentage for the group consisting of highly compensated eligible employees of all Employers does not exceed the product of the average contribution percentage for the group consisting of non-highly compensated eligible employees multiplied by 1.25.

(2) The average contribution percentage for the group consisting of highly compensated eligible employees of all Employers (i) does not exceed the average contribution percentage for the group consisting of non-highly compensated eligible employees by more than two percentage points, and (ii) does not exceed two times the average contribution percentage for such group.

(c) Aggregate Limit on Contributions. **Deleted in its entirety.**

(d) Definitions. For purposes of this Section 4.4:

(1) the “average deferral percentage” for a group of Eligible Employees with respect to a Plan Year shall be the average of the ratios, calculated separately for each Eligible Employee in such group to the nearest one-hundredth of one percent, of the Before-Tax Contributions made for the benefit of such Eligible Employee to the total compensation paid to such Eligible Employee for the portion of such Plan Year during which such Eligible Employee was a Participant, except that no Additional Before-Tax Contributions which are “Catch-Up Contributions” described in paragraph (d) of Section 4.1 or Default Before-Tax Contributions that are withdrawn pursuant to paragraph (c)(ii) of Section 3.2 shall be considered as Before-Tax Contributions for purposes of determining a Participant’s average deferral percentage;

(2) the “average contribution percentage” for a group of Eligible Employees with respect to a Plan Year shall be the average of the ratios, calculated separately for each Eligible Employee in such group to the nearest one-hundredth of one percent, of the Employer Matching Contributions made, After-Tax Contributions made and, in the Administrator’s sole discretion, to the extent permitted under Regulations or otherwise under the Code, the Before-Tax Contributions made during such year for the benefit of such Eligible Employee, except that no Additional Before-Tax Contributions which are “Catch-Up Contributions” described in paragraph (d) of Section 4.1, shall be considered as Before-Tax Contributions for purposes of determining a Participant’s average contribution percentage, to such Eligible Employee’s compensation for the portion of such Plan Year during which such Eligible Employee was a Participant;

(3) the term “highly compensated eligible employee” shall mean any Eligible Employee who is a Participant, who performs service in the determination year and who (a) is a 5%-owner (as determined under section 416(i)(1)(A)(iii) of the Code) at any time during the Plan Year or the preceding Plan Year or (b) both (1) is paid compensation in excess of $80,000 (as adjusted for increases in the cost of living in accordance with section 414(q) of the Code) from an Employer for the preceding Plan Year, and (2) is in the group of employees consisting of the top 20% of the employees of the Employer and its Affiliates when ranked on the basis of compensation paid during such preceding Plan Year;

(4) the term “non-highly compensated eligible employee” shall mean any Eligible Employee who is a Participant, who performs services in the determination year and is not a highly compensated eligible employee;

(5) the term “compensation” shall have the meaning set forth in section 414(s) of the Code or, in the discretion of the Administrator, any other meaning in accordance with the Code for these purposes, except that for purposes of determining whether an Eligible Employee is a “highly compensated eligible employee”, as described in paragraph (d)(3) of this Section 4.4, “compensation” shall have the meaning set forth in section 415(c)(3) of the Code;

(6) if this Plan and one or more other plans of the Employer to which Before-Tax Contributions, After-Tax Contributions, or qualified nonelective contributions (as such term is defined in section 401(m)(4)(C) of the Code) are made are treated as one plan for purposes of section 410(b) of the Code, such plans shall be treated as one plan for purposes of this Section. If a highly compensated eligible employee participates in this Plan and one or more other plans of the Employer to which any such contributions are made, all such contributions shall be aggregated for purposes of this Section 4.4; and

(7) if this Plan benefits Employees who are included in a unit of employees covered by a collective bargaining agreement and employees who are not included in such collective bargaining unit, this Plan shall be treated as comprising two or more separate plans, as determined by the Administrator in accordance with applicable Regulations, for purposes of this Section 4.4. If such other plan has a plan year that is different from the Plan Year of this Plan, then the highly compensated eligible employee's contributions made to such other plan during the Plan Year of this Plan shall be aggregated with contributions of the same type made to this Plan for such Plan Year for purposes of determining the average deferral percentage and average contribution percentage for this Plan for such Plan Year for the group of highly compensated eligible employees.

This paragraph is inserted at the request of the Internal Revenue Service in order to obtain a favorable determination letter. In computing the "average deferral percentage" for a group of Eligible Employees with respect to a Plan Year, the Before-Tax Contributions that will be taken into account for such Plan Year will be only those that relate to compensation that would have been received by the Eligible Employee in the Plan Year or is attributable to services performed by the Eligible Employee in the Plan Year and would have been received by the Eligible Employee within 2-1/2 months after the close of the Plan Year. In computing the "average contribution percentage" for a group of Eligible Employees with respect to a Plan Year, (i) an After-Tax Contribution will be taken into account only if it is paid to the Trust during such Plan Year or paid to an agent of the Plan and transmitted to the Trust within a reasonable time after the end of the Plan Year; (ii) an excess contribution that is recharacterized will be taken into account during the Plan Year in which the contribution would have been received in cash by the Eligible Employee had the Eligible Employee not elected to defer the contribution; (iii) an Employer Matching Contribution will be taken into account only if it is made on account of the Eligible Employee's Before-Tax Contributions or After-Tax Contributions, allocated to the Eligible Employee's Account as of a date within that Plan Year and paid to the Trust by the end of the twelfth month following the close of such Plan Year; and (iv) qualified matching contributions which are used to meet the requirements of section 401(k)(3)(A) of the Code are not to be taken into account for purposes of the actual deferral percentage test of section 401(m) of the Code. To the extent required by law, the following will be treated as separate plans for purposes of sections 401(a)(4) and 410(b) of the Code: (i) the portion of the Plan that is a 401(k) plan, (ii) the portion of the Plan that is a section 401(m) plan; (iii) the portion of the plan that provides for contributions other than elective, employee or matching; (iv) the portion of the Plan that is an ESOP; and (v) the portion of the plan that is not an ESOP.

(e) Adjustments to Comply with Limits.

(1) Adjustments to Comply with Section 401(k)(3) of the Code. The Administrator shall cause to be made such periodic computations as it shall deem necessary or appropriate to determine whether either of the tests set forth in paragraph (a)(1) or (a)(2) of this Section 4.4 shall be satisfied during a Plan Year, and, if it appears to the Administrator that neither of such tests will be satisfied, the Administrator shall take such steps as it deems necessary or appropriate to reduce or otherwise adjust the Before-Tax Contributions contributed or to be contributed for all or a portion of such Plan Year on behalf of Participants who are highly compensated eligible employees to the extent necessary in order for one of such tests to be satisfied. If, as of the end of the Plan Year, the Administrator determines that, notwithstanding any adjustments made pursuant to the

preceding sentence, neither of the tests set forth in paragraph (a)(1) and (a)(2) of this Section 4.4 shall be satisfied with respect to such Plan Year, the total amount by which Before-Tax Contributions must be reduced in order to satisfy either such test shall be calculated in the manner prescribed by section 401(k)(8)(B) of the Code (the “excess contributions amount”). The Before-Tax Contributions made on behalf of the Participant who is a highly compensated eligible employee and whose actual dollar amount of Before-Tax Contributions is the highest shall be reduced until such dollar amount equals the next highest actual dollar amount of Before-Tax Contributions made for such Plan Year on behalf of any highly compensated employee, or until the total reduction equals the excess contributions amount. If further reductions are necessary, then the Before-Tax Contributions on behalf of each Participant who is a highly compensated eligible employee and whose actual dollar amount of Before-Tax Contributions is the highest (after the reduction described in the preceding sentence) shall be reduced in accordance with the previous sentence. Such reductions shall continue to be made to the extent necessary so that the total reduction equals the excess contributions amount.

To the extent that the sum of such reductions with respect to a Participant and the amount of other After-Tax Contributions allocated to such Participant’s After-Tax Contributions Account does not exceed 20 percent (10 percent in the case of a Participant who is a member of a bargaining unit represented by IBEW Local Union 15) of the Participant’s Compensation, the amount of such reductions shall be treated as an After-Tax Contribution. To the extent such amount cannot be treated as an After-Tax Contribution because of the limitation described in the preceding sentence, such amount, plus any income and minus any loss allocable thereto through the end of the Plan Year for which the After-Tax Contribution was made, shall be distributed to such Participant no later than the last day of the subsequent Plan Year and the Participant shall forfeit any corresponding Employer Matching Contributions related thereto plus any income and minus any loss allocable thereto through the end of the Plan Year for which the Employer Matching Contribution was made. The Participant shall designate the extent to which such distributed excess contributions are treated as Untaxed Contributions or Designated Roth Contributions (but only up to the extent that such types of contributions were made by the Participant to the Plan for the Plan Year) and, in the event that any such designation is not made or is incomplete, such distributed excess contributions shall be treated as Untaxed Contributions up to the extent Untaxed Contributions were made to the Plan for the Plan Year and, to the extent that such distributed excess contributions exceed such Untaxed Contributions, such excess contributions shall be treated as distributions of Designated Roth Contributions made to the Plan for the Plan Year.

The amount of Before-Tax Contributions to be distributed to a Participant pursuant to this Section shall be reduced by any Before-Tax Contributions previously distributed to such Participant pursuant to Section 4.2(b) (relating to correction of Excess Before-Tax Contributions) for such Plan Year. The amount of any income or loss allocable to any such reductions to be so distributed shall be determined pursuant to Regulations. The unadjusted amount of any such reductions so distributed shall be treated as "annual additions" for purposes of Section 7.4 (relating to limitations on allocations imposed by section 415 of the Code).

(2) Adjustments to Comply with Section 401(m) of the Code . The Administrator shall cause to be made such periodic computations as it shall deem necessary or appropriate to determine whether either of the tests set forth in paragraph (b)(1) or (b)(2) of this Section 4.4 shall be satisfied during a Plan Year, and, if it appears to the Administrator that neither of such tests will be satisfied, the Administrator shall take such steps as it deems necessary or appropriate to adjust the Employer Matching Contributions made, After-Tax Contributions made, and any Before-Tax Contributions treated as Employer Matching Contributions pursuant to paragraph (d)(2) of this Section 4.4 for all or a portion of such Plan Year on behalf of Participants who are highly compensated eligible employees to the extent necessary in order for one of such tests to be satisfied. If after the end of a Plan Year it is determined that regardless of any steps taken neither of the tests set forth in paragraph (b)(1) or (b)(2) of this Section 4.4 shall be satisfied with respect to such Plan Year, the Administrator shall calculate the total amount by which any such contributions on behalf of Participants who are highly compensated eligible employees must be reduced in order to satisfy either such test, in the manner prescribed by section 401(m)(6) of the Code (the "excess aggregate contributions amount"). The amount to be reduced with respect to Participants who are highly compensated eligible employees shall be determined by first reducing the After-Tax Contributions (including Before-Tax Contributions recharacterized as After-Tax Contributions pursuant to paragraph (e)(1) of this Section 4.4) and then by reducing the Employer Matching Contributions for each Participant whose actual dollar amount of such aggregate contributions for such Plan Year is highest until such reduced dollar amount equals the next highest dollar amount of such contributions for such Plan Year on behalf of any other highly compensated eligible employee, or until the total reduction equals the excess aggregate contributions amount. If further reductions are necessary, such contributions on behalf of each Participant who is a highly compensated eligible employee and whose actual dollar amount of such contributions is the highest (after the reduction described in the preceding sentence) shall be reduced in accordance with the preceding

sentence. Such reductions shall continue to be made to the extent necessary until the total reduction equals the excess aggregate contributions amount. If After-Tax Contributions are distributed pursuant to this paragraph (e)(2), any corresponding Employer Matching Contributions related thereto plus any income and minus any loss allocable through the end of the Plan Year for which the Employer Matching Contributions were made to which such Participant would be entitled under Section 8.3 (relating to distributions upon termination of employment) if such Participant had terminated employment on the last day of the Plan Year for which contributions were made (or earlier if any such Participant actually terminated employment at any earlier date) shall also be distributed with such After-Tax Contributions (and taken into account to determine whether further reductions are necessary), and any remaining amount of such corresponding Employer Matching Contributions plus any income and minus any loss allocable through the end of the Plan Year for which the Employer Matching Contributions were made shall be forfeited. If the reductions required by this subparagraph exceed the amount of After-Tax Contributions made or to be made by any Participant for such Plan Year and the amount of Employer Matching Contributions made or to be made on behalf of such Participant for such Plan Year, any Before-Tax Contributions made on behalf of such Participant that the Administrator has elected to treat as Employer Matching Contributions pursuant to paragraph (d)(2) of this Section 4.4 shall also be adjusted and taken into account in accordance with this subparagraph, except that such Before-Tax Contributions may not be recharacterized as After-Tax Contributions.

Section 4.5. Limitation on Employer Contributions.

The contributions of an Employer for any Plan Year shall not exceed the maximum amount for which a deduction is allowable to such Employer for federal income tax purposes for the fiscal year of such Employer that coincides with such Plan Year.

Any contribution made by an Employer by reason of a good faith mistake of fact, or the portion of any contribution made by an Employer that exceeds the maximum amount for which a deduction is allowable to such Employer for federal income tax purposes by reason of a good faith mistake in determining the maximum allowable deduction, shall upon the request of such Employer be returned by the Trustee to the Employer. An Employer's request and the return of any such contribution must be made within one year after such contribution was mistakenly made or after the deduction of such excess portion of such contribution was disallowed, as the case may be. The amount to be returned to an Employer pursuant to this paragraph shall be the excess of (i) the amount contributed over (ii) the amount that would have been contributed had there not been a mistake of fact or a mistake in determining the maximum allowable deduction. Earnings attributable to the mistaken contribution shall not be returned to the Employer, but losses attributable thereto shall reduce the amount to be so returned. If the return to the Employer of the amount attributable to the mistaken contribution would cause the balance of any Participant's account as of the date such amount is to be returned (determined as if such date coincided with the close of a Plan Year) to be reduced to less than what would have been the balance of such account as of such date had the mistaken amount not been contributed, the amount to be returned to the Employer shall be limited so as to avoid such reduction.

Any Before-Tax Contributions returned to an Employer pursuant to this Section 4.5 shall be treated as the return of Untaxed Contributions, up to the extent Untaxed Contributions were made by such Participant to the Plan for such Plan Year and, to the extent that the returned contributions exceed such Untaxed Contributions, such returned contributions shall be treated as Designated Roth Contributions made by the Participant to the Plan for the Plan Year.

ARTICLE 5

EMPLOYEE CONTRIBUTIONS

Section 5.1. After-Tax Contributions.

Subject to the limitations set forth in Section 4.4 (relating to limitations on contributions for highly-compensated Eligible Employees) and Section 7.4 (relating to limitations on allocations imposed by section 415 of the Code), each Participant who is an Eligible Employee may elect in accordance with Section 3.2(a) to make After-Tax Contributions under the Plan by payroll deduction. After-Tax Contributions made by a Participant who is a member of a bargaining unit represented by IBEW Local Union 15 for any payroll period shall equal a whole percentage not less than 1 nor more than 10 percent of the Participant's Compensation for such payroll period, as designated by the Participant in his or her request pursuant to Section 3.2(a). After-Tax Contributions made by any other Participant for any payroll period shall equal a whole percentage not less than 1 nor more than 20 percent and, effective as of January 1, 2006, 50 percent, of the Participant's Compensation for such payroll period, as designated by the Participant in his or her request pursuant to Section 3.2(a). Except as set forth below, After-Tax Contributions shall be delivered to the Trustee no less frequently than bi-weekly. In addition, if back-pay is awarded to a Participant who is an Eligible Employee and any portion of such back-pay constitutes Compensation as defined in subsection (13) of Article 2 (relating to the definition of compensation), After-Tax Contributions shall be made for such Participant in an amount equal to the After-Tax Contribution percentage, which was most recently chosen by the Participant in his or her request pursuant to Section 3.2(a), of such back-pay that constitutes Compensation. An

After-Tax Contribution described in the preceding sentence shall be treated under the Plan in the same manner as all other After-Tax Contributions and shall be delivered to the Trustee as soon as practicable after the back-pay is paid to the Participant. Except as provided in the following sentence and in Section 4.1, After-Tax Contributions shall be subject to the same provisions regarding commencement, change and suspension applicable to Before-Tax Contributions as set forth in Section 4.1. If a Participant who has not attained age 59 ½ makes a withdrawal of After-Tax Contributions pursuant to Section 8.1(c), then: (a) After-Tax Contributions made by such Participant pursuant to this Section 5.1 shall cease beginning with the first payroll period beginning after the date on which the Participant receives such withdrawal and (b) such Participant shall not again be eligible to elect such contributions until the first payroll period that coincides with or follows the date on which contributions ceased by 6 months.

Section 5.2. Rollover Contributions.

(a) The Trustee shall be authorized to receive, hold and distribute in accordance with the Plan, a direct rollover contribution consisting of cash, transferred to the Plan by (i) a qualified plan described in section 401(a) or 403(a) of the Code, including after-tax employee contributions to such plan, (ii) an annuity contract described in section 403(b) of the Code, excluding after-tax employee contributions or (iii) an eligible plan under section 457(b) of the Code which is maintained by a state, political subdivision of a state, or any agency or instrumentality of a state or political subdivision of a state. The Trustee shall also be authorized to receive, hold and distribute in accordance with the Plan, a Participant contribution of an eligible rollover distribution from (A) a qualified plan described in section 401(a) or 403(a) of the Code, (B) an annuity contract described in section 403(b) of the Code, (C) an eligible plan under section 457(b) of the Code which is maintained by a state, political subdivision of a state, or any agency or instrumentality of a state or political subdivision of a state or (D) an individual retirement account or annuity described in section 408(a) or 408(b) of the Code that is eligible to be rolled over and would otherwise be includible in gross income. The amounts transferred must be eligible rollover distributions, as defined in section 402(c) of the Code. Effective December 1, 2012, an eligible rollover distribution of a lump sum amount from a qualified defined benefit plan sponsored by the Company also may be contributed to this Plan in accordance with administrative rules established by the Administrator. Notwithstanding any provision of the Plan to the contrary, a rollover contribution shall not include "designated Roth contributions" described in section 402A of the Code or any related earnings with respect to such contributions.

(b) Delivery of Rollover Contributions to Administrator . Except as otherwise provided in paragraph (a) of this Section 5.2, if an individual desires to make a rollover contribution pursuant to such paragraph (a), such contribution either (i) shall be delivered by the individual to the Administrator and by the Administrator to the Trustee on or before the 60th day after the day on which the Employee receives the distribution or on or before such later date as may be prescribed by law, or (ii) shall be transferred on behalf of the individual directly from the trust from which the eligible rollover distribution is made. Any contribution that is delivered by the Eligible Employee must be accompanied by (i) a statement of the Employee that to the best of his or her knowledge the amount so transferred meets the conditions specified in paragraph (a) of this Section 5.2, (ii) a copy of such documents as may have been received by the Employee advising him or her of the amount of and the character of such distribution and (iii) any investment election with respect to such contribution in such form and manner as may be required by the Administrator. Notwithstanding the foregoing, the Administrator shall not accept a rollover contribution if in its judgment accepting such contribution would cause the Plan to violate any provision of the Code or Regulations, and the Administrator shall not be required to accept such a contribution to the extent it consists of property other than cash.

Section 5.3. Special Accounting Rules for Rollover Contributions .

If a rollover contribution is made by or on behalf of an Employee, the Administrator shall cause a Rollover Account to be established and maintained for such Employee to which shall be credited all rollover contributions made pursuant to Section 5.2. A rollover contribution shall be credited to such Rollover Account as of the Valuation Date coinciding with or next following the date on which such contribution is delivered to the Trustee.

If a rollover contribution is made by, or a direct transfer is made on behalf of, an Eligible Employee prior to becoming a Participant, such Eligible Employee shall until such time as he or she becomes a Participant be deemed to be a Participant, and his or her Rollover Account and After-Tax Contributions Account, if any, shall be deemed to be an account of a Participant, for all purposes of the Plan except for the purposes of the allocation of contributions provided for in paragraphs (a), (b), (c), (d) and (e) of Section 7.3 and any determination of when he or she becomes a Participant pursuant to Article 3.

ARTICLE 6

TRUST AND INVESTMENT FUNDS

Section 6.1. Trust.

A Trust shall be created by the execution of a trust agreement between the Company and the Trustee. All contributions under the Plan shall be paid to the Trustee. The Trustee shall hold all monies and other property received by it and invest and reinvest the same, together with the income therefrom, on behalf of the Participants collectively in accordance with the provisions of the trust agreement. The Trustee shall make distributions from the Trust Fund at such time or times to such person or persons and in such amounts as the Administrator directs in accordance with the Plan.

Section 6.2. Investment Funds.

The Trustee shall establish and maintain, or shall cause to be established and maintained, an investment fund herein called the "Employer Stock Fund" which shall be invested in Common Stock, and shall also include such short-term obligations and short-term liquid investments purchased by the Trustee, in accordance with the Trust Agreement, pending the selection and purchase of the Common Stock or as otherwise determined by the Trustee to be necessary to satisfy such fund's cash needs. In addition, as directed by the Investment Office, one or more additional separate investment funds shall be established and maintained and shall be invested as directed by the Investment Office. The Investment Office also may, from time to time, and in its sole discretion, segregate any of the assets held under any investment fund established pursuant to this Section 6.2 and allocate the investment results from such segregated assets among all or a portion of the accounts of Participants in such manner as it shall determine to be appropriate. All charges and expenses incurred in connection with the purchase and sale of investments for a fund shall be charged to such fund except to the extent such charges and expenses are paid by the Employers or from other revenue available to the Plan.

ARTICLE 7

PARTICIPANT ACCOUNTS AND INVESTMENT ELECTIONS

Section 7.1. Participant Accounts and Investment Elections.

(a) Participant Accounts. For each Participant the Administrator shall establish and maintain, or shall cause to be established and maintained, investment accounts to which amounts contributed under the Plan shall be credited according to each Participant's investment elections pursuant to paragraph (b) of this Section 7.1, subject to the penultimate sentence of the first paragraph of Section 6.2 (relating to the Investment Office's authority to segregate any of the assets held under any investment fund).

Each such investment account shall, to the extent appropriate, be composed of the following accounts: (A) a Before-Tax Contributions Account, which shall be divided into an Untaxed Contribution Account and a Designated Roth Contributions Account, (B) a Catch-Up Contributions Account, (C) an Employer Matching Contributions Account, (D) an After-Tax Contributions Account, and (E) a Rollover Account. Earnings and losses on investment of funds in each account shall be credited or debited to that account.

All such accounts and subaccounts shall be for accounting purposes only, and there shall be no segregation of assets within the investment funds among the separate Participants' accounts.

(b) Investment Election. Each Participant, as part of his or her request for participation described in Section 3.2 (or in connection with the delivery of a rollover contribution pursuant to Section 5.2), shall make an investment election that shall apply to the investment of contributions to be made on his or her behalf or by him or her pursuant to Article 4 (relating to Employer contributions) or Article 5 (relating to Employee contributions) and any earnings on such contributions. Such election shall specify that such contributions be invested either (i) wholly in one of the funds maintained or employed by the Trustee pursuant to paragraph (a) of this Section 7.1 or (ii) divided among such funds in 1 percent increments or in such other increments established by the Administrator or the Investment Office from time to time. Each Eligible Employee for whom a Rollover Account is established before such Eligible Employee has become a Participant shall, in the manner prescribed by the Administrator, make such investment election as of the Valuation Date on which such account is established. During any period in which no direction as to the investment of an Employee's account is on file with the Administrator, contributions or direct transfers made by him or her, or on his or her behalf, to the Plan will be invested in such manner as the Investment Office shall determine.

(c) Change of Investment Election. Subject to such restrictions as may be imposed by the Administrator or the Investment Office (including, without limitation, any restrictions imposed with respect to transfers of funds to or from the Employer Stock Fund described in Section 6.2 by individuals who are subject to Rule16b-3 under section 16 of the Securities Exchange Act of 1934), a Participant may elect to change as of any Valuation Date his or her investment election applicable to all or any portion of his or her current account balance. In addition, a Participant may elect to change as of the first day of any payroll period his or her investment election applicable to future contributions made pursuant to Articles 4 (relating to Employer contributions) or 5 (relating to Employee contributions), or both, as specified by the Participant. Such changes shall be limited to the investment funds then maintained or employed by the Trustee pursuant to paragraph (a) of this Section 7.1. A Participant's change of investment election must be made in the manner and at the time prescribed by the Administrator (or its delegate). Any such change shall specify that such contributions be invested either (i) wholly in one of the funds maintained or employed by the Trustee pursuant to paragraph (a) of this Section 7.1, or (ii) divided among such funds in 1 percent increments or such other increments established by the Administrator or the Investment Office from time to time.

Section 7.2. Allocation of Net Income of Trust Fund and Fluctuation in Value of Trust Fund Assets.

In the event that contributions, income and losses are not otherwise specifically allocated to Participant accounts by the Trustee, as soon as practical after each Valuation Date, the net worth of each investment fund (as defined in Section 6.2) as of such Valuation Date shall be determined. If the net worth of such investment fund as so determined is more or less than the total of all balances credited as of such Valuation Date to the subaccounts of Participants invested in the investment fund as of such Valuation Date who are Participants as of such Valuation Date, the amount of any excess or deficiency shall be prorated and credited or charged to such subaccounts proportionally to the balances of such subaccounts as of the preceding Valuation Date after making all allocations for such preceding Valuation Date prescribed by this Article and after decreasing each such subaccount by any loans, withdrawals or distributions from such subaccount during such period (but not less than zero), with all of such decreases to be made in such manner as the Administrator determines in its discretion to be necessary.

Notwithstanding any provision of this Article 7, any Designated Roth Contributions Account shall be maintained in a manner that satisfies the separate accounting requirement, and any Regulations or other requirements promulgated, under section 402A of the Code. Accordingly, gains, losses and other credits and charges shall be separately allocated on a reasonable basis to each such account and other accounts under the Plan, the Plan shall keep a record of each Participant's Designated Roth Contributions that have not been withdrawn, and contributions and withdrawals of Designated Roth Contributions, and related earnings, shall be accounted for with respect to Designated Roth Contributions Accounts. However, forfeitures shall not be allocated to any Designated Roth Contributions Account. These separate accounting requirements apply with respect to a Participant from the time the Participant makes his or her first Designated Roth Contribution until the time the Participant's Designated Roth Contributions Account is distributed.

Section 7.3. Allocations of Contributions Among Participants' Accounts .

(a) Allocation of Before-Tax Contributions. Before-Tax Contributions shall be allocated to the Before-Tax Contributions Account of each Participant for whom such contributions are made as soon as practical after such contributions are delivered to the Trustee or insurer maintaining a group annuity contract. The Before-Tax Contributions that consist of (i) Before-Tax Contributions made on behalf of the Participant pursuant to Section 4.1 for Plan Years beginning prior to (A) in the case of a Participant who is not a Local 15 Member, January 1, 2006, and (B) in the case of a Participant who is a Local 15 Member, January 1, 2009, (ii) any Before-Tax Contributions transferred to the Plan from the PECO Energy Company Employee Savings Plan on behalf of such Participant, and (iii) any Before-Tax Contributions that are Untaxed Contributions made pursuant to Section 4.2 for Plan Years beginning on or after (A) in the case of a Participant who is not a Local 15 Member, January 1, 2006, and (B) in the case of a Participant who is a Local 15 Member, January 1, 2009, shall be allocated to the Untaxed Contributions Account of such Participant. The Before-Tax Contributions that consist of Designated Roth Contributions made on behalf of the Participant pursuant to paragraph (c) Section 4.2 (relating to Untaxed Contributions and Designated Roth Contributions) for Plan Years beginning on or after (A) in the case of a Participant who is not a Local 15 Member, January 1, 2006, and (B) in the case of a Participant who is a Local 15 Member, January 1, 2009, January 1, 2006 shall be allocated to the Designated Roth Contributions Account of such Participant.

(b) Allocation of Catch-Up Contributions . Catch-Up Contributions shall be allocated to the Catch-Up Contributions Account of each Participant for whom such contributions are made as soon as practical after such contributions are delivered to the Trustee or insurer maintaining a group annuity contract.

(c) Allocation of Employer Matching Contributions . Employer Matching Contributions shall be allocated to the Employer Matching Contributions Account of each Participant for whom such contributions are made as soon as practical after such contributions are delivered to the Trustee or insurer maintaining a group annuity contract.

(d) Allocation of After-Tax Contributions. After-Tax Contributions shall be allocated to the After-Tax Contributions Account of the Participant who makes such contributions as soon as practical after such contributions are delivered to the Trustee or insurer maintaining a group annuity contract.

(e) Allocation of Rollover Contributions and Direct Transfers. Rollover contributions made pursuant to Article 5 (relating to Employee contributions) shall be credited to the Rollover Account of the Participant on whose behalf such contribution is made as of the Valuation Date coinciding with or next following the date on which the contribution is delivered to the Trustee.

(f) Allocation of Forfeitures. The total amount forfeited during any Plan Year shall be used to (i) pay the expenses incurred by the Trustee for the administration of the Trust Fund not paid by the Company, (ii) held to pay the expenses reasonably estimated by the Trustee for the administration of the Trust Fund during the next following Plan Year but not expected to be paid by the Company, or (iii) used to reduce Employer Matching Contributions as determined by the Administrator.

Section 7.4. Limitations on Allocations Imposed by Section 415 of the Code.

Notwithstanding any other provision of the Plan, the amount allocated to a Participant's accounts under the Plan for each Plan Year shall be limited so that the aggregate annual additions to the Participant's accounts under this Plan and in all other defined contribution plans maintained by an Employer shall not exceed the lesser of: (A) $46,000 (as adjusted pursuant to section 415(d) of the Code) and (B) 100% of the Participant's compensation for such Plan Year.

If the amount to be allocated to a Participant's accounts pursuant to Section 7.3 (relating to allocations of contributions among Participant's accounts) for a Plan Year would exceed the limitation set forth in this Section 7.4, then such excess shall be reduced before allocations are made to the Participant's accounts. If, in any Plan Year, the annual additions actually allocated to the Participant's accounts exceed the limitation set forth in this Section 7.4, then such annual additions shall be corrected in accordance with the Employee Plans Compliance Resolution System of the Internal Revenue Service.

For purposes of this Section 7.4, the “annual additions” for a Plan Year to a Participant’s accounts in this Plan and in any other defined contribution plan maintained by an Employer is the sum during such Plan Year of:

(a) the amount of Employer contributions (including Before-Tax Contributions and Designated Roth Contributions and excluding any Default Before-Tax Contributions that are withdrawn pursuant to paragraph (c)(ii) of Section 3.2) allocated to the Participant’s accounts, excluding, however, (X) Before-Tax Contributions and Designated Roth Contributions that are “catch-up contributions” made pursuant to section 414(v) of the Code, (Y) excess deferrals that are distributed in accordance with section 402(g) of the Code and (Z) restorative payments (within the meaning of section 1.415(c)-1(b)(2)(ii)(C) of the Regulations),

(b) the amount of forfeitures allocated to the Participant’s accounts,

(c) the amount of Employee contributions allocated to the Participant accounts, but excluding any rollover contributions, direct transfers or loan repayments, and

(d) the contributions allocated on behalf of the Participant to any individual medical benefit account (as defined in section 415(l) of the Code) or, if the Participant is a key employee within the meaning of section 419A(d)(3) of the Code, to any post-retirement medical benefits account established pursuant to section 419A(d)(1) of the Code.

For purposes of this Section 7.4, “defined contribution plan” shall have the meaning set forth in section 415 of the Code and Regulations, and the term “Employer” shall include all Affiliates except that in defining Affiliates “more than 50 percent” shall be substituted for “at least 80 percent” where required by section 415(g) of the Code. In addition, for purposes of this Section 7.4, “compensation” shall mean a Participant’s compensation as defined under section 415(c)(3) of the Code (as amended from time to time).

Section 7.5. Correction of Error.

If it comes to the attention of the Administrator that an error has been made in any of the allocations prescribed by this Article or an error has been made in any other respect, appropriate adjustment shall be made to the accounts of all Participants and designated Beneficiaries that are affected by such error, except that no adjustment need be made with respect to any Participant or Beneficiary whose account has been distributed in full prior to the discovery of such error.

ARTICLE 8

WITHDRAWALS AND DISTRIBUTIONS

Section 8.1. Withdrawals and Distributions Prior to Termination of Employment.

(a) Hardship Withdrawals. An Employee who has not attained age 59 ½ may make a request by calling the VRU, or in such other manner as may be prescribed by the Administrator, to withdraw as of any date all or a portion of the balance of his or her Before-Tax Contributions Account (other than earnings credited to such account after December 31, 1988), Catch-Up Contributions Account and Employer Matching Contributions Account only if the Participant has incurred a financial hardship, except that while any loan to the Participant under Section 8.2 remains outstanding, the amount available for withdrawal under this paragraph (a) shall be the balance in such account less the balance of all outstanding loans to the Participant. The determination of the existence of financial hardship and the amount required to be distributed to satisfy the need created by the hardship will be made by the Administrator in a uniform and non-discriminatory manner subject to the following rules:

(A) A financial hardship shall be deemed to exist if, and only if, the Participant certifies to the Committee that the financial need is on account of:

(i) medical expenses described in section 213(d) of the Code incurred or anticipated to be incurred by the Participant, the Participant's Spouse or any dependents of the Participant (as defined in section 152 of the Code) or primary beneficiary;

(ii) funeral or burial expenses incurred by the Participant for the Participant's deceased parent, Spouse, children or dependent (as defined in section 152 of the Code, without regard to section 152(d)(1)(B) of the Code) or primary beneficiary;

(iii) the purchase (excluding mortgage payments) of a principal residence of the Participant;

(iv) the payment of tuition, related educational fees, and room and board expenses for up to the next twelve months of post-secondary education for the Participant, the Participant's Spouse, children or dependents (as defined in section 152 of the Code, without regard to sections 152(b)(1) and (2) and 152(d)(1)(B) of the Code) or primary beneficiary;

(v) the need to prevent eviction of the Participant from his or her principal residence or foreclosure of mortgage of the Participant's principal residence; or

(vi) expenses for the repair of damage to the Participant's principal residence that would qualify for the casualty deduction under section 165 of the Code (determined without regard to whether the loss exceeds 10% of adjusted gross income).

For purposes of the foregoing, an individual is a Participant's "primary beneficiary" if the Participant has designated him or her as a "Beneficiary" under Section 8.5 and such individual has an unconditional right to all or a portion of the Participant's accounts upon the Participant's death.

(B) A distribution shall be deemed to be necessary to satisfy a financial need of the Participant if, and only if, the Participant:

(i) has obtained all distributions, other than hardship withdrawals, and all nontaxable loans under any Employer's plan in which the Participant participates, and

(ii) demonstrates to the satisfaction of the Administrator that the distribution is not in excess of the amount of the immediate and heavy financial need, which need shall include amounts necessary to pay any federal, state and local income taxes, excise taxes and penalties.

If a Participant receives a hardship withdrawal pursuant to this paragraph (a), then, in addition to the cessation of Before-Tax Contributions and After-Tax Contributions required by paragraph (a) of Section 4.1 (relating to initial election regarding regular payroll Before-Tax Contributions), contributions by the Participant to qualified or nonqualified plans of deferred compensation, including a stock option, stock purchase or similar plan, maintained by an Employer also shall (except where excused by regulation) cease beginning with the first payroll period beginning after the date on which the Participant receives such hardship withdrawal and continuing until the first payroll period that coincides with or follows the date on which contributions ceased by six months.

The Participant shall designate the extent to which the hardship withdrawal pursuant to this paragraph (a) are Designated Roth Contributions from the Participant's Designated Roth Contributions Account and the extent that such withdrawals are Untaxed Contributions from the Participant Untaxed Contributions Account and in the event that any such designation is not made or is incomplete, such hardship withdrawals shall be treated as withdrawals of Designated Roth Contributions to the extent Designated Roth Contributions were made to the Plan and, to the extent that the hardship withdrawal exceeds such Designated Roth Contributions, such hardship withdrawal shall be treated as Untaxed Contributions.

(b) Withdrawals After Age 59 ½. An Employee who has attained age 59 ½ may make a request by calling the VRU, or in such other manner as may be prescribed by the Administrator, to withdraw as of any date an amount which is not greater than the balance of his or her Before-Tax Contributions Account, Catch-Up Contributions Account and Employer Matching Contributions Account as of the most recent Valuation Date determined by the Administrator, except that while any loan to the Participant under Section 8.2 remains outstanding, the amount available for withdrawal shall be the balance in such accounts less the balance of all outstanding loans to the Participant.

The Participant shall designate the extent to which the withdrawal pursuant to this paragraph (b) are Designated Roth Contributions from the Participant's Designated Roth Contributions Account and the extent that such withdrawals are Untaxed Contributions from the Participant's Untaxed Contributions Account and in the event that any such designation is not made or is incomplete, such withdrawals shall be treated as withdrawals of Designated Roth Contributions to the extent Designated Roth Contributions were made to the Plan and, to the extent that the withdrawal exceeds such Designated Roth Contributions, such withdrawal shall be treated as Untaxed Contributions.

(c) Withdrawals From the After-Tax Contributions Account. An Employee may make a request by calling the VRU, or in such other manner as may be prescribed by the Administrator, no more than once during any Plan Year, to withdraw from his or her After-Tax Contributions Account an amount which is not greater than the balance of the Participant's After-Tax Contributions Account as of the most recent Valuation Date determined by the Administrator, except that while any loan to the Participant under Section 8.2 remains outstanding, the amount available for withdrawal shall be the balance in such account less the balance of all outstanding loans to the Participant.

(d) Withdrawals from the Rollover Account. A Participant may make a request by calling the VRU, or in such other manner as may be prescribed by the Administrator, to withdraw an amount which is not greater than the balance in his or her Rollover Account as of the most recent Valuation Date determined by the Administrator, except that while any loan to the Participant under Section 8.2 remains outstanding, the amount available for withdrawal shall be the balance in such account less the balance of all outstanding loans to the Participant.

(e) Qualified Reservist Withdrawals. A Participant who is a Qualified Reservist may make a request by calling VRU, or in such manner as may be prescribed by the Administrator, to withdraw any portion of his or her Before-Tax Contributions Account or his or her Designated Roth Contributions Account, and the amount requested shall not be subject to the 10 percent additional tax imposed pursuant to section 72(t)(2)(G) of the Code, provided that the amount requested is distributed during the period beginning on the date the Participant is ordered or called to active duty and ending at the close of his or her active duty.

(f) Withdrawals of Employer Matching Contributions for Members of IBEW Local Union 614 . Notwithstanding any provision in the Plan to the contrary, effective April 16, 2010, a Participant who is a member of a bargaining unit represented by IBEW Local Union 614 and who has completed 60 months as a Participant may elect, in accordance with procedures established by the Administrator, to receive a distribution of all or any part of his or her Employer Matching Contributions Account, as adjusted for gains, earnings and losses attributable thereto determined as of the Valuation Date next succeeding the date of receipt of the request for distribution.

Additionally, effective April 16, 2010, a Participant who is a member of a bargaining unit represented by IBEW Local Union 614, regardless of whether he or she has completed 60 months as a Participant, may elect, in accordance with procedures established by the Administrator, to receive a distribution of all or any part of that portion of the Employer Matching Contributions Account that is derived from Employer Matching Contributions in excess of Employer Matching Contributions allocated to his or her Employer Matching Contributions Account during the two Plan Years preceding the Plan Year in which the withdrawal takes place, adjusted for gains, earnings and losses attributable thereto determined as of the Valuation Date next succeeding the date of receipt of the request for distribution.

No distribution made pursuant to this paragraph (f) may be for an amount which is less than the lesser of (i) $200; and (ii) the balance of the Participant's Employer Matching Contributions Account, as adjusted for gains, earnings and losses attributable thereto. In addition, a Participant may not make more than one withdrawal pursuant to this paragraph (f) in any Plan Year.

(g) Provisions Applicable to All Withdrawals. Any withdrawal made pursuant to this Section 8.1 shall be made at such time as prescribed by the Administrator and shall be made pro-rata from each of the investment funds in which as of the date of the withdrawal (i) in the case of a withdrawal pursuant to paragraph (a) or (b) of this Section 8.1, the Participant's Before-Tax Contributions Account, Catch-Up Contributions Account (and, if applicable, Employer Matching Contributions Account) is invested, (ii) in the case of a withdrawal pursuant to paragraph (c) of this Section 8.1, the Participant's After-Tax Contributions Account is invested, (iii) in the case of a withdrawal pursuant to paragraph (d) of this Section 8.1, the Participant's Rollover Account is invested, (iv) in the case of a withdrawal pursuant to paragraph (e) of this Section 8.1, the Participant's Before Tax Contributions Account and Designated Roth Contributions Account, and (v) the case of a withdrawal pursuant to paragraph (f) of this Section 8.1, the Participant's Employer Matching Contribution Account. Notwithstanding anything in the Plan to the contrary, the Administrator or the Investment Office may impose any restrictions it deems necessary or appropriate with respect to withdrawals by individuals who have any portion of their accounts invested in the Employer Stock Fund described in Section 6.2 and who are subject to Rule 16b-3 under section 16 of the Securities Exchange Act of 1934.

(h) Dividend Distributions in Respect of the Employer Stock Fund . Dividends shall be allocated to the accounts of each Participant, any portion of whose account balance is invested in the Employer Stock Fund in accordance with paragraph (b) of Section 7.1, based upon the total number of shares of Common Stock represented by the Participant's proportionate share of the Employer Stock Fund as of such date as may be determined from time to time by the Administrator on or before each dividend record date. Cash dividends shall be reinvested in Common Stock (through the Employer Stock Fund) unless the Participant (or his or her Beneficiary) elects, at the time and in the manner prescribed by the Administrator, to receive a cash distribution in an amount equal to such dividend, payable not later than 90 days after the end of the Plan Year in which such dividend was paid.

Section 8.2. Loans to Participants.

(a) Making of Loans. Subject to the restrictions set forth in this Section 8.2, the Administrator shall establish a loan program whereby any Participant who is a party-in-interest (within the meaning of section 3(14) of ERISA) or any Beneficiary who is a party-in-interest and any such Participant's Beneficiary may request, in the manner and form prescribed by the Administrator, to borrow funds from the Plan. The principal amount of such loan shall be not less than $1,000 and the aggregate amount of all outstanding loans to a Participant or Beneficiary shall not exceed the lesser of: (1) 50% of the value of the aggregate of the Participant's vested account balances as of the Valuation Date coinciding with or immediately preceding the day on which the loan is made; and (2) $50,000, reduced by the excess, if any, of the highest outstanding loan balances of the Participant under all plans maintained by the Employer during the period of time beginning one year and one day prior to the date such loan is to be made and ending on the date such loan is to be made over the outstanding balance of loans from all such plans on the date on which such loan was made.

(b) Restrictions. Any loan approved by the Administrator pursuant to the preceding paragraph (a) shall be made only upon the following terms and conditions:

(1) The period for repayment of the loan shall be arrived at by mutual agreement between the Administrator and the Participant but such period shall not exceed five years or, in the case of a loan to acquire a principal place of residence, shall not be less than five years or more than 15 years, from the date of the loan. Such loan may be prepaid at any time, without penalty, by delivery to the Administrator of a check in an amount equal to the entire unpaid balance of such loan. No partial prepayment shall be permitted. Except as otherwise provided under uniform and nondiscriminatory procedures established by the Administrator, any loan to a Participant who is an Employee is due in full immediately after termination of employment.

(2) No loan shall be made to a Participant who is an Employee unless such Participant consents to have such loan repaid in substantially equal installments deducted from the regular payments of the Participant's compensation during the term of the loan. A Participant who (a) was an Employee at the time the Participant received a loan from the Plan, (b) is no longer an Employee and no longer receives compensation from an Employer, but (c) continues to perform services for an Employer, shall consent, either at the time the loan is taken or prior to the date prescribed by the Administrator, to have the balance of any loan outstanding at the time the Participant no longer is an Employee repaid in substantially equal installments over the remaining life of the loan. Such installments shall be paid in the manner specified by the Administrator.

(3) Each loan shall be evidenced by the Participant's collateral promissory note, in the form prescribed by the Administrator, for the amount of the loan, with interest, payable to the order of the Plan, and shall be secured by an assignment of 50% of the Participant's vested account balance.

(4) Each loan shall bear a fixed interest rate commensurate with the interest rates then being charged by persons in the business of lending money for loans made under similar circumstances, as determined by the Administrator.

(5) Except as otherwise provided in this Plan, no withdrawal (other than a withdrawal from a Participant's accounts to the extent that such withdrawal would not reduce the Participant's vested account balances to less than the then outstanding balance of any loan to such Participant or such higher amount determined by the Administrator to be appropriate security for such loan) or distribution shall be made to any Participant who has borrowed from the Trust, or to a Beneficiary of any such Participant, unless and until the loan, including interest, has been repaid.

(6) A charge shall be made against the account of each Participant requesting a loan equal to such reasonable loan application fee (and loan acceptance fee, if required by the Administrator) as shall be set from time to time by the Administrator.

(7) A Participant is permitted only one loan in any calendar year, provided, however, that no more than five loans to a Participant may be outstanding at any time, except that for a Participant described in the following sentence, no more than three loans may be outstanding at any time (for the period beginning April 1, 2009 and ending August 31, 2010, only one of such outstanding loans may be for the purpose of acquiring a principal place of residence and only two of such outstanding loans may be for other

purposes). A Participant described in the preceding sentence is any of the following: (A) a Participant who is a member of a bargaining unit represented by IBEW Local Union 15, (B) a Participant who is employed at Byron in Nuclear Security and is a member of United Security System Union Local 1, (C) a Participant who is employed at Oyster Creek in Nuclear Security and is a member of United Government Security Officers of America Local 17, (D) a Participant who is employed at Three Mile Island in Nuclear Security in Nuclear Security and is a member of United Government Security Officers of America Local 18, and (E) a Participant who is classified by an Employer as a management employee.

(8) Loan repayments shall be invested in the various investment funds as elected by the Participant.

(9) The Administrator may, in its sole discretion, restrict the amount to be disbursed pursuant to any loan request to the extent it deems necessary to take into account any fluctuations in the value of a Participant's accounts since the Valuation Date immediately preceding the date on which such loan is to be made.

(10) Any restrictions the Administrator or the Investment Office determines are necessary or appropriate with respect to loans requested by individuals who have any portion of their accounts invested in the Employer Stock Fund described in Section 6.2 and who are subject to Rule 16b-3 under section 16 of the Securities Exchange Act of 1934.

If any loan or portion of a loan made to a Participant under the Plan, together with the accrued interest thereon, is in default (taking into account any grace period permitted by law, and as determined by the Administrator), the Administrator shall take appropriate steps to collect on the note and foreclose on the security. If upon a Participant's termination of employment entitling the Participant to a distribution under Section 8.3 (relating to distributions upon termination of employment), death or retirement, any loan or portion of a loan made to such Participant under the Plan, together with the accrued interest thereon, remains unpaid, such unpaid amount may be repaid to the Plan no later than the last day of the calendar quarter following the calendar quarter in which such termination of employment occurred or as of such later date or dates permitted under uniform and nondiscriminatory procedures established by the Administrator. If full repayment is not so made, an amount equal to the unpaid portion of such loan, together with the accrued interest thereon, shall be charged to the Participant's accounts after all other adjustments required under the Plan, but before any distribution pursuant to Section 8.3 (relating to distributions upon termination of employment).

(c) Loan Subaccount. The Trustee shall establish and maintain a loan subaccount on behalf of each Participant or Beneficiary to whom a loan is made under this Section 8.2. Such subaccount shall represent the investment of the Participant's or Beneficiary's account in such loan. As of the Valuation Date immediately preceding the date on which a loan is approved, the Participant's or Beneficiary's loan subaccount shall be credited with the amount of the loan and thereafter shall be debited with repayments of the principal of such loan. The various accounts maintained for the Participant or Beneficiary shall be invested in the loan subaccount and debited by the amount of the loan and credited with payments of interest on, and repayments of principal of, such loan in accordance with uniform rules established by the Administrator.

(d) Sarbanes-Oxley. Notwithstanding any provision of the Plan to the contrary, the Administrator reserves the right to deny the request of a Participant for a loan that, in the judgment of the Administrator, would violate any provision of the Sarbanes-Oxley Act of 2002.

Section 8.3. Distributions Upon Termination of Employment.

(a) Termination of Employment under Circumstances Entitling Participant to Full Distribution of His or Her Account Balance . If a Participant terminates employment, the Participant, or his or her designated Beneficiary, as the case may be, shall be entitled to receive the entire balance of the Participant's accounts, at the time set forth in Section 8.4 (relating to time of distribution) and in the manner set forth in paragraph (b) of this Section 8.3.

(b) Form of Distribution. (1) Subject to paragraph (d) of this Section 8.3 (relating to small benefits payable in lump sum), any distribution to which a Participant or Beneficiary, as the case may be, becomes entitled upon termination of employment shall be distributed by whichever of the following forms of distribution the Participant or Beneficiary, as the case may be, elects by calling the VRU, or in such other manner as may be prescribed by the Administrator:

(A) By payment in a lump sum.

(B) By payment in a series of approximately equal annual, quarterly, or monthly installments, over a period of up to 15 years; provided that installments shall not be available with respect to amounts invested in the CNA 1997 guaranteed investment contract.

A Participant who elected to receive distribution of his or her vested account balance in the form of installments may, at any time after such election is made, elect to receive the remaining amount of his or her vested account balance in the form of a lump sum payment. If no election is made by a Participant or Beneficiary, as the case may be, as to the form of distribution, the Participant's vested account balance shall be distributed in the form of a lump sum payment.

The amount distributed hereunder shall be paid in cash, except that if the Participant's account is paid in a lump sum, then the Participant may request that all of his or her account invested in the Employer Stock Fund be distributed in whole shares of Common Stock held in such Fund with any fractional share being paid in cash. The number of shares of Common Stock to be distributed shall be based on the current fair market value of a share of Common Stock as determined by the Trustee under Section 7.2 (relating to allocation of net income of Trust Fund and fluctuation in value of Trust assets) as of the Valuation Date coinciding with or immediately preceding the date payment of the Participant's account is to be made. Requests for distribution in the form of Common Stock shall be made at such time and in such manner as the Administrator shall determine under rules and regulations which are uniformly applied.

Notwithstanding the preceding paragraphs, no distribution shall be made in the form of installments with respect to a Participant's Rollover Account that was established to hold the amount distributed or directly transferred from the Commonwealth Edison Company Employee Stock Ownership Plan upon such plan's termination if the Participant elected not to receive distribution of such amount until his or her 65th birthday.

(c) Notice of Availability of Election of Optional Forms of Benefits. No less than 30 days (or such shorter period as permitted by law) and no more than 90 days before distribution is to be made hereunder, the Administrator, or its designee, shall explain to the Participant that he or she may elect either form of distribution set forth in paragraph (b) of this Section 8.3. Such explanation shall include a general description of the eligibility conditions and other material features of the optional forms of distribution provided under the Plan. Notwithstanding the first sentence of this paragraph (c), distribution may commence less than 30 days after the description described above is given, provided that: (i) the Administrator, or its designee, clearly informs the Participant that the Participant has a right to a period of at least 30 days after receiving the explanation to consider the decision of whether or not to elect a distribution (and, if applicable, a particular distribution option), and (ii) the Participant, after receiving the explanation, affirmatively elects a distribution. The description referred to in this paragraph (c), as well as the explanation of the participant's right to a period of at least 30 days to consider such explanation before electing a distribution, shall be provided to the Participant through the VRU or in such other manner prescribed by the Administrator.

(d) Small Benefits Payable in Lump Sum. Notwithstanding any provision of the Plan to the contrary, if the vested amount of the Participant's account balances does not exceed $5,000, not including the value of the Participant's Rollover Account or, for distributions occurring on or after March 28, 2005, $1,000, including the value of the Participant's Rollover Account (such amount referred to herein as the "small benefit amount"), such vested amount shall be distributed in a lump sum cash payment as soon as administratively practicable after the Participant's termination of employment in accordance with such procedures as may be established by the Administrator.

(e) Direct Rollover Option. In the case of a distribution from the Plan (excluding any amount offset against the Participant's account balance to repay the outstanding balance of any unpaid loan) which is an "eligible rollover distribution" within the meaning of section 402(c)(4) of the Code, a Participant (or surviving Spouse of a Participant or a former Spouse who is an alternate payee under a qualified domestic relations order as defined in section 414(p) of the Code) may elect that all or any portion of such distribution shall be directly transferred as a rollover contribution from this Plan to (i) an individual retirement account described in section 408(a) of the Code, (ii) an individual retirement annuity described in section 408(b) of the Code, (iii) an annuity plan described in section 403(a) of the Code, (iv) an annuity contract described in section 403(b) of the Code, (v) a retirement plan qualified under section 401(a) of the Code (the terms of which permit the acceptance of rollover contributions), (vi) an eligible plan under section 457(b) of the Code which is maintained by an eligible employer described in section 457(e)(1)(A) of the Code (the terms of which permit the acceptance of rollover contributions) or (vii) effective January 1, 2008, a Roth IRA described in section 408A of the Code. However, in the case of a distribution of a Participant's After-Tax Contributions Account prior to January 1, 2007, such distribution shall only be directly transferred as a rollover contribution from this Plan to an account or annuity described in section 408 of the Code, or to such a retirement or annuity plan described in section 401(a) or 403(a) of the Code that is a defined contribution plan that agrees to separately account for amounts so transferred, including separately accounting for the portion of such amount which is includible in gross income and the portion of such distribution which is not so includible. In the case of a distribution of a Participant's After-Tax Contributions Account on or after January 1, 2007, such distribution shall only be directly transferred as a rollover contribution to an account or annuity described in section 408 of the Code, or to such a qualified retirement or annuity plan described in section 401(a) or 403(a) of the Code that agrees to separately account for amounts so transferred, including separately accounting for the portion of such amount which is includible in gross income and the portion of such distribution which is not so includible. Notwithstanding any provision of this paragraph (e), in the case of any eligible rollover distribution that includes all or any portion of the Participant's Designated Roth Contributions Account, a Participant or surviving Spouse or a former Spouse who is an alternate payee under a qualified domestic relations order as defined in section 414(p) of the Code may elect to transfer such portion only to another plan which accounts for Designated Roth Contributions described in section 402A of the Code or to a Roth IRA described in section 408A of the Code and only to the extent the rollover is permitted by the rules of section 402(c) of the Code. In addition, in the case of a distribution described in the preceding sentence that occurs on or after January 1, 2008, a Beneficiary who is not the surviving Spouse of the Participant may elect that all or any portion of such distribution shall be directly transferred as a rollover contribution from this Plan to (i) an individual retirement account described in section 408(a) of the Code, (ii) an individual retirement annuity described in section 408(b) of the Code or (iii) effective January 1, 2010, a Roth IRA described in section 408A of the Code, that, in either case, is established for the purpose of receiving such distribution on behalf of the Beneficiary.

Section 8.4. Time of Distribution.

A Participant who has terminated employment shall commence receiving distribution of his or her vested account balance as soon as administratively practical after the Valuation Date coinciding with or immediately following the date on which the Participant attains age 65, except as provided below.

(1) Early Distribution. Except as provided in subparagraph (7), a Participant whose Termination Date is prior to his or her 65th birthday may elect by calling the VRU, or in such other manner as may be prescribed by the Administrator, prior to his or her termination of employment to have distribution of his or her vested account balance commence within 60 days after the Valuation Date coinciding with or immediately following the Participant's Termination Date.

(2) Deferral of Distribution. A Participant may elect by calling the VRU, or in such other manner as may be prescribed by the Administrator, which election shall be made at the time prescribed by the Administrator, that distribution of his or her vested account balance commence as soon as practicable after the Participant's attainment of age 70 ½.

(3) Elections After Termination Date. Except as provided in subparagraph (7), a Participant who has terminated employment and whose distribution is to commence either after the Participant's attainment of age 65 or 70 ½ may elect at any time by calling the VRU, or in such other manner as may be prescribed by the Administrator, to have distribution of his or her vested account balance made within 60 days after the date such election is made.

(4) Required Beginning Date. Distributions paid or commencing during the Participant's lifetime shall commence not later than April 1 of the calendar year following the calendar year in which the Participant attains age 70 ½, except that distributions made to a Participant who is not a "five percent owner" (as defined in section 416(i) of the Code) may commence on April 1 of the calendar year following the later of the calendar year in which the Participant attains age 70 ½ or the calendar year in which the Participant retires. Notwithstanding any provision of the Plan to the contrary, any distributions required by this subparagraph shall be made not less rapidly than in accordance with the final Regulations under Section 401(a)(9). The Participant shall designate the extent to which the distribution of Before-Tax Contributions pursuant to this subparagraph 4 are Designated Roth Contributions from the Participant's Designated Roth Contributions Account and the extent that such withdrawals are Untaxed Contributions from the Participant's Untaxed Contributions Account and in the event that any such designation is not made or is incomplete, such distribution shall be treated as a distribution of Designated Roth Contributions to the extent Designated Roth Contributions were made to the Plan and, to the extent that the distribution of Before-Tax Contributions exceeds such Designated Roth Contributions, such distribution shall be treated as Untaxed Contributions.

(5) Distributions Commencing After Participant's Death. Distributions commencing after the Participant's death shall be completed within five years after the death of the Participant, except that (i) effective with respect to any Participant whose death occurs on or after January 1, 1995, regardless of when such Participant's employment terminated, if the Participant's Beneficiary is the Participant's Spouse, distribution may be deferred until the date on which the Participant would have attained age 70 ½ had he or she survived and (ii) if the Participant's Beneficiary is a natural person other than the Participant's Spouse and distributions commence not

later than one year after the Participant's death, such distributions may be made over a period not longer than the life expectancy of such Beneficiary. If at the time of the Participant's death, distribution of the Participant's benefit has commenced, the remaining portion of the Participant's benefit shall be paid in the manner elected by the Participant's Beneficiary, but at least as rapidly as was the method of distribution being used prior to the Participant's death.

(6) Distribution of Rollover Account After Termination Date. A Participant who has terminated employment or the Beneficiary of such Participant, as the case may be, may elect by calling the VRU, or in such other manner as may be prescribed by the Administrator prior to the time his or her vested account balance is distributed under this Section 8.4 to have distribution of the balance of his or her Rollover Account commence at such prior time as the Participant or Beneficiary shall elect, provided that, while any loan to the Participant under Section 8.2 remains outstanding, such distribution shall be made only to the extent that the balance of such Participant's vested account balance remaining after such distribution will equal or exceed the balance of all outstanding loans to the Participant.

(7) Compliance with Section 401(a)(9) of the Code. Notwithstanding any provision of the Plan to the contrary, all distributions will be made in accordance with section 401(a)(9) of the Code and the regulations promulgated thereunder, including the minimum distribution incidental death benefit requirement thereof. Notwithstanding the foregoing, any amount that would be a required minimum distribution described in section 401(a)(9) of the Code which is attributable to the 2009 calendar year will not be distributed to a Participant, or his or her Beneficiary, as applicable, unless such individual elects to receive such distribution. In addition, the five-year period described in subparagraph (5) above shall be determined without regard to calendar year 2009.

Notwithstanding anything contained herein to the contrary and except as provided in subparagraph (4) above, in the event that the recordkeeper for the Plan is changed, distributions may be made at such time as prescribed by the Administrator in order to accommodate the transfer of records to the new recordkeeper.

Section 8.5. Designation of Beneficiary.

Each Participant shall have the right to designate a Beneficiary or Beneficiaries (who may be designated contingently or successively and that may be an entity other than a natural person) to receive any distribution to be made under Section 8.3 (relating to distributions upon termination of employment) upon the death of such Participant or, in the case of a Participant who dies subsequent to termination of his or her employment but prior to the distribution of the entire amount to which he or she is entitled under the Plan, any undistributed balance to which such Participant would have been entitled, provided, however, that no such designation (or change thereof) shall be effective if the Participant was married on the date of the Participant's death unless such designation (or change thereof) was consented to at the time of such designation (or change thereof) by the person who was the Participant's Spouse, in writing, acknowledging the effect of such consent and witnessed by a notary public or a Plan representative, or it is established to the satisfaction of the Administrator that such consent could not be obtained because the Participant's Spouse cannot be located or such other circumstances as may be prescribed in Regulations. Subject to the preceding sentence, a Participant may from time to time, without the consent of any Beneficiary, change or cancel any such designation. Such designation and each change therein shall be made in the form prescribed by the Administrator and shall be filed with the Administrator. A Participant's beneficiary designation in effect under the PECO Energy Company Employee Savings Plan immediately prior to March 31, 2001 shall remain in effect under the Plan on and after March 31, 2001 until such time as such designation is changed or canceled in accordance with this Section 8.5. If (i) no Beneficiary has been named by a deceased Participant, (ii) such designation is not effective pursuant to the proviso contained in the first sentence of this section, or (iii) the designated Beneficiary has predeceased the Participant, any undistributed balance of the deceased Participant shall be distributed by the Trustee at the direction of the Administrator (a) to the surviving Spouse of such deceased Participant, if any, or (b) if there is no surviving Spouse, to the surviving children of such deceased Participant, if any, in equal shares, or (c) if there is no surviving Spouse or surviving children, to the surviving parents of such deceased Participant, if any, in equal shares, or (d) if there is no surviving Spouse, surviving children or surviving parents, to the executor or administrator of the estate of such deceased Participant or (e) if no executor or administrator has been appointed for the estate of such deceased Participant within six months following the date of the Participant's death, in equal shares to the person or persons who would be entitled under the intestate succession laws of the state of the Participant's domicile to receive the Participant's personal estate. The marriage of a Participant shall be deemed to revoke any prior designation of a Beneficiary made by him or her and a divorce shall be deemed to revoke any prior designation of the Participant's divorced Spouse if written evidence of such marriage or divorce is timely received by the Administrator.

Section 8.6. Distributions to Minor and Disabled Distributees.

Any distribution under this Article that is payable to a distributee who is a minor or to a distributee who, in the opinion of the Administrator, is unable to manage his or her affairs by reason of illness or mental incompetency may be made to or for the benefit of any such distributee at such time consistent with the provisions of Section 8.4 (relating to time of distribution) and in such of the following ways as the legal representative of such distributee shall direct: (a) directly to any such minor distributee if, in the opinion of such legal representative, the distributee is able to manage his or her affairs, (b) to such legal representative, (c) to a custodian under a Uniform Gifts to Minors Act for any such minor distributee, or (d) to some near relative of any such distributee to be used for the latter's benefit. Neither the Administrator nor the Trustee shall be required to see to the application by any third party other than the legal representative of a distributee of any distribution made to or for the benefit of such distributee pursuant to this Section.

Section 8.7. "Lost" Participants and Beneficiaries.

If within a period of five years following the death or other termination of employment of any Participant the Administrator in the exercise of reasonable diligence has been unable to locate the person or persons entitled to benefits under this Article 8, the rights of such person or persons shall be forfeited, provided, however, that the Plan shall reinstate and pay to such person or persons the amount of the benefits so forfeited upon a claim for such benefits made by such person or persons. The amount to be so reinstated shall be obtained from the total amount that shall have been forfeited pursuant to Section 8.3 (relating to distribution upon termination of employment) during the Plan Year that the claim for such forfeited benefit is made. If the amount to be reinstated exceeds the amount of such forfeitures, the Employer in respect of whose Employee the claim for forfeited benefit is made shall make a contribution in an amount equal to the remainder of such excess. Any such contribution shall be made without regard to whether or not the limitations set forth in Section 4.5 (relating to limitation on Employer contributions) will be exceeded by such contribution.

Section 8.8. Death Benefits Under USERRA

Effective January 1, 2007, in the case of a Participant who dies while performing Military Service, the Beneficiaries of such Participant shall be entitled to any additional benefits, if any, (other than benefit accruals relating to the period of qualified military service) provided under the Plan had the Participant resumed employment with an Employer and then terminated such employment on account of such Participant's death.

ARTICLE 9

PARTICIPANTS' STOCKHOLDER RIGHTS

Section 9.1. Voting Shares of Common Stock.

Each Participant and Beneficiary shall be entitled to direct the Trustee as to the exercise of any voting rights attributable to shares of Common Stock then allocated to his or her account and the Trustee shall vote such shares according to the voting directions of the Participant or Beneficiary that have been timely submitted to the Trustee on forms provided by the Trustee for such purpose. Participants and Beneficiaries shall be permitted to direct the Trustee as to the exercise of any voting rights, including, but not limited to, any corporate matter that involves the voting of shares of Common Stock with respect to the approval or disapproval of any corporate merger or consolidation, recapitalization, reclassification, liquidation, dissolution, sale of substantially all assets of a trade or business, or similar transaction prescribed in Regulations. The Trustee shall with respect to any matter vote the shares of Common Stock credited to Participants' accounts with respect to which the Trustee does not timely receive voting instructions in the same proportion as to shares the Trustee has received voting instructions. Written notice of any meeting of stockholders of the Company and a request for voting instructions shall be given by the Administrator or the Trustee, at such time and in such manner as the Administrator shall determine, to each Participant or Beneficiary entitled to give instructions for voting shares of Common Stock at such meeting. The Administrator shall establish and pay for a means by which Participants and Beneficiaries can expeditiously deliver such voting instructions to the Trustee. All instructions delivered by Participants or Beneficiaries shall be confidential and shall not be disclosed to any person, including the Employer.

Section 9.2. Tender Offers.

(a) In the event a tender offer is made generally to the stockholders of the Company to transfer all or a portion of their shares of Common Stock in return for valuable consideration, including but not limited to, offers regulated by section 14(d) of the Securities Exchange Act of 1934, as amended, each Participant or Beneficiary shall be entitled to direct the Trustee regarding how to respond to any such tender offer with respect to the number of shares of Common Stock then allocated to his or her account and the Trustee shall vote such shares according to the voting directions of the Participant or Beneficiary that have been timely submitted to the Trustee on forms provided by the Trustee for such purpose. A Participant or Beneficiary shall not be limited in the number of directions to tender or withdraw from tender that he or she can give, but shall not have the right to give directions to tender or withdraw from tender after a reasonable time established by the Trustee pursuant to paragraph (c) of this Section 9.2. The Trustee shall with respect to a tender offer decline to vote the shares of Common Stock credited to Participants' accounts with respect to which the Trustee does not timely receive directions on how to respond to any such tender offer. All such directions shall be confidential and shall not be disclosed to any person, including the Employer.

(b) Within a reasonable time after the commencement of a tender offer, the Administrator shall provide to each Participant and Beneficiary:

(i) the offer to purchase as distributed by the offeror to the stockholders of the Company,

(ii) a statement of the shares of Common Stock allocated to his or her account, and

(iii) directions as to the means by which a Participant can give directions with respect to the tender offer.

The Administrator shall establish and pay for a means by which a Participant and Beneficiary can expeditiously deliver directions to the Trustee with respect to a tender offer. The Administrator shall transmit or cause to be transmitted to the Trustee aggregate numbers of shares to be tendered or withheld from tender representing directions of Participants and Beneficiaries. The Administrator, at its election, may engage an agent to receive directions from Participants and Beneficiaries and transmit them to the Trustee.

(c) The Trustee may establish a reasonable time, taking into account the time restrictions of the tender offer, after which it shall not accept directions of Participants or Beneficiaries.

(d) Notwithstanding the foregoing, with respect to a tender offer for the purchase or exchange of less than five percent (5%) of the outstanding shares of Common Stock, the Investment Office shall direct the Trustee with respect to the sale, exchange or transfer of the shares of Common Stock held in the Trust Fund, and the Trustee shall follow the direction of the Investment Office.

ARTICLE 10

SPECIAL PARTICIPATION AND DISTRIBUTION RULES RELATING

TO REEMPLOYMENT OF TERMINATED EMPLOYEES AND

EMPLOYMENT BY RELATED ENTITIES

Section 10.1. Change of Employment Status.

If an Employee who is not a Participant becomes eligible to participate because of a change in his or her employment status, such Employee shall become a Participant as of the date of such change if either the Employee is not a member of a bargaining unit represented by IBEW Local Union 15 or the Employee has satisfied the eligibility service requirement set forth in Section 3.1; otherwise the Employee shall become a Participant in accordance with Section 3.1 following satisfaction of the eligibility service requirement.

Section 10.2. Reemployment of an Eligible Employee Whose Employment Terminated Prior to His or Her Becoming a Participant.

(a) If the employment of an Eligible Employee who is a member of a bargaining unit represented by IBEW Local Union 15 terminated before the Employee satisfied the eligibility service requirement set forth in Section 3.1 and such Employee is thereafter reemployed by an Employer, such Employee shall be eligible to become a Participant in accordance with Section 3.1.

(b) If the employment of an Eligible Employee who is a member of a bargaining unit represented by IBEW Local Union 15 terminated after he or she had satisfied the eligibility service requirement set forth in Section 3.1 but prior to becoming a Participant is reemployed by an Employer, he or she shall not be required to satisfy again such requirement and shall be eligible to become a Participant upon filing an application in accordance with Section 3.2 (relating to application for Before-Tax Contributions and After-Tax Contributions).

Section 10.3. Reemployment of a Terminated Participant.

If a terminated Participant is reemployed, the Participant shall not be required to satisfy again the eligibility service requirement set forth in Section 3.1 and shall again become a Participant upon filing an application in accordance with Section 3.2 (relating to application for Before-Tax Contributions and After-Tax Contributions).

Section 10.4. Employment by an Affiliate.

If an individual is employed by an Affiliate, then any period of such employment shall be taken into account solely for the purposes of determining whether and when such individual is eligible to participate in the Plan under Article 3 (relating to participation), when such individual has retired or otherwise terminated his or her employment for purposes of Article 8 (relating to withdrawals and distributions) to the same extent it would have been had such period of employment been as an Employee of his or her Employer.

Section 10.5. Leased Employees.

A leased employee (as defined below) shall not be eligible to participate in the Plan. If an individual who performed services as a leased employee (as defined below) of an Employer or an Affiliate becomes an Employee, or if an Employee becomes such a leased employee, then any period during which such services were so performed shall be taken into account solely for the purposes of determining whether and when such individual is eligible to participate in the Plan under Article 3 (relating to participation) and determining when such individual has retired or otherwise terminated his or her employment for purposes of Article 8 (relating to withdrawals and distributions) to the same extent it would have been had such service been as an Employee. This Section shall not apply to any period of service during which such a leased employee was covered by a plan described in section 414(n)(5) of the Code. Any contributions or benefits provided under such plan to a leased employee by his or her leasing organization shall be treated as provided under this Plan and shall be taken into account under Section 7.4 (relating to limitation on allocations imposed by Section 415 of the Code) to the extent required under section 1.415(a)-1(f)(3) of the Regulations. For purposes of this Plan, a "leased employee" shall mean any person who is not an employee of an Employer and who pursuant to an agreement between an Employer or Affiliate has performed services for an Employer or an Affiliate on a substantially full-time basis for a period of at least one year, which services were performed under the primary direction or control of an Employer or an Affiliate.

Section 10.6. Reemployment of Veterans.

(a) General. The provisions of this Section shall apply in the case of the reemployment by an Employer of an Eligible Employee, within the period prescribed by the Uniformed Service Employment and Reemployment Rights Act ("USERRA"), after the Employee's completion of a period of Military Service. The provisions of this Section are intended to provide such Employees with the rights required USERRA and section 414(u) of the Code, and shall be interpreted in accordance with such intent.

(b) Make Up of Before-Tax and After-Tax Contributions. Such Employee shall be entitled to make contributions under the Plan ("Make-Up Employee Contributions"), in addition to Before-Tax and After-Tax Contributions which the Employee elects to have made under the Plan pursuant to Section 4.1 (relating to Before-Tax Contributions). From time to time while employed by an Employer, such Employee may elect to contribute Make-Up Employee Contributions during the period beginning on the date of such Employee's reemployment and ending on the earlier of:

(i) the end of the period equal to the product of three and such Employee's period of Military Service, and

(ii) the fifth anniversary of the date of such reemployment.

Such Employee shall not be permitted to contribute Make-Up Employee Contributions to the Plan in excess of the amount which the Employee could have elected to have made under the Plan in the form of Before-Tax and After-Tax Contributions if the Employee had continued in employment with his or her Employer during such period of Military Service. Such Employee shall be deemed to have earned "Compensation" from his or her Employer during such period of Military Service for this purpose in the amount prescribed by sections 414(u)(2)(B) and 414(u)(7) of the Code. The manner in which an Eligible Employee may elect to contribute Make-Up Employee Contributions pursuant to this paragraph (b) shall be prescribed by the Administrator.

(c) Make Up of Employer Matching Contributions . An Eligible Employee who contributes Make-Up Employee Contributions as described in paragraph (b) shall be entitled to an allocation of Employer Matching Contributions ("Make-Up Matching Contributions") in an amount equal to the amount of Employer Matching Contributions which would have been allocated to the Employer Matching Contributions Account of such Eligible Employee under the Plan if such Make-Up Employee Contributions had been made in the form of Before-Tax or After-Tax Contributions (as applicable) during the period of such Employee's Military Service. The amounts necessary to make such allocation of Make-Up Matching Contributions shall be derived from any forfeitures not yet applied towards Employer Matching Contributions for the Plan Year in which the Make-Up Employee Contributions are made, and if such forfeitures are not sufficient for this purpose, then the Eligible Employee's Employer shall make a special contributions which shall be utilized solely for purposes of such allocation.

(d) Application of Limitations and Nondiscrimination Rules . Any contributions made by an Eligible Employee or an Employer pursuant to this Section on account of a period of Military Service in a prior Plan Year shall not be subject to the limitations prescribed by Sections 4.2, 4.5 and 7.4 of the Plan (relating to sections 402(g), 404 and 415 of the Code) for the Plan Year in which such contributions are made. The Plan shall not be treated as failing to satisfy the nondiscrimination rules of Section 4.4 of the Plan (relating to limitations on contributions for highly compensated Eligible Employees) for any Plan Year solely on account of any make up contributions made by an Eligible Employee or an Employer pursuant to this Section 10.6.

Section 10.7 Transfer of Employment to or from Facilities formerly Owned by CEG . Effective as of the Effective time (as such term is defined in the Merger Agreement), if a Participant who was a Participant on or prior to the Effective Time transfers employment to or is reemployed by an Employer or an Affiliate in a job classification with respect to which similarly situated employees of such Employer or Affiliate are not eligible to participate in the Plan but are instead eligible to participate in a Company Benefit Plan (as such term is defined in the Merger Agreement) that is intended to be a savings plan qualified under Section 401(a) or 401(k) of the Code (each such plan, a “CEG Savings Plan”) , then such individual shall upon such transfer or reemployment remain a Participant in the Plan and shall not participate in the CEG Savings Plan. If a participant in the CEG Savings Plan who was a participant in such plan on or prior to the Effective Time transfers employment to or is reemployed by an Employer or an Affiliate in a job classification with respect to which similarly situated employees of such Employer or Affiliate are not eligible to participate in such plan but are instead eligible to participate in the Plan, then such individual shall upon such transfer or reemployment remain a participant in the CEG Savings Plan and shall not participate in the Plan.

ARTICLE 11

ADMINISTRATION

Section 11.1. The Administrator, the Investment Office and the Corporate Investment Committee .

(a) The Administrator. The Company acting through its Director, Employee Benefit Plans & Programs, or such other person or committee appointed by the Chief Human Resources Officer from time to time (such director or other person or committee, the “Administrator”), shall be the “administrator” of the Plan, within the meaning of such term as used in ERISA. In addition, the Administrator shall be the “named fiduciary” of the Plan, within the meaning of such term as used in ERISA, solely with respect to administrative matters involving the Plan and not with respect to any investment of the Plan’s assets. The Administrator shall have the following duties, responsibilities and rights:

(i) The Administrator shall have the duty and discretionary authority to interpret and construe the Plan in regard to all questions of eligibility, the status and rights of Participants, distributees and other persons under the Plan, and the manner, time, and amount of payment of any distribution under the Plan. Benefits under the Plan shall be paid to a Participant or Beneficiary only if the Administrator, in its discretion, determines that such person is entitled to benefits.

(ii) The Administrator shall direct the Trustee to make payments of amounts to be distributed from the Trust under Article 8 (relating to withdrawals and distributions).

(iii) The Administrator shall supervise the collection of Participants’ contributions made pursuant to Article 5 (relating to Employee contributions) and the delivery of such contributions to the Trustee.

(iv) The Administrator shall have all powers and responsibilities necessary to administer the Plan, except those powers that are specifically vested in the Investment Office, the Corporate Investment Committee or the Trustee.

(v) Each Employer shall, from time to time, upon request of the Administrator, furnish to the Administrator such data and information as the Administrator shall require in the performance of its duties.

(vi) The Administrator may require a Participant or Beneficiary to complete and file certain applications or forms approved by the Administrator and to furnish such information requested by the Administrator. The Administrator and the Plan may rely upon all such information so furnished to the Administrator.

(vii) The Administrator shall be the Plan's agent for service of legal process and forward all necessary communications to the Trustee.

(b) Removal of Administrator. The Chief Human Resources Officer shall have the right at any time, with or without cause, to remove the Administrator (including any member of a committee that constitutes the Administrator). The Administrator may resign and the resignation shall be effective upon delivery of the written resignation to the Chief Human Resources Officer or upon the Administrator's termination of employment with the Employers. Upon the resignation, removal or failure or inability for any reason of the Administrator to act hereunder, the Chief Human Resources Officer shall appoint a successor. Any successor Administrator shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor. None of the Company, any officer, employee or member of the board of directors of the Company who is not the Chief Human Resources Officer, nor any other person shall have any responsibility regarding the retention or removal of the Administrator.

(c) The Investment Office. The Investment Office, shall be the "named fiduciary" of the Plan, within the meaning of such term as used in ERISA, solely with respect to matters involving the investment of assets of the Plan and, any contrary provision of the Plan notwithstanding, in all events subject to the limitations contained in Sections 404(a)(2) and 404(c) of ERISA and the terms of the Plan, and all other applicable limitations. The Investment Office shall have the following duties, responsibilities and rights:

(i) The Investment Office shall be the "named fiduciary" for purposes of designating the investment funds under Section 6.2 and for purposes of appointing one or more investment managers as described in ERISA.

(ii) The Investment Office shall be solely responsible for all matters involving investment of the Employer Stock Fund described in Section 6.2 and no other person shall have any responsibility with respect to investment of such fund; provided, however, that effective June 21, 2012, the Investment Office has appointed an independent investment manager under section 3(38) of ERISA to manage the investment of the Common Stock in the Employer Stock Fund and such investment manager (rather than the Investment Office) shall be solely responsible for any and all investment decisions relating thereto.

(iii) Each Employer shall, from time to time, upon request of the Investment Office, furnish to the Investment Office such data and information as the Investment Office shall require in the performance of its duties.

(d) The Corporate Investment Committee. The Company acting through the Corporate Investment Committee shall be responsible for overall monitoring of the performance of the Investment Office. The Corporate Investment Committee and the Company's Chief Investment Officer shall have the right at any time, with or without cause, to remove one or more employees of the Exelon Investment Office or to appoint another person or committee to act as Investment Office. Any successor Investment Office employee shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor. The power and authority of the Corporate Investment Committee with respect to the Plan shall be limited solely to the monitoring and removal of the employees of the Investment Office and the Corporate Investment Committee shall have no other duties or responsibilities with respect to the Plan. None of the Company, any officer, employee or member of the board of directors who is not a member of the Corporate Investment Committee, nor any other person shall have any responsibility regarding the appointment or removal of the employees of Investment Office.

(e) Status of Administrator, the Investment Office and the Corporate Investment Committee. The Administrator, any person acting as, or on behalf of, the Investment Office, and any member of the Corporate Investment Committee may, but need not, be an Employee, trustee or officer of an Employer and such status shall not disqualify such person from taking any action hereunder or render such person accountable for any distribution or other material advantage received by him or her under this Plan, provided that no Administrator, person acting as, or on behalf of, the Investment Office, or any member of the Corporate Investment Committee who is a Participant shall take part in any action of the Administrator or the Investment Office on any matter involving solely his or her rights under this Plan.

(f) Notice to Trustee of Members. The Trustee shall be notified as to the names of the Administrator and the person or persons authorized to act on behalf of the Investment Office.

(g) Allocation of Responsibilities. Each of the Administrator, the Investment Office and the Corporate Investment Committee may allocate their respective responsibilities and may designate any person, persons, partnership or corporation to carry out any of such responsibilities with respect to the Plan. Any such allocation or designation shall be reduced to writing and such writing shall be kept with the records of the Plan.

(h) General Governance. The Corporate Investment Committee shall elect one of its members as chairman and appoint a secretary, who may or may not be a member of such Committee. All decisions of the Corporate Investment Committee shall be made by the majority, including actions taken by written consent. The Administrator, the Investment Office and the Corporate Investment Committee may adopt such rules and procedures as it deems desirable for the conduct of its affairs, provided that any such rules and procedures shall be consistent with the provisions of the Plan.

(i) Indemnification. The Employers hereby jointly and severally indemnify the Administrator, the persons employed in the Exelon Investment Office, the members of the Corporate Investment Committee, the Chief Human Resources Officer, and the directors, officers and employees of the Employers and each of them, from the effects and consequences of their acts, omissions and conduct in their official capacity with respect to the Plan (including but not limited to judgments, attorney fees and costs with respect to any and all related claims, subject to the Company's notice of and right to direct any litigation, select any counsel or advisor, and approve any settlement), except to the extent that such effects and consequences result from their own willful misconduct. The foregoing indemnification shall be in addition to (and secondary to) such other rights such persons may enjoy as a matter of law or by reason of insurance coverage of any kind.

(j) No Compensation. None of the Administrator, any person employed in the Exelon Investment Office nor any member of the Corporate Investment Committee may receive any compensation or fee from the Plan for services as the Administrator, the Investment Office or a member of the Corporate Investment Committee; provided, however that nothing contained herein shall preclude the Plan from reimbursing the Company or any Employer for compensation paid to any such person if such compensation constitutes "direct expenses" for purposes of ERISA. The Employers shall reimburse the Administrator, the persons employed in the Exelon Investment Office and the members of the Corporate Investment Committee for any reasonable expenditures incurred in the discharge of their duties hereunder.

(k) Employ of Counsel and Agents. The Administrator, the Investment Office and the Corporate Investment Committee may employ such counsel (who may be counsel for an Employer) and agents and may arrange for such clerical and other services as each may require in carrying out its respective duties under the Plan.

Section 11.2. Claims Procedure.

Any Participant or distributee who believes he or she is entitled to benefits in an amount greater than those which he or she is receiving or has received may file a claim with the Administrator. Such a claim shall be in writing and state the nature of the claim, the facts supporting the claim, the amount claimed, and the address of the claimant. The Administrator shall review the claim and, unless special circumstances require an extension of time, within 90 days after receipt of the claim, give notice to the claimant, either in writing by registered or certified mail or in an electronic notification, of the Administrator's decision with respect to the claim. Any electronic notice delivered to the claimant shall comply with the standards imposed by applicable Regulations. If the Administrator determines that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 90-day period and in no event shall such an extension exceed 90 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which the Administrator expects to render the benefit determination. The notice of the decision of the Administrator with respect to the claim shall be written in a manner calculated to be understood by the claimant and, if the claim is wholly or partially denied, the Administrator shall notify the claimant of the adverse benefit determination and shall set forth the specific reasons for the adverse determination, the references to the specific Plan provisions on which the determination is based, a description of any additional material or information necessary for the claimant to perfect the claim, an explanation of why such material or information is necessary, and a description of the claim review procedure under the Plan and the time limits applicable to such procedures, including a statement of the claimant's right (subject to the limitations described in Sections 13.11 and 13.12) to bring a civil action under Section 502 of ERISA following an adverse benefit determination on review. The Administrator shall also advise the claimant that the claimant or the claimant's duly authorized representative may request a review by the by the Vice President, Health & Benefits (or such other officer designated from time to time by the Chief Human Resources Officer) of the adverse benefit determination by filing with such officer, within 60 days after receipt of a notification of an adverse benefit determination, a written request for such review. The claimant shall be informed that, within the same 60-day period, he or she (a) may be provided, upon request and free of charge, reasonable access to, and copies of, all documents, records and other information relevant to the claimant's claim for benefits and (b) may submit to such officer written comments, documents, records and other information relating to the claim for benefits. If a request is so filed, review of the adverse benefit determination shall be made by such officer within, unless special circumstances require an extension of time, 60 days after receipt of such request, and the claimant shall be given written notice of the officer's final decision. If the reviewing officer determines that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 60-day period and in no event shall such an extension exceed 60 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which the officer expects to render the determination on review. The review of the officer shall take into account all comments, documents, records and other information submitted by the claimant relating to the claim, without regard to whether such information was submitted or considered in the initial benefit determination. The notice of the final decision shall include specific reasons for the determination and references to the specific Plan provisions on which the determination is based and shall be written in a manner calculated to be understood by the claimant.

Section 11.3. Procedures for Domestic Relations Orders.

If the Administrator receives any written judgment, decree or order (including approval of a property settlement agreement) pursuant to domestic relations or community property laws of any state relating to the provision of child support, alimony or marital property rights of a Spouse, former Spouse, child or other dependent of a Participant and purporting to provide for the payment of all or a portion of the Participant's benefit under the Plan to or on behalf of one or more of such persons (such judgment, decree or order being hereinafter called a "domestic relations order"), the Administrator shall promptly notify the Participant and each other payee specified in such domestic relations order of its receipt and of the following procedures. After receipt of a domestic relations order, the Administrator shall determine whether such order constitutes a "qualified domestic relations order," as defined in paragraph (b) Section 14.2 (relating to exception for qualified domestic relations orders), and shall notify the Participant and each payee named in such order in writing of its determination. Such notice shall be written in a manner calculated to be understood by the parties and shall set forth specific reasons for the Administrator's determination, and shall contain an explanation of the review procedure under the Plan. The Administrator shall also advise each party that the party or his or her duly authorized representative may request a review by the Vice President, Health & Benefits (or such other officer designated from time to time by the Chief Human Resources Officer) of the Administrator's determination by filing a written request for such review. The Administrator shall give each party affected by such request notice of such request for review. Each party also shall be informed that he or she may have reasonable access to pertinent documents and submit comments in writing to such officer in connection with such request for review. Each party shall be given written notice of the officer's final determination, which notice shall be written in a manner calculated to be understood by the parties and shall include specific reasons for such final determination. Any amounts subject to a domestic relations order which would be payable to the alternate payee prior to the determination that such order is a qualified domestic relations order shall be separately accounted for and not distributed prior to such determination. If within a reasonable time after receipt of written evidence of such order it is determined that such domestic order constitutes a qualified domestic relations order, the amounts so separately accounted for (plus any interest thereon) shall be paid to the alternate payee. If within such reasonable period of time it is determined that such order does not constitute a qualified domestic relations order, the amounts so separately accounted for (plus any interest thereon) shall be paid to such other persons, if any, entitled to such amounts at such time. Prior to the issuance of regulations, the Administrator shall establish the time periods in which the Administrator's determination, a request for review thereof and the review by the Administrator shall be made, provided that the total of such time periods shall not be longer than 18 months from the date written evidence of a domestic relations order is received by the Administrator.

The duties of the Administrator under this Section 11.3 may be delegated by the Administrator to one or more persons other than the Administrator.

Section 11.4. Notices to Participants, Etc.

All notices, reports and statements given, made, delivered or transmitted to a Participant or distributee or any other person entitled to or claiming benefits under the Plan shall be deemed to have been duly given, made or transmitted when mailed by first class mail with postage prepaid and addressed to the Participant or distributee or such other person at the address last appearing on the records of the Administrator. A Participant or distributee or other person may record any change of his or her address from time to time by written notice filed with the Administrator.

Section 11.5. Notices to Administrator.

Written directions, notices and other communications from Participants or distributees or any other person entitled to or claiming benefits under the Plan to the Administrator shall be deemed to have been duly given, made or transmitted either when delivered to such location as shall be specified upon the forms prescribed by the Administrator for the giving of such directions, notices and other communications or when mailed by first class mail with postage prepaid and addressed to the addressee at the address specified upon such forms.

Section 11.6. Records.

Each of the Administrator and the Investment Office shall keep a record of all of their respective proceedings, if any, and shall keep or cause to be kept all books of account, records and other data as may be necessary or advisable in their respective judgment for the administration of the Plan or the administration of the investments of the Plan.

Section 11.7. Reports of Trustee and Accounting to Participants.

The Administrator shall keep on file, in such form as it shall deem convenient and proper, all reports concerning the Trust Fund received by it from the Trustee, and the Administrator will, as soon as practicable after the last day of each quarter of each Plan Year furnish each Participant and Beneficiary with a statement reflecting the condition of his or her accounts as of that date.

Section 11.8. Electronic Media.

Notwithstanding any provision of the Plan to the contrary and for all purposes of the Plan, to the extent permitted by the Administrator and any applicable law or Regulation, the use of electronic technologies shall be deemed to satisfy any written notice, consent, delivery, signature, disclosure or recordkeeping requirement under the Plan, the Code or ERISA to the extent permitted by or consistent with applicable law and Regulations. Any transmittal by electronic technology shall be deemed delivered when successfully sent to the recipient, or such other time specified by the Administrator.

ARTICLE 12

PARTICIPATION BY OTHER EMPLOYERS

Section 12.1. Adoption of Plan.

With the consent of the Company, any entity may become a participating Employer under the Plan by (a) taking such action as shall be necessary to adopt the Plan and (b) executing and delivering such instruments and taking such other action as may be necessary or desirable to put the Plan into effect with respect to such entity.

Section 12.2. Withdrawal from Participation.

Any Employer shall terminate its participation in the Plan at any time, under such circumstances as the Company may provide, by delivering to the Company a duly certified copy of a resolution of its board of directors (or other governing body) to that effect, or by ceasing to be a member of the same controlled group as the Company (within the meaning of section 1563(a) of the Code).

Section 12.3. Company as Agent for Employers.

Each entity that becomes a participating Employer pursuant to Section 12.1 (relating to adoption of Plan) or Article 13 (relating to continuance by a successor) by so doing shall be deemed to have appointed the Company its agent to exercise on its behalf all of the powers and authorities hereby conferred upon the Company by the terms of the Plan, including, but not by way of limitation, the power to amend and terminate the Plan. The authority of the Company to act as such agent shall continue unless and until the portion of the Trust Fund held for the benefit of Employees of the particular Employer and their Beneficiaries is set aside in a separate Trust Fund as provided in Section 16.2 (relating to establishment of separate trust).

ARTICLE 13

CONTINUANCE BY A SUCCESSOR

In the event that the Employer is reorganized by way of merger, consolidation, transfer of assets or otherwise, so that another entity succeeds to all or substantially all of the Employer's business, such successor entity may be substituted for the Employer under the Plan by adopting the Plan and becoming a party to the Trust agreement. Contributions by the Employer shall be automatically suspended from the effective date of any such reorganization until the date upon which the substitution of such successor entity for the Employer under the Plan becomes effective.

If, within 90 days following the effective date of any such reorganization, such successor entity shall not have elected to become a party to the Plan, or if the Employer adopts a plan of complete liquidation other than in connection with a reorganization, the Plan shall be automatically terminated with respect to Employees of such Employer as of the close of business on the 90th day following the effective date of such reorganization or as of the close of business on the date of adoption of such plan of complete liquidation, as the case may be, and the Administrator shall direct the Trustee to distribute the portion of the Trust Fund applicable to such Employer in the manner provided in Article 16 (relating to establishment of separate plan and termination).

If such successor entity is substituted for an Employer by electing to become a party to the Plan as described above, then, for all purposes of the Plan, employment of such Employee with such Employer, including service with and compensation paid by such Employer, shall be considered to be employment with an Employer.

ARTICLE 14

MISCELLANEOUS

Section 14.1. Expenses.

Except as provided in the last sentence of Section 6.2 (relating to expenses of investments for an investment fund), all costs and expenses incurred in administering the Plan and the Trust, including, but not limited to, “direct expenses” incurred in administering the Plan and the Trust (including compensation paid to any employee of an Employer or an Affiliate who is engaged in the administration of the Plan or the Trust), the expenses of the Administrator and the Investment Office, the fees of counsel and any agents for the Administrator and the Investment Office, the fees and expenses of the Trustee, the fees of counsel for the Trustee and other administrative expenses shall, to the extent permitted by law, be paid from the Trust Fund to the extent such expenses are not paid by the Employers. Notwithstanding the foregoing, the Administrator may authorize an Employer to pay any expenses, and the Employer shall be reimbursed from the Trust Fund for such payments. The Administrator, in its discretion, having regard to the nature of a particular expense, shall determine the portion of the expense that is to be borne by each Employer.

Section 14.2. Non-Assignability.

(a) In general. It is a condition of the Plan, and all rights of each Participant and Beneficiary shall be subject thereto, that no right or interest of any Participant or Beneficiary in the Plan shall be assignable or transferable in whole or in part, either directly or by operation of law or otherwise, including, but not by way of limitation, execution, levy, garnishment, attachment, pledge or bankruptcy, but excluding devolution by death or mental incompetency, and no right or interest of any Participant or Beneficiary in the Plan shall be liable for, or subject to, any obligation or liability of such Participant or Beneficiary, including claims for alimony or the support of any Spouse, except as provided below.

(b) Exception for Qualified Domestic Relations Orders. Notwithstanding any provision of the Plan to the contrary, if a Participant's account balance under the Plan, or any portion thereof, is the subject of one or more qualified domestic relations orders, as defined below, such account balance or portion thereof shall be paid to the person and at the time and in the manner specified in any such order. For purposes of this paragraph (b), "qualified domestic relations order" shall mean any "domestic relations order" as defined in Section 11.3 (relating to procedures for domestic relations orders) that creates (or recognizes the existence of) or assigns to a person other than the Participant (an "alternate payee") rights to all or a portion of the Participant's account balance under the Plan, and:

(A) clearly specifies

(i) the name and last known mailing address (if any) of the Participant and each alternate payee covered by such order,

(ii) the amount or percentage of this Participant's benefits to be paid by the Plan to each such alternate payee, or the manner in which such amount or percentage is to be determined,

(iii) the number of payments to, or period of time for which, such order applies, and

(iv) each plan to which such order applies;

(B) does not require

(i) the Plan to provide any type or form of benefit or any option not otherwise provided under the Plan at the time such order is issued,

(ii) the Plan to provide increased benefits (determined on the basis of actuarial equivalence), and

(iii) the payment of benefits to an alternate payee that at the time such order is issued already are required to be paid to a different alternate payee under a prior qualified domestic relations order; and

(C) does not require the commencement of payment of benefits to any alternate payee before the earlier of (I) the date on which the Participant is entitled to a distribution under the Plan and (II) the date the Participant attains age 50, except that the order may require the commencement of payment of benefits as soon as administratively practicable after the date such order is determined by the Administrator to be a "qualified domestic relations order";

all as determined by the Administrator pursuant to the procedures contained in Section 11.3 (relating to procedures for domestic relations orders). Any amounts subject to a domestic relations order prior to determination of its status as a qualified domestic relations order that but for such order would be paid to the Participant shall be segregated in a separate account or an escrow account pending such determination. If within the reasonable time period beginning with the date on which the first payment would be required to be made under a domestic relations order the Administrator determines that the domestic relations order constitutes a qualified domestic relations order, the amount so segregated (plus any interest thereof) shall be paid to the alternate payee. If such determination is not made within such reasonable time period, then the amount so segregated (plus any interest thereon), shall, as soon as practicable after the end of such reasonable time period, be paid to the Participant. Any determination regarding the status of such order after such reasonable time period shall be applied only to payments on or after the date of such determination.

Section 14.3. Employment Non-Contractual.

The Plan confers no right upon an Employee to continue in employment.

Section 14.4. Limitation of Rights.

A Participant or distributee shall have no right, title or claim in or to any specific asset of the Trust Fund, but shall have the right only to distributions from the Trust Fund on the terms and conditions herein provided.

Section 14.5. Merger or Consolidation with Another Plan.

A merger or consolidation with, or transfer of assets or liabilities to, any other plan shall not be effected unless the terms of such merger, consolidation or transfer are such that each Participant, distributee, Beneficiary or other person entitled to receive benefits from the Plan would, if the Plan were to terminate immediately after the merger, consolidation or transfer, receive a benefit equal to or greater than the benefit such person would be entitled to receive if the Plan were to terminate immediately before the merger, consolidation, or transfer.

Section 14.6. Gender and Plurals.

Wherever used in the Plan, words in the masculine gender shall include masculine or feminine gender, and, unless the context otherwise requires, words in the singular shall include the plural, and words in the plural shall include the singular.

Section 14.7. Applicable Law.

Except to the extent preempted by applicable federal law or otherwise provided under the terms of the Plan, the Plan and all rights hereunder shall be governed by and construed in accordance with the laws of the State of Illinois.

Section 14.8. Severability.

If a provision of the Plan shall be held illegal or invalid, the illegality or invalidity shall not affect the remaining parts of the Plan and the Plan shall be construed and enforced as if the illegal or invalid provision had not been included in the Plan.

Section 14.9. No Guarantee.

Neither the Administrator or the Investment Office, the Employer, nor the Trustee in any way guarantees the Trust from loss or depreciation nor the payment of any money that may be or become due to any person from the Trust Fund. Nothing herein contained shall be deemed to give any Participant, distributee, or Beneficiary an interest in any specific part of the Trust Fund or any other interest except the right to receive benefits out of the Trust Fund in accordance with the provisions of the Plan and the Trust Fund.

Section 14.10. Statute of Limitations for Actions under the Plan.

Except for actions to which the statute of limitations prescribed by Section 413 of ERISA applies, (a) no legal or equitable action relating to a claim for benefits under Section 502 of ERISA may be commenced later than one year after the claimant receives a final decision from the Company's Vice President, Health & Benefits (or such other officer designated from time to time by the Chief Human Resources Officer) in response to the claimant's request for review of the adverse benefit determination and (b) no other legal or equitable action involving the Plan may be commenced later than two years from the time the person bringing an action knew, or had reason to know, of the circumstances giving rise to the action. This provision shall not be interpreted to extend any otherwise applicable statute of limitations, nor to bar the Plan or its fiduciaries from recovering overpayments of benefits or other amounts incorrectly paid to any person under the Plan at any time or bringing any legal or equitable action against any party.

Section 14.11. Forum for Legal Actions under the Plan.

Any legal action involving the Plan that is brought by any Participant, any Beneficiary or any other person shall be litigated in the federal courts located in the Northern District of Illinois or the Eastern District of Pennsylvania, whichever is most convenient, and no other federal or state court.

Section 14.12. Legal Fees.

Any award of legal fees in connection with an action involving the Plan shall be calculated pursuant to a method that results in the lowest amount of fees being paid, which amount shall be no more than the amount that is reasonable. In no event shall legal fees be awarded for work related to (a) administrative proceedings under the Plan, (b) unsuccessful claims brought by a Participant, Beneficiary or any other person, or (c) actions that are not brought under ERISA. In calculating any award of legal fees, there shall be no enhancement for the risk of contingency, nonpayment or any other risk nor shall there be applied a contingency multiplier or any other multiplier. In any action brought by a Participant, Beneficiary or any other person against the Plan, the Administrator, the Investment Office, the Vice President, Health & Benefits, any Plan fiduciary, the Chief Human Resources Officer, the Company, its affiliates or their respective officers, directors, employees, or agents (the “Plan Parties”), legal fees of the Plan Parties in connection with such action shall be paid by the Participant, Beneficiary or other person bringing the action, unless the court specifically finds that there was a reasonable basis for the action.

ARTICLE 15

TOP-HEAVY PLAN REQUIREMENTS

Section 15.1. Top-Heavy Plan Determination.

If as of the determination date (as defined in Section 15.2) for any Plan Year (a) the sum of the account balances under the Plan and all other defined contribution plans in the aggregation group (as defined in Section 15.2) and (b) the present value of accrued benefits under all defined benefit plans in such aggregation group of all Participants in such plans who are key employees (as defined in Section 15.2) for such Plan Year exceeds 60 percent of the aggregate of the account balances and present value of accrued benefits of all participants in such plans as of the determination date (as defined in Section 15.2), then this Plan shall be a top-heavy plan for such Plan Year, and the requirements of Sections 15.3 (relating to minimum contribution for top-heavy years) shall be applicable for such Plan Year as of the first day thereof. If the Plan shall be a top-heavy plan for any Plan Year and not be a top-heavy plan for any subsequent Plan Year, the requirements of this Article shall not be applicable for such subsequent Plan Year.

Section 15.2. Definitions and Special Rules.

(a) Definitions. For purposes of this Article, the following definitions shall apply:

(1) Determination Date. The determination date for all plans in the aggregation group shall be the last day of the preceding Plan Year, and the valuation date applicable to a determination date shall be (i) in the case of a defined contribution plan, the date as of which account balances are determined which is coincident with or immediately precedes the determination date, and (ii) in the case of a defined benefit plan, the date as of which the most recent actuarial valuation for the Plan Year that includes the determination date is prepared, except that if any such plan specifies a different determination or valuation date, such different date shall be used with respect to such plan.

(2) Aggregation Group. The aggregation group shall consist of (a) each plan of an Employer in which a key Employee is a participant, (b) each other plan that enables such a plan to be qualified under section 401(a) of the Code, and (c) any other plans of an Employer that the Company designates as part of the aggregation group and that shall permit the aggregation group to continue to meet the requirements of sections 401(a) and 410 of the Code with such other plan being taken into account.

(3) Key Employee. Key Employee shall have the meaning set forth in section 416(i) of the Code.

(4) Compensation. Compensation shall have the meaning set forth in section 1.415(c)-2 of the Regulations.

(b) Special Rules. For the purpose of determining the accrued benefit or account balance of a Participant, the accrued benefit or account balance of any person who has not performed services for an employer at any time during the 1-year period ending on the determination date shall not be taken into account pursuant to this Section. Any person who received a distribution from a plan (including a plan that has terminated) in the aggregation group during the 1-year period ending on the last day of the preceding Plan Year shall be treated as a Participant in such plan, and any such distribution shall be included in such Participant's account balance or accrued benefit, except that in the case of any distribution made for a reason other than separation from service, death or disability, this sentence shall be applied by substituting "5-year period" for the "1-year period" stated herein.

Section 15.3. Minimum Contribution for Top-Heavy Years.

Notwithstanding any provision of the Plan to the contrary, the sum of the Employer contributions under Article 4 (other than Before-Tax Contributions described in Section 4.1) allocated to the account of each Participant (other than a key Employee) during any Plan Year and the forfeitures allocated to the account of such Participant (other than a key Employee) during any Plan Year for which the Plan is a top-heavy plan shall in no event be less than the lesser of (i) 3% of such Participant's compensation during such Plan Year and (ii) the highest percentage at which contributions are made on behalf of any key Employee for such Plan Year. Notwithstanding the preceding sentence, if the percentage determined pursuant to clause (ii) of the preceding sentence is less than 3%, such percentage shall be recalculated by including Before-Tax Contributions made on behalf of key employees. Such minimum contribution shall be made even if, under other provisions of the Plan, the Participant would not otherwise be entitled to receive an allocation or would receive a lesser allocation for the year because of (i) the Participant's failure to complete 1,000 Hours of Service, or (ii) compensation of less than a stated amount. If, during any Plan Year for which this Section 15.3 is applicable, a defined benefit plan is included in the aggregation group and such defined benefit plan is a top-heavy plan for such Plan Year, the percentage set forth in clause (i) of the first sentence of this Section shall be 5%. The percentage referred to in clause (ii) of the first sentence of this Section shall be obtained by dividing the aggregate of contributions made pursuant to Article 4 and pursuant to any other defined contribution plan that is required to be included in the aggregation group (other than a defined contribution plan that enables a defined benefit plan that is required to be included in such group to be qualified under section 401(a) of the Code) during the Plan Year on behalf of such key Employee by such key Employee's compensation for the Plan Year. Notwithstanding the above, the provisions of this Section 15.3 shall not apply for any Plan Year with respect to an Eligible Employee who has accrued the defined benefit minimum provided under section 416 of the Code under a qualified defined benefit plan maintained by an Employer or Affiliate.

ARTICLE 16

AMENDMENT, ESTABLISHMENT OF SEPARATE PLAN AND TERMINATION

Section 16.1. Amendment.

The Company may at any time and from time to time amend or modify the Plan by resolution of the Board of Directors of the Company or the Compensation Committee thereof; provided, however, that in the case of any amendment or modification that would not result in an aggregate annual cost to the Company of more than $50,000,000, the Plan may be amended or modified by action of the Chief Human Resources Officer (with the consent of the Chief Executive Officer in the case of a discretionary amendment or modification expected to result in an increase in annual expense or liability exceeding $250,000) or another executive officer holding title of equivalent or greater responsibility. No amendment shall be made in respect of Eligible Employees who are members of a bargaining unit represented by IBEW Local Union 15 that is inconsistent with that portion of the collective bargaining agreement between such an Employer and IBEW Local Union 15 concerning the Plan.

Section 16.2. Establishment of Separate Plan.

If an Employer withdraws from the Plan under Section 12.2 (relating to withdrawal from participation), the Administrator may determine the portion of the Trust Fund held by the Trustee that is applicable to the Participants and former Participants of such Employer and direct the Trustee to segregate such portion in a separate Trust Fund. Such separate Trust Fund shall thereafter be held and administered as a part of the separate plan of such Employer.

The portion of the Trust Fund applicable to the Participants and former Participants of a particular Employer shall be the sum of:

(a) the total amount credited to all accounts that are applicable to the Participants and former Participants of such Employer and

(b) an amount that bears the same ratio to the excess, if any, of

(i) the total value of the Trust Fund over

(ii) the total amount credited to all accounts

as the total amount credited to the accounts that are applicable to the Participants of such Employer bears to the total amount credited to such accounts of all Participants.

Section 16.3. Termination and Distributions upon Termination of the Plan.

The Company has established the Plan with the bona fide intention and expectation that contributions will be continued indefinitely, but the Company will not have any obligation or liability whatsoever to maintain the Plan for any given length of time and may terminate the Plan at any time by resolution of the Board of Directors or the Compensation Committee thereof, to that effect, without any liability whatsoever for any such termination. Notwithstanding the preceding sentence, the Plan shall not be terminated in respect of Eligible Employees who are members of a bargaining unit represented by IBEW Local Union 15 if such termination is inconsistent with the portion of the collective bargaining agreement between the Employer of such Eligible Employees and IBEW Local Union 15 concerning the Plan. The Plan will be deemed terminated: (a) if and when the Company is judicially declared bankrupt, or (b) upon dissolution of the Company.

Upon termination of the Plan by the Company or withdrawal from participation in the Plan by any Employer pursuant to Section 12.2 (relating to withdrawal from participation) or the partial termination of the Plan with respect to a group of Employees or complete discontinuance of contributions hereunder, distributions shall be made to each affected Participant or other persons entitled to distributions pursuant to Article 8 (relating to withdrawals and distributions). If the entire Plan is terminating, upon the completion of distribution to all Participants, the Trust will terminate, the Trustee will be relieved from all liability under the Trust, and no Participant or other person will have any claims thereunder, except as required by applicable law.

Notwithstanding the preceding paragraph, no distribution shall be made to any Participant (i) until he or she attains age 59 ½ except as otherwise provided in Section 8.3 (relating to distributions upon termination of employment) or (ii) if a successor plan, as defined in Regulations, is established or maintained by the Participant’s Employer.

To the extent that no discrimination in value results, any distribution after termination or partial termination of the Plan may be made, in whole or in part, in cash, in securities or other assets in kind, or in non-transferable annuity contracts, as the Administrator (in its discretion) may determine. All non-cash distributions shall be valued at fair market value at date of distribution.

If the Internal Revenue Service refuses to issue an initial, favorable determination letter that the Plan and Trust Fund as adopted by an Employer meet the requirements of section 401(a) of the Code and that the Trust Fund is exempt from tax under section 501(a) of the Code, the Employer may terminate its participation in the Plan and shall direct the Trustee to pay and deliver the portion of the Trust Fund applicable to the Participants of such Employer, determined pursuant to Section 16.2 (relating to establishment of separate plan) to such Employer and such Employer shall pay to Participants or their beneficiaries the part of such Employer’s portion of the Trust Fund as is attributable to contributions made by Participants.

Notwithstanding any provision of this Plan to the contrary, no distribution shall be made pursuant to this Section 16.3 (relating to termination and distribution upon termination of the Plan) solely due to the termination of this Plan if, within the meaning of applicable Regulations, the employer establishes or maintains an alternative defined contribution plan.

Section 16.4. Trust Fund to Be Applied Exclusively for Participants and Their Beneficiaries .

Subject only to the provisions of Section 4.5 (relating to the limitation on Employer contributions), 7.4 (relating to limitations on allocations imposed by section 415 of the Code) and 16.3 (relating to termination and distributions upon termination of the Plan), and any other provision of the Plan to the contrary notwithstanding, it shall be impossible for any part of the Trust Fund to be used for or diverted to any purpose not for the exclusive benefit of Participants and their Beneficiaries either by operation or termination of the Plan, power of amendment or other means.

IN WITNESS WHEREOF, the Company has caused this instrument to be executed by its duly authorized officer on this ______ day of December, 2012.

EXELON CORPORATION

By ____
Chief Human Resources Officer

SUPPLEMENT I

Transfers from Other Plans

With the consent of the Administrator, whenever a participant in any other qualified savings or profit sharing plan maintained for employees of an entity any of whose assets or stock are acquired by an Employer (the "Other Plan") becomes a Participant in this Plan, then such Participant's interest in the Other Plan may be transferred to the Trustee of this Plan and credited to administrative subaccounts to be held, invested, reinvested and distributed pursuant to the terms of the Plan and the Trust and, as of the date of the transfer of any such Participant's interest in the Other Plan,

(a) there shall be credited to the Before-Tax Contributions Account of such Participant that portion of his interest in the Other Plan which is transferred to the Trustee and which represents the Participant's salary reduction contributions, if any, made to the Other Plan on behalf of the Participant,

(b) there shall be credited to the After-Tax Account of such Participant that portion of his interest in the Other Plan which is transferred to the Trustee and which represents the Participant's after-tax contributions, if any, made to the Other Plan,

(c) there shall be credited to the Employer Matching Contributions Account of such Participant that portion of his interest in the Other Plan which is transferred to the Trustee and which represents the matching contributions and other employer contributions, if any, made to the Other Plan on behalf of the Participant, and

(d) there shall be credited to the Rollover Account of such Participant that portion of his interest in the Other Plan which is transferred to the Trustee and which represents the Participant's rollover contributions, if any, to the Other Plan.

Any amounts credited to a Participant's Before-Tax Contributions Account, After-Tax Contributions Account, Employer Matching Contributions Account and Rollover Account shall be credited to the administrative subaccounts in accordance with such Participant's investment direction in effect as of the date of such transfer. Any salary reduction contributions credited to the Before-Tax Contributions Account that are designated Roth contributions within the meaning of section 402A of the Code shall be maintained in a manner that satisfies the separate accounting requirement, and any Regulations or other requirements promulgated, under section 402A of the Code. Any special provisions applicable to amounts transferred to the Trustee from any Other Plan shall be set forth in an Exhibit hereto.

SUPPLEMENT II

Elective Transfers Between This Plan and Plans of Affiliates or the TXU 401(k) Plan

A. Transfers to this Plan. Whenever an individual who is employed by an Affiliate that is not an Employer has a change in employment status that results in such individual (a) becoming an Eligible Employee and (b) being ineligible to make additional elective contributions under a plan maintained by such Affiliate (an “Affiliate Plan”), such Eligible Employee may elect to transfer his or her benefits under the Affiliate Plan to this Plan. Such election must be conditioned upon a voluntary, fully-informed election by the Eligible Employee. In the event that the Eligible Employee makes such election, his or her benefits under the Affiliate Plan shall be credited to his account under this Plan, and such benefits shall be subject to the terms of, and paid as prescribed by, this Plan, and the terms of the Affiliate Plan shall not apply with respect to such benefits.

An individual who becomes an Eligible Employee in connection with the Company’s 2002 acquisition of from Texas Utilities, Inc. (“TXU”) may elect to transfer his or her benefits under TXU’s 401(k) plan (the “TXU Plan”) to this Plan. Such election must be conditioned upon a voluntary, fully-informed election by the Eligible Employee. In the event that the Eligible Employee makes such election, his or her benefits under the TXU Plan shall be credited to his account under this Plan, and such benefits shall be subject to the terms of, and paid as prescribed by, this Plan, and the terms of the TXU Plan shall not apply with respect to such benefits.

B. Transfers from this Plan. Whenever a Participant has a change in employment status that results in such Participant (a) ceasing to be an Eligible Employee and (b) becoming eligible to participate in an Affiliate Plan, such Participant may elect to transfer his or her benefits under this Plan to the Affiliate Plan. Such election must be conditioned upon a voluntary, fully-informed election by the Participant. In the event that the Participant makes such election, the Participant, effective at the time of the transfer, shall not be entitled to any benefits under this Plan and the benefits transferred to the Affiliate Plan shall be subject to the terms of, and paid as prescribed by, the Affiliate Plan, and the terms of this Plan shall not apply with respect to such benefits.

SUPPLEMENT III

Merger of Certain AmerGen Plans into this Plan

Purpose. The purpose of this Supplement III is to reflect the merger of the AmerGen Clinton Employee Savings Plan for Nonbargaining Employees (the "Clinton Plan") and the AmerGen TMI and Oyster Creek Employee Savings Plan for Nonbargaining Employees (collectively, the "AmerGen Plans") into the Plan effective February 1, 2004 (the "Merger Date") and to preserve those provisions of the AmerGenPlans that cannot be eliminated by amendment without violating section 411(d)(6) of the Internal Revenue Code and applicable Treasury regulations thereunder.

Definitions. Unless the context clearly indicates otherwise, a term defined in the Plan shall have the same meanings for purposes of this Supplement III.

Conflicts Between the Plan and this Supplement III. This Supplement III and the Plan together comprise the Plan with respect to AmerGen Plan Participants (as defined below). In case of any conflict between the provisions of the Plan and this Supplement III, the terms and provisions of this Supplement III shall govern to the extent necessary to eliminate such conflict.

AmerGen Plan Participants. This Supplement III shall be applicable to all AmerGen Plan Participants. "AmerGen Plan Participants" are participants in the Plan who were participants in the AmerGen Plans and whose account balances under the AmerGen Plans were merged into the Plan.

Vesting. All AmerGen Plan Participants shall be fully vested in their accounts under the Plan.

Withdrawals of Employer Matching Contributions. Notwithstanding any provision in the Plan to the contrary, an AmerGen Plan Participant who, immediately prior to the Merger Date was a participant in the Clinton Plan ("Clinton Participant") who has completed 60 months as either a participant in the Clinton Plan or a participant in this Plan may elect, in accordance with procedures established by the Administrator, to receive a distribution of all or any part of his or her Employer Matching Contributions Account that is attributable to contributions made under the Clinton Plan, as adjusted for gains, earnings and losses attributable thereto determined as of the Valuation Date next succeeding the date of receipt of the request for distribution. Additionally, a Clinton Participant, regardless of his or her period of participation in the Clinton Plan or this Plan, may elect, in accordance with procedures established by the Administrator, to receive a distribution of all or any part of that portion of the Employer Matching Contributions Account that is attributable to contributions made under the Clinton Plan and that is derived from Employer Matching Contributions in excess of Employer Matching Contributions allocated to his or her Employer Matching Contributions Account during the two Plan Years preceding the Plan Year in which the withdrawal takes place, adjusted for gains, earnings and losses attributable thereto determined as of the Valuation Date next succeeding the date of receipt of the request for distribution.

No distribution made pursuant to this paragraph F may be for an amount which is less than the lesser of (i) $200; or (ii) that portion of the Participant's Employer Matching Contributions Account that is attributable to contributions made under the Clinton Plan, as adjusted for gains, earnings and losses attributable thereto. In addition, a Participant may not make more than one withdrawal pursuant to this paragraph F in any Plan Year.

Loans. With respect to any loan to an AmerGen Plan Participant that is outstanding at the Merger Date, the terms of such loan shall continue to be governed by the note evidencing such loan and the terms applicable to such loan as in effect under the AmerGen Plans as of the Merger Date. All loans made after the Merger Date shall be governed by and in accordance with the terms of the Plan and any loan policy issued thereunder by the Administrator.

SUPPLEMENT IV

Merger of New England Plan into this Plan

Purpose. The purpose of this Supplement IV is to reflect the merger of the Exelon New England Union Retirement 401(k) Plan (the "New England Plan") into the Plan effective November 1, 2004 (the "Merger Date").

Definitions. Unless the context clearly indicates otherwise, a term defined in the Plan shall have the same meanings for purposes of this Supplement IV.

Conflicts Between the Plan and this Supplement IV. This Supplement IV and the Plan together comprise the Plan with respect to New England Plan Participants (as defined below). In case of any conflict between the provisions of the Plan and this Supplement IV, the terms and provisions of this Supplement IV shall govern to the extent necessary to eliminate such conflict.

New England Plan Participants. This Supplement IV shall be applicable to all New England Plan Participants. "New England Plan Participants" are participants in the Plan who were participants in the New England Plan and whose account balances under the New England Plan were merged into the Plan.

Vesting. All New England Plan Participants shall be fully vested in their accounts under the Plan.

Loans. With respect to any loan to a New England Plan Participant that is outstanding at the Merger Date, the terms of such loan shall continue to be governed by the note evidencing such loan and the terms applicable to such as in effect under the New England Plan as of the Merger Date. All loans made after the Merger Date shall be governed by and in accordance with the terms of the Plan and any loan policy issued thereunder by the Administrator.

SUPPLEMENT V

Transfers from the Exelon Corporation 401(k) Profit Sharing Plan No. 2

A. Purpose. The purpose of this Supplement IV is to reflect the transfer to the Plan of assets allocated to certain accounts under the Exelon Corporation 401(k) Profit Sharing Plan No. 2 (the "InfraSource Plan No. 2"), which was terminated on November 30, 2007.

B. Definitions. All capitalized terms used in this Supplement IV, but not separately defined herein, shall have the same meanings assigned to such terms in the Plan.

C. Applicability. This Supplement shall apply to any individual ("Affected Participant") whose benefit under the InfraSource Plan No. 2 is transferred pursuant to Section D of this Supplement IV. An Affected Participant shall be treated as a Participant under the Plan for all purposes of the Plan except, unless the Affected Participant is otherwise eligible to participate in the Plan, for purposes related to making or receiving contributions as set forth in Articles 4 and 5 of the Plan.

D. Transfer. Notwithstanding any provision in the Plan to the contrary, assets allocated to the InfraSource Plan No. 2 accounts of any individual who, in connection with the termination of the InfraSource Plan No. 2, elected to transfer his or her benefits thereunder to the Plan or who did not make a timely election with respect to his or her benefits under the InfraSource Plan No. 2, shall be transferred to the Plan as soon as administratively practicable after November 30, 2007 and credited to a separate account ("Affected Account") under this Plan.

E. Conflicts Between the Plan and this Supplement IV. This Supplement IV and the Plan together comprise the Plan with respect to Affected Accounts. In case of any conflict between the provisions of the Plan and this Supplement IV, the terms and provisions of this Supplement IV shall govern to the extent necessary to eliminate such conflict.

F. Vesting. Each Affected Participant shall be fully vested in his or her Affected Account.

Exhibit 10.7

EXELON CORPORATION CASH BALANCE PENSION PLAN

Amended and Restated Effective as of January 1, 2013

Table of Contents

Table of Contents

(continued)

Table of Contents

(continued)

ARTICLE 1
TITLE AND PURPOSE

The name of the plan set forth herein shall be the "Exelon Corporation Cash Balance Pension Plan" (the "Plan"). This Plan, as in effect on December 31, 2012, was previously amended and restated effective generally as of January 1, 2013 and this document represents the subsequent amendment and restatement of the Exelon Corporation Cash Balance Pension Plan as in effect on December 31, 2012 and, except as otherwise provided, shall control and apply to Employees whose employment is terminated on or after January 1, 2013 and to the Beneficiaries of such Employees. The rights and benefits of Employees whose employment terminates before January 1, 2013 and of the Beneficiaries of such Employees shall be determined under the Exelon Corporation Cash Balance Pension Plan as in effect at the time of such Employees' termination, including any provisions of this Plan effective at such time; provided, however, that the provisions of Section 6.1(d) (relating to Investment Credits), Article 8 (relating to limitations on benefits), Article 9 (relating to special participation and distribution rules relating to recommencement of employment and employment by related entities), Article 10 (relating to administration), Article 13 (relating to miscellaneous provisions) and Article 15 (relating to amendment and termination of the Plan) shall be effective for all such persons.

ARTICLE 2
DEFINITIONS

As used herein, the following words and phrases shall have the following respective meanings when capitalized:

(1) Accrued Benefit. Except as provided in Section 9.2 (relating to suspension of benefits), the amount payable under the Plan commencing on the first day of the month coinciding with or next following a Participant's Normal Retirement Age, determined as of a date not later than such Participant's Normal Retirement Age as if the Participant had elected Option

1 (the life annuity) under Section 7.2(c) (relating to optional forms of benefit), that is the Actuarial Equivalent of the sum of the balance credited to the Participant's Cash Balance Account as of the date of determination plus Investment Credits (at the rate in effect under Section 6.1(d) (relating to investment credits) on the date of determination) from the date of determination until such assumed date of commencement, plus the Additional Credit, if any, determined as of the date of commencement, subject to adjustment pursuant to Section 7.2(d)(2) (relating to special rules regarding pensions). Notwithstanding the preceding sentence, the Participant's Accrued Benefit attributable to his or her Cash Balance Account, determined as of any date prior to the Participant's Normal Retirement Age, shall be the greater of (a) the amount that would be payable with respect to the sum of the Transition Credit, if any, the Service Credits and the Investment Credits credited to such Participant's Cash Balance Account (the "Account Balance") if the Participant had elected Option 1 (the life annuity) under Section 7.2(c) (relating to optional forms of benefit), that is the Actuarial Equivalent of the Account Balance as of the date of determination projected to the Participant's Normal Retirement Age by crediting such Account Balance with interest calculated on the date of determination to the Participant's Normal Retirement Age, and (b) the amount determined pursuant to the preceding sentence. In addition, a Participant's Accrued Benefit shall include the Participant's Accrued Frozen Benefit. Notwithstanding the preceding sentences or anything contained herein to the contrary, a Participant's Accrued Benefit attributable to his or her Cash Balance Account, determined as of any date on or after August 18, 2006, shall be the Participant's Cash Balance Account.

(2) Accrued Frozen Benefit. The meaning given such term in the applicable Schedule.

(3) Actuarial Equivalent. A benefit of value equivalent to the value of the benefit being replaced, computed using the table specified by the Commissioner of Internal Revenue for purposes of section 417(e)(3) of the Code (which, as of the Effective Date, is the 1983 Group Annuity (unisex) Mortality Table (50% male, 50% female) and, as of January 1, 2003, is the 1994 Group Annuity Reserving (GAR) table (unisex basis)) in effect on the date of determination and an interest rate assumption using the "applicable interest rate" as defined in section 417(e)(3) of the Code for the month of November of the Plan Year immediately preceding the Plan Year in which the determination occurs.

(4) Additional Credit. The amount, if any, credited to a Participant's Cash Balance Account pursuant to Section 6.1(e).

(5) Administrator. The Company acting through its Vice President, Health & Benefits or such other person appointed pursuant to Section 10.1 (relating to the Administrator, the Investment Office and the Corporate Investment Committee).

(6) Affiliate. (a) A corporation that is a member of the same controlled group of corporations (within the meaning of section 414(b) of the Code) as an Employer, (b) a trade or business (whether or not incorporated) under common control (within the meaning of section 414(c) of the Code) with an Employer, (c) any organization (whether or not incorporated) that is a member of an affiliated service group (within the meaning of section 414(m) of the Code) that includes (i) an Employer, (ii) a corporation described in clause (a) of this definition or (iii) a trade or business described in clause (b) of this definition, or (d) any other entity that is required

to be aggregated with an Employer pursuant to Regulations promulgated under section 414(o) of the Code. A corporation, trade or business entity shall be an Affiliate only for such period or periods of time during which such corporation, trade or business entity is described in the preceding sentence, but not prior to such time.

(7) Beneficiary. The person or persons entitled to receive a benefit under Section 7.2 (relating to form of distribution) or Section 7.3 (relating to death benefits) in the event of the death of a Participant.

(8) Cash Balance Account. The hypothetical account established for each Participant pursuant to Section 6.1(a) (relating to establishment of accounts).

(9) CEG. Constellation Energy Group, Inc. and any of its affiliates that was an affiliate immediately before the Effective Time (as such term is defined in the Merger Agreement).

(10) Code. The Internal Revenue Code of 1986, as amended.

(11) ComEd Plan. The Commonwealth Edison Company Service Annuity System under the Exelon Corporation Retirement Program.

(12) Company. Exelon Corporation, a Pennsylvania corporation, and any successor to such Company that shall adopt the Plan pursuant to Article 12 (relating to continuance by successor entities).

(13) Compensation. The regular base salary or base wages, as applicable, paid by an Employer to an Eligible Employee for a Plan Year, increased by all payments made during such Plan Year by an Employer to such Eligible Employee under any of the plans set forth in Exhibit A attached hereto, all nuclear license bonuses paid during such Plan Year by an Employer to such Eligible Employee and all amounts not includible in such Eligible Employee's regular base salary or base wages solely on account of his or her election to have compensation reduced pursuant to any qualified cash or deferred arrangement described in section 401(k) of the Code, a qualified transportation fringe benefit program described in section 132(f) of the Code or a cafeteria plan as described in section 125 of the Code, in each case, maintained by an Employer, but excluding any reimbursements or other allowances for automobile, relocation, travel or education expenses (even if includible in the Employee's regular base salary or base wages) and any amount awarded under the Performance Share Award Program for Power Team Employees under the Exelon Corporation Long Term Incentive Plan (or any predecessor or successor program). Notwithstanding the preceding sentence, an Employee's Compensation in excess of the dollar amount prescribed by section 401(a)(17) of the Code (as adjusted for increases in the cost-of-living) shall not be taken into account for any purposes under the Plan. In the case of a Participant who is absent from employment due to a leave of absence for participation in Military Service, Compensation shall mean, for the period during which the Participant is absent due to Military Service, the Participant's Compensation, as defined above, for the twelve-month period preceding the first day of the Participant's absence. Compensation shall also include lump sum merit increases to base salary paid on or after January 1, 2003.

(14) Corporate Investment Committee. The Company acting through the Committee consisting of the executives or other persons designated from time to time in the charter of such Committee.

(15) Craft Employee. An Employee who is a non-represented, non-exempt craft or clerical employee assigned to the Peachbottom, Limerick, Outage Services East, Philadelphia Electric Company or Texas generating plant.

(16) Effective Date. Except as otherwise specifically provided herein, January 1, 2013.

(17) Eligible Employee. Except as otherwise provided herein, (a) any Employee who (i) was an Eligible Employee on December 31, 2012, and (ii) is either receiving regular salary or wages from and rendering services to an Employer or is on authorized leave of absence, and (b) on and after January 1, 2013, any Employee who (i) has not, prior to January 1, 2013, had an Hour of Service with any Affiliate, (ii) completed his or her first Hour of Service with an Employer on or after January 1, 2013 and (iii) is either receiving regular salary or wages from and rendering services to an Employer or is on authorized absence. Notwithstanding the preceding sentences, an Eligible Employee shall not include (a) an Employee the terms of whose employment are subject to a collective bargaining agreement that does not provide for participation in this Plan, (b) an Employee paid on the temporary payroll of an Employer who has never completed at least 1,000 Hours of Service in any period of twelve consecutive months beginning with the Employee’s date of employment or anniversary thereof, (c) an Employee who executes a written waiver of his or her right to participate in the Plan, (d) an individual rendering services to an Employer who is not on the payroll of any Employer, (e) an Employee employed by Exelon Generation Company, LLC in the Nuclear Security Division or employed by Exelon Corporation Nuclear Security LLC as an hourly non-exempt nuclear security guard, (f) on or after the Effective Time (as such term is defined in the Merger Agreement), an individual who was employed immediately prior to the Effective Time at CEG or a facility owned immediately before the Effective Time by CEG, (g) an individual who is newly employed on or after the Effective Time (as such term is defined in the Merger Agreement) and prior to January 1, 2013 at a facility owned immediately before the Effective Time by CEG, and (h) an Employee who is newly employed on or after January 1, 2013 by either BGE Home Products & Services, LLC or Constellation Mystic Power, LLC. It is expressly intended that an individual rendering services to an Employer pursuant to any of the following agreements shall be excluded from Plan participation pursuant to clause (d) of this subdivision even if a court or administrative agency determines that such individual is an Employee: (i) an agreement providing that such services are to be rendered as an independent contractor, (ii) an agreement with an entity, including a leasing organization within the meaning of section 414(n)(2) of the Code, that is not an Employer or (iii) an agreement that contains a waiver of participation in the Plan. Notwithstanding anything contained in the Plan to the contrary, any Employer may, at any time, designate, with the consent of the Administrator, a specified group of Employees who will be Eligible Employees.

(18) Employee. An individual whose relationship with an Employer is, under common law, that of an employee.

(19) Employer. The Company and any other Affiliate set forth on Appendix I hereto that, with the consent of the Company, elects to participate in the Plan in the manner described in Article 11 (relating to participation by other employers) either with respect to all Employees or a particular group of Employees of such Affiliate and any successor Affiliate that adopts the Plan pursuant to Article 12 (relating to continuance by successor entities). If any entity described in the preceding sentence withdraws from participation in the Plan pursuant to Section 11.2 (relating to withdrawal from participation) or terminates its participation in the Plan pursuant to Section 15.3 (relating to termination of the Plan by an Employer), such entity shall thereupon cease to be an Employer. Appendix I shall be updated from time to time by the Company to reflect any adoption pursuant to Section 11.1, but the failure to so update such Appendix shall not affect the effectiveness of any such adoption. Such adoptions will be effective whether occurring before, on or after the Effective Date and whether or not reflected in Appendix I.

(20) ERISA. The Employee Retirement Income Security Act of 1974, as amended.

(21) Hour of Service. (a) Each hour for which an Employee is paid, or entitled to payment, for the performance of duties (such hours to be credited to the Employee for the computation period or periods in which the duties are performed); (b) each hour for which an Employee is paid, or entitled to payment, on account of a period of time during which no duties are performed (irrespective of whether a Termination of Employment has occurred) due to vacation, holiday, illness, incapacity (including disability), layoff, jury duty, military duty or leave of absence (such hours to be credited to the Employee for the computation period or periods in which the period of time during which no duties are performed occurs); and (c) each hour for which back pay, irrespective of mitigation of damages, is either awarded or agreed to by an Employer (such hours to be credited to the Employee for the computation period or periods in which the award or agreement pertains rather than the computation period in which the award, agreement or payment is made). Hours of Service shall be computed in accordance with paragraphs (b) and (c) of section 2530.200b-2 of the Department of Labor Regulations.

(22) Investment Credits. The amounts credited to a Participant's Cash Balance Account pursuant to Section 6.1(d).

(23) Investment Office. The Company acting through the Exelon Investment Office.

(24) Merger Agreement. That Agreement and Plan of Merger, dated as of April 28, 2011, by and among Exelon Corporation, Bolt Acquisition Corporation and Constellation Energy Group, Inc.

(25) Military Service. The performance of duty on a voluntary or involuntary basis in a "uniformed service" (as defined below) under competent authority of the United States government and includes active duty, active duty for training, initial active duty for training, inactive duty training, full-time National Guard duty, and a period for which a person is absent from employment for the purpose of an examination to determine the fitness of the person to perform any such duty. For purposes of the preceding sentence, the term "uniformed service" means the Armed Forces, the Army National Guard and the Air National Guard when engaged in active duty for training, inactive duty training, or full-time National Guard duty, the commissioned corps of the Public Health Service, and any other category of persons designated by the President of the United States in time of war or emergency.

(26) Normal Retirement Age. With respect to a Participant's Cash Balance Account, (a) for periods prior to May 23, 2007, the earlier of (a) the date the Participant completes five years of Vesting Service and (b) the later of (i) the Participant's 65th birthday, and (ii) the fifth anniversary of the date the Participant commenced participation in the Plan; and (b) for periods beginning on and after May 23, 2007, the later of (i) the Participant's 62nd birthday, and (ii) the fifth anniversary of the date the Participant commenced participation in the Plan.

(27) Participant. An Eligible Employee who has satisfied the requirements set forth in Article 3 (relating to participation). An Eligible Employee who becomes a Participant shall cease to be a Participant upon the distribution of his or her entire vested benefit under the Plan. Any Participant who upon his or her Termination of Employment has not satisfied the Vesting Requirement shall cease to be a Participant upon such Termination of Employment. Notwithstanding anything in the Plan to the contrary, no Eligible Employee who is hired on or after January 1, 2013 shall become a Participant in the Plan.

(28) PECO Plan. The Service Annuity Plan of PECO Energy Company under the Exelon Corporation Retirement Program.

(29) Pension. A monthly payment continuing for the lifetime of the payee.

(30) Pension Starting Date. The first day as of which an amount becomes payable to a Participant or Beneficiary in accordance with Article 7 (relating to distributions). A Participant or Beneficiary shall have only one Pension Starting Date with respect to the Participant's Accrued Benefit.

(31) Period of Severance. Any twelve-month period commencing on the date an Employee terminates employment or any twelve-month period beginning on the anniversary of such date during which the Employee does not perform any Hours of Service for an Employer. For purposes of this definition, an Employee shall be credited with Hours of Service for any period of absence from an Employer during which such Employee (a) is in Military Service, provided that the Employee returns to the employ of an Employer within the period prescribed by laws relating to the reemployment rights of persons in Military Service, (b) is on an uncompensated leave of absence duly granted by an Employer, or (c) is absent from work for a maximum of twenty-four consecutive months because of (i) the pregnancy of the Employee, (ii) the birth of the Employee's child, (iii) the placement of a child with the Employee in connection with the Employee's adoption of such child, or (iv) the need to care for any such child for a period beginning immediately following such birth or placement. Notwithstanding the foregoing, no Hours of Service shall be credited to an Employee under clause (c) of this subdivision unless the Employee timely furnishes to the Administrator a certificate of birth, proof of adoption or other appropriate legal documentation setting forth parentage or adoption.

(32) Plan. The plan herein set forth and as from time to time amended.

(33) Plan Year. The calendar year.

(34) Qualified Domestic Relations Order. Any domestic relations order which the Administrator has determined, in accordance with procedures established by the Administrator to be a "qualified domestic relations order" defined in section 414(p) of the Code.

(35) Qualified Joint and Survivor Annuity. The form of distribution described in Section 7.2(b) (relating to manner of distribution with respect to married Participants).

(36) Regulations. Written temporary or final regulations of (i) the Department of Labor construing ERISA or (ii) the Treasury Department construing the Code.

(37) Schedule. If a Participant's accrued benefit under the ComEd Plan was transferred to the Plan pursuant to Section 3.1(c) (relating to transfer of benefits and assets to Plan) or Section 9.1 (relating to recommencement of employment by terminated employee), Schedule A and, if a Participant's accrued benefit under the PECO Plan was transferred to the Plan pursuant to Section 3.1(c) or Section 9.1, Schedule B.

(38) Schedule Equivalent. A benefit of value equivalent to the value of the benefit being replaced, computed using the actuarial factors and rules set forth in the applicable Schedule.

(39) Service Credits. The amounts, if any, credited to a Participant's Cash Balance Account pursuant to Section 6.1(c).

(40) Spouse. For periods prior to September 16, 2013, "Spouse" means the individual who is the husband or wife of a Participant as a result of the legal union between one man and one woman, within the meaning of the Defense of Marriage Act, on the Participant's Pension Starting Date or, if earlier, on the date of the Participant's death. Effective September 16, 2013, "Spouse" means the individual who, on a Participant's Pension Starting Date, or if earlier, on the date of the Participant's death, is lawfully married to the Participant under the laws of the state or foreign jurisdiction where the individual and the Participant were married, without regard to the laws of the state where the individual and the Participant are domiciled. For the avoidance of doubt, the term "Spouse" shall not include a person who, with the Participant, is in a domestic partnership, civil union or other similar formal relationship recognized by applicable law. While the Spouse is living and, except as otherwise provided in a qualified domestic relations order as described in Section 13.2(b) (relating to exception to nonassignability in the case of a qualified domestic relations order) or Section 7.4(h) (relating to automatic cancellation of elections), such Spouse shall be treated as the Participant's Spouse for all purposes of the Plan without regard to whether such Spouse remains married to the Participant after the Participant's Pension Starting Date.

(41) Target Income. (a) In the case of a Participant who participated in the ComEd Plan prior to becoming a Participant, Target Income means the sum of (i) the total of the Participant's "basic compensation" as defined in the ComEd Plan for all pay periods ending during calendar year 2001 (for a Participant who was on an authorized leave of absence during calendar year 2001, basic compensation for any pay period during which such Participant did not receive compensation shall be the Participant's average base pay rate per pay period for the twelve-month period preceding the first day of the Participant's leave of absence) and (ii)

“incentive pay” as defined in the ComEd Plan, except that incentive pay shall equal 100% of the target incentive pay the Participant would receive for calendar year 2002 under the applicable plans if the target goals were achieved during 2002, except that incentive pay shall equal 100% of the target incentive pay the Participant would receive for calendar year 2002 under the applicable plans if the target goals were achieved during 2002.

(b) In the case of a Participant who participated in the PECO Plan prior to becoming a Participant, Target Income means the sum of (i) the Participant’s “annual base salary” for 2001 determined in accordance with Section 3.1(b) of the PECO Plan (for a Participant who was on an authorized leave of absence during calendar year 2001, annual base salary for 2001 shall be determined by assuming that for any pay period during which such Participant did not receive compensation, the Participant was paid the base rate in effect immediately prior to the start of the Participant’s leave of absence) and (ii) incentive pay under any Employer’s incentive pay plan (excluding the Performance Share Award Program for Power Team Employees under the Exelon Corporation Long Term Incentive Plan), except that incentive pay shall equal 100% of the target incentive pay the Participant would receive for calendar year 2002 under the applicable plans if the target goals were achieved during 2002.

In determining “incentive pay” for purposes of the preceding subparagraphs, (i) if the Participant’s incentive pay is determined by multiplying his or her compensation by a percentage, the target percentage for 2002 (based on pay-grade in effect as of December 31, 2001) shall be used for such Participant and such target percentage shall be multiplied by the Participant’s 2001 “basic compensation” or “annual base salary”, as applicable, (ii) if the Participant’s incentive pay is defined as a flat dollar amount, the Participant’s incentive pay shall be the 2002 target incentive pay, (iii) if the Participant’s incentive pay is determined by adding quarterly bonus targets and an annual target incentive, the Participant’s incentive pay shall equal the sum of the target quarterly bonuses for calendar year 2002 and the target annual incentive for calendar year 2002, and (iv) if any limits apply to the payment of incentive compensation to a Participant under any applicable incentive pay plan, such limits will apply for purposes of this Plan.

(42) Termination of Employment. A Participant’s ceasing to be an Employee of all Employers and all Affiliates. A transfer between employment by an Employer and employment by an Affiliate or between employment by Employers or Affiliates shall not constitute a Termination of Employment.

(43) Transition Credit. An amount equal to the product of the following: (a) a Participant’s “credited service” under the ComEd Plan or the Participant’s “benefit years” under the PECO Plan, as applicable, determined as of December 31, 2001, (b) the percentage applicable to the Participant determined pursuant to Table T and (c) the Participant’s Target Income. Notwithstanding the preceding sentence, in no event shall a Participant’s Transition Credit exceed 100% of his or her Target Income.

(44) Trust. The Directed Retirement Trust under the Exelon Corporation Cash Balance Pension Plan, as from time to time amended and, effective November 1, 2010, the Exelon Corporation Pension Master Retirement Trust.

(45) Trust Fund. All money and property of every kind held by the Trustee pursuant to the terms of the agreement governing the Trust.

(46) Trustee. The trustee provided for in Article 5 (relating to the Trust) or any successor trustee or, if there is more than one such trustee acting at any time, all of such trustees collectively.

(47) Vesting Requirement. For periods beginning prior to May 23, 2007, a Participant's attainment, during the time such Participant is an Employee, of his or her Normal Retirement Age. For periods beginning on and after May 23, 2007, the earlier of (a) the date a Participant completes the applicable years of Vesting Service described in the following sentence and (b) the date the Participant's attains, during the time such Participant is an Employee, his or her Normal Retirement Age. For purposes of the preceding sentence, the applicable years of Vesting Service are, for Plan Years beginning before January 1, 2008, five years, and for Plan Years beginning on and after January 1, 2008, three years.

(48) Vesting Service. The period of an Employee's employment which is used to determine whether the Employee has satisfied the Vesting Requirement. An Employee's Vesting Service includes the aggregate of the periods during which the Employee is employed by an Employer or an Affiliate beginning on the day on which the Employee first performs an Hour of Service with an Employer or Affiliate, provided that in the case of an Employee who has no vested right to any benefits under this Plan, such Employee's periods of employment before and after a period of absence from employment shall be aggregated only when the Employee's number of consecutive one-year Periods of Severance is less than five and the Employee has at least one year of Vesting Service after such period of absence from employment. For purposes of the preceding sentence, an Employee shall be deemed to be employed by an Employer or an Affiliate during (a) any period of absence from employment by an Employer or an Affiliate which is of less than twelve months' duration, (b) the first twelve months of any period of absence from employment for any reason other than the Employee's quitting, retiring or being discharged, (c) the period during which the Employee is not rendering services to any Employer or Affiliate as a result of a disability during which period the Employee is receiving benefits under any Employer's or Affiliate's long-term disability plan and (d) any period during which the Employee is in Military Service, provided that the Employee returns to the employ of an Employer or an Affiliate within the period prescribed by laws relating to the reemployment rights of persons in Military Service. The Administrator may require certification from an Employee, as a condition of granting Vesting Service under this subdivision, that the leave was taken for one of the reasons enumerated in the preceding sentence. Notwithstanding the preceding sentences, in determining an Employee's period of absence from employment by an Employer or an Affiliate, the following shall be disregarded: the first twenty-four months of any period of absence from employment by reason of (i) the Employee's pregnancy, (ii) the birth of the Employee's child, (iii) the placement of a child with the Employee in connection with the adoption of such child by such Employee or (iv) caring for such child for a period beginning immediately following such birth or placement. Notwithstanding anything in this definition to the contrary, the Vesting Service for a Participant who elects to participate in the Plan pursuant to Section 3.1(b) (relating to eligibility for participation for employees other than new hires) and whose accrued benefit under the PECO Plan is transferred to the Plan pursuant to Section 3.1(c) (relating to transfer of benefits and assets to Plan) shall be (a) for periods prior to January 1,

2002, the vesting service credited to the Participant under the terms of the PECO Plan, as in effect on December 31, 2001, and (b) for the Participant's "eligibility computation period" (as defined in the PECO Plan) that ends during the 2002 Plan Year, the greater of (i) the Vesting Service, for such period, determined pursuant to this subdivision and (ii) the vesting service, for such period, determined pursuant to the terms of the PECO Plan.

ARTICLE 3
PARTICIPATION

Section 3.1 Eligibility for Participation. (a) General. Each Eligible Employee who immediately before the Effective Date was a Participant in the Plan shall continue to be a Participant as of the Effective Date. Each other Eligible Employee who has not, prior to the Effective Date, had an Hour of Service with any Affiliate and whose first Hour of Service with an Employer is on or after the Effective Date shall become a Participant as of the first day that such Eligible Employee completes an Hour of Service with an Employer as an Eligible Employee.

(b) Other Employees Prior to the Effective Date. Each individual who (a) is, at any time between January 1, 2002 and April 30, 2002, an Employee and (b) was, on December 31, 2000, a participant in either the ComEd Plan (other than a participant the terms of whose employment are subject to a collective bargaining agreement) or the PECO Plan, or would have been a participant in the PECO Plan if the age and service requirements for participation in the PECO Plan were disregarded, shall be permitted to elect, in the time and manner prescribed by the "Committee," as such term was defined in the Plan prior to June 1, 2006, to either (i) continue participating in the ComEd Plan or the PECO Plan, as the case may be, on and after January 1, 2002 (or begin participating in the PECO Plan, in the case of an Employee who will satisfy the eligibility and age and service requirements for participation in such plan on January 1, 2002) or (ii) cease participating in the applicable Plan described in clause (i) hereof as of

December 31, 2001 and begin participating in the Plan as of January 1, 2002 (or, if later, his or her employment or reemployment date). Each such Eligible Employee who affirmatively elects to participate in the Plan in lieu of participation in the ComEd Plan or the PECO Plan shall become a Participant as of January 1, 2002 (or, if later, his or her employment or reemployment date), unless such Participant receives a notification (the "Notice") from an Employer that his or her employment with the Employers and their Affiliates will be terminated on or before December 31, 2002 and that such Participant is eligible for severance benefits under the Exelon Corporation Merger Separation Plan for Designated Management Employees or any other severance plan maintained by an Employer or an Affiliate. An Eligible Employee who receives a Notice shall not become a Participant, notwithstanding such Eligible Employee's election to participate in the Plan. An Eligible Employee (i) who receives a Notice, but whose employment does not terminate on or before December 31, 2002, or (ii) whose employment terminates before December 31, 2002 without the Employee receiving a Notice shall become a Participant as of January 1, 2002 (or, if later, his or her employment or reemployment date) if such Employee elects, in the time and manner prescribed by the "Committee," as such term was defined in the Plan prior to June 1, 2006, to participate in the Plan.

In the case of an Eligible Employee who became an employee of the Power Team during 2003 pursuant to Exelon Way, such Eligible Employee shall continue to be a Participant. In addition, each Eligible Employee who was an employee of the Power Team on any date in 2003 and who became an employee of a participating business unit of an Employer during 2003 in connection with Exelon Way shall continue to be a Participant only if such Employee was a Participant prior to the date on which such Employee became an employee of a participating business unit of an Employer. Effective as of January 1, 2004, each individual (i) who either (A) is an employee of the Power Team or (B) transferred employment from the Power Team to a participating business unit of an Employer during 2003 pursuant to Exelon Way, (ii) who became an Eligible Employee on or after January 1, 2004 and (iii) who either (A) has a frozen accrued benefit under this Plan or (B) does not have an accrued benefit under either the ComEd Plan or the PECO Plan shall become a Participant as of the later of January 1, 2004 and the date the Eligible Employee completes an Hour of Service with an Employer as an Eligible Employee. In addition, each Eligible Employee (i) who either (A) is an employee of the Power Team or (B) transferred employment from the Power Team to a participating business unit of an Employer during 2003 pursuant to Exelon Way, (ii) who became an Eligible Employee on January 1, 2004, (iii) who has an accrued benefit under either the ComEd Plan or the PECO Plan, (iv) who is not described in the preceding sentence and (v) who did not previously make a valid election pursuant to the preceding paragraph shall be permitted to elect, in the time and manner prescribed by the "Committee," as such term was defined in the Plan prior to June 1, 2006, to either (A) resume or continue participation in the ComEd Plan or the PECO Plan, as the case may be, as of January 1, 2004 or (B) participate in the Plan as of January 1, 2004. Each such Eligible Employee who affirmatively elects to participate in the Plan in lieu of participation in the ComEd Plan or the PECO Plan shall become a Participant as of January, 1, 2004.

(c) Transfer of Benefits and Assets to Plan. If an Employee described in paragraph (b) above elects to participate in the Plan in lieu of participating in the ComEd Plan or the PECO Plan, as the case may be, the Employee's accrued benefit under either such plan, determined as of December 31, 2001, or December 31, 2003, as the case may be, in accordance with the provisions of the applicable plan, shall be transferred to the Plan. An amount of assets that is equal to the present value of the Employee's accrued benefit described in the preceding sentence determined using the methods and assumptions prescribed by section 4044 of ERISA shall also be transferred to the Plan. Such transfer of benefits and assets related thereto shall occur as soon as practicable after the Eligible Employee makes the election described in paragraph (b) above. Each Participant whose benefits are so transferred shall be permitted to have his or her Accrued Frozen Benefit paid in any of the optional forms of benefit listed in the applicable Schedule in lieu of the forms provided hereunder. The provisions set forth in the applicable Schedule shall govern all matters relating to a Participant's Accrued Frozen Benefit.

In the event that an Eligible Employee whose accrued benefit under the ComEd Plan or the PECO Plan, and related assets, is transferred to the Plan receives a Notice and has a Termination of Employment on or before December 31, 2002, the accrued benefit, and related assets, transferred to the Plan shall be transferred back to the ComEd Plan or the PECO Plan, as the case may be, and the amount of the pension benefit accrued by such Employee during 2002 (if any) shall be determined under the terms of the ComEd Plan or the PECO Plan, as applicable, rather than the Plan. Such transfer shall occur as soon as administratively practicable.

Section 3.2 Transfer to Affiliates. If a Participant is transferred from one Employer to another Employer or from an Employer to an Affiliate that is not an Employer, then such transfer shall not terminate the Participant's participation in the Plan and the Participant shall continue to participate in the Plan until an event occurs that would have entitled the Participant to a complete distribution of the Participant's vested Pension had the Participant continued to be employed by an Employer until the occurrence of such event. Nevertheless, except to the extent provided in Section 9.3 (relating to employment by related entities) or Section 9.7 (relating to change in employment status or transfer to affiliate), a Participant shall not be entitled to receive Service Credits under Section 6.1(c) (relating to Service Credits) during any period of employment by any Affiliate that is not an Employer with respect to such Participant, and periods of employment with an Affiliate that is not an Employer with respect to such Participant shall be taken into account only to the extent set forth in Section 9.3 (relating to employment by related entities) or Section 9.7 (relating to change in employment status or transfer to affiliate).

Section 3.3 Cessation of Participation. An individual's participation in the Plan shall cease upon the date the individual is no longer eligible to receive a benefit from this Plan or upon the individual's Termination of Employment if the individual has not satisfied the Vesting Requirement upon the date of his or her Termination of Employment.

Section 3.4 Rehired Participants. Notwithstanding anything contained herein to the contrary, if a Participant terminates employment and is reemployed as an Employee under circumstances that satisfy the applicable conditions for continuation of payment of retirement benefits set forth in the Company's policy regarding the rehiring of retirees, including that the Participant waives participation in, or additional benefits and accruals under the Plan, such Participant shall not be entitled to receive any Service Credits under Section 6.1(c) (relating to Service Credits) during such period of reemployment.

ARTICLE 4
SOURCE OF CONTRIBUTIONS

Section 4.1 Source of Contributions. The Employers intend to make contributions to the Trust of amounts which, in the aggregate over a period of time, shall be sufficient to finance the benefits provided by the Plan. Any such contributions shall be in such amounts and shall be made in such manner and at such time as the Company may from time to time determine in accordance with the funding policy it establishes and consistent with minimum funding standards under section 412 of the Code, provided, however, that all contributions made by the Employers for any Plan Year shall be made prior to the due date, including extensions thereof, of the Employers' federal income tax return for the taxable year of the Employers which coincides with such Plan Year. The Company may rely on the advice of actuaries in establishing and carrying out a funding policy. Forfeitures arising under the Plan for any reason shall be applied to reduce the cost of the Plan, not to increase the benefits otherwise payable to the Participants.

Section 4.2 Limitation on Contributions. The contributions of an Employer for any Plan Year shall not exceed the maximum amount for which a deduction is allowable to such Employer for federal income tax purposes for the taxable year of such Employer that ends with or within such Plan Year. Any contribution made by an Employer by reason of a good faith mistake of fact, or the portion of any contribution made by an Employer that exceeds the maximum amount for which a deduction is currently allowable to such Employer for federal income tax purposes, shall upon the request of such Employer be returned by the Trustee to the Employer. An Employer's request and the return of any such contribution must be made within one year after such contribution was mistakenly made or after the deduction of such excess portion of such contribution was disallowed, as the case may be. The amount to be returned to an Employer pursuant to this Section shall be the excess of (i) the amount contributed over (ii) the amount that would have been contributed had there not been a mistake of fact or the maximum amount that is so deductible, as the case may be. Earnings attributable to the mistaken contribution shall not be returned to the Employer, but losses attributable thereto shall reduce the amount to be so returned.

ARTICLE 5
TRUST

A trust (the "Trust") has been created by the execution of a trust agreement between the Company and a trustee (the "Trustee") for purposes of holding and administering the assets of the Plan. All contributions under the Plan shall be paid to the Trustee. The Trustee shall hold all monies and other property received by it and invest and reinvest the same, together with the income therefrom, on behalf of the Participants collectively in accordance with the provisions of such trust agreement. The Trustee shall make distributions from the Trust Fund at such time or times to such person or persons and in such amounts as the Administrator directs in accordance with the Plan.

ARTICLE 6
PARTICIPANT ACCOUNTS

Section 6.1 Cash Balance Accounts. (a) Establishment of Accounts. A separate Cash Balance Account shall be established for each Participant. Each such account shall have an initial balance of zero until credited with any Transition Credit, if applicable, or Service Credit as provided herein. Each such account shall be for accounting purposes only, and there shall be no segregation of assets among such accounts. A Participant's Cash Balance Account shall cease to be maintained as of the Participant's Pension Starting Date (except to the extent such Pension Starting Date is required by Section 7.1(b) (relating to distributions to five percent owners)), in which case the Participant's Cash Balance Account shall cease to be maintained as of the first January 1 following the Participant's Termination of Employment).

(b) Transition Credit. A Participant's Cash Balance Account shall be credited, as of the first day of the Plan Year in which such Participant becomes a Participant, with an amount equal to the Participant's Transition Credit, provided that (a) the Participant is an Employee on January 1, 2002 and becomes a Participant pursuant to Section 3.1(b) (relating to eligibility for participation for employees who are not new hires) and (b) the Participant is not an employee of the Power Team. An Employee who becomes a Participant pursuant to Section 3.1(a) (relating to eligibility for participation for new hires) shall not be credited with a Transition Credit at any time and a rehired Employee who becomes a Participant pursuant to Section 9.1 (relating to recommencement of employment by terminated employee) shall not be credited with a Transition Credit at the time of his or her rehire.

(c) Service Credits. A Participant's Cash Balance Account shall be credited, as of the last day of each Plan Year during which the Participant is a Participant and an Eligible Employee, with an amount equal to the following percentage of Compensation received by such Participant during such portion of such Plan Year that the Participant was an Eligible Employee: (i) for each Plan Year beginning before January 1, 2008 and, in the case of a Participant whose employment is subject to a collective bargaining agreement that provides for participation in this Plan, for each Plan Year thereafter, 5.75%, (ii) for each Plan Year beginning on and after January 1, 2008 if the Participant's employment is not subject to a collective bargaining agreement and either the Participant first became a Participant prior to January 1, 2013 or the Participant is a Craft Employee, 7.00%, and (iii) for each Plan Year beginning on and after January 1, 2013 for a Participant who first becomes a Participant on or after January 1, 2013, other than a Craft Employee or an Employee subject to a collective bargaining agreement, the applicable amount specified below:

For Participants Who Become Participants on or After January 1, 2013 (Other than Craft Employees)

Participant's Age as of the End of the Plan Year	Annual Service Credit
Under age 30	3%
Age 30 to 34	4%
Age 35 to 39	5%
Age 40 to 44	6%
Age 45 to 49	7%
Age 50 and older	8%

Notwithstanding the foregoing, if a Participant's Pension Starting Date occurs other than on the last day of a Plan Year and if the Participant is entitled to have an amount credited to his or her Cash Balance Account for such Plan Year pursuant to the preceding sentence, such amount shall be credited to the Participant's Cash Balance Account as of the last day of the month before such Pension Starting Date (and prior to the crediting of any Investment Credit for such Plan Year). No amount shall be credited pursuant to this paragraph (c) to the Cash Balance Account of a Participant who is not rendering services to any Employer or Affiliate as a result of a disability, regardless of whether such Participant is receiving benefits under any Employer's or Affiliate's long-term disability plan.

(d) Investment Credits. (1) For Participants who were Participants Prior to January 1, 2013 or are Craft Employees . The provisions of this paragraph shall apply only with respect to the Cash Balance Account of a Participant who was a Participant prior to January 1, 2013 or is a Craft Employee. For each Plan Year beginning before January 1, 2008, the Cash Balance Account of a Participant described in this paragraph (d)(1) shall be credited, as of the last day of each Plan Year during which the Participant is a Participant, whether or not such Participant is an Eligible Employee during such Plan Year, with an amount equal to the product of (i) the "Pre-

2008 Plan Interest Rate" (as defined below) multiplied by (ii) the balance of such Participant's Cash Balance Account as of the first day of such Plan Year. For each Plan Year beginning on and after January 1, 2008, such Participant's Cash Balance Account shall be credited, as of the last day of each Plan Year during which the Participant is a Participant, whether or not such Participant is an Eligible Employee during such Plan Year, with an amount equal to the sum of the following amounts: (i) the product of (A) the "Pre-2008 Plan Interest Rate" (as defined below) multiplied by (B) the balance of such Participant's Cash Balance Account as of December 31, 2007, if any; and (ii) the product of (A) the "Post-2007 Plan Interest Rate" (as defined below) multiplied by (B) the portion of such Participant's Cash Balance Account attributable to Service Credits credited after December 31, 2007, determined as of the first day of such Plan Year. A Participant described in this paragraph (d)(1) who is not rendering Services to any Employer or Affiliate as a result of a disability with respect to which such Participant is receiving benefits under any Employer's or Affiliate's long-term disability plan shall be credited with the amount described in the first and second sentences of this paragraph (d), as applicable. Notwithstanding the preceding sentences, if a Participant's Pension Starting Date occurs other than on the last day of a Plan Year, the amount to be credited to the Participant's Cash Balance Account pursuant to this paragraph (d)(1) for the Plan Year in which the Participant's Pension Starting Date occurs shall be equal to the product of (i) 4% (or, for Plan Years beginning on and after January 1, 2008, the "Post-2007 Plan Interest Rate," as defined below, for the immediately preceding Plan Year) multiplied by (ii) a fraction, the numerator of which is the number of whole calendar months during such Plan Year prior to and including the month which contains the date immediately preceding the Participant's Pension Starting Date and the denominator of which is twelve, and such Investment Credit shall be made as of the last day of the month before such Pension

Starting Date prior to the crediting of any Service Credit for such year. Except to the extent provided in Section 7.2(d)(2) (relating to special rules regarding pensions), a Participant's Cash Balance Account shall not be credited with Investment Credits after the Participant's Pension Starting Date.

For purposes of this paragraph (d)(1), the "Pre-2008 Plan Interest Rate" for any Plan Year shall mean a percentage equal to the greater of (i) 4% and (ii) the average of (A) the "applicable interest rate" as defined in section 417(e)(3) of the Code for the month of November of such Plan Year and (B) the annual percentage rate of return for the S&P 500 Stock Index for the 12-month period ending on December 31 of such Plan Year, as reported in The Wall Street Journal on the first business day of the succeeding year. For purposes of this paragraph (d)(1), the "Post-2007 Plan Interest Rate" for any Plan Year shall mean a percentage equal to the third segment rate of interest on long-term investment grade corporate bonds, as provided for in section 430(h)(2)(C) of the Code for the month of November of such Plan Year (determined by not taking into account any adjustment under clause (iv) thereof).

(2) For Participants who Became Participants on or After January 1, 2013 (Other than Craft Employees) . The provisions of this paragraph shall apply only with respect to the Cash Balance Account of a Participant who became a Participant on or after January 1, 2013, other than a Craft Employee. The Cash Balance Account of a Participant described in this paragraph (d)(2) shall be credited, as of the last day of each Plan Year during which the Participant is a Participant, whether or not such Participant is an Eligible Employee during such Plan Year, with an amount equal to the product of (i) the "Plan Interest Rate" (as defined below) multiplied by (ii) the balance of such Participant's Cash Balance Account as of the first day of such Plan Year. A Participant described in this paragraph (d)(2) who is not rendering Services to any Employer

or Affiliate as a result of a disability with respect to which such Participant is receiving benefits under any Employer's or Affiliate's long-term disability plan shall be credited with the amount described in the preceding sentence. Notwithstanding the preceding sentences, if a Participant's Pension Starting Date occurs other than on the last day of a Plan Year, the amount to be credited to the Participant's Cash Balance Account pursuant to this paragraph (d)(2) for the Plan Year in which the Participant's Pension Starting Date occurs shall be equal to the product of (i) the Plan Interest Rate multiplied by (ii) a fraction, the numerator of which is the number of whole calendar months during such Plan Year prior to and including the month which contains the date immediately preceding the Participant's Pension Starting Date and the denominator of which is twelve, and such Investment Credit shall be made as of the last day of the month before such Pension Starting Date prior to the crediting of any Service Credit for such year. Except to the extent provided in Section 7.2(d)(2) (relating to special rules regarding pensions), a Participant's Cash Balance Account shall not be credited with Investment Credits after the Participant's Pension Starting Date.

For purposes of this paragraph (d)(2), the "Plan Interest Rate" for any Plan Year shall mean a percentage equal to the greater of (i) 3.8%, and (ii) the lesser of (A) the second segment rate of interest on long-term corporate bonds, as determined under Section 430(h)(2)(C) of the Code for the month of November of such Plan Year (determined by not taking into account any adjustment under clause (iv) thereof), and (B) 7%.

(e) Additional Credit. If, as of a Participant's Pension Starting Date, the amount described in (1) below exceeds the amount described in (2) below, an amount equal to the difference between such amounts shall be credited the Participant's Cash Balance Account as of the day before such Pension Starting Date:

(1) The cumulative amount that would have been credited to the Participant's Cash Balance Account if the Plan Interest Rate described in Section 6.1(d) of the Plan (relating to Investment Credits) were credited to the Participant's "Opening Credit" (as defined below) for each Plan Year during which the Participant is a Participant at the Plan Interest Rate then in effect, whether or not such Participant is an Eligible Employee during such Plan Year.

(2) The cumulative amount that would have been credited to the Participant's Cash Balance Account if 6.5% interest were credited to the Participant's "Opening Credit" (as defined below) for all Plan Years during which the Participant is a Participant, whether or not such Participant is an eligible Employee during such Plan Year.

If the amount described in (1) above is equal to or less than the amount described in (2) above, no amount shall be credited to the Participant's Cash Balance Account pursuant to this paragraph (e). In addition, no amount shall be credited pursuant to this paragraph (e) if a Participant does not have an Accrued Frozen Benefit.

For purposes of this paragraph (e), "Opening Credit" shall mean an amount equal to the present value of a Participant's Accrued Frozen Benefit determined as of December 31, 2001 using a 6.5% discount rate and the 1983 Group Annuity (unisex) Mortality Table (50% male, 50% female) assuming the Accrued Frozen Benefit otherwise payable at the Schedule A Retirement Date would commence at the later of the Participant's attained age as of December 31, 2001 or age 60.

ARTICLE 7
DISTRIBUTIONS

Section 7.1 Time of Distribution. (a) In General. A Participant who has satisfied the Vesting Requirement shall be entitled to receive a distribution of the aggregate of the balance of his or her Cash Balance Account and his or her Accrued Frozen Benefit in the manner provided by Section 7.2 (relating to form of distribution) commencing as soon as practicable after the first day of the month immediately following the date on which the Participant's Termination of

Employment occurs. Notwithstanding the preceding sentence, a Participant whose Termination of Employment occurs prior to such Participant's attainment of age 70-1/2 shall be deemed to have elected to defer receipt of his or her Cash Balance Account and Accrued Frozen Benefit until the April 1 next following the date the Participant attains age 70-1/2, unless the Participant elects, in the time and manner described in the following sentence, to receive a distribution prior to such date. The Participant may elect to commence such distribution by giving the Administrator not less than 30 nor more than 90 days advance written notice of the Pension Starting Date desired by the Participant; provided, however, that the Administrator may waive such advance written notice requirement if the Participant submits the appropriate form to the Administrator in accordance with the requirements set forth in Section 7.4(d) (relating to notice of availability of optional forms of benefit). A Participant who has satisfied the Vesting Requirement and who does not make an election as described in the preceding sentence prior to such Participant's attainment of age 70-1/2 shall receive a distribution of the aggregate of the balance of his or her Cash Balance Account and his or her Accrued Frozen Benefit in the manner provided by Section 7.2 (relating to form of distribution) commencing no later than April 1 next following the date the Participant attains age 70-1/2.

(b) Distributions to Five Percent Owners. Notwithstanding any provision of the Plan to the contrary, if a Participant who has satisfied the Vesting Requirement and who is a "five percent owner" (as described in section 416(i) of the Code) remains employed by an Employer through April 1 of the year following the year in which the Participant attains age 70 ½, distribution of the balance of the Participant's Cash Balance Account and his or her Accrued Frozen Benefit shall commence on such April 1 (or such later date as may be provided by the Code or Regulations). Any other Participant who remains in such employment shall not be permitted to commence distribution of such Participant's Cash Balance Account or Accrued Frozen Benefit at the time specified in the preceding sentence unless required by the Code or Regulations.

(c) Immediate Distribution of Small Benefits. Notwithstanding any provision of the Plan to the contrary, if, as of the date of a Participant's Termination of Employment (including on account of death), the aggregate of the balance of the Participant's Cash Balance Account and the lump sum Schedule Equivalent of the Participant's Accrued Frozen Benefit does not exceed $5,000 or, for distributions occurring on or after March 28, 2005, $1,000, such Participant or, in the event of the Participant's death, such Participant's Beneficiary or Beneficiaries, shall receive a distribution in the amount and in the form described in Option 2 of Section 7.2(c) (relating to lump sum distribution) as soon as practicable following such Termination of Employment in satisfaction of all benefits to which the Participant or his or her Beneficiaries, as the case may be, is entitled under the Plan.

(d) Deemed Distributions. If a Participant has not satisfied the Vesting Requirement upon his or her Termination of Employment, such Participant's vested interest in his or her benefit under the Plan shall have a value of zero, such Participant shall be deemed to have received immediately after such termination a lump sum distribution of such vested interest and concurrent therewith shall forfeit all benefits hereunder, and the Participant's Cash Balance Account and Accrued Frozen Benefit shall no longer be maintained.

Section 7.2 Form of Distribution. (a) Manner of Distribution With Respect to Unmarried Participants. A Participant who is not married on his or her Pension Starting Date shall have the Actuarial Equivalent of the Participant's Accrued Benefit attributable to his or her Cash Balance Account and the Schedule Equivalent of his or her Accrued Frozen Benefit, if any, distributed in the form of a Pension for the life of the Participant unless the Participant elects an optional form of distribution described in paragraph (c) of this Section (relating to optional forms of distributions) at the time and in the manner described in Section 7.4 (relating to election and waiver procedures).

(b) Manner of Distribution With Respect to Married Participants. A Participant who is married on his or her Pension Starting Date shall have the Actuarial Equivalent of the Participant's Accrued Benefit attributable to his or her Cash Balance Account and the Schedule Equivalent of his or her Accrued Frozen Benefit, if any, distributed in the form of a Pension payable to the Participant for the life of the Participant and, thereafter, if the Participant's Spouse survives the Participant, a Pension payable to the Spouse during the remaining lifetime of such Spouse equal to 50% of the Pension payable to the Participant during the Participant's lifetime. Notwithstanding the preceding sentence, the Participant, with the consent of his or her Spouse, may elect an optional form of distribution described in paragraph (c) of this Section (relating to optional forms of distributions) at the time and in the manner described in Section 7.4 (relating to election and waiver procedures).

(c) Optional Forms of Distribution. Upon written request to the Administrator made at the time and in the manner prescribed in Section 7.4 (relating to election and waiver procedures), a Participant may elect to receive a distribution of the Participant's benefit under the Plan in one of the following optional forms in lieu of the form described in paragraph (a) or (b) of this Section (relating to manner of distribution with respect to unmarried Participants and married Participants, respectively):

Option 1: Life Annuity. If the Participant is married on his or her Pension Starting Date, a Pension payable for the life of the Participant in an amount that is the Actuarial Equivalent of the Participant's Accrued Benefit attributable to his or her Cash Balance Account and the Schedule Equivalent of his or her Accrued Frozen Benefit, if any.

Option 2: Lump Sum Distribution. Except as otherwise provided in Section 7.8 (relating to special rules applicable to calculations of lump sum distributions), a single, lump sum distribution in an amount equal to the sum of (a) the balance credited to the Participant's Cash Balance Account as of the last day of the month immediately preceding the date of such distribution and (b) the lump sum Schedule Equivalent of the Participant's Accrued Frozen Benefit.

Option 3: Survivor Annuity. A reduced Pension payable to the Participant during the Participant's lifetime and, thereafter, if the designated Beneficiary survives the Participant, a Pension equal to 100%, 75% or 50% (whichever is specified when this option is elected) of such reduced Pension payable to the Designated Beneficiary during the remaining lifetime of such Designated Beneficiary, the aggregate amount of which are the Actuarial Equivalent of the Participant's Accrued Benefit attributable to his or her Cash Balance Account and the Schedule Equivalent of his or her Accrued Frozen Benefit, if any.

(d) Special Rules Regarding Pensions.

(1) If a Participant's spouse dies before the Participant's Pension Starting Date and the Participant has not elected an optional form of distribution described in paragraph (c) of this Section (relating to optional forms of distribution), the Participant shall again be entitled to make an election under this Section.

(2) If a Pension commences pursuant to Section 7.1(b) (relating to distributions to five percent owners) while a Participant remains employed by an Employer, such Pension shall be actuarially adjusted as of January 1 following the end of each calendar year during which such Participant remains employed by an Employer to reflect any additional Service Credits and Investment Credits credited to the Participant's Cash Balance Account as of December 31 of the preceding calendar year.

(3) If a Participant elects Option 3 under Section 7.2(c) and the Participant's Beneficiary is other than the Participant's Spouse, the Pension payable to the Participant and to the Beneficiary shall be adjusted as is necessary to satisfy the incidental benefit requirement under section 401(a)(9) of the Code. Notwithstanding anything in the Plan to the contrary, the form and timing of all distributions under the Plan to any Participant shall be in accordance with Section 401(a)(9) of the Code and regulations issued thereunder, including the incidental death benefit requirements of Section 401(a)(9)(G) of the Code and Treasury Regulation §1.401(a)(9)-2 through Treasury Regulation §1.401(a)(9)-9.

Section 7.3 Death Benefits. (a) Eligibility. If a Participant who has satisfied the Vesting Requirement dies prior to his or her Pension Starting Date, the Participant's surviving Beneficiary shall be entitled to receive a benefit under this Section. In addition, if a Participant dies while an Employee, the Participant's surviving Beneficiary shall be entitled to receive a benefit under this Section, regardless of whether the Participant has satisfied the Vesting Requirement.

(b) Form of Payment. A surviving Beneficiary who is entitled to a distribution of the Participant's benefit under this Section shall receive the following, as applicable:

(1) Lump Sum Payment. Except as otherwise provided in Section 7.8 (relating to special rules applicable to calculations of lump sum distributions), a lump sum payment that is equal to the sum of (a) the balance credited to the Participant's Cash Balance Account as of the last day of the month immediately preceding the date of such distribution and (b) the lump sum Schedule Equivalent of the Participant's Accrued Frozen Benefit shall be payable to the Participant's surviving Beneficiary not later than the fifth anniversary of the Participant's death, except that if the Participant's surviving Beneficiary is the Participant's surviving Spouse, distribution to such surviving Spouse may commence at the same time as described in subparagraph (2). Notwithstanding the foregoing, should any benefit be payable pursuant to subparagraph (2) of this Section 7.3(b) (relating to statutory surviving Spouse's benefit), the amount of any benefit payable pursuant to this subparagraph (1) shall be reduced by the Actuarial Equivalent of the benefit payable pursuant to such subparagraph (2).

(2) Statutory Surviving Spouse's Benefit. If the Participant is survived by a Spouse to whom the Participant was married throughout the one-year period ending on the date of the Participant's death, then, unless such Participant has with his or her Spouse's consent waived the benefit described herein in the manner described in Section 7.4(e) (relating to waiver of statutory surviving Spouse's benefit), such Spouse shall be entitled to receive a survivor's Pension commencing as of any January 1 coinciding with or following the date of the Participant's death or any succeeding January 1 (but not later than the January 1 immediately preceding or coinciding with the date the Participant would have attained age 70-1/2 had he or she survived) and continuing for the lifetime of such Spouse in an amount equal to the Pension such Spouse would have received pursuant to a Qualified Joint and Survivor Annuity if the Participant had survived until such day and such Qualified Joint and Survivor Annuity had commenced on such day and the Participant had died immediately after such annuity commenced, but determined without regard to any Service Credits that would have been credited to the Participant's Cash Balance Account with respect to any periods subsequent to the Participant's Termination of Employment.

(c) The death benefits provided by this Section shall not be effective to the extent required to comply with the terms of a Qualified Domestic Relations Order.

Section 7.4 Election and Waiver Procedures. (a) Election of Optional Form of Benefit. Subject to paragraph (c) of this Section (relating to spousal consent to election of optional form of benefit or beneficiary designation), a Participant may elect, change or revoke any form of distribution provided under Section 7.2 (relating to forms of distribution) at any time during the 90-day period ending on the later of the Participant's Pension Starting Date and the date the Participant's benefit is paid or commences. Such an election, change or revocation shall be made by the Participant delivering a written notice describing the election, change or revocation to the Administrator on a form provided by the Administrator for this purpose.

(b) Beneficiary Designation. Subject to paragraph (e) below (relating to waiver of statutory surviving spouse's benefit), each Participant may designate one or more Beneficiaries to receive any payment pursuant to Section 7.3(b)(1) (relating to lump sum pre-retirement death benefit) in the event of his or her death. A Participant may from time to time, without the consent of any Beneficiary, change or cancel any such designation. Such designation and each change therein shall be made in the form prescribed by the Administrator and shall be filed with the Administrator. If no Beneficiary has been designated by a deceased Participant, or the designated Beneficiary has predeceased the Participant, any payment pursuant to Section 7.3(b)(1) (relating to lump sum pre-retirement death benefit) shall be made by the Trustee at the direction of the Administrator (i) to the surviving Spouse of such deceased Participant, if any, or (ii) if there shall be no surviving Spouse, to the surviving children of such deceased Participant, if any, in equal shares, or (iii) if there shall be no surviving Spouse or surviving children, to the executor or administrator of the estate of such deceased Participant, or (iv) if no executor or administrator shall have been appointed for the estate of such deceased Participant within six months following the date of the Participant's death, in equal shares to the person or persons who would be entitled under the intestate succession laws of the state of the Participant's domicile to receive the Participant's personal estate. The marriage of a Participant shall be deemed to revoke any prior designation of a Beneficiary made by him or her and a divorce shall be deemed to revoke any prior designation of the Participant's divorced Spouse if written evidence of such marriage or divorce shall be received by the Administrator before distribution shall have been made in accordance with such designation. If, within a period of three years following any Participant's death or other termination of employment by an Employer, the Administrator in the exercise of reasonable diligence has been unable to locate the person or persons entitled to benefits under this Article in respect of such Participant, the rights of such person or persons shall be forfeited and the Administrator shall direct the Trustee to pay such benefit or benefits to the person or persons next entitled thereto under the succession prescribed by this Section.

(c) Spousal Consent to Election of Optional Form of Benefit or Beneficiary Designation . If a Participant is married on his or her Pension Starting Date, and if after giving effect to an election, revocation or change described in paragraph (a) of this Section (relating to election of optional form of benefit) the Participant's Spouse would not be entitled to receive a survivor's benefit at least equal to that provided by Section 7.2(b) (relating to manner of distribution with respect to married Participants), such election, revocation or change shall not be effective unless it shall have been consented to at the time of such election, revocation or change in writing by the Participant's Spouse and such consent acknowledges the effect of such election and is witnessed by a notary public. The consent of a Spouse to such an election, revocation or change shall not be required if it is established to the satisfaction of the Administrator that such consent cannot be obtained because there is no Spouse, the Spouse cannot be located or such other circumstances as may be prescribed in Regulations. If the Spouse is legally incompetent to give consent, the consent may be executed by the Spouse's legal guardian (including the Participant, if the Participant is the legal guardian). An election of an optional form of distribution shall be deemed a rejection of the distribution form provided by paragraph (a) or (b) of Section 7.2 (relating to manner of distribution with respect to unmarried Participants and manner of distribution with respect to married Participants). The consent of a Spouse otherwise required by this paragraph shall not be necessary for a distribution required by a Qualified Domestic Relations Order.

(d) Notice of Availability of Optional Forms of Benefit. No less than 30 days (or such shorter period as may be permitted by applicable law) and no more than 90 days before the later of a Participant's Pension Starting Date and the date the Participant's benefit is paid or commences, the Administrator shall give the Participant by mail or personal delivery written notice in non-technical language that he or she may elect an optional form of distribution set forth in Section 7.2 (relating to form of distribution); provided, however, that the Participant may waive (with applicable spousal consent) such 30-day notice period as long as the Participant's distribution commences not less than eight days after such notice is provided. Such notice shall include a general description of the eligibility conditions and other material features of the optional forms of distribution provided under the Plan; the circumstances under which the basic forms of distribution set forth in Section 7.2 (relating to form of distribution) will be provided unless a Participant, with the consent of the Participant's Spouse, elects otherwise; the

Participant’s right to revoke any such election; and information regarding the financial effect, in terms of dollars per payment, upon his or her distribution if he or she elects an optional form of distribution or revokes any prior election. Notwithstanding the foregoing, the notice described in the previous paragraph may be provided to the Participant subsequent to the Participant’s Pension Starting Date, if the Participant so elects, provided that the following conditions are satisfied:

(i) the date on which the first payment to be received by the Participant is made (the “initial payment date”) shall be no earlier than thirty (30) days following the date that the notice is furnished to the Participant, except that the initial payment date may be as early as the eighth day after such notice is provided if (i) such notice clearly indicates that the Participant has a right to a period of thirty (30) days after receiving the notice to consider to waive the basic forms of distribution provided under the Plan and to elect (with spousal consent) an optional form of benefit, (ii) the Participant affirmatively elects a form of distribution with the consent of his or her spouse (if required) to commence as of the initial payment date, and (iii) the Participant is permitted to revoke such election until the initial payment date;

(ii) the notice shall be provided to the Participant no more than ninety (90) days before the initial payment date, however, the Plan will not fail to satisfy the ninety (90)-day requirement if the delay in providing the distribution is due solely to an administrative delay;

(iii) the Participant is not permitted to elect a Pension Starting Date that precedes the date upon which the Participant could have otherwise started receiving benefits under the terms of the Plan as in effect on the Pension Starting Date;

(iv) to the extent that a Participant has not received any payments for the period from the Pension Starting Date to the initial payment date, the Participant shall receive a one-time payment to reflect any such missed payments (a “make-up payment”). Such make-up payment shall be adjusted for interest from the period beginning on the Pension Starting Date and ending on the initial payment date, which shall be calculated with respect to such payments that would have been received prior to the initial payment date. The interest rate used to compute the adjustment described in the preceding sentence shall equal the 30 Year Treasury rate for December of the preceding Plan Year. For purposes of Section 8.1 (relating to statutory limits), the limitations set forth therein shall comply with the adjustments required thereto pursuant to Treasury Regulation 1.417(e)-1 with respect to any Pension Starting Date described in this paragraph which is a “retroactive annuity starting date” as defined for purposes of such Regulation; and

(v) if a Participant who is married elects to commence the Participant's benefit as of the initial payment date pursuant to this paragraph, then the Participant's spouse (including an alternate payee who is treated as the Participant's spouse under a qualified domestic relations order), determined as of the initial payment date, must consent to such election if the survivor benefits payable as of the Pension Starting Date are less than the survivor benefits payable under the benefit described in Option 3 of Section 7.2(b) of the Plan as of the initial payment date.

(e) Waiver of Statutory Surviving Spouse's Benefit. A Participant may waive the statutory surviving spouse's benefit provided by Section 7.3(b)(2) at any time prior to the Participant's death, provided, however, that if such waiver is made prior to the Plan Year in which the Participant attains age 35, such waiver shall become invalid on the first day of such year unless the Participant has terminated employment by the Employers prior to such day. A Participant whose waiver becomes invalid pursuant to the preceding sentence may elect, at any time after the waiver becomes invalid, to again waive the statutory surviving spouse's benefit provided by Section 7.3(b)(2). A waiver made pursuant to this paragraph (e) shall be made by delivering a written notice thereof to the Administrator on a form provided by the Administrator for this purpose with a written consent of the Participant's Spouse which satisfies the requirements of paragraph (b) of this Section (relating to beneficiary designation) (unless it is determined pursuant to paragraph (c) of this Section that such consent is not needed). Such a waiver shall cease to be effective if, subsequent to the execution of such waiver, the Participant shall make any other Beneficiary designation pursuant to paragraph (b) of this Section (relating to beneficiary designation) which diminishes the rights or contingent rights of the Participant's Spouse, which are specified in the Beneficiary designation in effect at the time such Spouse consented to such waiver, to all or part of the benefit provided under Section 7.3(b) (relating to form of payment of pre-retirement death benefits), provided, however, that in no event shall such other Beneficiary designation affect the effectiveness of such waiver if such Spouse shall have so specified at the time of consent. A waiver described in this paragraph shall cease to be effective on (i) the date on which the Participant is subsequently married to a person other than the Spouse who consented to such waiver, (ii) the Participant's Pension Starting Date, or (iii) the date of the Participant's revocation of such waiver.

(f) Notice of Right to Waive Statutory Surviving Spouse's Benefit. Not later than twelve months after the day on which an Employee has become a Participant, the Administrator shall give the Participant by mail or personal delivery written notice in nontechnical language that he or she may waive the statutory surviving spouse's benefit provided by Section 7.3(b)(2). Such notice shall include a general description of terms and conditions of such benefit and the circumstances under which it will be provided unless waived and the Participant's right to revoke any such waiver and general information on the relative financial effect, if any, upon the Participant's Pension of such benefit and its waiver. Such notice shall also advise the Participant that, upon written request to the Administrator prior to the end of the waiver period set forth in paragraph (e) of this Section (relating to waiver of statutory surviving spouse's benefit), he or she will be given a written explanation in nontechnical language of the terms and conditions of such benefit and the financial effect, in terms of dollars per payment, upon his or her other death benefits if he or she does not waive such benefit. Such explanation shall be mailed or personally delivered to the Participant within 30 days from the date his or her written request is received by the Administrator.

(g) Election of Optional Form of Statutory Surviving Spouse's Benefit. A surviving Spouse may elect to have the statutory surviving spouse's benefit provided by Section 7.3(b)(2) payable in the form of Option 2 of Section 7.2(c) (relating to optional forms of distribution). Such an election may be made at any time prior to the commencement of such benefit and not thereafter. Such an election shall be made by delivering a written notice thereof to the Administrator on a form provided by the Administrator for this purpose.

(h) Automatic Cancellation of Elections. If a Participant's Pension is payable in the form of a joint and survivor annuity and if, prior to the Participant's Pension Starting Date, the Participant's Spouse dies or the Participant and such Spouse divorce, the Participant's election or deemed election to receive a joint and survivor annuity shall, upon the Participant's notice to the Administrator of such death or divorce, be automatically cancelled, unless, subsequent to such Spouse's death or the Participant's divorce and prior to the Participant's Pension Starting Date, the Participant remarries and notice of such new marriage is timely received by the Administrator.

Section 7.5 Distributions to Minor and Disabled Distributees. Any distribution under this Article that is payable to a distributee who is a minor or to a distributee who, in the opinion of the Administrator, is unable to manage his or her affairs by reason of illness or mental incompetency may be made to or for the benefit of any such distributee at such time consistent with the provisions of Section 7.2 (relating to form of distribution) and in such of the following ways as the legal representative of such distributee shall direct: (i) directly to any such minor distributee if, in the opinion of such legal representative, he or she is able to manage his or her affairs, (ii) to such legal representative, (iii) to a custodian under a Uniform Gifts to Minors Act for any such minor distributee, or (iv) directly in payment of expenses of support or maintenance of such person. Neither the Administrator nor the Trustee shall be required to see to the application by any third party other than the legal representative of a distributee of any distribution made to or for the benefit of such distributee pursuant to this Section.

Section 7.6 Direct Rollover Distributions. In the case of a distribution under this Plan that is an "eligible rollover distribution" within the meaning of section 402 of the Code and that is at least $200, an eligible distributee (as defined below) may elect that all or any portion of such distribution to which such eligible distributee is entitled shall be directly transferred as a rollover contribution from the Plan to (i) an individual retirement account described in section 408(a) of the Code, (ii) an individual retirement annuity described in section 408(b) of the Code, (iii) an annuity plan described in section 403(a) of the Code, (iv) a retirement plan qualified under section 401(a) of the Code, (v) an annuity contract described in section 403(b) of the Code, (vi) an eligible plan under section 457(b) of the Code which is maintained by an eligible employer described in section 457(e)(1)(A) of the Code (the terms of which permit the acceptance of rollover contributions) or (vii) effective January 1, 2008, a Roth IRA described in section 408A of the Code; provided, however, that (x) with respect to a plan described in clause (vii), for transfers occurring before January 1, 2010, the Participant (or surviving spouse of a Participant or a former spouse who is an alternate payee under a qualified domestic relations order as defined in section 414(p) of the Code) meets the requirements of section 408A(c)(3)(B) of the Code and (y) with respect to a distribution (or portion of a distribution) to a person who is not the Participant or the surviving spouse or former spouse of the Participant, "eligible retirement plan" shall mean only a plan described in clause (i), (ii) or (vii) that, in either case, is established for the purpose of receiving such distribution on behalf of such person. For purposes of this Section, "eligible distributee" shall include the Participant, his or her spouse or his or her former spouse who is an alternate payee under a qualified domestic relations order within the meaning of section 414(p) of the Code and, effective January 1, 2010, the Participant's Beneficiary who is not the Participant's spouse or former spouse. Notwithstanding the foregoing, an eligible distributee shall not be entitled to elect to have less than the total amount of such distribution transferred as a rollover contribution unless the amount to be transferred equals at least $500.

Section 7.7 Withholding Requirements. Any benefit payment made under the Plan will be subject to any applicable income tax withholding requirements.

Section 7.8 Special Rules Applicable to Calculations of Lump Sum Distributions . Notwithstanding anything contained herein to the contrary, if a lump sum distribution is paid to a Participant prior to the Participant's Normal Retirement Age and prior to May 23, 2007, the portion of any lump sum payment made under Section 7.2(c), Option 2, or Section 7.3(b)(1) that, in either case, is attributable to the Participant's Cash Balance Account shall be the greater of (x) the balance credited to the Participant's Cash Balance Account as of the last day of the month immediately preceding the date of such distribution and (y) the Actuarial Equivalent of the Participant's Accrued Benefit.

Section 7.9 Participant's Death During Qualified Military Service . Effective January 1, 2007, in the case of a Participant who dies while performing Military Service, the Beneficiaries of such Participant shall be entitled to any additional benefits, if any (other than benefit accruals relating to the period of Military Service), provided under the Plan had the Participant resumed employment with an Employer and then terminated such employment on account of such Participant's death.

ARTICLE 8
LIMITATIONS ON BENEFITS

Section 8.1 Statutory Limits. The provisions of this Section shall be effective for any "Limitation Year" (as defined below) solely to the extent required by the Code or Regulations for such year.

Notwithstanding any other provision of the Plan to the contrary, the amount of the Participant's annual benefit (as defined below) accrued, distributable or payable at any time under the Plan shall be limited to an amount such that such annual benefit and the aggregate annual benefit of the Participant under all other defined benefit plans maintained by the Employer or any other Affiliate does not exceed the lesser of:

(i) $160,000 (as increased to reflect the cost of living adjustments provided under section 415(d) of the Code), multiplied by a fraction (not exceeding 1 and not less than 1/10th), the numerator of which is the Participant's years of participation (within the meaning of Treasury Regulation section 1.415(b)-1(g)(1)(ii)) and the denominator of which is 10; or

(ii) an amount equal to 100% of the Participant's average compensation for the three consecutive calendar years in which his or her compensation was the highest (as determined in accordance with Treasury Regulation section 1.415(b)-1(a)(5)) and which are included in his or her years of service (within the meaning of Treasury Regulation section 1.415(b)-1(g)(2)(ii)) with the Employers multiplied by a fraction (not exceeding 1 and not less than 1/10th), the numerator of which is the Participant's years of service and the denominator of which is 10.

The dollar amount set forth in clause (i) of the preceding paragraph shall be actuarially reduced in accordance with Treasury Regulation section 1.415(b)-1(d) if the Participant's Pension Starting Date occurs prior to the Participant's attainment of age 62. If the Participant's Pension Starting Date occurs after the Participant attains age 65, such dollar amount shall be actuarially increased in accordance with Treasury Regulation section 1.415(b)-1(e).

A Participant's "annual benefit" shall mean the Participant's accrued benefit payable annually in the form of a straight life annuity, as determined in, and accordance with, Treasury Regulation section 1.415(b)-1(b). If the annual benefit is payable in a form other than a single life annuity, the annual benefit shall be adjusted to the Actuarial Equivalent of a single life annuity using the assumptions of the following sentences; provided, however, that no adjustment shall be required for survivor benefits payable to a surviving Spouse under a Qualified Joint and Survivor Annuity (as described in Section 7.2(b)) to the extent such benefits would not be payable if the Participant's annual benefit were paid in another form.

Effective for Plan Years beginning January 1, 2004 and January 1, 2005, for any form of benefit subject to section 417(e)(3) of the Code, a Participant's annual benefit shall be the greater of (i) the amount computed using the interest rate and mortality table specified under subdivision (3) of Article 2 (relating to definition of Actuarial Equivalent) as in effect and (ii) the amount computed using an interest rate assumption of 5.5% and the applicable mortality table under Treasury Regulation section 1.417(e)-1(d)(2) (the "Applicable Mortality Table"). Effective for Plan Years beginning on or after January 1, 2006, for any form of benefit subject to section 417(e)(3) of the Code, a Participant's annual benefit shall be the greatest of (i) the amount computed using the interest rate and mortality table specified under subdivision (3) of Article 2 (relating to definition of Actuarial Equivalent) as in effect, (ii) the amount computed using an interest rate assumption of 5.5% and the Applicable Mortality Table and (iii) the amount computed using the applicable interest rate under Treasury Regulation section 1.417(e)-1(d)(3) and the Applicable Mortality Table, divided by 1.05. Effective for Plan Years beginning on or after January 1, 2006, for any form of benefit not subject to section 417(e)(3) of the Code, a Participant's annual benefit shall be determined in accordance with Treasury Regulation section 1.415(b)-1(c). An individual's "annual benefit" under any other defined benefit plan maintained by the Employer and Affiliate shall be as determined pursuant to the provisions of section 415 of the Code and the Regulations issued thereunder the terms of such plan.

Notwithstanding the foregoing provisions of this Section, the limitation provided by this Section shall not apply to a Participant who has not at any time participated in a defined contribution plan maintained by any Employer and whose annual benefit under the Plan does not exceed $10,000 multiplied by a fraction (not exceeding 1 and not less than 1/10th) the numerator of which is the Participant's years of service (within the meaning of Treasury Regulation section 1.415(b)-1(g)(2)(ii))) and the denominator of which is 10.

For purposes of this Section, the term "compensation" shall have the meaning set forth in section 415(c)(3) of the Code and the applicable Regulations, the term "defined contribution plan" shall have the meaning set forth in Treasury Regulation section 1.415(c)-1(a)(2), the term "defined benefit plan" shall have the meaning set forth in Treasury Regulation section 1.415(b)-1(a)(2) and the term "Employer" shall include the Employers and all corporations and entities required to be aggregated with any of the Employers pursuant to section 414(b) and (c) of the Code as modified by section 415(h) of the Code. Section 415 of the Code and the Regulations thereunder are hereby incorporated by reference.

Section 8.2 Restrictions on Benefits. (a) The annual Plan payments to a Participant in the Restricted Group (as defined below) for any Plan Year may not exceed an amount equal to the annual payments that would be made to or on behalf of the Participant under:

(i) a single life annuity that is equal to the Participant's Accrued Benefit and any other Benefits (as defined below) to which the Participant is entitled under the Plan (disregarding any Social Security supplement within the meaning of section 1.411(a)-7(c)(4)(ii) of the Treasury Regulations), plus

(ii) the amount of any payment to which the Participant is entitled as a Social Security supplement under the Plan.

(b) Application of Restriction. The restriction set forth in paragraph (a) of this Section (relating to restrictions on benefits) shall not apply to any payment if any of the following conditions is satisfied at the date as of which the payment is to be made:

(i) after reduction to reflect the present value of all Benefits payable to or on behalf of the Participant under the Plan, the value of the Plan's assets would equal or exceed 110% of the value of the Plan's current liabilities, as defined in section 412(l)(7) of the Code;

(ii) the present value of the Benefits payable to or on behalf of the Participant under the Plan is less than 1% of the value of the Plan's current liabilities, as defined in section 412(l)(7) of the Code; or

(iii) the present value of the Benefits payable to or on behalf of the Participant under the Plan does not exceed $5,000 (or such greater amount as may be set forth in section 411(a)(11)(A) of the Code).

(c) Plan Termination Rule. In the event of termination of the Plan, the benefit of any Participant in the Restricted Group shall be limited to a benefit that is nondiscriminatory under section 401(a)(4) of the Code.

(d) Definitions. For purposes of this Section:

(i) "Restricted Group" consists of the highly compensated employees and highly compensated former employees (within the meaning of section 414(q) of the Code) of the Employer and its Affiliates, but the total number in the Restricted Group for any calendar year shall be limited to 25 and shall consist of those highly compensated active and highly compensated former employees with the greatest compensation in the current or any prior year for which compensation information is available.

(ii) The term "Benefit" includes, without limitation, any periodic income from the Plan, any withdrawal values payable to a living employee under the Plan, any Plan loans in excess of the amounts set forth in section 72(p)(2)(A) of the Code and any Plan death benefits not provided for by insurance on the employee's or former employee's life.

(iii) The "current liability" of the Plan as of any date may be based on the current liability reported on Schedule B of the Plan's most recent, timely-filed Form 5500 or 5500 C/R. For purposes of this Section, the value of the Plan's assets shall be determined on the same date as of which the current liability is determined.

(e) Effective Date. The restrictions set forth in this Section shall cease to be in effect when (i) a condition set forth in subparagraph (b)(i), (b)(ii) or (b)(iii) above is satisfied, (ii) the Participant is not in the Restricted Group, (iii) the Plan is terminated and the benefit received by the Participant is nondiscriminatory or (iv) such restrictions are not required to be applied to such payment under the Code or Regulations.

Section 8.3 Benefit Restrictions as a Result of Funding. Effective January 1, 2010, notwithstanding any provision of the Plan to the contrary, the following benefit restrictions shall apply if the Plan's adjusted funding target attainment percentage is at or below the following levels.

(a) Limitations Applicable If the Plan's Adjusted Funding Target Attainment Percentage Is Less Than 80%, But Not Less Than 60%. If the Plan's adjusted funding target attainment percentage for a Plan Year is less than 80% (or would be less than 80% to the extent described in subparagraph (a)(2) below) but is not less than 60%, then the limitations set forth in this paragraph (a) apply.

(1) 50% Limitation on Single Sum Payments, Other Accelerated Forms of Distribution, and Other Prohibited Payments. A Participant or Beneficiary is not permitted to elect, and the Plan shall not pay, a lump sum distribution or other optional form of distribution that includes a prohibited payment with an annuity starting date on or after the applicable section 436 measurement date, and the Plan shall not make any

payment for the purchase of an irrevocable commitment from an insurer to pay benefits or any other payment or transfer that is a prohibited payment, unless the present value of the portion of the benefit that is being paid in a prohibited payment does not exceed the lesser of:

(i) 50% of the present value of the benefit payable in the optional form of benefit that includes the prohibited payment; or

(ii) 100% of the PBGC maximum benefit guarantee amount (as defined in Treasury Regulation section 1.436-1(d)(3)(iii)(C)).

The limitation set forth in this subparagraph (a)(1) does not apply to any payment of a benefit which under section 411(a)(11) of the Code may be immediately distributed without the consent of the Participant. If an optional form of benefit that is otherwise available under the terms of the Plan is not available to a Participant or Beneficiary as of the annuity starting date because of the application of the requirements of this subparagraph (a)(1), the Participant or Beneficiary is permitted to elect to bifurcate the benefit into unrestricted and restricted portions (as described in Treasury Regulation section 1.436-1(d)(3)(iii)(D)). The Participant or Beneficiary may also elect any other optional form of benefit otherwise available under the Plan at that annuity starting date that would satisfy the 50% limitation described in subparagraph (a)(1)(i) above or the PBGC maximum benefit guarantee amount described in subparagraph (a)(1)(ii) above, or may elect to defer the benefit in accordance with any general right to defer commencement of benefits under the Plan.

(2) Plan Amendments Increasing Liability for Benefits . No amendment to the Plan that has the effect of increasing liabilities of the Plan by reason of increases in benefits, establishment of new benefits, changing the rate of benefit accrual, or changing the rate at which benefits become nonforfeitable shall take effect in a Plan Year if the adjusted funding target attainment percentage for the Plan Year is:

(i) Less than 80%; or

(ii) 80% or more, but would be less than 80% if the benefits attributable to the amendment were taken into account in determining the adjusted funding target attainment percentage.

The limitation set forth in this subparagraph (a)(2) does not apply to any amendment to the Plan that provides a benefit increase under a Plan formula that is not based on compensation, provided that the rate of such increase does not exceed the contemporaneous rate of increase in the average wages of Participants covered by the amendment.

(b) Limitations Applicable If the Plan's Adjusted Funding Target Attainment Percentage Is Less Than 60% . If the Plan's adjusted funding target attainment percentage for a Plan Year is less than 60% (or would be less than 60% to the extent described in subparagraph (b)(2) below), then the limitations in this paragraph (b) apply.

(1) Single Sums, Other Accelerated Forms of Distribution, and Other Prohibited Payments Not Permitted . A Participant or Beneficiary is not permitted to elect, and the Plan shall not pay, a single sum payment or other optional form of benefit that includes a prohibited payment with an annuity starting date on or after the applicable section 436 measurement date, and the Plan shall not make any payment for the purchase of an irrevocable commitment from an insurer to pay benefits or any other payment or transfer that is a prohibited payment. The limitation set forth in this subparagraph (b)(1) does not apply to any payment of a benefit which under section 411(a)(11) of the Code may be immediately distributed without the consent of the Participant.

(2) Shutdown Benefits and Other Unpredictable Contingent Event Benefits Not Permitted to Be Paid . An unpredictable contingent event benefit with respect to an unpredictable contingent event occurring during a Plan Year shall not be paid if the adjusted funding target attainment percentage for the Plan Year is:

(i) Less than 60%; or

(ii) 60% or more, but would be less than 60% if the adjusted funding target attainment percentage were redetermined applying an actuarial assumption that the likelihood of occurrence of the unpredictable contingent event during the Plan Year is 100%.

(3) Benefit Accruals Frozen. Benefit accruals under the Plan shall cease as of the applicable section 436 measurement date. In addition, if the Plan is required to cease benefit accruals under this subparagraph (b)(3), then the Plan is not permitted to be amended in a manner that would increase the liabilities of the Plan by reason of an increase in benefits or establishment of new benefits.

(c) Limitations Applicable If the Plan Sponsor Is In Bankruptcy . Notwithstanding any other provisions of the Plan, a Participant or Beneficiary is not permitted to elect, and the Plan shall not pay, a single sum payment or other optional form of benefit that includes a prohibited payment with an annuity starting date that occurs during any period in which the Plan sponsor is a debtor in a case under title 11, United States Code, or similar Federal or state law, except for payments made within a Plan Year with an annuity starting date that occurs on or after the date on which the Plan's enrolled actuary certifies that the Plan's adjusted funding target attainment percentage for that Plan Year is not less than 100%. In addition, during such period in which the Plan sponsor is a debtor in a case under title 11, United States Code, or similar Federal or state law, the Plan shall not make any payment for the purchase of an irrevocable commitment from an insurer to pay benefits or any other payment or transfer that is a prohibited payment, except for payments that occur on a date within a Plan Year that is on or after the date on which the Plan's enrolled actuary certifies that the Plan's adjusted funding target attainment percentage for that Plan Year is not less than 100%. The limitation set forth in this paragraph (c) does not apply to any payment of a benefit which under section 411(a)(11) of the Code may be immediately distributed without the consent of the Participant.

(d) Provisions Applicable After Limitations Cease to Apply .

(1) Resumption of Prohibited Payments . If a limitation on prohibited payments under subparagraph (a)(1), (b)(1), or (c) of this Section applied to the Plan as of a section 436 measurement date, but that limit no longer applies to the Plan as of a later section 436 measurement date, then that limitation does not apply to benefits with annuity starting dates that are on or after that later section 436 measurement date.

(2) Resumption of Benefit Accruals . If a limitation on benefit accruals under subparagraph (b)(3) of this Section applied to the Plan as of a section 436 measurement date, but that limitation no longer applies to the Plan as of a later section 436 measurement date, then benefit accruals shall resume prospectively and that limitation does not apply to benefit accruals that are based on service on or after that later section 436 measurement date, except as otherwise provided under the Plan. The Plan shall comply with the rules relating to partial years of participation and the prohibition on double proration under Department of Labor Regulation section 2530.204-2(c) and (d).

(3) Shutdown and Other Unpredictable Contingent Event Benefits . If an unpredictable contingent event benefit with respect to an unpredictable contingent event that occurs during the Plan Year is not permitted to be paid after the occurrence of the event because of the limitation of subparagraph (b)(2) of this Section, but is permitted to be paid later in the same Plan Year (as a result of additional contributions or pursuant to the enrolled actuary's certification of the adjusted funding target attainment percentage for the Plan Year that meets the requirements of Treasury Regulation section 1.436-1(g)(5)(ii)(B)), then that unpredictable contingent event benefit shall be paid, retroactive to the period that benefit would have been payable under the terms of the Plan (determined without regard to subparagraph (b)(2) of this Section). If the unpredictable contingent event benefit does not become payable during the Plan Year in accordance with the preceding sentence, then the Plan is treated as if it does not provide for that benefit.

(4) Treatment of Plan Amendments That Do Not Take Effect. If a Plan amendment does not take effect as of the effective date of the amendment because of the limitation of subparagraph (a)(2) or (b)(3) of this Section, but is permitted to take effect later in the same Plan Year (as a result of additional contributions or pursuant to the enrolled actuary's certification of the adjusted funding target attainment percentage for the Plan Year that meets the requirements of Treasury Regulation section 1.436-1(g)(5)(ii)(C)), then the Plan amendment must automatically take effect as of the first day of the Plan Year (or, if later, the original effective date of the amendment). If the Plan amendment cannot take effect during the same Plan Year, then it shall be treated as if it were never adopted, unless the Plan amendment provides otherwise.

(e) Notice Requirement. Written notice to Participants and Beneficiaries shall be provided within 30 days, in accordance with section 101(j) of ERISA, if the Plan becomes subject to a limitation described in subparagraph (a)(1), (b), or (c) of this Section.

(f) Methods to Avoid or Terminate Benefit Limitations. Application of one or more of the benefit limitations set forth in paragraphs (a), (b) and (c) of this Section for a Plan Year may be avoided or terminated through the use of employer contributions, by increasing the amount of Plan assets which are taken into account in determining the adjusted funding target attainment percentage and by other methods in accordance with sections 436(b)(2), (c)(2), (e)(2) and (f) of the Code and Treasury Regulation section 1.436-1(f).

(g) Plan Operations for Periods Prior to and After Certification of Plan's Adjusted Funding Target Attainment Percentage .

(1) In General. For any period during which a presumption under section 436(h) of the Code and Treasury Regulation section 1.436-1(h) applies to the Plan, the limitations under paragraphs (a) through (c) of this Section are applied to the Plan as if the adjusted funding target attainment percentage for the Plan Year were the presumed adjusted funding target attainment percentage determined under the rules of section 436(h) of the Code and Treasury Regulation section 1.436-1(h)(1), (2), or (3). These presumptions are set forth in subparagraphs (g)(2) though (g)(4) below.

(2) Presumption of Continued Underfunding Beginning First Day of Plan Year. If a limitation under paragraph (a), (b) or (c) of this Section applied to the Plan on the last day of the preceding Plan Year, then, commencing on the first day of the current Plan Year and continuing until the Plan's enrolled actuary issues a certification of the adjusted funding target attainment percentage for the Plan for the current Plan Year, or, if earlier, the date subparagraph (g)(3) or (g)(4) below applies to the Plan:

(i) The adjusted funding target attainment percentage of the Plan for the current Plan Year is presumed to be the adjusted funding target attainment percentage in effect on the last day of the preceding Plan Year; and

(ii) The first day of the current Plan Year is a section 436 measurement date.

(3) Presumption of Underfunding Beginning First Day of Fourth Month. If the Plan's enrolled actuary has not issued a certification of the adjusted funding target attainment percentage for the Plan Year before the first day of the fourth month of the Plan Year and the Plan's adjusted funding target attainment percentage for the preceding Plan Year was either at least 60% but less than 70% or at least 80% but less than 90%, or is described in Treasury Regulation section 1.436-1(h)(2)(ii), then, commencing on the first day of the fourth month of the current Plan Year and continuing until the Plan's enrolled actuary issues a certification of the adjusted funding target attainment percentage for the Plan for the current Plan Year, or, if earlier, the date subparagraph (g)(4) below applies to the Plan:

(i) The adjusted funding target attainment percentage of the Plan for the current Plan Year is presumed to be the Plan's adjusted funding target attainment percentage for the preceding Plan Year reduced by 10 percentage points; and

(ii) The first day of the fourth month of the current Plan Year is a section 436 measurement date.

(4) Presumption of Underfunding On and After First Day of 10th Month . If the Plan's enrolled actuary has not issued a certification of the adjusted funding target attainment percentage for the Plan Year before the first day of the 10th month of the Plan Year (or if the Plan's enrolled actuary has issued a range certification for the Plan Year pursuant to Treasury Regulation section 1.436-1(h)(4)(ii) but has not issued a certification of the specific adjusted funding target attainment percentage for the Plan by the last day of the Plan Year), then, commencing on the first day of the 10th month of the current Plan Year and continuing through the end of the Plan Year:

(i) The adjusted funding target attainment percentage of the Plan for the current Plan Year is presumed to be less than 60%; and

(ii) The first day of the 10th month of the current Plan Year is a section 436 measurement date.

(h) Plan Termination and Other Special Rules.

(1) Plan Termination. The limitations on prohibited payments in subparagraphs (a)(1), (b)(1), and (c) of this Section do not apply to prohibited payments that are made to carry out the termination of the Plan in accordance with applicable law. Any other limitations under this Section do not cease to apply as a result of termination of the Plan.

(2) Special Rules Relating to Unpredictable Contingent Event Benefits and Plan Amendments Increasing Benefit Liability . During any period in which none of the presumptions under paragraph (g) of this Section apply to the Plan and the Plan's enrolled actuary has not yet issued a certification of the Plan's adjusted funding target attainment percentage for the Plan Year, the limitations under subparagraphs (a)(2) and (b)(2) of this Section shall be based on the "inclusive presumed adjusted funding target attainment percentage" for the Plan, as such term is described in, and calculated in accordance with the rules of, Treasury Regulation section 1.436-1(g)(2)(iii).

(3) Payments Under Social Security Leveling Options. For purposes of determining whether the limitations under subparagraph (a)(1) or (b)(1) of this Section apply to payments under a social security leveling option, within the meaning of section 436(j)(4)(C)(i) of the Code, the adjusted funding target attainment percentage for a Plan Year shall be determined in accordance with the "Special Rule for Certain Years" under section 436(j)(3) of the Code and any Treasury Regulations or other published guidance thereunder issued by the Internal Revenue Service.

(4) Limitation on Benefit Accruals. For purposes of determining whether the accrual limitation under subparagraph (b)(3) of this Section applies to the Plan, the adjusted funding target attainment percentage for a Plan Year shall be determined in accordance with the "Special Rule for Certain Years" under section 436 of the Code (except as provided under section 203(b) of the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010, if applicable).

(5) Interpretation of Provisions. The limitations imposed by this Section shall be interpreted and administered in accordance with section 436 of the Code and Treasury Regulation section 1.436-1.

(i) Definitions. The definitions in the following Treasury Regulations apply for purposes of this Section: section 1.436-1(j)(1) defining adjusted funding target attainment percentage; section 1.436-1(j)(2) defining annuity starting date; section 1.436-1(j)(6) defining prohibited payment; section 1.436-1(j)(8) defining section 436 measurement date; and section 1.436-1(j)(9) defining an unpredictable contingent event and an unpredictable contingent event benefit.

(j) Effective Date. The rules in this Section are effective for Plan Years beginning after December 31, 2009.

ARTICLE 9
SPECIAL PARTICIPATION AND DISTRIBUTION RULES RELATING TO RECOMMENCEMENT OF EMPLOYMENT AND EMPLOYMENT BY RELATED ENTITIES

Section 9.1 Recommencement of Employment by a Terminated Employee. (a) Rehire Date Before Absence of 5 Years. If an Employee who has a Termination of Employment recommences employment with an Employer before having a Period of Severance of five years and, on the date of his or her rehire, the terms of such Employee's employment are not subject to a collective bargaining agreement that does not provide for participation in this Plan, then either: (1) if such Employee was a Participant on the date his or her employment terminated, such Employee shall be Participant in the Plan as of his or her rehire date if he or she is then an Eligible Employee or (2) if such Employee was not a Participant on the date his or her employment terminated, such Employee shall not be an Eligible Employee and shall not become a Participant. Notwithstanding clause (1) of the preceding sentence, if an Employee described in the preceding sentence who first became an employed by an Employer prior to January 1, 2001 was not at any time permitted to make the election described in Section 3.1(b) (relating to eligibility for participation for employees who are not new hires) or was permitted to make such election and elected to participate in the Plan but such election was not given effect as a result of such Employee's Termination of Employment, such Eligible Employee shall be permitted to elect, in the time and manner prescribed by the Administrator, to either (1) participate in the Plan as of his or her rehire date or (2) participate in the ComEd Plan or the PECO Plan, as applicable, at the time prescribed therein and have his or her accrued benefit under the ComEd Plan or PECO Plan, as applicable, and related assets transferred to the Plan in the manner described in Section 3.1(c) (relating to transfer of benefits and assets to Plan). If an Employee makes the election described in clause (1) of the preceding sentence, (a) the applicable Schedule shall apply with respect to the Participant's Accrued Frozen Benefit and (b) such Employee shall not be entitled to a Transition Credit.

(b) Rehire Date After Absence of at Least 5 Years. If a Participant who has a vested benefit under the Plan has a Termination of Employment and thereafter is rehired by an Employer, such Participant shall remain a Participant upon his or her rehire. If an Employee who has a Termination of Employment did not have a vested benefit under the Plan or under either the ComEd Plan or the PECO Plan recommences employment with an Employer after having a Period of Severance of at least five years, such Employee shall become a Participant as of the date of his or her rehire if he or she is then an Eligible Employee. If an Employee who has a Termination of Employment had a vested benefit under either the ComEd Plan or the PECO Plan recommences employment with an Employer after having a Period of Severance of at least five years, such Employee shall not be an Eligible Employee and shall not become a Participant upon such recommencement of employment. Notwithstanding the preceding sentence, if an Employee described in the preceding sentence who first became employed by an Employer prior to January 1, 2001 was not at any time permitted to make the election described in Section 3.1(b) (relating to eligibility for participation for employees who are not new hires) or was permitted to make such election and elected to participate in the Plan but such election was not given effect as a result of such Employee's Termination of Employment, such Eligible Employee shall be permitted to elect, in the time and manner prescribed by the Administrator, to either (1) participate in the Plan as of his or her rehire date or (2) participate in the ComEd Plan or the PECO Plan, as applicable, at the time prescribed therein and have his or her accrued benefit under the ComEd Plan or PECO Plan, as applicable, transferred to the Plan in the manner described in Section 3.1(c) (relating to transfer of benefits and assets to Plan). The accrued benefit under the ComEd Plan or the PECO Plan, as applicable, of an Employee who elects to participate in the Plan shall be transferred to the Plan, along with an appropriate amount of assets, and (a) the applicable Schedule shall apply with respect to the Participant's Accrued Frozen Benefit and (b) such Employee shall not be entitled to a Transition Credit.

(c) Reestablishment of Cash Balance Account for Rehired Participant . If a Participant whose Termination of Employment occurs before his or her satisfaction of the Vesting Requirement recommences employment with an Employer and becomes a Participant pursuant to paragraph (a) above, such Participant's Cash Balance Account shall be reinstated and credited with Investment Credits for the Participant's Period of Severance. If a Participant whose Termination of Employment occurs after his or her satisfaction of the Vesting Requirement receives a complete distribution of his or her benefit under the Plan and subsequently recommences employment with an Employer as an Employee and becomes a Participant pursuant to paragraph (b) above, a new Cash Balance Account shall be established for such Participant as of such recommencement of employment. Such new Cash Balance Account shall have an initial balance of zero and shall be credited with Service Credits and Investment Credits solely for the Participant's period of employment thereafter.

Section 9.2 Suspension of Benefits. (a) Generally. If a Participant continues employment by an Employer beyond the Participant's Normal Retirement Age or, except as provided in paragraph (b) below, if a former Employee again becomes an Employee after his or her Normal Retirement Age, such Participant shall not be entitled to receive any Pension during such employment. If such a Participant was receiving a Pension, the Participant's Cash Balance Account as of his or her Pension Starting Date shall be restored and thereafter credited with Service Credits and Investment Credits with respect to such period of employment and Investment Credits from the Participant's prior Pension Starting Date to the date the Participant's Cash Balance Account is so restored. Upon the Participant's Termination of Employment or subsequent Termination of Employment, as the case may be, the Participant's Accrued Benefit shall be the larger of (i) the Participant's Accrued Benefit as of the first day of the month coinciding with or next following the Participant's date of rehire, or Normal Retirement Age, as the case may be, actuarially increased to reflect the later termination date (for purposes of this clause (i), the Investment Credits described in Section 6.1(d) with respect to such period of employment shall be the actuarial increase to the Participant's Accrued Benefit), and (ii) the Actuarial Equivalent of the Participant's Cash Balance Account, and the Accrued Frozen Benefit, as of the Participant's Termination of Employment, or subsequent Termination of Employment, as the case may be, reduced in either case by the sum of any Pension previously paid to the Participant plus interest thereon at the rate described in subdivision (3) of Article 2 (relating to definition of Actuarial Equivalent).

(b) Circumstances under which a Rehired Employee's Pension Payments may Continue . Notwithstanding paragraph (a) above, a reemployed Participant who is employed under circumstances that satisfy the applicable conditions for continuation of payment of retirement benefits set forth in the Company's policy regarding the rehiring of retirees shall not have his or her Pension suspended under this Section nor shall such reemployed Participant be prohibited from commencing his or her Pension if he or she is otherwise eligible to commence such Pension.

Section 9.3 Employment by Related Entities. If an individual is employed by an entity that is an Affiliate, then any period of employment by such entity (but only after such entity became an Affiliate) shall be taken into account solely for the purpose of determining when or whether and when such individual is eligible to participate in the Plan under Article 3 (relating to eligibility), measuring such individual's years of Vesting Service for purposes of the Vesting Requirement and determining when such individual's Termination of Employment occurs for purposes of Article 7 (relating to distributions) to the same extent such period would have been taken into account had such employment been with an Employer.

Section 9.4 Leased Employees. If an individual who performed services as a leased employee (within the meaning of section 414(n)(2) of the Code) of an Affiliate becomes an Employee, or if an Employee becomes such a leased employee, then any period as a leased employee shall be taken into account solely for the purposes of determining whether and when such individual is eligible to participate in the Plan under Article 3 (relating to eligibility), measuring such individual's years of Vesting Service for purposes of the Vesting Requirement and determining when such individual's Termination of Employment occurs for purposes of Article 7 (relating to distributions) to the same extent such period would have been taken into account had such service or employment been with an Employer. In addition, any contributions or benefits provided under another plan to such leased employee by his or her leasing organization shall be treated as provided under this Plan and shall be taken into account under Section 8.1 (relating to statutory limits) to the extent required under Treasury Regulation section 1.415(a)-1(f)(3). This Section shall not apply to any period during which such a leased employee was covered by a plan described in section 414(n)(5) of the Code and leased employees do not constitute more than 20% of the Employer's nonhighly compensated work force. Notwithstanding the preceding sentences, an individual who performed services only as a leased employee prior to January 1, 2001 shall be treated as not performing an Hour of Service prior to January 1, 2001 solely for the purposes of determining whether such individual qualifies as an Eligible Employee under subdivision (16) of Article 2.

Section 9.5 Employees who Become Eligible Employees as a Result of Ceasing to be Represented by IBEW Local Union 15 . If an Employee who, on the day he or she first performed an Hour of Service with an Employer, was a member of a collective bargaining unit represented by IBEW Local Union 15 and who first became employed by an Employer prior January 1, 2001 later ceases to be a member of a collective bargaining unit represented by IBEW Local Union 15, such Employee shall be permitted to elect, in the time and manner prescribed by the Administrator, to either (a) continue to participate in the ComEd Plan or (b) participate in this Plan as of the date he or she ceases to be a member of a collective bargaining unit represented by IBEW Local Union 15 and have his or her accrued benefit under the ComEd Plan and related assets transferred to the Plan in the manner described in Section 3.1(c) (relating to transfer of benefits and assets to Plan). If an Employee who, on the day he or she first performed an Hour of Service with an Employer, was a member of a collective bargaining unit represented by IBEW Local Union 15 and who first became employed by an Employer on or after January 1, 2001 and participated in the Exelon Corporation Pension Plan for Bargaining Unit Employees later becomes an Eligible Employee as a result of ceasing to be a member of a collective bargaining unit represented by IBEW Local Union 15, such Employee shall become a Participant as of the date he or she ceases to be a member of a collective bargaining unit represented by IBEW Local

Union 15 and shall have his or her accrued benefit under the Exelon Corporation Pension Plan for Bargaining Unit Employees and related assets transferred to the Plan. If an Employee who, on the day he or she first performed an Hour of Service with an Employer, was a member of a collective bargaining unit represented by IBEW Local Union 15 and who first became employed by an Employer on or after January 1, 2001 and who was a participant in the Commonwealth Edison Company Service Annuity System later becomes a member of a collective bargaining unit represented by IBEW Local Union 15, such Employee shall not become a Participant in this Plan.

Section 9.6 Employees who Cease to be Eligible Employees as a Result of Becoming Represented by IBEW Local Union 15 . If an Employee ceases to be an Eligible Employee as a result of becoming a member of a collective bargaining unit represented by IBEW Local Union 15 and becomes a participant in the Exelon Corporation Pension Plan for Bargaining Unit Employees or the Commonwealth Edison Company Service Annuity System, such Employee shall have his or her accrued benefit under this Plan and related assets transferred to the applicable plan.

Section 9.7 Change in Employment Status or Transfer to Affiliate . Except as otherwise provided in Section 9.8 and elsewhere in the Plan, if an Employee who was a Participant transfers employment to or is reemployed by an Employer or an Affiliate in a job classification with respect to which similarly situated employees of such Employer or Affiliate are not eligible to participate in the Plan but are instead either eligible to participate in another plan maintained by such Employer or Affiliate or are not eligible to participate in any plan, then such individual shall upon such transfer or reemployment participate in the plan, if any, determined pursuant to rules established by the Company, which rules may be set forth in a Supplement hereto.

Section 9.8 Transfer of Employment to or from Facilities formerly Owned by CEG . Effective as of the Effective Time (as such term is defined in the Merger Agreement), if a Participant who was a Participant on or prior to the Effective Time transfers employment to or is reemployed by an Employer or an Affiliate in a job classification with respect to which similarly situated employees of such Employer or Affiliate are not eligible to participate in the Plan but are instead eligible to participate in a Company Benefit Plan (as such term is defined in the Merger Agreement) that is intended to be a defined benefit pension plan qualified under Section 401(a) of the Code (each such plan, a "CEG Pension Plan") , then such individual shall upon such transfer or reemployment remain a Participant in the Plan and shall not participate in the CEG Pension Plan. If a participant in the CEG Pension Plan who was a participant in such plan on or prior to the Effective Time transfers employment to or is reemployed by an Employer or an Affiliate in a job classification with respect to which similarly situated employees of such Employer or Affiliate are not eligible to participate in such plan but are instead eligible to participate in the Plan, then such individual shall upon such transfer or reemployment remain a participant in the CEG Pension Plan and shall not participate in the Plan.

ARTICLE 10
ADMINISTRATION

Section 10.1 The Administrator, the Investment Office and the Corporate Investment Committee .

(a) The Administrator. The Company's Vice President, Health & Benefits, or such other person or committee appointed by the Chief Human Resources Officer from time to time (such vice president or other person or committee, the "Administrator"), shall be the "administrator" of the Plan, within the meaning of such term as used in ERISA. In addition, the

Administrator shall be the “named fiduciary” of the Plan, within the meaning of such term as used in ERISA, solely with respect to administrative matters involving the Plan and not with respect to any investment of the Plan’s assets. The Administrator shall have the following duties, responsibilities and rights:

(i) The Administrator shall have the duty and discretionary authority to interpret and construe this Plan in regard to all questions of eligibility, the status and rights of Participants, Beneficiaries and other persons under this Plan, and the manner, time, and amount of payment of any distributions under this Plan. The determination of the Administrator with respect to an Employee’s years of Vesting Service, the amount of the Employee’s Compensation, and any other matter affecting payments under the Plan shall be final and binding. Benefits under the Plan shall be paid to a Participant or Beneficiary only if the Administrator, in his or her discretion, determines that such person is entitled to benefits.

(ii) Each Employer shall, from time to time, upon request of the Administrator, furnish to the Administrator such data and information as the Administrator shall require in the performance of his or her duties.

(iii) The Administrator shall direct the Trustee to make payments of amounts to be distributed from the Trust Fund under Article 7 (relating to distributions). In addition, it shall be the duty of the Administrator to certify to the Trustee the names and addresses of all Participants, the amounts of all Pensions, the dates of death of Participants and all proceedings and acts of the Administrator necessary or desirable for the Trustee to be fully informed as to the Pension to be paid out of the Trust Fund.

(iv) The Administrator shall have all powers and responsibilities necessary to administer the Plan, except those powers that are specifically vested in the Investment Office, the Corporate Investment Committee or the Trustee.

(v) The Administrator may require a Participant or Beneficiary to complete and file certain applications or forms approved by the Administrator and to furnish such information requested by the Administrator. The Administrator and the Plan may rely upon all such information so furnished to the Administrator.

(vi) The Administrator shall be the Plan’s agent for service of legal process and forward all necessary communications to the Trustee.

(b) Removal of Administrator. The Chief Human Resources Officer shall have the right at any time, with or without cause, to remove the Administrator (including any member of a committee that constitutes the Administrator). The Administrator may resign and the resignation shall be effective upon delivery of the written resignation to the Chief Human Resources Officer or upon the Administrator's termination of employment with the Employers. Upon the resignation, removal or failure or inability for any reason of the Administrator to act hereunder, the Chief Human Resources Officer shall appoint a successor. Any successor Administrator shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor. None of the Company, any officer, employee or member of the board of directors of the Company who is not the Chief Human Resources Officer, nor any other person shall have any responsibility regarding the retention or removal of the Administrator.

(c) The Investment Office. The Investment Office, shall be the "named fiduciary" of the Plan, within the meaning of such term as used in ERISA, solely with respect to matters involving the investment of assets of the Plan and, any contrary provision of the Plan notwithstanding, in all events subject to the limitations contained in section 404(a)(2) of ERISA and all other applicable limitations. The Investment Office shall have the following duties, responsibilities and rights:

(i) The Investment Office shall be the "named fiduciary" for purposes of directing the Trustee as to the investment of amounts held in the Trust Fund and for purposes of appointing one or more investment managers as described in ERISA.

(ii) The Investment Office shall submit to the Corporate Investment Committee annual manager review results and such other reports and documents as may be necessary for the Corporate Investment Committee to monitor the activities and performance of the Investment Office.

(iii) Each Employer shall, from time to time, upon request of the Investment Office, furnish to the Investment Office such data and information as the Investment Office shall require in the performance of its duties.

(d) The Corporate Investment Committee. The Company acting through the Corporate Investment Committee shall be responsible for overall monitoring of the performance of the Investment Office. The Corporate Investment Committee shall have the following duties, responsibilities and rights:

(i) The Corporate Investment Committee shall monitor the activities and performance of the Investment Office and shall review annual manager review results and any other reports and documents submitted by the Investment Office.

(ii) The Corporate Investment Committee shall have authority to approve asset allocation recommendations of the Investment Office, and approve the retention or firing of any investment consultant (but not any investment manager), custodian or trustee, as recommended by the Investment Office.

(iii) The Corporate Investment Committee and the Company's Chief Investment Officer shall have the right at any time, with or without cause, to remove one or more employees of the Exelon Investment Office or to appoint another person or committee to act as Investment Office. Any successor Investment Office employee shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor.

The power and authority of the Corporate Investment Committee with respect to the Plan shall be limited solely to the monitoring and removal of the Investment Office and approval of the recommendations specified in clause (ii) above. The Corporate Investment Committee shall have no responsibility for making investment decisions, appointing or firing investment managers or for any other duties or responsibilities with respect to the Plan, other than those specifically listed herein.

(e) Status of Administrator, the Investment Office and the Corporate Investment Committee. The Administrator, any person acting as, or on behalf of, the Investment Office, and any member of the Corporate Investment Committee may, but need not, be an Employee, trustee or officer of an Employer and such status shall not disqualify such person from taking any action hereunder or render such person accountable for any distribution or other material advantage received by him or her under this Plan, provided that no Administrator, person acting as, or on behalf of, the Investment Office, or any member of the Corporate Investment Committee who is a Participant shall take part in any action of the Administrator or the Investment Office on any matter involving solely his or her rights under this Plan.

(f) Notice to Trustee of Members. The Trustee shall be notified as to the names of the Administrator and the person or persons authorized to act on behalf of the Investment Office.

(g) Allocation of Responsibilities. Each of the Administrator, the Investment Office and the Corporate Investment Committee may allocate their respective responsibilities and may designate any person, persons, partnership or corporation to carry out any of such responsibilities with respect to the Plan. Any such allocation or designation shall be reduced to writing and such writing shall be kept with the records of the Plan.

(h) General Governance. The Corporate Investment Committee shall elect one of its members as chairman and appoint a secretary, who may or may not be a member of such Committee. All decisions of the Corporate Investment Committee shall be made by the majority, including actions taken by written consent. The Administrator, the Investment Office and the Corporate Investment Committee may adopt such rules and procedures as it deems desirable for the conduct of its affairs, provided that any such rules and procedures shall be consistent with the provisions of the Plan.

(i) Indemnification. The Employers hereby jointly and severally indemnify the Administrator, the persons employed in the Exelon Investment Office, the members of the Corporate Investment Committee, the Chief Human Resources Officer, and the directors, officers and employees of the Employers and each of them, from the effects and consequences of their acts, omissions and conduct in their official capacity with respect to the Plan (including but not limited to judgments, attorney fees and costs with respect to any and all related claims, subject to the Company's notice of and right to direct any litigation, select any counsel or advisor, and approve any settlement), except to the extent that such effects and consequences result from their own willful misconduct. The foregoing indemnification shall be in addition to (and secondary to) such other rights such persons may enjoy as a matter of law or by reason of insurance coverage of any kind.

(j) No Compensation. None of the Administrator, any person employed in the Exelon Investment Office nor any member of the Corporate Investment Committee may receive any compensation or fee from the Plan for services as the Administrator, Investment Office or a member of the Corporate Investment Committee; provided, however that nothing contained herein shall preclude the Plan from reimbursing the Company or any Affiliate for compensation paid to any such person if such compensation constitutes "direct expenses" for purposes of ERISA. The Employers shall reimburse the Administrator, the persons employed in the Exelon Investment Office and the members of the Corporate Investment Committee for any reasonable expenditures incurred in the discharge of their duties hereunder.

(k) Employ of Counsel and Agents. The Administrator, the Investment Office and the Corporate Investment Committee may employ such counsel (who may be counsel for an Employer) and agents and may arrange for such clerical and other services as each may require in carrying out its respective duties under the Plan.

Section 10.2 Claims Procedure. Any Participant or distributee who believes he or she is entitled to benefits in an amount greater than those which he or she is receiving or has received may file a claim with the Administrator. Such a claim shall be in writing and state the nature of the claim, the facts supporting the claim, the amount claimed, and the address of the claimant. The Administrator shall review the claim and, unless special circumstances require an extension of time, within 90 days after receipt of the claim, give notice to the claimant, either in writing by registered or certified mail or in an electronic notification, of the Administrator's decision with respect to the claim. Any electronic notice delivered to the claimant shall comply with the standards imposed by applicable Regulations. If the Administrator determines that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 90-day period and in no event shall such an extension exceed 90 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which the Administrator expects to render the benefit determination. The notice of the decision of the Administrator with respect to the claim shall be written in a manner calculated to be understood by the claimant and, if the claim is wholly or partially denied, the Administrator shall notify the claimant of the adverse benefit determination and shall set forth the specific reasons for the adverse determination, the references to the specific Plan provisions on which the determination is based, a description of any additional material or information necessary for the claimant to perfect the claim, an explanation of why such material or information is necessary, and a description of the claim review procedure under the Plan and the time limits applicable to such procedures, including a statement of the claimant's right (subject to the limitations described in Section 13.11 (relating to statute of limitations for actions under the Plan) and 13.12 (relating to forum for legal actions under the Plan)) to bring a civil action under section 502 of ERISA following an adverse benefit determination on review. The Administrator shall also advise the claimant that the claimant or the claimant's duly authorized representative may request a review by the Chief Human Resources Officer (or such other officer designated from time to time by the Chief Human Resources Officer) of the adverse benefit determination by filing with such officer, within 60 days after receipt of a notification of an adverse benefit determination, a written request for such review. The claimant shall be informed that, within the same 60-day period, he or she (a) may be provided, upon request and free of charge, reasonable access to, and copies of, all documents, records and other information relevant to the claimant's claim for benefits and (b) may submit to the officer written comments, documents, records and other information relating to the claim for benefits. If a request is so filed, review of the adverse benefit determination shall be made by the officer within, unless special circumstances require an extension of time, 60 days after receipt of such request, and the claimant shall be given written notice of the officer's final decision. If the officer determines that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 60-day period and in no event shall such an extension exceed 60 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which the officer expects to render the determination on review. The review of the officer shall take into account all comments, documents, records and other information submitted by the claimant relating to the claim, without regard to whether such information was submitted or considered in the initial benefit determination. The notice of the final decision shall include specific reasons for the determination and references to the specific Plan provisions on which the determination is based and shall be written in a manner calculated to be understood by the claimant.

Section 10.3 Notices to Participants, Etc. All written notices, reports and statements given, made, delivered or transmitted to a Participant or Beneficiary or any other person entitled to or claiming benefits under the Plan shall be deemed to have been duly given, made or transmitted when mailed by first class mail with postage prepaid and addressed to the Participant or Beneficiary or such other person at the address last appearing on the records of the Administrator. A Participant or Beneficiary or other person may record any change of his or her address from time to time by written notice filed with the Administrator.

Section 10.4 Responsibility to Advise Administrator of Current Address. Each person entitled to receive a payment under the Plan shall file with the Administrator in writing his or her complete mailing address and each change therein. A check or communication mailed to any person at his or her address on file with the Administrator shall be deemed to have been received by such person for all purposes of the Plan, and neither the Administrator, the Employers nor the Trustee shall be obliged to search for or ascertain the location of any person. If the Administrator shall be in doubt as to whether payments are being received by the person entitled thereto, it shall, by registered mail addressed to the person concerned at his or her last address known to the Administrator, notify such person that all future Pension payments will be withheld until such person submits to the Administrator evidence of his or her continued life and his or her proper mailing address.

Section 10.5 Notices to Employers or Administrator. Written directions, notices and other communications from Participants or Beneficiaries or any other persons entitled to or claiming benefits under the Plan to the Employers or the Administrator shall be deemed to have been duly given, made or transmitted either when delivered to such location as shall be specified upon the form prescribed by the Administrator for the giving of such directions, notices and other communications or when mailed by first class mail with postage prepaid and addressed to the addressee at the address specified upon such forms.

Section 10.6 Responsibility to Furnish Information and Sign Documents . Each person entitled to a payment under the Plan shall furnish such information and data, including birth certificates or other evidence of age satisfactory to the Administrator, and sign such documents as may reasonably be requested by the Administrator or the Trustee in connection with the administration of the Plan.

Section 10.7 Records. Each of the Administrator, the Investment Office and the Corporate Investment Committee shall keep a record of all of their respective proceedings, if any, and shall keep or cause to be kept all books of account, records and other data as may be necessary or advisable in their respective judgment for the administration of the Plan, the administration of the investments of the Plan or the monitoring of the investment activities of the Plan, as applicable.

Section 10.8 Actuary to be Employed. The Company or the Investment Office shall engage an actuary to do such technical and advisory work as the Company or the Investment Office may request, including analyses of the experience of the Plan from time to time, the preparation of actuarial tables for the making of computations thereunder, and the submission to the Company or the Investment Office of an annual actuarial report, which report shall contain information showing the financial condition of the Plan, a statement of the contributions to be made by the Employers for the ensuing year, and such other information as may be requested by the Company or the Investment Office.

Section 10.9 Funding Policy. The Company shall establish a funding policy and method consistent with the objectives of the Plan and the requirements of Title I of ERISA and shall communicate such policy and method, and any changes in such policy and method, to the Investment Office.

Section 10.10 Electronic Media. Notwithstanding any provision of the Plan to the contrary and for all purposes of the Plan, to the extent permitted by the Administrator and any applicable law or Regulation, the use of electronic technologies shall be deemed to satisfy any written notice, consent, delivery, signature, disclosure or recordkeeping requirement under the Plan, the Code or ERISA to the extent permitted by or consistent with applicable law and Regulations. Any transmittal by electronic technology shall be deemed delivered when successfully sent to the recipient, or such other time specified by the Administrator.

Section 10.11 Correction of Error. If it comes to the attention of the Administrator that an error has been made in the amount of benefits payable, or paid, to any Participant or Beneficiary under the Plan, the Administrator shall be permitted to correct such error by whatever means that the Administrator, in its sole discretion determines, including by offsetting future benefits payable to the Participant or Beneficiary or requiring repayment of benefits to the Plan, except that no adjustment need be made with respect to any Participant or Beneficiary whose benefit has been distributed in full prior to the discovery of such error.

ARTICLE 11
PARTICIPATION BY OTHER EMPLOYERS

Section 11.1 Adoption of Plan. With the consent of the Company, any entity may become a participating Employer under the Plan with respect to all or a designated group of its employees by taking such action as shall be necessary or desirable to adopt the Plan and executing and delivering such instruments as may be necessary or desirable to put the Plan into effect with respect to such entity.

Section 11.2 Withdrawal from Participation. Any Employer shall terminate its participation in the Plan at any time, under such circumstances as the Company may provide, by delivering to the Company a duly certified copy of a resolution of its board of directors (or other governing body) to that effect, or by ceasing to be a member of the same controlled group as the Company (within the meaning of section 1563(a) of the Code).

Section 11.3 Company and Administrator as Agent for Employers . Each entity which shall become a participating Employer pursuant to Section 11.1 (relating to adoption of the Plan) or Article 12 (relating to continuance by a successor) by so doing shall be deemed to have appointed the Company and the Administrator its agent to exercise on its behalf all of the powers and authorities hereby conferred upon the Company and the Administrator by the terms of the Plan, including, but not by way of limitation, the power to amend and terminate the Plan. The authority of the Company and the Administrator to act as such agent shall continue unless and until the portion of the Trust held for the benefit of Employees of the particular Employer and their Beneficiaries is set aside in a separate trust as provided in Section 15.2 (relating to establishment of separate plan).

ARTICLE 12
CONTINUANCE BY A SUCCESSOR

In the event that an Employer is reorganized by way of merger, consolidation, transfer of assets or otherwise, so that another entity succeeds to all or substantially all of the Employer’s business, such successor entity may be substituted for the Employer under the Plan by adopting the Plan and becoming a party to the Trust agreement. If, within 90 days following the effective date of any such reorganization, such successor entity shall not have elected to become a party to the Plan, or if the Employer adopts a plan of complete liquidation other than in connection with a reorganization, the Plan shall be automatically terminated with respect to Employees of such Employer as of the close of business on the 90th day following the effective date of such reorganization or as of the close of business on the date of adoption of such plan of complete liquidation, as the case may be. If such successor entity is substituted for the Employer by electing to become a party to the Plan as described above, then, for all purposes of the Plan, employment with such successor entity and compensation paid by such successor entity shall be considered to be employment with, and Compensation paid by, an Employer.

ARTICLE 13
MISCELLANEOUS

Section 13.1 Expenses. The expenses of the Trustee in the administration of the Trust Fund, including compensation, if any, to the Trustee for its services, shall be paid by the Company or the Employers. All costs and expenses incurred in the operation of the Trust Fund, to the extent not described in the preceding sentence, and all costs and expenses incurred in the operation of the Plan or the Trust Fund, as applicable, including, but not limited to, "direct expenses" incurred in administering the Plan and the Trust Fund (including compensation paid to any employee of an Employer or an Affiliate who is engaged in the administration of the Plan or the Trust Fund), the expenses of the Administrator, the Investment Office and the Corporate Investment Committee, the fees of counsel and any agents for the Trustee, the Administrator, the Investment Office or the Corporate Investment Committee, and the fees of investment managers that manage assets of the Trust Fund, as applicable, shall be paid by the Trustee from the Trust Fund in such proportion as the Investment Office, in its sole discretion, shall determine, to the extent such expenses are not paid by the Employers and to the extent permitted under ERISA, Regulations and other applicable laws. Notwithstanding the foregoing, the Administrator or the Investment Office may authorize an Employer to act as an agent of the Plan to pay any expenses, and the Employer shall be reimbursed from the Trust Fund for such payments.

Section 13.2 Non-Assignability. (a) In General. It is a condition of the Plan, and all rights of each Participant and Beneficiary shall be subject thereto, that no right or interest of any Participant or Beneficiary in the Plan shall be assignable or transferable in whole or in part, either directly or by operation of law or otherwise, including, but not limited to, by way of limitation, execution, levy, garnishment, attachment, pledge or bankruptcy, but excluding devolution by death or mental incompetency, and no right or interest of any Participant or Beneficiary in the Plan shall be liable for, or subject to, any obligation or liability of such Participant or Beneficiary, including claims for alimony or the support of any Spouse.

(b) Exception for Qualified Domestic Relations Orders. Notwithstanding any provision of the Plan to the contrary, if a Participant's Accrued Benefit under the Plan, or any portion thereof, shall be the subject of one or more Qualified Domestic Relations Orders, such Accrued Benefit or portion thereof shall be paid to the person and at the time and in the manner specified in any such order. The Administrator or its agent, in its sole discretion, shall determine whether any order constitutes a Qualified Domestic Relations Order under this paragraph (b). A domestic relations order shall not fail to constitute a Qualified Domestic Relations Order under this paragraph (b) solely because such order provides for immediate payment to an alternate payee of the portion of the Participant's Accrued Benefit assigned to the alternate payee under the terms of such order.

Section 13.3 Employment Non-Contractual. Neither this Plan nor any action taken by the Administrator or the Investment Office confers any right upon an Employee to continue in employment with any Employer.

Section 13.4 Limitation of Rights. A Participant or distributee shall have no right, title or claim in or to any specific asset of the Trust Fund, but shall have the right only to distributions from the Trust Fund on the terms and conditions he or she herein provided. Neither this Plan nor any action taken by the Administrator or the Investment Office shall obligate any Employer to make contributions to the Trust in excess of the contributions authorized by the board of directors of the Company or create any liability on an Employer for the payment of Pensions under this Plan.

Section 13.5 Merger or Consolidation with Another Plan. A merger or consolidation with, or transfer of assets or liabilities to, any other plan shall not be effected unless the terms of such merger, consolidation or transfer are such that each Participant, distributee, Beneficiary or other person entitled to receive benefits from the Plan would, if the Plan were to terminate immediately after the merger, consolidation or transfer, receive a benefit equal to or greater than the benefit such person would be entitled to receive if the Plan were to terminate immediately before the merger, consolidation, or transfer.

Section 13.6 Construction. (a) General. Wherever used in the Plan, words in the masculine gender shall include masculine or feminine gender, and, unless the context otherwise requires, words in the singular shall include the plural, and words in the plural shall include the singular. All references to employment or the rehire or termination thereof shall refer to employment by any and all Employers, and to the extent provided herein, and, to the extent required by Section 3.2 (relating to transfers to affiliates) and Section 9.3 (relating to employment by related entities), any and all Affiliates, unless the context requires otherwise.

(b) Definition of "Highly Compensated Employee". Wherever applicable for purposes of satisfying legal requirements applicable to the Plan, the term "highly compensated employee" shall mean any Employee who performs service in the determination year and who (a) is a 5%-owner (as determined under section 416(i)(1)(A)(iii) of the Code) at any time during the Plan Year or the preceding Plan Year or (b) both (1) is paid compensation in excess of $80,000 (as adjusted for increases in the cost of living in accordance with section 414(q)(1)(B)(ii) of the Code) from an Employer for the preceding Plan Year, and (2) is in the group of employees consisting of the top 20% of the employees of the Employer and its Affiliates when ranked on the basis of compensation paid during such preceding Plan Year.

Section 13.7 Applicable Law. Except to the extent preempted by applicable federal law or otherwise provided under the terms of the Plan, the Plan and all rights hereunder shall be governed by and construed in accordance with the laws of the State of Illinois.

Section 13.8 Severability. If a provision of the Plan shall be held illegal or invalid, the illegality or invalidity shall not affect the remaining parts of the Plan and the Plan shall be construed and enforced as if the illegal or invalid provision had not been included in the Plan.

Section 13.9 No Guarantee. None of the Administrator, the Investment Office, the Corporate Investment Committee, the Employers, nor the Trustee in any way guarantees the Trust from loss or depreciation nor the payment of any money that may be or become due to any person from the Trust Fund or pursuant to the Plan. Nothing herein contained shall be deemed to give any Participant, distributee, or Beneficiary an interest in any specific part of the Trust Fund or any other interest, right or claim except the right to receive benefits out of the Trust Fund in accordance with the provisions of the Plan and the Trust Fund.

Section 13.10 Military Service. Notwithstanding any provision of the Plan to the contrary, contributions, benefits and Service with respect to Military Service shall be provided in accordance with section 414(u) of the Code.

Section 13.11 Statute of Limitations for Actions under the Plan . Except for actions to which the statute of limitations prescribed by section 413 of ERISA applies, (a) no legal or equitable action relating to a claim for benefits under section 502 of ERISA may be commenced later than one year after the claimant receives a final decision from the Chief Human Resources Officer (or such other officer designated from time to time by the Chief Human Resources Officer) in response to the claimant's request for review of the adverse benefit determination and (b) no other legal or equitable action involving the Plan may be commenced later than two years from the time the person bringing an action knew, or had reason to know, of the circumstances giving rise to the action. This provision shall not be interpreted to extend any otherwise applicable statute of limitations, nor to bar the Plan or its fiduciaries from recovering overpayments of benefits or other amounts incorrectly paid to any person under the Plan at any time or bringing any legal or equitable action against any party.

Section 13.12 Forum for Legal Actions under the Plan . Any legal action involving the Plan that is brought by any Participant, any Beneficiary or any other person shall be litigated in the federal courts located in the Northern District of Illinois or the Eastern District of Pennsylvania, whichever is most convenient, and no other federal or state court.

Section 13.13 Legal Fees. Any award of legal fees in connection with an action involving the Plan shall be calculated pursuant to a method that results in the lowest amount of fees being paid, which amount shall be no more than the amount that is reasonable. In no event shall legal fees be awarded for work related to (a) administrative proceedings under the Plan, (b) unsuccessful claims brought by a Participant, Beneficiary or any other person, or (c) actions that are not brought under ERISA. In calculating any award of legal fees, there shall be no enhancement for the risk of contingency, nonpayment or any other risk nor shall there be applied a contingency multiplier or any other multiplier. In any action brought by a Participant, Beneficiary or any other person against the Plan, the Administrator, any member of the Exelon Investment Office, any member of the Corporate Investment Committee, the Chief Human Resources Officer, any Plan fiduciary, the Company, its affiliates or their respective officers, directors, employees, or agents (the "Plan Parties"), legal fees of the Plan Parties in connection with such action shall be paid by the Participant, Beneficiary or other person bringing the action, unless the court specifically finds that there was a reasonable basis for the action.

ARTICLE 14
TOP-HEAVY PLAN REQUIREMENTS

Section 14.1 Top-Heavy Plan Determination. If as of the determination date (as hereinafter defined) for any Plan Year the aggregate present value of (i) the accrued benefits under the Plan and under all other defined benefit plans in the aggregate group (as hereinafter defined) and (ii) the aggregate account balances under all defined contribution plans in such aggregation group, in each case with respect to all participants in such plans who are key employees (as defined in section 416(i) of the Code) for such Plan Year, exceeds 60% of the aggregate present value of accrued benefits and the account balances of all participants in all such plans as of the determination date, then the Plan shall be a top-heavy plan for such Plan

Year and the requirements of Sections 14.3 (relating to minimum benefits for top-heavy years) and 14.4 (relating to top-heavy vesting requirements) shall be applicable for such Plan Year as of the first day thereof. If the Plan shall be a top-heavy plan for any Plan Year, such requirements shall not be applicable for such subsequent Plan Year except to the extent provided in Section 14.3 (relating to minimum benefits for top-heavy years).

Section 14.2 Definitions and Special Rules. (a) Definitions. For purposes of this Article, the following definitions shall apply:

(i) Determination Date. The determination date for all plans in the aggregation group shall be the last day of the preceding plan year, and the valuation date applicable to a determination date shall be (a) in the case of a defined contribution plan, the date as of which account balances are determined that is coinciding with or immediately precedes the determination date, and (b) in the case of a defined benefit plan, the date as of which the most recent actuarial valuation for the plan year that includes the determination date is prepared, except that if any such plan specifies a different determination or valuation date, such different date shall be used with respect to such plan.

(ii) Aggregation Group. The aggregation group shall consist of (a) each plan of an Employer in which a key employee is a participant, (b) each other plan that enables such a plan to be qualified under section 401(a) of the Code, and (c) any other plans of an Employer that the Company designates as part of the aggregation group.

(iii) Key Employee. Key employee shall have the meaning set forth in section 416(i) of the Code.

(iv) Top-Heavy Compensation. Top-heavy compensation shall have the meaning set forth in section 1.415(c)-2 of the Treasury Regulations.

(b) Special Rules. For the purpose of determining the accrued benefit or account balance of a participant, the accrued benefit or account balance of any person who has not been actively at work with an Employer at any time during the one-year period ending on the determination date shall not be taken into account pursuant to this Section, and any person who received a distribution from a plan (including a plan that has terminated) in the aggregation group during the one-year period ending on the determination date shall be treated as a participant in such plan, and any such distribution shall be included in such participant's account balance or accrued benefit, as the case may be; provided, however, that in the case of a distribution made for a reason other than a Participant's severance from employment, death or disability, this sentence shall be applied by substituting "five-year period" for "one-year period".

Section 14.3 Minimum Benefit for Top-Heavy Years. (a) The Pension to which a Participant is entitled at Normal Retirement Age under Section 7.2 (relating to form of distribution) shall in no event be less than two percent of the Participant's highest average compensation (as hereinafter defined) multiplied by the number of the Participant's years of Vesting Service, determined as provided below, not in excess of ten. For purposes of this Section, (i) a Participant's years of Vesting Service shall mean his or her years of Vesting Service but excluding any year of Vesting Service completed in a Plan Year for which the Plan was not a top-heavy plan, and (ii) a Participant's highest average compensation shall be the annual average of his or her top heavy compensation for the period of consecutive calendar years not exceeding 5 during which the Participant's top heavy compensation was the greatest, except that calendar years after the last Plan Year for which the Plan was top-heavy shall be disregarded.

(b) The provisions of paragraph (a) of this Section shall not apply with respect to a Participant if, for each year in which the Plan is a top-heavy plan, (i) the eligible employee's Employer also maintains a defined contribution plan which is included in the aggregation group for such year and (ii) under such plan, contributions made and forfeitures allocated to each eligible employee (other than key employees) equal 5% of such Participant's top heavy compensation for each Plan Year the Plan is top-heavy.

Section 14.4 Top-Heavy Vesting Requirements. If a Participant's Termination of Employment shall occur during a Plan Year for which a Plan is a top-heavy plan as defined in section 416(i) of the Code and after the Participant shall have completed at least three years of Vesting Service, the Participant shall be deemed to have satisfied the Vesting Requirement and shall be entitled to the Pension described in Section 7.2 (relating to form of distribution).

ARTICLE 15
AMENDMENT, ESTABLISHMENT OF SEPARATE PLAN AND TERMINATION

Section 15.1 Amendment. The board of directors of the Company (or a committee thereof) may at any time and from time to time amend or modify this Plan in any manner deemed by the board of directors of the Company to be necessary or desirable, provided, however, that in the case of any amendment or modification that would not result in an aggregate annual cost to the Company of more than $50,000,000, the Plan may be amended or modified by action of the Chief Human Resources Officer (with the consent of the Chief Executive Officer in the case of a discretionary amendment or modification expected to result in an increase in annual expense or liability account balance exceeding $250,000) or another executive officer holding title of equivalent or greater. Any such amendment or modification shall become effective on such date as the board (or committee thereof) or executive shall determine and may apply to Participants in this Plan at the time thereof as well as to future Participants, provided, however, that, unless permitted by applicable law, no such amendment or modification which reduces the basis for the computation of Pensions shall be retroactive as to service prior to the date of such amendment or modification.

Section 15.2 Establishment of Separate Plan. If an Employer shall withdraw from this Plan under Section 11.2 (relating to withdrawal from participation), the Investment Office shall determine the portion of the Trust Fund held by the Trustee which is applicable to the Participants of such Employer and direct the Trustee to segregate such portion in a separate trust. Such separate trust shall thereafter be held and administered as a part of the separate plan of such Employer.

Section 15.3 Termination of the Plan by an Employer. The Company may at any time, by resolution adopted by its board of directors, terminate this Plan in its entirety. In addition, any Employer may at any time terminate its participation in this Plan by resolution adopted by its board of directors to that effect. Contributions of an Employer to the Plan are conditioned on the receipt from the Internal Revenue Service of an initial favorable determination letter that this Plan and the Trust Fund as adopted by the Company meets the requirements of section 401(a) of the Code and that the Trust Fund is exempt from tax under section 501(a) of the Code, and if the Internal Revenue Service shall refuse to issue such letter, any Employer may terminate its participation in this Plan and direct the Trustee to pay and deliver to that Employer the portion of the Trust Fund applicable to its contributions.

Section 15.4 Vesting and Distribution Upon Termination or Partial Termination. Upon termination or partial termination of the Plan, the benefit as of the date of termination or partial termination, as the case may be, of all affected Participants shall be fully vested; provided, however, that full vesting shall be required with respect to a termination or partial termination only to the extent the Plan is then funded.

Allocation and distribution of the terminated portion of the Trust Fund shall thereafter be made in accordance with the applicable requirements of ERISA and the Code and with any applicable approval of the Pension Benefit Guaranty Corporation (the “PBGC”). If the

Administrator is notified by PBGC that PBGC is unable to determine that the Trust Fund is sufficient to discharge when due all obligations of the Plan with respect to benefits guaranteed by PBGC pursuant to section 4022 of ERISA, then the allocation and distribution of such portion of the Trust Fund shall be made only under the direction of PBGC or a United States district court pursuant to section 4044 of ERISA.

In the event that, after the termination of the Plan, any assets remain after such allocation, such assets shall be paid to the Company. The portion of the assets allocated to provide benefits to any person or group of persons may be applied for the benefit of such person or persons by the distribution of cash, continuance of the Trust Fund, establishment of a new Trust Fund, purchase of annuities from an insurance company, or otherwise, as determined by the Investment Office in its sole discretion; provided, however, that the benefit of any Participant or former Participant who is married and has satisfied the Vesting Requirement shall, unless such person shall elect otherwise, be paid in the form set forth in Section 7.2(b) (relating to manner of distribution with respect to married Participants) and, if the surviving Spouse of a deceased Participant or deceased former Participant is entitled to receive a benefit pursuant to Section 7.2(b) (relating to manner of distribution with respect to married Participants) or Section 7.3 (relating to pre-retirement death benefits), as the case may be, such benefit shall, unless such person shall elect otherwise, be paid in the form set forth therein.

Contributions of an Employer to the Plan are conditioned on the receipt from the Internal Revenue Service of an initial favorable determination letter that the Plan and Trust Fund as adopted by the Company meet the requirements of section 401(a) of the Code and that the Trust Fund is exempt from tax under section 501(a) of the Code, and, in the event that the Internal Revenue Service shall refuse to issue such letter, the Company may terminate the Plan and shall direct the Trustee to pay and deliver the Trust Fund to the Company.

Section 15.5 Trust Fund to Be Applied Exclusively for Participants and Their Beneficiaries . Subject only to the provisions of Section 4.2 (relating to limitation on contributions) and 15.4 (relating to vesting and distribution upon termination or partial termination), and any other provision of the Plan to the contrary notwithstanding, it shall be impossible for any part of the Trust Fund to be used for or diverted to any purpose not for the exclusive benefit of Participants and their beneficiaries and the payment of expenses in accordance with Section 13.1 (relating to expenses) either by operation or termination of the Plan, power of amendment or otherwise.

IN WITNESS WHEREOF, the Company has caused this instrument to be executed by its duly authorized officer on this _______ day of December, 2013.

SCHEDULE A

PROVISIONS APPLICABLE TO
ACCRUED FROZEN BENEFIT
UNDER THE COMMONWEALTH EDISON COMPANY
SERVICE ANNUITY SYSTEM

1. APPLICATION

This Schedule shall apply only to a Participant who elects to participate in the Plan pursuant to Section 3.1(b) of the Plan (relating to eligibility for participation for employees other than new hires) or Section 9.1 of the Plan (relating to recommencement of employment by terminated employee) and whose accrued benefit under the ComEd Plan is transferred to the Plan pursuant to Section 3.1(c) of the Plan (relating to transfer of benefits and assets to Plan) or Section 9.1 of the Plan. The provisions of this Schedule shall govern with respect to all matters relating to such a Participant's Accrued Frozen Benefit.

2. DEFINED TERMS

For purposes of this Schedule A, capitalized terms used herein shall have their respective meanings set forth in the Plan, except that the following words and phrases shall have the following respective meanings when capitalized unless the context clearly indicates otherwise:

A. Accrued Frozen Benefit. The amount payable with respect to a Participant's accrued benefit under the ComEd Plan determined as of December 31, 2001 commencing on the first day of the month coinciding with or next following a Participant's Schedule A Normal Retirement Age, determined as if such amount were payable in the form of a single life annuity for the life of the Participant.

B. Child. A Participant's natural child born prior to the Participant's Pension Starting Date or a child adopted by a Participant prior to the Participant's Pension Starting Date.

C. Consumer Price Index. The United States Bureau of Labor Statistics Consumer Price Index (U.S. City Average 1967 = 100). Such term shall also mean such index as it may from time to time be changed or, if it shall be discontinued, the most nearly comparable index, appropriately adjusted to yield results comparable with those which would have been produced if the index as defined in the preceding sentence had been used, as determined by the Investment Office.

D. Credited Service. A Participant's Credited Service includes the Participant's "credited service" as of the date he or she becomes a Participant, determined in accordance with the provisions of the ComEd Plan as in effect on such date, and the period beginning on the date the Participant becomes a Participant during which the Participant shall have been an Employee, including, (a) any period during which the Participant is in Military Service, provided that the Participant returns to the employ of an Employer within the period prescribed by laws relating to the reemployment rights of persons in Military Service, (b) any period for which back pay is awarded to the Participant and pursuant to which award the Participant is required to receive credited service under the Plan, (c) the period following Termination of Employment on account of a total and permanent disability during which the Participant is receiving benefits under any Employer's long term disability plan and (d) as and to the extent provided by resolutions of the board of directors of the Company, (i) any period of employment by Affiliates or other companies, and (ii) any period of authorized absence from such employment or from employment as an Eligible Employee. A Participant's periods of Credited Service before and after a Period of Severance that is not included in the Participant's Credited Service pursuant to the preceding sentences shall be aggregated only if (i) the Participant completes at least one year of Credited Service after such period of absence and (ii) the number of years of such Period of Severance is less than five.

E. Dependent Minor Child. A Child who, as of the time of the Participant's retirement or death, is under the age of 21 and qualifies as a dependent of the Participant within the meaning of Section 152 of the Code.

F. Dependent Disabled Child. A Child who, as of the time of the Participant's retirement or death, has a permanent physical or mental disability, as certified by the medical director of the Company or by such other licensed physician designated by the Administrator, that causes such Child to be unable to engage in substantial gainful employment, and is a dependent of the Participant within the meaning of Section 152 of the Code (determined by disregarding any age limitation contained in Section 152 of the Code).

G. Early Retirement Date. The date on which a Participant completes at least ten years of Credited Service and attains at least age 50.

H. Schedule A Actuarial Factors. The table specified by the Commissioner of Internal Revenue for purposes of section 417(e)(3) of the Code (which, as of the Effective Date, is the 1983 Group Annuity (unisex) Mortality Table (50% male, 50% female)) in effect on the date a determination hereunder occurs and an interest rate assumption using the "applicable interest rate" as defined in section 417(e)(3) of the Code for the month of November of the Plan Year immediately preceding the Plan Year in which a determination hereunder occurs.

I. Schedule A Normal Retirement Age. A Participant's 65th birthday.

3. SPECIAL RULES REGARDING COMPUTATION OF BENEFIT

A. Factors to Calculate Pension Paid Before Schedule A Normal Retirement Age

1. Pension Starting Date on or After Early Retirement Date and Prior to Schedule A Normal Retirement Age . The Pension attributable to the Accrued Frozen Benefit of a Participant whose Termination of Employment occurs on or after his or her Early Retirement Date and whose Pension commences prior to his or her Schedule A Normal Retirement Age shall be computed by multiplying such Participant's Accrued Frozen Benefit by the applicable factor from Table B-1.

2. Pension Starting Date After Attainment of Age 60 but Prior to Early Retirement Date . The Pension attributable to the Accrued Frozen Benefit of a Participant whose Pension Starting Date occurs on or after such Participant's attainment of age 60 but prior to such Participant's attainment of his or her Early Retirement Date shall be such Participant's Accrued Frozen Benefit without any actuarial reduction.

3. Pension Starting Date After Completion of Ten Years of Credited Service but Prior to Attainment of Age 60 . The Pension attributable to the Accrued Frozen Benefit of a Participant whose Pension Starting Date occurs prior to such Participant's attainment of age 60 and prior to his or her attainment of his or her Early Retirement Date, but after the Participant has completed at least ten years of Credited Service, shall be (a) if the Participant's Pension Starting Date occurs on or after his or her attainment of age 50, the amount determined by multiplying such Participant's Accrued Frozen Benefit by the applicable factor in Table F and (b) if the Participant's Pension Starting Date occurs prior to his or her attainment of age 50, the amount determined by actuarially reducing the Participant's Accrued Frozen Benefit using the factors in Table F to reduce the Accrued Frozen Benefit from age 60 to age 50 and using the Schedule A Actuarial Factors to reduce the Accrued Frozen Benefit to the Participant's Pension Starting Date.

4. Pension Starting Date Prior to Attainment of Age 60 and Prior to Completion of Ten Years of Credited Service . The Pension attributable to the Accrued Frozen Benefit of a Participant whose Pension Starting Date occurs prior to such Participant's attainment of age 60 and prior to such Participant's completion of ten years of Credited Service shall be computed by reducing the Participant's Accrued Frozen Benefit by using the Schedule A Actuarial Factors to reduce the Accrued Frozen Benefit to the Pension Starting Date.

B. Distribution with Respect to Married Participants . Notwithstanding Section 7.2(b) of the Plan, if a Participant will receive his or her Accrued Benefit in the form of a Qualified Joint and Survivor Annuity, the payments attributable to the Participant's Accrued Frozen Benefit shall be calculated and paid as follows:

1. Pension Starting Date After Attainment of Age 50 . Annuity payments will be made during the Participant's lifetime in an amount equal to the annual Accrued Frozen Benefit the Participant would have received if the Participant's Accrued Frozen Benefit were payable in the form of a single

life annuity for the Participant's lifetime reduced by the product of (i) 50% of the annual amount of Accrued Frozen Benefit the Participant would have received if the Participant's Accrued Frozen Benefit were payable in the form of a single life annuity for the Participant's lifetime multiplied by (ii) 40% of the applicable factor set forth in Table D.

Thereafter, if the Participant's Spouse shall survive the Participant, such Spouse shall receive during the remainder of the Spouse's lifetime an annual amount, payable monthly, equal to 50% of the annual amount the Participant would have received if the Participant's Accrued Frozen Benefit were payable as a single life annuity for the Participant's lifetime.

If the Participant survives the Spouse, such Participant shall receive during the remainder of the Participant's lifetime an annual amount payable monthly equal to the annual amount the Participant would have received if the Participant's Frozen Benefit were payable as a single life annuity for the Participant's lifetime.

2. Pension Starting Date Prior to Attainment of Age 50 . Annuity payments will be made during the Participant's lifetime in an amount equal to the annual Accrued Frozen Benefit the Participant would have received if the Participant's Accrued Frozen Benefit were payable in the form of a single life annuity for the Participant's lifetime multiplied by (i) an applicable factor determined by using the Schedule A Actuarial Factors.

Thereafter, if the Participant's Spouse shall survive the Participant, such Spouse shall receive during the remainder of the Spouse's lifetime an annual amount, payable monthly, equal to 50% of the annuity payment prior to the Participant's death.

If the Participant survives the Spouse, the monthly annuity will continue to be paid without any further adjustments during the remainder of the Participant's lifetime.

C. Post Retirement Adjustments . If a Participant's Pension Starting Date occurs on or after his or her 50^{th} birthday and the Participant's Accrued Frozen Benefit is paid in a form other than a lump sum distribution, the annual Accrued Frozen Benefit payable pursuant to this Schedule shall, subject to the limitations set forth in this paragraph C., be adjusted each October 1 for the twelve-month period then beginning by adding a post-retirement cost of living adjustment computed by applying an adjustment percentage to the appropriate base specified in this paragraph C. A Participant whose Pension Starting Date occurs prior to his or her 50^{th} birthday or who receives his or her Accrued Frozen Benefit in the form of a lump sum distribution shall not be entitled to any post-retirement cost of living adjustment under this Schedule. In addition, the post-retirement cost of living adjustment shall apply only to the portion of a Participant's Accrued Benefit that is attributable to his or her Accrued Frozen Benefit.

1. The adjustment percentage shall equal, for each October 1, the percentage by which the Consumer Price Index for the July immediately preceding such October 1 exceeds the Consumer Price Index for the July immediately preceding the twelve-month period beginning October 1 in which the Participant terminated employment or payment of a Pension commenced; provided, however, that:

   (a) If, as of such October 1, there shall be no such excess, the adjustment percentage shall be deemed to be zero for the twelve-month period beginning on such October 1.

   (b) There shall be no negative adjustment percentage.

   (c) The aggregate adjustment percentage for any twelve-month period beginning October 1 shall never be lower than the aggregate adjustment percentage for the preceding such period.

   (d) If the percentage increase in the Consumer Price Index computed for the twelve-month period beginning on October 1 does not exceed the aggregate adjustment percentage for the preceding twelve-month period by at least three percentage points, the aggregate adjustment percentage for the preceding twelve-month period shall continue in effect during such twelve-month period beginning on October 1.

   (e) The aggregate adjustment percentage for any twelve-month period beginning on October 1 shall not be more than seven percentage points greater than that for the preceding twelve-month period. If the aggregate adjustment percentage for any twelve-month period beginning on October 1 exceeds by more than seven percentage points the aggregate adjustment percentage for the preceding twelve-month period, the excess shall be carried over to succeeding twelve-month periods until such excess is reduced to zero.

   (f) The adjustment percentage for the twelve-month period beginning with the October 1 next following the date the Participant's Pension Starting Date shall be the adjustment percentage determined in accordance with the preceding provisions of this paragraph C. multiplied by a fraction the numerator of which shall be the number of full calendar months between such date and such October 1 and the denominator of which shall be twelve.

2. To determine the amount of the monthly cost of living adjustment, the adjustment percentage shall be applied to the first $500 per month of a Participant's Accrued Frozen Benefit, subject to a maximum monthly adjustment of $500 or, if the monthly amount of such Accrued Frozen Benefit is less than $500 per month, subject to a maximum monthly adjustment equal to the monthly Accrued Frozen Benefit payment. To

determine the amount of the adjustment made in the case of a Qualified Joint and Survivor Annuity or surviving Spouse annuity payable pursuant to Section 7.3 of the Plan to the surviving Spouse of a deceased Participant, a family pension payable pursuant to Section 4.B. of this Schedule to a surviving Dependent Minor Child or Children of a deceased Participant or a surviving dependent's pension payable pursuant to Section 4.C. of this Schedule to a surviving Dependent Disabled Child or Children of a deceased Participant, the adjustment percentage shall be applied to the first $250 per month of such annuity or pension, subject to a maximum monthly adjustment of $175 ($250 in the case of a Qualified Joint and Survivor Annuity) or, if the monthly amount of such annuity or pension is less than $175 ($250 in the case of a Qualified Joint and Survivor Annuity), subject to a maximum monthly adjustment equal to the monthly Accrued Frozen Benefit payment.

D. Lump Sum Value. If a Participant elects to receive his or her Accrued Frozen Benefit in the form of a lump sum distribution as described in Option 2 of Section 7.2(c) of the Plan, the amount of the lump sum attributable to the Participant's Accrued Frozen Benefit shall be the greater of:

1. the lump sum actuarial equivalent of the Participant's Accrued Frozen Benefit determined using the Schedule A Actuarial Factors, and

2. an amount equal to the present value of the Participant's Accrued Frozen Benefit determined as of December 31, 2001 using a 6.5% discount rate and the 1983 Group Annuity (unisex) Mortality Table (50% male, 50% female), assuming the Accrued Frozen Benefit otherwise payable at the Schedule A Normal Retirement Age would commence at the later of the Participant's attained age at December 31, 2001 or age 60 and credited with 6.5% interest for each Plan Year subsequent to December 31, 2001 during which the Participant is a Participant, whether or not such Participant is an Eligible Employee during such Plan Year.

With respect to a Participant's lump sum value determined under subparagraph 1. above, if the Participant's Pension Starting Date occurs on or after his or her 50^{th} birthday, the actuarial equivalent of the Participant's Accrued Frozen Benefit shall reflect the post retirement adjustments, if any, defined in Paragraph 3.C of this Schedule.

4. OPTIONAL FORMS OF BENEFIT PAYABLE UPON RETIREMENT

In lieu of the forms of benefit available under Section 7.2 of the Plan, a Participant may elect to have the portion of his or her Accrued Benefit attributable to his or her Accrued Frozen Benefit paid in the following forms, subject to Section 7.4 (relating to election and waiver procedures):

A. Optional Qualified Joint and Survivor Annuity : A Participant who is married on the Participant's Pension Starting Date may elect to receive a Qualified Joint and

Survivor Annuity described in Section 7.2(b) of the Plan (relating to manner of distribution with respect to married Participants) with the portion of the Pension payable to the Participant's Spouse that is attributable to the Participant's Accrued Frozen Benefit of a percentage less than 50 of the Pension the Participant would have received if the Participant's Pension attributable to his or her Accrued Frozen Benefit were payable in the form of a single-life annuity for the Participant's lifetime. A Qualified Joint and Survivor Annuity described in this paragraph shall be payable at the same time and in the same manner as described in Section 7.2(b) of the Plan (relating to manner of distribution with respect to married Participant) and shall be computed in the same manner as described in Section 3.B. of this Schedule (relating to special rules regarding computation of benefits), except that the lesser percentage of Pension designated by the Participant shall be used.

B. Family Pension: A Participant who is not married on the Participant's Pension Starting Date and who, as of such date, has a Dependent Minor Child or Dependent Minor Children may elect to receive his or her Accrued Frozen Benefit in the form of a family pension payable in monthly payments for the Participant's lifetime and, thereafter, payable in monthly payments in equal shares to each of the Participant's Dependent Minor Children who have not yet attained age 21. The annual amount of the family pension payable to the Participant shall be the annual Accrued Frozen Benefit the Participant would have received if the Participant's Pension were payable in the form of a single life annuity for the Participant's lifetime, reduced by the product of (1) the annual amount of the family pension designated by the Participant for the Participant's surviving Dependent Minor Child or Children which amount shall be a percentage, not to exceed 50, of the annual amount of the Participant's Pension payable in the form of a single life annuity for the Participant's lifetime multiplied by (2) (i) if the Participant is at least age 50 on his or her Pension Starting Date, the applicable factor set forth in Table E or (ii) if the Participant is not at least age 50 on his or her Pension Starting Date, the applicable factor determined by using the Schedule A Actuarial Factors. The annual amount of the family pension payable after the Participant's death to the Participant's Dependent Minor Child or Children who have not yet attained age 21 shall equal the percentage designated by the Participant, not to exceed 50, of the annual amount of the Pension the Participant would have received if the Participant's Pension were payable in the form of a single life annuity for the Participant's lifetime.

C. Surviving Dependent's Pension: A Participant who is not married on the Participant's Pension Starting Date and who, as of such date, has a Dependent Disabled Child or Dependent Disabled Children may elect to receive his or her Accrued Frozen Benefit in the form of a surviving dependent's pension payable in monthly payments for the Participant's lifetime and, thereafter, payable in monthly payments in equal shares to each of the Participant's Dependent Disabled Children who remain disabled. The annual amount of the surviving dependent's pension payable to the Participant shall be the annual Accrued Frozen Benefit the Participant would have received if the Participant's Pension were payable in the form of a single life annuity for the Participant's lifetime, reduced by the product of (1) the annual amount of the surviving dependent's pension designated by the Participant for the Participant's Dependent Disabled Child or Children, which amount shall be a percentage, not to exceed 50, of the annual amount of the Participant's Pension payable in the form of a single life annuity for the Participant's lifetime multiplied by (2) (i) if the Participant is at least age 50 on his or her Pension Starting Date, 50% of the applicable factor set forth in Table D, such factor to be determined based on the age of the other parent of such Child or Children, at the Participant's Pension Starting Date or the age such other parent would have attained had such other parent survived or if, in either case, the age of such other parent cannot be determined, the age of the Participant or (ii) if the Participant is not at least age 50 on his or her Pension Starting Date, the applicable factor determined by using the Schedule A Actuarial Factors. The annual amount of the surviving dependent's pension payable after the Participant's death to the Participant's Dependent Disabled Child or Children who remain disabled shall equal the percentage designated by the Participant, not to exceed 50, of the annual amount of the Pension the Participant would have received if the Participant's Pension were payable in the form of a single life annuity for the Participant's lifetime.

D. 75% Marital Annuity: A Participant who is married on the Participant's Annuity Starting Date may elect to receive a 75% marital annuity with a Service Annuity payable to the Participant's Spouse, if the Participant predeceases such Spouse, of a percentage equal to 75 of the Service Annuity the Participant would have received under Article 5 (relating to Service Annuities) if the Participant's Service Annuity were payable in semi-monthly payments for the Participant's lifetime. A 75% marital annuity described in this Section 6.2 shall be payable at the same time and in the same manner as described in paragraph (b) of Section 6.1 (relating to annuities payable to married Participants) and shall be the actuarial equivalent of the Service Annuity the Participant would have received under Article 5 (relating to Service Annuities), determined by using the annual interest rate specified under section 417(e) of the Code for the November preceding the calendar year in which such distribution is made or commences, and the mortality table prescribed for purposes of section 417(e)(3)(A)(ii)(I) of the Code.

Table B1
Early Retirement Service Factors
Applicable Monthly Payments to Age 65

For purposes of Schedule A, in the case of a Pension commencing after a Participant's Early Retirement Date but prior to his or her Schedule A Normal Retirement Age, the following factors shall be applied to determine the reductions applicable to the benefit accrued while a Participant is not a member of IBEW Local Union 15 and, for purposes of Schedule B, in the case of a Pension commencing after a Participant's Early Retirement Date but prior to his or her Schedule B Normal Retirement Age, the following factors shall be applied to determine the reductions applicable to the Participant's benefit accrued under the PECO Plan*:

AGE	0	1	2	3	4	5	6	7	8	9	10	11
50	.7200	.7225	.7250	.7275	.7300	.7325	.7350	.7375	.7400	.7425	.7450	.7475
51	.7500	.7525	.7550	.7575	.7600	.7625	.7650	.7675	.7700	.7725	.7750	.7775
52	.7800	.7825	.7850	.7875	.7900	.7925	.7950	.7975	.8000	.8025	.8050	.8075
53	.8100	.8125	.8150	.8175	.8200	.8225	.8250	.8275	.8300	.8325	.8350	.8375
54	.8400	.8425	.8450	.8475	.8500	.8525	.8550	.8575	.8600	.8625	.8650	.8675

NOTE: EMPLOYEES MUST HAVE 5 YEARS OF SERVICE TO QUALIFY FOR VESTING

SCHEDULE INDICATES PERCENTAGE OF VESTED BENEFIT PAYABLE
INTERPOLATION WILL BE MADE TO THE NEAREST MONTH

SCHEDULE B

**PROVISIONS APPLICABLE TO
ACCRUED FROZEN BENEFIT
UNDER THE SERVICE ANNUITY PLAN
OF PECO ENERGY COMPANY**

1. APPLICATION

This Schedule shall apply only to a Participant who elects to participate in the Plan pursuant to Section 3.1(b) of the Plan (relating to eligibility for participation for employees other than new hires) or Section 9.1 of the Plan (relating to recommencement of employment by terminated employee) and whose accrued benefit under the PECO Plan is transferred to the Plan pursuant to Section 3.1(c) of the Plan (relating to transfer of benefits and assets to Plan) or Section 9.1 of the Plan. The provisions of this Schedule shall govern with respect to all matters relating to such a Participant's Accrued Frozen Benefit.

2. DEFINED TERMS

For purposes of this Schedule B, capitalized terms used herein shall have their respective meanings set forth in the Plan, except that the following words and phrases shall have the following respective meanings when capitalized unless the context clearly indicates otherwise:

A. Accrued Frozen Benefit. The amount payable with respect to a Participant's accrued benefit under the PECO Plan determined as of December 31, 2001 commencing on the first day of the month coinciding with or next following a Participant's Schedule B Normal Retirement Age, determined as if such amount were payable in the form of a single life annuity for the life of the Participant.

B. Benefit Years. For periods prior to January 1, 2002, a Participant's Benefit Years includes the Participant's "benefit years" as of the date he or she becomes a Participant, determined in accordance with the provisions of the PECO Plan as in effect on December 31, 2001. For the Participant's 12 month "benefit accrual computation period" (as defined in the PECO Plan) that ends during the 2002 Plan Year, the greater of (i) the Vesting Service, for such period, determined pursuant to subdivision (47) of Article 2 of the Plan (relating to definition of Vesting Service) and (ii) the "benefit years", for such period, determined pursuant to the terms of the PECO Plan as in effect on December 31, 2001. For periods after the 12 month period described in the preceding sentence, a Participant's Benefit Years shall equal his or her Vesting Service for such periods.

C. Early Retirement Date. The date on which a Participant completes at least ten years of Vesting Service and attains at least age 50.

D. Schedule B Actuarial Factors. An interest rate assumption of seven percent and a mortality assumption of the TPF&C mortality table in effect as of the date a determination hereunder occurs set back one year for participants and five years for beneficiaries.

E. Schedule B Normal Retirement Age. A Participant's 65th birthday.

3. SPECIAL RULES REGARDING COMPUTATION OF BENEFIT

A. Factors to Calculate Pension Paid Before Schedule B Normal Retirement Age

1. Pension Starting Date on or After Early Retirement Date and Prior to Schedule B Normal Retirement Age. The Pension attributable to the Accrued Frozen Benefit of a Participant whose Termination of Employment occurs on or after his or her Early Retirement Date and whose Pension commences prior to his or her Schedule B Normal Retirement Age shall be computed by multiplying such Participant's Accrued Frozen Benefit by the applicable factor from Table B-1.

2. Pension Starting Date After Attainment of Age 50 but Prior to Early Retirement Date. The Pension attributable to the Accrued Frozen Benefit of a Participant whose Pension Starting Date occurs on or after such Participant's attainment of age 50 but prior to such Participant's attainment of his or her Early Retirement Date and whose Pension commences prior to his or her Schedule B Normal Retirement Age shall be computed by multiplying such Participant's Accrued Frozen Benefit by the applicable factor from Table G.

3. Pension Starting Date Prior to Attainment of Age 50. The amount determined by actuarially reducing the Participant's Accrued Frozen Benefit using the factors in Table G to reduce the Accrued Frozen Benefit from age 65 to age 50 and using the Schedule B Actuarial Factors to reduce the Accrued Frozen Benefit from age 50 to the Participant's Pension Starting Date.

B. Lump Sum Value. If a Participant elects to receive his or her Accrued Frozen Benefit in the form of a lump sum distribution as described in Option 2 of Section 7.2(c) of the Plan, the amount of the lump sum attributable to the Participant's Accrued Frozen Benefit shall be the greater of:

1. the actuarial equivalent of the Participant's Accrued Frozen Benefit using the Schedule B Actuarial Factors, and
2. an amount equal to the present value of the Participant's Accrued Frozen Benefit determined as of December 31, 2001 using a 6.5% discount rate and the 1983 Group Annuity (unisex) Mortality Table (50% male, 50% female), assuming the Accrued Frozen Benefit otherwise payable at the Schedule B Normal Retirement Age would commence at the later of the Participant's attained age at December 31, 2001 or age 60 (or, effective January 1, 2002, age 59 for Craft, Craft/Technical, Technical Support and Professional Support Employees with an Accrued Frozen Benefit) and credited with 6.5% for each Plan Year subsequent to December 31, 2001 during which the Participant is a Participant, whether or not such Participant is an Eligible Employee during such Plan Year.

4. OPTIONAL FORMS OF BENEFIT PAYABLE UPON RETIREMENT

In lieu of the optional forms of benefit available under Section 7.2(c) of the Plan, a Participant may elect to have the portion of his or her Accrued Benefit attributable to his or her Accrued Frozen Benefit paid in the following form, subject to Section 7.4 (relating to election and waiver procedures):

A. Contingent Annuity Option: A Participant (each, an "Eligible Participant") who has a Termination of Employment after he or she (1) has completed at least 14 Benefit Years, or (2) has attained age 65 and has completed at least 5 Benefit Years, or (3) has attained his or her Early Retirement Date may elect a contingent annuity option under which the Participant may designate a percentage equal to 25%, 50%, 75% or 100% of his or her Pension to be paid upon his or her death to a contingent Beneficiary designated by such Participant. The annuity otherwise payable to a Participant electing a Contingent Annuity Option or to his or her contingent Beneficiary will be actuarially reduced using the Schedule B Actuarial Factors to reflect the payments which may become payable to the Beneficiary. Notwithstanding the preceding sentence, if the Participant's Spouse is designated as the contingent Beneficiary, the actuarial reduction will not reflect the cost of a joint and survivor annuity option providing a survivor annuity to the Participant's Spouse of

(1) 50% of the amount payable to the Participant, if a 50%, 75% or 100% contingent annuity option is elected, or (2) 25% of the amount payable to the Participant, if a 25% contingent annuity option is elected; provided, however, that the subsidy described in this sentence shall not apply to a former spouse who is to be treated as a Participant's spouse pursuant to a qualified domestic relations order, unless the qualified domestic relations order specifically provides that such subsidy applies to the former spouse. If the contingent Beneficiary is other than the Spouse, the percentage payable to the contingent Beneficiary after the Participant's death may not exceed the applicable percentage from Appendix B. The contingent annuity option of an electing Participant who has a Termination of Employment before he or she attains his or her Early Retirement Date shall be canceled.

SCHEDULE C
PROVISIONS APPLICABLE TO
ACCRUED FROZEN BENEFIT
UNDER THE CASH BALANCE PROVISIONS
OF THE TXU RETIREMENT PLAN

1. APPLICATION

This Schedule C shall apply only to a Participant who, immediately prior to becoming a Participant, was a participant in the TXU Retirement Plan (the "TXU Plan"). The provisions of this Schedule C shall govern with respect to all matters relating to such a Participant's Cash Balance Account that is attributable to the Participant's accrued benefit under the TXU Plan.

2. DEFINED TERMS

For purposes of this Schedule C, capitalized terms used herein shall have their respective meanings set forth in the Plan, except that the following words and phrases shall have the following respective meanings when capitalized unless the context clearly indicates otherwise:

A. Accrued Frozen Benefit. The amount payable with respect to a Participant's accrued benefit under the TXU Plan determined as of the date such Participant became a Participant commencing on the first day of the month coinciding with or next following a Participant's Schedule C Normal Retirement Age, determined as if such amount were payable in the form of a single life annuity for the life of the Participant.

B. Accredited Service. A Participant's Accredited Service includes the Participant's "Accredited Service" as of the date he or she becomes a Participant, determined in accordance with the provisions of the TXU Plan as in effect on such date, and the number of years and full calendar months of service beginning on the date the Participant becomes a Participant and ending on the Participant's Severance from Service Date (as defined below) but not to exceed, in the aggregate, a maximum of 40 years. A Participant's Severance from Service is the earlier of the first day of the month coincident with or next following the date on which an Employee quits, retires or is discharged or dies, or the first day of the month coincident with or next following the first anniversary of the first day of absence for any other reason. Severance from Service shall not occur if an Employee leaves the employ of an Employer and is eligible for disability benefits as defined in and determined under the TXU Corp. Employee Long-Term Disability Income Plan (or any successor plan), so long as such Employee remains eligible for disability benefits. Accredited Service shall not include any Period of Service for which the Accrued Frozen Benefit has been settled by a cash payment, unless, within the latter of: (a) 5 years of reemployment, or (b) 5 consecutive one-year breaks in service, the full cash payment is repaid together with interest at the annual compound rate of interest as may be specified by law from the date of the cash payment to the date of repayment.

C. Earlier Than Normal Retirement Date. The date on which a Participant attains age 55 and completes at least 15 years of Accredited Service.

D. Schedule C Actuarial Factors. With respect to the computation of lump sum benefit payments, the mortality table prescribed in Revenue Ruling 2001-62 and an interest rate equal to the annual rate on 30-year U.S. Treasury securities for the month of November prior to the Plan Year for which the lump sum payment is being determined. With respect to the computation of monthly benefit payments, a unisex rate taken from the 1983 Group Annuity Mortality Table weighted to reflect a fixed blend of 85% males and 15% females and interest rate equal to 8%.

E. Schedule C Normal Retirement Age. Age 65.

3. SPECIAL RULES REGARDING COMPUTATION OF BENEFIT

A. Factors to Calculate Pension Paid Before Schedule C Normal Retirement Age

1. Pension Starting Date on or After the Earlier Than Normal Retirement Date and Attainment of Age 62, but Prior to Schedule C Normal Retirement Age. The Pension attributable to the Accrued Frozen Benefit of a Participant whose Termination of Employment occurs on or after his or her Earlier Than Normal Retirement Date and whose Pension commences after his or her attainment of age 62, but prior to his or her Schedule C Normal Retirement Age shall be such Participant's Accrued Frozen Benefit without any actuarial reduction.

2. Pension Starting Date on or After the Earlier Than Normal Retirement Date and Prior to Attainment of Age 62. The Pension attributable to the Accrued Frozen Benefit of a Participant whose Termination of Employment occurs on or after his or her Earlier Than Normal Retirement Date and whose Pension commences before his or her attainment of age 62 shall be such Participant's Accrued Frozen Benefit reduced at the annual rate of 4% for each of the years and full calendar months (taken as twelfths of a year) by which his Earlier Than Normal Retirement Date precedes the first day of the month coincident with or next following his 62nd birthday.

3. Pension Starting Date Prior to the Earlier Than Normal Retirement Date. The Pension attributable to the Accrued Frozen Benefit of a Participant whose Termination of Employment occurs prior to his or her Earlier than Normal Retirement Date shall be the Participant's Accrued Frozen Benefit reduced at the annual rate of 4% for each of the years and full calendar months (taken as twelfths of a year) to the greater of his age as of his Pension Starting Date or age 55 and further reduced (if applicable) on an actuarial basis from age 55 to the Participant's Pension Starting Date.

B. Lump Sum Value. If a Participant elects to receive his or her Accrued Frozen Benefit in the form of a lump sum distribution as described in Option 2 of Section 7.2(c) of the Plan, the amount of the lump sum attributable to the Participant's Accrued Frozen Benefit shall be the greater of:

1. the lump sum actuarial equivalent of the Participant's Accrued Frozen Benefit determined using the Schedule C Actuarial Factors, and

2. an amount equal to the present value of the Participant's Accrued Frozen Benefit determined as the date the Participant became a Participant in the Plan using a 6.75% discount rate and the 1983 Group Annuity (unisex) Mortality Table (50% male, 50% female). assuming the Accrued Frozen Benefit otherwise payable at the Schedule C Normal Retirement Age would commence at the later of the Participant's attained age as of the date the Participant became a Participant in the Plan or age 62.

4. OPTIONAL FORMS OF BENEFIT PAYABLE UPON RETIREMENT

In lieu of the forms of benefit available under Section 7.2 of the Plan, a Participant may elect to have the portion of his or her Accrued Benefit attributable to his or her Accrued Frozen Benefit paid in the following forms, subject to Section 7.4 (relating to election and waiver procedures):

A. Ten- Year Certain Option: A Participant may elect to receive his or her Accrued Frozen Benefit in the form of a reduced amount which is the Actuarial Equivalent, determined using the Schedule C Actuarial Assumptions, of his or her Accrued Frozen Benefit during his or her lifetime and, in the event of the Participant's death prior to the expiration of ten years following his or her Pension Starting Date, such Accrued Frozen Benefit shall continue for any unexpired portion of such ten-year period to his designated Beneficiary or Beneficiaries. Subject to Section 7.4, the Participant shall have the right to change or redesignate his or her Beneficiary or successive Beneficiaries at any time prior to the expiration of the ten-year period described above. If the Beneficiary or successive Beneficiaries shall survive the retired Participant but die prior to the expiration of the ten-year period described above, the commuted value of the remaining payments due the Beneficiaries shall be paid to the estate of such Beneficiaries. If the Participant shall die within the ten-year period described above without any surviving designated Beneficiary, the commuted value of the payments which would otherwise have been paid during the remaining portion of said ten-year period shall be paid by the Trustee at the direction of the Administrator (i) to the surviving Spouse of such deceased Participant, if any, or (ii) if there shall be no surviving Spouse, to the surviving children of such deceased Participant, if any, in equal shares, or (iii) if there shall be no surviving Spouse or surviving children, to the executor or administrator of the estate of such deceased Participant, or (iv) if no executor or administrator shall have been appointed for the estate of such deceased Participant within six months following the date of the Participant's death, in equal shares to the person or persons who would be entitled under the intestate succession laws of the state of the Participant's domicile to receive the Participant's personal estate.

B. Social Security Adjustment Option: A Participant whose Pension Starting Date occurs after his or her Earlier Than Normal Retirement Date and prior to his or her attainment of age 62 may elect, at any time prior to his or Earlier Than Normal Retirement Date, to have the amount of his or her Accrued Frozen Benefit increased during the period prior to becoming eligible to receive monthly benefits under the Social Security Act, and decreased during the period after becoming eligible to receive monthly benefits under the Social Security Act, so as to provide for the Participant an essentially uniform total retirement benefit composed of his Accrued Frozen Benefit and monthly benefits under the Social Security Act. For purposes of this optional form of benefit, the monthly benefits under the Social Security Act shall mean the old age insurance benefit that a Participant might be entitled to receive at the earliest age the Participant will be eligible to begin receiving monthly benefit under the Social Security Act as of the date he or she elects this optional form of benefit and the Accrued Frozen Benefit shall not be adjusted because of any subsequent change in the actual monthly benefits received under the Social Security Act. If the Participant elects the Social Security Adjustment Option, his or her Accrued Frozen Benefit shall be the greater of (i) the Accrued Frozen Benefit reduced as described in Paragraph 3.A.2 of this Schedule C and applying the Schedule C Actuarial Assumptions for computing monthly benefit payments; and (ii) the Accrued Frozen Benefit actuarially reduced to the Participant's age at retirement and converted to the Social Security Adjustment Option applying the Schedule C Actuarial Assumptions for calculating lump sum benefit payments.

Exhibit 10.21

EXELON CORPORATION
SENIOR MANAGEMENT
SEVERANCE PLAN
(As Amended and Restated)

EXELON CORPORATION
SENIOR MANAGEMENT SEVERANCE PLAN
(As Amended and Restated)

1. PURPOSE OF THE PLAN

The Exelon Corporation Senior Management Severance Plan, as amended and restated herein (the " Plan"), is effective as of April 1, 2013 (the "Effective Date") except as otherwise specifically provided herein, and supersedes in its entirety all prior versions of the Plan with respect to terminations of employment occurring any time on or after the Effective Date (or such other date as set forth herein). The Plan provides severance benefits to eligible executives of Exelon Corporation ("Exelon") and its subsidiaries of which Exelon owns at least 80% of the outstanding voting power that are designated by the Plan Administrator as participating employers in the Plan (Exelon and such subsidiaries jointly and severally referred to as the " Company") who submit a Notice of Termination or who are notified of their termination of employment on or after the Effective Date (or such other date as set forth herein), and to provide additional protection in the event of a Change in Control of Exelon or an Imminent Control Change of Exelon.

2. ELIGIBILITY

2.1. Eligibility in General. Subject to the remaining provisions of this Section 2.1, eligibility to participate in the Plan is limited to each employee of the Company whose position is in Salary Band E09 (or equivalent executive grade) or above (an " Executive") who executes and returns to the Company by the later of 90 days after becoming an Executive, or 90 days after delivery thereof to the Executive, non-competition, non-solicitation, confidential information and intellectual property covenants (" Restrictive Covenants") which are acceptable to Exelon and are either substantially in the form attached hereto and made a part hereof as Exhibit I (as may be modified from time to time by Exelon in its sole discretion) or set forth in another agreement between the Company and the Executive. Notwithstanding any provision of the Plan to the contrary, eligibility for benefits under the Plan shall be subject to the provisions of any agreement (including but not limited to an offer of employment or grant instrument) between an Executive and the Company providing that that such Executive would be ineligible for (or waives) all or a portion of the benefits under the Plan or "change in control" benefits in the event of a termination of employment, or under which the Executive had agreed, prior to the Applicable Trigger Date, to terminate his or her employment.

2.2. Eligibility Under Section 4. Subject to Section 2.1, each Executive shall be eligible for the benefits provided under Section 4 hereof in the event such Executive has a Termination of Employment; provided, however, that any Executive whose Termination of Employment is covered under Section 5 hereof or a change in control agreement entered into between such Executive and the Company (an " Individual Change in Control Agreement"), or who is an interim employee separating under the change in control provisions of another severance plan, shall not be eligible for benefits under Section 4, except as expressly provided in Section 5 or such Individual Change in Control Agreement (which expressly refers to the benefits under Section 4 of this Plan).

2.3. Eligibility Under Section 5. Eligibility for the benefits provided under Section 5 hereof due to a Termination of Employment during a Post-Change Period or an Imminent Control Change Period shall be subject to Section 2.1, and shall be limited to persons who are Executives immediately prior to the Applicable Trigger Date and who are not subject to Individual Change in Control Agreements.

3. **PARTICIPATION**

Each eligible Executive shall become a participant in the Plan ("Participant") upon his or her execution of a separation agreement with the Company in such form as the Company, in its sole discretion, shall require or permit (the "Severance Agreement"), provided such Severance Agreement is executed not later than 45 days after the Executive's Termination Date. Notwithstanding anything herein to the contrary, each Executive shall also be required to execute, not later than 45 days after the Executive's Termination Date, a waiver and release of claims against the Company ("Waiver and Release") which is substantially in the form attached hereto and made a part hereof as Exhibit II, as may from time to time be modified by the Company in its sole discretion. Such Waiver and Release shall also include, with respect to an executive who was employed by Constellation Energy Group, Inc., or its subsidiary or affiliate (collectively, "Constellation") immediately prior to March 12, 2012, a release of any and all claims for additional severance, incentive and change in control payments or benefits of any kind (other than any previous vesting of equity awards). An Executive's right to the payments and benefits under this Plan shall be contingent upon (a) Executive having timely executed and delivered to the Company the Severance Agreement, Waiver and Release and Restrictive Covenants, (b) Executive not revoking the Waiver and Release and (c) Executive not violating any of Executive's on-going obligations under the Plan, the Waiver and Release and the Restrictive Covenants. To the extent that the Company makes payments and provides benefits to an Executive prior to receipt of the Waiver and Release and/or the expiration of the revocation period and the Executive either does not timely execute and deliver the Waiver and Release to the Company or revokes the Waiver and Release in accordance with its terms, Executive shall pay to the Company within 10 days following the expiration of the 45-day consideration period or the date such release was revoked, a lump sum payment of all payments and the value of all benefits received by Executive to date hereunder.

4. **BENEFITS**

A Participant described in Section 2.2 shall be entitled to all Accrued Obligations and, subject to Section 6, benefits pursuant to this Section 4 upon the Participant's Termination of Employment.

4.1. Severance Pay.

(a) In General. Each Participant other than a Participant described in Section 4.1(b) shall receive severance pay at a monthly rate equal to 1/12 of the sum of (a) the Participant's annual base salary in effect as of the date of Termination of Employment, plus, if the Executive is a participant in the Annual Incentive Award Plan with respect to the year in which the Termination Date occurs, (b) the Severance Incentive. Subject to Section 13.13 below, payment shall be made in regular payroll installments for the duration of the applicable Salary Continuation Period, as indicated below, commencing no later than the second paydate which occurs after the Participant's Termination Date. Payment will be made in accordance with the Company's normal payroll practices, net of applicable taxes and other deductions.

Participant Level	Salary Continuation Period
Senior Executive Management	24 months
Senior Vice Presidents of Exelon	18 months
Other Executives	15 months

(b) Participants Employed for Less Than Two Years. Each Participant who has been continuously employed by the Company for less than twenty-four months as of the Participant's Termination Date shall receive severance pay at a monthly rate equal to 1/12 of the Participant's annual base salary in effect as of the Termination Date. Subject to Section 13.13 below, payment shall be made in regular payroll installments for the duration of the applicable Salary Continuation Period, as indicated below, commencing no later than the second paydate which occurs after the Participant's Termination Date. Payment will be made in accordance with the Company's normal payroll practices, net of applicable taxes and other deductions.

Participant Level	Salary Continuation Period
Senior Executive Management	18 months (12 months if employed < 12 months)
Other Executives	12 months (6 months if employed < 12 months)

4.2. Annual Incentive Awards. Each Participant who is a participant in the Annual Incentive Award Plan for the year in which the Termination Date occurs shall receive an Annual Incentive which shall be prorated by multiplying the amount of such Annual Incentive by a fraction the numerator of which is the number of days elapsed during such year as of the Participant's Termination Date and the number of days in the year in which Termination Date occurs. Payment of Annual

Incentives under this Section 4.2 shall be made in a lump sum net of applicable taxes and other deductions at the time awards under the Annual Incentive Award Plan are paid to active employees for such performance period (but not later than March 15 of the year following the last day of such performance period), and shall be considered a "short-term deferral" within the meaning of Section 409A of the Code. A Participant who is not a participant in the Annual Incentive Award Plan for the year in which the Termination Date occurs shall not be entitled to an Annual Incentive, and the amount (if any) payable under any other Incentive Plan for such year shall be determined by the Company in its sole discretion.

4.3. Stock Options. No Participant shall be entitled to participate in any new grants of Stock Options (as defined in Section 5.1(b)) made after such Participant's notification of his or her Termination of Employment. Except as provided below, any Stock Options previously granted to the Participant shall be exercisable only to the extent such Stock Options are exercisable as of the date of such Participant's Termination Date and shall thereafter be exercised in accordance with the provisions of the LTIP. Stock Options which remain unexercisable as of the Participant's Termination Date shall be forfeited. Notwithstanding the preceding, if, as of the last day of the Salary Continuation Period, such Participant has attained at least age 50 (age 55 with respect to Stock Options granted on or after January 1, 2013) and completed at least 10 years of service as defined under the tax-qualified defined benefit plan maintained by Exelon in which the Executive is a participant (the " Pension Plan") or SERP, then any Stock Options granted to such Participant which have not become exercisable prior to the Participant's Termination Date shall (i) become fully vested, and (ii) remain exercisable until the fifth anniversary of the Termination Date or, if earlier, the option expiration date, provided that this Section 4.3 shall not limit the right of the Company to cancel the Stock Options in connection with a corporate transaction pursuant to the terms of the LTIP.

4.4. Other Awards. Awards of Performance Shares, Restricted Stock (as defined in Sections 5.1(c) and 5.1(d), respectively) and/or Cash Performance Awards, as applicable, shall be payable to a Participant solely to the extent provided under the terms of such awards and the applicable plan under which such awards are granted; provided, however, that to the extent the Company determines that a Participant is a Specified Employee and that any such payment is deferred compensation, each within the meaning of Section 409A of the Code, such payment shall not be made prior to the earlier to occur of (i) the six-month anniversary of the Termination Date or (ii) the date of the Participant's death.

4.5. Health Care Coverage. During the Salary Continuation Period, a Participant (and his or her dependents) shall be eligible to participate in the health care plans under which they were covered immediately prior to his or her Termination of Employment, in accordance with and subject to the terms and conditions of such plans as in effect from time to time. The Participant's out of pocket costs (including premiums, deductibles and co-payments) for such coverage shall be the same as that in effect from time to time for active peer employees during such period. Coverage under this Paragraph 4.5 shall be provided for the duration of the Salary Continuation Period in lieu of continuation coverage under Section 4980B of the Code and Section 601 to 609 of ERISA (" COBRA") for the same period. At the end of the Salary Continuation Period, COBRA continuation coverage may be elected for the remaining balance of the statutory coverage period, if any; provided, however that a Participant who, as of the last day of the Salary Continuation Period, has attained at least age 50 and completed at least 10 years of service (or who has completed such other age and service requirement then in effect under the Exelon Corporation Severance Benefit Plan or any successor plan as of the relevant time set forth in such plan) under the terms of the Pension Plan (or who, pursuant to the terms of an offer of employment or employment agreement or under any provision of the Pension Plan or SERP, is credited with a number of additional years of age and/or service that would enable such Participant to satisfy the above eligibility requirements) shall be entitled to elect such Company group health care programs for retirees as are in effect as of the Termination Date and are applicable to such Participant by the programs' eligibility terms and conditions as though such Participant had attained such programs' age and service requirements. The eligibility for coverage and availability of programs or plans, the amounts charged for coverage, and the other terms, conditions and limitations under the Company's group health care programs or plans shall remain subject to the Company's right to amend, change or terminate such programs or plans at any time.

4.6. SERP / Other Deferred Compensation. For purposes of the Participant's SERP benefit, the Salary Continuation Period shall be taken into account as service solely for purposes of determining whether the Participant is vested (i.e., 3 or 5 years of service) and, to the extent relevant under the Pension Plan covering the Participant, the amount of the Participant's regular accrued benefit, but not for purposes of determining eligibility for early retirement benefits (including any social security supplement) or any other purpose. In determining the amount of the Participant's vested benefit, if any, the severance payments made under Section 4.1 shall be taken into account as if such payments were normal base salary and incentive payments. Payment shall be made in accordance with the SERP and the Participant's distribution election in effect thereunder as of the Termination Date (or, if no affirmative election is in effect as of such date, the default election applicable to the Participant). All amounts previously deferred by, or accrued to the benefit of, such Participant under the Exelon Corporation Deferred Compensation Plan, the Exelon Corporation Stock Deferral Plan or the Constellation Energy Group, Inc. Nonqualified Deferred Compensation Plan shall, to the extent vested, be paid in accordance with the Participant's distribution election in effect thereunder as of the Termination Date (or, if no affirmative election is in effect as of such date, the default election applicable to the Participant).

4.7. Life Insurance and Disability Coverage. A Participant shall be eligible for continued coverage under the applicable life insurance and long term disability plans sponsored by the Company (or other equivalent coverage or benefits) shall be extended to each Participant through the last day of the Salary Continuation Period applicable to such Participant on the same terms and subject to the same terms and conditions as are applicable to active peer employees (including, without limitation, submission of proof by an Executive who seeks long term disability benefits that such Executive would have satisfied the conditions for such benefits had the Executive been an employee during the Salary Continuation Period and terminated employment on or before the last day of such period).

4.8. Executive Perquisites. Executive perquisites shall terminate effective as of the Participant's Termination Date, and any Company-owned property shall be required to be returned to the Company no later than such date.

4.9. Outplacement Services. Each Participant shall be entitled to outplacement services at the expense of the Company for twelve months and subject to such terms and conditions as the Plan Administrator, in its sole discretion, determines are appropriate. No cash shall be paid in lieu of such fees and costs.

4.10. Restrictions on In-Kind Benefits. The in-kind benefits provided under each of Sections 4.5, 4.7 and 4.8 during any calendar year shall not affect the benefits to be provided under such section in any subsequent calendar year. The right to such benefits shall not be subject to liquidation or exchange for any other benefit

4.11. Other Coverage. Notwithstanding the foregoing, if such Participant is eligible to obtain a specific type of coverage under welfare plan(s) sponsored by another employer of such Participant (e.g. medical, prescription, vision, dental, disability, individual life insurance benefits, group life insurance benefits, but excluding for the purposes of this sentence retiree benefits if such Participant is so eligible), then the Company shall not be obligated to provide any such specific type of coverage. The Participant shall promptly notify the Plan Administrator of any such coverage.

5. CHANGE IN CONTROL BENEFITS

A Participant described in Section 2.3 shall be entitled to all Accrued Obligations and, subject to Section 6, benefits pursuant to this Section 5 if such a Participant has a Termination of Employment during a Post-Change Period or Imminent Control Change Period, and such Participant shall not be eligible for benefits under Section 4 unless so expressly provided in this Section 5.

5.1. Termination During a Post-Change Period. If, during a Post-Change Period, an eligible Executive has a Termination of Employment and becomes a Participant, the Company's sole obligations under Section 4 and Sections 5.1 and 5.2 shall be as set forth in this Section 5.1 (subject to Sections 5.3, 5.5, 5.6 and 6.0.

(a) Severance Payments. The Company shall pay or provide (or cause to be provided) to such Participant, according to the payment terms set forth in Section 5.3 below, the following:

(i) Annual Incentive for Year of Termination. An amount equal to the Annual Incentive applicable to such Participant under the Incentive Plan for the performance period in which the Termination Date occurs;

(ii) Deferred Compensation and Non-Qualified Defined Contribution Plans . All amounts previously deferred by, or accrued to the benefit of, such Participant under the Exelon Corporation Deferred Compensation Plan, the Exelon Corporation Stock Deferral Plan or the Constellation Energy Group Inc. Deferred Compensation Plan, any successor plan, or under any other non-qualified defined contribution or deferred compensation plan of the Company, whether vested or non-vested, together with any accrued earnings thereon, to the extent that such amounts and earnings have not been previously paid by the Company and are not provided under the terms of any such non-qualified plan;

(iii) SERP Enhancement. An amount payable under the SERP equal to the positive difference, if any, between:

(1) the lump sum value of such Participant's benefit, if any, under the SERP, calculated as if such Participant had:

(a) become fully vested in all Pension Plan and SERP benefits,

(b) to the extent age is relevant under the Pension Plan covering the Participant, attained as of the Termination Date an age that is two years greater than such Participant's actual age and that includes the number of years of age credited to such Participant pursuant to any other agreement between the Company and such Participant,

(c) to the extent service is relevant under the Pension Plan covering the Participant, accrued a number of years of service (for purposes of determining the amount of such benefits, entitlement to—but not commencement of—early retirement benefits, and all other purposes of the Pension Plan and SERP) that is two years greater than the number of years of service actually accrued by such Participant as of the Termination Date and that includes the number of years of service credited to such Participant pursuant to any other agreement between the Company and such Participant, and

(d) received the severance benefits specified in Sections 5.1(a)(i) and 5.1(a)(v) as covered compensation in regular installments during the Severance Period, minus

(2) the aggregate amounts paid or payable to such Participant under the SERP;

(iv) Non-vested Benefits Under Pension Plan. An amount equal to the actuarial equivalent present value of any non-vested portion of such Participant's accrued benefit under the Pension Plan as of the Termination Date and forfeited by such Participant by reason of the Termination of Employment; and

(v) Multiple of Salary and Severance Incentive. An amount equal to two (2) times the sum of (x) the Participant's Base Salary plus, if the Participant is a participant in the Annual Incentive Award Plan for the year in which the Termination Date occurs, (y) the Severance Incentive, net of applicable taxes and other deductions.

(b) Stock Options. Each of such Participant's stock options granted under the LTIP ("Stock Options") shall (i) become fully vested, and (ii) remain exercisable until the fifth anniversary of the Termination Date or, if earlier, the expiration date of any such Stock Option, provided that this Section 5.1(b) shall not limit the right of the Company to cancel the Stock Options in connection with a corporate transaction pursuant to the terms of the LTIP.

(c) Performance Share Vesting. On the Termination Date, all of the performance share units granted to such Participant under the Exelon Long Term Performance Share Award Program under the LTIP ("Performance Shares") prior to January 1, 2013 to the extent earned by and awarded to such Participant (i.e. as to which the applicable performance cycle has elapsed) as of the Termination Date, shall become fully vested at the actual level earned and awarded, and, to the extent not yet earned by and awarded to such Participant (i.e. as to which the current performance cycle has not elapsed) as of the Termination Date, shall become fully vested at the earned level determined as of the last day of the applicable performance cycle. With respect to all Performance Shares granted on or after January 1, 2013, such Performance Shares shall become vested and earned as set forth in the LTIP, as if the Executive had been involuntarily terminated without cause.

(d) Other Awards. All forfeiture conditions that as of the Termination Date are applicable to any shares of restricted stock or restricted stock units awarded to such Participant by Exelon other than under the Exelon Long Term Performance Share Award Program under the LTIP ("Restricted Stock") shall (except as expressly provided to the contrary in the applicable awards) lapse immediately and all such awards will become fully vested. All Cash Performance Awards shall become fully vested in accordance with their terms.

(e) Continuation of Welfare Benefits. During the Severance Period, the Executive and the Executive's dependents shall be eligible for participation in the Company's welfare plans, including medical, prescription, dental, disability, employee life, group life and accidental death benefits but excluding any severance pay ("Welfare Plans") that covered the Participant or such Participant's dependents as of the Termination Date, in accordance with the terms and conditions of such plans and applicable law. Such provision of welfare benefits shall be subject to the following:

(i) In determining benefits applicable under such Welfare Plans, such Participant's annual compensation attributable to base salary and incentives for any plan year or calendar year, as applicable, shall be deemed to be not less than such Participant's Base Salary and annual incentive for the year in which the Termination Date occurs.

(ii) The cost of such welfare benefits to such Participant and dependents under this Section 5.1(e) shall not exceed the cost of such benefits to peer executives who are actively employed during the Severance Period.

(iii) Health care coverage under this Section 5.1(e) shall be provided for the duration of the Severance Period in lieu of continuation coverage under Section 4980B of the Code and Section 601 to 609 of ERISA ("COBRA") for the same period. At the end of the Severance Period, COBRA continuation coverage may be elected for the remaining balance of the statutory coverage period, if any, at the Participant's sole expense.

(iv) If such Participant has, as of the last day of the Severance Period, attained age 50 and completed at least 10 years of service with the Company, such Participant shall be entitled to elect coverage under such Company group health care programs for retirees as are in effect as of the Termination Date and are applicable to such Participant by the programs' eligibility terms and conditions as though such Participant had attained such programs' age and service requirements ; provided, however, that for purposes hereof, any years of age and/or credited service granted to such Participant in any other plan or agreement between such Participant and the Company shall be taken into account. For purposes of determining eligibility for (but not the time of commencement of) such retiree benefits, such Participant shall also be considered (1) to have remained employed until the last day of the Severance Period and to have retired on the last day of such period, and (2) to have attained at least the age such Participant would have attained on the last day of the Severance Period. The eligibility for coverage and availability of programs or plans, the amounts charged for coverage, and the other terms, conditions and limitations under the Company's group health care programs or plans shall remain subject to the Company's right to amend, change or terminate such programs or plans at any time.

Notwithstanding the foregoing, if such Participant is eligible to obtain a specific type of coverage under welfare plan(s) sponsored by another employer of such Participant (e.g. medical, prescription, vision, dental, disability, individual life insurance benefits, group life insurance benefits, but excluding for the purposes of this sentence retiree benefits if such Participant is so eligible), then the Company shall not be obligated to provide any such specific type of coverage. The Participant shall promptly notify the Plan Administrator of any such coverage.

(f) Outplacement. To the extent actually incurred by such Participant, the Company shall pay or cause to be paid on behalf of such Participant, as incurred, all reasonable fees and costs charged by a nationally recognized outplacement firm selected by such Participant for outplacement services provided for up to 12 months after the Termination Date. No cash shall be paid in lieu of such fees and costs.

(g) Indemnification. Such Participant shall be indemnified and held harmless by the Company to the greatest extent permitted under applicable law and the Company's by-laws if such Participant was, is, or is threatened to be, made a party to any pending, completed or threatened action, suit, arbitration, alternate dispute resolution mechanism, investigation, administrative hearing or any other proceeding brought by a third party (and not by or on behalf of the Company or its shareholders) whether civil, criminal, administrative or investigative, and whether formal or informal, by reason of the fact that such Participant is or was, or had agreed to become, a director, officer, employee, agent, or fiduciary of the Company or any other entity which such Participant is or was serving at the request of the Company ("Proceeding"), against all expenses (including all reasonable attorneys' fees) and all claims, damages, liabilities and losses incurred or suffered by such Participant or to which such Participant may become subject for any reason; provided, that the Participant provides the Company written notice of any such Proceeding promptly after receipt and such that the Company's ability to defend shall not be prejudiced in any fashion and the Company shall have the right to direct the defense, approve any settlement and shall not be required to indemnify the Participant in connection with any proceeding initiated by the Participant, including a counterclaim or crossclaim, unless such proceeding was authorized by the Company, and that the Participant fully cooperates in the investigation and defense of such Proceeding.

(h) Directors' and Officers' Liability Insurance. For a period of six years after the Termination Date, the Company shall provide such Participant with coverage under a directors' and officers' liability insurance policy in an amount no less than, and on terms no less favorable than, those provided to peer executives of the Company from time to time.

5.2. Termination During an Imminent Control Change Period. If, during an Imminent Control Change Period, a Participant has a Termination of Employment, then such Participant shall receive benefits at the time and in the manner provided in Section 4 and the Company's sole obligations to such Participant under Sections 5.1 and 5.2 shall be as set forth in this Section 5.2 (and subject to Sections 5.3, 5.5, 5.6 and 6). The Company's obligations to such Participant under this Section 5.2 shall in all events be reduced by any amounts or benefits paid or provided pursuant to Section 4.

(a) Cash Severance Payments. If the Imminent Control Change Period culminates in a Change Date, the Company shall pay (or cause to be paid) to such Participant the amounts described in Section 5.1(a)(i) through (v). Such amounts shall be paid to such Participant as described in Section 5.3, provided that amounts that would have been paid prior to the Change Date shall be paid in a lump sum (without interest) within 30 business days after the Change Date.

(b) Vested Stock Options. Such Participant's Stock Options, to the extent vested on the Termination Date,

(i) will not expire (unless such Stock Options would have expired had such Participant remained an employee of the Company) during the Imminent Control Change Period; and

(ii) will continue to be exercisable after the Termination Date to the extent provided in the applicable grant agreement or the LTIP, and thereafter such Stock Options shall not be exercisable during the Imminent Control Change Period.

If the Imminent Control Change Period lapses without a Change Date, then such Participant's Stock Options, to the extent vested on the Termination Date, may be exercised, in whole or in part, during the 30-day period following the lapse of the Imminent Control Change Period, or, if longer, the period during which such Participant's vested Stock Options could otherwise be exercised under the terms of the applicable grant agreement or the LTIP (but in no case shall any Stock Options remain exercisable after the date on which such Stock Options would have expired if such Participant had remained an employee of the Company).

If the Imminent Control Change Period culminates in a Change Date, then effective upon the Change Date, such Participant's Stock Options, to the extent vested on the Termination Date, may be exercised in whole or in part by such Participant at any time until the earlier of the fifth anniversary of the Change Date or the option expiration date for such Stock Options, provided that this Section 5.2(b) shall not limit the right of the Company to cancel the Stock Options in connection with a corporate transaction pursuant to the terms of the LTIP.

(c) Non-vested Stock Options. Such Participant's Stock Options that are not vested on the Termination Date:

(i) will not expire (unless such Stock Options would have expired had such Participant remained an employee of the Company) during the Imminent Control Change Period; and

(ii) will not continue to vest and will not be exercisable during the Imminent Control Change Period.

If the Imminent Control Change lapses without a Change Date, such non-vested Stock Options will thereupon expire.

If the Imminent Control Change culminates in a Change Date, then immediately prior to the Change Date, such non-vested Stock Options shall become fully vested, and may thereupon be exercised in whole or in part by such Participant at any time until the earlier of the fifth anniversary of the Change Date, or the option expiration date for such Stock Options, provided that this Section 5.2(c) shall not limit the right of the Company to cancel the Stock Options in connection with a corporate transaction pursuant to the terms of the LTIP.

(d) Performance Shares. Such Participant's Performance Shares granted under the Exelon Long Term Performance Share Award Program under the LTIP will not be forfeited during the Imminent Control Change Period, and will not continue to vest during the Imminent Control Change Period. If the Imminent Control Change lapses without a Change Date, such Performance Shares shall be governed according to the terms of Section 4. If the Imminent Control Change Period culminates in a Change Date:

(i) All Performance Shares granted to such Participant under the Exelon Long Term Performance Share Award Program under the LTIP prior to January 1, 2013, which, as of the Termination Date, have been earned by and awarded to such Participant, shall become fully vested at the actual earned level on the Change Date, and

(ii) All of the Performance Shares granted to such Participant under the Exelon Long Term Performance Share Award Program under the LTIP prior to January 1, 2013 which, as of the Termination Date, have not been earned by and awarded to such Participant shall become fully vested on the Change Date at the actual earned level as of the last day of the applicable performance cycle, and

(iii) With respect to all Performance Shares granted on or after January 1, 2013, such Performance Shares shall become vested and earned as set forth in the LTIP, as if the Executive had been involuntarily terminated without cause.

(e) Restricted Stock. Such Participant's non-vested Restricted Stock will:

(i) not be forfeited during the Imminent Control Change Period; and

(ii) not continue to vest during the Imminent Control Change Period.

If the Imminent Control Change Period lapses without a Change Date, such non-vested Restricted Stock shall thereupon be forfeited.

If the Imminent Control Change Period culminates in a Change Date, then immediately prior to the Change Date, such Participant's Restricted Stock shall (except as expressly provided to the contrary in the award) become fully vested, and within ten business days after the Change Date, the Company shall deliver to such Participant all of such shares theretofore held by or on behalf of the Company, which will be subject to the same terms which other stockholders of the Company receive in the transaction.

(f) Cash Performance Awards. All Cash Performance Awards shall become fully vested in accordance with the terms of the underlying award documents.

(g) Continuation of Welfare Benefits. The Participant and the Participant's dependents shall be eligible for welfare benefits (other than any severance pay that may be considered a welfare benefit) in accordance with the terms and conditions of the applicable plans during the Imminent Control Change Period, to the same extent as if such Participant had remained employed during such period, subject to the following:

(i) in determining benefits applicable under such Welfare Plans, such Participant's annual compensation attributable to base salary and incentives for any plan year or calendar year, as applicable, shall be deemed to be not less than such Participant's Base Salary and annual incentive for the year in which the Termination Date occurs;

(ii) the cost of such welfare benefits to such Participant and dependents under this Section 5.2(g) shall not exceed the cost of such benefits to peer executives who are actively employed by the Company during the Imminent Control Change Period; and

(iii) Health care coverage under this Section 5.2(g) shall be provided for the duration of the Severance Period in lieu of continuation coverage under Section 4980B of the Code and Section 601 to 609 of ERISA (" COBRA") for the same period. At the end of the Severance Period, COBRA continuation coverage may be elected for the remaining balance of the statutory coverage period, if any.

If the Imminent Control Change Period lapses without a Change Date, welfare benefit plan coverage under this Section 5.2(g) shall thereupon cease, subject to such Participant's rights, if any, to continued coverage under a Welfare Plan, Section 4, or applicable law. If the Imminent

Control Change Period culminates in a Change Date, then for the remainder of the Severance Period, the Participant and his or her dependents shall continue to be eligible for welfare benefits as described in, and subject to the limitations of Section 5.1(e).

Notwithstanding the foregoing, if such Participant obtains a specific type of coverage under welfare plan(s) sponsored by another employer of such Participant (e.g. medical, prescription, vision, dental, disability, individual life insurance benefits, group life insurance benefits, but excluding for the purposes of this sentence retiree benefits if such Participant is so eligible), then the Company shall not be obligated to provide any such specific type of coverage. The Participant shall immediately notify the Plan Administrator of any such coverage.

(h) Indemnification. Such Participant shall be indemnified and held harmless by the Company to the same extent as provided in Section 5.1(g), but only during the Imminent Control Change Period (or greater period provided under the Company's by-laws) if the Imminent Control Change Period lapses without a Change Date.

(i) Termination During an Imminent Control Change Period: Directors' and Officers' Liability Insurance . The Company shall provide the same level of directors' and officers' liability insurance for such Participant as provided in Section 5.1(h), but only during the Imminent Control Change Period (or greater period provided under the Company's by-laws) if the Imminent Control Change Period lapses without a Change Date.

5.3. Timing of Severance Payments. Unless otherwise specified herein, the Accrued Obligations and the amount described in Section 5.1(a)(i) shall be paid within 30 business days of the Termination Date, and such amounts shall be considered "short-term deferrals" within the meaning of Section 409A of the Code. The amounts described in Sections 5.1(a)(ii), (iii) and (iv) shall be paid in accordance with the applicable deferred compensation plan or the SERP and the Participant's distribution election thereunder as of the Termination Date (or, if no affirmative election is in effect as of such date, the default election in effect with respect to the Participant as of such date). Subject to Section 13.13, the severance payments described in Section 5.1(a)(v) shall be paid during the Severance Period, beginning no later than the second paydate which occurs after the Termination Date, in periodic payments to a Participant according to the Company's normal payroll practices at a monthly rate equal to 1/12 of the sum of (i) such Participant's Base Salary plus (ii) the Severance Incentive (if any). The in-kind benefits and reimbursements provided under each of Sections 5.1(e), 5.1(h), 5.2(g) and 5.2(i) during any calendar year shall not affect the benefits or reimbursements to be provided under such section in any subsequent calendar year. The right to such benefits and reimbursements shall not be subject to liquidation or exchange for any other benefit.

5.4. Other Terminations of Employment by the Company or a Participant.

(a) Obligations. If, during a Post-Change Period or an Imminent Control Change Period, (i) the Company terminates an eligible Executive's employment for Cause (or causes a Participant to be terminated for Cause) (" Cause Termination") or disability (as determined by the Plan Administrator in good faith), (ii) an Executive elects to retire or otherwise terminate employment other than for Good Reason, disability or death, or (iii) an eligible Executive's employment terminates on account of death, the Company shall have no obligations to such Executive under Section 5. The remaining applicable provisions of this Plan (including the Restrictive Covenants) shall continue to apply.

(b) Procedural Requirements. The Company shall strictly observe or cause to be strictly observed each of the following procedures in connection with any Cause Termination during a Post-Change Period or an Imminent Control Change Period: an eligible Executive's termination of employment shall not be deemed to be for Cause under this Section 5.4 unless and until there shall have been delivered to such Executive a written notice of the determination of the Chief Executive Officer of the Executive's employer (" CEO") (after reasonable written notice of such consideration by the CEO of acts or omissions alleged to constitute Cause is provided to such Executive and such Executive is given an opportunity to present a written response to the CEO regarding such allegations), finding that, in his or her good faith opinion, such Executive's acts, or failure to act, constitutes Cause and specifying the particulars thereof in detail.

5.5. Sole and Exclusive Obligations. The obligations of the Company under this Plan with respect to any Termination of Employment occurring during a Post-Change Period or Imminent Control Change Period shall supersede any severance obligations of the Company in any other plan of the Company or agreement between such Participant and the Company, including, without limitation, Section 4, any offer of employment or employment contract of the Company which provides for severance benefits, except as explicitly provided in Section 5.2 or to the extent such Participant is ineligible for such benefits or such benefits are waived pursuant to Section 2.1.

5.6. Payment Capped. If at any time or from time to time, it shall be determined by the Company's independent auditors that any payment or other benefit to a Participant pursuant to Section 4 or 5 of this Plan or otherwise (" Potential Parachute Payment") is or will become subject to the excise tax imposed by Section 4999 of the Code or any similar tax payable under any United States federal, state, local, foreign or other law (" Excise Taxes"), then the Potential Parachute Payments payable to such Participant shall be reduced to the largest amount which would both (a) not cause any Excise Tax to be payable by such Participant and (b) not cause any Potential Parachute Payments to become nondeductible by the Company by reason of Section 280G of the Code (or any successor provision).

6. <u>TERMINATION OF PARTICIPATION; CESSATION OF BENEFITS</u>

A Participant's benefits under Section 4 of the Plan shall terminate on the last day of the Participant's Salary Continuation Period; provided that a Participant's right to benefits shall terminate immediately on such date as the Company discovers that the Participant has breached any of the Restrictive Covenants or the Waiver and Release, or if at any time the Company determines that in the course of his or her employment the Executive engaged in conduct described in Section 7.11(b), (c), (d) or (e) or the Executive fails to comply with Section 13.2, in which case the Company may require the repayment of amounts paid pursuant to Section 4.1 prior to such breach or other conduct, and shall discontinue the payment of any additional amounts under Section 4 of the Plan.

A Participant's benefits under Section 5 of the Plan shall terminate on the later of the last day of the Participant's Severance Period or the date all benefits to which the Participant is entitled to have been paid from the Plan; provided that a Participant's right to benefits shall terminate immediately on the date the Company discovers that the Participant has breached any of the Restrictive Covenants or the Waiver and Release, or if at any time the Company determines, in accordance with the procedural requirements set forth in Section 5.4(b) that in the course of his or her employment the Executive engaged in conduct described in Section 7.11(b), (c), (d) or (e) or the Executive fails to comply with Section 13.2, in which case the Company may require the repayment of amounts paid pursuant to Section 5 prior to such breach or other conduct, and shall discontinue the payment of any additional amounts under Section 5 of the Plan.

Benefits paid or payable to a Participant under Section 4 and Section 5 of the Plan shall be subject to any executive or officer incentive compensation recoupment policy of the Board of Directors as in effect as of the Termination Date.

7. <u>DEFINITIONS</u>

In addition to terms previously defined, when used in the Plan, the following capitalized terms shall have the following meanings unless the context clearly indicates otherwise:

7.1. "<u>Accrued Annual Incentive</u>" means the amount of any annual incentive earned but not yet paid with respect to the Company's latest fiscal year ended prior to the Termination Date.

7.2. "<u>Accrued Base Salary</u>" means the amount of a Participant's Base Salary that is accrued but not yet paid as of the Termination Date.

7.3. "<u>Accrued Obligations</u>" means, as of any date, the sum of a Participant's Accrued Base Salary, Accrued Annual Incentive and any accrued but unpaid paid time off

7.4. "<u>Annual Incentive</u>" as of a certain date means an amount to which a Participant would have been entitled under the Annual Incentive Award Plan (or, with respect to a termination pursuant to Section 5, such other Incentive Plan applicable to such Participant) for the applicable performance period based on the actual achievement performance goals established pursuant to such plan as of the end of the applicable performance period had the Participant remained employed through the last day of such period; provided, however, that any reduction in a Participant's Base Salary or annual incentive that would qualify as Good Reason shall be disregarded for purposes of this definition

7.5. "Annual Incentive Award Plan", means the Exelon Corporation Annual Incentive Award Plan, or any successor plan thereto (including but not limited to any annual incentive plan of a successor to a Company pursuant to a Change in Control).

7.6. "Applicable Trigger Date" means

(a) the Change Date, with respect to a Post-Change Period; or

(b) the date of an Imminent Control Change, with respect to the Imminent Control Change Period.

7.7. "Base Salary" for purposes of Section 5, means not less than 12 times the highest monthly base salary paid or payable to a Participant by the Company in respect of the 12-month period immediately before the Applicable Trigger Date.

7.8. "Beneficial Owner" means such term as defined in Rule 13d-3 of the SEC under the Exchange Act.

7.9. "Board" means the Board of Directors of Exelon or, from and after the effective date of a Corporate Transaction (as defined in the definition of Change in Control), the Board of Directors of the corporation resulting from a Corporate Transaction or, if securities representing at least 50% of the aggregate voting power of such resulting corporation are directly or indirectly owned by another corporation, such other corporation.

7.10. "Cash Performance Award" means any cash performance award granted to a Participant in lieu of an award of Performance Shares or Restricted Stock under the LTIP during employment by Commonwealth Edison Company.

7.11. "Cause" means, with respect to any Executive:

(a) the refusal to perform or habitual neglect in the performance of the Executive's duties or responsibilities, or of specific directives of the officer or other executive of Exelon or any of its affiliates to whom the Executive reports which are not materially inconsistent with the scope and nature of the Executive's employment duties and responsibilities;

(b) an Executive's willful or reckless commission of act(s) or omission(s) which have resulted in or are likely to result in, a material loss to, or material damage to the reputation of, Exelon or any of its affiliates, or that compromise the safety of any employee or other person;

(c) the Executive's commission of a felony or any crime involving dishonesty or moral turpitude;

(d) an Executive's material violation of Exelon's or any of its affiliate's Code of Business Conduct (including the corporate policies referenced therein) which would constitute grounds for immediate termination of employment, or of any statutory or common law duty of loyalty to Exelon or any of its affiliates; or

(e) any breach by the Executive of any one or more of the Restrictive Covenants.

7.12. "Change Date" means each date on which a Change in Control occurs after the Effective Date.

7.13. "Change in Control" means:

(a) any SEC Person becomes the Beneficial Owner of 20% or more of the then outstanding common stock of Exelon or of Voting Securities representing 20% or more of the combined voting power of all the then outstanding Voting Securities of Exelon (such an SEC Person, a "20% Owner"); provided, however, that for purposes of this subsection (a), the following acquisitions shall not constitute a Change in Control: (1) any acquisition directly from Exelon (excluding any acquisition resulting from the exercise of an exercise, conversion or exchange privilege unless the security being so exercised, converted or exchanged was acquired directly from Exelon), (2) any acquisition by Exelon, (3) any acquisition by an employee benefit plan (or related trust) sponsored or maintained by Exelon or any corporation controlled by Exelon (a "Company Plan"), or (4) any acquisition by any corporation pursuant to a transaction which complies with clauses (i), (ii) and (iii) of subsection (c) of this definition; provided further, that for purposes of clause (2), if any 20% Owner of Exelon other than Exelon or any Company Plan becomes a 20% Owner by reason of an acquisition by Exelon, and such 20% Owner of Exelon shall, after such acquisition by Exelon, become the beneficial owner of any additional outstanding common shares of Exelon or any additional outstanding Voting Securities of Exelon (other than pursuant to any dividend reinvestment plan or arrangement maintained by Exelon) and such beneficial ownership is publicly announced, such additional beneficial ownership shall constitute a Change in Control; or

(b) Individuals who, as of the date hereof, constitute the Board (the " Incumbent Board") cease for any reason to constitute at least a majority of the Incumbent Board; provided, however, that any individual becoming a director subsequent to the date hereof whose election, or nomination for election by Exelon's shareholders, was approved by a vote of at least a majority of the directors then comprising the Incumbent Board shall be considered as though such individual were a member of the Incumbent Board, but excluding, for this purpose, any such individual whose initial assumption of office occurs as a result of an actual or threatened election contest (as such terms are used in Rule 14a-11 promulgated under the Exchange Act) or other actual or threatened solicitation of proxies or consents by or on behalf of a Person other than the Board; or

(c) Consummation of a reorganization, merger or consolidation ("Merger"), or the sale or other disposition of more than 50% of the operating assets of Exelon (determined on a consolidated basis), other than in connection with a sale-leaseback or other arrangement resulting in the continued utilization of such assets (or the operating products of such assets) by Exelon (such reorganization, merger, consolidation, sale or other disposition, a "Corporate Transaction"); excluding, however, a Corporate Transaction pursuant to which:

(i) all or substantially all of the individuals and entities who are the Beneficial Owners, respectively, of the outstanding common stock of Exelon and outstanding Voting Securities of Exelon immediately prior to such Corporate Transaction beneficially own, directly or indirectly, more than 60% of, respectively, the then-outstanding shares of common stock and the combined voting power of the then-outstanding voting securities entitled to vote generally in the election of directors, as the case may be, of the corporation resulting from such Corporate Transaction (including, without limitation, a corporation which, as a result of such transaction, owns Exelon or all or substantially all of the assets of Exelon either directly or through one or more subsidiaries) in substantially the same proportions as their ownership immediately prior to such Corporate Transaction of the outstanding common stock of Company and outstanding Voting Securities of Exelon, as the case may be;

(ii) no SEC Person (other than the corporation resulting from such Corporate Transaction, and any Person which beneficially owned, immediately prior to such corporate Transaction, directly or indirectly, 20% or more of the outstanding common stock of Exelon or the outstanding Voting Securities of Exelon, as the case may be) becomes a 20% Owner, directly or indirectly, of the then-outstanding common stock of the corporation resulting from such Corporate Transaction or the combined voting power of the outstanding voting securities of such corporation; and

(iii) individuals who were members of the Incumbent Board will constitute at least a majority of the members of the board of directors of the corporation resulting from such Corporate Transaction; or

(d) Approval by Exelon's shareholders of a plan of complete liquidation or dissolution of Exelon, other than a plan of liquidation or dissolution which results in the acquisition of all or substantially all of the assets of Exelon by an affiliated company.

Notwithstanding the occurrence of any of the foregoing events, a Change in Control shall not occur with respect to a Participant if, in advance of such event, such Participant agrees in writing that such event shall not constitute a Change in Control.

7.14. "Code" means the Internal Revenue Code of 1986, as amended.

7.15. "ComEd Key Manager Plan" means the ComEd Key Manager Long-Term Performance Plan, or any successor thereto.

7.16. "ERISA" means the Employee Retirement Income Security Act of 1974, as amended.

7.17. "Exchange Act" means the Securities Exchange Act of 1934, as amended.

7.18. "Good Reason" means:

(a) for purposes of Section 4 hereof,

(i) a material reduction of an Executive's salary unless such reduction is part of a policy, program or arrangement applicable to peer executives of the Company or of the Executive's business unit; and

(ii) with respect to an Executive whose title with respect to a Company is Senior Vice President or above, a material adverse reduction in the Executive's position or duties that is not applicable to peer executives of the Company or of the Executive's business unit, but excluding any change (A) resulting from a reorganization or realignment of all or a significant portion of the business, operations or senior management of the Company or of the business unit that employs the Executive or (B) that generally places the Executive in substantially the same level of responsibility. Notwithstanding the foregoing, no change in the position or level of officer to whom an Executive reports shall constitute grounds for Good Reason.

(b) for purposes of Section 5 hereof, the occurrence of any one or more of the following actions or omissions that occurs during a Post-Change Period or an Imminent Control Change Period:

(i) a material reduction of an Executive's salary, incentive compensation opportunity or aggregate benefits unless such reduction is part of a policy, program or arrangement applicable to peer executives (including peer executives of any successor to Exelon);

(ii) a material adverse reduction in the Executive's position, duties or responsibilities (excluding a change in the position or level of officer to whom the Executive reports), unless such reduction is part of a policy, program or arrangement applicable to peer executives (including peer executives of any successor to Exelon);

(iii) a relocation by more than 50 miles of (A) the Executive's primary workplace, or (B) the principal offices of Exelon or its successor (if such offices are such Executive's workplace), in each case without the Executive's consent; provided, however, in both cases of (A) and (B) of this subsection (b)(iv), such new location is farther from the Executive's residence than the prior location; or

(iv) a material breach of this Plan by Exelon or its successor.

(c) Application of "Good Reason" Definition During the Imminent Control Change Period . During the Imminent Control Change Period, "Good Reason" shall not include the events or conditions described in subsection (b)(i), (b)(ii) or (b)(iv) above unless the Imminent Control Change Period culminates in a Change Date.

(d) Limitations on Good Reason. Notwithstanding the foregoing provisions of this Section, no act or omission shall constitute a material breach of this Plan by Exelon, nor grounds for "Good Reason":

(i) unless the Executive gives the Plan Administrator a Notice of Termination at least 30 days prior to the Executive's Termination Date, and the Company fails to cure such act or omission within the 30-day period;

(ii) if the Executive first acquired knowledge of such act or omission more than 90 days before such Participant gives the Plan Administrator such Notice or Termination; or

(iii) if the Executive has consented in writing to such act or omission.

7.19. "Imminent Control Change" means, as of any date on or after the Effective Date and prior to the Change Date, the occurrence of any one or more of the following:

(a) Exelon enters into an agreement the consummation of which would constitute a Change in Control;

(b) Any SEC Person commences a "tender offer" (as such term is used in Section 14(d) of the Exchange Act) or exchange offer, which, if consummated, would result in a Change in Control; or

(c) Any SEC Person files with the SEC a preliminary or definitive proxy solicitation or election contest to elect or remove one or more members of the Board, which, if consummated or effected, would result in a Change in Control;

provided, however, that an Imminent Control Change will lapse and cease to qualify as an Imminent Control Change:

(i) With respect to an Imminent Control Change described in clause (a) of this definition, the date such agreement is terminated, cancelled or expires without a Change Date occurring;

(ii) With respect to an Imminent Control Change described in clause (b) of this definition, the date such tender offer or exchange offer is withdrawn or terminates without a Change Date occurring;

(iii) With respect to an Imminent Control Change described in clause (c) of this definition, (1) the date the validity of such proxy solicitation or election contest expires under relevant state corporate law, or (2) the date such proxy solicitation or election contest culminates in a shareholder vote, in either case without a Change Date occurring; or

(iv) The date a majority of the members of the Incumbent Board make a good faith determination that any event or condition described in clause (a), (b), or (c) of this definition no longer constitutes an Imminent Control Change, provided that such determination may not be made prior to the first anniversary of the occurrence of such event.

7.20. "Imminent Control Change Period" means the period commencing on the date of an Imminent Control Change, and ending on the first to occur thereafter of

(a) a Change Date, provided

(i) such date occurs no later than the first anniversary of the Termination Date, and

(ii) either the Imminent Control Change has not lapsed, or the Imminent Control Change in effect upon such Change Date is the last Imminent Control Change in a series of Imminent Control Changes unbroken by any period of time between the lapse of an Imminent Control Change and the occurrence of a new Imminent Control Change;

(b) the date an Imminent Control Changes lapses without the prior or concurrent occurrence of a new Imminent Control Change; or

(c) the first anniversary of the Termination Date.

7.21. "Incentive Plan" means the Exelon Corporation Annual Incentive Award Plan, or such other annual cash bonus arrangement of the Company in which the Executive is a participant in lieu of the Annual Incentive Award Plan, but excluding any supplemental incentive plans.

7.22. “including” means including without limitation.

7.23. “Incumbent Board”—see definition of Change in Control.

7.24. “LTIP” means the Exelon Corporation Long-Term Incentive Plan, as amended from time to time, or any successor thereto.

7.25. “LTIP Performance Period” means the performance period applicable to an LTIP award, as designated in accordance with the LTIP.

7.26. “LTIP Target Level” means, in respect of any grant of Performance Shares under the Exelon Long Term Performance Share Award Program under the LTIP, the number of Performance Shares which a Participant would have been awarded (prior to the Termination Date) for the LTIP Performance Period corresponding to such grant if the business and personal performance goals related to such grant were achieved at the 100% (target) level as of the end of the LTIP Performance Period.

7.27. “Merger”—see definition of Change in Control.

7.28. “Notice of Termination” means a written notice given by an Executive in accordance with Sections 7.18(d)(i) and 13.10 which sets forth in reasonable detail the specific facts and circumstances claimed to provide a basis for a Termination of Employment for Good Reason.

7.29. “Performance Shares”—see Section 5.1(c).

7.30. “Person” means any individual, sole proprietorship, partnership, joint venture, limited liability company, trust, unincorporated organization, association, corporation, institution, public benefit corporation, entity or government instrumentality, division, agency, body or department.

7.31. “Plan Administrator”—See Section 9.

7.32. “Post-Change Period” means the period commencing on a Change Date and ending on the earlier of (a) the Termination Date or (b) the second anniversary of such Change Date; provided that no duplicate benefits shall be paid with respect to simultaneous or overlapping Post-Change Periods.

7.33. “Restricted Stock”—see Section 5.1(d).

7.34. “Retiree” means a Participant who, as of his or her Termination Date, is eligible for “retirement” as defined in the LTIP.

7.35. “Salary Continuation Period” means the applicable period designated in Section 4.1 during which severance is payable.

7.36. “SEC” means the United States Securities and Exchange Commission.

7.37. "SEC Person" means any person (as such term is used in Rule 13d-5 of the SEC under the Exchange Act) or group (as such term is defined in Sections 3(a)(9) and 13(d)(3) of the Exchange Act), other than (a) Exelon or any Person that directly or indirectly controls, is controlled by, or is under common control with, Exelon (an "Affiliate"). For purposes of this definition the term "control" with respect to any Person means the power to direct or cause the direction of management or policies of such Person, directly or indirectly, whether through the ownership of Voting Securities, by contract or otherwise, or (b) any employee benefit plan (or any related trust) of Exelon or any of its Affiliates.

7.38. "Section" means, unless the context otherwise requires, a section of this Plan.

7.39. "Senior Executive Management" means (a) an Executive whose title with respect to Exelon is Executive Vice President or above, (b) an Executive whose title with respect to a Company other than Exelon is Chief Executive Officer or President, and (c) such other Executive who was described in subparagraph (a) or (b) and has been grandfathered by the Plan Administrator.

7.40. "SERP" means the Constellation Energy Group, Inc. Benefit Restoration Plan, the PECO Energy Company Supplemental Retirement Plan or the Exelon Corporation Supplemental Executive Retirement Plan, whichever is applicable to a Participant, or any successor thereto.

7.41. "Severance Incentive" means the Target Incentive for the performance period in which the Termination Date occurs; provided, however, that for purposes of Section 5, "Severance Incentive" shall mean the greater of (a) the Target Incentive for the performance period in which the Termination Date occurs, or (b) the average of the actual Annual Incentives paid (or payable, to the extent not previously paid) to a Participant under the Annual Incentive Award Plan for each of the two calendar years preceding the calendar year in which the Termination Date occurs.

7.42. "Severance Period" means the period beginning on a Participant's Termination Date, provided such Participant's Termination of Employment entitles such Participant to benefits under Section 5.1 or 5.2, and ending on the second anniversary thereof.

7.43. "Specified Employee" means a "specified employee" within the meaning of Section 409A of the Code.

7.44. "Stock Options"—see Section 5.1(b).

7.45. "Target Incentive" as of a certain date means an amount equal to the product of Base Salary determined as of such date multiplied by the percentage of such Base Salary (if any) to which a Participant would have been entitled immediately prior to such date under the Annual Incentive Award Plan for the applicable performance period if the performance goals established pursuant to such plan were achieved at the 100% (target) level as of the end of the applicable performance period; provided, however, that any reduction in a Participant's Base Salary or annual incentive that would qualify as Good Reason shall be disregarded for purposes of this definition.

7.46. "Taxes" means the incremental federal, state, local and foreign income, employment, excise and other taxes payable by a Participant with respect to any applicable item of income.

7.47. "Termination Date" means the effective date of an eligible Executive's Termination of Employment with the Company for any or no reason, which shall be the date on which such Executive has a "separation from service," within the meaning of Section 409A of the Code; provided, however, that if the Executive terminates his or her employment for Good Reason, the Termination Date shall not be earlier than the thirtieth day following the Company's receipt of such Executive's Notice of Termination, unless the Exelon consents in writing to an earlier Termination Date.

7.48. "Termination of Employment" means:

(a) a termination of an eligible Executive's employment by the Company for reasons other than for Cause; or

(b) a resignation by an eligible Executive for Good Reason.

The following shall not constitute a Termination of Employment for purposes of the Plan: (i) a termination of employment for Cause, (ii) an Executive's resignation for any reason other than for Good Reason, (iii) the cessation of an Executive's employment with the Company or any Affiliate due to death or disability (as determined by the Plan Administrator in good faith), or (iv) the cessation of an Executive's employment with the Company or any subsidiary thereof as the result of the sale, spin-off or other divestiture of a plant, division, business unit or subsidiary or a merger or other business combination followed by employment or reemployment with the purchaser or successor in interest to the Executive's employer with regard to such plant, division, business unit or subsidiary, or an offer of employment by such purchaser or successor in interest on terms and conditions comparable in the aggregate (as determined by the Plan Administrator in its sole discretion) to the terms and conditions of the Executive's employment with the Company or its subsidiary immediately prior to such transaction.

7.49. "20% Owner"—see paragraph (a) of the definition of "Change in Control."

7.50. "Voting Securities" means with respect to a corporation, securities of such corporation that are entitled to vote generally in the election of directors of such corporation.

8. **FUNDING**

The Plan is an unfunded employee welfare benefit plan maintained for the purpose of providing severance benefits to a select group of management or highly compensated employees. Nothing in the Plan shall be interpreted as requiring the Company to set aside any of its assets for the purpose of funding its obligations under the Plan. No person entitled to benefits under the Plan shall have any right, title or claim in or to any specific assets of the Company, but shall have the right only as a general creditor to receive benefits from the Company on the terms and conditions provided in the Plan.

9. **ADMINISTRATION OF THE PLAN**

The Plan shall be administered on a day-to-day basis by the Vice President, Corporate Compensation of Exelon (the " Plan Administrator"). The Plan Administrator has the sole and absolute power and authority to interpret and apply the provisions of this Plan to a particular circumstance, make all factual and legal determinations, construe uncertain or disputed terms and make eligibility and benefit determinations in such manner and to such extent as the Plan Administrator, in his or her sole discretion may determine. Benefits under the Plan will be paid only if the Plan Administrator, in his or her discretion, determines that an individual is entitled to them; provided, however, that any dispute after the claims procedure under Section 10 has been exhausted regarding whether an Executive's termination of employment for purposes of Section 5 is based on either Good Reason or Cause may, at the election of the Executive, be submitted to binding arbitration pursuant to Section 11.

The Plan Administrator may promulgate any rules and regulations it deems necessary to carry out the purposes of the Plan or to interpret the terms and conditions of the Plan; provided, however, that no rule, regulation or interpretation shall be contrary to the provisions of the Plan. The rules, regulations and interpretations made by the Plan Administrator shall, where appropriate, be applied on a consistent basis with respect to similarly situated Executives, and shall be final and binding on any Executive or former Executive and any successor in interest.

The Plan Administrator may delegate any administrative duties, including, without limitation, duties with respect to the processing, review, investigation, approval and payment of severance pay and provision of severance benefits, to designated individuals or committees. The Plan Administrator may amend any Participant's Severance Agreement to the extent the Plan Administrator determines it is reasonably necessary or appropriate to do so to comply with section 409A of the Code.

10. **CLAIMS PROCEDURE**

The Plan Administrator shall determine the status of an individual as an Executive and the eligibility and rights of any Executive or former Executive as a Participant to any severance pay or benefits hereunder. Any Executive or former Executive who believes that he or she is entitled to receive severance pay or benefits under the Plan, including severance pay or benefits other than those initially determined by the Plan Administrator, may file a claim in writing with the Plan Administrator. Within 90 days after the receipt of the claim the Plan Administrator shall either allow or deny the claim in writing, unless special circumstances require an extension of time for processing, in which case a decision shall be rendered as soon as practicable, but not later than 180 days after receipt of a request for review.

A claimant whose claim is denied (or his or her duly authorized representative) may, within 60 days after receipt of the denial of his or her claim, request a review upon written application to Exelon's Chief Human Resources Officer or other officer designated by Exelon and specified in the claim denial; review (without charge) relevant documents; and submit written comments, documents, records and other information relating to the claim.

The Chief Human Resources Officer or other designated officer shall notify the claimant of his or her decision on review within 60 days after receipt of a request for review unless special circumstances require an extension of time for processing, in which case a decision shall be rendered as soon as possible, but not later than 120 days after receipt of a request for review. Notice of the decision on review shall be in writing. The officer's decision on review shall be final and binding on any claimant or any successor in interest.

In reviewing a claim or an appeal of a claim denial, the Plan Administrator and the Chief Human Resources Officer or other designated by Exelon shall have all of the powers and authority granted to the Plan Administrator pursuant to Section 9.

11. **ARBITRATION**

Any dispute, controversy or claim between the parties hereto concerning whether an Executive's termination of employment for purposes of Section 5 is based on either Good Reason or Cause may, after the claims procedure under Section 10 has been exhausted and at the election of the Executive, be settled by binding arbitration in Chicago, Illinois, before an impartial arbitrator pursuant to the rules and regulations of the American Arbitration Association (" AAA") pertaining to the arbitration of employee benefit plan disputes. The costs and fees of the arbitrator shall be borne equally by the parties, regardless of the result of the arbitration. No arbitration shall be commenced after the date when institution of legal or equitable proceedings based upon such subject matter would be barred by the applicable statutes of limitations. Notwithstanding anything to the contrary contained in this Section or elsewhere in this Plan, any party may seek relief in the form of specific performance, injunctive or other equitable relief in order to enforce the decision of the arbitrator, and the Company may seek injunctive relief to enforce the above-referenced statutes of limitations.

12. **AMENDMENT OR TERMINATION OF PLAN**

Exelon's Chief Human Resources Officer or another designated officer of the Company may amend, modify or terminate the Plan at any time by written instrument; provided, however, that no amendment, modification or termination shall deprive any Participant of any payment or benefit that the Plan Administrator previously has determined is payable under the Plan. Notwithstanding the foregoing, no amendment or termination that reduces the severance payments or materially adversely affects any Participant's other benefits under Section 5 shall become effective as to such Participant during: (a) the 24-month period following a Change Date or (b) during an Imminent Control Change Period (unless such Participant consents to such termination or amendment). Any purported Plan termination or amendment in violation of this Section 12 shall be void and of no effect.

13. **MISCELLANEOUS**

13.1. Limitation on Rights. Participation in the Plan is limited to the individuals described in Sections 2 and 3, and the benefits under the Plan shall not be payable with respect to any voluntary or involuntary termination of employment that is not a Termination of Employment.

13.2. Cooperation By Participants. During the Salary Continuation Period or Severance Period, as applicable, the Executive shall (a) be reasonably available to the Company to respond to requests by them for information pertaining to or relating to matters which may be within the knowledge of the Executive and (b) cooperate with the Company in connection with any existing or future litigation or other proceedings brought by or against the Company, its subsidiaries or affiliates, to the extent the Company deems the Executive's cooperation reasonably necessary.

13.3. No Set-off by Company. This Section shall apply solely with respect to a Termination of Employment during a Post-Change Period or an Imminent Control Change Period that culminates in a Change Date. Except as provided in Section 6, a Participant's right to receive when due the payments and other benefits provided for under Section 5 of this Plan is absolute, unconditional and subject to no setoff, counterclaim or legal or equitable defense.

13.4. No Mitigation. A Participant shall not have any duty to mitigate the amounts payable by the Company under this Plan by seeking new employment following termination. Except as specifically otherwise provided in this Plan, all amounts payable pursuant to this Plan shall be paid without reduction regardless of any amounts of salary, compensation or other amounts which may be paid or payable to the Executive as the result of the Executive's employment by another, unaffiliated employer.

13.5. Headings. Headings of sections in this document are for convenience only, and do not constitute any part of the Plan.

13.6. Severability. If any one or more Sections, subsections or other portions of this Plan are declared by any court or governmental authority to be unlawful or invalid, such unlawfulness or invalidity shall not serve to invalidate any Section, subsection or other portion not so declared to be unlawful or invalid. Any Section, subsection or other portion so declared to be unlawful or invalid shall be construed so as to effectuate the terms of such Section, subsection or other portion to the fullest extent possible while remaining lawful and valid. Notwithstanding the foregoing, in the event a determination is made that the Restrictive Covenants are invalid or unenforceable in whole or in part, then the Severance Agreement with respect to the Participant subject to such determination shall be void and the Company shall have no obligation to provide benefits under this Plan to such Participant.

13.7. Governing Law. The Plan shall be construed and enforced in accordance with the applicable provisions of ERISA and Section 409A of the Code.

13.8. No Right to Continued Employment. Nothing in this Plan shall guarantee the right of a Participant to continue in employment, and the Company retains the right to terminate a Participant's employment at any time for any reason or for no reason.

13.9. Successors and Assigns. This Plan shall be binding upon and inure to the benefit of Exelon and its successors and assigns and shall be binding upon and inure to the benefit of a Participant and his or her legal representatives, heirs and legatees.

Exelon shall cause any successor to assume the Plan. No rights, obligations or liabilities of a Participant hereunder shall be assignable without the prior written consent of Exelon Corporation. In the event of the death of a Participant prior to receipt of severance pay or benefits to which he or she is entitled hereunder (and, with respect to benefits under Section 4 or Section 5, after he or she has signed the Waiver and Release), the severance pay described in Sections 4.1, 5.1, or 5.2, as applicable, shall be paid to his or her estate, and the Participant's dependents who are covered under any health care plans maintained by the Company shall be entitled to continued rights under Section 4.5 or Section 5.1(e) or Section 5.2(g), as applicable; provided that the estate or other successor of the Participant has not revoked such Waiver and Release.

13.10. Notices. All notices and other communications under this Plan shall be in writing and delivered by hand, by nationally-recognized delivery service that promises overnight delivery, or by first-class registered or certified mail, return receipt requested, postage prepaid, addressed as follows:

If to a Participant, to such Participant at his most recent home address on file with the Company.

If to the Company: to the Plan Administrator.

or to such other address as either party shall have furnished to the other in writing. Notice and communications shall be effective when actually received by the addressee.

13.11. Number and Gender. Wherever appropriate, the singular shall include the plural, the plural shall include the singular, and the masculine shall include the feminine.

13.12. Tax Withholding. The Company may withhold from any amounts payable under this Plan or otherwise payable to a Participant or beneficiary any Taxes the Company determines to be appropriate under applicable law and may report all such amounts payable to such authority in accordance with any applicable law or regulation.

13.13. Section 409A. This Plan shall be interpreted and construed in a manner that avoids the imposition of additional taxes and penalties under Section 409A of the Code ("409A Penalties"). In the event the terms of this Plan would subject a Participant to 409A Penalties, the Company may amend the terms of the Plan to avoid such 409A Penalties, to the extent possible. The payments to a Participant pursuant to this Plan are intended to be exempt from Section 409A of the Code to the maximum extent possible, under either the separation pay exemption pursuant to Treasury regulation §1.409A-1(b)(9)(iii) or as a short-term deferral pursuant to Treasury regulation §1.409A-1(b)(4), and for purposes of the separation pay exemption, each installment paid to a Participant shall be considered a separate payment. Notwithstanding any other provision in this Plan, if on the date of a Participant's Termination Date the Participant is a Specified Employee, then to the extent any amount payable under this Plan constitutes the payment of nonqualified deferred compensation, within the meaning of Section 409A of the Code, that under the terms of this Plan would be payable prior to the six-month anniversary of the Termination Date, such payment shall be delayed until the earlier to occur of (A) the six-month anniversary of the Termination Date or (B) the date of the Participant's death. Any reimbursement (including any advancement) payable to a Participant pursuant to this Plan shall be conditioned on the submission by the Participant of all expense reports reasonably required by the Company under any applicable expense reimbursement policy, and shall be paid to the Participant within 30 days following receipt of such expense reports (or invoices), but in no event later than the last day of the calendar year following the calendar year in which the Participant incurred the reimbursable expense. Any amount of expenses eligible for reimbursement during a calendar year shall not affect the expenses eligibility for reimbursement during any other calendar year. The right to reimbursement pursuant to this Plan shall not be subject to liquidation or exchange for any other benefit.

PENSION PLAN
OF
CONSTELLATION ENERGY GROUP, INC.

(Amended and Restated Effective January 31, 2012)

PENSION PLAN

OF

CONSTELLATION ENERGY GROUP, INC.

TABLE OF CONTENTS

INTRODUCTION

The Plan, which was initially effective on January 1, 1948, was amended and restated effective January 1, 2000 to include the Pension Equity formula, and has been amended and restated from time to time thereafter. The Plan was restated on January 22, 2007, effective January 1, 2000, to incorporate all amendments made since January 1, 2000. The plan was amended and restated on January 30, 2012, effective January 31, 2012, to incorporate all amendments made since the prior restatement.

ARTICLE I—Participation

1.1 Automatic PEP Participation—Except as provided in 1.2, each Full-Time Employee of the Company, or of those subsidiaries and affiliates of the Company which are designated by the Board of Directors (as reflected in Appendix G), shall become a Participant in PEP on the date he/she becomes a Full-Time Employee. (Notwithstanding the previous sentence, effective July 23, 2010, Executive Group may designate such subsidiaries and affiliates if such designations have less than a $10 million impact on the Plan's accumulated benefit obligation per designation. At least annually, the Company's Chief Executive Officer shall report all such subsidiary and affiliate designations to the Board of Directors. An Employee classified in a job description as an On-Call Employee, a leased employee within the meaning of Code Section 414(n)(2), or a co-op, work study or summer Employee shall not become a Participant in the Plan while classified in the sole judgment of the Employer as an On-Call Employee, a leased employee, or a co-op, work study or summer Employee.

1.2 Election: Traditional Pension Plan or PEP— Each individual who is both a Participant on December 31, 1999 and an Employee on January 1, 2000 shall elect in the manner determined by the Plan Administrator to participate in either PEP or the Traditional Pension Plan. Each individual who is a Participant on December 31, 1999 and who has a Severance From Service Date on December 31, 1999, and who, at the Severance From Service Date, had attained age 55 and completed at least 20 years of Credited Service shall elect in the manner determined by the Plan Administrator to participate in either PEP or the Traditional Pension Plan. Such Participant shall make his/her election on or after January 1, 2000 and on or before the earlier of June 30, 2000 or his/her Benefit Commencement Date. The last election made on or before the earlier of June 30, 2000 or his/her Benefit Commencement Date is irrevocable, except that, in the case of a Participant whose Severance From Service Date is on or after January 1, 2000 and on or before June 30, 2000 the first election made after the Severance From Service Date is irrevocable. Any election shall be effective as of January 1, 2000. Notwithstanding anything above, any Participant who does not affirmatively make a valid election on or before June 30, 2000 will participate in PEP effective January 1, 2000.

ARTICLE II—Types of Retirement

2.1 Normal Retirement: Generally—A Participant who, on the day preceding his/her Normal Retirement Date, is actively employed or a Disabled Participant and has at least five years of Credited Service, is eligible for Normal Retirement.

2.1(a) Effective Date—Normal Retirement is effective as of the first day of the month following a Participant's Severance From Service Date, or if later, the date a Disabled Participant ceases receiving benefits under the Disability Plan.

2.2 Early Retirement: Generally—A Participant who, on his/her Severance From Service Date, is at least age 55, and has at least ten years of Credited Service, is eligible for Early Retirement.

2.2(a) Effective Date—Early Retirement is effective as of the first day of the month designated in writing by the Participant, which is after the date that the Participant becomes eligible for Early Retirement, and not later than the Participant's Normal Retirement Date. Such written designation must be received by the Plan Administrator before the beginning of the designated month. If a written designation is not received, Early Retirement will be effective on the Participant's Normal Retirement Date.

2.3 Disability Retirement: Traditional Pension Plan—A Disabled Participant who (i) prior to receiving benefits under the Disability Plan, has at least ten years of Credited Service, and (ii) is at least age 50 but has not yet reached age 65 when he/she is determined to be no longer disabled under the terms of the Disability Plan, is eligible for Disability Retirement in the Traditional Pension Plan.

2.3(a) Effective Date—Disability Retirement in the Traditional Pension Plan is effective on the first day of the month designated in writing by the Participant, which is after the date that the Participant becomes eligible for Disability Retirement, and not later than the Participant's Normal Retirement Date. Such written designation must be received by the Plan Administrator before the beginning of the designated month. If a written designation is not received, Disability Retirement will be effective on the Participant's Normal Retirement Date.

ARTICLE III—Pension Payments

3.1(a) Form of Pension Payments: Traditional Pension Plan—Except as provided in 3.3(h), all pension payments to Participants in the Traditional Pension Plan are paid in monthly installments.

3.1(b) Form of Pension Payments: PEP—Except as provided in 3.3(h), all pension payments to Participants in PEP are paid in monthly installments unless the Participant elects, within 60 days of the Participant's Severance From Service Date and in the manner determined by the Plan Administrator, a payment in the form of a lump sum.

3.2 Timing of Pension Payments: Traditional Pension Plan—Except as provided in 3.3(h), pension payments to Participants in the Traditional Pension Plan commence as of the applicable effective date set forth in Article II.

3.2(a) Timing of Pension Payments: PEP—Except as provided in 3.3(h), pension payments to Participants in PEP commence as of the applicable effective date set forth in Article II unless the Participant elects, within 60 days of the later of (i) the date of the letter provided by the Plan Administrator to the Participant that describes the Participant's Plan distribution options or (ii) the Participant's Severance From Service Date, and in the manner determined by the Plan Administrator, to receive a lump sum or to commence to receive monthly installments as of the first day of the month following the Participant's Severance From Service Date.

3.2(b) Timing of Pension Payments: Active Employees—Pension payments to a Participant who is an Employee and who attains age 70 ½ before January 1, 2000, shall commence on April 1 of the year following the year during which the Participant attains age 70 ½. The pension payments will be recalculated and increased if appropriate as of each January 1 (and as of the Participant's Severance From Service Date) to reflect increases in the Normal Retirement Service Percentage and changes in Final Average Pay in the case of a Participant in the Traditional Pension Plan, and to reflect increases in Total Pension Credits and changes in Final Average Annual Pay in the case of a Participant in PEP.

Pension payments to a Participant who is an Employee and who attains age 70 ½ after December 31, 1999 shall commence as of the first day of the month following the Participant's Severance From Service Date. The pension payments of a Participant in the Traditional Pension Plan will be actuarially increased to reflect the period described below during which the Participant does not receive any payments under the Plan. The period begins on the April 1 of the year following the year during which the Participant attains age 70 ½ and ends on the Benefit Commencement Date. The actuarial increase shall be calculated based on the interest rate and mortality table used in determining Present Value.

Notwithstanding the foregoing, pension payments to a Participant who owns more than 5 percent of the outstanding stock of an Employer or stock possessing more than 5 percent of the total combined voting power of all stock of an Employer, shall commence on April 1 of the year following the year during which the Participant attains age 70 ½.

The pension payments of a Participant in the Traditional Pension Plan who is employed after Normal Retirement Date shall be actuarially increased to reflect any month in which the Participant completes an hour of service described in Section 202(a)(3)(B) of ERISA on fewer than eight days. The actuarial increase shall be calculated based on the interest rate and mortality table used in determining Present Value.

Notwithstanding any provision in the Plan to the contrary, all distributions from the Plan, including distributions under Article V of the Plan, shall be made in accordance with Code Section 401(a)(9) and the regulations thereunder, including the incidental benefit requirement of Section 1.401(a)(9)-2 of the Proposed Income Tax Regulations.

3.2(c) Timing of Pension Payments: Mandatory Commencement—Notwithstanding anything in the Plan to the contrary, unless the Participant otherwise elects, pension payments to the Participant will begin not later than 60 days after the latest of the close of the Plan Year in which (i) occurs the date on which the Participant attains the earlier of age 65 or the Participant's Normal Retirement Date; (ii) occurs the 10th annual anniversary of the year in which the Participant commenced participation in the Plan; or (iii) the Participant terminates service with the Employer.

3.2(d) Cessation of Pension Payments—Except as provided in Article V, monthly pension payments shall permanently cease upon the death of the Participant, effective with the pension payment for the month following the month of the Participant's death. Monthly pension payments shall cease upon the Employer's reemployment of a Participant as an Employee. Upon the Participant's subsequent termination of employment with the Employer, the Participant's Gross Pension shall be recalculated and adjusted (including the adjustment described in 3.4(a)) and the Participant shall be given a new election with respect to the form and timing of his/her pension payments if such election otherwise would be available to the Participant.

3.3 Amount of Pension Payments—The pension payments to which a Participant is entitled are calculated based on the Participant's Gross Pension, adjusted as provided in 3.4. The calculation of a Participant's Gross Pension is different depending upon the type of retirement to which the Participant is entitled.

3.3(a) Normal Retirement in the Traditional Pension Plan—The Gross Pension of a Participant in the Traditional Pension Plan entitled to Normal Retirement is calculated as follows:

Gross Pension	=	Normal Retirement Service Percentage	X	Final Average Pay

3.3(b) Early Retirement in the Traditional Pension Plan—The Gross Pension of a Participant in the Traditional Pension Plan entitled to Early Retirement is calculated as follows:

Gross Pension	=	Normal Retirement Service Percentage	X	Final Average Pay	X	Early Retirement Adjustment Factor

3.3(c) Disability Retirement in the Traditional Pension Plan—The Gross Pension of a Participant in the Traditional Pension Plan entitled to Disability Retirement is calculated as follows:

Gross Pension	=	Normal Retirement Service Percentage	X	Final Average Pay	X	Early Retirement Adjustment Factor

Notwithstanding the foregoing calculation, the Gross Pension shall not be less than the lesser of 20% of Final Average Pay, or the Gross Pension the Participant would be entitled to if he/she worked until his/her Normal Retirement Date and had the same Final Average Pay.

3.3(d) Termination Benefits in the Traditional Pension Plan—The Gross Pension of a Participant in the Traditional Pension Plan who has a Severance From Service Date before the Participant is eligible for Normal Retirement, Early Retirement or Disability Retirement, but after accumulating at least five years of Vesting Service (effective January 1, 2008, three years of Vesting Service), is equal to the Participant's Gross Pension as described in 4.1.

Except as provided in 3.3(h), such pension payments shall commence as of the Participant's Normal Retirement Date and, except as provided in 3.3(h), shall be made in monthly installments. If the Participant has, however, at least ten years of Credited Service prior to the Participant's Severance From Service Date, then such pension payments shall commence as of the first day of the month designated in writing by the Participant. The month so designated must be a month (i) no earlier than the month following the attainment of age 55, and (ii) no later than the Participant's Normal Retirement Date. Such written designation must be received by the Plan Administrator before the beginning of the designated month. If a written designation is not received, such pension payments will commence as of the Participant's Normal Retirement Date. Such pension payments are subject to the adjustment under the early receipt provisions set forth in 3.4(c).

3.3(e) Lump Sum in PEP—The Gross Pension of a Participant in PEP who elects an immediate lump sum is calculated as follows:

Gross Pension = Total Pension Credits X Final Average Annual Pay

Notwithstanding the foregoing, the Gross Pension shall not be less than the Present Value of the Participant's Accrued Gross Pension which would have been payable as of the Participant's Normal Retirement Date based on the Participant's Final Average Pay and Credited Service as of December 31, 1999, the definition of Present Value and Accrued Gross Pension in the Plan in effect on January 1, 2000, and the other provisions of the Plan in effect on December 31, 1999. Also, the Gross Pension shall not be less than the Present Value of the deferred annuity under 3.3(g) that would be payable as of the Participant's Normal Retirement Date. If the Participant is subsequently reemployed by the Employer, the Participant shall not be given the option to repay the lump sum payment.

3.3(f) Immediate Annuity in PEP— The Gross Pension of a Participant in PEP who elects an immediate annuity is calculated as 1/12 of the following:

Gross Pension = Total Pension Credits X Final Average Annual Pay **X** Annuity Factor

Notwithstanding the foregoing, the Gross Pension of a Participant who is eligible for Early Retirement or Normal Retirement shall not be less than the Participant's Accrued Gross Pension which would have been payable as of the Benefit Commencement Date based on the Participant's Final Average Pay and Credited Service as of December 31, 1999, the definition of Accrued Gross Pension in the Plan in effect on January 1, 2000, and the other provisions of the Plan in effect on December 31, 1999.

3.3(g) Deferred Annuity in PEP—The Gross Pension of a Participant in PEP who elects a deferred annuity is calculated as 1/12 of the following:

Gross Pension	=	Total Pension Credits	X	Final Average Annual Pay	X	Deferred Annuity Factor	X	Annuity Factor

Notwithstanding the foregoing, the Gross Pension shall not be less than the Participant's Accrued Gross Pension which would have been payable as of the Benefit Commencement Date based on the Participant's Final Average Pay and Credited Service as of December 31, 1999, the definition of Accrued Gross Pension in the Plan in effect on January 1, 2000, and the other provisions of the Plan in effect on December 31, 1999.

3.3(h) Automatic Lump Sum Cash-Out—Notwithstanding anything in the Plan to the contrary, an immediate lump sum payment, in lieu of monthly payments will be made to a Participant (i) in the Traditional Pension Plan, if the Present Value of the Participant's Gross Pension, computed as of the Severance From Service Date, does not exceed $1,000, and (ii) in PEP, if the PEP Gross Pension lump sum under 3.3(e), computed as of the Severance From Service Date, does not exceed $1,000. If the Participant is subsequently reemployed by the Employer, the Participant shall not be given the option to repay the lump sum payment. No payment shall be made from the Traditional Pension Plan, if the Present Value of the Participant's Gross Pension, computed as of the Severance From Service Date, equals or exceeds $1,000, or the PEP, if the PEP Gross Pension lump sum under 3.3(e), computed as of the Severance From Service Date, equals or exceeds $1,000, absent the Participant's affirmative consent prior to the Participant's Normal Retirement Date.

3.4 Miscellaneous Gross Pension Calculation Provisions

3.4(a) Reemployment—As described in 3.2(d), monthly pension payments shall cease upon the Employer's reemployment of a Participant as an Employee, and the Participant's Gross Pension shall be recalculated and adjusted upon the Participant's subsequent termination of employment with the Employer. The Gross Pension of the Participant upon subsequent termination of employment shall be reduced by the value of monthly pension payments received prior to reemployment. The value shall be determined based on the interest rate and mortality table described in Present Value as of the Benefit Commencement Date following the subsequent termination of employment.

3.4(b) Adjustment for Part-Time Schedule—If a Traditional Pension Plan Participant worked a Part-Time Schedule at any time during the period that the Participant was accumulating Credited Service, the Participant's Average Pay described in A-9(i) shall be adjusted by multiplying such Average Pay described in A-9(i) by the following fraction:

Total of Participant's Regularly Scheduled Hours per Workweek During 35 Years of Credited Service With Highest Number of Regularly Scheduled Hours Total of All Regularly Scheduled Hours in Same Period of Credited Service Assuming Workweek of Standard Length Not in Excess of 40 Hours

If a PEP Participant worked a Part-Time Schedule at any time during the period that the Participant was accumulating Credited Service, the Participant's Gross Pension shall equal the sum of (i) the Participant's Total Pension Credits, adjusted as described below, times that portion of the Participant's Average Annual Pay described in A-8(i), and (ii) the Participant's Total Pension Credits, not adjusted as described below, times that portion of the Participant's Average Annual Pay described in A-8(ii). The Participant's Total Pension Credits shall equal the sum of the amounts attributable to each age category in the definition of Total Pension Credits times the following fraction in each age category:

> Total of Participant's Regularly Scheduled Hours per Workweek During Years of Credited Service in Each Age Category Total of All Regularly Scheduled Hours in Same Period of Credited Service Assuming Workweek of Standard Length Not in Excess of 40 Hours

For the purposes of computing the Gross Pension of a Participant who worked a Part-Time Schedule, base rate of pay shall be adjusted to reflect a 40-hour workweek.

3.4(c) Adjustment For Early Receipt in Traditional Pension Plan—If a Participant in the Traditional Pension Plan who is entitled to pension payments under 3.3(d) elects to begin receipt of his/her monthly pension payments prior to the date that the Participant attains age 65, the Participant's Gross Pension shall be reduced to offset the cost of early receipt. Such reduction shall be determined in accordance with the table included in Appendix E.

3.4(d) Adjustment For Survivor Annuity Coverage—A Participant's Gross Pension in the Traditional Pension Plan shall be reduced to offset the cost of providing (i) additional Preretirement Survivor Annuity coverage, and (ii) any Post-retirement Survivor Annuity coverage. A Participant's Gross Pension in PEP shall be reduced to offset the cost of providing any Post-retirement Survivor Benefit coverage. Post-retirement Survivor Annuity and Post-retirement Survivor Benefit coverage reductions shall be determined in accordance with the table included in Appendix F. Preretirement Survivor Annuity coverage reductions shall be determined in accordance with the table included in Appendix H.

3.4(e) Benefit and Benefit Accrual Limitations. Notwithstanding any other provision of the Plan to the contrary, the Gross Pension accrued on behalf of and provided to a Participant under the Plan shall at all times comply with applicable benefit payment and accrual limitations in accordance with Section 401(a)(29) of the Code.

3.5 Severance Plan Payments—Notwithstanding any other provision in the Plan or any Appendix to the contrary, the Gross Pension for a Participant in the PEP who receives severance payments under the Constellation Energy Group, Inc. Severance Plan shall not be less than the "minimum amount" which is the amount of the Participant's Gross Pension as of the Participant's Severance From Service Date based on (i) the Participant's Final Average Annual Pay as of the Participant's Severance From Service Date; (ii) the Participant's age projected to the Participant's Severance End Date (but not older than the greater of the Participant's actual age on the Participant's Severance From Service Date or 65); and (iii) the Participant's Credited Service and Vesting Service computed assuming the Participant were employed until the Participant's Severance End Date, and for a Participant who (x) elects an immediate or deferred annuity, the "minimum amount" shall be computed assuming that the Annuity Factor used to convert the PEP Gross Pension lump sum to an annuity is based on the Participant's age and

Credited Service as of the Participant's Severance End Date and that the Annual Interest Rate used will be as specified by the Plan (i.e., based on the Participant's Severance From Service Date); and (y) elects a deferred annuity to commence later than the first of the month following the Participant's Severance From Service Date the "minimum amount" shall be computed assuming a Deferred Annuity Factor of 1. For purposes of computing the "minimum amount", any reduction for Survivor Annuity coverage will be based on the factors specified by the Plan using the Participant's and the spouse's or the beneficiary's age as of the Participant's Benefit Commencement Date.

Notwithstanding any other provision in the Plan or any Appendix to the contrary, the Gross Pension for a Participant in the Traditional Pension Plan who receives severance payments under the Constellation Energy Group, Inc. Severance Plan shall not be less than the "minimum amount" which is the amount of the Participant's Gross Pension as of the Participant's Severance From Service Date based on (i) the Participant's Final Average Pay as of the Participant's Severance From Service Date (ii) the Participant's age projected to the Participant's Severance End Date (but not older than the greater of the Participant's actual age on the Participant's Severance From Service Date or 65); and (iii) the Participant's Credited Service and Vesting Service computed assuming the Participant were employed until the Participant's Severance End Date, and for a Participant who (x) is eligible for Normal Retirement based on the Participant's age projected to the Participant's Severance End Date and based on the Participant's Credited Service and Vesting Service computed assuming the Participant were employed until the Participant's Severance End Date, for purposes of computing the "minimum amount" the Participant's Benefit Commencement Date shall be assumed to be the later of the first of the month following the Participant's Severance from Service Date or the Participant's Normal Retirement Date; (y) is eligible for Early Retirement based on the Participant's age projected to the Participant's Severance End Date and based on the Participant's Credited Service and Vesting Service computed assuming the Participant were employed until the Participant's Severance End Date, for purposes of computing the "minimum amount" the Participant's Benefit Commencement Date shall be assumed to be the first of the month following the Participant's Severance End Date for purposes of determining the Early Retirement Adjustment Factor; and (z) is not eligible for Normal Retirement or Early Retirement based on the Participant's age projected to the Participant's Severance End Date and based on the Participant's Credited Service and Vesting Service computed assuming the Participant were employed until the Participant's Severance End Date, for purposes of computing the "minimum amount" the Participant's Benefit Commencement Date shall be assumed to be the earliest possible date permitted under the Plan based on the Participant's age projected to the Participant's Severance End Date and based on the Participant's Credited Service and Vesting Service computed assuming the Participant were employed until the Participant's Severance End Date. For purposes of computing the "minimum amount", any reduction for Survivor Annuity coverage will be based on the factors specified by the Plan using the Participant's and the spouse's age as of the Participant's Benefit Commencement Date.

For purposes of calculating the "minimum amount" above, Severance End Date means the last day of the month that includes the end of the severance period under the Constellation Energy Group, Inc. Severance Plan (notwithstanding the termination of the receipt severance benefits due to the Participant's return to employment).

A Participant's "minimum amount" shall be payable on any Benefit Commencement Date allowable under the Plan without regard to this 3.5.

Except as expressly set forth above in this 3.5, this 3.5 will not affect any other provision of the Plan or the Appendix relating to the calculation of a Participant's benefit, including the Severance From Service Date, Final Average Annual Pay, Final Average Pay, the Deferred Annuity Factor, the adjustment for survivor coverage under 3.4(d), or the Annual Interest Rate.

This 3.5 is effective for Participants who commence receiving benefits under the Constellation Energy Group, Inc. Severance Plan on or after June 1, 2003.

4.1 Termination Gross Pension Calculation and Service: Traditional Pension Plan—The Gross Pension of a Participant in the Traditional Pension Plan who has a Severance From Service Date before the Participant is eligible for Normal Retirement, Early Retirement or Disability Retirement, but after accumulating at least five years of Vesting Service (effective January 1, 2008, three years of Vesting Service), is calculated as follows:

Gross Pension =	Projected Gross Pension at Normal Retirement Date	X	Credited Service from Date of Hire to Calculation Date
	____________________		
	Projected Credited Service from the Date of hire to Normal Retirement Date		

In computing the "projected Gross Pension at Normal Retirement Date," it will be assumed that a Participant in the Traditional Pension Plan will continue to work for the Employer until the Participant's Normal Retirement Date, and that the Participant's Final Average Pay at such date will be equal to the Participant's Average Pay as of the calculation date. If the Participant works a Part-Time Schedule as of the calculation date, it will be assumed that the Participant will continue to work a Part-Time Schedule until the Participant's Normal Retirement Date for purposes of the computation.

4.2 Vested Right to Receive a Pension: Generally—A Participant will have a nonforfeitable right to receive a pension under the Plan if he/she has completed at least five years of Vesting Service (effective January 1, 2008, three years of Vesting Service), or is an Employee on or after the later of age 65, or the date which is the fifth anniversary of the Participant's Employment Commencement Date (or, if applicable, the Adjusted Employment Commencement Date).

4.3 Credited Service—Credited Service accumulated by a Participant is used in the computation of a Participant's Gross Pension. Under the Traditional Pension Plan, Participant's Credited Service is equal to the aggregate of all time periods, while classified as a Full-Time Employee, that commence with the Employment Commencement Date (or, if applicable, the Adjusted Employment Commencement Date) and end with the Severance From Service Date. Under PEP, a Participant's Credited Service is equal to the number of months during which an Employee works at least one hour while classified as a Full-Time Employee. Service while an Employee of a subsidiary or affiliate of the Company that is not designated by the Board of Directors (as reflected in Appendix G) under 1.1 shall not be counted in determining Credited Service. Service while an Employee of a subsidiary or affiliate of the Company that is designated by the Board of Directors (as reflected in Appendix G) under 1.1 shall be counted in determining Credited Service only if the Employee is eligible to participate in the Plan because of such service. Credited Service shall not be given to an Employee while classified by the Employer as a leased employee described in Code Section 414(n) or a co-op, work study or summer Employee. Credited Service shall be accumulated in whole years and twelfths of a year.

Notwithstanding the foregoing, a Participant who has at least ten years of Credited Service prior to the date as of which the Participant first receives benefits under the Disability Plan, and who becomes a Disabled Participant on or after January 1, 1994, will continue to accrue Credited Service while a Disabled Participant. The pension payments made on and after August 1, 1999 on behalf of such a Participant who had a Severance From Service Date before January 1, 2000 shall be adjusted to reflect the accruing of Credited Service while a Disabled Participant. The pension payments made on and after August 1, 1999 on behalf of such a Participant who had a Severance From Service Date before January 1, 2000 shall also be adjusted so that the payments are no less than the amount the pension payments would be if the provisions of 3.3(c) had been applicable at the time of such Severance From Service Date.

4.4 Vesting Service—Vesting Service accumulated by a Participant is used in the determination of whether a Participant has a vested right to receive pension payments. A Participant's Vesting Service is determined using the elapsed time method. Under the elapsed time method, the Participant is credited with service equal to the aggregate of all time periods that commence with the Employment Commencement Date (or, if applicable, the Adjusted Employment Commencement Date) and end with the Severance From Service Date.

If a Participant is reemployed within one year from his/her Severance From Service Date, the Participant shall be deemed to have been continuously employed by the Employer during such period, but only for purposes of accumulating Vesting Service. If a Participant dies while performing qualified military service (within the meaning of Section 414(u)(5) of the Code), such Participant shall be credited with Vesting Service for the period of his qualified military service.

4.5 Forfeiture and Restoration of Credited Service and Vesting Service—Once a Participant has at least five years of Vesting Service (effective January 1, 2008, three years of Vesting Service), all Credited Service and Vesting Service, including all subsequently accumulated Credited Service and Vesting Service, is exempt from forfeiture. If an Employee's Severance From Service Date occurs while he/she is zero percent vested under the Plan, such Employee's Credited Service and Vesting Service accumulated prior to such Severance From Service Date shall be forfeited. All amounts so forfeited by a Participant who has a Severance From Service Date shall be deemed distributed to the Participant as of the Participant's Severance From Service Date for purposes of determining whether the Participant received a distribution of his/her entire accrued benefit under the Plan. Any forfeited Credited Service and Vesting Service shall be restored upon reemployment, if the period of time elapsed between the Severance From Service Date and the date of reemployment does not exceed five Plan Years.

Notwithstanding the foregoing, a Participant who received a lump sum payment under 3.3(e) or 3.3(h) shall not be entitled to restoration of Credited Service accumulated prior to the termination of employment that gave rise to the lump sum payment.

Notwithstanding the foregoing, for purposes of computing Credited Service and Vesting Service, the Severance From Service Date of an Employee who is absent from service beyond the first anniversary of the first day of absence by reason of a maternity or paternity absence, is the second anniversary of the first day of such absence. The period of time between the first and second anniversaries of the first day of absence from work is neither a period of service nor a period of severance.

4.6 Military Service—Notwithstanding any provision of this Plan to the contrary, benefits and service credit with respect to qualified military service will be provided in accordance with Code Section 414(u). Effective January 1, 2007, in the case of a Participant who dies while performing qualified military service (as defined in Code Section 414(u)), the survivors of the Participant are entitled to any additional benefits (other than benefit accruals relating to the period of military service) provided under the Plan had the Participant resumed and then terminated employment on account of death.

ARTICLE V—Survivor Coverage

5.1 Preretirement Survivor Annuity: Traditional Pension Plan

5.1(a) Eligibility—If a Participant in the Traditional pension Plan with a vested right to receive a pension dies before the Participant's Benefit Commencement Date (i) the Surviving Spouse or (ii) the Alternate Beneficiary (for a Participant who is not married on his/her date of death or who is married, and who has the appropriate spousal waiver and who names an Alternate Beneficiary that does not predecease the Participant) will be entitled to a Preretirement Survivor Annuity.

A Traditional Plan Participant may name more than one Alternate Beneficiary for a Preretirement Survivor Annuity. If more than one Alternate Beneficiary is named, the Participant must designate the percentage of Preretirement Survivor Annuity attributable to each recipient by delivering an Appropriate Request to the Plan Administrator.

For a Participant who is not married and who either does not name an Alternate Beneficiary or names one or more Alternate Beneficiaries and such Alternate Beneficiary (ies) predeceases the Participant, the default beneficiary for the Preretirement Survivor Annuity will be the Participant's beneficiary under the Company's employee life insurance plan

5.1(b) Value of Coverage—The Preretirement Survivor Annuity is equal to 50% of the deceased Participant's adjusted Gross Pension. The deceased Participant's Gross Pension is adjusted in accordance with the early receipt provisions set forth in 3.4(c) to the extent the Surviving Spouse's Benefit Commencement Date or the Alternate Beneficiary's Benefit Commencement Date is before the Participant's Normal Retirement Date and is permanently reduced for the cost of providing the contingent annuitant reduction factors pursuant to Appendix F.

5.1(c) Duration of Coverage—Coverage under 5.1(b) commences as of the date that the Participant has a vested right to receive a pension. With respect to a particular spouse of the Participant, coverage will cease upon the earliest of (i) the date of death of the spouse, (ii) the date of the divorce of the spouse from the Participant, (iii) the Participant's Benefit Commencement Date or (iv) the date on which a waiver of coverage becomes effective. With respect to an Alternate Beneficiary, coverage will cease upon the earliest of (i) the date of death of the Alternate Beneficiary, (ii) the date on which the Participant revokes his/her election to provide survivor coverage to the Alternate Beneficiary, (iii) the date of marriage of the Participant which date is after the date the Participant named the Alternate Beneficiary and the Participant's spouse has not waived coverage, or (iv) the Participant's Benefit Commencement Date.

5.1(d) Cost of Coverage—A Participant's Gross Pension is not reduced to offset the cost of providing coverage under 5.1(b).

5.2 Preretirement Survivor Annuity: Special Rules in the Traditional Pension Plan

5.2(a) Value of Coverage—Notwithstanding 5.1(b), if a Participant in the Traditional Pension Plan dies after he/she is eligible for Early Retirement, but before the Participant's Benefit Commencement Date, the Preretirement Survivor Annuity is calculated as described in 5.1(b) except that instead of adjusting the deceased Participant's Gross Pension by the early receipt provisions set forth in 3.4(c), the Participant's Gross Pension will be multiplied by the Early Retirement Adjustment Factor, but in no event shall such factor be less than 85%.

5.2(b) Duration of Coverage—Coverage under 5.2(a) commences with the Participant is eligible for Early Retirement. With respect to a particular spouse of the Participant, coverage will cease upon the earliest of (i) the date of death of the spouse, (ii) the date of the divorce of the spouse from the Participant, (iii) the Participant's Benefit Commencement Date or (iv) the date on which a waiver of coverage becomes effective. With respect to an Alternate Beneficiary, coverage will cease upon the earliest of (i) the date of death of the Alternate Beneficiary, (ii) the date on which the Participant revokes his/her election to provide survivor coverage to the Alternate Beneficiary, (iii) the date of marriage of the Participant which date is after the date the Participant named the Alternate Beneficiary and the Participant's spouse has not waived coverage, or (iv) the Participant's Benefit Commencement Date.

5.2(c) Cost of Coverage—A Participant's Gross Pension is not reduced to offset the cost of providing coverage under 5.2(a).

5.2(d) Additional Coverage—A Participant who is eligible for Early Retirement may elect additional Preretirement Survivor Annuity coverage for his/her Surviving Spouse or Alternate Beneficiary. The 50% factor in 5.1(b) may, at the election of such Participant, be increased by a multiple of 5% to a total factor not to exceed 100% and the permanent reduction to the deceased Participant's Gross Pension will be determined as set forth in 3.4(d). The additional coverage commences on the day of receipt of the Participant's election by the Plan Administrator. With respect to a particular spouse, such coverage will cease upon the earliest of (i) the date of death of the spouse, (ii) the date of the divorce of the spouse from the Participant, (iii) the Participant's Benefit Commencement Date, (iv) the date upon which a cancellation of additional coverage in accordance with 6.3(a) becomes effective or (v) the date on which a waiver of coverage becomes effective. With respect to an Alternate Beneficiary, coverage will cease upon the earliest of (i) the date of death of the Alternate Beneficiary, (ii) the date on which the Participant revokes his/her election to provide survivor coverage to the Alternate Beneficiary, (iii) the date of marriage of the Participant which date is after the date the Participant named the Alternate Beneficiary and the Participant's spouse has not waived coverage, (iv) the Participant's Benefit Commencement Date or (v) the date upon which a cancellation of additional coverage in accordance with 6.3(a) becomes effective.

5.2(e) Cost of Additional Coverage—A Traditional Pension Plan Participant's Gross Pension is permanently reduced to offset the cost of providing the additional coverage under 5.2(d). Such reduction is determined as set forth in 3.4(d). The reduction in the Participant's Gross Pension to offset the cost of providing the additional Preretirement Survivor Annuity coverage will only reflect the period, if any, during which the additional coverage is effective.

5.2(f) Lump Sum Payment: Traditional Pension Plan—A Surviving Spouse or an Alternate Beneficiary entitled to a Preretirement Survivor Annuity may elect in writing to receive the Present Value of the Preretirement Survivor Annuity in a lump sum, if the following requirements are satisfied:

(i) The Participant's death occurs prior to the month before the Participant's 55th birthday; and

(ii) The Present Value of the Preretirement Survivor Annuity, computed as of the end of the month of the Participant's death, exceeds $5,000. If the Present Value of the Preretirement Survivor Annuity computed as set forth in (ii) is an amount that does not exceed $5,000, a lump sum payment for such amount will be made to the Surviving Spouse or the Alternate Beneficiary in lieu of monthly installments.

5.3 Post-retirement Survivor Annuity: Traditional Pension Plan

5.3(a) Eligibility—If a Participant in the Traditional Pension Plan who is receiving monthly pension payments under the Plan dies on or after the Participant's Benefit Commencement Date, the Surviving Spouse or the Alternate Beneficiary will be entitled to a Post-retirement Survivor Annuity unless coverage was waived. However, the Surviving Spouse or the Alternate Beneficiary of a Traditional Pension Plan Participant who received a lump sum payment is not entitled to a Post-retirement Survivor Annuity.

5.3(b) Value of Coverage—The Post-retirement Survivor Annuity is equal to 50% of the Participant's monthly pension payments.

5.3(c) Duration of Coverage—Coverage under 5.3(b) commences as of the Participant's Benefit Commencement Date. Coverage will cease upon the date of death of the Surviving Spouse or the Alternate Beneficiary.

5.3(d) Cost of Coverage—A Participant's Gross Pension is permanently reduced to offset the cost of providing coverage under 5.3(b). Such reduction is determined as set forth in 3.4(d).

5.4 Post-retirement Survivor Annuities: Special Rules for the Traditional Pension Plan

5.4(a) Additional Coverage—A Participant in the Traditional Pension Plan may elect additional Post-retirement Survivor Annuity coverage for his/her Surviving Spouse or his/her Alternate Beneficiary. The 50% factor in 5.3(b) may, at the election of such Participant, be increased by a multiple of 5% to a total factor not to exceed 100%. The additional coverage commences as of the Participant's Benefit Commencement Date. Such coverage will cease as set forth in 5.3(c).

5.4(b) Cost of Additional Coverage—A Participant's Gross Pension is permanently reduced to offset the cost of providing the additional coverage under 5.4(a). Such reduction is determined as set forth in 3.4(d).

5.5 Form of Survivor Annuity Payments: Traditional Pension Plan—Except as provided in 5.2(f), all Survivor Annuity payments under the Traditional Pension Plan are paid in monthly installments.

5.6 Timing of Survivor Annuity Payments: Traditional Pension Plan

5.6(a) Commencement of Preretirement Survivor Annuity Payments – Preretirement Survivor Annuity payments in the Traditional Pension Plan shall commence as of the first day of the month designated by the Surviving Spouse in writing. The date designated may be no earlier than the later of (i) the first day of the month following the month of the Participant's death or (ii) the first day of the month following the date the deceased Participant would have attained age 55, and may be no later than the later of (i) the Participant's Normal Retirement Date, or (ii) the first day of the month following the month of the Participant's death. The Preretirement Survivor Annuity payments in the Traditional Pension Plan to an Alternate Beneficiary shall be made as of the first day of the month following the Participant's death.

5.6(b) Cessation of Survivor Annuity Payments —Survivor Annuity payments shall permanently cease upon the death of the Surviving Spouse or the Alternate Beneficiary, effective with the Survivor Annuity payment for the month following the month of the Surviving Spouse's or the Alternate Beneficiary's death.

5.7 Change in Survivor Annuity Recipient: Traditional Pension Plan —If subsequent to the date of the commencement of (i) pension payments that were reduced to offset the cost of providing Post-retirement Survivor Annuity coverage or (ii) Preretirement Survivor Annuity payments, a person (other than the individual taken into account in determining the amount of such payments) asserts a right to a Survivor Annuity, no Survivor Annuity payments will be made to such person until the Plan has been repaid the cumulative additional reduction, if any, in pension payments that should have been made to offset the cost of providing Survivor Annuity coverage or payments for such person.

5.8 Preretirement Survivor Benefit: PEP

5.8(a) Eligibility—If a Participant in PEP with a vested right to receive a pension dies before the Participant's Benefit Commencement Date (i) the Surviving Spouse or (ii) the Alternate Beneficiary (for a Participant who is not married on his/her date of death or who is married, and who has the appropriate spousal waiver and who names an Alternate Beneficiary that does not predecease the Participant) will be entitled to a Preretirement Survivor Benefit.

A PEP Participant may name more than one Alternate Beneficiary for a Preretirement Survivor Benefit. If more than one Alternate Beneficiary is named, the Participant must designate the percentage of Preretirement Survivor Benefit attributable to each recipient by delivering an Appropriate Request to the Plan Administrator.

For a Participant who is not married and who either does not name an Alternate Beneficiary or names one or more Alternate Beneficiaries and such Alternate Beneficiary(ies) predeceases the Participant, the default beneficiary for the Preretirement Survivor Benefit will be the Participant's beneficiary under the Company's employee life insurance plan.

5.8(b) Value of Coverage—The Preretirement Survivor Benefit is equal to 100% of the deceased Participant's Gross Pension. If a married PEP Participant dies and does not have a spousal waiver, the Surviving Spouse will receive a deferred annuity described in 3.3(g), unless the Surviving Spouse elects within 60 days of the Participant's date of death to receive a lump sum described in 3.3(e) or an immediate annuity described in 3.3(f). The deferred annuity will begin as of the first day of the month designated in writing by the Surviving Spouse, which is after the date the Participant would have attained age 55 and not later than the Participant's Normal Retirement Date. The immediate or deferred annuity will be calculated based on the Surviving Spouse's age as of the date the annuity begins. If a PEP Participant who is not married or who is married and has a spousal waiver dies, the Alternate Beneficiary will receive a lump sum described in 3.3(e).

5.8(c) Duration of Coverage—Coverage under 5.8(b) commences as of the date that the Participant has a vested right to receive a pension.

With respect to a particular spouse of the Participant, coverage will cease upon the earliest of (i) the date of death of the spouse, (ii) the date of the divorce of the spouse from the Participant, (iii) the date on which a waiver of coverage becomes effective, or (iv) the Participant's Benefit Commencement Date. With respect to an Alternate Beneficiary, coverage will cease upon the earliest of (i) the date of death of the Alternate Beneficiary, (ii) the date on which the Participant revokes his/her election to provide survivor coverage to the Alternate Beneficiary, (iii) the date of marriage of the Participant and his/her spouse, which date is after the date the Participant named the Alternate Beneficiary, or (iv) the Participant's Benefit Commencement Date.

5.8(d) Cost of Coverage—A Participant's PEP payments are not reduced to offset the cost of providing coverage under 5.8.

5.9 Post-retirement Survivor Benefit: PEP

5.9(a) Eligibility—If a Participant in PEP who is receiving monthly pension payments under the Plan dies on or after the Participant's Benefit Commencement Date, (i) the Surviving Spouse will be entitled to a Post-retirement Survivor Benefit unless it is waived or (ii) any named Alternate Beneficiary (for a Participant who is not married, or who is married and who has the appropriate spousal waiver and who names an Alternate Beneficiary) will be entitled to a Post-retirement Survivor Benefit.

A PEP Participant may name only one Alternate Beneficiary for the Post-retirement Survivor Benefit. Only an individual may be named as an Alternate Beneficiary. If the Participant received a lump sum payment, then no Post-retirement Survivor Benefit is available.

5.9(b) Value of Coverage—The Post-retirement Survivor Benefit is equal to 50% of the Participant's monthly pension payments.

5.9(c) Duration of Coverage—Coverage under 5.9(b) commences as of the Participant's Benefit Commencement Date. Coverage will cease upon the date of death of the Surviving Spouse or the date of death of the Alternate Beneficiary, whichever is applicable.

5.9(d) Cost of Coverage—A Participant's Gross Pension is permanently reduced to offset the cost of providing coverage under 5.9(b). Such reduction is determined as set forth in 3.4(d).

5.10 Post-retirement Survivor Benefit: Special Rules for PEP

5.10(a) Additional Coverage—A Participant in PEP may elect additional Post-retirement Survivor Benefit coverage for his/her Surviving Spouse or Alternate Beneficiary. The 50% factor in 5.9(b) may, at the election of such Participant, be increased by a multiple of 5% to a total factor not to exceed 100%. The additional coverage commences as of the Participant's Benefit Commencement Date. Such coverage will cease as set forth in 5.9(c).

5.10(b) Cost of Additional Coverage—A Participant's Gross Pension is permanently reduced to offset the cost of providing the additional coverage under 5.10(a). Such reduction is determined as set forth in 3.4(d).

5.11 Form of Survivor Benefit Payments: PEP—Except as provided in 5.12, Preretirement Survivor Benefit payments under PEP are payable in the form described in 5.8(b). Post-retirement Survivor Benefits under PEP are paid in monthly installments.

5.12 Automatic Cash-Out: PEP—If a Participant in PEP dies before his/her Benefit Commencement Date and the PEP Gross Pension lump sum amount described in 3.3(e) computed as of the end of the month of the Participant's death does not exceed $5,000, then the Preretirement Survivor Benefit will be paid in a lump sum.

5.13 Timing of Survivor Benefit Payments: PEP

5.13(a) Commencement of Preretirement Survivor Benefit Payments —Preretirement Survivor Benefit payments to a Surviving Spouse shall commence as of the first day of the month designated in writing by the Surviving Spouse. The date so designated must be later than the month of the Participant's death but not later than the later of (i) the Participant's Normal Retirement Date, or (ii) the first day of the month following the month of the Participant's death. The Preretirement Survivor Annuity payment in PEP to an Alternate Beneficiary shall be made as of the first day of the month following the Participant's death.

5.13(b) Cessation of Survivor Benefit Payments—Preretirement Survivor Benefit payments and Post-retirement Survivor Benefit payments shall permanently cease upon the death of the Surviving Spouse or Alternate Beneficiary, effective with the Survivor Benefit payment for the month following the month of the Surviving Spouse's or Alternate Beneficiary's death.

5.14 Election Period Survivor Benefits—If an active Participant dies during the election period referenced in 1.2, then regardless of any election that the Participant may have already made, the Participant's Surviving Spouse will have the option of electing the Preretirement Survivor Annuity under the Traditional Pension Plan or the Preretirement Survivor Benefit under PEP. The Surviving Spouse must make his/her choice by the later of (i) 60 days after the date the Plan Administrator notifies the Surviving Spouse of the option, or (ii) June 30, 2000. If an active Participant dies during the election period referenced in 1.2 and is not married, then the Alternate Beneficiary will receive the Preretirement Survivor Benefit under PEP. For the purposes of this 5.14, if the Participant is not married and did not name an Alternate Beneficiary then the default beneficiary will be the Participant's beneficiary under the Company's employee life insurance plan. If no beneficiary under the life insurance plan exists, then the default beneficiary will be the Participant's estate.

ARTICLE VI—Procedures; Administration; Claims

6.1 Procedures: Commencement of Payments Under the Plan —Any payment required to be made under the Plan may, at the discretion of the Plan Administrator, be suspended until the name and address of the recipient and all information necessary to determine the amount payable (including, when applicable, but not limited to, the recipient's age, proof of marital status and, if married, an Appropriate Request that includes the name, birth date and current address of the Participant's spouse and which either rejects the 50% Post-retirement Survivor Annuity or Post-retirement Survivor Benefit or accepts such coverage and requests or declines additional coverage) has been received by the Plan Administrator. Generally the Appropriate Request must be executed by the Participant and spouse (or their guardian, attorney-in-fact, or other legal representative), under oath, before a notary public. The signature of a legal representative must be supported by a copy of the instrument effecting the appointment. However, for the purpose of the 50% spousal election for Post-retirement Survivor Annuity or Post-retirement Survivor Benefit, the Appropriate Request does not need to be notarized. Payments that were suspended will be made in a lump sum, without interest, as soon as possible after the Plan Administrator receives such information. The Plan Administrator may, in his/her sole discretion, require assurances in the form of an indemnity agreement or bond, prior to the commencement of any payments, if the accuracy of certain information has not been in his/her opinion conclusively established. To the extent payments have not been claimed during a three year period, all payments will be forfeited. However, if the recipient subsequently files a proper claim with the Plan Administrator for such amounts, and the claim is filed prior to the termination of the Plan, payments that were suspended will be made in a lump sum, without interest, as soon as possible after the Plan Administrator receives such claim.

6.1(a) Proof of Marital Status—The Plan Administrator may rely on a notarized written declaration made on an Appropriate Request that a Participant is presently unmarried unless (i) the Participant's spouse is currently a designated beneficiary under any Employer-sponsored life insurance, or (ii) the Participant's spouse is currently a dependent under any Employer-sponsored group health insurance. If (i) or (ii) above indicate that a spouse exists, the resulting presumption will be overcome if the notarized written declaration is supported by a copy of a death certificate or final decree of divorce or annulment which, in the Plan Administrator's sole discretion, appears to have been properly issued. If an allegedly estranged spouse can't be reached by certified mail, return receipt requested, at the last known address of the spouse, the Plan Administrator, in his/her sole discretion, may accept the Appropriate Request without the signature of the spouse (or the spouse's legal representative).

6.2 Procedures: Written Explanation of Survivor Annuity Coverage—

6.2(a) Additional Preretirement Survivor Annuity Coverage—Within one year of the date the Participant in the Traditional Pension Plan becomes eligible for additional Preretirement Survivor Annuity coverage, the Plan Administrator shall furnish to the Participant a written explanation of (i) the terms and conditions of the additional Preretirement Survivor Annuity coverage, and (ii) the Participant's right to elect or change or cancel an election of the additional Preretirement Survivor Annuity coverage.

6.2(b) Preretirement Survivor Benefit—The Plan Administrator shall furnish to the Participant in PEP a written explanation of (i) the terms and conditions of the Preretirement Survivor Benefit, (ii) the Participant's right to designate the beneficiary of the Preretirement Survivor Benefit, (iii) the rights of the Participant's spouse, and (iv) the right to change or revoke a beneficiary designation. The written explanation shall be provided to the Participant (A) as soon as practicable after the Participant begins to participate in PEP, (B) between January 1 of the year the Participant attains age 32 and December 31 of the year the Participant attains age 34, unless the date in (A) is subsequent to January 1 of the year the Participant attains age 32, (C) within one year after the Participant's Severance From Service Date provided that (a) the Participant's Severance From Service Date occurs before the Participant attains age 35, (b) the Participant is vested at his/her Severance From Service Date, (c) the Participant does not have a Benefit Commencement Date before the written explanation is provided, and (d) the written explanation was not otherwise provided within one year before the Participant's Severance From Service Date, and (D) as soon as practicable after the Participant is rehired.

6.2 (c) Post-retirement Survivor Annuity or Post-retirement Survivor Benefit —(i) The Plan Administrator shall furnish to the Participant a written explanation of (A) the terms and conditions of the Post-retirement Survivor Annuity or Post-retirement Survivor Benefit, (B) the Participant's right to make and the effect of an election to waive the Post-retirement Survivor Annuity or the Post-retirement Survivor Benefit, (C) the rights of the Participant's spouse, and (D) the right to make, and the effect of, a withdrawal of a previous election to waive the Post-retirement Survivor Annuity or Post-retirement Survivor Benefit.

(ii) The written explanation shall be provided to the Participant no more than 180 and no less than 30 days before the Participant's Benefit Commencement Date, subject to the following exception:

(A) The written explanation may be provided less than 30 days before the Benefit Commencement Date provided that the Participant is given a specified period of at least 30 days to make the election (and that other Plan requirements are satisfied); and

(B) A Participant may affirmatively elect, with the Participant's Spouse's consent, to waive the minimum 30-day election period. The waiver of the minimum 30-day period will be effective only if:

(I) the Participant and the Participant's Spouse have been clearly informed of the right to have a minimum 30-day election period to consider whether to waive the Post-retirement Survivor Annuity or Post-retirement Survivor Benefit;

(II) the distribution begins at least 7 days after the date that the written explanation is provided; and

(III) the Participant is permitted to revoke an election, and the Spouse is permitted to revoke a consent, until the later of the Benefit Commencement Date or the expiration of the 7-day period that begins the day after the written explanation is provided.

6.3 Procedures: Election of Survivor Annuity Coverage —

6.3(a) Additional Preretirement Survivor Annuity Coverage —As described in 5.2(d), a Participant in the Traditional Pension Plan may elect to change or cancel an election of the additional Preretirement Survivor Annuity coverage on an Appropriate Request at any time between the date the Participant becomes eligible for the additional Preretirement Survivor Annuity coverage and the Participant's Benefit Commencement Date. Such election, change or cancellation shall not require the consent of the Participant's spouse.

6.3(b) Preretirement Survivor Benefit—A Participant in PEP may select his/her spouse, an individual or a trust to be his/her beneficiary of the Preretirement Survivor Benefit, and may change his/her selection, on an Appropriate Request, at any time before his/her Benefit Commencement Date. If the Participant selects a beneficiary other than his/her spouse, the selection shall be effective only if the Participant is not married on his/her date of death or the individual who is the spouse of the Participant on the Participant's date of death has consented to the selection in writing and such consent was witnessed by a notary public. Notwithstanding the preceding sentence, if the Participant selects a beneficiary other than the Participant's spouse and the Participant's spouse consents to such election prior to January 1 of the year the Participant attains age 35, the designation and waiver shall become ineffective on such January 1, unless the Participant does not have a surviving spouse on the Participant's date of death.

6.3(c) Post-retirement Survivor Annuity or Post-retirement Survivor Benefit —After the Plan Administrator provides the Participant with the written explanation in 6.2(c)(i) during the period in 6.2(c)(ii), a Participant in the Traditional Pension Plan may waive the Post-retirement Survivor Annuity or may elect additional Post-retirement Survivor Annuity coverage by an Appropriate Request. A Participant in the Traditional Pension Plan may revoke such waiver or election and make a new election until the

Participant's Benefit Commencement Date (or, if later, the expiration of the 7-day period that begins after the written explanation is provided), without limit on the number of changes that may be made. After the Plan Administrator provides the Participant with the written explanation in 6.2(c)(i) during the period in 6.2(c)(ii), a Participant in PEP may waive the Post-retirement Survivor Benefit with the Participant's spouse as beneficiary or may elect additional Post-retirement Survivor Benefit coverage with the Participant's spouse as beneficiary, or may select a beneficiary other than the Participant's spouse by an Appropriate Request. A Participant in PEP may revoke such waiver or election and make a new election until the latest of the Participant's Benefit Commencement Date, the expiration of the 7-day period that begins after the written explanation is provided), and 60 days after the Participant's Severance From Service Date (but not later than the date of distribution) without limit on the number of changes that may be made. If the Participant waives the Post-retirement Survivor Annuity or the Post-retirement Survivor Benefit with his/her spouse as beneficiary or selects a beneficiary other than his/her spouse for the Post-retirement Survivor Benefit, the waiver or selection shall be effective only if the Participant is not married on his/her Benefit Commencement Date or the Participant's spouse on the Participant's Benefit Commencement Date has consented to the waiver or selection in writing and such consent was witnessed by a notary public.

6.4 Plan Administration: The Administrative Committee

6.4(a) Generally—The Administrative Committee shall consist of members of senior management of the Company appointed from time to time by the Chief Executive Officer of the Company. The Chairman of the Committee shall be the Chief Human Resources Officer of the Company. A member of the Committee may resign by delivering his/her written resignation to the Chairman of the Committee. A written resignation shall become effective as of the date specified therein. No member of the Committee shall receive compensation from the Plan for his/her services as a member.

6.4(b) The Administrative Committee: Authority and Duties —The Administrative Committee has the authority to adjudicate claims appeals as set forth in Section 6.8, and to delegate, in writing, any part of its authority and duties to one or more designees.

6.5 Plan Administration: The Investment Committee

6.5(a) Generally—The Investment Committee shall consist of members of senior management of the Company appointed from time to time by the Chief Executive Officer of the Company. The Chairman of the Committee shall be the Chief Financial Officer of the Company. A member of the Committee may resign by delivering his/her written resignation to the Chairman of the Committee. A written resignation shall become effective as of the date specified therein. No member of the Committee shall receive compensation from the Plan for his/her services as a member.

6.5(b) Authority and Duties—The Investment Committee has the authority and responsibility, subject to the review and modification of the Board of Directors:

(i) to develop and implement strategies for the custody and management of Plan assets in accordance with its investment policy statement,

(ii) to engage in negotiations related to the custody or management of Plan assets,

(iii) to exercise all rights reserved to the Company as party to a contract or trust instrument related to the custody or management of its assets,

(iv) to delegate, in writing, any part of its authority and duties to one or more designees, and

(v) to report annually to the Board of Directors.

6.6 Plan Administration: The Plan Administrator

6.6(a) Generally—The Plan will be administered by the Director – Benefits of the Company (or the successor to that function) as Plan Administrator, under the direct supervision of the Chief Human Resources Officer of the Company (or under the supervision of the officer succeeding to that function).

6.6(b) Authority and Duties—The Plan Administrator will establish policies and procedures necessary to efficiently operate the Plan. The Plan Administrator is responsible for the day to day operation of the Plan. The Plan Administrator will:

(i) furnish when due all required information and reports to Participants and regulatory agencies, and

(ii) receive all communications from Participants and regulatory agencies about the Plan and take appropriate action in response thereto. The Plan Administrator may, in writing, delegate any part of his/her authority and duties to one or more designees. The designee or the Plan Administrator may withdraw the designation in writing.

6.7 Plan Administration: Indemnification—The Plan Administrator (and his/her designees), the Board of Directors, Chairman of the Board of Directors, Vice Chairman of the Board of Directors, Administrative Committee and Investment Committee members, the –Chief Human Resources Officer (or the officer succeeding to that function) of the Company and all employees of the Employer whose duties involve Plan matters, shall be indemnified by the Company, or from the proceeds under insurance policies purchased by the Company, against any and all liabilities arising by reason of any act or failure to act made in good faith pursuant to the provisions of the Plan, including expenses reasonably incurred in the defense of any claim relating thereto.

6.8 Plan Administration: Claims

6.8(a) Denial of Claim—If after a Participant makes a written claim for benefits, such claim is denied in full or in part, the Plan Administrator shall, within 90 days after receipt of the claim, provide the Participant (at the Participant's last address appearing on the records of the Plan) with written notice by mail, in language calculated to be understood by the Participant, of the denial of the claim stating (i) the specific reasons for the denial, (ii) the specific references to pertinent Plan provisions on which the denial is based, (iii) any additional material or information necessary for the Participant to resubmit the claim, including an explanation of why such material or information is necessary, and (iv) an explanation of the claims appeal procedure. If special circumstances require an extension of time to process the claim, within 90 days after receipt of the claim, the Plan Administrator shall provide the Participant with written notice by mail specifying the reasons for the need for an extension of time, and a date by which he/she expects to render a decision. In that event, the initial 90 day period for notice of denial shall be extended by an additional 90 days.

6.8(b) Appeal of Claim—If a Participant's written claim has been denied or if the Participant has not received written notice of denial within the period prescribed by 6.8(a), he/she may file an appeal with the –Administrative Committee. The Participant or his/her duly authorized representative may request to review pertinent documents. The appeal must be submitted in writing within 60 days of the date the Participant receives or should have received notice of the denial. The appeal may be made by the Participant or his/her duly authorized representative. The appeal must state the reasons for the appeal and shall be accompanied by any evidence or documentation to support the Participant's position. The –Administrative Committee shall review the Participant's appeal promptly and shall advise the Participant of his/her decision in writing, in language calculated to be understood by the Participant, stating the specific reasons for his/her decision withspecific reference to pertinent Plan provisions on which the decision is based. This written decision shall be sent to the Participant (at his/her last address appearing on the records of the Plan) by mail no later than 60 days after receipt of the written appeal, unless special circumstances require an extension of time for processing the appeal, obtaining more information or conducting an investigation of the facts. In no event shall the written decision be sent to the Participant later than 120 days after receipt by the –Administrative Committee of the written appeal. The determination of the –Administrative Committee shall be final and binding on all parties and not subject to further appeal.

6.8(c) Exclusive Method—The procedure for review of claims outlined in this 6.8 is the exclusive method available for resolving claims under the Plan, notwithstanding the existence of other Employer procedures applicable to Employee grievances in other areas. No Participant or beneficiary is entitled to bring any action, whether at law or in equity against any Employer or their respective agents, officers, directors or employees, including the Administrative Committee, the Investment Committee, the Plan Administrator, his/her designees, or the –Chief Human Resources Officer of the Company (or any officer succeeding to that function) in connection with any right, privilege or benefit provided under this Plan unless and until, as a condition precedent, all the remedies provided under this Section 6.8 have been exhausted.

6.9 Direct Rollover of Eligible Rollover Distributions—This 6.9 applies to distributions made on or after January 1, 1993, or such other effective date as specified herein. Notwithstanding any provision of the Plan to the contrary that would otherwise limit a distributee's election under this 6.9; a distributee may elect, at the time and in the manner prescribed by the Plan Administrator, to have any portion of an eligible rollover distribution paid directly to an eligible retirement plan specified by the distributee in a direct rollover.

For purposes of this 6.9, eligible rollover distribution means any distribution of all or any portion of the balance to the credit of the distributee, except that an eligible rollover distribution does not include: any distribution that is one of a series of substantially equal periodic payments (not less frequently than annually) made for the life (or life expectancy) of the distributee or the joint lives (or joint life expectancies) of the distributee and the distributee's designated beneficiary, or for a specified period of ten years or more; any distribution to the extent such distribution is required under Code Section 401(a)(9); and the portion of any distribution that is not includible in gross income (determined without regard to the exclusion for net unrealized appreciation with respect to employer securities).

For purposes of this 6.9, eligible retirement plan means an individual retirement account described in Code Section 408(a), a Roth individual retirement account described in Code Section 408A(b) (subject to current Roth individual retirement account conversion rules), an individual retirement annuity described in Code Section 408(b), an individual retirement annuity described in Code Section 403(a), or a qualified trust described in Code Section 401(a), that accepts the distributee's eligible rollover distribution. Eligible retirement plan shall also mean an eligible deferred compensation plan described in Code Section 457(b) that is maintained by a state, political subdivision of a state, or an agency or instrumentality of a state or an entity exempt from federal income tax, or an annuity contract described in Code section 403(b).

For purposes of this 6.9, a distributee means an Employee or Former Employee. In addition, a Surviving Spouse (or, effective for distributions made after December 31, 2009, a non-spouse beneficiary as described in Code Section 402(c)(11)) and the Employee's or Former Employee's spouse or former spouse who is the alternate payee under a qualified domestic relations order, as defined in Code Section 414(p), are distributees with regard to the interest of the spouse or former spouse.

For purposes of this 6.9, a direct rollover is a payment by the Plan to the eligible retirement plan specified by the distributee.

ARTICLE VII—Plan Funding

7.1 Contributions—No contributions from any Participant shall be required or permitted under the Plan. The Employer shall make contributions in such amounts and at such times as determined by the Investment Committee in accordance with a funding method and policy to be established by the Investment Committee. Forfeitures arising under this Plan shall be applied to reduce the expenses of Plan administration, not to increase the benefits otherwise payable to Participants.

7.2 Payments to the Trustee—All contributions made by the Employer under this Plan shall be paid to the Trustee and shall become assets of the Trust.

ARTICLE VIII—Miscellaneous Provisions

8.1 Inalienability of Benefits: Generally—No benefit or interest available under the Plan will be subject to assignment, attachment, alienation, or other legal process, either voluntarily or involuntarily. Except as provided in 8.1(a), the preceding sentence will also apply to the creation, assignment or recognition of a right to any benefit payable with respect to a Participant pursuant to a domestic relations order. Except as provided in 8.1(b) and 8.7, payments required under the Plan will be made to and in the name of the person entitled to such payments under the terms of the Plan, or to and in the name of such person's authorized representative. Payments to any financial institution to the credit of such person will constitute payments to and in the name of the person entitled to such payments under the terms of the Plan.

8.1(a) Qualified Domestic Relations Orders—The anti-alienation provisions of 8.1 do not apply to qualified domestic relations orders, as the term is defined in Code Section 414(p). The Plan Administrator has established and will maintain written procedures to determine the qualified status of domestic relations orders and to administer distributions under such qualified orders. To the extent provided under a qualified domestic relations order, a former spouse of a Participant shall be treated as the spouse or Surviving Spouse for all purposes under the Plan.

A qualified domestic relations order will not require the Plan to provide any type or form of benefit, or any option, not otherwise provided under the Plan.

Notwithstanding the preceding paragraph, if provided under a qualified domestic relations order, an alternate payee as described in Code Section 414(p) may receive his/her entire interest under the order as a lump sum payment as soon as administratively possible after a domestic relation order is qualified by the Plan Administrator. Such lump sum payment will be limited to (i) in the case of a Participant in the Traditional Pension Plan, the Present Value of the Participant's Gross Pension under 3.3(a), calculated as of the date as of which the lump sum is paid, and (ii) in the case of a Participant in PEP, the PEP Gross Pension lump sum under 3.3(e), calculated as of the date as of which the lump sum is paid. Unless unambiguously stated otherwise in the qualified domestic relations order, such lump sum will equal a percentage or portion (as specified in the order) of the amount described in (i) or (ii) above.

A Participant's Gross Pension (payable at the time and in the form such Gross Pension is actually paid to the Participant or, if the Participant dies before his/her Benefit Commencement Date, payable at the time and in the form the Preretirement Survivor Annuity or Preretirement Survivor Benefit is actually paid to the Surviving Spouse or Alternate Beneficiary) will be reduced by the benefits provided to an alternate payee described in Code Section 414(p)(8) under a qualified domestic relations order. Such Gross Pension will be reduced as follows:

(i) If the alternate payee receives a lump sum payment, the Gross Pension will be reduced by accumulating such lump sum payment with the Annual Interest Rate from the date as of which the lump sum is paid to the Participant's (or the Surviving Spouse's or Alternate Beneficiary's) Benefit Commencement Date, and converting such accumulated amount to the form of payment paid to the Participant (or Surviving Spouse or Alternate Beneficiary) using the Annual Interest Rate and the mortality table described in Code Section 417(e)(3). The Annual Interest Rate in the preceding sentence will be (1) on and after January 1, 2008, the rate of interest specified under Code Section 417(e) as amended by the Pension Protection Act of 2006 and clarified by Revenue Ruling 2007-67 and (2) prior to January 1, 2008, the annual rate of interest on 30-year Treasury securities, in each case for the November of the Plan Year immediately preceding the Plan Year in which the lump sum payment is made to the alternate payee. For distributions with a Benefit Commencement Date on or after January 1, 2003 and prior to January 1, 2008, the mortality table shall be as prescribed in Revenue Ruling 2001-62 and for distributions with a Benefit Commencement Date on or after January 1, 2008, the mortality table shall be as prescribed in Revenue Ruling 2007-67.

(ii) If the alternate payee receives monthly annuity payments and the Participant also receives monthly annuity payments, the alternate payee's monthly annuity payments have a Benefit Commencement Date that is on or after the Participant's Benefit Commencement Date, the alternate payee's monthly annuity payments are payable until a date that is no later than the Participant's date of death, and the alternate payee's monthly annuity payments are no greater than the monthly payment the Participant would receive if the qualified domestic relations order did not exist, the Participant's monthly annuity payments will be reduced by the dollar amount of the monthly annuity payments provided to the alternate payee.

(iii) If the alternate payee receives monthly annuity payments and the conditions in (ii) are not satisfied, the Gross Pension will be reduced by accumulating the Present Value of the alternate payee's monthly annuity payments (with such Present Value being determined as of the date such annuity payments begin to be paid to the alternate payee) with the Annual Interest Rate from the date as of which such Present Value is determined to the Participant's (or Surviving Spouse's or Alternate Beneficiary's) Benefit Commencement Date, and converting such accumulated amount to the form of payment paid to the Participant (or Surviving Spouse or Alternate Beneficiary) using the Annual Interest Rate and the mortality table described in Code Section 417(e)(3). The Annual Interest Rate in the preceding sentence will be (1) on and after January 1, 2008, the rate of interest specified under Code Section 417(e)(3) as amended by the Pension Protection Act of 2006 and clarified by Revenue Ruling 2007-67 and (2) prior to January 1, 2008, the annual rate of interest on 30-year Treasury securities, in each case, for the November of the Plan Year immediately preceding the Plan Year in which the Present Value is determined. For distributions with a Benefit Commencement Date on or after January 1, 2003 and prior to January 1, 2008, the mortality table shall be as prescribed in Revenue Ruling 2001-62 and for distributions with a Benefit Commencement Date on or after January 1, 2008, the mortality table shall be as prescribed in Revenue Ruling 2007-67.

8.1(b) Miscellaneous Exceptions—The anti-alienation provisions of 8.1 do not apply to certain voluntary and revocable assignments or alienations or other arrangements permitted under the Code and ERISA, including under Code Section 401(a)(13) and the applicable Treasury regulations.

8.2 Exclusive Benefit: Generally—Except as provided in 8.2(a), all contributions made by any Employer to any insurance company or Trustee for the purpose of funding the Plan are irrevocable and shall not revert to the Employer. Prior to the satisfaction of all liabilities under the Plan, such contributions, as well as the corpus and income of the Trust, shall not be diverted to or used for purposes other than the exclusive benefit of Participants and their beneficiaries and defraying reasonable expenses of Plan administration, including expenses of service providers who support plan administrative or fiduciary functions.

8.2(a) Exceptions—Any contribution made by an Employer by mistake of fact shall be returned to the Employer provided the return is made within one year after the payment of such contribution to the insurance company or Trustee, and provided further that earnings attributable to the excess contribution may not be returned to the Employer, but losses attributable to the excess contribution must reduce the amount returned.

Any contribution made by an Employer shall be returned to the Employer to the extent the deduction of such contribution is disallowed under Code Section 404, provided the return is made within one year after the disallowance of the deduction by the Internal Revenue Service. For purposes of this provision, all contributions made by an Employer to the Plan are expressly conditioned upon their deductibility under Code Section 404, and any nondeductible contributions must be returned to the Employer.

Any excess assets shall be returned to the Employer upon the Plan’s termination, but only after satisfaction of all Plan liabilities to Participants and their beneficiaries.

8.3 No Right to Employment—Nothing contained in the Plan shall be construed as a contract of employment between an Employer and any Employee, or as a right of any Employee to continue in the employment of an Employer or as a limitation of the right of an Employer to discharge an Employee with or without cause.

8.4 Controlling Law—The Plan and its administration shall be governed by the laws of the State of Maryland except to the extent preempted by Federal law.

8.5 Number—Words used in the singular are intended to include the plural, whenever appropriate.

8.6 Titles and Headings—Titles of Articles and headings to Sections in the Plan are placed herein solely for convenience of reference and, in any case of conflict, the text of the Plan, rather than such titles and headings, shall control.

8.7 Payment of Benefits to Incompetents—If the Plan Administrator determines that any participant, spouse or beneficiary is unable to care for his affairs because of minority, illness, infirmity, accident or any other reason, any distributions due may be made at the direction of the Plan Administrator to the guardian, conservator, legal representative, spouse, child, parent or other blood relative or to any person deemed by the Plan Administrator to have incurred expenses for such participant, spouse, or beneficiary entitled to distributions under the Plan. Such distribution shall, to the extent thereof, be a complete discharge of all liabilities of the Plan, the Employer, the Plan Administrator, the Trustee and the Trust.

ARTICLE IX—Amendment, Termination, Mergers or Consolidations

9.1 Amendment—In the event of the amendment of the Plan as permitted under Article VI, such amendment shall not cause the elimination or reduction of any Plan benefit as prohibited under the provisions of Code Section 411(d)(6).

Unless an amendment or Plan provision specifically provides otherwise, no Plan amendment will have a retroactive or prospective effect on the rights of former Employees whose active employment with the Employer terminated prior to the effective date of the amendment.

9.1(a) Amendment Authority of the Board of Directors —The Board of Directors reserves the right, at their exclusive discretion:

(i) to discontinue or terminate, merge or consolidate the Plan, in whole or in part,

(ii) to determine whether, and to what extent, employees of subsidiaries of the Company will be eligible to participate in the Plan,

(iii) to amend the Plan, in whole or in part, on advice of counsel, and except as otherwise provided herein, the Board of Directors may delegate the right to amend the Plan with respect to certain matters, and

(iv) to delegate to special committees or subcommittees the power to exercise the rights otherwise reserved to the Board of Directors in this Section 9.1(a).

9.1(b) Amendment Authority of the Chairman of the Board of Directors —The Chairman of the Board of Directors has the right, subject to the review and modification of the Board of Directors:

(i) to amend the Plan, from time to time, as shall be necessary or advisable in the interpretation, administration or operation thereof or as required by law, on the advice of counsel.

(ii) to exercise all rights and authority related to the operation of the Plan that are not expressly reserved to the Board of Directors or otherwise delegated by the Board of Directors,

(iii) to appoint the members of the Investment and Administrative Committees, as set forth in Sections 6.4 and 6.5, and

(iii) to delegate, in writing, any part of his/her authority to one or more designees.

9.1(c) Amendment Authority of the Executive Group —Effective July 23, 2010 the Executve Group may approve amendments to the Plan that have less than a $10 million impact on the Plan's accumulated benefit obligation per amendment.

9.1(d) Amendment Authority of the Chief Human Resources Officer —The Chief Human Resources Officer may make any amendment to the Plan that does not increase the annual liabilities of the Plan materially, or as required by law, upon the advice of counsel.

9.1(e) Amendment Authority of the Plan Administrator —The Plan Administrator may make any amendment to the Plan as required by law, upon the advice of counsel.

9.1(f) Report to the Board—At least annually, the Company's Chief Executive Officer shall report all amendments made pursuant to the authorities set forth in Sections 9.1(b) and (c) to the Board of Directors.

9.2 Termination—In the event of the termination or partial termination of the Plan, the rights of all affected Participants entitled to benefits accrued to the date of such termination or partial termination (to the extent funded as of such date) shall be nonforfeitable. A Participant whose benefits were forfeited, in accordance with 4.5, prior to the date of termination or partial termination, shall not be entitled to nonforfeitable benefits as a result of the preceding sentence. In the event of the termination of the Plan, the benefit of any highly compensated employee (and any former highly compensated employee) as those terms are defined in Code Section 414(q) and the related regulations, is limited to a benefit that is nondiscriminatory under Code Section 401(a)(4).

9.3 Merger or Consolidation—In the event of a merger or consolidation of the Plan with, or transfer of assets and liabilities of the Plan to, any other plan, each Participant will receive a benefit immediately after such merger, consolidation, or transfer (computed as if the Plan had then terminated) which is equal to or greater than the benefit the Participant was entitled to immediately before such merger, consolidation, or transfer (computed as if the Plan had then terminated) to the extent required under Section 414(*l*) of the Code.

9.4 Spin Offs To and From the CENG Plan—This 9.4 is effective as of the CENG Effective Date. In any case where assets and liabilities are spun off from or to this Plan, each Participant (whether or not vested) will be entitled to an accrued benefit immediately after such spin off or transfer (computed as if this Plan or the transferee plan, as applicable, had then terminated) that satisfies the requirements of 9.3; provided that such accrued benefit will be payable from the applicable plan if and only if all applicable requirements for payment under the applicable plan are satisfied including, without limitation, applicable vesting requirements. Under no circumstances shall any individual be entitled to duplicate benefits under this Plan and the CENG Plan (or any other qualified defined benefit pension plan sponsored by the Company, CENG or any of their subsidiaries or affiliates).

9.4(a) Introduction—Effective as of the CENG Effective Date, ÉLECTRICITÉ DE FRANCE INTERNATIONAL, SA and its affiliates acquired 49.99 of the membership interests of CENG from the Company; CENG and certain of its affiliates ceased to be Employers or otherwise participate in the Plan; and CENG established and adopted the CENG Plan for the benefit of its employees and certain former Participants in this Plan. As of the CENG Effective Date, the CENG Plan and its related trust received a spin off of assets and liabilities with respect to each employee, former employee, and surviving spouse of a former employee of CENG (or any affiliate or subsidiary thereof the employees of which participated in this Plan prior to the CENG Effective Date) who, immediately prior to the CENG Effective Date, was either (1) an active Participant under this Plan, (2) an inactive Participant or Disabled Participant under this Plan who was entitled to a benefit under this Plan immediately prior to the CENG Effective Date and who was an Employee of an Employer immediately prior to his or her Severance From Service Date or (3) a Surviving Spouse of an individual who would have been described in (1) or (2) had he or she not died prior to the CENG Effective Date. No individual described in the previous sentence shall be entitled to a benefit under or continued participation in the Plan after the CENG Effective Date (except to the extent such individual's benefit is subsequently spun off from the CENG Plan back to this Plan pursuant to 9.4(b) or to the extent such individual is entitled to participate and earn only future benefits under this Plan because he or she is rehired by the Company (or any subsidiary or affiliate thereof the employees of which then participate in the Plan in accordance with the designation of the Board of Directors as reflected in Appendix G) under circumstances where his or her benefit is not spun off from the CENG Plan to this Plan pursuant to this 9.4).

9.4(b) Direct Transfers from CENG—This Plan and the associated Trust will receive a spin off of assets and liabilities from the CENG Plan with respect to each eligible Full-Time Employee of the Company or those designated subsidiaries and affiliates of the Company reflected in Appendix G whose employment is transferred by CENG directly from CENG (or any affiliate or subsidiary thereof the employees of which participate in the CENG Plan) to an Employer after the CENG Effective Date and this Plan and the associated Trust will spin off assets and liabilities to the CENG Plan and its trust with respect to each Former Employee whose employment is transferred by the Company directly from the Company (or a designated subsidiary or affiliate of the Company reflected in Appendix G) to CENG (or any affiliate or subsidiary thereof the employees of which participate in the Prior Plan) after the CENG Effective Date. No Employee or Former Employee of the Employer shall be entitled to a benefit or continued participation in the Plan (or CENG Plan, as the case may be) after the date the assets and liabilities with respect to such employee's benefit are spun off from this Plan and its Trust to the CENG Plan and its trust (or from the CENG Plan and its trust to the Plan and its Trust, as the case may be, and in all cases except to the extent such employee's benefit is subsequently spun back to the other plan pursuant to this paragraph). Under no circumstances shall any individual transferred pursuant to this paragraph be entitled to benefits under this Plan and the CENG Plan (or any other qualified defined benefit pension plan sponsored by the Company, CENG or any of their subsidiaries or affiliates).

9.4(c) Automatic PEP Participation—Except as provided in the next sentence, each Transferred Participant shall become a Participant in the PEP on the date he/she becomes a Full-Time Employee pursuant to the transfer of employment described in 9.4(b). Notwithstanding the foregoing, each Transferred Participant that was a participant in the Traditional Pension Plan immediately prior to the CENG Effective Date and subsequently remained a participant in the corresponding component of the CENG Plan continuously from the CENG Effective Date until the Participant's Transfer Date shall become a Participant in the Traditional Pension Plan on the date he/she becomes a Full-Time Employee pursuant to the transfer of employment described in 9.4(b).

9.4(d) Minimum Benefit—

(i) Traditional Pension Plan—Notwithstanding anything in the Plan to the contrary, the Gross Pension payable to a Transferred Participant in the Traditional Pension Plan under 3.3(a), 3.3(b), 3.3(c), or 3.3(d) shall not be less than the Gross Pension payable to such Participant at the applicable retirement date under the CENG Plan determined immediately prior to such Participant's Transfer Date. For a Transferred Participant in the Traditional Pension Plan, any applicable actuarial adjustment under 3.2(b) shall include periods of active employment recognized as such for purposes of the corresponding actuarial adjustment under the CENG Plan prior to the Transfer Date.

(ii) PEP—Notwithstanding anything in the Plan to the contrary: (a) the Gross Pension payable to a Transferred Participant in the PEP under 3.3(f) or 3.3(g) shall not be less than the Gross Pension or single life annuity payable to such Participant at the Benefit Commencement Date determined under the applicable CENG Plan formula based on the plan provisions, factors and all components of such formula as in effect immediately prior to the Participant's Transfer Date including, for a PEP formula, the Participant's Total Pension Credits and Final Average Annual Pay determined under the applicable CENG Plan as of such date and the provisions of the applicable CENG Plan (including, as applicable, the Annuity Factor and Deferred Annuity Factor) as in effect on such date, and (b) the Gross Pension payable to a Transferred Participant in the PEP under 3.3(e) shall not be less than the Present Value of the deferred annuity payable as of the Participant's Normal Retirement Date under the applicable CENG Plan formula, where such annuity shall be determined immediately prior to the Participant's Transfer Date based on the plan provisions, factors and all components of such formula as in effect immediately prior to the Participant's Transfer Date including, for a PEP formula, the Participant's Total Pension Credits and Final Average Annual Pay determined under the applicable CENG Plan formula and the other provisions of the applicable CENG Plan as in effect on such date.

****

IN WITNESS WHEREOF, this restatement and the appendices attached thereto, effective January 31, 2012, were duly executed on this _______ day of January, 2012.

____

Mary Lauria
Chief Human Resources Officer

APPENDIX A

DEFINITIONS

A-1 “Adjusted Employment Commencement Date” means, with respect to an Employee who terminates employment with the Employer and is subsequently reemployed, the date that is determined by subtracting the period of Credited Service and/or Vesting Service that is restored upon reemployment from the date on which the Employee accumulated one hour of service (i.e., each hour for which an Employee is directly or indirectly paid or entitled to payment by an Employer for the performance of duties) after reemployment.

A-2 “Administrative Committee” means the committee appointed by the Chief Executive Officer of the Company as set forth in 6.4.

A-3 “Alternate Beneficiary” means an individual person(s) and/or trust(s) who is entitled to receive distributions under this Plan upon or after the death of a PEP Participant or Traditional Plan Participant.

A-4 “Annual Interest Rate” means (1) on and after January 1, 2008, the rate of interest specified under Code Section 417(e)(3) as amended by the Pension Protection Act of 2006 and clarified by Revenue Ruling 2007-67 and (2) prior to January 1, 2008, the annual rate of interest on 30-year Treasury securities, in each case, for the November of the Plan Year immediately preceding the Plan Year in which the first day of the month following the Participant’s Severance From Service Date occurs. Effective January 1, 2008, if the Plan is terminated, for purposes of converting a lump sum benefit to an annuity or converting an annuity to a lump sum, the Annual Interest Rate shall be equal to the average of the rates of interest used under this A-4 during the 5-year period ending on the termination date.

A-5 “Annuity Factor” means the factor which is used to convert a PEP Gross Pension lump sum to an annuity. The factor is based on a Participant’s age at the Benefit Commencement Date, the mortality table described in Code Section 417(e)(3), and the Annual Interest Rate. For distributions with a Benefit Commencement Date on or after January 1, 2003 and prior to January 1, 2008, the mortality table used for purposes of satisfying the requirement of Code Section 417(e)(3) is the table prescribed in Revenue Ruling 2001-62 and for distributions with a Benefit Commencement Date on or after January 1, 2008, the mortality table used for purposes of satisfying the requirements of Code Section 417(e)(3) is the table prescribed in Revenue Ruling 2007-67. Notwithstanding the foregoing, the following increase is made to the Annual Interest Rate in determining the Annuity Factor: if (i) the Participant is eligible for Early Retirement under 2.2 on his/her Severance From Service Date or (ii) the Participant becomes a Disabled Participant on or after January 1, 1994, the Participant completes at least ten years of Credited Service prior to the date the Participant first benefits under the Disability Plan, and the Participant ceases to be a Disabled Participant on or after age 55 and prior to age 65.

Age at Benefit Commencement Date	Increase in Annual Interest Rate
50 to 62	+1.0%
63	+0.6%
64	+0.3%
65 or older	+0.0%

If the Surviving Spouse of a Participant in PEP chooses to receive an annuity under 5.8, the Surviving Spouse's age as of the date the annuity begins shall be used in place of the Participant's age at the Benefit Commencement Date to determine the Annuity Factor and the increase in the Annual Interest Rate in determining the Annuity Factor described in the preceding sentence is not applicable.

A-6 "Applicable Interest Rate" means, as set forth in Code Section 417(e)(3)(B), the interest rate which would be used (as of the effective date of the distribution) by the Pension Benefit Guaranty Corporation for purposes of determining the present value of a lump sum distribution on plan termination.

A-7 "Appropriate Request" means a written request by a Participant delivered to the Plan Administrator or his/her designated representative.

A-8 "Average Annual Pay" means for a PEP Participant the average, as described in the next sentence, of the following forms of eligible pay: (i) the base rate of pay of an Employee (before any reductions, and excluding (a) overtime, (b) bonuses and incentives other than certain license bonuses set forth in Appendix I, Part 1 and (c) other forms of extra compensation) plus (ii) bonuses and/or incentives set forth in Appendix I, Part 2, paid by the Employer to an Employee, plus (iii) any military differential wage payments (as defined in Section 3401(h)(2) of the Code). The average is calculated by computing the above amounts paid during the 60-month period (in five consecutive 12 month increments) ending on the last day of the month which includes the Severance From Service Date (the date as of which benefits begin under the Disability Plan in the case of a Disabled Participant) including the base rate of pay described in (i) which the Employee would have been paid for the month which includes the Severance From Service Date if he/she had worked to the end of such month to the last 12 month increment, and then taking the average of the three 12-month periods during which the highest amounts were paid. The base salary of an Employee on unpaid leave of absence shall be considered paid for purposes of calculating Average Annual Pay. For purposes of (i), only license bonuses set forth in Appendix I, Part 1 will be included in the computation of Average Annual Pay. For purposes of (ii), only bonuses and/or incentives that are set forth in Appendix I, Part 2 will be included in the computation of Average Annual Pay. The eligible pay of each Participant for each 12-month increment shall not exceed the limitations set forth in Appendix B, Section B-3. To determine Average Annual Pay for a Transferred Participant, amounts described in (i) and (ii) of this section shall include amounts paid by CENG or other Employer under the applicable CENG Plan, but only to the extent that such amounts (x) would be included for purposes of calculating the Transferred Participant's Average Annual Pay under the applicable CEG PEP Plan if such amounts had been paid by an Employer under this Plan, and (y) were paid during the 60-month period (in five consecutive 12-month increments) ending on the last day of the month that includes the Transferred Participant's Severance From Service Date described above. For a Transferred Participant, depending on the Participant's Severance From Service Date, the Participant's Transfer Date may be within the 60-month period described in A-8 or such period may be entirely after the Participant's Transfer Date.

A-9 “Average Pay” means for a Traditional Pension Plan Participant (i) the base rate of pay of an Employee (before any reductions, and excluding (a) overtime, (b) bonuses and incentives other than certain license bonuses set forth in Appendix I, Part 1 and (c) other forms of extra compensation), for the most current 730 days of active employment (but ending on the date as of which benefits begin under the Disability Plan in the case of a Disabled Participant) excluding any February 29ths, divided by 24, plus (ii) certain bonuses and/or incentives set forth in Appendix I, Part 2 paid by the Employer to an Employee during the same period described in (i), but including any February 29ths, divided by 24, plus (iii) any military differential wage payments (as defined in Section 3401(h)(2) of the Code). The base salary of an Employee on unpaid leave of absence shall be considered paid for purposes of calculating Average Pay. For purposes of (i), only license bonuses set forth in Appendix I, Part 1 will be included in the computation of Average Pay. For purposes of (ii), only bonuses and/or incentives set forth in Appendix I, Part 2 will be included in the computation of Average Pay. The eligible pay of each Participant for the most current 12-month period of active employment and for the immediately preceding 12-month period shall not exceed the limitations set forth in Appendix B, Section B-3. To determine Average Pay for a Transferred Participant, amounts described in (i) and (ii) shall include amounts paid by CENG or other Employer under the CENG Traditional Plan, but only to the extent that such amounts (x) would be included for purposes of calculating the Transferred Participant’s Average Pay under the CEG Traditional Plan if such amounts had been paid by an Employer under this Plan, and (y) were paid during the most current 730 days of active employment described above. For a Transferred Participant, depending on the Participant’s Severance From Service Date, the Participant’s Transfer Date may be within the 730 day period described in A-9 or such period may be entirely after the Participant’s Transfer Date.

A-10 “Benefit Commencement Date” means the date as of which the Participant’s benefits, if any, under the Plan commence.

A-11 “Board of Directors” means the Board of Directors of the Company.

A-11a “CENG” means Constellation Energy Nuclear Group, LLC, and its successors and assigns.

A-11b “CENG Effective Date” means November 6, 2009.

A-11c “CENG Plan” means the applicable plan sponsored by CENG under which a Transferred Participant participated immediately prior to his or her Transfer Date, which plan is either (a) the Pension Plan of Constellation Energy Nuclear Group, LLC, which has two parts known as the “CENG Traditional Plan” and the “CEG PEP Plan,” (b) Appendix Ginna of the Pension Plan of Constellation Energy Nuclear Group, LLC or (c) the Nine Mile Point Pension Plan, each of which is intended to be a defined benefit pension plan qualified under Section 401(a) of the Code and its related trust is intended to be tax-exempt under Section 501(a) of the Code. A-12 “Code” means the Internal Revenue Code of 1986, as amended or replaced from time to time.

A-13 “Company” means Constellation Energy Group, Inc., and its successors and assigns.

A-14 “Credited Service” means the period that is taken into account to determine a Participant’s Gross Pension: (i) during a Participant’s employment with the Employer while classified as a Full-Time Employee (other than a leased employee described in Code Section 414(n) or a co-op, work study or summer employee), or (ii) while a Disabled Participant if such Participant has at least ten years of Credited Service prior to the date as of which the Participant first receives benefits under the Disability

Plan, and becomes a Disabled Participant on or after January 1, 1994. Credited Service is computed as described in 4.3. A Transferred Participant's Credited Service shall include Credited Service under the applicable CENG Plan as determined immediately prior to the Transfer Date. Credited Service shall exclude any periods of military service as described in Section 4.4, unless otherwise required by applicable law.

A-15 "Deferred Annuity Factor" means 1.04 η where η equals the number of years and fractions of a year between the Participant's Severance From Service Date and Benefit Commencement Date. If the Participant works less than a full month,, then full credit will be given for the entire month.

A-16 "Disability Plan" means the Constellation Energy Group, Inc. Long-Term Disability Plan, the Constellation Energy Group, Inc. Disability Insurance Plan, or any successor plan.

A-17 "Disabled Participant" means a Participant who is disabled as that term is defined in the Disability Plan and who is receiving benefits under the Disability Plan. Participants who became Disabled Participants prior to January 1, 1994 are subject to the provisions at Appendix C, Section C-10.

A-18 "Disability Retirement" means a type of retirement available to a Disabled Participant (i) who became a Disabled Participant on or after January 1, 1994, (ii) who is a Participant in the Traditional Pension Plan, (iii) who has at least ten years of Credited Service prior to the date as of which the Participant first receives benefits under the Disability Plan, and (iv) who is at least age 50 (but not yet age 65) when he/she ceases benefiting under the Disability Plan because he/she is determined to be no longer disabled under the terms of such plan.

A-19 “Early Retirement” means a type of retirement available to a Participant who, on his/her Severance From Service Date is at least age 55, and has at least ten years of Credited Service.

A-20 “Early Retirement Adjustment Factor” means, for a Participant in the Traditional Pension Plan with a Benefit Commencement Date that is on or after the date that the Participant attains age 55, or for a Disabled Participant who is age 50 or older, 100 percent less 1/4 of one percent for each month that the Participant is less than age 65 on the Participant’s Benefit Commencement Date. Notwithstanding anything to the contrary, the Early Retirement Adjustment Factor for a Participant in the Traditional Pension Plan who has completed at least 35 years of Credited Service as of his/her Severance From Service Date is 100 percent less 1/4 of one percent for each month that the Participant is less than age 62 on the Participant’s Benefit Commencement Date. For purposes of these calculations, the month of the Participant’s 62nd or 65th birthdays, as appropriate, is excluded.

A-21 “Employee” means any person who is employed by the Employer, but excludes any person who is in the sole judgment of the Employer an independent contractor. Employee shall include leased employees within the meaning of Code Section 414(n)(2), which, effective for Plan Years beginning on or after January 1, 1997, includes any person (other than an Employee of an Employer) who pursuant to an agreement between an Employer and any other person has performed services for an Employer on a substantially full-time basis for a period of at least one year, and such services are performed under the primary direction or control of an Employer, unless the leased employees are covered by a plan described in Code Section 414(n)(5) and such leased employees do not constitute more than 20% of the Employer's nonhighly compensated work force described in Code Section 414(n)(5)(C)(ii).

An Employee may be a Full-Time Employee or an On-Call Employee. A Full-Time Employee is any Employee employed on an ongoing and regular basis who has a basic workweek generally consisting of 40 hours, although Employees who work a Part-Time Schedule with a basic workweek of less than 40 hours are also considered to be Full-Time Employees. On-Call Employees constitute a reasonable classification of Employees who do not have a basic workweek, but rather work on an irregular, "on call" basis and do not participate in any "time off" or related benefit plans and are compensated only for those hours actually worked.

A-22 "Employer" means the Company and any successor which shall maintain this Plan, and any subsidiaries or other affiliates required to be aggregated with the Company under Code Section 414(b), (c), (m) or (o).

A-23 "Employment Commencement Date" means, with respect to an Employee who is not described in "Adjusted Employment Commencement Date," the date on which an Employee first performs an hour of service (i.e., each hour for which an Employee is directly or indirectly paid or entitled to payment by an Employer for the performance of duties) for the Employer.

A-24 "ERISA" means the Employee Retirement Income Security Act of 1974, as amended from time to time.

A-24a “Executive Group” means the Company’s Chief Executive Officer, Chief Financial Officer, General Counsel and Chief Human Resources Officer, collectively.

A-25 “Final Average Annual Pay” means for a Participant in PEP, the Average Annual Pay computed as of the Participant’s Severance From Service Date.

A-26 “Final Average Pay” means for a Participant in the Traditional Pension Plan, the Average Pay computed as of the Participant’s Severance From Service Date. A-27 “Former Employee” means an individual who was formerly an Employee, but who has ceased employment with the Employer.

A-28 “Full-Time Employee” see the definition of “Employee.”

A-29 “Gross Pension” means the monthly benefit or the lump sum benefit computed under a pension formula, before any adjustments.

A-30 “Investment Committee” means the committee appointed by the Chief Executive Officer of the Company as set forth in 6.5.

A-31 “Normal Retirement” means a type of retirement available to a Participant who, on the day preceding his/her Normal Retirement Date, is actively employed or a Disabled Participant and has at least five years of Credited Service.

A-32 “Normal Retirement Date” means the first day of the first month after the later of (i) the date of the Participant’s 65th birthday or (ii) the date which is the fifth anniversary of the Participant’s Employment Commencement Date (or, if applicable, the Adjusted Employment Commencement Date).

A-33 “Normal Retirement Service Percentage” means (i) 1/12 of 1-1/2 percent for each of a Traditional Pension Plan Participant’s first 240 months of Credited Service, plus (ii) 1/12 of 1-1/3 percent for each of the next 180 months of Credited Service.

A-34 “On-Call Employee” —see the definition of “Employee.”

A-34a “Part-Time Schedule” means a job that is scheduled for fewer than either eight hours per base tour or five base tours per payroll week on a regular and ongoing basis. It is intended that this definition conform to the usage of the term part-time in the Company’s Employee Handbook.

A-35 “Participant” means any Employee or Former Employee who is entitled to benefits under the Plan.

A-36 “Pension Equity Plan or ‘PEP’” means the Plan in effect as of January 1, 2000, for those who become Participants pursuant to 1.1 and those Participants who choose it pursuant to 1.2. For a Transferred Participant, “Pension Equity Plan” or “PEP” also means the Plan in effect for those who become Participants pursuant to 9.4(c) who did not become participants in the Traditional Pension Plan pursuant to 9.4(c).

A-37 “Plan” means the Pension Plan of Constellation Energy Group, Inc., which includes the both the Pension Equity Plan and the Traditional Pension Plan.

A-38 “Plan Administrator” means the Director—Benefits of the Company (or the successor to that function).

A-39 “Plan Year” means the Plan’s accounting year of 12 months beginning on January 1 of each year and ending the following December 31.

A-40 “Post-retirement Survivor Annuity” means a Survivor Annuity paid when a Participant with vested benefits under the Traditional Pension Plan dies on or after the Participant’s Benefit Commencement Date.

A-41 “Post-retirement Survivor Benefit” means a survivor benefit paid when a Participant with vested benefits under PEP dies on or after the Participant’s Benefit Commencement Date.

A-42 “Preretirement Survivor Annuity” means a Survivor Annuity paid when a Participant with vested benefits under the Traditional Pension Plan dies before the Participant’s Benefit Commencement Date.

A-43 “Preretirement Survivor Benefit” means a survivor benefit paid when a Participant with vested benefits under PEP dies before the Participant’s Benefit Commencement Date.

A-44 “Present Value” means, as set forth in Code Section 417(e)(3), an amount calculated by using the UP-1984 Mortality Table and (i) by using an interest rate equal to the Applicable Interest Rate if such Present Value is not in excess of $25,000, and (ii) by using an interest rate equal to 120 percent of the Applicable Interest Rate if such Present Value exceeds $25,000 (as determined under (i)). In no event shall the Present Value determined under (ii) be less than $25,000.Notwithstanding the preceding, for payments made as of a date on or after January 1, 2000, “Present Value” means an amount calculated using the interest rate described below and the mortality table described in Code Section 417(e)(3). Prior to January 1, 2008, the interest rate shall be the lesser of (i) the annual interest rate on 30-year Treasury securities for November of the Plan Year immediately preceding the Plan Year that contains the date as of which the payment is made, and (ii) for payments made as of a date on or after January 1, 2000 and before January 1, 2001, the annual interest rate on 30-year Treasury securities for the first full calendar month preceding the date as of which the payment is made. On and after

January 1, 2008, the interest rate shall be rate of interest specified under Code Section 417(e)(3) as amended by the Pension Protection Act of 2006 and clarified by Revenue Ruling 2007-67. Effective January 1, 2008, if the Plan is terminated, for purposes of converting a lump sum benefit to an annuity or converting an annuity to a lump sum, the interest rate described above shall be equal to the average of the rates of interest used under this A-44 during the 5-year period ending on the termination date.

In calculating the "Present Value" of a benefit payable to a Participant, the benefit shall be treated as commencing as of the later of the Participant's Normal Retirement Date and the Benefit Commencement Date. In calculating the "Present Value" of a benefit payable to the Surviving Spouse of a Participant in the Traditional Pension Plan, the benefit shall be treated as commencing as of the first day of the month following the Participant's 55th birthday.

For distributions with a Benefit Commencement Date on or after January 1, 2003 and prior to January 1, 2008, the mortality table used for purposes of satisfying the requirements of Code Section 417(e)(3) is the table prescribed in Revenue Ruling 2001-62. For distributions with a Benefit Commencement Date on or after January 1, 2008, the mortality table used for purposes of satisfying the requirements of Code Section 417(e)(3) is the table prescribed in Revenue Ruling 2007-67.

A-44a "Section 415(c) Compensation" means all amounts required to be reported under Code Sections 6041, 6051, and 6052 (wages, tips, and other compensation as reported on Form W-2). This includes wages, within the meaning of Code Section 3401(a), and all other payments of compensation to an Employee by the Employer (in the course of the Employer's trade or business) for which the Employer is required to furnish the Employee a written statement under Code Sections 6041(d), 6051(a)(3), and 6052. In addition, an Employee's compensation includes any elective deferrals (as defined in Code Section 402(g)(3)), and any amount which is contributed or deferred by the Employer at the election of the Employee and which is not includible in gross income of the Employee by reason of Code Sections 125 or 132(f)(4). An Employee's compensation shall be determined without regard to any rules under Code Section 3401(a) that limit the remuneration included in wages based on the nature or location of the employment or the services performed.

To the extent applicable, Section 415(c) Compensation shall not include amounts in excess of the statutory dollar limitation under Code Section 401(a)(17), as described in Section B-3. Section 415 Compensation includes any differential wage payments (as defined in Section 3401(h)(2) of the Code).

A-45 "Severance From Service Date" means the date on which a Participant ends active employment with the Employer for purposes of the Plan. A Participant ends active employment on the earliest of the date that the Participant quits, retires, is discharged, dies, or the first anniversary of the first date of a period in which the Employee remains absent from service with the Employer for any reason other than quit, retirement, discharge or death.

A-46 Deleted.

A-47 "Surviving Spouse" means, with respect to a Preretirement Survivor Annuity or the Preretirement Survivor Benefit, the person married to a Participant on the Participant's date of death. Surviving Spouse means, with respect to a Post-retirement Survivor Annuity or the Post-retirement Survivor Benefit, the person married to a Participant on the Participant's Benefit Commencement Date.

A-48 “Survivor Annuity” means a monthly benefit payable to the Surviving Spouse or Alternate Beneficiary for the life of the Surviving Spouse or Alternate Beneficiary.

A-49 “Total Pension Credits” means the pension credits provided to a Participant in PEP. A Participant’s pension credits shall equal the sum of (i) 0.05 times the Credited Service earned in each Plan Year prior to the Plan Year in which the Participant reaches age 40, (ii) 0.10 times the Credited Service earned in each Plan Year after the Plan Year in which the Participant reaches age 39 and before the Plan Year in which the Participant reaches age 50, and (iii) 0.15 times the Credited Service earned in each Plan Year after the Participant reaches age 49.

A-50 “Traditional Pension Plan” means the Plan in effect as of January 1, 2000, for those Participants who choose it pursuant to Section 1.2, which is the enhancement to the Plan in effect prior to that date.

A-50a “Transfer Date” means the effective date of the spin off of a Transferred Participant’s benefit from the applicable CENG Plan and merger into this Plan pursuant to 9.4(b).

A-50b “Transferred Participant” means each (a) Full-Time Employee of the Company or those designated subsidiaries and affiliates of the Company reflected in Appendix G with respect to whom assets and liabilities are spun off from the applicable CENG Plan and its related trust and merged into this Plan and its Trust pursuant to 9.4(b) of this Plan.

A-51 “Treasury” means the Federal Treasury Department.

A-52 “Trust” means the trust established for the purpose of holding and managing Plan assets.

A-53 “Trustee” means Citibank, N.A. or any successor Trustee appointed by the Board of Directors.

A-54 “Vesting Service” means the period of a Participant’s employment with the Employer that is taken into account to determine whether a Participant has a vested right to receive a pension. Vesting Service is computed as described in 4.4. A Transferred Participant’s Vesting Service shall include Vesting Service under the applicable CENG Plan as determined immediately prior to the Transfer Date.

APPENDIX B

LIMITATIONS

B-1 Maximum Pension Payment: Code Limits—

(a) Notwithstanding any other provision in the Plan to the contrary, the limitations, adjustments and other requirements prescribed in this B-1 shall at all times be administered in a manner which will result in compliance with the provisions of Code Section 415 and the regulations thereunder, the terms of which are specifically incorporated herein by reference.

(b) For limitation years beginning on or after July 1, 2007, in addition to other limitations set forth in the Plan and notwithstanding any other provisions of the Plan, the "Annual Benefit" otherwise payable to a Participant under the Plan shall not exceed the "Maximum Permissible Benefit" (as defined below). If the benefit the Participant would otherwise accrue in a limitation year would produce an Annual Benefit in excess of the Maximum Permissible Benefit, the benefit shall be limited (or the rate of accrual reduced) to a benefit that does not exceed the Maximum Permissible Benefit. If the Participant is, or ever has been, a participant in another qualified defined benefit plan (without regard to whether the plan has been terminated) maintained by the Employer or its predecessor (within the meaning of Section 1.415(f)-1(c) of the Treasury Regulations), the sum of the Participant's annual benefit from all such plans may not exceed the Maximum Permissible Benefit. The Annual Benefit of a Participant may be increased as the Maximum Permissible Benefit is adjusted in accordance with Code Section 415(d), but only prior to the commencement of pension payments.

(c) For purposes of this B-1 for limitation years beginning on or after July 1, 2007, the “Annual Benefit” means the Gross Pension payable annually under the terms of the Plan in the form of a straight life annuity (exclusive of any benefit not required to be considered for purposes of applying the limitations of Section 415 of the Code). Where the Gross Pension is payable other than a straight life annuity, the benefit shall be adjusted (pursuant to B-1(g)) to an actuarially equivalent straight life annuity that begins at the same time as such other form of benefit and is payable on the first day of each month before applying the limitations of this B-1. The determination of the Annual Benefit shall take into account benefits transferred from another defined benefit plan, other than transfers of distributable benefits pursuant to Section 1.411(d)-4, Q&A-3(c) of the Treasury Regulations, but shall disregard benefits, if any, attributable to employee contributions or rollover contributions.

(d) For limitation years beginning on or after July 1, 2007 for purposes of this B-1, “Maximum Permissible Amount” means the lesser of (i) or (ii) below:

(i) $180,000, adjusted under Section 415(d) of the Code effective January 1 of each year and payable in the form of a straight life annuity. This limitation as adjusted under Section 415(d) of the Code will apply to limitation years ending with or within the calendar year for which the adjustment applies.

(ii) 100% of the Participant’s high three-year compensation, or, if the Participant does not have three consecutive years of service, 100% of the Participant’s average compensation over the longest consecutive period of service (including fractions of years, but not less than one year), payable in the form of a straight life annuity. In the case of a Participant who is rehired by the Employer after a severance from employment, the Participant's high three-year average compensation shall be calculated excluding all years for which the Participant performs no services for and receives no compensation from the Employer and by treating the years immediately preceding and following the break as consecutive.

(iii) Notwithstanding anything in this section to the contrary, the benefit otherwise accrued or payable to the Participant under the Plan shall be deemed not to exceed the Maximum Permissible Benefit if the retirement benefits payable for a limitation year under any form of benefit with respect to such Participant under this Plan and all other defined benefit plans (without regard to whether a plan as been terminated) ever maintained by the Employer do not exceed $10,000 multiplied by a fraction, the numerator of which is the Participant's number of years (or part thereof, but not less than one year) of service (not to exceed 10) with the Employer, and the denominator of which is 10; and the Employer (or predecessor employer) has not at any time maintained a defined contribution plan in which the Participant participated.

(e) For limitation years beginning on or after July 1, 2007 for purposes of this B-1, "compensation" means Section 415(c) Compensation. In addition, for purposes of this B-1 for limitation years beginning on or after July 1, 2007, compensation shall also include amounts paid by the later of 2 1/2 months after a Participant's severance from employment with the Employer or the end of the limitation year that includes the date of such severance from employment if the payment is regular compensation for services (within the meaning of Section 1.415(c)-2(e)(3)(ii) of the Treasury Regulations), commissions, bonuses or other similar payments paid after the Participant's severance from employment (but by the later of 2 1/2 months after such severance from employment or the end of the limitation year that includes the date of such severance from employment) that would have been paid to the Participant absent such severance from employment had the Participant continued in employment with the Employer.

Any payments not described above shall not be considered compensation for purposes of this B-1 for limitation years beginning on or after July 1, 2007 if paid after severance from employment, even if paid by the later of 2 1/2 months after the date of severance from employment or the end of the limitation year that includes the date of such severance from employment, except:

(i) payments to an individual who does not currently perform services for the employer by reason of qualified military service (within the meaning of Code Section 414(u)(1)) to the extent these payments do not exceed amounts the individual would have received if the individual would had continued to perform services for the Employer rather than entering qualified military service; or

(ii) compensation paid to a Participant who is permanently and totally disabled, as defined in Code Section 22(e)(3), provided that salary continuation applies to all Participants who are permanently and totally disabled for a fixed or determinable period, or the Participant was not a highly compensated employee immediately before becoming disabled.

Back pay, within the meaning of Section 1.415(c)-2(g)(8) of the Treasury Regulations, shall be treated as compensation for the limitation year to which the back pay relates to the extent that back pay represents wages and compensation that would otherwise be included as “compensation” as defined herein.

(f) For purposes of complying with Code Section 415, a limitation year means the calendar year.

(g) Adjustments to Annual Benefit and Limitations

(i) For purposes of applying the limits of Code Section 415 and this B-1, for limitation years beginning on or after July 1, 2007, a benefit that is payable in any form other than a straight life annuity and that is not subject to Section 417(e)(3) of the Code must be adjusted to an actuarially equivalent straight life annuity that equals the greater of the annual amount of the straight life annuity (if any) payable under the Plan at the same annuity starting date, and the annual amount of a straight life annuity commencing at the same annuity starting date that has the same actuarial present value as the Participant’s form of benefit computed using an interest rate of 5% and the applicable mortality table for that annuity starting date.

(ii) For Plan benefits subject to Section 417(e)(3) of the Code, the actuarially equivalent straight life annuity for annuity starting dates beginning after 2005 is equal to the greatest of (i) the annual amount of the straight life annuity commencing at the same annuity starting date that has the same actuarial present value as the Participant’s form of benefit, computed using the interest rate and mortality table (or other tabular factor) specified in the Plan for adjusting benefits in the same form; (ii) the annual amount of the straight life annuity commencing at the same annuity starting date that has the same actuarial present value as the Participant’s form of benefit, computed using a 5.5 % interest rate assumption and the applicable mortality table; and (iii) the annual amount of the straight life annuity commencing at the same annuity starting date that has the same actuarial present value as the Participant’s form of benefit, computed using the applicable interest rate and applicable mortality table, divided by 1.05.

(iii) For Plan benefits subject to Section 417(e)(3) of the Code with an annuity starting date in a Plan Year beginning in 2004 or 2005, the actuarially equivalent straight life annuity is equal to the annual amount of the straight life annuity commencing at the same annuity starting date that has the same actuarial present value as the Participant's form of benefit, computed using whichever of the following produces the greater annual amount: (i) the interest rate and mortality table (or other tabular factor) specified in the Plan for adjusting benefits in the same form; and (ii) a 5.5 % interest rate assumption and the applicable mortality table.

(iv) For limitation years beginning on or after July 1, 2007, if the benefit of a Participant begins prior to age 62, the defined benefit dollar limitation (described in B-1(d)(i) above, adjusted as applicable) applicable to the Participant at such earlier age is limited to the lesser of (1) the annual amount of a benefit payable in the form of a straight life annuity commencing at the Participant's annuity starting date that is the actuarial equivalent of the defined benefit dollar limitation (as adjusted under B-1(g)(vi) for years of participation less than 10, if required), with actuarial equivalence computed using a 5% interest rate assumption and the applicable mortality table and expressing the Participant's age based on completed calendar months as of the annuity starting date or (2) the product of the defined benefit dollar limitation (as adjusted under B-1(g)(vi) for years of participation less than 10, if required) multiplied by the ratio of the annual amount of the immediately commencing straight life annuity at the Participant's annuity starting date to the annual amount of the immediately commencing straight life annuity at age 62, both determined without applying the limitations of Code Section 415.

(v) For limitation years beginning on or after July 1, 2007, if the benefit of a Participant begins after the Participant attains age 65, the defined benefit dollar limitation (described in B-1(d)(i) above, adjusted as applicable) is the lesser of (1) the annual amount of a benefit payable in the form of a straight life annuity commencing at the Participant's annuity starting date that is the actuarial equivalent of the defined benefit dollar limitation (as adjusted under B-1(g)(vi) for years of participation less than 10, if required), with actuarial equivalence computed using a 5% interest rate assumption and the applicable mortality table for that annuity starting date (and expressing the Participant's age based on completed calendar months as of the annuity starting date) or (2) the defined benefit dollar limitation (as adjusted under B-1(g)(vi) for years of participation less than 10, if required) multiplied by the ratio of the annual amount of the adjusted immediately commencing straight life annuity under the Plan at the Participant's annuity starting date to the annual amount of the adjusted immediately commencing straight life annuity under the Plan at age 65, both determined without applying the limitations of Code Section 415. For this purpose, the adjusted immediately commencing straight life annuity under the Plan at the Participant's annuity starting date is the annual amount of such annuity payable to the Participant, computed disregarding the Participant's accruals after age 65 but including actuarial adjustments even if those actuarial adjustments are used to offset accruals; and the adjusted immediately commencing straight life annuity under the Plan at age 65 is the annual amount of such annuity that would be payable under the Plan to a hypothetical Participant who is age 65 and has the same accrued benefit as the Participant.

(vi) If the Participant has less than 10 years of participation in the Plan, the defined benefit dollar limitation (described in B-1(d)(i) above, adjusted as applicable) shall be multiplied by a fraction, the numerator of which is the number of years (or part thereof, but not less than one year) of participation in the Plan, and the denominator of which is 10. If the Participant has less than 10 years of service, the defined benefit compensation limit (described in B-1(d)(ii) above) shall be multiplied by a fraction, the numerator of which is the number of years (or part thereof, but not less than one year) of service with the employer, and the denominator of which is 10.

(vii) In applying the limitations in Code Section 415(b), the Code Section 415(b)(2)(E) changes made by the Uruguay Round Agreements Act (GATT) and Small Business Job Protection Act of 1996 shall be effective as of January 1, 2000. For this purpose, the time for determining the applicable interest rate under Code Section 417(e)(3) shall be the November of the Plan Year immediately preceding the Plan Year that contains the Benefit Commencement Date. For distributions with a Benefit Commencement Date on or after January 1, 2003, the applicable mortality table used for purposes of adjusting any benefit or limitation under Code Sections 415(b)(2)(B), (C), or (D) is the table prescribed in Revenue Ruling 2001-62. For limitation years beginning on or after July 1, 2007, the applicable interest rate shall be the first, second, and third segment rates described in Code Section 417(e)(3)(C), for the November of the Plan Year immediately preceding the Plan Year that contains the Benefit Commencement Date and the applicable mortality table shall be the mortality table, as modified by the Secretary of Treasury, described in Section 417(e)(3)(B) of the Code that applies as of the Benefit Commencement Date.

(h) All members of a controlled group of corporations (as defined in Code Section 414(b), commonly controlled trades or businesses (as defined in Code Section 414(c)), or affiliated service groups (as defined in Code Section 414(m)) that include the Employer, and any other entity required to be aggregated with the Employer pursuant to Code Section 414(o) shall be considered as a single employer for purposes of applying the limitations described in Section 415 of the Code and this B-1.

(i) If (i) a Participant is also benefiting under another defined benefit plan sponsored by the Employer or its predecessor, and (ii) reductions in either the amount of the Participant's annual benefit under the Plan or the amount of the Participant's annual benefit under such other plan (or both) are necessary to comply with Code Section 415, a reduction in the Participant's annual benefit under the Plan shall be made to the extent necessary to comply with Code Section 415, prior to any reduction in the Participant's annual benefit any other plan(s).

(j) The application of the provisions of this B-1 shall not cause the Maximum Permissible Benefit for any Participant to be less than the Participant's accrued benefit as of the end of the last limitation year beginning before July 1, 2007 under the provisions of the Plan that were adopted and in effect before April 5, 2007.

B-2 Maximum Pension Payment: Treasury Regulation Limits—Notwithstanding any other provision in the Plan to the contrary, pension payments to the top 25 highly compensated employees and former highly compensated employees, as those terms are defined in Code Section 414(q) and the related regulations, with the greatest compensation (as that term is defined in Code Section 414(s) and the related regulations) in the current Plan Year and any prior Plan Year, shall be restricted as required under Section 1.401(a)(4)-5(b)(3) of the Treasury regulations, unless the exception set forth in such section applies.

B-3 Compensation Limitation Under Code Section 401(a)(17)—In addition to other applicable limitations set forth in the Plan, and notwithstanding any other provision of the Plan to the contrary, for Plan Years beginning on or after January 1, 1994, the annual compensation of each Employee taken into account under the Plan shall not exceed the Omnibus Budget Reconciliation Act of 1993 (hereinafter referred to in this Section B-4 as "OBRA '93") annual compensation limit. The OBRA '93 annual compensation limit is $150,000, as adjusted by the Commissioner of the Internal Revenue Service for increases in the cost of living in accordance with Code Section 401(a)(17)(B). The cost-of-living adjustment in effect for a calendar year applies to any period, not exceeding 12 months, over which compensation is determined (hereinafter referred to as "Determination Period") beginning in such calendar year.

For Plan Years beginning on or after January 1, 1994, any reference in this Plan to the limitation under Code Section 401(a)(17) shall mean the OBRA '93 annual compensation limit set forth in this provision.

If compensation for any prior Determination Period is taken into account in determining an Employee's benefits accruing in the current Plan Year, the compensation for that prior Determination Period is subject to the OBRA '93 annual compensation limit in effect for that prior Determination Period. For this purpose, for Determination Periods beginning before the first day of the first Plan Year beginning on or after January 1, 1994, the OBRA '93 annual compensation limit is $150,000.

Unless otherwise provided under the Plan, each Code Section 401(a)(17) employee's accrued benefit under this Plan will be the greater of the accrued benefit determined for such Employee under 1 or 2 below:

1. The Employee's accrued benefit determined with respect to the benefit formula applicable for the Plan Year beginning on or after January 1, 1994, as applied to the Employee's total years of service taken into account under the Plan for the purposes of benefit accruals, or

2. the sum of:

(a) the Employee's accrued benefit as of the last day of the last Plan Year beginning before January 1, 1994, frozen in accordance with Section 1.401(a)(4)-13 of the Treasury regulations; and

(b) the Employee's accrued benefit determined under the benefit formula applicable for the Plan Year beginning on or after January 1, 1994, as applied to the Employee's years of service credited to the Employee for Plan Years beginning on or after January 1, 1994, for purposes of benefit accruals.

For purposes of making the calculation in 2. above, the following rules shall apply:

1. An Employee's accrued benefit as of the last day of the last Plan Year beginning before January 1, 1994 shall be determined after limiting Average Pay to $228,860 for 1992 and $235,840 for 1993;

2. An Employee’s accrued benefit as of the last day of the last Plan Year beginning before January 1, 1994 shall be determined by assuming the Employee is eligible for the early retirement benefits and the early retirement reductions for which the Employee is eligible at the Employee’s Severance From Service Date;

3. An Employee’s accrued benefit as of the last day of the last Plan Year beginning before January 1, 1994 shall be determined based on the project and prorate method (i.e., the projected Gross Pension on December 31, 1993 assuming employment until Normal Retirement Date times Credited Service as of December 31, 1993, divided by projected Credited Service at Normal Retirement Date) if the Employee is not eligible for Early Retirement on December 31, 1993. If such an Employee is eligible for Early Retirement on the Employee’s Severance From Service Date, the Employee’s accrued benefit as applied to the Employee’s years of service credited to the Employee for Plan Years beginning on or after January 1, 1994 shall be calculated by subtracting the December 31, 1993 benefit, calculated using the $150,000 compensation limit (reflecting cost-of-living increases in the $150,000 compensation limit) from the benefit at the Employee’s Severance From Service Date based on all service;

4. An Employee who participates in the PEP may receive a lump-sum payment of the Employee’s accrued benefit as of the last day of the last Plan Year beginning before January 1, 1994 based on the assumptions in the Plan used to convert an immediate lump sum to a deferred annuity beginning at the Employee’s Normal Retirement Date; and

5. The Employee's accrued benefit as of the last day of the last Plan Year beginning before January 1, 1994 for an Employee who participates in the PEP is converted to a lump sum based on the assumptions used to determine the Present Value of an accrued benefit or the assumptions that are used to convert a lump-sum benefit under the PEP to a life annuity beginning at the Employee's Normal Retirement Date, whichever results in the larger lump sum.

A Code Section 401(a)(17) employee means an Employee whose current accrued benefit as of a date on or after the first day of the first Plan Year beginning on or after January 1, 1994, is based on compensation for a year beginning prior to the first day of the first Plan Year beginning on or after January 1, 1994, that exceeds $150,000.

Notwithstanding the foregoing, for Plan Years beginning on or after January 1, 2002, the annual compensation of each Employee taken into account under the Plan shall not exceed $200,000, as adjusted for cost of living increases in accordance with Code section 401(a)(17)(B). The cost-of-living adjustment in effect for a calendar year applies to annual compensation for the Determination Period beginning in such calendar year. For purposes of determining benefit accruals in a Plan Year beginning on or after January 1, 2002, the annual compensation taken into account in any Plan Year preceding the Plan Year beginning on January 1, 2002 shall be limited to $200,000.

APPENDIX C

TRANSITION AND HISTORICAL PROVISIONS

C-1 Normal Retirement Service Percentage—Notwithstanding any other provision in the Plan to the contrary, each Participant who (i) was an active Employee of the Employer on December 31, 1975, (ii) continuously accrues Credited Service from such date through the Participant's Normal Retirement Date, and (iii) has accumulated Credited Service on the day prior to the Participant's Normal Retirement Date equal to at least 15 years but less than 20 years, has a Normal Retirement Service Percentage of 30%, adjusted for Part-Time Schedule as provided in 3.4(b) if applicable. This C-1 will not be effective after December 31, 1995.

C-2 Part-Time Schedule Adjustment—Notwithstanding any other provision in the Plan to the contrary, each Participant who (i) was an active Employee of the Employer on December 31, 1975, (ii) continuously accrues Credited Service from such date through the date the Participant quits, retires, is discharged, becomes disabled, or dies, and (iii) could receive a larger Gross Pension if the Part-Time Schedule adjustment provisions of the Plan in effect on December 31, 1975 were currently applicable, will be entitled to such larger Gross Pension.

C-3 Former Susquehanna Transmission Company Employees—Notwithstanding any other provision in the Plan to the contrary, service with the Susquehanna Transmission Company by an Employee who became employed by the Employer because of Baltimore Gas and Electric Company's acquisition of such company, will count as Credited Service and Vesting Service, to the same extent and subject to the same limitations as if such service had been rendered for the Employer. The Gross Pension of any Participant affected by this provision who quits, retires, is discharged, becomes disabled or dies with a vested right to a benefit under the Plan, and who is entitled to an annuity under another arrangement by virtue of such Participant's previous employment with the Susquehanna Transmission Company, will be reduced by the amount of such annuity.

C-4 Voluntary Retirement—Early Receipt of Pension Payments—Notwithstanding any other provisions of the Plan, a Participant who retired under the Voluntary Retirement provisions that were in effect prior to July 1, 1986, may elect to begin receipt of his/her monthly pension payments prior to the Participant's Normal Retirement Date, subject to the adjustment under the early receipt provisions in 3.4(c). Such pension payments shall commence as of the first day of the month designated in writing by the Participant. The month so designated must be a month (i) later than the month during which the Plan Administrator receives the Participant's written election, and (ii) before the Participant's Normal Retirement Date.

C-5 Preretirement Survivor Annuity Coverage For Certain Participants —The provisions of this C-5, and not 5.1 or 5.2, shall apply to a Participant who quit or was discharged from employment with the Employer after September 1, 1974 and before January 1, 1985. If such Participant (i) terminated employment with a vested right to receive a pension payment equal to the Participant's Gross Pension (as computed under the terms of the Plan on the date the Participant terminated active employment), (ii) dies prior to the Participant's Benefit Commencement Date, (iii) was not eligible to elect Preretirement Survivor Annuity coverage while an active Employee, and (iv) makes the election in the following paragraph, then the Surviving Spouse of such Participant will receive a Preretirement Survivor Annuity equal to 50% of such pension (actuarially reduced if necessary to account for the age of the Surviving Spouse and for payment prior to the Participant's Normal Retirement Date).

The Participant's election for the 50% Preretirement Survivor Annuity coverage must be made prior to the Participant's Benefit Commencement Date. The coverage commences on the first day of the month following receipt of the Participant's election by the Plan Administrator. Such coverage automatically ceases as set forth in 5.1(c). The Participant may cancel the coverage, without the consent of the Participant's spouse, by delivering an Appropriate Request to the Plan Administrator prior to the Participant's Benefit Commencement Date. Such cancellation is effective as of the first day of the month following receipt by the Plan Administrator of the Appropriate Request. Cancellation is automatic if the Participant's spouse dies prior to the effective date of the coverage. A Participant's pension payments are not reduced for the cost of coverage.

C-6 Post-retirement Survivor Annuity Coverage for Certain Participants —The provisions of this C-6, and not 5.3 or 5.4, shall apply to a Participant who quit or was discharged from employment with the Employer after September 1, 1974 and prior to January 1, 1976. If such Participant (i) terminates employment with a vested right to receive a pension payment equal to the Participant's Gross Pension (as computed under the terms of the Plan on the date the Participant terminated active employment), (ii) dies on or before the Participant's Benefit Commencement Date, and (iii) makes the election in the following paragraph, then the Surviving Spouse of such Participant will receive a Post-retirement Survivor Annuity equal to 50% of such pension (actuarially reduced if necessary to account for the age of the Surviving Spouse and for payment prior to the Participant's Normal Retirement Date).

The Participant's election for the 50% Post-retirement Survivor Annuity must be made prior to the Participant's Benefit Commencement Date. The Participant may revoke an election, without the consent of the Participant's spouse, by delivering an Appropriate Request to the Plan Administrator prior to the Participant's Benefit Commencement Date. Cancellation is automatic if the Participant's spouse dies prior to the effective date of the coverage. The coverage commences on the Participant's Benefit Commencement Date. Such coverage automatically ceases upon the date of death of the spouse. A Participant's pension payments are reduced to offset the cost of coverage.

Within 90 days prior to such Participant's Benefit Commencement Date, the Plan Administrator will mail to the Participant's last known address (i) written explanation of the terms and conditions of the Post-retirement Survivor Annuity and (ii) an estimate of the relative values of the various optional forms of benefit under the Plan if the fact of marriage and the age of the spouse are known to the Plan Administrator. In the case of a Participant whose Benefit Commencement Date is before or after the Participant's Normal Retirement Date, the Plan Administrator shall mail the written explanation to the Participant by the later of (i) 90 days prior to the Participant's Benefit Commencement Date, or (ii) 7 days after the Plan Administrator is notified of the Participant's intention to retire.

C-7 Participants Who Terminated Employment Before 1989—A Participant who terminated employment prior to January 1, 1989 without a vested right to the Participant's Gross Pension, and who is subsequently reemployed by the Employer, will be subject to the service forfeiture, restoration and vesting provisions currently under this Plan, retroactive to the Employee's original Employment Commencement Date. If retroactive application of these provisions results in a vested right to the Participant's Gross Pension prior to the date of the Participant's termination of employment, Credited Service taken into account to determine such vesting, and Credited Service subsequently accumulated through the date of termination of employment, shall be restored.

A Participant who terminated employment prior to January 1, 1989 with a vested right to the Participant's Gross Pension, and who is subsequently reemployed by the Employer, will be subject to the forfeiture, restoration and vesting provisions currently under this Plan, retroactive to the Employee's original Employment Commencement Date. If retroactive application of these provisions results in a larger amount of potentially restorable Credited Service than the amount of Credited Service actually accumulated prior to the date of the Participant's termination of employment, the larger amount of Credited Service will be restored.

C-8 Voluntary Special Early Retirement Program—Notwithstanding any other provision in the Plan or any Appendix to the contrary, each Participant who under the terms of the Plan is eligible to commence Early Retirement, and who voluntarily elects to commence Early Retirement on or after February 1, 1992 and on or before April 1, 1992, shall be entitled to an enhanced benefit, subject to the Employer's right to limit benefits to the extent necessary to satisfy tax law limitations. The Employer also reserves the right to delay the Early Retirement commencement date of eligible Participants until no later than April 1, 1992, if operating condition requirements warrant such a delay. For purposes of this C-8, the enhanced benefit is determined based on the calculation of the

Gross Pension of a Participant entitled to Early Retirement as set forth under 3.3(b), except that the Early Retirement Adjustment Factor shall be computed as follows:

> The Early Retirement Adjustment Factor for Participants with a Benefit Commencement Date that is on or after the date that the Participant attains age 60, is 100 percent. For all other Participants, the Early Retirement Adjustment Factor is 100 percent less 1/4 of 1 percent for each month that the Participant is less than age 60 on the Participant's Benefit Commencement Date. For purposes of this calculation, the month of the Participant's 60th birthday is excluded.

The amount of pension payments for Participants entitled to an enhanced benefit under this C-8 is computed taking into account all other adjustments required under the terms of the Plan in the computation of pension payments. A Participant who commences Early Retirement under this C-8, and who is subsequently reemployed by the Employer, will be entitled to benefits under the Plan based on the provisions in effect at the time that the Participant subsequently retires.

C-9 Voluntary Special Early Retirement Program—Notwithstanding any other provision in the Plan or any Appendix to the contrary, certain Participants who meet the conditions set forth in the next sentence are eligible for Early Retirement if, as of February 1, 1994 they satisfy the requirements of 2.2 after substituting age 50 for age 55 and 15 years of Credited Service for 20 years of Credited Service. The conditions such Participants must meet are as follows: (1) the Participant makes an election between October 15, 1993 and December 15, 1993 to voluntarily commence Early Retirement on February 1, 1994, and such election shall be irrevocable effective December 15, 1993, and (2) the Participant does not elect to participate in the Baltimore Gas and Electric Company Voluntary Severance Plan. Participants who satisfy the requirements and conditions set forth in the two preceding sentences shall be entitled to an enhanced benefit, subject to the Employer's right to limit benefits to the extent necessary to satisfy tax law limitations.

For purposes of this C-9, the enhanced benefit for eligible Participants is determined based on the calculation of the Gross Pension of a Participant entitled to Early Retirement as set forth under 3.3(b), except that the Early Retirement Adjustment Factor shall be computed as follows:

The Early Retirement Adjustment Factor for Participants with a Benefit Commencement Date that is on or after the date that the Participant attains age 60, is 100 percent. For Participants with a Benefit Commencement Date that is on or after the date that the Participant attains age 55 but before the date that the Participant attains age 60, the Early Retirement Adjustment Factor is 100 percent less 1/4 of 1 percent for each month that the Participant is less than age 60 on the Participant's Benefit Commencement Date. For all other Participants, the Early Retirement Adjustment Factor is 100 percent less the percentage equal to (i) 15 percent plus (ii) 1/2 of 1 percent for each month that the Participant is less than age 55 on the Participant's Benefit Commencement Date. For purposes of this calculation, the month of the Participant's 55th and 60th birthdays is excluded.

In addition, the enhanced benefit for eligible Participants who have not attained age 62 as of February 1, 1994 will include an additional monthly payment from the Plan. The amount of the payment shall be equal to one-half of the Participant's estimated monthly age 62 Social Security benefits computed assuming no earnings after 1993. The amount of such estimated age 62 Social Security benefits shall be provided to Baltimore Gas and Electric Company by the Social Security Administration and shall be final and not subject to challenge. The payments shall cease effective when the Participant is first eligible to receive reduced old-age insurance benefits under title II of the Social Security Act. The payments shall not be subject to the Post-retirement Survivor Annuity provisions of Article V and shall not be subject to the pension payment adjustment provisions of 3.4(e). Notwithstanding the foregoing provisions of this paragraph, if a Participant who is otherwise entitled to a monthly payment under this paragraph fails to submit to the Employer by December 15, 1993, a completed and signed Social Security Administration Request for Earnings and Benefit Estimate Statement, then the amount of such payment shall be $200.

Except as otherwise provided in the preceding paragraph, the amount of pension payments for Participants entitled to an enhanced benefit under this C-9 is computed taking into account all other adjustments required under the terms of the Plan in the computation of pension payments. A Participant who commences Early Retirement under this C-9, and who is subsequently reemployed by the Employer, will be entitled to benefits under the Plan based on the provisions in effect at the time that the Participant subsequently retires.

C-10 Pre-1994 Disability Retirement—This Appendix C-10 applies to Participants who became a Disabled Participant prior to January 1, 1994. Benefits under the Plan for Participants who became Disabled Participants on or after January 1, 1994 are determined in accordance with the provisions of the Plan except this Appendix C-10. All defined terms used in this C-10 that are not separately defined in this C-10 have the meaning set forth in Appendix A.

Types of Retirement:

Disabled Participants—A Disabled Participant who is eligible for Early Retirement on or before his/her Severance From Service Date, may elect Early Retirement if certain requirements are satisfied. To be eligible to elect Early Retirement, such Disabled Participant must retire either (i) during the period that is within one year following both classification as a Disabled Participant and a reduction in the amount of benefits payable to the Disabled Participant under the Disability Plan due to that plan's offset provisions, or (ii) following termination of the Disability Plan and the failure of the Company to establish a successor plan or policy to provide similar benefits.

Disability Retirement: Generally—A Disabled Participant who is at least age 65 and who, prior to his/her Severance From Service Date, has at least ten years of Credited Service, is eligible for Disability Retirement.

Effective Date—Disability Retirement is effective on the first day of the first month after the Participant reaches age 65.

Early Disability Retirement—A Disabled Participant who, (i) prior to his/her Severance From Service Date, has at least 20 years of Credited Service, and (ii) is at least age 55 but has not yet reached age 65 when he/she is determined to be no longer disabled under the terms of the Disability Plan, is eligible for Early Disability Retirement.

Effective Date—Early Disability Retirement is effective on the first day of the month of retirement designated in writing by the Participant, which is on or after the date that the Participant becomes eligible for Early Disability Retirement, and on or before the Participant's Normal Retirement Date. Such written designation must be received by the Plan Administrator before the beginning of the designated month.

Pension Payments

<u>Disability Retirement</u>—The Gross Pension of a Participant entitled to Disability Retirement is calculated as follows:

Gross Pension =	Disability Retirement Service Percentage	X	Final Average Pay

<u>Early Disability Retirement</u>—The Gross Pension of a Participant entitled to Early Disability Retirement is calculated as follows:

Gross Pension =	Disability Retirement X Service Percentage	Final Average Pay	X	Early Retirement Adjustment Factor

<u>Accrued Gross Pension Calculation and Vesting</u>:

<u>Disability Retirement</u>—A Participant who immediately prior to his/her Benefit Commencement Date is benefiting under the Disability Plan, and who has at least ten years of Credited Service before his/her Severance From Service Date, has a vested right to a Disability Retirement pension on the Participant's Normal Retirement Date.

<u>Early Disability Retirement</u>—A Participant who immediately prior to his/her Benefit Commencement Date is at least age 55 and ceases benefiting under the Disability Plan because he/she is determined to be no longer disabled under the terms of such plan, and who has at least 20 years of Credited Service before his/her Severance From Service Date, has a vested right to an Early Disability Retirement on the Participant's Benefit Commencement Date.

DEFINITIONS

The following definitions apply to the disability benefits under this Plan prior to January 1, 1994:

"Disability Retirement" means a type of retirement available to a Disabled Participant who is at least age 65 prior to his/her Severance From Service Date, and has at least ten years of Credited Service.

"Disability Retirement Service Percentage" means the greater of (i) the percentage equal to (x) the Normal Retirement Service Percentage, less (y) 1/12 of 1 percent for each month that the Participant was less than age 65 on the Participant's Severance From Service Date, or (ii) 30 percent. For purposes of this calculation, the month of the Severance From Service Date is excluded, and the month of the Participant's 65th birthday is included.

"Disabled Participant" means a Participant who is disabled as that term is defined in the Disability Plan.

"Early Disability Retirement" means a type of retirement available to a Disabled Participant who, on the day preceding his/her Severance From Service Date, has at least 20 years of Credited Service, and who is at least age 55 (but not yet age 65) when he/she ceases benefiting under the Disability Plan because he/she is determined to be no longer disabled under the terms of such plan.

C-11 <u>Prior Plan</u>—Except as provided in 1.2 and the last paragraph of 4.3, Participants who do not earn Credited Service on or after January 1, 2000 are covered by the provisions in the Plan in effect before January 1, 2000.

C-12 Accrued Gross Pension Calculation in the Traditional Pension Plan —Prior to January 1, 2000, for each month of Credited Service, a Participant will accrue a portion of the Participant's projected Gross Pension at the Participant's Normal Retirement Date. Subject to the limitations in Appendix B, Section B-2, a Participant's Accrued Gross Pension is calculated as follows:

$$\text{Accrued Gross Pension} = \left(\text{Projected Gross Pension at Normal Retirement Date} - \text{Accrued Gross Pension as of 12/31/75}\right) \times \frac{\text{Credited Service Accumulated To Date After 12/31/75}}{\text{Projected Credited Service Accumulated After 12/31/75 To Normal Retirement Date}} + \text{Accrued Gross Pension as of 12/31/75}$$

In computing the "Projected Gross Pension at Normal Retirement Date," it will be assumed that the Participant will continue to work for the Employer until the Participant's Normal Retirement Date, and that the Participant's Final Average Pay at such date will be equal to the Participant's Average Pay as of the date of the computation. If the Participant works a Part-Time Schedule as of the date of the computation, it will be assumed that the Participant will continue to work a Part-Time Schedule until the Participant's Normal Retirement Date for purposes of the computation.

The “Accrued Gross Pension as of 12/31/75” is equal to the greater of A or B below:

- A -

Accrued Gross Pension as of 12/31/75	=	Projected Gross Pension as of 12/31/75	X	Credited Service Accumulated Prior <u>To 1/1/76</u> Credited Service Projected To Be Accumulated To Normal Retirement Date

2

OR

- B -

Accrued Gross Pension as of 12/31/75	=	0.00125	X	Actual Earnings From 1/1/40 12/31/75	-	Federal Old-Age Benefit Offset

In computing the “Projected Gross Pension as of 12/31/75”, it will be assumed that the Participant will continue to work for the Employer until the Participant’s Normal Retirement Date, and that the Participant’s Final Average Pay at the Participant’s Normal Retirement Date will be equal to the Participant’s Average Pay as of 12/31/75.

<u>Minimum Pension Payment: Generally</u>—Prior to January 1, 2000, if as of the Participant’s Benefit Commencement Date, the Participant’s Gross Pension is less than the Participant’s Accrued Gross Pension reduced in accordance with the adjustments set forth in 3.4(b) and 3.4(c), the Participant’s pension payments will be based on the adjusted Accrued Gross Pension.

C-13 Targeted Voluntary Special Early Retirement Program—Notwithstanding any other provision in the Plan or any Appendix to the contrary, certain Participants who meet the conditions set forth in the next sentence are eligible for an enhanced Plan benefit described below, if as of May 31, 2000 they are age 55 or older with at least ten years of Credited Service. The conditions such Participants must meet are as follows: (1) on January 14, 2000, the Participant is an Employee of Baltimore Gas and Electric Company in a job or skill group in the Utility Operations Group (UOG) that has been identified by UOG management for reduction; (2) the Participant receives a written notification from UOG management that his/her job or skill group has been identified for such reduction; (3) the Participant makes an election on or after March 1, 2000 and on or before April 14, 2000 to voluntarily retire on June 1, 2000, and such election shall be irrevocable effective April 14, 2000; (4) the Participant executes (and does not subsequently revoke) in writing and submits to the Plan Administrator, in the form, manner, and subject to the timing established by the Plan Administrator, an agreement releasing legal claims, including those against the Company and its subsidiaries/affiliates, including but not limited to claims arising out of his/her employment with the Employer or termination of such employment; and (5) the Participant is not eligible for the Constellation Energy Group, Inc. Severance Plan.

Traditional Pension Plan:

For purposes of this C-13, the enhanced benefit for eligible Participants is determined based on the calculation of the Gross Pension of a Participant entitled to Early Retirement as set forth under 3.3(b), except that the Early Retirement Adjustment Factor shall be computed as follows:

The Early Retirement Adjustment Factor for Participants in the Traditional Pension Plan with a Benefit Commencement Date that is on or after the date that the

Participant attains age 60, is 100 percent. For Participants with a Benefit Commencement Date that is on or after the date that the Participant attains age 55 but before the date that the Participant attains age 60, the Early Retirement Adjustment Factor is 100 percent less 1/4 of one percent for each month that the Participant is less than age 60 on the Participant's Benefit Commencement Date; provided, however, that for a Participant with at least 35 years of Credited Service as of his/her Severance From Service Date, the Early Retirement Adjustment Factor is 100 percent less 1/4 of one percent for each month that the Participant is less than age 57 on the Participant's Benefit Commencement Date. For purposes of this calculation, the month of the Participant's 55th, 57th and 60th birthdays, as appropriate, is excluded.

PEP:

For purposes of this C-13, the enhanced benefit for eligible PEP Participants is determined as follows:

The Gross Pension referenced in 3.3(e), 3.3(f) and 3.3(g) shall be adjusted by computing Total Pension Credits assuming that on the Participant's Employment Commencement Date (or, if applicable, Adjusted Employment Commencement Date) and thereafter, the Participant's age is the Participant's actual age plus five years.

Social Security Bridge:

In addition, the enhanced benefit for eligible Participants who have not attained age 62 as of June 1, 2000 will include an additional monthly payment equal to one-half of the Participant's estimated monthly age 62 Social Security benefits computed assuming no earnings after 1999. The amount of such estimated age 62 Social Security benefits shall be requested from the Social Security Administration by the Participant and furnished by the Participant to the Company and shall be final and not subject to challenge. The payments shall commence as of the Participant's Benefit Commencement Date and shall cease effective at the earlier of (i) when the Participant is first eligible to receive reduced old-age insurance benefits under title II of the Social Security Act, or (ii) upon the Participant's death. The payments shall not be subject to the Post-retirement Survivor Annuity or the Post-retirement Survivor Benefit provisions of Article V.

Notwithstanding the foregoing provisions, if a Participant who is otherwise entitled to a monthly Social Security bridge payment fails to submit to the Employer by May 31, 2000, an original Social Security Administration Benefit Statement, then the amount of such monthly payment shall be $200.

If a PEP Participant elects a lump sum form of payment pursuant to 3.3(e) of the Plan, then the Social Security bridge payment will be payable in a lump sum as of the Benefit Commencement Date. The lump sum will equal the present value of the additional monthly Social Security bridge payments the Participant would otherwise receive. Such present value shall be calculated based on the mortality table and interest rate described in Present Value as of the Benefit Commencement Date.

Generally:

Except as otherwise provided above, the amount of pension payments for Participants entitled to an enhanced benefit under this C-13 is computed taking into account all other adjustments required under the terms of the Plan in the computation of pension payments. A Participant who commences payments under this C-13, and who is subsequently reemployed by the Employer will cease to receive such payments and will be entitled to benefits under the Plan based on the provisions in effect at the time that the Participant subsequently retires.

C-14 Voluntary Special Early Retirement Program—Notwithstanding any other provision in the Plan or any Appendix to the contrary, certain Participants who meet the conditions set forth in the next sentence, who under the terms of the Plan are eligible to commence Early Retirement as of February 1, 2002, and who voluntarily elect to commence Early Retirement on February 1, 2002 (or such later date on or before July 1, 2002 as required in the sole discretion of management of the Employer) shall be entitled to an enhanced benefit. Applicable Participants are Employees of the following Employers: Baltimore Gas and Electric Company (BGE), Constellation Energy Group, Inc. (excluding Employees above the Co-President level), Constellation Energy Source, Inc., Constellation Investments, Inc., Constellation Nuclear, LLC (CN) (excluding Employees above the Vice-President level), Constellation Nuclear Services, Inc. (CNS), Calvert Cliffs Nuclear Power Plant, Inc. (CCNPP), Constellation Power, Inc., Constellation Power Source, Inc., Constellation Power Source Generation, Inc. (CPSG), and Constellation Power Source Holdings, Inc. (collectively, the Companies). The conditions such Participants must meet are as follows: (1) the Participant on November 1, 2001 is an active employee of one of the Companies; (2) the Participant makes an election on or after: (a) November 1, 2001 and on or before December 16, 2001 for CPSG; (b) November 15 and on or before December 31, 2001 for CN, CNS and CCNPP; and (c) November 26, 2001 and on or before December 31, 2001 for the remainder of the Companies, to voluntarily retire on February 1, 2001, and such election shall be irrevocable effective December 16, 2001 for CPSG, and December 31, 2001 for the rest of the Companies; (3) the Participant executes (and does not subsequently revoke) in writing and submits to the Plan Administrator, in the form, manner, and subject to the timing established by the Plan Administrator, an agreement releasing legal claims, including those against the Company and its subsidiaries/affiliates, including but not limited to claims arising out of his/her employment with the Employer or termination of such employment; and (4) the Participant is not eligible for the Constellation Energy Group, Inc. Severance Plan or any other Employer severance plan or arrangement. In addition, Participants who are employees of BGE, CN, CNS, CCNPP or CPSG, and who are involuntarily displaced in connection with a workforce reduction between December 17, 2001 for CPSG (January 2, 2002 for BGE, CN, CNS and CCNPP) and January 31, 2002 (February 28, 2002 for BGE), and who otherwise satisfy all of the foregoing requirements and conditions (except under 2(a) above, December 16, 2001 is replaced with January 31, 2002, and under 2(b) above, December 31, 2001 is replaced with February 28, 2002, and under 2(c) above, December 16, 2001 and December 31, 2001 are replaced with February 28, 2002), are also entitled to an enhanced benefit. Participants who satisfy the requirements and conditions set forth in the preceding sentences shall be entitled to an enhanced benefit, subject to the Employer's right to limit benefits to the extent necessary to satisfy tax law limitations.

For purposes of this C-14, the enhanced benefit for eligible Participants is determined based on the calculation of the Gross Pension of a Participant entitled to Early Retirement as set forth under the Plan, except that (1) the Participant's regular unenhanced Gross Pension shall be computed using average base rate of pay computed as of February 1, 2002 or if later, the Participant's Severance From Service Date, whichever produces the highest amount, and using bonus and/or incentives (i) for purposes of determining Average Pay, that were earned (rather than paid) during the calendar years (a) 1999 and 2000 (including Annual Incentive Awards earned during such years) , or (b) for Participants retiring after March, 2002, if higher, 2000 and 2001 (including Annual Incentive Awards earned during such years); and (ii) for purposes of determining Average Annual Pay, in accordance with the Plan provisions except that Annual Incentive Awards paid during all applicable prior years shall be included; and (2) the Participant shall also be entitled to an additional Gross Pension amount under the Plan, computed as an immediate lump sum equal to: (a) the number of whole years of Credited Service (*i.e.*, partial years of Credited Service are disregarded) multiplied by three, and (b) multiply the product in (a) by the sum of (i) the base rate of pay on the Participant's Severance From Service Date determined as a weekly amount, plus (ii) bonuses and/or incentives (that have previously been approved in writing by the Administrative Committee and the Chairman of the Board of Directors for inclusion in the computation of Average Annual Pay) that were earned during calendar years 1999 and 2000 (including Annual Incentive Awards earned during such calendar years), divided by 104.

Such immediate lump sum amount shall also be available as an immediate annuity using the same formula set forth under Section 3.3(f) of the Plan or as a deferred annuity using the same formula set forth under Section 3.3(g) of the Plan; provided, however, that any Participant in PEP who elects an immediate lump sum must make such election for his/her entire Gross Pension.

Except as otherwise provided above, the amount of pension payments for Participants entitled to an enhanced benefit under this C-14 is computed taking into account all other adjustments required under the terms of the Plan in the computation of pension payments. The enhanced benefit does not accrue until the Participant makes an irrevocable election to retire under the program; therefore, preretirement survivor annuity coverage is not available with respect to such enhanced benefit prior to such election. A Participant who commences payments under this C-14, and who is subsequently reemployed by the Employer, will be entitled to benefits under the Plan based on the provisions in effect at the time that the Participant subsequently retires.

C-15 Voluntary Special Early Retirement Program—Notwithstanding any other provision in the Plan or any Appendix to the contrary, certain Participants who meet the conditions set forth in the next sentence are eligible for Early Retirement if, between January 31, 2002 and February 28, 2002, they satisfy the requirements of Section 2.2 after substituting age 50 for age 55, and voluntarily elect to commence Early Retirement on March 1, 2002 (or such later date on or before July 1, 2002 as required in the sole discretion of Baltimore Gas and Electric Company (BGE) or Constellation Power Source Generation, Inc. (CPSG) management) shall be entitled to an enhanced benefit. The conditions such Participants must meet are as follows: (1) the Participant on January 2, 2002 is an employee of BGE (excluding manager- or executive-level employees) or CPSG; (2) the Participant is at least age 50 and no older than age 54 with 20 or more years of service between January 31, 2002 and February 28, 2002; (3) the Participant makes an election on or after January 2, 2002 and on or before February 15, 2002 to voluntarily retire on March 1, 2002, and such election shall be irrevocable effective February 15, 2002; (4) the Participant executes (and does not subsequently revoke) in writing and submits to the Plan Administrator, in the form, manner, and subject to the timing established by the Plan Administrator, an agreement releasing legal claims, including those against the Company and its subsidiaries/affiliates, including but not limited to claims arising out of his/her employment with the Employer or termination of such employment; and (5) the Participant is not eligible for the Constellation Energy Group, Inc. Severance Plan or any other Employer severance plan or arrangement. In addition, Participants who are employees of CPSG, BGE, Constellation Energy Group, Inc., Constellation Investments, Inc., Constellation Power, Inc., Constellation Power Source, Inc., or Constellation Power Source Holdings, Inc., and who are involuntarily displaced in connection with a workforce reduction between January 2, 2002 and February 28, 2002, and who otherwise satisfy all of the foregoing requirements and conditions (except under (3) above, February 15, 2002 is replaced with February 28, 2002), are also entitled to an enhanced benefit. Participants who satisfy the requirements and conditions set forth in the preceding sentences shall be entitled to an enhanced benefit, subject to the Employer's right to limit benefits to the extent necessary to satisfy tax law limitations.

For purposes of this C-15, the enhanced benefit for eligible Participants is determined based on the calculation of the Gross Pension of a Participant entitled to Early Retirement as set forth under the Plan, except that (1) the Participant's regular unenhanced Gross Pension shall be computed using average base rate of pay computed as of March 1, 2002 or if later, the Participant's Severance From Service Date, whichever produces the highest amount, and using bonus and/or incentives (i) for purposes of determining Average Pay, that were earned (rather than paid) during the calendar years (a) 1999 and 2000 (including Annual Incentive Awards earned during such years), or (b) for Participants retiring after March 2002, if higher, 2000 and 2001 (including Annual Incentive Awards earned during such years); and (ii) for purposes of determining Average Annual Pay, in accordance with the Plan provisions except that Annual Incentive Awards paid during all applicable prior years shall be included; and (2) the Participant shall also be entitled to an additional Gross Pension amount under the Plan, computed as an immediate lump sum equal to: (a) the number of whole years of Credited Service (*i.e.*, partial years of Credited Service are disregarded) multiplied by two, and (b) multiply the product in (a) by the sum of (i) the base rate of pay on the Participant's Severance From Service Date determined as a weekly amount, plus (ii) bonuses and/or incentives (that have previously been approved in writing by the Administrative Committee and the Chairman of the Board of Directors for inclusion in the computation of Average Annual Pay) that were earned during calendar years 1999 and 2000 (including Annual Incentive Awards earned during such calendar years), divided by 104.

Such immediate lump sum amount shall also be available as an immediate annuity using the same formula set forth under Section 3.3(f) of the Plan or as a deferred annuity using the same formula set forth under Section 3.3(g) of the Plan; provided, however, that any Participant in PEP who elects an immediate lump sum must make such election for his/her entire Gross Pension. The enhanced benefit for applicable participants shall also be computed by substituting age 50 for age 55 in Section A-20.

Except as otherwise provided above, the amount of pension payments for Participants entitled to an enhanced benefit and under this C-15 is computed taking into account all other adjustments required under the terms of the Plan in the computation of pension payments. The enhanced benefit does not accrue until the Participant makes an irrevocable election to retire under the program; therefore, preretirement survivor annuity coverage is not available with respect to such enhanced benefit prior to such election. A Participant who commences payments under this C-15, and who is subsequently reemployed by the Employer, will be entitled to benefits under the Plan based on the provisions in effect at the time that the Participant subsequently retires.

APPENDIX D

TOP HEAVY PROVISIONS

D-1 Purpose—If the Plan is or becomes top-heavy in any Plan Year beginning after December 31, 1983, the following provisions will supersede any conflicting provisions in the Plan.

D-2 Definitions—As used in the Plan, the following terms shall have the meaning set forth below, unless a different meaning is clearly required by the context in which the term is used.

D-2.2 "Anniversary Date" means December 31, the last day of the Plan Year.

D-2.4 "Key Employee" means any person who meets the requirements of Code Section 416(i), and the regulations promulgated thereunder, which are hereby incorporated by reference as if fully set out herein. For purposes of determining whether or not the Plan meets the requirements of Section D-3.2, the term Key Employee shall also include the beneficiary of a Key Employee.

D-2.5 "Permissive Aggregation Group" means all plans in the Required Aggregation Group and any other Qualified Plans maintained by the Company, but only if such group of plans would satisfy, in the aggregate, the requirements of Code Sections 401(a)(4) and 410. The Plan Administrator shall determine which plan or plans shall be taken into account in determining the Permissive Aggregation Group.

D-2.6 "Qualified Plan" means any Plan which is qualified under Code Section 401(a).

D-2.7 "Required Aggregation Group" means:

(a) Each Qualified Plan of the Company in which at least one Key Employee participates; and

(b) Any other Qualified Plan of the Company which enables a Plan described in Section D-2.7(a) to meet the requirements of Code Section 401(a)(4) or 410.

D-2.8 "Top-Heavy Plan" means the Plan, for any Plan Year in which the Plan meets the requirements of Section D-3.2.

D-3 Top-Heavy Plan Requirements and Determination

D-3.1 Top Heavy Plan Requirements—For any Plan Year in which the Plan is determined to be a Top-Heavy Plan in accordance with Section D-3.2, the Plan shall be subject to the following:

(a) special vesting requirements in D-4; and

(b) special minimum benefit requirements of D-4.

D-3.2 Top-Heavy Plan Determination

(a) The Plan shall be considered a Top-Heavy Plan and shall be subject to the additional requirements of Section D-3.1, with respect to any Plan Year, if, as of the Anniversary Date of the preceding Plan Year (hereinafter referred to as the "determination date"), (i) the present value of accrued benefits of Key Employees in this Plan exceeds 60 percent of the present value of the accrued benefits of all Employees in this Plan ("60% Test"); or (ii) the Plan is part of a Required Aggregation Group and the sum of the present value of accrued benefits and the value of the aggregate accounts of Key Employees in all plans in the Required Aggregation Group exceeds 60% of a similar sum for all Employees. For this purpose, the present value of accrued benefits and the value of the aggregate accounts shall be determined as of the valuation date for the Plan Year that includes the determination date.

(b) For purposes of this Section D-3.2, the aggregate account of a Participant is determined under applicable provisions of the defined contribution plan used in determining whether the Plan is a Top Heavy Plan.

(c) For purposes of this Section D-3.2, present value of accrued benefits shall be determined, in the case of a defined benefit pension plan, under the provisions of such a plan or plans and shall include any part of any accrued benefit distributed in the 5-year period ending on the determination date. Effective January 1, 2002, the present value of accrued benefits shall include any part of any accrued benefit distributed in the 1-year period ending on the determination date, or, in the case of a distribution made for a reason other than severance from employment, death or disability, during the 5-year period ending on the determination date.

(d) For purposes of this Section D-3.2, the present value of a participant's accrued benefits under a defined benefit plan shall be based upon reasonable interest and mortality assumptions specified by the plan. The Top-Heavy calculations for this Plan shall be based on the same assumptions specified in the definition of Present Value in Section A-44. Where one or more defined benefit plans are aggregated with this Plan for purposes of Top-Heavy calculations, the actuarial assumptions specified in the definition of Present Value in Section A-44 shall be applied to all plans in the aggregation group.

(e) For purposes of this Section D-3.2, the accrued benefit of a participant who is not a Key Employee shall be determined under the method, if any, that uniformly applies for determining benefit accruals under all defined benefit plans maintained by the Employer, or if there is no such method, as if the benefit accrued not more rapidly than the slowest accrual rate permitted under the fractional accrual rule of Section 411(b)(1)(C) of the Code.

(f) For purposes of this Section D-3.2, the accrued benefit of a participant in a plan who is not a Key Employee but who was a Key Employee in a prior year shall be disregarded.

(g) For purposes of this Section D-3.2, the accrued benefits of all plan participants who have not performed services for any employer maintaining the plan at any time during the 5-year period (1-year period, effective January 1, 2002) ending on the determination date shall be disregarded.

(h) Notwithstanding the provisions of subsection (a) herein above, the Plan shall not be a Top-Heavy Plan, if the Plan Administrator elects to treat the Plan as part of a Permissive Aggregation Group, and the Permissive Aggregation Group is not determined to be Top-Heavy using the criteria of the "60% Test" herein above.

(i) Where more than one plan is involved in the determination, only determination dates that fall within the same calendar year shall be considered in order to determine whether the Plan is a Top-Heavy Plan.

(j) The provisions of Code section 416 and applicable regulations are incorporated with respect to any additional requirements with respect to the determination as to how the top heavy ratio is computed.

D-4 Additional Top-Heavy Provisions—For purposes of determining whether or not the Plan meets the requirements of Section D-3.2, the term "Participant" as defined in Appendix A, shall also include the beneficiary of a Participant.

Notwithstanding any other provisions of the Plan if the Plan is a Top-Heavy Plan:

(i) Each Participant who has at least three years of Vesting Service as of the determination date will be fully vested in a pension benefit on the day following the determination date. Each Participant who subsequently accumulates at least three years of Vesting Service shall immediately be fully vested in such pension benefit.

(ii) Each Participant who is not a Key Employee will be deemed to have an Gross Pension after the determination date equal to 1/12 of the lesser of (A) 20% of such Participant's average compensation or (B) such average compensation multiplied by 2% for each year of Credited Service accumulated to the date of the calculation. For purposes of this calculation, average compensation is the Participant's highest average compensation for the five consecutive years for which the Participant had the highest compensation. For purposes of this paragraph, compensation means Section 415(c) Compensation. Effective January 1, 2002, in determining service for purposes of this minimum benefit calculation, any service shall be disregarded to the extent that such service occurs during a plan year when the Plan benefits (within the meaning of Code section 410(b)) no Key Employee or former Key Employee.

APPENDIX G

DESIGNATED SUBSIDIARIES

Except as otherwise provided below, Employees of the following subsidiaries are eligible to participate in the Plan on the same terms and conditions as set forth therein.

Constellation Power, Inc.

Constellation Energy Commodities Group, Inc. (formerly known as Constellation Power Source, Inc.) Constellation Power Source Generation, Inc.

Constellation Energy Source, Inc.

BGE Home Products and Services, LLC (formerly known as BGE Home Products and Services, Inc.) [1]

BGE Commercial Building Systems, Inc. [2]

---

1 a. An individual who is a Participant on December 31, 1999 and an Employee of BGE Home Products & Services, Inc. on January 1, 2000, is subject to 1.2 of the Plan except that PEP is modified as described in b. below. Notwithstanding the preceding sentence, an individual who is an Employee of Constellation Energy Source, Inc. on December 31, 1999, who transfers to BGE Home Products & Services, Inc. effective January 1, 2000, and was hired by Constellation Energy Source, Inc. after December 31, 1994, shall participate in PEP as modified in b. below. An individual who is a Participant in the Traditional Pension Plan after December 31, 1999 by reason of the preceding will cease participating in the Traditional Plan once he/she ceases to earn Credited Service. If such an individual again earns Credited Service, he/she shall participate in PEP as modified in b. below. All other individuals shall participate in PEP as modified in b. below.

b. Participants who are Employees of BGE Home Products & Services, Inc. shall have the following modifications to PEP:

(i) A Participant's Total Pension Credits in Appendix A for the period of time during which the Participant is employed by BGE Home Products & Services, Inc. shall equal the sum of (1) 0.025 times the Credited Service earned in each Plan Year prior to the Plan Year in which the Participant reaches age 40, (2) 0.05 times the Credited Service earned in each Plan Year after the Plan Year in which the Participant reaches age 39 and before the Plan Year in which the Participant reaches age 50, and (3) 0.075 times the Credited Service earned in each Plan Year after the Participant reaches age 49.

(ii) The only form of pension payments that a Participant may elect under PEP pursuant to 3.1(b) is monthly installments; lump sum payment is not available except if pursuant to the automatic lump sum cash-out provisions of 3.3(e); 3.3(h) therefore is not applicable. This (ii) is not applicable to a Participant who accrued any benefits under PEP while employed by an Employer whose Employee Participants were eligible to elect under PEP pursuant to 3.1(b) a lump sum, and then after January 1, 2000 transferred employment to BGE Home Products & Services, Inc. This (ii) is not applicable to a Participant who received benefits under the Special Window for Employees Employed by BGE Home (as part of BGE Home's closing of its retail appliance and merchandise stores and the reorganization of BGE Home because of that closing) under the Constellation Energy Group, Inc. Severance Plan.

(iii) The Preretirement Survivor Benefit under 5.8 may be paid as a lump sum.

(iv) The third sentence in the definition of Annuity Factor in Appendix A is not applicable unless the Participant transferred employment to BGE Home Products & Services, Inc. after January 1, 2000, and was eligible for Early Retirement under 2.2 at the time he/she was employed by the Company or a subsidiary listed in this Appendix G other than BGE Home Products & Services, Inc. or BGE Commercial Building Systems, Inc.

2 a. An individual who is a Participant on December 31, 1999 and an Employee of BGE Commercial Building Systems, Inc. on January 1, 2000, is subject to 1.2 of the Plan except that PEP is modified as described in b. below. An individual who is a Participant in the Traditional Pension Plan after December 31, 1999 by reason of the preceding sentence will cease participating in the Traditional Plan once he/she ceases to earn Credited Service. If such an individual again earns Credited Service, he/she shall participate in PEP as modified in b. below. All other individuals shall participate in PEP as modified in b. below.

b. Participants who are Employees of BGE Commercial Building Systems, Inc. shall have the following modifications to PEP:

(i) A Participant's Total Pension Credits in Appendix A for the period of time during which the Participant is employed by BGE Commercial Building Systems, Inc. shall equal the sum of (1) 0.025 times the Credited Service earned in each Plan Year prior to the Plan Year in which the Participant reaches age 40, (2) 0.05 times the Credited Service earned in each Plan Year after the Plan Year in which the Participant reaches age 39 and before the Plan Year in which the Participant reaches age 50, and (3) 0.075 times the Credited Service earned in each Plan Year after the Participant reaches age 49.

(ii) The only form of pension payments that a Participant may elect under PEP pursuant to 3.1(b) is monthly installments; lump sum payment is not available except if pursuant to the automatic lump sum cash-out provisions of 3.3(e). 3.3(h) therefore is not applicable. This (ii) is not applicable to a Participant who accrued any benefits under PEP while employed by an Employer whose Employee Participants were eligible to elect under PEP pursuant to 3.1(b) a lump sum, and then after January 1, 2000 transferred employment to BGE Commercial Building Systems, Inc. The Preretirement Survivor Benefit under 5.8 may be paid as a lump sum.

(iii) The third sentence in the definition of Annuity Factor in Appendix A is not applicable unless the Participant transferred employment to BGE Commercial Building Systems, Inc. after January 1, 2000, and was eligible for Early Retirement under 2.2 at the time he/she was employed by the Company or a subsidiary listed in this Appendix G other than BGE Home Products & Services, Inc. or BGE Commercial Building Systems, Inc.

Baltimore Gas and Electric Company [3]

Constellation Nuclear Services, Inc.

Constellation Generation Group, LLC

Constellation Operating Services, Inc.; Constellation Operating Services; COSI Central Wayne, Inc. (Employees represented by a union under a collective bargaining agreement are not eligible to participate); COSI Synfuels, Inc.; COSI Sunnyside, Inc.; COSI Puna, Inc.; PCI Operating Company Partnership [4]

---

3 With respect to an Employee of the Comfort Link division of Baltimore Gas and Electric Company, only individuals who are both a Participant on December 31, 1999 and an Employee of the Comfort Link division of Baltimore Gas and Electric Company on January 1, 2000, shall be eligible to participate in the Plan. Notwithstanding anything in the Plan to the contrary, the Vice-Chairman of Baltimore Gas and Electric Company will not be eligible to participate in this Plan.

4 Employees of each listed subsidiary are eligible for participation in PEP effective January 1, 2003.
For purposes of 4.2, Vesting Service shall be computed using as the Employment Commencement Date the date on which an Employee first performed an hour of service for the subsidiary. However, if the Participant was an Employee on January 1, 2003 and was employed by one of the following entities on the day immediately preceding the date the Employee became employed by the subsidiary, by A/C Power or by Trona Operating Partners, G.P. (or one of their subsidiaries), the Employment Commencement Date shall be the date on which the Employee first performed an hour of service for such entity (but in no event prior to any date noted in parentheses below):

Malacha Power Project, Inc.
Sunnyside Operating Associates
Niagara Mohawk Power Corporation
Consolidated Edison Company of New York (but only if the Employee was hired by COSI Astoria after August 20, 1999)
OESI Power (but only if the Employee was transferred to Constellation Operating Services, Inc. or one of its subsidiaries from OESI Power on January 6, 1993)
Kerr McGee Corporation—(but only if the Employee became an employee of Constellation Operating Services, Inc., A/C Power, or Trona Operating Partners, G.P. on December 1, 1990)
Ahlstrom Pyropower (or any other employer wholly or partially owned directly or indirectly, by
Ahlstrom Pyropower (or any successor thereto))
Ultrasystems, Inc.
Hadson Corporation
LG&E Power, Inc
LUZ International
U C Operating Services
Panther Creek Fuels Company
Nevada Operations, Inc.
Central Wayne County Sanitation Authority
U. S. Generating (COSI Carr Street)
Ormat Energy Systems, Inc.
Ormat Systems, Inc.
Baltimore Gas and Electric Company (or any other employer wholly or partially owned directly or indirectly, by Baltimore Gas and Electric Company (or any successor thereto))
A/C Power

For purposes of 2.1 and A-31, Vesting Service shall be used instead of Credited Service to determine whether a Participant is eligible for Normal Retirement.

For purposes of 2.2 and A-19, Vesting Service shall be used instead of Credited Service to determine whether a Participant is eligible for Early Retirement.

For purposes of 4.3, Credited Service shall only include months beginning on or after January 1, 2003 during which an Employee works at least one hour for the Employer while classified as a Full-Time Employee.

Constellation NewEnergy, Inc. (Note: Effective April 1, 2011. For purposes of Section 4.2, Vesting Service shall be computed using as the Employment Commencement Date the date on which the Employee first performed an hour of service for this subsidiary. For purposes of Section 4.3, Credited Service for work performed as an Employee of this subsidiary shall only include months beginning on or after April 1, 2011 during which the Employee works at least one hour while classified as a Full-Time Employee.)

CNE Gas Holdings, Inc. (Note: Effective April 1, 2011. For purposes of Section 4.2, Vesting Service shall be computed using as the Employment Commencement Date the date on which the Employee first performed an hour of service for this subsidiary. For purposes of Section 4.3, Credited Service for work performed as an Employee of this subsidiary shall only include months beginning on or after April 1, 2011 during which the Employee works at least one hour while classified as a Full-Time Employee.)

APPENDIX I

BONUSES, INCENTIVE AND OTHER PAY

Part 1

The following types of license and other special bonuses are included in the base rate of pay definition of Average Annual Pay (set forth in Section A-8(i)) or Average Pay (set forth in Section A-9(i)), as applicable.

- NRC License Bonus
- Electrician License Bonus
- Plumber License Bonus

Part 2

The following types of bonuses and/or incentives are included in the bonuses and incentives definition of Average Annual Pay (set forth in Section A-8(ii))or Average Pay (set forth in Section A-9(ii)), as applicable.

Baltimore Gas and Electric Company

- Promotion Recognition Award
- Results Incentive Award
- Lump Sum Pay Adjustment
- Commission Payments

Exhibit 10.65

FIRST AMENDMENT TO THE
PENSION PLAN OF
CONSTELLATION ENERGY GROUP, INC.
(Amended and Restated Effective January 31, 2012)

WHEREAS, Constellation Energy Group, Inc. (the "Company") sponsors the Pension Plan of Constellation Energy Group, Inc. (Amended and Restated Effective as of January 31, 2012) (the "Plan"), which is intended to meet the requirements of the provisions of the Internal Revenue Code of 1986, (as amended) (the "Code"); and

WHEREAS, the Company intended to provide all employees who are eligible for severance benefits on or after June 1, 2003, under its Company-sponsored severance plan pension benefits based on their age and years of service at the end of their severance period, as set forth in Section 3.5 of the Plan; and;

WHEREAS, a new severance plan was established on September 19, 2008; and

WHEREAS, the Plan Administrator of the Plan, pursuant to the authority granted to her in Section 6.6(b) of the Plan, has consistently interpreted Section 3.5 to apply to participants eligible for severance under the new severance plan even though it wasn't specifically referenced in the Plan; and

WHEREAS, pursuant to Section 9.1, the Chief Human Resources Officer may amend the Plan in ways that do not materially affect liabilities; and

WHEREAS, an actuarial determination has been made that the cost of providing such benefits to participants in the new severance plan is immaterial;

NOW, THEREFORE, BE IT RESOLVED, that for purposes of clarity, the Plan is hereby amended as follows, effective September 19, 2008, except where noted:

1. By amending Section 3.5, Severance Plan Payments, to delete the phrase “Constellation Energy Group, Inc. Severance Plan” each time it occurs, and to insert in its place the term, “Severance Plan”.

2. By replacing section A-46 Deleted with the following:

   A-46 “Severance Plan” shall mean either of the Constellation Energy Group, Inc. Severance Plan or the Constellation Energy Group, Inc. Severance Plan for Constellation Energy Resources, LLC and Other Employees.

****

IN WITNESS WHEREOF, this Amendment to the Plan was executed on this _____ day of March, 2012.

____

Mary L. Lauria
Chief Human Resources Officer

Exhibit 10.66

**SECOND AMENDMENT TO THE
PENSION PLAN OF
CONSTELLATION ENERGY GROUP, INC.
(Amended and Restated Effective January 31, 2012)**

WHEREAS, .Exelon Corporation (the "Company") sponsors the Pension Plan of Constellation Energy Group, Inc. (Amended and Restated Effective January 31, 2012) (the "Plan"); and

WHEREAS, the Company desires to amend the Plan to incorporate the provisions of a special lump sum payment option and to reflect changes necessary to comply with Section 436 of the Internal Revenue Code of 1986, as amended, and the final regulations thereunder.

NOW, THEREFORE, RESOLVED, that pursuant to the power of amendment contained in Article IX of the Plan, the Plan is amended, effective October 1, 2012, except as otherwise stated below:

1. Effective on and after January 1, 2013, Section 1.1 of the Plan is amended by inserting the following at the end thereof:

No Employee hired on or after January 1, 2013 shall be eligible to participate in the Plan, with the exception of Employees of the Employer listed on Appendix G.

2. Effective on and after the Effective Time, Article 1 of the Plan is amended by inserting the following new Section 1.3 at the end thereof:

1.3 Effect of Merger Agreement — If an Employee who was an Employee on or prior to the Effective Time transfers employment to or is reemployed by Exelon in a job classification with respect to which similarly situated employees of Exelon are not eligible to participate in the Plan but are instead eligible to participate in a Parent Benefit Plan (as such term is defined in the Merger Agreement) that is intended to be qualified under Section 401(a) or 401(k) of the Code (each such plan, an "Exelon Retirement Plan"), then such individual shall upon such transfer or reemployment remain a Participant in the Plan and shall not participate in the Exelon Retirement Plan. If a participant in an Exelon Retirement Plan who was a participant in such plan on or prior to the

Effective Time transfers employment to or is reemployed by a Participating Employer in a job classification with respect to which similarly situated employees of such Participating Employer are not eligible to participate in such plan but are instead eligible to participate in the Plan, then such individual shall upon such transfer or reemployment remain a participant in the Exelon Retirement Plan and shall not participate in the Plan.

3. Article I of the Plan is amended by inserting the following new Section 1.4 at the end thereof:

Section 1.4. Certain Rehired Employees. Notwithstanding anything contained herein to the contrary, no individual who has received a Special Lump Sum Payment or an Immediately Commencing Annuity in accordance with Section 3.6 shall be eligible to become a Participant pursuant to this Article 1.

4. Article III of the Plan is amended by adding the following new Section 3.6 at the end thereof:

Section 3.6. Special Lump Sum Payment Option. (a) Eligibility. A Participant may elect to receive, during the election period described in this Section 3.6, his or her deferred Gross Pension as a terminated vested participant under the Plan ("Deferred Gross Pension") in the form of a lump sum payment ("Special Lump Sum Payment") or, an "Immediately Commencing Annuity" (as defined below); provided, however, that:

(i) the Participant has a Severance From Service Date prior to June 30, 2012 and does not die and is not rehired during the period beginning July 1, 2012 and ending on the date payment is made or commences in accordance with this Section 3.6;

(ii) the Participant has not otherwise commenced receiving pension benefits under the Plan on or prior to the date payment is made or commences in accordance with this Section 3.6;

(iii) such Severance From Service Date is not on account of the Participant's disability, following which the Participant is receiving long-term disability payments under any long-term disability program of an Employer, including on June 30, 2012;

(iv) the Participant's Deferred Gross Pension is not subject to a qualified domestic relations order as defined in Section 414(p) of the Code

(v) the Participant is not immediately, as of his or her Severance From Service Date, eligible for early retirement benefits in accordance with 3.3(b) above;

(vi) the Participant is not on a leave of absence or layoff from an Employer on June 30, 2012;

(vii) the Participant is not 70 ½ years of age or older as of October 1, 2012; and

(viii) the Participant can be located, after a diligent search, as necessary, by the Plan Administrator before July 1, 2012.

For each such Participant described in this paragraph (a) of this Section 3.6, the term "Immediately Commencing Annuity" shall mean, as applicable, either:

(i) with respect to a Participant eligible to commence receipt of his or her Deferred Gross Pension as of December 1, 2012, any applicable optional form of annuity available to the Participant under this Article III; or

(ii) with respect to any other Participant, a single life annuity, 50% "qualified joint and survivor annuity" (within the meaning of Code Section 417(b)) or a 75% "qualified optional survivor annuity" (within the meaning of Code Section 417(g)).

For purposes of this Section 3.6, a "Participant" shall also include a beneficiary of a Participant who otherwise satisfies the requirements of this Section 3.6 but for the Participant's death prior to July 1, 2012.

3.6(b) Election and Election Period. To receive the distribution of benefits described in paragraph (a) of this Section 3.6, an eligible Participant must voluntarily elect to receive a distribution pursuant to this Section 3.6 by completing an election form and spousal waiver, if required, provided by the Administrator, and submitting such forms to the Administrator after October 1, 2012 and before the following dates, as applicable,

(i) November 15, 2012, with respect to a Participant who elects a Special Lump Sum Payment; and

(iii) December 15, 2012, with respect to a Participant who elects an Immediately Commencing Annuity,

or such other period during 2012 determined by the Administrator.

The Administrator shall provide each eligible Participant, not less than 30 days and not more than 180 days before the Benefit Commencement Date, an application form including a general description of the material features, as well as an explanation of the relative values and financial effect, of the optional forms of benefit available under this Section 3.6, in a manner that satisfies the notice requirements of Section 417(a)(3) of the Code and the Treasury Regulations thereunder. The form shall indicate the Participant's right to waive a survivor annuity, his Surviving Spouse's right to consent to such waiver or refuse such consent, and the right to revoke any waiver, within the 180 day period preceding the Benefit Commencement Date, and shall include a description of the right of the Participant, if any, to defer receipt of a distribution and the consequences of failure to defer such receipt, in accordance with Treasury guidance under Section 411(a)(11) of the Code.

3.6(c) Amount of Payment. The Special Lump Sum Payment shall equal the actuarial equivalent of the Participant's nonforfeitable Deferred Gross Pension, based on the following factors:

(i) the applicable interest rate described in Section 417(e)(3) of the Code for August of 2011;

(ii) an assumed commencement date of the later of (A) age 65, and (B) the Participant's age as of December 1, 2012;

(iii) the applicable mortality table, as defined in Section 417 of the Code and the Treasury Regulations promulgated thereunder; and

(iv) the Gross Pension of a Participant in the PEP shall be calculated, in accordance with the terms of the existing terms of the Plan, as the present value of the age 65 deferred annuity (within the meaning of 3.3(g)).

The Immediately Commencing Annuity shall be calculated:

(i) in accordance with the applicable terms of the Plan, for a Participant who is eligible to immediately commence benefits under the terms of the Plan as of the payment date set forth in paragraph (d) of this Section 3.6 and

(ii) as the actuarial equivalent of the Special Lump Sum Payment, for each other Participant.

3.6(d) Payment of Benefit. If an eligible Participant elects the distribution of his or her Deferred Gross Pension in accordance with this Section 3.6, payment shall be made, or commence to be made, on or before December 1, 2012, or as soon as administratively practicable thereafter.

3.6(e) Death and Rehire. If an eligible Participant elects the distribution of his or her Deferred Gross Pension in accordance with this Section 3.6 and subsequently dies or is rehired as an Employee before distributions commence, his or her election shall be null and void and the Participant's benefit shall be paid pursuant to the Plan without regard to this Section 3.6. Notwithstanding anything contained herein to the contrary, upon distribution of a Special Lump Sum Payment or an Immediately Commencing Annuity made to an individual in accordance with this Section 3.6, in the event of the individual's rehire with an Employer following the date such distribution is made, the individual shall not be eligible to participate in the Plan during such period of rehire and may be eligible to participate in the Exelon Corporation Cash Balance Pension Plan or the Exelon Corporation Pension Plan for Bargaining Unit Employees (or such other plan that applies to employees of an Employer hired on or after December 1, 2012), as applicable, in accordance with their terms and conditions.

5. Effective on and after the Effective Time, Section 6.1 shall be amended by adding a sentence before the first sentence, as follows:

Each person entitled to a payment under the Plan shall furnish such information and data, including birth certificates or other evidence of age satisfactory to the Administrator, and sign such documents as may reasonably be requested by the Administrator or the Trustee in connection with the administration of the Plan.

6. Effective on and after the Effective Time, Sections 6.4, 6.5, 6.6, 6.7 and 6.8 shall be deleted in their entirety, and new Sections 6.4 through 6.12 shall be added as follows, and the remaining sections shall be renumbered:

6.4 The Administrator, the Investment Fiduciary and the Corporate Investment Committee

6.4(a) The Administrator — The Company's Vice President, Health & Benefits, or such other person or committee appointed by the Chief Human Resources Officer from time to time (such vice president or other person or committee, the "Administrator"), shall be the "administrator" of the Plan, within the meaning of such term as used in ERISA. In addition, the Administrator shall be the "named fiduciary" of the Plan, within the meaning of such term as used in ERISA, solely with respect to administrative matters involving the Plan and not with respect to any investment of the Plan's assets. The Administrator shall have the following duties, responsibilities and rights:

(i) The Administrator shall have the duty and discretionary authority to interpret and construe this Plan in regard to all questions of eligibility, the status and rights of Participants, Beneficiaries and other persons under this Plan, and the manner, time, and amount of payment of any distributions under this Plan.

The determination of the Administrator with respect to an Employee's years of Vesting Service, the amount of the Employee's Compensation, and any other matter affecting payments under the Plan shall be final and binding. Benefits under the Plan shall be paid to a Participant or Beneficiary only if the Administrator, in his or her discretion, determines that such person is entitled to benefits.

(ii) Each Employer shall, from time to time, upon request of the Administrator, furnish to the Administrator such data and information as the Administrator shall require in the performance of his or her duties.

(iii) The Administrator shall direct the Trustee to make payments of amounts to be distributed from the Trust Fund under Article 7 (relating to distributions). In addition, it shall be the duty of the Administrator to certify to the Trustee the names and addresses of all Participants, the amounts of all Pensions, the dates of death of Participants and all proceedings and acts of the Administrator necessary or desirable for the Trustee to be fully informed as to the Pension to be paid out of the Trust Fund.

(iv) The Administrator shall have all powers and responsibilities necessary to administer the Plan, except those powers that are specifically vested in the Investment Fiduciary, the Corporate Investment Committee or the Trustee.

(v) The Administrator may require a Participant or Beneficiary to complete and file certain applications or forms approved by the Administrator and to furnish such information requested by the Administrator. The Administrator and the Plan may rely upon all such information so furnished to the Administrator.

(vi) The Administrator shall be the Plan's agent for service of legal process and forward all necessary communications to the Trustee.

6.4(b) Removal of Administrator — The Chief Human Resources Officer shall have the right at any time, with or without cause, to remove the Administrator (including any member of a committee that constitutes the Administrator). The Administrator may resign and the resignation shall be effective upon delivery of the written resignation to the Chief Human Resources Officer. Upon the resignation, removal or failure or inability for any reason of the Administrator to act hereunder, the Chief Human Resources Officer shall appoint a successor. Any successor Administrator shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor. None of the Company, any member of the board of directors of the Company who is not the Chief Human Resources Officer, nor any other person shall have any responsibility regarding the retention or removal of the Administrator.

6.4(c) The Investment Fiduciary — The Company, acting through the Exelon Investment Office, shall be the Investment Fiduciary and the "named fiduciary" of the Plan, within the meaning of such term as used in ERISA, solely with respect to matters involving the investment of assets of the Plan and, any contrary provision of the Plan notwithstanding, in all events subject to the limitations contained in section 404(a)(2) of ERISA and all other applicable limitations. The Investment Fiduciary shall have the following duties, responsibilities and rights:

(i) The Investment Fiduciary shall be the "named fiduciary" for purposes of directing the Trustee as to the investment of amounts held in the Trust Fund and for purposes of appointing one or more investment managers as described in ERISA.

(ii) The Investment Fiduciary shall submit to the Corporate Investment Committee annual manager review results and such other reports and documents as may be necessary for the Corporate Investment Committee to monitor the activities and performance of the Investment Fiduciary.

(iii) Each Employer shall, from time to time, upon request of the Investment Fiduciary, furnish to the Investment Fiduciary such data and information as the Investment Fiduciary shall require in the performance of its duties.

6.4(d) The Corporate Investment Committee — The Corporate Investment Committee shall be responsible for overall monitoring of the performance of the Investment Fiduciary. The Corporate Investment Committee shall have the following duties, responsibilities and rights:

(i) The Corporate Investment Committee shall monitor the activities and performance of the Investment Fiduciary and shall review annual manager review results and any other reports and documents submitted by the Investment Fiduciary.

(ii) The Corporate Investment Committee shall have authority to approve asset allocation recommendations of the Investment Fiduciary, and approve the retention or firing of any investment consultant (but not any investment manager), custodian or trustee, as recommended by the Investment Fiduciary.

(iii) The Corporate Investment Committee shall have the right at any time, with or without cause, to remove one or more employees of the Exelon Investment Office or to appoint another person or committee to act as Investment Fiduciary. Any successor Investment Fiduciary shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor.

The power and authority of the Corporate Investment Committee with respect to the Plan shall be limited solely to the monitoring and removal of the Investment Fiduciary and approval of the recommendations specified in clause (ii) above. The Corporate Investment Committee shall have no responsibility for making investment decisions, appointing or firing investment managers or for any other duties or responsibilities with respect to the Plan, other than those specifically listed herein.

6.4(e) Status of Administrator, the Investment Fiduciary and the Corporate Investment Committee — The Administrator, any person acting as, or on behalf of, the Investment Fiduciary, and any member of the Corporate Investment Committee may, but need not, be an Employee, trustee or officer of an Employer and such status shall not disqualify such person from taking any action hereunder or render such person accountable for any distribution or other material advantage received by him or her under this Plan, provided that no Administrator, person acting as, or on behalf of, the Investment Fiduciary, or any member of the Corporate Investment Committee who is a Participant shall take part in any action of the Administrator or the Investment Fiduciary on any matter involving solely his or her rights under this Plan.

6.4(f) Notice to Trustee of Members — The Trustee shall be notified as to the names of the Administrator and the person or persons authorized to act on behalf of the Investment Fiduciary.

6.4(g) Allocation of Responsibilities. Each of the Administrator, the Investment Fiduciary and the Corporate Investment Committee may allocate their respective responsibilities and may designate any person, persons, partnership or corporation to carry out any of such responsibilities with respect to the Plan. Any such allocation or designation shall be reduced to writing and such writing shall be kept with the records of the Plan.

6.4(h) General Governance — Each of the Administrator, the Investment Fiduciary and the Corporate Investment Committee may act at a meeting or by written consent approved by a majority of its respective members, as applicable. The Corporate Investment Committee shall elect one of its members as chairman and appoint a secretary, who may or may not be a member of such Committee. The secretary of the Corporate Investment Committee shall keep a record of all meetings and forward all necessary communications to the Employers or the Trustee. All decisions of the Corporate Investment Committee shall be made by the majority, including actions taken by written consent. The Administrator, the Investment Fiduciary and the Corporate Investment Committee may adopt such rules and procedures as it deems desirable for the conduct of its affairs, provided that any such rules and procedures shall be consistent with the provisions of the Plan.

6.4(i) Indemnification — The Employers hereby jointly and severally indemnify the Administrator, the persons employed in the Exelon Investment Office, the members of the Corporate Investment Committee, the Chief Human Resources Officer, and the directors, officers and employees of the Employers and each of them, from the effects and consequences of their acts, omissions and conduct in their official capacity with respect to the Plan (including but not limited to judgments, attorney fees and costs with respect to any and all related claims, subject to the Company's notice of and right to direct any litigation, select any counsel or advisor, and approve any settlement), except to the extent that such effects and consequences result from their own willful misconduct. The foregoing indemnification shall be in addition to (and secondary to) such other rights such persons may enjoy as a matter of law or by reason of insurance coverage of any kind.

6.4(j) No Compensation. None of the Administrator, any person employed in the Exelon Investment Office nor any member of the Corporate Investment Committee may receive any compensation or fee from the Plan for services as the Administrator, Investment Fiduciary or a member of the Corporate Investment Committee; provided, however that nothing contained herein shall preclude the Plan from reimbursing the Company or any Affiliate for compensation paid to any such person if such compensation constitutes "direct expenses" for purposes of ERISA. The Employers shall reimburse the Administrator, the persons employed in the Exelon Investment Office and the members of the Corporate Investment Committee for any reasonable expenditures incurred in the discharge of their duties hereunder.

6.4(k) Employ of Counsel and Agents. The Administrator, the Investment Fiduciary and the Corporate Investment Committee may employ such counsel (who may be counsel for an Employer) and agents and may arrange for such clerical and other services as each may require in carrying out its respective duties under the Plan.

6.5 Claims Procedure. Any Participant or distributee who believes he or she is entitled to benefits in an amount greater than those which he or she is receiving or has received may file a claim with the Administrator. Such a claim shall be in writing and state the nature of the claim, the facts supporting the claim, the amount claimed, and the address of the claimant. The Administrator shall review the claim and, unless special circumstances require an extension of time, within 90 days after receipt of the claim, give notice to the claimant, either in writing by registered or certified mail or in an electronic notification, of the Administrator's decision with respect to the claim. Any electronic notice delivered to the claimant shall comply with the standards imposed by applicable Regulations. If the Administrator determines that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 90-day period and in no event shall such an extension exceed 90 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which the Administrator expects to render the benefit determination. The notice of the decision of the Administrator with respect to the claim shall be written in a manner calculated to be understood by the claimant and, if the claim is wholly or partially denied, the Administrator shall notify the claimant of the adverse benefit determination and shall set forth the specific reasons for the adverse determination, the references to the specific Plan provisions on which the determination is based, a description of any additional material or information necessary for the claimant to perfect the claim, an explanation of why such material or information is necessary, and a description of the claim review procedure under the Plan and the time limits applicable to such procedures, including a statement of the claimant's right (subject to the limitations described in Section 8.9 (relating to statute of limitations for actions under the Plan) and 8.10 (relating to forum for legal actions under the Plan)) to bring a civil action under section 502 of ERISA following an adverse benefit determination on review. The Administrator shall also advise the claimant that the claimant or the claimant's duly authorized representative may request a review by the Chief Human Resources Officer (or such other officer designated from time to time by the Chief Human Resources Officer) of the adverse benefit determination by filing with such officer, within 60 days after receipt of a notification of an adverse benefit determination, a written request for such review. The claimant shall be informed that, within the same 60-day period, he or she (a) may be provided, upon request and free of charge, reasonable access to, and copies of, all documents, records and other information relevant to the claimant's claim for benefits and (b) may submit to the officer written comments, documents, records and other information relating to the claim for benefits. If a request is so filed, review of the adverse benefit determination shall be made by the officer within, unless special circumstances require an extension of time, 60 days after receipt of such request, and the claimant shall be given written notice of the officer's final decision. If the officer determines that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 60-day period and in no event shall such an extension exceed 60 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which the officer expects to render the determination on review. The review of the officer shall take into account all comments, documents, records and other information submitted by the claimant relating to the claim, without regard to whether such information was submitted or considered in the initial benefit determination. The notice of the final decision shall include specific reasons for the determination and references to the specific Plan provisions on which the determination is based and shall be written in a manner calculated to be understood by the claimant.

6.6 Notices to Participants, Etc. — All written notices, reports and statements given, made, delivered or transmitted to a Participant or Beneficiary or any other person entitled to or claiming benefits under the Plan shall be deemed to have been duly given, made or transmitted when mailed by first class mail with postage prepaid and addressed to the Participant or Beneficiary or such other person at the address last appearing on the records of the Administrator. A Participant or Beneficiary or other person may record any change of his or her address from time to time by written notice filed with the Administrator.

6.7 Responsibility to Advise Administrator of Current Address — Each person entitled to receive a payment under the Plan shall file with the Administrator in writing his or her complete mailing address and each change therein. A check or communication mailed to any person at his or her address on file with the Administrator shall be deemed to have been received by such person for all purposes of the Plan, and neither the Administrator, the Employers nor the Trustee shall be obliged to search for or ascertain the location of any person. If the Administrator shall be in doubt as to whether payments are being received by the person entitled thereto, it shall, by registered mail addressed to the person concerned at his or her last address known to the Administrator, notify such person that all future Pension payments will be withheld until such person submits to the Administrator evidence of his or her continued life and his or her proper mailing address.

6.8 Notices to the Firm or Administrator — Written directions, notices and other communications from Participants or Beneficiaries or any other persons entitled to or claiming benefits under the Plan to the Employers or the Administrator shall be deemed to have been duly given, made or transmitted either when delivered to such location as shall be specified upon the form prescribed by the Administrator for the giving of such directions, notices and other communications or when mailed by first class mail with postage prepaid and addressed to the addressee at the address specified upon such forms.

6.9 Records. Each of the Administrator, the Investment Fiduciary and the Corporate Investment Committee shall keep a record of all of their respective proceedings, if any, and shall keep or cause to be kept all books of account, records and other data as may be necessary or advisable in their respective judgment for the administration of the Plan, the administration of the investments of the Plan or the monitoring of the investment activities of the Plan, as applicable.

6.10 Actuary to be Employed — The Company or the Investment Fiduciary shall engage an actuary to do such technical and advisory work as the Company or the Investment Fiduciary may request, including analyses of the experience of the Plan from time to time, the preparation of actuarial tables for the making of computations thereunder, and the submission to the Company or the Investment Fiduciary of an annual actuarial report, which report shall contain information showing the financial condition of the Plan, a statement of the contributions to be made by the Employers for the ensuing year, and such other information as may be requested by the Company or the Investment Fiduciary.

6.11 Electronic Media — Notwithstanding any provision of the Plan to the contrary and for all purposes of the Plan, to the extent permitted by the Administrator and any applicable law or Regulation, the use of electronic technologies shall be deemed to satisfy any written notice, consent, delivery, signature, disclosure or recordkeeping requirement under the Plan, the Code or ERISA to the extent permitted by or consistent with applicable law and Regulations. Any transmittal by electronic technology shall be deemed delivered when successfully sent to the recipient, or such other time specified by the Administrator.

6.12 Correction of Error — If it comes to the attention of the Administrator that an error has been made in the amount of benefits payable, or paid, to any Participant or Beneficiary under the Plan, the Administrator shall be permitted to correct such error by whatever means that the Administrator, in its sole discretion determines, including by offsetting future benefits payable to the Participant or Beneficiary or requiring repayment of benefits to the Plan, except that no adjustment need be made with respect to any Participant or Beneficiary whose benefit has been distributed in full prior to the discovery of such error.

7. Effective on and after of the Effective Time, Section 7.1 shall be deleted in its entirety, and shall be replaced as follows:

7.1 Contributions and Funding Policy — No contributions from any Participant shall be required or permitted under the Plan. The Company shall establish a funding policy and method consistent with the objectives of the Plan and the requirements of Title I of ERISA and shall communicate such policy and method, and any changes in such policy and method, to the Investment Fiduciary. Forfeitures arising under this Plan shall be applied to reduce the expenses of Plan administration, not to increase the benefits otherwise payable to Participants.

8. Effective on and after the Effective Time, Section 8.2(a) shall be amended to delete the third paragraph thereof.

9. Article VIII of the Plan is amended by adding the following new Sections 8.8 at the end thereof:

8.8. Certain Rehired Employees. Notwithstanding anything contained herein to the contrary, an individual who is reemployed by an Employer after December 19, 2012 and has received a Special Lump Sum Payment or an Immediately Commencing Annuity in accordance with Section 3.6 shall not be eligible to become a Participant pursuant to Article 1.

10. Effective on and after the Effective Time, Article VIII of the Plan is amended by adding the following new Sections 8.9, 8.10, 8.11, and 8.12 at the end thereof, as follows:

8.9 Expenses. The expenses of the Trustee in the administration of the Trust Fund, including compensation, if any, to the Trustee for its services, shall be paid by the Company or the Employers. All costs and expenses incurred in the operation of the Trust Fund, to the extent not described in the preceding sentence, and all costs and expenses incurred in the operation of the Plan or the Trust Fund, as applicable, including, but not limited to, "direct expenses" incurred in administering the Plan and the Trust Fund (including compensation paid to any employee of an Employer or an Affiliate who is engaged in the administration of the Plan or the Trust Fund), the expenses of the Administrator, the Investment Office and the Corporate Investment Committee, the fees of counsel and any agents for the Trustee, the Administrator, the Investment Office or the Corporate Investment Committee, and the fees of investment managers that manage assets of the Trust Fund, as applicable, shall be paid by the Trustee from the Trust Fund in such proportion as the Investment Office, in its sole discretion, shall determine, to the extent such expenses are not paid by the Employers and to the extent permitted under ERISA, Regulations and other applicable laws. Notwithstanding the foregoing, the Administrator or the Investment Office may authorize an Employer to act as an agent of the Plan to pay any expenses, and the Employer shall be reimbursed from the Trust Fund for such payments.

8.10 Statute of Limitations for Actions under the Plan. Except for actions to which the statute of limitations prescribed by section 413 of ERISA applies, (a) no legal or equitable action relating to a claim for benefits under section 502 of ERISA may be commenced later than one year after the claimant receives a final decision from the Chief Human Resources Officer (or such other officer designated from time to time by the Chief Human Resources Officer) in response to the claimant's request for review of the adverse benefit determination and (b) no other legal or equitable action involving the Plan may be commenced later than two years from the time the person bringing an action knew, or had reason to know, of the circumstances giving rise to the action. This provision shall not be interpreted to extend any otherwise applicable statute of limitations, nor to bar the Plan or its fiduciaries from recovering overpayments of benefits or other amounts incorrectly paid to any person under the Plan at any time or bringing any legal or equitable action against any party.

8.11 Forum for Legal Actions under the Plan. Any legal action involving the Plan that is brought by any Participant, any Beneficiary or any other person shall be litigated in the federal courts located in District of Maryland, and no other federal or state court.

8.12 Legal Fees. Any award of legal fees in connection with an action involving the Plan shall be calculated pursuant to a method that results in the lowest amount of fees being paid, which amount shall be no more than the amount that is reasonable. In no event shall legal fees be awarded for work related to (a) administrative proceedings under the Plan, (b) unsuccessful claims brought by a Participant, Beneficiary or any other person, or (c) actions that are not brought under ERISA. In calculating any award of legal fees, there shall be no enhancement for the risk of contingency, nonpayment or any other risk nor shall there be applied a contingency multiplier or any other multiplier. In any action brought by a Participant, Beneficiary or any other person against the Plan, the Administrator, any member of the Exelon Investment Office, any member of the Corporate Investment Committee, the Chief Human Resources Officer, any Plan fiduciary, the Company, its affiliates or their respective officers, directors, employees, or agents (the "Plan Parties"), legal fees of the Plan Parties in connection with such action shall be paid by the Participant, Beneficiary or other person bringing the action, unless the court specifically finds that there was a reasonable basis for the action.

11. Effective on and after the Effective Time, Section 9.1 and 9.2 shall be deleted in their entirety, and shall be replaced as follows

9.1 Amendment — The Board of Directors of the Company (or a committee thereof) may at any time and from time to time amend or modify this Plan in any manner deemed by the board of directors of the Company to be necessary or desirable, provided, however, that in the case of any amendment or modification that would not result in an aggregate annual cost to the Company of more than $50,000,000, the Plan may be amended or modified by action of the Chief Human Resources Officer (with the consent of the Chief Executive Officer in the case of a discretionary amendment or modification expected to result in an increase in annual expense or liability account balance exceeding $250,000) or another executive officer holding title of equivalent or greater responsibility and, provided further, that no amendment shall be made that is not consistent with any applicable collective bargaining agreement. Any such amendment or modification shall become effective on such date as the Board (or committee thereof) or executive shall determine and may apply to Participants in this Plan at the time thereof as well as to future Participants, provided, however, that, unless permitted by applicable law, no such amendment or modification which reduces the basis for the computation of benefits shall be retroactive as to service prior to the date of such amendment or modification.

9.2 Termination

9.2(a) Termination of the Plan by an Employer. The Company may at any time, by resolution adopted by its board of directors, terminate this Plan in its entirety. In addition, any Employer may at any time terminate its participation in this Plan by resolution adopted by its board of directors to that effect. Contributions of an Employer to the Plan are conditioned on the receipt from the Internal Revenue Service of an initial favorable determination letter that this Plan and the Trust as adopted by the Company meets the requirements of section 401(a) of the Code and that the Trust is exempt from tax under section 501(a) of the Code, and if the Internal Revenue Service shall refuse to issue such letter, any Employer may terminate its participation in this Plan and direct the Trustee to pay and deliver to that Employer the portion of the Trust applicable to its contributions.

9.2(b) Vesting and Distribution Upon Termination or Partial Termination. Upon termination or partial termination of the Plan, the benefit as of the date of termination or partial termination, as the case may be, of all affected Participants shall be fully vested; provided, however, that full vesting shall be required with respect to a termination or partial termination only to the extent the Plan is then funded.

Allocation and distribution of the terminated portion of the Trust Fund shall thereafter be made in accordance with the applicable requirements of ERISA and the Code and with any applicable approval of the Pension Benefit Guaranty Corporation (the “PBGC”). If the Administrator is notified by PBGC that PBGC is unable to determine that the Trust Fund is sufficient to discharge when due all obligations of the Plan with respect to benefits guaranteed by PBGC pursuant to section 4022 of ERISA, then the allocation and distribution of such portion of the Trust shall be made only under the direction of PBGC or a United States district court pursuant to section 4044 of ERISA.

In the event that, after the termination of the Plan, any assets remain after such allocation, such assets shall be paid to the Company. The portion of the assets allocated to provide benefits to any person or group of persons may be applied for the benefit of such person or persons by the distribution of cash, continuance of the Trust, establishment of a new Trust, purchase of annuities from an insurance company, or otherwise, as determined by the Investment Fiduciary in its sole discretion; provided, however, that the benefit of any Participant or former Participant who is married and has satisfied the vesting requirement shall, unless such person shall elect otherwise, be paid in the form set forth in the Plan relating to manner of distribution with respect to married Participants and, if the surviving Spouse of a deceased Participant or deceased former Participant is entitled to receive a benefit pursuant to the Plan provisions relating to manner of distribution with respect to married Participants or to pre-retirement death benefits, as the case may be, such benefit shall, unless such person shall elect otherwise, be paid in the form set forth therein.

Contributions of an Employer to the Plan are conditioned on the receipt from the Internal Revenue Service of an initial favorable determination letter that the Plan and Trust Fund as adopted by the Company meet the requirements of section 401(a) of the Code and that the Trust is exempt from tax under section 501(a) of the Code, and, in the event that the Internal Revenue Service shall refuse to issue such letter, the Company may terminate the Plan and shall direct the Trustee to pay and deliver the Trust to the Company.

12. Effective on and after the Effective Time, the text of Appendix A-2 of the Plan is deleted and replaced as follows: “Reserved,” and all references to the “Administrative Committee” shall be deleted.

13c. Effective on and after the Effective Time, Appendix A-13 is amended by replacing the entirety of the text as follows:

A-13 “Company” means Exelon Corporation, and its successor and assigns.

14. Effective on and afterthe Effective Time, Appendix A-16 is amended by replacing the entirety of the text as follows:

A-16 “Disability Plan” means the Constellation Energy Group, Inc. Long-Term Disability Plan, the Exelon Corporation Long Term Disability Plan, or any successor plan.

15. Effective on and after November 30, 2012, Appendix A-20 is amended by adding the following at the end thereof:

For employees who employees who were Transferred Employees as that term is defined in the Purchase and Sale Agreement by and between Constellation Power Source Generation, Inc. as Seller, and Raven Power Holdings LLC as Buyer, dated as of August 8, 2012, Credited Service for purposes of determining the Early Retirement Adjustment Factor shall include all time periods while employed by the Buyer, and dit for age attained during employment with the Buyer until such time as the Transferred Employee elects to receive benefits under the Plan; and (ii)

16. Effective on and after the Effective Time, a new Appendix A-20a shall be added immediately following Appendix A-20 as follows:

A-20a “Effective Time” means the effective time of the transaction that is the subject of the Merger Agreement, as such term is defined in the Merger Agreement.

17. Effective on and after the Effective Time, Appendix A-21 shall be amended by adding a sentence after the first sentence as follows:

> Effective as of the Effective Time, Employee shall not include any person who was: (i) employed immediately prior to the Effective Time at Exelon or a facility owned immediately before the Effective Time by Exelon or (ii) initially employed on or after the Effective Time at a facility owned immediately before the Effective Time by Exelon.

18. Effective on and after the Effective Time, the text of Appendix A-24a is deleted and replaced as follows, and all references to the "Executive Group" shall be deleted.

> A-24a "Exelon" means Exelon Corporation and any of its affiliates that was an affiliate immediately before the Effective Time.

19. Appendix A-21 of the Plan is amended by adding the following new sentence at the end thereof:

> Notwithstanding anything contained herein to the contrary, an Employee shall not include an individual who has received a Special Lump Sum Payment or an Immediately Commencing Annuity in accordance with Section 3.6.

20. Appendix A-29 of the Plan is amended by inserting the following new sentence at the end thereof:

> Notwithstanding the foregoing, a Participant shall not be entitled to any amount payable from the Trust under the Plan following the Participant's receipt of a Special Lump Sum Payment within the meaning of Section 3.6.

21. Effective on and after the Effective Time, Appendix A-30 is amended by replacing the entirety of its text as follows:

> A-30 "Investment Fiduciary" means the Company acting through the Exelon Investment Office.

22. Effective on and after the Effective Time, a new Appendix A-30a shall be added immediately following Appendix A-30 as follows:

A-30a “Merger Agreement” means that Agreement and Plan of Merger, dated as of April 28, 2011, by and among Exelon Corporation, Bolt Acquisition Corporation and Constellation Energy Group, Inc.

23. Appendix A-35 of the Plan is amended by adding the following new sentence at the end thereof:

An individual shall cease to be a Participant upon the date the individual is no longer eligible to receive a benefit from this Plan (including, without limitation, upon his or her receipt of a Special Lump Sum Payment as defined in Section 3.6) or upon the individual’s Severance From Service Date if the individual is not eligible to receive a benefit from this Plan.

24. Effective January 1, 2013, Appendix A-35 of the Plan is amended by adding the following sentence to the end thereof:

No Employee hired on or after January 1, 2013 shall be a Participant, with the exception of Employees of the Employer set forth in Appendix G.

25. Effective on and after the Effective Time, Appendix A-38 of the Plan is amended by replacing the entirety of the text as follows:

A-38“Plan Administrator” means the Director, Employee Plans and Programs of the Company (or the position succeeding to that function).

26. Appendix A-44 of the Plan is amended by inserting the following new sentence before the last sentence of the first paragraph therein:

For distributions with a Benefit Commencement Date on or after December 1, 2012, other than as set forth in Section 3.6, the interest rate shall be the rate as defined in Section 417(e)(3)(C) of the Code for the fifth month preceding the calendar year in which such distribution is made or commences; provided, however, that the rate as defined in Section 417(e)(3)(C) of the Code for the month in which such distribution is made or commences shall be used if more favorable to the distributee during the period beginning December 1, 2012 through December 1, 2013.

27. Effective as of the June 1, 2012, Appendix A-45 is amended by replacing the entirety of the text as follows:

A-45 “Trustee” means the Northern Trust Company or any successor Trustee appointed by the Board of Directors.

28. Appendix G shall be deleted in its entirety, and replaced with a new Appendix G, attached hereto.

*****

IN WITNESS WHEREOF, Exelon Corporation has caused this instrument to be executed by its duly authorized officer on this ____ day of __________, 2012.

CONSTELLATION ENERGY GROUP, INC.

Senior Vice President and
Chief Human Resource Officer

APPENDIX G

DESIGNATED SUBSIDIARIES

Employees of the following subsidiary are eligible to participate in the Plan on the same terms and conditions as set forth therein, except as otherwise provided below:

BGE Home Products and Services, LLC:

a. An individual who is a Participant on December 31, 1999 and an Employee of BGE Home Products & Services, Inc. on January 1, 2000, is subject to 1.2 of the Plan except that PEP is modified as described in b. below. Notwithstanding the preceding sentence, an individual who is an Employee of Constellation Energy Source, Inc. on December 31, 1999, who transfers to BGE Home Products & Services, Inc. effective January 1, 2000, and was hired by Constellation Energy Source, Inc. after December 31, 1994, shall participate in PEP as modified in b. below. An individual who is a Participant in the Traditional Pension Plan after December 31, 1999 by reason of the preceding will cease participating in the Traditional Plan once he/she ceases to earn Credited Service. If such an individual again earns Credited Service, he/she shall participate in PEP as modified in b. below. All other individuals shall participate in PEP as modified in b. below.

b. Participants who are Employees of BGE Home Products & Services, Inc. shall have the following modifications to PEP:

(i) A Participant's Total Pension Credits in Appendix A for the period of time during which the Participant is employed by BGE Home Products & Services, Inc. shall equal the sum of (1) 0.025 times the Credited Service earned in each Plan Year prior to the Plan Year in which the Participant reaches age 40, (2) 0.05 times the Credited Service earned in each Plan Year after the Plan Year in which the Participant reaches age 39 and before the Plan Year in which the Participant reaches age 50, and (3) 0.075 times the Credited Service earned in each Plan Year after the Participant reaches age 49.

(ii) The only form of pension payments that a Participant may elect under PEP pursuant to 3.1(b) is monthly installments; lump sum payment is not available except if pursuant to the automatic lump sum cash-out provisions of 3.3(e); 3.3(h) therefore is not applicable. This (ii) is not applicable to a Participant who accrued any benefits under PEP while employed by an Employer whose Employee Participants were eligible to elect under PEP pursuant to 3.1(b) a lump sum, and then after January 1, 2000 transferred employment to BGE Home Products & Services, Inc. This (ii) is not applicable to a Participant who received benefits under the Special Window for Employees Employed by BGE Home (as part of BGE Home's closing of its retail appliance and merchandise stores and the reorganization of BGE Home because of that closing) under the Constellation Energy Group, Inc. Severance Plan.

(iii) The Preretirement Survivor Benefit under 5.8 may be paid as a lump sum.

(iv) The third sentence in the definition of Annuity Factor in Appendix A is not applicable unless the Participant transferred employment to BGE Home Products & Services, Inc. after January 1, 2000, and was eligible for Early Retirement under 2.2 at the time he/she was employed by the Company or a subsidiary listed in this Appendix G other than BGE Home Products & Services, Inc. or BGE Commercial Building Systems, Inc.

Employees of the following subsidiaries who were hired prior to January 1, 2013 are eligible to participate in the Plan on the same terms and conditions set forth therein, except as set forth below.

Constellation Power, Inc.

Constellation Energy Commodities Group, Inc. (formerly known as Constellation Power Source, Inc.) Constellation Power Source Generation, Inc.

Constellation Energy Source, Inc.

BGE Home Products and Services, LLC (formerly known as BGE Home Products and Services, Inc.) [1]

---

[1] a. An individual who is a Participant on December 31, 1999 and an Employee of BGE Home Products & Services, Inc. on January 1, 2000, is subject to 1.2 of the Plan except that PEP is modified as described in b. below. Notwithstanding the preceding sentence, an individual who is an Employee of Constellation Energy Source, Inc. on December 31, 1999, who transfers to BGE Home Products & Services, Inc. effective January 1, 2000, and was hired by Constellation Energy Source, Inc. after December 31, 1994, shall participate in PEP as modified in b. below. An individual who is a Participant in the Traditional Pension Plan after December 31, 1999 by reason of the preceding will cease participating in the Traditional Plan once he/she ceases to earn Credited Service. If such an individual again earns Credited Service, he/she shall participate in PEP as modified in b. below. All other individuals shall participate in PEP as modified in b. below.
b. Participants who are Employees of BGE Home Products & Services, Inc. shall have the following modifications to PEP:
(i) A Participant's Total Pension Credits in Appendix A for the period of time during which the Participant is employed by BGE Home Products & Services, Inc. shall equal the sum of (1) 0.025 times the Credited Service earned in each Plan Year prior to the Plan Year in which the Participant reaches age 40, (2) 0.05 times the Credited Service earned in each Plan Year after the Plan Year in which the Participant reaches age 39 and before the Plan Year in which the Participant reaches age 50, and (3) 0.075 times the Credited Service earned in each Plan Year after the Participant reaches age 49.
(ii) The only form of pension payments that a Participant may elect under PEP pursuant to 3.1(b) is monthly installments; lump sum payment is not available except if pursuant to the automatic lump sum cash-out provisions of 3.3(e); 3.3(h) therefore is not applicable. This (ii) is not applicable to a Participant who accrued any benefits under PEP while employed by an Employer whose Employee Participants were eligible to elect under PEP pursuant to 3.1(b) a lump sum, and then after January 1, 2000 transferred employment to BGE Home Products & Services, Inc. This (ii) is not applicable to a Participant who received benefits under the Special Window for Employees Employed by BGE Home (as part of BGE Home's closing of its retail appliance and merchandise stores and the reorganization of BGE Home because of that closing) under the Constellation Energy Group, Inc. Severance Plan.
(iii) The Preretirement Survivor Benefit under 5.8 may be paid as a lump sum.
(iv) The third sentence in the definition of Annuity Factor in Appendix A is not applicable unless the Participant transferred employment to BGE Home Products & Services, Inc. after January 1, 2000, and was eligible for Early Retirement under 2.2 at the time he/she was employed by the Company or a subsidiary listed in this Appendix G other than BGE Home Products & Services, Inc. or BGE Commercial Building Systems, Inc.

BGE Commercial Building Systems, Inc. [2]

[2] a. An individual who is a Participant on December 31, 1999 and an Employee of BGE Commercial Building Systems, Inc. on January 1, 2000, is subject to 1.2 of the Plan except that PEP is modified as described in b. below. An individual who is a Participant in the Traditional Pension Plan after December 31, 1999 by reason of the preceding sentence will cease participating in the Traditional Plan once he/she ceases to earn Credited Service. If such an individual again earns Credited Service, he/she shall participate in PEP as modified in b. below. All other individuals shall participate in PEP as modified in b. below.

b. Participants who are Employees of BGE Commercial Building Systems, Inc. shall have the following modifications to PEP:

(i) A Participant's Total Pension Credits in Appendix A for the period of time during which the Participant is employed by BGE Commercial Building Systems, Inc. shall equal the sum of (1) 0.025 times the Credited Service earned in each Plan Year prior to the Plan Year in which the Participant reaches age 40, (2) 0.05 times the Credited Service earned in each Plan Year after the Plan Year in which the Participant reaches age 39 and before the Plan Year in which the Participant reaches age 50, and (3) 0.075 times the Credited Service earned in each Plan Year after the Participant reaches age 49.

(ii) The only form of pension payments that a Participant may elect under PEP pursuant to 3.1(b) is monthly installments; lump sum payment is not available except if pursuant to the automatic lump sum cash-out provisions of 3.3(e). 3.3(h) therefore is not applicable. This (ii) is not applicable to a Participant who accrued any benefits under PEP while employed by an Employer whose Employee Participants were eligible to elect under PEP pursuant to 3.1(b) a lump sum, and then after January 1, 2000 transferred employment to BGE Commercial Building Systems, Inc. The Preretirement Survivor Benefit under 5.8 may be paid as a lump sum.

(iii) The third sentence in the definition of Annuity Factor in Appendix A is not applicable unless the Participant transferred employment to BGE Commercial Building Systems, Inc. after January 1, 2000, and was eligible for Early Retirement under 2.2 at the time he/she was employed by the Company or a subsidiary listed in this Appendix G other than BGE Home Products & Services, Inc. or BGE Commercial Building Systems, Inc.

Baltimore Gas and Electric Company [3]

Constellation Nuclear Services, Inc.

Constellation Generation Group, LLC

Constellation Operating Services, Inc.; Constellation Operating Services; COSI Central Wayne, Inc. (Employees represented by a union under a collective bargaining agreement are not eligible to participate); COSI Synfuels, Inc.; COSI Sunnyside, Inc.; COSI Puna, Inc.; PCI Operating Company Partnership [4]

---

[3] With respect to an Employee of the Comfort Link division of Baltimore Gas and Electric Company, only individuals who are both a Participant on December 31, 1999 and an Employee of the Comfort Link division of Baltimore Gas and Electric Company on January 1, 2000, shall be eligible to participate in the Plan. Notwithstanding anything in the Plan to the contrary, the Vice-Chairman of Baltimore Gas and Electric Company will not be eligible to participate in this Plan.

[4] Employees of each listed subsidiary are eligible for participation in PEP effective January 1, 2003.

For purposes of 4.2, Vesting Service shall be computed using as the Employment Commencement Date the date on which an Employee first performed an hour of service for the subsidiary. However, if the Participant was an Employee on January 1, 2003 and was employed by one of the following entities on the day immediately preceding the date the Employee became employed by the subsidiary, by A/C Power or by Trona Operating Partners, G.P. (or one of their subsidiaries), the Employment Commencement Date shall be the date on which the Employee first performed an hour of service for such entity (but in no event prior to any date noted in parentheses below):

Malacha Power Project, Inc.
Sunnyside Operating Associates
Niagara Mohawk Power Corporation
Consolidated Edison Company of New York (but only if the Employee was hired by COSI Astoria after August 20, 1999)
OESI Power (but only if the Employee was transferred to Constellation Operating Services, Inc. or one of its subsidiaries from OESI Power on January 6, 1993)
Kerr McGee Corporation—(but only if the Employee became an employee of Constellation Operating Services, Inc., A/C Power, or Trona Operating Partners, G.P. on December 1, 1990)
Ahlstrom Pyropower (or any other employer wholly or partially owned directly or indirectly, by Ahlstrom Pyropower (or any successor thereto))
Ultrasystems, Inc.
Hadson Corporation
LG&E Power, Inc
LUZ International
U C Operating Services
Panther Creek Fuels Company
Nevada Operations, Inc.
Central Wayne County Sanitation Authority
U. S. Generating (COSI Carr Street)
Ormat Energy Systems, Inc.
Ormat Systems, Inc.
Baltimore Gas and Electric Company (or any other employer wholly or partially owned directly or indirectly, by Baltimore Gas and Electric Company (or any successor thereto)) A/C Power

For purposes of 2.1 and A-31, Vesting Service shall be used instead of Credited Service to determine whether a Participant is eligible for Normal Retirement.
For purposes of 2.2 and A-19, Vesting Service shall be used instead of Credited Service to determine whether a Participant is eligible for Early Retirement.
For purposes of 4.3, Credited Service shall only include months beginning on or after January 1, 2003 during which an Employee works at least one hour for the Employer while classified as a Full-Time Employee.

Constellation NewEnergy, Inc[5]

5 Effective April 1, 2011. For purposes of Section 4.2, Vesting Service shall be computed using as the Employment Commencement Date the date on which the Employee first performed an hour of service for this subsidiary. For purposes of Section 4.3, Credited Service for work performed as an Employee of this subsidiary shall only include months beginning on or after April 1, 2011 during which the Employee works at least one hour while classified as a Full-Time Employee.

CNE Gas Holdings, Inc.[6]

Exelon Business Services Corporation[7]

Exelon Generation Company, LLC[8]

---

6 Effective April 1, 2011. For purposes of Section 4.2, Vesting Service shall be computed using as the Employment Commencement Date the date on which the Employee first performed an hour of service for this subsidiary. For purposes of Section 4.3, Credited Service for work performed as an Employee of this subsidiary shall only include months beginning on or after April 1, 2011 during which the Employee works at least one hour while classified as a Full-Time Employee.

7 For Employees who were Employees of Constellation Energy Group, Inc. immediately prior to the Effective Time.

8 For Employees who were Employees of Constellation Energy Group, Inc. immediately prior to the Effective Time.

Exhibit 10.67

**THIRD AMENDMENT TO THE
PENSION PLAN OF
CONSTELLATION ENERGY GROUP, INC.
(Amended and Restated Effective January 31, 2012)**

WHEREAS, Exelon Corporation (the "Company") sponsors the Pension Plan of Constellation Energy Group, Inc. (Amended and Restated Effective January 31, 2012) (the "Plan"); and

WHEREAS, the Company desires to amend the Plan to reflect additional guidance issued with respect to Section 436 of the Internal Revenue Code of 1986, as amended, to clarify the definition of "highly compensated employee" applicable under the Plan, to clarify the benefit formula for rehired employees, to limit participation in the Plan on and after January 1, 2013 and to make certain other changes.

NOW, THEREFORE, RESOLVED, that pursuant to the power of amendment contained in Article IX of the Plan, the Plan is amended effective January 1, 2013, except as otherwise stated below, as follows:

1. Section 1.1 of the Plan is amended to read as follows:

> 1.1 Automatic PEP Participation—Except as provided in 1.2 and the last sentence below, each Full-Time Employee of the Company, or of those subsidiaries and affiliates of the Company which are designated by the Board of Directors (as reflected in Appendix G), shall become a Participant in PEP on the date he/she becomes a Full-Time Employee. (Notwithstanding the previous sentence, effective July 23, 2010, Executive Group may designate such subsidiaries and affiliates if such designations have less than a $10 million impact on the Plan's accumulated benefit obligation per designation. At least annually, the Company's Chief Executive Officer shall report all such subsidiary and affiliate designations to the Board of Directors.) In addition, each Employee who is reemployed as a Full-Time Employee of the Company, or those subsidiaries and affiliates of the Company which are designated by the Board of Directors shall become a Participant in PEP on the date of his/her Adjusted Employment Commencement Date and shall not be eligible to participant in the Traditional Pension Plan with respect to his/her period of reemployment. An Employee

classified in a job description as an On-Call Employee, a leased employee within the meaning of Code Section 414(n)(2), or a co-op, work study or summer Employee shall not become a Participant in the Plan while classified in the sole judgment of the Employer as an On-Call Employee, a leased employee, or a co-op, work study or summer Employee. Notwithstanding anything contained herein to the contrary, no Employee whose Employment Commencement Date is on or after January 1, 2013 shall be eligible to participate in the Plan, with the exception of an Employee employed by BGE Home Products & Services, LLC.

2. Section 1.2 of the Plan is amended by adding the following new sentence at the end thereof:

Notwithstanding anything contained herein to the contrary, a Participant who is reemployed as an Employee shall not be a Participant in the Traditional Pension Plan, and shall not accrue any benefits under the Traditional Pension Plan, with respect to his/her period of reemployment. The Participant's Gross Pension under the Traditional Pension Plan shall be computed based solely on such Participant's Credited Service and Average Pay during the Employee's period of participation in the Traditional Pension Plan.

3. The second and third sentences of Section 3.2(d) of the Plan are amended to read as follows:

Except as provided in 3.2(e), monthly pension payments shall cease upon the Employer's reemployment of a Participant as an Employee. If the Participant's monthly pension payments cease as provided in the preceding sentence, upon the Participant's subsequent termination of employment with the Employer, the Participant's Gross Pension shall be recalculated and adjusted (including the adjustment described in 3.4(a)) and the Participant shall be given a new election with respect to the form and timing of his/her pension payments if such election otherwise would be available to the Participant

4. Section 3.2 of the Plan is amended by inserting the following new paragraph (e) at the end thereof:

3.2(e) Continued Payment of Benefits for Certain Rehired Participants . Notwithstanding anything contained herein to the contrary, a Participant who is reemployed as an Employee while receiving monthly pension payments may continue receiving such payments during his/her reemployment if the Participant executes a written waiver of his/her rights to participate in, and accrue benefits under, the Plan with respect to the Participant's period of reemployment. The Gross Pension of a Participant described in this 3.2(e) shall not be recalculated, adjusted or increased upon the Participant's subsequent termination of employment and such Participant shall not have an Adjusted Employment Commencement Date for purposes of the Plan.

5. The first sentence of Section 3.4(a) of the Plan is amended to read as follows:

The provisions of this 3.4(a) apply if, as described in 3.2(d), monthly pension payments cease upon the Employer's reemployment of a Participant as an Employee, and the Participant's Gross Pension is required to be recalculated and adjusted upon the Participant's subsequent termination of employment with the Employer.

6. A new Section 8.13 shall be added immediately following Section 8.12 as follows:

8.13 Definition of Highly Compensated Employee for Purposes of Legal Requirements . Wherever applicable for purposes of satisfying legal requirements applicable to the Plan, the term "highly compensated employee" shall mean any Employee who performs service in the determination year and who (a) is a 5%-owner (as determined under section 416(i)(1)(A)(iii) of the Code) at any time during the Plan Year or the preceding Plan Year or (b) both (1) is paid compensation in excess of $80,000 (as adjusted for increases in the cost of living in accordance with section 414(q)(1)(B)(ii) of the Code) from an Employer for the preceding Plan Year, and (2) is in the group of employees consisting of the top 20% of the employees of the Employer and its affiliates when ranked on the basis of compensation paid during such preceding Plan Year.

7. Appendix A-35 of the Plan is amended by replacing the last sentence thereof with the following new sentence:

No Employee whose Employment Commencement Date is on or after January 1, 2013 shall be a Participant, with the exception of an Employee employed by BGE Home Products & Services, LLC.

8. Effective January 1, 2010, a new Appendix B-4 shall be added immediately following Appendix B-3 as follows:

B-4 Benefit Restrictions as a Result of Funding – Notwithstanding any provision of the Plan to the contrary, the following benefit restrictions shall apply if the Plan's adjusted funding target attainment percentage is at or below the following levels.

(a) Limitations Applicable If the Plan's Adjusted Funding Target Attainment Percentage Is Less Than 80%, But Not Less Than 60% . If the Plan's adjusted funding target attainment percentage for a Plan Year is less than 80% (or would be less than 80% to the extent described in subparagraph (a) 2. below) but is not less than 60%, then the limitations set forth in this paragraph (a) apply

1. 50% Limitation on Single Sum Payments, Other Accelerated Forms of Distribution, and Other Prohibited Payments . A Participant or Alternate Beneficiary is not permitted to elect, and the Plan shall not pay, a lump sum distribution or other optional form of distribution that includes a prohibited payment with an annuity starting date on or after the applicable section 436 measurement date, and the Plan shall not make any payment for the purchase of an irrevocable commitment from an insurer to pay benefits or any other payment or transfer that is a prohibited payment, unless the present value of the portion of the benefit that is being paid in a prohibited payment does not exceed the lesser of:

(i) 50% of the present value of the benefit payable in the optional form of benefit that includes the prohibited payment; or

(ii) 100% of the PBGC maximum benefit guarantee amount (as defined in Section 1.436-1(d)(3)(iii)(C) of the Treasury Regulations).

The limitation set forth in this subparagraph (a) 1. does not apply to any payment of a benefit which under Section 411(a)(11) of the Code may be immediately distributed without the consent of the Participant. If an optional form of benefit that is otherwise available under the terms of the Plan is not available to a Participant or Alternate Beneficiary as of the annuity starting date because of the application of the requirements of this subparagraph (a) 1., the Participant or Alternate Beneficiary is permitted to elect to bifurcate the benefit into unrestricted and restricted portions (as described in Section 1.436-1(d)(3)(iii)(D) of the Treasury Regulations). The Participant or Alternate Beneficiary may also elect any other optional form of benefit otherwise available under the Plan at that annuity starting date that would satisfy the 50% limitation described in subparagraph (a) 1. (i) above or the PBGC maximum benefit guarantee amount described in subparagraph (a) 1. (ii) above, or may elect to defer the benefit in accordance with any general right to defer commencement of benefits under the Plan.

2. Plan Amendments Increasing Liability for Benefits . No amendment to the Plan that has the effect of increasing liabilities of the Plan by reason of increases in benefits, establishment of new benefits, changing the rate of benefit accrual, or changing the rate at which benefits become nonforfeitable shall take effect in a Plan Year if the adjusted funding target attainment percentage for the Plan Year is:

(i) Less than 80%; or

(ii) 80% or more, but would be less than 80% if the benefits attributable to the amendment were taken into account in determining the adjusted funding target attainment percentage.

The limitation set forth in this subparagraph (a) 2. does not apply to any amendment to the Plan that provides a benefit increase under a Plan formula that is not based on compensation, provided that the rate of such increase does not exceed the contemporaneous rate of increase in the average wages of Participants covered by the amendment.

(b) Limitations Applicable If the Plan's Adjusted Funding Target Attainment Percentage Is Less Than 60% . If the Plan's adjusted funding target attainment percentage for a Plan Year is less than 60% (or would be less than 60% to the extent described in subparagraph (b) 2. below), then the limitations in this paragraph (b) apply.

1. Single Sums, Other Accelerated Forms of Distribution, and Other Prohibited Payments Not Permitted . A Participant or Alternate Beneficiary is not permitted to elect, and the Plan shall not pay, a single sum payment or other optional form of benefit that includes a prohibited payment with an annuity starting date on or after the applicable section 436 measurement date, and the Plan shall not make any payment for the purchase of an irrevocable commitment from an insurer to pay benefits or any other payment or transfer that is a prohibited payment. The limitation set forth in this subparagraph (b) 1. does not apply to any payment of a benefit which under Section 411(a)(11) of the Code may be immediately distributed without the consent of the Participant.

2. Shutdown Benefits and Other Unpredictable Contingent Event Benefits Not Permitted to Be Paid . An unpredictable contingent event benefit with respect to an unpredictable contingent event occurring during a Plan Year shall not be paid if the adjusted funding target attainment percentage for the Plan Year is:

(i) Less than 60%; or

(ii) 60% or more, but would be less than 60% if the adjusted funding target attainment percentage were redetermined applying an actuarial assumption that the likelihood of occurrence of the unpredictable contingent event during the Plan Year is 100%.

3. Benefit Accruals Frozen . Benefit accruals under the Plan shall cease as of the applicable section 436 measurement date. In addition, if the Plan is required to cease benefit accruals under this subparagraph (b) 3., then the Plan is not permitted to be amended in a manner that would increase the liabilities of the Plan by reason of an increase in benefits or establishment of new benefits.

(c) Limitations Applicable If the Plan Sponsor Is In Bankruptcy . Notwithstanding any other provisions of the Plan, a Participant or Alternate Beneficiary is not permitted to elect, and the Plan shall not pay, a single sum payment or other optional form of benefit that includes a prohibited payment with an annuity starting date that occurs during any period in which the Plan sponsor is a debtor in a case under title 11, United States Code, or similar Federal or state law, except for payments made within a Plan Year with an annuity starting date that occurs on or after the date on which the Plan's enrolled actuary certifies that the Plan's adjusted funding target attainment percentage for that Plan Year is not less than 100%. In addition, during such period in which the Plan sponsor is a debtor in a case under title 11, United States Code, or similar Federal or state law, the Plan shall not make any payment for the purchase of an irrevocable commitment from an insurer to pay benefits or any other payment or transfer that is a prohibited payment, except for payments that occur on a date within a Plan Year that is on or after the date on which the Plan's enrolled actuary certifies that the Plan's adjusted funding target attainment percentage for that Plan Year is not less than 100%. The limitation set forth in this paragraph (c) does not apply to any payment of a benefit which under Section 411(a)(11) of the Code may be immediately distributed without the consent of the Participant.

(d) Provisions Applicable After Limitations Cease to Apply .

1. Resumption of Prohibited Payments. If a limitation on prohibited payments under subparagraph (a) 1., (b) 1., or (c) of this Section applied to the Plan as of a section 436 measurement date, but that limit no longer applies to the Plan as of a later section 436 measurement date, then that limitation does not apply to benefits with annuity starting dates that are on or after that later section 436 measurement date.

2. Resumption of Benefit Accruals. If a limitation on benefit accruals under subparagraph (b) 3. of this Section applied to the Plan as of a section 436 measurement date, but that limitation no longer applies to the Plan as of a later section 436 measurement date, then benefit accruals shall resume prospectively and that limitation does not apply to benefit accruals that are based on service on or after that later section 436 measurement date, except as otherwise provided under the Plan. The Plan shall comply with the rules relating to partial years of participation and the prohibition on double proration under Department of Labor Regulation Section 2530.204-2(c) and (d).

3. Shutdown and Other Unpredictable Contingent Event Benefits . If an unpredictable contingent event benefit with respect to an unpredictable contingent event that occurs during the Plan Year is not permitted to be paid after the occurrence of the event because of the limitation of subparagraph (b) 2. of this Section, but is permitted to be paid later in the same Plan Year (as a result of additional contributions or pursuant to the enrolled actuary's certification of the adjusted funding target attainment percentage for the Plan

Year that meets the requirements of Section 1.436-1(g)(5)(ii)(B) of the Treasury Regulations), then that unpredictable contingent event benefit shall be paid, retroactive to the period that benefit would have been payable under the terms of the Plan (determined without regard to subparagraph (b) 2. of this Section). If the unpredictable contingent event benefit does not become payable during the Plan Year in accordance with the preceding sentence, then the Plan is treated as if it does not provide for that benefit.

4. Treatment of Plan Amendments That Do Not Take Effect. If a Plan amendment does not take effect as of the effective date of the amendment because of the limitation of subparagraph (a) 2. or (b) 3. of this Section, but is permitted to take effect later in the same Plan Year (as a result of additional contributions or pursuant to the enrolled actuary's certification of the adjusted funding target attainment percentage for the Plan Year that meets the requirements of Section 1.436-1(g)(5)(ii)(C) of the Treasury Regulations), then the Plan amendment must automatically take effect as of the first day of the Plan Year (or, if later, the original effective date of the amendment). If the Plan amendment cannot take effect during the same Plan Year, then it shall be treated as if it were never adopted, unless the Plan amendment provides otherwise.

(e) Notice Requirement. Written notice to Participants and Beneficiaries shall be provided within 30 days, in accordance with Section 101(j) of ERISA, if the Plan becomes subject to a limitation described in subparagraph (a) 1., (b), or (c) of this Section.

(f) Methods to Avoid or Terminate Benefit Limitations. Application of one or more of the benefit limitations set forth in paragraphs (a), (b) and (c) of this Section for a Plan Year may be avoided or terminated through the use of employer contributions, by increasing the amount of Plan assets which are taken into account in determining the adjusted funding target attainment percentage and by other methods in accordance with Sections 436(b)(2), (c)(2), (e)(2) and (f) of the Code and Section 1.436-1(f) of the Treasury Regulations.

(g) Plan Operations for Periods Prior to and After Certification of Plan's Adjusted Funding Target Attainment Percentage .

1. In General. For any period during which a presumption under Section 436(h) of the Code and Section 1.436-1(h) of the Treasury Regulations applies to the Plan, the limitations under paragraphs (a) through (c) of this Section are applied to the Plan as if the adjusted funding target attainment percentage for the Plan Year were the presumed adjusted funding target attainment percentage determined under the rules of Section 436(h) of the Code and Section 1.436-1(h)(1), (2), or (3) of the Treasury Regulations. These presumptions are set forth in subparagraphs (g) 2. though (g) 4. below.

2. Presumption of Continued Underfunding Beginning First Day of Plan Year. If a limitation under paragraph (a), (b) or (c) of this Section applied to the Plan on the last day of the preceding Plan Year, then, commencing on the first day of the current Plan Year and continuing until the Plan's enrolled actuary issues a certification of the adjusted funding target attainment percentage for the Plan for the current Plan Year, or, if earlier, the date subparagraph (g) 3. or (g) 4. below applies to the Plan:

(i) The adjusted funding target attainment percentage of the Plan for the current Plan Year is presumed to be the adjusted funding target attainment percentage in effect on the last day of the preceding Plan Year; and

(ii) The first day of the current Plan Year is a section 436 measurement date.

3. Presumption of Underfunding Beginning First Day of Fourth Month. If the Plan's enrolled actuary has not issued a certification of the adjusted funding target attainment percentage for the Plan Year before the first day of the fourth month of the Plan Year and the Plan's adjusted funding target attainment percentage for the preceding Plan Year was either at least 60% but less than 70% or at least 80% but less than 90%, or is described in Section 1.436-1(h)(2)(ii) of the Treasury Regulations, then, commencing on the first day of the fourth month of the current Plan Year and continuing until the Plan's enrolled actuary issues a certification of the adjusted funding target attainment percentage for the Plan for the current Plan Year, or, if earlier, the date subparagraph (g) 4. below applies to the Plan:

(i) The adjusted funding target attainment percentage of the Plan for the current Plan Year is presumed to be the Plan's adjusted funding target attainment percentage for the preceding Plan Year reduced by 10 percentage points; and

(ii) The first day of the fourth month of the current Plan Year is a section 436 measurement date.

4. Presumption of Underfunding On and After First Day of 10th Month. If the Plan's enrolled actuary has not issued a certification of the adjusted funding target attainment percentage for the Plan Year before the first day of the 10th month of the Plan Year (or if the Plan's enrolled actuary has issued a range certification for the Plan Year pursuant to Section 1.436-1(h)(4)(ii) of the Treasury Regulations but has not issued a certification of the specific adjusted funding target attainment percentage for the Plan by the last day of the Plan Year), then, commencing on the first day of the 10th month of the current Plan Year and continuing through the end of the Plan Year:

(i) The adjusted funding target attainment percentage of the Plan for the current Plan Year is presumed to be less than 60%; and

(ii) The first day of the 10th month of the current Plan Year is a section 436 measurement date.

(h) Plan Termination and Other Special Rules.

1. Plan Termination. The limitations on prohibited payments in subparagraphs (a) 1., (b) 1., and (c) of this Section do not apply to prohibited payments that are made to carry out the termination of the Plan in accordance with applicable law. Any other limitations under this Section do not cease to apply as a result of termination of the Plan.

2. Special Rules Relating to Unpredictable Contingent Event Benefits and Plan Amendments Increasing Benefit Liability. During any period in which none of the presumptions under paragraph (g) of this Section apply to the Plan and the Plan's enrolled actuary has not yet issued a certification of the Plan's adjusted funding target attainment percentage for the Plan Year, the limitations under subparagraphs (a) 2. and (b) 2. of this Section shall be based on the "inclusive presumed adjusted funding target attainment percentage" for the Plan, as such term is described in, and calculated in accordance with the rules of, Section 1.436-1(g)(2)(iii) of the Treasury Regulations.

3. Payments Under Social Security Leveling Options. For purposes of determining whether the limitations under subparagraph (a) 1. or (b) 1. of this Section apply to payments under a social security leveling option, within the meaning of Section 436(j)(4)(C)(i) of the Code, the adjusted funding target attainment percentage for a Plan Year shall be determined in accordance with the "Special Rule for Certain Years" under Section 436(j)(3) of the Code and any Treasury Regulations or other published guidance thereunder issued by the Internal Revenue Service.

4. Limitation on Benefit Accruals. For purposes of determining whether the accrual limitation under subparagraph (b) 3. of this Section applies to the Plan, the adjusted funding target attainment percentage for a Plan Year shall be determined in accordance with the "Special Rule for Certain Years" under Section 436(j)(3) of the Code (except as provided under section 203(b) of the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010, if applicable).

5. Interpretation of Provisions. The limitations imposed by this Section shall be interpreted and administered in accordance with Section 436 of the Code and Section 1.436-1 of the Treasury Regulations.

(i) Definitions. The definitions in the following Treasury Regulations apply for purposes of this Section: Section 1.436-1(j)(1) defining adjusted funding target attainment percentage; Section 1.436-1(j)(2) defining annuity starting date; Section 1.436-1(j)(6) defining prohibited payment; Section 1.436-1(j)(8) defining section 436 measurement date; and Section 1.436-1(j)(9) defining an unpredictable contingent event and an unpredictable contingent event benefit.

(j) Effective Date. The rules in this Section are effective for Plan Years beginning after December 31, 2007.

9. Appendix G is amended by adding the following after “Exelon Generation Company, LLC” and adding a footnote corresponding to each item on the list to read as below:

CER Generation, LLC

Footnote: Effective April 1, 2008. For purposes of Section 4.2, Vesting Service shall be computed using as the Employment Commencement Date the date on which the Employee first performed an hour of service for this entity.

*****

IN WITNESS WHEREOF, Exelon Corporation has caused this instrument to be executed by its Senior Vice President and Chief Human Resources Officer, on this ____ day of December, 2013.

EXELON CORPORATION

Exhibit 10.68

CONSTELLATION ENERGY GROUP, INC.
EMPLOYEE SAVINGS PLAN

Amended and Restated Effective January 31, 2012

TABLE OF CONTENTS

CONSTELLATION ENERGY GROUP, INC.

EMPLOYEE SAVINGS PLAN

Article I – Purpose and Nature of the Plan

1.1 Purpose of the Plan

The Plan is designed as a stock bonus plan. Eligible Employees have the opportunity to save on a regular and long-term basis, and in the process acquire or sustain a proprietary interest in the success of the Company. The Plan is intended to meet the requirements of the provisions of Code Section 401(a). The Plan is also intended to meet the requirements of an Employee Stock Ownership Plan under Code Section 4975(e)(7) as well through February 28, 2002. Effective February 1, 2006, the portion of the Plan consisting of the CEG Common Stock Fund is intended to be an Employee Stock Ownership Plan under Code Section 4975(e)(7). That portion of the Plan is intended to be primarily invested in Common Stock which constitutes employer securities (within the meaning of Code Section 409(l).

1.2 Nature of the Plan – General

The Plan is structured to permit three (3) general categories of Employee participation. First, eligible Employees may elect to participate by choosing to contribute to the Plan under the After-Tax Option, the Before-Tax Option, or a combination of both. Company Matching Contributions, as provided under the Plan, are made with respect to a Participant's contributions under the After-Tax and/or Before-Tax Options. Second, eligible Employees may elect to participate by contributing to the Plan through the rollover of an Eligible Rollover Distribution from an Eligible Retirement Plan as provided under the rollover provisions of the Plan. Third, Employees or former Employees may participate by virtue of having a balance established in an Employee Stock Account.

1.3 After-Tax and Before-Tax Options

1.3(a) After-Tax Option

Under the After-Tax Option, an eligible Employee may contribute a percentage of Eligible Compensation to the Plan through payroll deduction, subject to the limitations of Articles III and IV and Appendix B of the Plan. Amounts contributed under the After-Tax Option are contributions described in Code Section 401(m) and are included in the taxable income of the Employee in the year of the contribution. Earnings on After-Tax Option contributions are taxed to the Employee when distributed or withdrawn from the Plan.

1.3(b) Before-Tax Option

Under the Before-Tax Option, an eligible Employee may contribute a percentage of Eligible Compensation to the Plan through payroll deduction, subject to the limitations of Articles III and IV and Appendix B of the Plan. Amounts contributed under the Before-Tax Option are contributions described in Code Section 401(k) and are not included in the federal taxable income of the Employee in the year of the contribution. Before-Tax Option contributions and earnings thereon are taxed to the Employee when distributed or withdrawn from the Plan.

1.3(c) Company Matching Contributions

Under the Company Matching Contribution provisions of the Plan, the Company contributes a Company Matching Contribution with respect to each eligible Employee, subject to the limitations of Articles III and IV and Appendix B of the Plan. Company Matching Contributions are contributions described in Code Section 401(m) and are not included in the taxable income of the Employee in the year of the contribution. Company Matching Contributions and earnings thereon are taxed to the Employee when distributed or withdrawn from the Plan.

1.4 Rollover

Under the rollover provisions of the Plan, an eligible Employee may establish a Rollover Account within the Plan by transferring all or a portion of an Eligible Rollover Distribution (except any portion of any distribution that is not includable in gross income unless specifically provided for under Section 3.3) from another Eligible Retirement Plan. Such transfers can only be in the form of cash, except as otherwise provided in Appendix E or under Section 3.3.

1.5 Employee Stock Account

An Employee Stock Account was automatically established within the Plan for each Employee or former Employee upon the Plan's receipt of (i) Baltimore Gas and Electric Company contributions made on behalf of such Employee under the Corporate Performance Award Program, and/or (ii) transfers of the Employee's or former Employee's account balance in the Baltimore Gas and Electric Company Employee Stock Ownership Plan upon such plan's Termination.

1.6 Plan Mergers

The following plans (or portions thereof) have been merged into this Plan as of the corresponding effective dates:

Merged Plan Name	Merger Effective Date
Constellation Operating Services, Inc. Retirement Plan	April 1, 2003
A/C Power Retirement Plan	April 1, 2003
Trona Operating Partners Retirement Plan	April 1, 2003
Non-Represented Employee Savings Plan for Nine Mile Point	October 1, 2005
Cornerstone Energy, Inc. 401(k) Plan	July 1, 2007

Article II – Eligibility and Participation

2.1 Eligibility

2.1(a) Eligibility In General

Each Full-Time Employee of the Company, or of those other Employers which are designated as Participating Employers by the Designating Authority, as reflected in Appendix E, is eligible to become a Participant in the Plan through the After-Tax and Before-Tax Options and/or rollover provisions beginning on the first day of the first pay period as soon as practicable following his date of hire by a Participating Employer; provided, however, that any person whose conditions of employment are covered by any collective bargaining agreement to which the Employer is a party shall be ineligible to become a Participant unless and until that agreement specifically provides for such person's participation in the Plan. Each such Full-Time Employee of a Participating Employer is eligible to become a Participant only in those aspects of the Plan specified by the Designating Authority.

An Employee classified in a job description as an On-Call Employee or an Employee who is a leased employee within the meaning of Code Sections 414(n)(2) and 414(o)(2), is not eligible to participate in the Plan while classified in the sole judgment of the Employer as an On-Call Employee or leased employee.

2.1(b) Eligibility After Reemployment

If an Employee who terminated service is reemployed as a Full-Time Employee of the Company or another Participating Employer, as reflected in Appendix E, the Employee shall be eligible to participate through the After-Tax and Before-Tax Options and/or rollover provisions beginning on the first day of the first pay period as soon as practicable following his date of reemployment. This reemployment rule applies whether the Employee was a Participant, was eligible to be a Participant, or was ineligible to be a Participant due to failure to meet the Plan's service requirement for eligibility, on the date of termination.

2.1(c) Change in Status

An Employee who becomes represented by a collective bargaining agreement with the Employer shall have the accounts maintained under this Plan transferred to the plan established pursuant to the collective bargaining agreement as soon as administratively feasible.

An Employee who ceases to be represented by a collective bargaining agreement with the Employer shall become eligible to participate in the Plan, and the accounts maintained under the plan established pursuant to the collective bargaining agreement shall be transferred to the Plan as soon as administratively feasible. Such an Employee shall become a Participant in the Plan as of the date of such transfer and shall be eligible to make contributions to the Plan in accordance with Article III of the Plan as soon as administratively feasible

2.2 Participation

2.2(a) After-Tax and Before-Tax Options

Participation in the After-Tax and Before-Tax Options is voluntary. An Employee who satisfies the eligibility requirements of Section 2.1 can elect to become a Participant by submitting an Appropriate Request with the Plan Administrator. In making the Appropriate Request, the Employee must (i) designate the rate of contribution under the After-Tax and/or Before-Tax Options; (ii) indicate the Investment Funds to which contributions under the After-Tax and/or Before-Tax Options will be allocated and the percentage allocated to each Investment Fund; and (iii) agree to be bound by the terms and conditions of the Plan, a copy of which will be furnished to the Employee upon request.

After-Tax Option contributions, which are taxed to the Participant when contributed to the Plan, are treated as direct contributions to the Plan by the Participant. Therefore, an Appropriate Request submitted with respect to the After-Tax Option authorizes the Company to deduct a stated percentage of the Participant's Eligible Compensation from his pay and transmit the amount deducted to the Plan to be invested.

Before-Tax Option contributions, which are not taxed to the Participant (for federal income tax purposes) until distributed from the Plan, are treated as reductions in the salary of the Participant which are then contributed to the Plan by the Company on behalf of the Participant. Therefore, pursuant to an Appropriate Request submitted with respect to the Before-Tax Option, the Participant undertakes to forego the receipt of a stated percentage of Eligible Compensation. In return, the Company will contribute to the Plan an amount equal to the deferral.

An eligible Employee who does not elect to become a Participant in the After-Tax and/or Before-Tax Options at the earliest possible eligibility date as provided in Section 2.1, may elect to become a Participant at a later date by submitting an Appropriate Request with the Plan Administrator. The election to participate will become effective beginning on the first day of the first pay period as soon as practicable following the date on which the Appropriate Request is received by the Plan Administrator.

2.2(b) Rollover

A Participant who satisfies the eligibility requirements of Section 2.1 and who wishes to roll over all or a portion of an Eligible Rollover Distribution (except any portion of any distribution that is not includable in gross income unless specifically allowed under Section 3.3) as provided in Section 3.3 may do so by submitting an Appropriate Request with the Plan Administrator. A Participant will continue to be considered a Participant for purposes of eligibility for rollovers as long as amounts are held in the Participant's Plan accounts, regardless of such Participant's eligibility to make further contributions to the Plan. The Participant will be required to submit documentation necessary to support the qualification of the rollover as requested by the Plan Administrator, or designees of the Plan Administrator, before the Plan Administrator will authorize the establishment of a Rollover Account for the Participant. If, in the judgment of the Plan Administrator or the Plan Administrator's designees, the documentation does not adequately support the qualification of the rollover amount, the Plan Administrator has the authority under the Plan to disallow a rollover contribution to the Plan.

The Participant must indicate as part of the Appropriate Request the Investment Funds to which rollover contributions will be allocated and the percentage or dollar amount allocated to each Investment Fund. The Participant must also agree to be bound by the terms and conditions of the Plan, a copy of which will be furnished to the Employee upon request.

2.2(c) Employee Stock Account

An Employee or former Employee for whom a balance in an Employee Stock Account has been established under the Plan is automatically a Participant. Participation in the Plan through the establishment of an Employee Stock Account does not affect an Employee's eligibility for or participation in the After-Tax and Before-Tax Options or the rollover provision.

Article III – Contributions to the Plan

3.1 After-Tax and Before-Tax Options

3.1(a) Rate of Contribution

Subject to the limitations described in Article IV and Appendix B, a Participant may contribute to the After-Tax Option of the Plan an amount equal to not more than fifteen percent (15%) of the Participant's Eligible Compensation, and to the Before-Tax Option of the Plan an amount equal to not more than fifty percent (50%) of the Participant's Eligible Compensation; provided, however, that a Participant may contribute to the After-Tax and/or Before-Tax Options of the Plan an amount equal in aggregate to not more than fifty (50%) of the Participant's Eligible Compensation.

Notwithstanding anything else in the Plan including the above, Participants who have attained age 50 before the close of the Plan Year are eligible to make "catch-up contributions" in accordance with, and subject to the limitations of, Section 414(v) of the Code. Such catch-up contributions shall be treated for purposes of the Plan as Before-Tax Option contributions, but shall not be subject to the Company Matching Contribution provisions, and shall not be taken into account for purposes of the required limitations of Sections 402(g) and 415 of the Code. The Plan will not be treated as failing to satisfy the provisions of the Plan implementing the requirements of Sections 401(k)(3), 401(k)(11), 401(k)(12), 410(b), or 416 of the Code, as applicable, by reason of the making of such catch-up contributions.

The rate of contribution must be in multiples of one percent (1%); provided, however, that "catch-up contributions" must be in a specified dollar amount per pay period. In the event a Participant's Compensation in any Payroll Period is insufficient to make contributions at the rate elected by the Participant, the amount not contributed as a result of the insufficiency may not be contributed in the succeeding Payroll Period(s). A Participant's contributions shall be paid into the Plan as soon as practicable and shall be allocated to the Participant Contribution Account(s) in accordance with the Participant's instructions as indicated by the Appropriate Request submitted with the Plan Administrator.

3.1(b) Basic and Supplemental Contributions Under the After-Tax and Before-Tax Options

For purposes of determining the Company Matching Contributions as well as for various withdrawal and loan provisions found in Articles VII and IX of the Plan, a Participant's contributions made through the After-Tax and/or Before-Tax Options are characterized as either Basic Contributions or Supplemental Contributions.

When, in accordance with a Participant's instructions, the total contribution is split in whole percentage points between the After-Tax and the Before-Tax Options, the contribution under the Before-Tax Option, up to and including the maximum amount permitted as a Basic Contribution, will be treated as a Basic Contribution. Should the contribution under the Before-Tax Option be less than the maximum amount permitted as a Basic Contribution, then a portion of the After-Tax Option contribution percentage (if any) equal to the difference between the Before-Tax Option contribution percentage and the maximum amount permitted as a Basic Contribution will be characterized as a Basic Contribution.

3.1(c) Change in Rate of Contribution

A Participant may elect to change his contribution rate in multiples of one percent (1%), or in such other multiples as may be specified by the Plan Administrator, by submitting an Appropriate Request to the Plan Administrator. Unless otherwise specified by the Plan Administrator, the change in the rate of contribution will become effective the first day of the first pay period as soon as practicable following the date on which the Appropriate Request is received by the Plan Administrator.

3.1(d) Suspension of Participant Contributions

A Participant may elect to suspend his contributions to the After-Tax and/or Before-Tax Options of the Plan by submitting an Appropriate Request to the Plan Administrator. The suspension of contributions shall become effective the first day of the first pay period as soon as practicable following the date on which the Appropriate Request is received by the Plan Administrator. A Participant may also elect to resume contributions by submitting an Appropriate Request to the Plan Administrator. Such a Participant's contributions will resume on the first day of the first pay period as soon as practicable following the date on which the Appropriate Request is received by the Plan Administrator. A Participant may not make up contributions relating to the period in which contributions were suspended.

3.1(e) Leave of Absence

An authorized leave of absence shall not constitute a termination of employment, but shall, except as provided in Section 3.1(f), operate to suspend Participant contributions and related Company Matching Contributions. At the end of an authorized leave of absence, a Participant's After-Tax and/or Before-Tax Option contributions shall be automatically restarted based on the Participant's contribution election at the time the leave of absence began.

3.1(f) Military Leave of Absence

In accordance with the provisions of the Uniformed Services Employment and Reemployment Rights Act of 1994, an Employee returning from a military leave of absence may elect to contribute to the Plan, under the After-Tax and/or Before-Tax Options, an amount not to exceed the amount such Employee would have been permitted to contribute had the Employee not taken a military leave of absence. The election to make a contribution for the period of the military leave of absence is made by filing an Appropriate Request with the Plan Administrator. Contributions under this Section must be made in accordance with Code Section 414(u). At the time such contribution is made, the Employee must (i) designate the portion of the contribution made under the After-Tax and/or Before-Tax Options, and (ii) indicate the Investment Funds to which contributions under the After-Tax and/or Before-Tax Options shall be allocated. A Company Matching Contribution will be made in accordance with Section 3.2 on the portion of the Employee contribution that represents Basic Contributions. Any contribution to the Plan under this Section must be made during the period beginning with the date of return from the leave of absence and whose duration is three times the period of the Employee's service in the uniformed services, not to exceed five years.

An individual receiving a differential wage payment, as defined by Code Section 3401(h)(2) is treated as an Employee of the Employer. The differential wage payment is treated as Compensation, to the extent required under law, and the Plan is not treated as failing to meet the requirements of any provision described in Code Section 414(u)(1)(C) by reason of any contribution or benefit which is based on the differential wage payment. This paragraph applies only if the requirements of Code Section 414(u)(12)(B) and (C) are satisfied.

3.2 Company Matching Contributions

Subject to the limitations described in Article IV and Appendix B, the Company will contribute the Company Matching Contribution to the Plan on behalf of each Participant and as soon as practicable.

Company Matching Contributions will be made completely in cash or in shares of Common Stock having an aggregate value equal to the contribution the Company is required to make to the Plan under this Section 3.2. Prior to January 1, 2012, Company Matching Contributions are invested initially in the CEG Common Stock Fund. On and after January 1, 2012, Company Matching Contributions are invested in the Investment Funds designated by the Participant.

3.3 Rollover Contributions

A Participant may contribute to the Plan, in cash (or other property as set forth in Appendix E or as set forth below), all or a portion of an amount determined to be an Eligible Rollover Distribution (except any portion of any distribution that is not includable in gross income unless specifically allowed below). A Participant who rolls over an Eligible Rollover Distribution from the Employee Savings Plan for Constellation Energy Nuclear Group, LLC and the Represented Employee Savings Plan of Nine Mile Point to the Plan may rollover shares of CEG Common Stock in kind and may also rollover any promissory notes evidencing any loans under those plans in-kind. The Plan may accept a direct transfer of an Eligible Rollover Distribution that consists of after-tax employee contributions from the Employee Savings Plan for Constellation Energy Nuclear Group, LLC and the Represented Employee Savings Plan for Nine Mile Point, qualified plans, subject to any procedure established by the Plan. The Plan will account separately for any amounts so transferred.

A Participant may execute a rollover to the Plan of an Eligible Rollover Distribution (including, without limitation, an Eligible Rollover Distribution from the Pension Plan of Constellation Energy Group, Inc.) by either (i) contributing all or a portion of the distribution received by the Participant to the Plan within 60 days from the date the distribution is received, or (ii) having the Eligible Retirement Plan from which the Eligible Rollover Distribution is to be made, transfer the Eligible Rollover Distribution directly to the Plan. The Plan Administrator may designate the manner in which a direct transfer to the Plan can be made.

It is the intent of the Plan that any distribution eligible for rollover to the Plan meet the tax-free rollover requirements as set forth in the Code and the regulations promulgated thereunder, so that the amounts rolled over into the Plan will not jeopardize the tax-exempt status of the Plan or Trust or result in adverse tax consequences to the Company. The Plan Administrator may require the Employee to establish that amounts contributed to the Plan under the rollover provisions, meet the tax-free rollover requirements set forth in the Code.

3.4 Return of Company Contributions

At the discretion of the Plan Administrator, in the case of a Company contribution which is made under a mistake of fact, such contribution exclusive of earnings may be returned to the Company within one year after the payment of the contribution.

All Company contributions to the Plan shall be conditioned on their deductibility under Code Section 404 and, in the event the deduction for the contributions is disallowed by the Secretary of the Treasury, such contributions will be returned to the Company within one year of the disallowance.

Article IV – Limitations on Contributions to the Plan

4.1 General

In addition to the limitations on contributions imposed by the Plan under Article III, and subject to the “catch-up contributions” provisions in Section 3.1(a), contributions to the Plan under the After-Tax Option, the Before-Tax Option, and the Company Matching Contribution provisions will be limited by the Plan Administrator, to the extent necessary to enable the Plan to comply with the limitations prescribed by the Code. These limitations are summarized in Section 4.2 below and detailed in Appendix B.

4.2 Internal Revenue Code Limitations

To determine that the limitations on contributions to the Plan under the Code are not exceeded in any Plan Year, the following limitations will be monitored by the Plan Administrator or his designees no less frequently than annually.

4.2(a) Limitation on Participants’ Before-Tax Option Contributions

Before-Tax Option contributions on behalf of any Participant may not exceed the Code Section 402(g) limit ($13,000 in 2004 and as further adjusted under Code Section 402(g)(5)) for any Plan Year. The Plan Administrator may prospectively limit, during the Plan Year, Before-Tax Option contributions if it is determined that the Code Section 402(g) limitation would otherwise be exceeded for such Plan Year. Participants whose Before-Tax Option contributions are limited under this Section 4.2(a) are automatically treated as electing to increase their contributions under the After-Tax Option by an amount equal to the Participant’s Before-Tax Option contribution percentage in excess of the limitation. If necessary, the Plan Administrator may distribute any excess amounts to the Participant in a post-Plan Year distribution. Detailed provisions governing the operation of this limitation under the Plan are set forth in Appendix B-1: Dollar Limitation on Participants’ Before-Tax Option Contributions.

4.2(b) Limitation on Total Annual Additions

The annual additions to a Participant's account during the Plan Year resulting from After-Tax Option contributions, Before-Tax Option contributions, and Company Matching Contributions may not under Code Section 415(c) exceed the Code Section 415(c)(1) limit.

As used in this Section 4.2(b) and Appendix B-2, compensation means compensation under Code Section 415(c)(3), including any items required to be included in compensation and excluding any items required to be excluded from compensation under Code Section 415(c)(3) and the regulations issued thereunder, and specifically incorporating the safe harbor definition of compensation under Treas. Reg. § 1.415(c)-2(d)(4) relating to information required to be reported under Code Sections 6041, 6051, and 6052. Any differential wage payments (as defined in Code Section 3401(h)(2)) shall be included in compensation for purposes of Code Section 415. Payments made by the later of 2-1/2 months after severance from employment or the end of the limitation year that includes the date of severance from employment are included in compensation for the limitation year if, absent a severance from employment, such payments would have been paid to the Participant while the Participant continued in employment with the Employer and are regular compensation for services during the Participant's regular working hours, compensation for services outside the Participant's regular working hours (such as overtime or shift differential), commissions, bonuses, or other similar compensation.

Compensation as used in this section 4.2(b) and Appendix B-2 is not permitted to reflect compensation that is in excess of the limitation under Code Section 401(a)(17) that applies to that limitation year.

4.2(c) Limitation on Participant Contributions Under the Before-Tax Option (ADP Test)

The actual deferral percentage of eligible Highly Compensated Employees may not exceed the actual deferral percentage of eligible Nonhighly Compensated Employees by an amount greater than the limitations of the Actual Deferral Percentage (ADP) Test under Code Section 401(k)(3). The Plan Administrator may prospectively limit, during the Plan Year, Before-Tax Option contributions of certain Highly Compensated Employees if it is determined that the ADP Test limitation would otherwise be exceeded for such Plan Year. Participants whose Before-Tax Option contributions are prospectively limited under this Section 4.2(d) are automatically treated as electing to increase their contributions under the After-Tax Option by an amount equal to the Participant's Before-Tax Option contribution percentage in excess of the limitation.

The Plan Administrator may also correct any excess Before-Tax Option contributions by distributing the excess amounts applicable to such Highly Compensated Employees in a post-Plan Year distribution, by making a Qualified Nonelective Contribution, or by recharacterizing excess amounts as After-Tax Option contributions. Detailed provisions governing the operation of this limitation under the Plan are set forth in Appendix B-4: Limitation on Participant Contributions Under the Before-Tax Option (ADP Test).

4.2(d) Limitation on After-Tax Option Contributions and Company Matching Contributions (ACP Test)

The actual contribution percentage of eligible Highly Compensated Employees may not exceed the actual contribution percentage of eligible Nonhighly Compensated Employees by an amount greater than the limitations of the Actual Contribution Percentage (ACP) Test under Code Section 401(m). The Plan

Administrator may prospectively limit, during the Plan Year, After-Tax Option contributions or Company Matching Contributions of certain Highly Compensated Employees if it is determined that the ACP Test limitation would otherwise be exceeded for such Plan Year. The Plan Administrator may also correct any excess After-Tax Option contributions or Company Matching Contributions by distributing the excess amounts to such Highly Compensated Employees in a post-Plan Year distribution. Detailed provisions governing the operation of this limitation under the Plan are set forth in Appendix B-5: Limitation on Participant Contributions Under the After-Tax Option and Company Matching Contributions (ACP Test).

Article V – Investment of Contributions and Determination of Account Balances

5.1 Investment of Contributions

5.1(a) Investment Funds

Contributions to the Plan will be invested in one or more of the following Investment Funds under the Plan:

(1) the CEG Common Stock Fund;

(2) the Default Investment Fund; or

(3) any Other Investment Fund(s) selected by the Investment Committee from time to time.

Dividends, interest, or other income, if any, received by the Trustee with respect to contributions in each Investment Fund shall be reinvested in the same Investment Fund, except to the extent distributed in accordance with Section 8.5(a).

In the event a Participant fails to make any investment elections with respect to any Participant Contributions, rollover contributions and, for periods on or after January 1, 2012, Company Matching Contributions, the portion of the Participant's accounts over which the Participant has not directed the investment shall first be invested in accordance with elections under the Before-Tax Option, then in elections under the After-Tax Option and then, if no elections are made under either the Before-Tax or After-Tax Option, invested in the Default Investment Fund. Any material provided to the Plan relating to a Participant's investment in the Default Investment Fund as a default investment as described above, including account statements, prospectuses and proxy voting material, will be provided to such Participant. The Default Fund is and has been intended to constitute a "qualified default investment alternative" as defined in DOL Reg. 2550.404c-5 and is intended to meet all requirements necessary to satisfy applicable law.

5.1(b) Investment of Participant Contributions

A Participant's contributions to the Plan under either the After-Tax Option or the Before-Tax Option, or under the rollover provisions of the Plan, shall be invested in one or more of the Investment Funds under the Plan, in accordance with instructions furnished to the Plan Administrator by the Participant as provided under Article II. Participant contributions to the Plan shall be allocated to the Investment Funds in any increments of one percent (1%) of the total contribution or in any other increments at the discretion of the Plan Administrator as selected by the Participant. A Participant may choose to invest contributions to the Plan under the After-Tax Option in the same different Investment Funds and at different percentages than contributions under the Before-Tax Option. Likewise, contributions under the rollover provisions of the Plan are not required to be invested in the same Investment Funds or in the same percentages as Participant Contributions under the After-Tax and/or the Before-Tax Options.

With respect to After-Tax Option, Before-Tax Option, or rollover contributions held by the Company pending transfer to the Trustee, no interest will be paid on such accumulated contributions prior to transfer to the Trustee. A Participant will not be able to withdraw under any circumstances monies contributed but not yet transferred to the Trustee.

Participant contributions shall be posted to Participants' accounts as soon as administrative feasible after such contributions are transferred to the Trustee.

5.1(c) Change in Investment of Participant Contributions

A Participant may change investment percentages for future contributions to the Investment Funds under the After-Tax and/or Before-Tax Options within the limits set forth in Section 5.1(b). Investment percentages may be changed at any time, by submitting an Appropriate Request in the form and manner prescribed by the Plan Administrator. The change will become effective as soon as administratively feasible.

5.1(d) Investment of Company Matching Contributions

Prior to January 1, 2012, all Company Matching Contributions shall be initially invested in the CEG Common Stock Fund. Participants may elect to transfer these contributions to other Investment Funds as soon as these contributions have been posted to provide for diversification of the Participant's investment pursuant to the interfund transfers provisions of Section 5.3(a).

Effective on and after January 1, 2012, all Company Matching Contributions shall be invested in accordance with instructions furnished to the Plan Administrator by the Participant as provided under Article III and this Article V for contributions to the Plan under the Before-Tax Option. Company Matching Contributions shall be posted as soon as administratively feasible after the date the contributions are transferred to the Trustee. Company Matching Contributions shall be allocated to the Investment Funds in any increments of one percent (1%) of the total contribution or in any other increments at the discretion of the Plan Administrator as selected by the Participant.

5.1(e) Investment of Employee Stock Account

A Participant's Employee Stock Account consists of Company contributions that were made under the Corporate Performance Award Program, amounts that were directly transferred by the Trustee of the terminated Baltimore Gas and Electric Company Employee Stock Ownership Plan, and earnings thereon. All contributions, transfers, and earnings in the Employee Stock Account were initially invested in the CEG Common Stock Fund. As with Company Matching Contributions, Participants may elect to transfer these contributions to other Investment Funds to provide for diversification of the Participant's investments pursuant to the interfund transfers provisions of Section 5.3(a).

5.1(f) Investment of Recharacterized Employee Contributions

Amounts contributed by a Participant under the Before-Tax Option which are subsequently recharacterized as contributions under the After-Tax Option because the limitations under Section 4.2(d) are exceeded, shall remain invested in the same Investment Funds in which such contributions were invested immediately prior to the recharacterization.

5.1(g) Investment of After-Tax Option Contributions Made Pursuant to Automatic Provisions of Section 4.2(a) and Section 4.2(d)

Amounts contributed by a Participant under the After-Tax Option pursuant to the automatic provision contained in Sections 4.2(a) and 4.2(d) relating to prospective limitations, shall be invested in the same Investment Funds using the same investment percentages as elected by the Participant for other contributions being made under the After-Tax Option. Lacking instructions from the Participant regarding investments under the After-Tax Option, such contributions shall be invested in the same Investment Funds using the same investment percentages elected by the Participant under the Before-Tax Option.

5.2 Investment Fund Accounts

5.2(a) Participant Contribution Account

A Participant Contribution Account will be established in each Investment Fund to which Participant Contributions under the After-Tax and/or Before-Tax Options are invested.

5.2(b) Company Matching Contribution Account

Prior to January 1, 2012, a Company Matching Contribution Account will be established in the CEG Common Stock Fund for each Participant. This account will contain all Company Matching Contributions made on behalf of the Participant prior to January 1, 2012 with respect to Basic Contributions under the After-Tax and/or Before -Tax Options.

Company Matching Contribution Accounts will also be established in the Default Investment Fund and the Other Investment Funds as elected by the Participant for Participants requesting transfer for amounts from the Company Matching Contribution Account in the CEG Common Stock Fund to other Investment Funds under the provisions of Section 5.3(a) and for all Company Matching Contributions made on behalf of the Participant on and after January 1, 2012 with respect to Basic Contributions under the After-Tax and/or Before-Tax Options.

5.2(c) Employee Stock Account

Contributions were made to an Employee Stock Account that was established in the CEG Common Stock Fund on behalf of the Participant under the Corporate Performance Award Program. The Employee Stock Account also includes any amounts directly transferred by the Trustee of the terminated Baltimore Gas and Electric Company Employee Stock Ownership Plan.

Dividends, if any, received by the Trustee (on or before the January 1, 2002 Common Stock dividend payment date) with respect to amounts in the Employee Stock Account in the CEG Common Stock Fund shall be distributed to Participants as provided in Section 8.5. The Trustee shall invest, no less frequently than quarterly, any interest earned on such dividends prior to their distribution, in shares of Common Stock, and allocate such shares to the Participant's Employee Stock Account in the CEG Common Stock Fund. Employee Stock Accounts will also be established in the Default Investment Fund and the Other Investment Funds for Participants requesting transfer of amounts from the Employee Stock Account in the CEG Common Stock Fund to other Investment Funds under the provisions of Section 5.3(a).

5.2(d) Rollover Account

A Rollover Account will be established in each Investment Fund to which Participant rollover contributions under the rollover provisions of the Plan are invested in accordance with Participant instructions.

5.3 Interfund Transfers

5.3(a) Generally

Upon submitting an Appropriate Request to the Plan Administrator, a Participant may elect to transfer from one Investment Fund to another, in whole or in part, in multiples of 1 percentage, whole number of shares or whole dollar amounts that have already been contributed by the Participant to the Plan under the After-Tax Option, the Before-Tax Option, and/or the rollover provisions of the Plan, and by the Company to the Plan under the Company Matching Contribution Account and Employee Stock Account. Amounts may not be transferred between the Participant Contribution Account, the Company Matching Contribution Account, the Employee Stock Account, or the Rollover Account. Amounts in the Participant Contribution Account, may not be transferred between the After-Tax Option and the Before-Tax Option. An Appropriate Request for Investment Fund transfer may be submitted to the Plan Administrator at any time.

5.3(b) Valuation of Interfund Transfers

The value of the account balances transferred under the interfund transfer provisions shall be determined in the following manner:

If the Participant makes an Appropriate Request for an interfund transfer *prior to* the close of the New York Stock Exchange, (i) transfers from the Default Investment Fund and/or the Other Investment Funds shall be valued based on the Closing Price for the funds on the day the Appropriate Request is received, (ii) transfers from the

CEG Common Stock Fund shall be valued based on the Transaction Price on the next business day after the Appropriate Request is received, (iii) transfers to the Default Investment Fund and/or the Other Investment Funds shall be valued based on the Closing Price for the funds on the day the Appropriate Request is received, unless the transfer to such funds is from the CEG Common Stock Fund, in which case the value shall be the Closing Price of the funds on the day the proceeds from the sale of the Common Stock are received by the Trustee, and (iv) transfers to the CEG Common Stock Fund shall be valued based on the Transaction Price on the next business day following the day the Appropriate Request is received.

If the Participant makes an Appropriate Request for an interfund transfer *on or after* the close of the New York Stock Exchange, (i) transfers from the Default Investment Fund and/or the Other Investment Funds shall be valued based on the Closing Price for the funds on the next business day after the Appropriate Request is received, (ii) transfers from the CEG Common Stock Fund shall be valued based on the Transaction Price on the second business day after the Appropriate Request is received, (iii) transfers to the Default Investment Fund and/or the Other Investment Funds shall be valued based on the Closing Price for the funds on the next business day after the Appropriate Request is received, unless the transfer to such funds is from the CEG Common Stock Fund, in which case, the value shall be the Closing Price of the funds on the day the proceeds from the sale of the Common Stock are received by the Trustee, and (iv) transfers to the CEG Common Stock Fund shall be valued based on the Transaction Price on the second business day following the day the Appropriate Request is received.

5.4 Fractional Shares

The Company does not issue fractional shares of Common Stock. However, to facilitate full investment of monies in the CEG Common Stock Fund, the Plan accounting system allocates fractional shares of Common Stock to Participants' accounts. Participants' fractional shares are aggregated so that only whole shares are actually held by the Plan. The aggregate value of all Participants' whole and allocated fractional shares will not exceed the value of the sum of the shares and cash held by the CEG Common Stock Fund.

Article VI – Vesting

6.1 Participant Contributions

A Participant is 100% vested at all times with respect to amounts in his Participant Contribution Accounts and Rollover Accounts.

6.2 Company Contributions

A Participant is 100% vested at all times with respect to amounts in his Company Matching Contribution Accounts and Employee Stock Accounts.

6.3 Participant's Election to Use Pre-Amendment Vesting Schedule

In the event the Plan is amended to change or modify the Plan's vesting schedule, or the Plan is amended in any way that directly or indirectly affects the computation of the nonforfeitable percentage of the Participant's accrued benefit or if the Plan is deemed amended by an automatic change to or from a top-heavy (see Appendix D) vesting schedule, a Participant with at least three (3) Years of Service as of the date the amendment is adopted or as of the amendment's effective date, may elect to be subject to the pre-amendment vesting schedule. For Participants who do not have at least one (1) Hour of Service in any Plan Year beginning after December 31, 1988, the preceding sentence shall be applied by substituting "five (5) Years of Service" for "three (3) Years of Service." If a Participant fails to make the election described in this Section, then the Participant will be subject to the new vesting schedule. The election of the pre-amendment vesting schedule shall be made by giving written notice to the Plan Administrator during the election period. The election period shall begin on the date such amendment is adopted and shall end no earlier than the latest of the following dates:

(a) The date which is sixty (60) days after the date the Plan amendment is adopted,

(b) The date which is sixty (60) days after the date the Plan amendment becomes effective, or

(c) The date which is sixty (60) days after the date the Participant is issued written notice of the Plan amendment by the Company or Plan Administrator.

Such election shall be made only by an individual who is a Participant at the time such election is made and such election shall be irrevocable. Such Plan amendment shall not reduce the vested percentage of a Participant's accrued benefit as of the later of the date on which such Plan amendment is adopted or the effective date of such Plan amendment.

6.4 Qualified Military Service

If a Participant dies while performing qualified military service (within the meaning of Section 414(u)(5) of the Code), such Participant shall be credited with years of service for the period of his/her qualified military service.

Article VII – Withdrawals

7.1 General

7.1(a) Eligibility

A Participant is eligible to make regular and/or hardship withdrawals from the Plan, subject to the provisions of this Article VII. A Participant will continue to be considered a Participant for purposes of eligibility for withdrawals as long as amounts are held in the Participant's Plan accounts, regardless of such Participant's eligibility to make further contributions to the Plan.

7.1(b) Form and Valuation

Amounts invested in the CEG Common Stock Fund may be withdrawn in whole shares of the Company's Common Stock, with cash in lieu of any fractional share, or, at the Participant's election, the amount may be withdrawn wholly in cash. Withdrawals from the Default Investment Fund and the Other Investment Funds will be made only in cash.

The amounts withdrawn by the Participant will be taken from the Participant's accounts in the order specified in Section 7.4 for regular withdrawals and Section 7.6 for hardship withdrawals and will be subject to any applicable restrictions imposed by the Plan. The Trustee shall sell or purchase securities to meet the Participants' withdrawal requests but must do so over the period of time necessary to insure that such purchases or sales are made in accordance with applicable law, rules and regulations and do not disrupt the trading market for the Common Stock.

The value received by a Participant requesting a withdrawal shall be determined in the following manner:

If the Participant makes an Appropriate Request for a withdrawal *prior to* 4:00 p.m. E.T., (i) withdrawals from the Default Investment Fund and Other Investment Funds shall be valued based on the Closing Price for such funds on the day the

Appropriate Request is received; provided, however, that if the withdrawal consists of amounts from the CEG Common Stock Fund, withdrawals from the Default Investment Fund and Other Investment Funds shall be valued based on the Closing Price for such funds on the next business day after the Appropriate Request is received, and (ii) withdrawals from the CEG Common Stock Fund shall be valued based on the Transaction Price on the next business day after the Appropriate Request is received.

If the Participant makes an Appropriate Request for a withdrawal *on or after* 4:00 p.m. E.T., (i) withdrawals from the Default Investment Fund and Other Investment Funds shall be valued based on the Closing Price for such funds on the next business day after the Appropriate Request is received; provided, however, that if the withdrawal consists of amounts from the CEG Common Stock Fund, withdrawals from the Default Investment Fund and Other Investment Funds shall be valued based on the Closing Price for such funds on the second business day following receipt of the Appropriate Request, and (ii) withdrawals from the CEG Common Stock Fund shall be valued based on the Transaction Price on the second business day following receipt of the Appropriate Request.

In the case of a hardship withdrawal as described in Section 7.5, an Appropriate Request is not treated as having been made for purposes of the above valuation procedures until the Plan Administrator approves the withdrawal for payment.

7.1(c) Maturity

For employees with less than 5 years of service, Participant Contributions and Company Matching Contributions do not mature until 24 months after the date of contributions. For employees with 5 or more years of service, Participant Contributions and Matching Contributions shall mature immediately upon the date of contribution. All contributions made to a Rollover Account shall mature immediately upon the date of contribution. All Supplemental Contributions made prior to October 1, 2004 are mature.

All contributions made to the Employee Stock Account matured prior to October 1, 2004. If a Participant dies while performing qualified military service (within the meaning of Section 414(u)(5) of the Code), such Participant shall be credited with years of service for the period of his/her qualified military service

7.2 Regular Withdrawals

A Participant may make a regular withdrawal at any time by submitting an Appropriate Request to the Plan Administrator. A regular withdrawal is a withdrawal other than a hardship withdrawal and does not include distributions upon termination of employment as described in Article VIII.

Each regular withdrawal request received by the Plan Administrator will be paid out as soon as practicable after the request is received.

7.3 Restrictions on Regular Withdrawals

7.3(a) Regular Withdrawal of Contributions Under the Before-Tax Option

Before-Tax Option contributions, whether Basic or Supplemental, and related earnings may not be paid out of the Plan as part of a regular withdrawal unless the Participant is at least age 59-1/2, has retired, has been placed on long-term disability, or has terminated employment for any other reason. A Participant on a leave of absence is not considered to have terminated employment. The source of the amounts withdrawn from the Plan by a Participant who is at least age 59-1/2 or who has retired, been placed on long-term disability, or terminated employment for any other reason, must conform to the order of withdrawal specified in Section 7.4.

7.3(b) Consequences of Withdrawals of Unmatured Participant Contributions

If, in following the order of withdrawal specified in Section 7.4, any unmatured Participant Contributions are withdrawn, the Participant will be suspended from making contributions to the Plan under the After-Tax Option and the Before-Tax Option for (i) six (6) months following the month in which the Appropriate Request for the regular withdrawal is received by the Plan Administrator, if such withdrawal is made after September 30, 2004, and (ii) twelve (12) months following the month in which the Appropriate Request for the regular withdrawal is received by the Plan Administrator, if such withdrawal is made before October 1, 2004. There are no other penalties or restrictions under the Plan for withdrawing amounts that are eligible for withdrawal.

7.3(c) Withdrawals of Certain Other Unmatured Contributions

Withdrawals of unmatured contributions and related earnings from a Participant's Company Matching Contribution Account are not permitted under the Plan. The restriction on withdrawal lapses once these contributions mature.

7.4 Source of Regular Withdrawals

A Participant's regular withdrawals from the Plan will be taken from the Participant's accounts in the order listed below. For each level in the order of withdrawal, the entire account balance must be exhausted before amounts may be withdrawn from the next level. The meaning of matured and unmatured accounts as used below relates to the status of the contributions as explained in Section 7.1(c). Unless specifically indicated otherwise, an account includes both contributions and earnings thereon.

First	After-Tax Option Account with respect to Participant Contributions made prior to January 1, 1987, followed by earnings thereon.
Second	Matured After-Tax Option Account with respect to Participant Contributions made after December 31, 1986, followed by earnings thereon.
Third	Rollover Account.

Fourth	Employee Stock Account. Withdrawals from the Employee Stock Account will be made first from the portion of the account representing the Participant's investment in the account (i.e., amounts transferred from the terminated Baltimore Gas and Electric Company Employee Stock Ownership Plan that consist of after-tax contributions made by employees to such plan), and then from the remainder of the account.
Fifth	Matured Company Matching Contribution Account.
Sixth	Matured Before-Tax Option Account, but only if the Participant has reached age 59-1/2, retired, been placed on long-term disability or terminated employment for any other reason.
Seventh	Unmatured After-Tax Option Account with respect to Participant Contributions, followed by earnings thereon.
Eighth	Unmatured Before-Tax Option Account with respect to Participant Contributions, but only if the Participant has reached age 59-1/2, retired, been placed on long-term disability or terminated employment for any other reason.

The Participant will be permitted to make a regular withdrawal only to the extent funds eligible for withdrawal are available in the Participant's Plan accounts.

Withdrawals will be made pro rata in proportion to the Participant's respective investment in each Investment Fund under the account applicable to the level of withdrawal.

7.5 Hardship Withdrawals

7.5(a) General

A Participant will be eligible to receive a withdrawal under the hardship withdrawal provisions of the Plan if the Participant submits an Appropriate Request to the Plan Administrator and receives the Plan Administrator's express sanction and approval for the withdrawal. To obtain approval, the Participant will be required to demonstrate that the hardship withdrawal is necessary to satisfy an immediate and heavy financial need.

Because a Participant must withdraw all amounts available under the regular withdrawal provisions of the Plan and obtain any available loans under the Plan's loan provisions, prior to withdrawing amounts under the hardship withdrawal provisions, hardship withdrawals are limited to the Participant's contributions under the Before-Tax Option and earnings thereon which are not otherwise available as regular withdrawals or loans. However, earnings on Before-Tax Option contributions are available for hardship withdrawal only if allocated to the Participant's account as of December 31, 1988.

Following receipt of a hardship withdrawal, the Participant will be suspended from making contributions to the Plan under the After-Tax Option and the Before-Tax Option and to certain other plans of the Employer, as defined in Treasury Regulation Section 1.401(k)-1(d)(3)(iv)(F), for six (6) full months beginning with the first Payroll Period in the month following the month in which the hardship withdrawal is approved for payment by the Plan Administrator. A hardship withdrawal will be paid out as soon as practicable after Plan Administrator approval.

7.5(b) Immediate and Heavy Financial Need

In order to receive a hardship withdrawal, the Participant must demonstrate an immediate and heavy financial need. The following financial needs will automatically qualify as immediate and heavy.

1) Medical expenses described in Code Section 213(d) which have been previously incurred or are necessary to obtain medical care by the Participant, the Participant's Spouse, or any dependents of the Participant as defined in Code Section 152, without regard to subsections (b)(1), (b)(2), and (d)(1)(B) thereof.

2) The purchase (excluding mortgage payments) of a principal residence for the Participant.

3) The payment of tuition and related educational fees for the next twelve (12) months of post-secondary education for the Participant, the Participant's Spouse, or dependents as defined in Code section 152, without regard to subsections (b)(1), (b)(2), and (d)(1)(B) thereof.

4) Mortgage payments or rental payments that must be paid to prevent foreclosure on the mortgage of the Participant's principal residence or eviction of the Participant from his principal residence.

5) Certain other specified events that are deemed to be of an immediate and heavy financial need as determined by the Internal Revenue Service and published in revenue rulings, notices, and other documents of general applicability.

Other financial needs may qualify as immediate and heavy, based on all relevant facts and circumstances and subject to the approval of the Plan Administrator. Generally, for example, the need to pay funeral expenses for a family member may qualify as an immediate and heavy financial need.

The amount of an immediate and heavy financial need may include amounts necessary to pay any federal, state, or local income taxes or penalties reasonably anticipated to result from the hardship withdrawal.

It is the intent of the Plan that the definition of an "immediate and heavy financial need" will conform to the meaning of the term under the provisions of Treasury Regulation Section 1.401(k)-1(d)(3).

7.5(c) Withdrawal Deemed Necessary to Satisfy an Immediate and Heavy Financial Need – Requirements

After a Participant demonstrates that an immediate and heavy financial need exists, the Participant must also demonstrate that a hardship withdrawal from the Plan is necessary to satisfy that need.

Hardship withdrawals under the Plan will automatically be deemed necessary to satisfy an immediate and heavy financial need if all of the following requirements are met.

1) The withdrawal does not exceed the amount of the immediate and heavy financial need of the Participant.

2) The Participant has elected to receive all dividend distributions currently available under the Plan pursuant to Section 8.5(a), and has obtained all withdrawals, other than hardship withdrawals, and all nontaxable loans currently available under the Plan.

3) The Participant's contributions under the After-Tax and Before-Tax Options of the Plan and contributions to certain other plans of the Employer, as defined in Treasury Regulation Section 1.401(k)-1(d)(3)(iv)(F), are suspended for six (6) months following the month of receipt of the hardship withdrawal.

Notwithstanding the above, the Plan Administrator may, at his discretion, determine that a hardship withdrawal is necessary to satisfy an immediate and heavy financial need after a review of all relevant facts and circumstances.

It is the intent of the Plan that the withdrawals deemed necessary to satisfy the immediate and heavy financial need under this Section 7.5(c), will conform to the withdrawals deemed to satisfy this need under Treasury Regulation Section 1.401(k)-1(d)(3).

7.6 Source of Hardship Withdrawals

A Participant's hardship withdrawals from the Plan will be taken from the Participant's Before-Tax Option Account, but only after all available amounts have been withdrawn under the regular withdrawal provisions of the Plan and all available nontaxable loans have been taken under the loan provisions of the Plan. For purposes of this Section, the Before-Tax Option Account includes contributions and earnings allocated thereon as of December 31, 1988. Earnings allocated to the Before-Tax Option Account after December 31, 1988 are not available for hardship withdrawal and, accordingly, are excluded therefrom.

Qualified Nonelective Contributions and earnings thereon are not available for hardship withdrawal and, accordingly, are excluded therefrom.

The Participant will be permitted to make a hardship withdrawal only to the extent funds eligible for withdrawal are available in the Participant's Before-Tax Option Account.

Hardship withdrawals will be made pro rata in proportion to the Participant's respective investment in each Investment Fund under the Before-Tax Option Account.

Unmatured amounts not available for regular withdrawal under Section 7.3(c) will also not be available to the Participant for any hardship withdrawal.

7.7 Direct Rollover of Withdrawals

Notwithstanding any provision of the Plan to the contrary that would otherwise limit a Distributee's election under this Section, a Distributee may elect, at the time and manner prescribed by the Plan Administrator, to have any portion of a withdrawal from the Plan that is an Eligible Rollover Distribution paid directly to an Eligible Retirement Plan specified by the Distributee in a Direct Rollover.

7.8 <u>In-Service Distributions for Active Duty Members of the Uniformed Services.</u>

An individual who is on active duty for more than 30 days in accordance with Section 414(u)(12)(B) of the Code is treated as having been severed from employment during such period and may elect a distribution in accordance with and subject to the limitations of Section 414(u)(12)(B) of the Code. If a Participant elects a 30-day deemed distribution period, the Participant's right to make contributions under the After-Tax and Before-Tax Options following such distribution and while on leave must be suspended for a six-month period after the distribution.

Article VIII – Distributions

8.1 Eligibility

A Participant will continue to be considered a Participant for purposes of eligibility for distributions as long as amounts are held in the Participant's Plan accounts, regardless of such Participant's eligibility to make further contributions to the Plan.

A Participant is eligible to receive final distributions of all amounts in the Plan when the Participant either reaches age 70-1/2, retires, is placed on long-term disability, or terminates employment for any other reason. If a Participant dies, the Participant's beneficiary is entitled to any undistributed amounts from the Plan, as provided in Section 8.7. A Participant on a leave of absence is not considered to have terminated employment and will not be entitled to a distribution from the Plan under the provisions of this Article VIII.

8.2 Required Distributions

8.2(a) Distributions After Attaining Age 70-1/2

A Participant's entire Plan balance shall be distributed, or installment payments shall begin, not later than April 1st of the calendar year following the calendar year in which the Participant attains age 70-1/2, unless such Participant is employed by an Employer (in which case such distribution or installment payments shall commence upon employment termination). However, if there ever is a Participant who is a 5% owner (as defined in Code Section 416(i)), payment must commence no later than April 1st of the Plan Year after the Plan Year in which such Participant attains age 70-1/2, even if the Participant is still employed.

8.2(b) Mandatory Distribution for Plan Balances of $1,000 or less

A Participant who retires, is placed on long-term disability, or terminates employment for any other reason will automatically receive a final lump-sum distribution of all amounts held in the Participant Contribution Account, Company Matching Contribution Account, Employee Stock Account, and Rollover Account, if the aggregate value of the accounts is $1,000 or less as of the end of the calendar month in which retirement, placement on long-term disability, or termination for any other reason occurs. The aggregate value of a Participant's Plan accounts will be determined in accordance with the Trust Agreement and will include the value of any outstanding Plan loans to the Participant. Any distributions from a Participant's accounts that are invested in the CEG Common Stock Fund will be made in the form of a lump-sum cash payment in lieu of shares of Common Stock, unless the Participant elects a distribution of Common Stock representing investments in the CEG Common Stock Fund by filing an Appropriate Request with the Plan Administrator. A distribution under this Section 8.2(b) will be made within 90 days after the end of the month in which retirement, placement on long-term disability, or termination for any other reason occurs.

8.3 Distributions Elected by Participant

8.3(a) Time of Distribution

Participants eligible to receive final distributions from the Plan and who are not subject to the required distribution provisions of Section 8.2 may elect a distribution by submitting an Appropriate Request with the Plan Administrator. Distributions will commence as soon as practicable after the Appropriate Request is received by the Plan Administrator.

The Participant's final distribution will be made within sixty (60) days after the later of the end of the Plan Year in which: (i) the Participant attains age 65, (ii) the Participant ceases active employment, or (iii) the tenth (10th) anniversary of the year in which the Participant's participation in the Plan occurs. Notwithstanding the preceding sentence, a distribution will not be made unless the Participant submits an Appropriate Request for a distribution with the Plan Administrator. In any case, distributions must begin by the date prescribed in Section 8.2(a).

8.3(b) Method of Distribution

Participants who are not subject to the mandatory distribution requirements of Section 8.2(b) may elect to receive distributions as lump-sum payments, or as installment payments as provided in Section 8.4(c) made over a period not to exceed ten (10) years. Partial payments may also be made from time to time as requested under the withdrawal provisions of Article VII.

8.3(c) Required Minimum Distributions

Notwithstanding any other provision in the Plan to the contrary, distributions under the Plan shall comply with the requirements of Code section 401(a)(9) (including the incidental death benefit requirements of Code section 401(a)(9)(G)) and the regulations thereunder. Notwithstanding anything in the Plan to the contrary, a Participant or beneficiary who would have been required to receive required minimum distributions for 2009 but for the enactment of Section 401(a)(9)(H) of the Code ('2009 RMDs'), and who would have satisfied that requirement by receiving distributions that are (1) equal to the 2009 RMDs or (2) one or more payments in a series of substantially equal distributions (that include the 2009 RMDs) made at least annually and expected to last for the life (or life expectancy) of the Participant, the joint lives (or joint life expectancy) of the Particpant and the beneficiary, or for a period of at least 10 years ('Extended RMDs'), will receive those distributions for 2009. In addition, solely for purposes of applying the Direct Rollover provisions of the Plan, 2009 RMDs and Extended RMDs will not be treated as Eligible Rollover distributions.

8.4 Form and Valuation of Distribution

8.4(a) CEG Common Stock Fund

Except as provided in Section 8.2(b) under the mandatory distribution requirement or Section 8.4(c) under the installment payment option, any distributions from a Participant Contribution Account, Company Matching Account, Employee Stock Account, or Rollover Account that are invested in the CEG Common Stock Fund will be made in a lump-sum payment constituting shares of Common Stock with cash paid in lieu of fractional shares.

The portion of the distribution representing investments in the CEG Common Stock Fund may, at the election of the Participant, be received entirely in cash in lieu of shares of Common Stock upon submitting an Appropriate Request with the Plan Administrator.

8.4(b) Default Investment Fund and Other Investment Funds

Except as provided in Section 8.4(c) under the installment payment option, any distributions from a Participant Contribution Account, Company Matching Contribution Account, Employee Stock Account, or Rollover Account that are invested in the Default Investment Fund and/or the Other Investment Funds will be made in the form of a lump-sum cash payment.

8.4(c) Installment Payment Option

Participants who are not subject to the mandatory distribution requirements of Section 8.2(b) and who are retired, have been placed on long-term disability, or terminated employment for any other reason, may elect to receive their distributions in annual, quarterly, or monthly installments over a period not to exceed ten (10) years. The election to receive such installments must be made prior to receiving a distribution and by means of an Appropriate Request submitted with the Plan Administrator.

Participants who have elected the installment payment option and selected an installment payment period may change the number of years, quarters, or months over which installments will be made at any time after the installment payments have commenced, provided that such change will not result in an installment payment period in excess of ten (10) years from the date the installments began. The election to change the installment payment period is made by submitting an Appropriate Request with the Plan Administrator. Any change in the installment payment period will be effective as soon as practicable following receipt of the Appropriate Request by the Plan Administrator.

A Participant who has elected the installment payment option may, at any time, submit an Appropriate Request with the Plan Administrator to receive a lump-sum payment of the remaining balance in the Participant's accounts.

The amounts included in installment payments to a Participant will be taken from the Participant's Plan accounts in the same order specified in Section 7.4 for regular withdrawals. Unmatured Company Matching Contribution Account amounts remaining in the Participant's accounts after such ordering rules are applied are included in installment payments. The meaning of unmatured accounts relates to the status of contributions as explained in Section 7.1(c). Unless specifically indicated otherwise, an account includes both contributions and earnings thereon.

Amounts invested in the CEG Common Stock Fund may be received under the installment payment option either in whole shares of the Company's Common Stock with cash in lieu of any fractional share, or, at the Participant's election, in cash. A Participant's election to receive cash or not to receive cash for amounts invested in the CEG Common Stock Fund will apply to all installment payments made to the Participant subsequent to such election, unless the Participant submits an Appropriate Request with the Plan Administrator prior to the installment payment date requesting that the Participant's election be changed.

Installment payments that consist of amounts from the Default Investment Fund and the Other Investment Funds will be made only in cash.

Amounts included in installment payments will be withdrawn from a Participant's investment funds pro rata in proportion to the Participant's respective investment in each Investment Fund under the account applicable to the level of installment payment.

8.4(d) Valuation of Distributions

The value received by a Participant requesting a lump-sum distribution shall be determined in the following manner:

If the Participant makes an Appropriate Request for a distribution *prior to* 4:00 p.m. E.T., (i) distributions from the Default Investment Fund and Other Investment Funds shall be valued based on the Closing Price for such funds on the day the Appropriate Request is received; provided, however, that if the distribution consists of amounts from the CEG Common Stock Fund, distributions from the Default Investment Fund and Other Investment Funds shall be valued based on the Closing Price for such funds on the next business day after the Appropriate Request is received, and (ii) distributions from the CEG Common Stock Fund shall be valued based on the Transaction Price on the next business day after the Appropriate Request is received.

If the Participant makes an Appropriate Request for a distribution *on or after 4:00* p.m. E.T., (i) distributions from the Default Investment Fund and Other Investment Funds shall be valued based on the Closing Price for such funds on the next business day after the Appropriate Request is received; provided, however, that if the distribution consists of amounts from the CEG Common Stock Fund, distributions from the Default Investment Fund and Other Investment Funds shall be valued based on

Closing Price for such funds on the second business day following receipt of the Appropriate Request, and (ii) distributions from the CEG Common Stock Fund shall be valued based on the Transaction Price on the second business day following receipt of the Appropriate Request.

For a Participant electing the installment distribution option, the value received for the first installment payment shall be determined in accordance with the above valuation procedures. For installment payments in subsequent years, the value received shall be determined in accordance with the above valuation procedures.

The valuation procedures described above shall be applied by substituting the term “Plan Administrator action” for each place the term “Appropriate Request” appears, in the case of (i) Participants subject to the required distribution provisions of Section 8.2, and (ii) beneficiaries who fail to elect an earlier distribution as described in Section 8.7(a).

8.5 Employee Stock Account Dividend Distributions

This Section 8.5 applies through, but is no longer effective after, the Common Stock dividend payment on January 1, 2002.

Any dividends declared and paid on shares of Common Stock in the Employee Stock Account in the CEG Common Stock Fund held by the Trustee pursuant to the Plan shall be invested by the Trustee pursuant to the Trust Agreement in interest bearing accounts. After the final dividend payment in each year has been made by the Company, the Trustee will distribute to each Participant by not later than December 31st of that year the dividend amounts declared and paid on the shares of Common Stock allocated to the Participant’s Employee Stock Account in the CEG Common Stock Fund. The Trustee shall invest, no less frequently than quarterly, any interest earned on such dividends prior to their distribution, in shares of Common Stock, and allocate such shares to the Participant’s Employee Stock Account in the CEG Common Stock Fund.

When a Participant receives final distributions of all amounts in the Plan allocated to his accounts, any additional dividends which have been declared and paid on shares of Common Stock in the Employee Stock Account and any related interest in the CEG Common Stock Fund which has not yet been distributed under the provisions of this Section 8.5, will be distributed in cash at the same time as the distribution of the shares of Common Stock in the Participant's Employee Stock Account in the CEG Common Stock Fund.

8.5(a) CEG Common Stock Fund Employee Election

Effective February 1, 2006, any dividend paid with respect to shares of the CEG Common Stock Fund allocated to the Participant's accounts as of the record of such dividend will be, as elected by the Participant prior to the payment date (1) distributed in cash to the Participant as soon as administratively practicable following the date such dividend is paid by the Company or (2) retained by the Trustee and reinvested in Company stock for credit to the Participant's account in the CEG Common Stock Fund. The amount distributed to the Participant pursuant to clause (1) of the preceding sentence shall be the lesser of (A) the original amount of the dividends attributable to that Participant and (B) the amount of such dividends as adjusted for any investment losses while held in the Trust or reduced for any withholdings. In accordance with such procedures as the Plan Administrator may provide, a Participant shall be given a reasonable opportunity to make an election under this Section 8.5(a) before the beginning of each quarter of the Company's taxable year with respect to dividends paid in such quarter. A Participant may have only one election in effect for his or her account at any time (and may not make separate elections with respect to the different portions of his or her account). If a Participant who has previously made a timely election under this Section 8.5(a) does not make a new election with respect to dividends paid in a subsequent period, the Participant's prior election shall remain in effect for such subsequent period (and shall apply to all dividends paid on Company Stock during such period with respect to which an election is offered). In the absence of a timely election, the Participant shall be deemed to have elected to have the dividends with respect to which an election is offered accumulated in his or her account and reinvested in Company Stock.

8.6 Unlocated Participants

If and when the balance in a Participant's account(s) under the Plan becomes payable and the Plan Administrator is unable to locate a Participant or his designated beneficiary or beneficiaries to whom such amounts are payable, the Participant Contribution Account, Company Matching Contribution Account, Employee Stock Account, and Rollover Account of the Participant will be closed after three (3) years from the date amounts in the Plan first become payable under Sections 8.2, 8.3, or 8.7. The balances in the closed accounts will be forfeited and thereafter applied to reduce Company contributions to the Plan. However, if the Participant or his designated beneficiary or beneficiaries subsequently files a proper claim with the Plan Administrator for such amounts, and the claim is filed prior to the termination of the Plan, the Company will restore the Participant's accounts to the balances that existed when they were closed.

Once the amounts have been restored, the balances will be available for distribution in accordance with the distribution provisions of the Plan.

8.7 Distribution Upon Death of Participant

8.7(a) Payment to Beneficiary

When a Participant dies, the deceased Participant's beneficiary is entitled to a distribution of all amounts held in the Participant's accounts.

Unless the Participant's beneficiary requests an earlier distribution to be made or commenced as soon as possible after an Appropriate Request is submitted to the Plan Administrator, all amounts held in the Participant's accounts will be distributed to the beneficiary within sixty (60) days after the end of the Plan Year in which the Participant dies.

Amounts held in the CEG Common Stock Fund will be paid to the Participant's beneficiary in Common Stock or in cash in accordance with the provisions of Section 8.4(a). If the beneficiary wishes to receive the distribution in cash, an Appropriate Request must be submitted by the beneficiary to the Plan Administrator. Amounts held in the Default Investment Fund and the Other Investment Funds will be paid to the Participant's beneficiary in the form of a lump-sum cash payment in accordance with the provisions of Section 8.4(b). A beneficiary may not elect to receive the distribution under the installment payment option.

If a Participant elected a distribution under the installment payment option provisions of Section 8.4(c) and dies during the installment payment period, or before the installment payment period begins, the remaining balance in the Investment Funds that was to be paid out under the installment payment option will be paid to the Participant's beneficiary in a lump-sum. Any amounts remaining in the CEG Common Stock Fund will be paid to the beneficiary in Common Stock or in cash in accordance with the Participant's most recent election under Section 8.4(c). If the beneficiary wishes to receive the distribution in a different form than that which will be received under the Participant's most recent election, an Appropriate Request must be submitted by the beneficiary with the Plan Administrator. Amounts remaining in the Default Investment Fund and the Other Investment Funds will be paid to the Participant's beneficiary in the form of a lump-sum cash payment.

In the event any Participant is deceased at the time of a dividend distribution from the Participant's Employee Stock Account paid under the dividend distribution provisions of Section 8.5(b), the distribution will be made to the Participant's beneficiary, as determined in accordance with this Section 8.7(a).

In the case of a Participant who dies while performing qualified military service (as defined in Code Section 414(u)), the survivors of the Participant are entitled to any additional benefits (other than benefit accruals relating to the period of qualified military service) provided under the Plan had the Participant resumed and then terminated employment on account of death.

8.7(b) Designation of Beneficiaries

Any interests in the Plan which have not been distributed to a Participant prior to his death will be distributed to the Participant’s surviving Spouse, unless the Participant and his Spouse have jointly designated some other beneficiary or beneficiaries. A joint designation must be made on a special form provided by the Plan Administrator and duly witnessed by a notary public.

The consent of the Spouse of the Participant will not be required if it is established to the satisfaction of the Plan Administrator that the consent of the Spouse may not be obtained because there is no Spouse, because the Spouse cannot be located, or because of such other circumstances as the Secretary of the Treasury may by regulations prescribe. Any consent of a Spouse (or establishment that the consent of a Spouse may not be obtained) as provided above shall be effective only with respect to such Spouse. For purposes of this Section 8.7(b), the Spouse or surviving Spouse of the Participant is the Spouse at the time of the Participant’s death, except that a former Spouse will be treated as the Spouse or surviving Spouse to the extent provided under a qualified domestic relations order as described in Code Section 414(p). The designation of a beneficiary may be changed at any time by the proper completion and forwarding to the Plan Administrator of the beneficiary-designation form.

If a Participant dies and does not leave a surviving Spouse, any undistributed interests will be paid to any beneficiary or beneficiaries that the Participant has designated on the beneficiary-designation form provided by the Plan Administrator. If a Participant dies and leaves no surviving Spouse and no beneficiary is effectively designated in connection with the benefits due under the Plan, the benefits provided under the Plan will be distributed to any effectively designated beneficiary (as indicated on the life insurance beneficiary-designation form) of any Company-sponsored life insurance of the Participant. If there is no beneficiary effectively designated to take the proceeds of such life insurance, the benefits due under the Plan shall be distributed to the personal representative, if any, of the deceased Participant. In any case where the exact intention of a Participant is in doubt in connection with the designation of a beneficiary, the Plan Administrator shall have full authority to determine such probable intention. The effectiveness of the Participant's beneficiary designation and the Plan Administrator's determination of the intention of the Participant shall be final and binding upon all parties.

The Plan Administrator may require such proper proof of death and such evidence of the right of any person to receive payment of the value of the account of a deceased Participant as the Plan Administrator may deem desirable. The Plan Administrator's determination of death and of the right of any person to receive payment shall be conclusive.

8.8 Direct Rollover of Distributions

Notwithstanding any provision of the Plan to the contrary that would otherwise limit a Distributee's election under this Section, a Distributee may elect, at the time and manner prescribed by the Plan Administrator, to have any portion of a distribution from the Plan that is an Eligible Rollover Distribution paid directly to an Eligible Retirement Plan specified by the Distributee in a Direct Rollover, including, for distributions made after December 31, 2009, an individual retirement plan described in Code Section 408(a) or (b) for non-spouse beneficiary Distributees as described in Code Section 402(c)(11). Effective for distributions made after October 30, 2009 and subject to the provisions of Section 3.3 of the Plan, an Eligible Rollover Distribution that includes amounts that are not includable in gross income may be transferred pursuant to this Section 8.8 if the qualified trust or annuity contract described in section 403(b) of the

Code receiving such Direct Rollover separately accounts for the portions of the distribution that are and are not includable in gross income. Effective for calendar years beginning on or after December 31, 2008, solely for purposes of applying the direct rollover provisions of the Plan, 2009 required minimum distributions pursuant to Code Section 401(a)(9)(H) and extended 2009 required minimum distributions will be treated as Eligible Rollover Distributions in 2009.

8.9 Qualified Reservist Distributions

The Plan permits a Participant to elect a Qualified Reservist Distribution. For purposes of this Section 8.9, a Qualified Reservist Distribution is any distribution to an individual who is ordered or called to active duty after September 11, 2001, if: (i) the distribution is from amounts attributable to elective deferrals including After-Tax and Before-Tax Options; (ii) the individual was (by reason of being a member of a reserve component, as defined in Section 101 of Title 37, United States Code) ordered or called to active duty for a period in excess of 179 days or for an indefinite period; and (iii) the Plan makes the distribution during the period beginning on the date of such order or call, and ending at the close of the active duty period. A Participant that meets the requirements for a Qualified Reservist Distribution under this Section 8.9 will be treated as taking a distribution under this Section 8.9 regardless of whether such Participant is also entitled to distribution under Section 7.8.

Article IX – Loans to Participants

9.1 General

A Participant will continue to be considered a Participant for purposes of this Article IX as long as the Participant continues to be a Party in Interest.

At the direction of the Plan Administrator, the Trustee may make loans to Participants from the Plan. Plan loans will in all cases meet the following requirements.

a) Loans will be available to all Participants on a reasonably equivalent basis.

b) Loans will not be made available to Participants who are Highly Compensated Employees in an amount greater than the amount made available to other Participants.

c) Loans will be made in accordance with all other specific provisions regarding Participant Loans under the Plan.

d) Loans will bear a reasonable rate of interest as provided under Section 9.3.

e) Loans will be adequately secured as provided under Section 9.4.

9.2 Amount

A Participant may apply for a loan from his account balance in the Plan subject to the limitations and other provisions of this Article IX or as may be adopted by the Plan Administrator. Application for loans is made by submitting an Appropriate Request with the Plan Administrator. The Plan Administrator's action in approving or disapproving any application for a loan shall be final. The Plan Administrator, in his sole discretion, may direct the Trustee to lend a Participant an amount which does not exceed fifty percent (50%) of the Participant's Total Account Balance; provided, however, that the minimum loan amount shall be $1,000 and the maximum loan amount shall be $50,000.

For purposes of determining whether a loan exceeds $50,000, such loan shall be added to the highest outstanding balance of all other loans from the Plan or any other plans of the Employer during the twelve-month period preceding the date on which the loan is made (i.e., the date of the check). Participants making application for a loan from the Plan may be required to demonstrate their creditworthiness to the satisfaction of the Plan Administrator.

A Participant may have no more than two loans outstanding at a time. A Participant who has an existing loan and qualifies for a hardship withdrawal may be required to obtain a second loan pursuant to Section 7.5(c).

Loan proceeds may not be used for the purpose of investing in stocks, securities, or other similar or intangible investments. All loans shall be subject to the approval of the Plan Administrator, or his designee, who shall review each application for a loan. The Plan Administrator shall adopt such rules, procedures and documents as he may deem advisable in regard to the granting of loans, provided such rules, procedures, and documents are consistent with the provisions of this Article IX.

9.3 Reasonable Rate of Interest

Each loan will bear a reasonable rate of interest on the unpaid balance during the term of the loan which (except as provided in Section 9.14) will be equal to the prime rate plus one percent (1%), as reported in the Eastern Edition of the Wall Street Journal on the last day of the month preceding the month in which the Participant submits an Appropriate Request for a loan with the Plan Administrator. The interest rate on a loan will remain in effect for the term of the loan.

9.4 Adequate Security

The Participant shall grant to the Trustee a security interest in the loan account to the extent of his outstanding principal loan balance. The security interest will secure repayment of the loan and will remain in effect until the loan, together with accrued interest, is paid in full. The amounts in a Participant's loan account used to secure the loan balance are not available for withdrawal or distribution.

9.5 Source of Funds

Each loan shall be treated as a separate investment of the portion of the Participant's Plan account balance borrowed and the Plan Administrator shall direct the Trustee to reduce the Participant's Plan account balance by an amount equal to the amount borrowed. A loan account will be established for the Participant reflecting the amount of his loan. The money borrowed will be taken from the Participant's Plan accounts in the order shown below. The meaning of matured and unmatured accounts as used below relates to the status of contributions as explained in Section 7.1(c). Unless specifically indicated otherwise, an account includes both contributions and earnings thereon. Loan amounts will be taken from a Participant's Investment Funds on a pro rata basis.

First	Before-Tax Option Account.
Second	Unmatured After-Tax Option Account.
Third	Company Matching Contributions Account.
Fourth	Employee Stock Account, <u>except</u> the Participant's investment in the account.
Fifth	Employee Stock Account representing the Participant's investment in the account.
Sixth	Rollover Account.
Seventh	Matured After-Tax Option Account.

9.6 Valuation of Loans

The value received by a Participant requesting a loan shall be determined in accordance with this Section. Loans will be processed as soon as practicable after the Participant's properly executed loan agreement is received by the Plan Administrator. Loans from the Default Investment Fund and Other Investment Funds shall be valued based on the Closing Price for such funds on the day the loan is processed. Loans from the CEG Common Stock Fund shall be valued based on the Transaction Price on the day the loan is processed.

9.7 Loan Repayment

For Participants who are active Employees, payments of principal and interest on the loan must be made by payroll deduction, whichever is applicable. Participants who are not active Employees are required to make regular monthly payments of principal and interest on the loan by personal check or money order payable to the Company or its designee, as directed by the Plan Administrator. Each loan shall by its terms require that repayment (principal and interest) be amortized in level payments over a loan term that is arrived at by mutual agreement between the Plan Administrator and the Participant. In no event (other than as provided under Section 9.14), however, will the term of the loan exceed five (5) years unless the loan is to be used to acquire a Participant's principal residence, in which case, the term of the loan may not exceed thirty (30) years.

A Participant may repay the entire outstanding balance of a loan, plus any accrued interest, at any time by personal check or money order made payable to the Plan or the Trustee. Loan repayments constituting a repayment of principal will be allocated to the Participant's Plan accounts in the reverse order from which borrowed. Within the accounts, principal repayments will be allocated among the various Investment Funds in accordance with the Participant's most recent investment directions. The interest portion of the loan repayment will be allocated to the Participant's Plan accounts on a pro rata basis in accordance with the amounts originally withdrawn from the Participant's accounts in order to fund the loan. Within such accounts, interest payments will be allocated among the various Investment Funds in accordance with the Participant's most recent investment directions.

9.8 Default

A default occurs if a Participant fails to make a loan payment within 90 days after its due date or a beneficiary fails to continue the loan repayments or to repay the loan in full within 90 days after the payment's due date. Upon the occurrence of a default, the Participant or beneficiary, as the case may be, will be subject to any legal remedies available for collecting the debt. In addition, the outstanding principal amount of the loan may be treated as a distribution, reportable to the Internal Revenue Service. If a Participant defaults on a loan while an active Employee, the Participant will be suspended from making contributions to, and taking loans from, the Plan for two (2) years from the date of default. If a Participant who is not an active Employee defaults on a loan, the Participant will be unable to take loans from the Plan for two (2) years from the date of default. The Plan Administrator shall have the discretion to allow additional time for repayment, subject to the requirements of Code Section 72(p) and the Treasury Regulations promulgated thereunder.

9.9 Death of a Participant

If a Participant dies prior to repaying a loan, the outstanding loan principal will be treated, and reported to the Internal Revenue Service, as a distribution to the beneficiary unless the beneficiary elects either to continue to make monthly loan repayments until the Plan balance is distributed to the beneficiary under the provisions of Section 8.7(a), or to repay the outstanding principal balance, plus accrued interest, within 90 days after the last loan repayment was made.

9.10 Loan Agreement and Amendments

A Participant's loan will be evidenced by a loan agreement, which will include a promissory note and security agreement and payroll deduction authorization, if applicable. Participants will be required to execute a document, or otherwise evidence their agreement electronically (in such form and manner as the Plan Administrator shall specify), specifying the terms of the loan. Amendments to the loan terms must be authorized by both parties; provided, however, that amendments required as a result of a change to any applicable law or regulation or the issuance of any new ruling or interpretation by any governmental agency may be made unilaterally to the Plan and the loan agreement upon written notice to the Participant. The loan is at all times subject to such other conditions as may be required by the Internal Revenue Service or any other governmental agency.

9.11 Assignment of Interest

A Participant cannot assign his loan or obligation to repay his loan to any other person, corporation, or entity. Any attempted assignment of a Plan loan or obligation to repay will be void.

9.12 Prohibited Transactions

No loan shall be made unless such loan is exempt from the tax imposed on prohibited transactions by Code Section 4975.

9.13 Loan Initiation Fees

A Participant who applies for a loan will be charged a loan initiation fee, as determined from time to time by the Plan Administrator, which will be deducted from the Participant's Plan account balance in the same manner set forth in Section 9.5.

9.14 Leaves of Absence

9.14(a) Non-Military Leaves of Absence

Participants who are on an approved leave of absence other than a Military Leave of Absence must continue to make loan repayments during such leave. Interest continues to accrue during such leave of absence at the original interest rate.

9.14(b) Military Leaves of Absence

Participants may elect to discontinue making loan repayments during a Military Leave of Absence, in which case the loan termination date shall be extended for a period equal to the length of the Military Leave of Absence (not to exceed the number of months of missed repayments). In addition, the loan interest rate for any Participant who is on a Military Leave of Absence and who does not elect otherwise shall, while the Participant is on such Military Leave of Absence, be the lesser of 6% per annum or the original interest rate.

Article X – Plan Administration

10.1 Plan Administrator

The Plan will be administered by the Director – Benefits of the Company (or the position succeeding to that function) as a fiduciary and as Plan Administrator. The Plan Administrator shall discharge his duties for the exclusive benefit of Participants and their beneficiaries. The Plan Administrator shall be authorized to delegate his duties and responsibilities hereunder.

10.2 Rules and Regulations

The Plan Administrator may adopt such rules and regulations as he may deem necessary or advisable for the administration of the Plan on a consistent and non-discriminatory basis.

10.3 Powers and Duties of the Plan Administrator

The Plan Administrator shall administer the Plan in accordance with its provisions and shall have all powers necessary for that purpose, including, but not limited to, the power (i) to interpret the Plan, (ii) to resolve all questions concerning eligibility for benefits or loans under the Plan and to require any person to furnish such information as he may reasonably request as a condition to receiving any benefit or loan under the Plan, (iii) to compute or cause to be computed the amount of benefits payable or loans available here under to Participants or their beneficiaries, and (iv) to direct the Trustee concerning all payments that shall be made out of the Investment Funds pursuant to the provisions of the Plan. The Plan Administrator may, in writing, delegate any part of his responsibilities and duties (including but not limited to the approval of loans to Participants) to one or more designees and may withdraw such authority by a subsequent writing.

10.4 Records and Reports

The Plan Administrator shall cause to be furnished to each Participant, on at least a semiannual basis and upon any withdrawal, distribution, or loan to him, a detailed report, indicating the current value of the Participant's interest in the Plan, as well as any other reports now or hereafter required by law to be furnished to each Participant or any regulatory agency.

10.5 Procedure for Review of Claim

10.5(a) Denial of Claim

If after a Participant makes a claim for benefits by submitting an Appropriate Request, such claim is denied in full or in part, the Plan Administrator shall, within ninety (90) days after receipt of the claim, provide the Participant (at the Participant's last address appearing on the records of the Plan) with written notice by mail, in language calculated to be understood by the Participant, of the denial of the claim stating (i) the specific reasons for the denial, (ii) the specific references to pertinent Plan provisions on which the denial is based, (iii) any additional material or information necessary for the Participant to resubmit the claim, including an explanation of why such material or information is necessary, and (iv) an explanation of the claims appeal procedure, including a statement of the Participant's right to bring a civil action under Section 502(a) of ERISA following an adverse benefit determination on review. If special circumstances require an extension of time to process the claim, within 90 days after receipt of the claim, the Plan Administrator shall provide the Participant with written notice by mail specifying the reasons for the need for an extension of time, and a date by which he expects to render a decision. In that event, the initial 90-day period for notice of denial shall be extended by an additional 90 days.

10.5(b) Appeal of Claim

If a Participant's claim has been denied or if the Participant has not received written notice of denial within the period prescribed by Section 10.5(a), he may file an appeal with the Administrative Committee. The Participant or his duly authorized representative may request to review pertinent documents. The appeal must be submitted in writing within sixty (60) days of the date the Participant receives notice of the denial. The appeal may be made by the Participant or his duly authorized representative. The appeal must state the reasons for the appeal and shall be accompanied by any evidence or documentation to support the Participant's position. The Administrative Committee shall review the Participant's appeal promptly and shall advise the Participant of his decision in writing, in language calculated to be understood by the Participant, stating (i) the specific reasons for his decision with specific reference to pertinent Plan provisions on which the decision is based, (ii) that the Participant is entitled to receive, upon request and free of charge, reasonable access to and copies of all documents, records, and other information relevant to his claim, and (iii) that the Participant has a right to bring an action under Section 502(a) of ERISA.

This written decision shall be sent to the Participant (at his last address appearing on the records of the Plan) by mail no later than 60 days after receipt of the written appeal, unless special circumstances require an extension of time for processing the appeal, obtaining more information or conducting an investigation of facts. In no event shall the written decision be sent to the Participant later than 120 days after receipt by the Administrative Committee of the written appeal. The determination of the Administrative Committee shall be final and binding on all parties and not subject to further appeal.

10.5(c) Exclusive Method

The procedure for review of claims outlined in this Section 10.5 is the exclusive method available for resolving claims under the Plan, notwithstanding the existence of other Employer procedures applicable to Employee grievances in other areas. No Participant or beneficiary is entitled to bring any action, whether at law or in equity, against any Employer or the Trustee or any of their respective agents, officers or employees, including the Plan Administrator, his designees, or the Chief Human Resources Officer in connection with any right, privilege, or benefit provided under this Plan unless and until, as a condition precedent, all of the remedies provided under this Section 10.5 have been exhausted.

10.6 Plan Expenses

The Company may, in its sole discretion, determine from time to time which expenses incident to the operation and maintenance of the Plan, and the fees and expenses of the Trustee will be paid by either the Company or the Plan Participants. Any fees and expenses not paid by the Company shall be paid by Plan Participants.

All brokerage fees and commissions, stock transfer taxes, and other charges incurred by the Trustee in connection with the purchase and sale of shares of Common Stock for the CEG Common Stock Fund shall be borne by the CEG Common Stock Fund. All expenses and other charges incurred by the Other Investment Funds shall be borne by the respective fund.

Administrative fees charged by the institutions which issue contracts for the Default Investment Fund shall be borne by the Default Investment Fund and shall be reflected in the interest rate for such Fund.

Loan initiation fees will be paid by Plan Participants as set forth in Section 9.13.

The Plan Administrator shall not receive any compensation for his services as Plan Administrator.

10.7 Fiduciary Responsibilities

The Plan Administrator is the named fiduciary under the Plan within the meaning of Section 402(a) of ERISA, and shall control and manage the operation and administration of the Plan.

The Plan Administrator (and his delegatees), the Investment Committee, the Administrative Committee, the Trustee, and any other person who is deemed to be a fiduciary under the Plan, shall not be liable for a breach of fiduciary responsibility of another fiduciary under the Plan except to the extent it or he (a) shall have participated knowingly in, or shall have knowingly undertaken to conceal, an act or omission of such fiduciary, knowing such act or omission was a breach of the fiduciary's fiduciary responsibilities, (b) shall have, through a breach of its or his fiduciary responsibilities, enabled such fiduciary to commit a breach of its or his fiduciary responsibilities, or (c) shall have knowledge of a breach of fiduciary responsibilities by such fiduciary, unless it or he has made reasonable efforts to remedy the breach.

This Plan is an ERISA Section 404(c) plan, as described in Section 404(c) of ERISA and defined by Section 2550.404(c)-1 of Title 29 of the Code of Federal Regulations. Under ERISA Section 404(c), Plan Participants and beneficiaries are generally deemed to be responsible for the results of their investment decisions, and fiduciaries of the Plan may be relieved of liability for any loss, or with respect to any breach of part 4 of Title I of ERISA, that is the direct and necessary result of the exercise of control by Plan Participants and beneficiaries over assets in their Plan accounts.

10.8 Indemnification

The Plan Administrator (and his delegatees), members of the Board of Directors, the Executive Group, and the Investment Committee, the Administrative Committee, and any other officer or employee of any Employer shall be indemnified by the Company or from proceeds under insurance policies purchased by the Company against any and all liabilities arising by reason of any act or failure to act made in good faith pursuant to the provisions of the Plan, including expenses reasonably incurred in the defense of any claim relating thereto.

Article XI – Management of Funds

11.1 Trust Fund

The Company shall maintain a Trust Agreement with a Trustee, pursuant to which a Trust shall be established to hold the assets of the Plan. All cash contributions made by Participants and the Company under the Plan shall be paid over to the Trustee as soon as administratively practicable for the purpose of providing benefits under the Plan. No part of the corpus of or income from these funds shall be used for, or diverted to, purposes other than for the exclusive benefit of the Participants and their beneficiaries.

11.2 Trust Agreement; Powers of Trustee

The Trust Agreement shall be subject to the approval of the Board of Directors prior to execution of the Trust Agreement by the Company. The Company or the Plan Administrator may from time to time amend the Trust Agreement and shall give written notice of any such amendment to the Trustee. The Trust Agreement, as amended from time to time, shall contain provisions appropriate to carrying out the purposes of the Plan, including, but not limited to, provisions with respect to (i) the power and authority of the Trustee, (ii) the investment, reinvestment, control, and disbursement of the Trust assets, (iii) the contract or contracts with one or more financial institutions for the Default Investment Fund, and (iv) the authority of the Company or the Plan Administrator to amend the Trust Agreement, review the performance of the Trustee, and to terminate the Trust Agreement and settle the account of the Trustee.

11.3 Removal and Resignation of Trustee

The Company shall have the power, without terminating the Trust Agreement, to remove the Trustee and to designate a successor Trustee upon such removal or in the event the Trustee elects to resign.

11.4 Accounts and Records Maintained by Trustee

The Trustee or the Plan Administrator shall keep complete and accurate records of all of the assets of, and transactions involving, the Investment Funds with respect to Participant Contribution Accounts under the After-Tax and/or Before-Tax Options, the Company Matching Contribution Accounts, the Employee Stock Accounts and Rollover Accounts. If the records are maintained by the Trustee, it shall, in a timely manner, prepare and render all reports and accounting required by law or regulation and shall provide the Plan Administrator with such reports, accountings, and other information as he may reasonably request. All such records shall be available for inspection and copying during the Trustee's normal business hours by the Plan Administrator, who may elect to employ an independent certified public accounting firm to review the accounts and records maintained by the Trustee as of the close of each Plan Year and report the results of such review to the Plan Administrator. This report shall be made available by the Plan Administrator to the Board of Directors, along with such other reports and information as the Board of Directors shall, from time to time, request.

11.5 Voting Rights

11.5(a) Common Stock

Each Participant shall have the right, and shall be afforded the opportunity (on the prescribed form) to instruct the Trustee how to vote or whether or not to tender shares of the Company's Common Stock allocated to his Participant Contribution Account, Company Matching Contribution Account, Employee Stock Account, and Rollover Account in the CEG Common Stock Fund. To the extent possible, fractional shares will be combined and voted by the Trustee to reflect the instructions of the Participants whose Participant Contribution Accounts, Company Matching Contribution Accounts, Employee Stock Accounts, and Rollover Accounts in the CEG Common Stock Fund have been allocated with such fractional shares. Shares of Common Stock with respect to which no instructions are received shall be tendered by the Trustee, but shall be voted by the Trustee in the same proportions as the Trustee was instructed to vote with respect to the shares for which it received instructions. At the time of the mailing of any notice of an annual or special meeting of the Company's Common Stockholders, a copy of such notice and all accompanying proxy solicitation material, together with the prescribed voting instruction form, shall be furnished to each Participant.

In the case of a tender offer, or other right or option with respect to Common Stock, a Participant who does not issue valid directions to the Trustee to sell, offer to sell, exchange or otherwise dispose of such Participant's Common Stock, shall be deemed to have directed the Trustee that shares of Common Stock allocated to his Participant Contribution Account, Company Matching Contribution Account, Employee Stock Account, and Rollover Account remain invested in the CEG Common Stock Fund. A Participant's instruction to tender shares of Common Stock invested in the CEG Common Stock Fund shall not constitute an Appropriate Request for a withdrawal or distribution pursuant to Articles VII and VIII, respectively. Any proceeds received as a result of the sale of Common Stock pursuant to a tender offer shall be credited to the Participant's accounts from which the tendered shares were taken and shall be reinvested in the CEG Common Stock Fund provided Common Stock is available for purchase and continues to be traded on a national securities exchange. In the event that, subsequent to any tender offer, Common Stock is no longer available and traded on a national securities exchange, Participants may elect to invest the proceeds received from the tendered Common Stock in one or more of the other available Investment Funds other than the CEG Common Stock Fund, by submitting an Appropriate Request to the Plan Administrator. Until such time that the Appropriate Request is received by the Plan Administrator, the proceeds received from the tendered Common Stock shall be invested in the Default Investment Fund.

11.5(b) Other Investment Funds

Each Participant shall have the right, and shall be afforded the opportunity (on the prescribed form), to instruct the Trustee how to vote (if applicable) the Other Investment Fund shares held in his Participant Contribution Account, Company Matching Contribution Account, Employee Stock Account, and Rollover Account. Shares of Other Investment Funds with respect to which no instructions are received shall be voted (if applicable) by the Company. At the time of the mailing of any notice of an annual or special meeting of any Other Investment Fund, a copy of such notice and all accompanying proxy solicitation material, together with the prescribed voting instruction form, shall be furnished by the Trustee to each Participant holding shares in the Other Investment Fund.

Article XII – Amendment, Termination, Mergers, or Consolidations

12.1 Amendment

The Plan may be amended, from time to time, by the Plan Administrator as shall be necessary or advisable in the interpretation, administration, or operation thereof or as required by law upon the advice of counsel. Further, the bonuses and incentives includable in Eligible Compensation in Appendix C may be amended by the Chief Executive Officer of the Company and the Chief Human Resources Officer of the Company, acting together. The Executive Group may make any amendment to the Plan that does not increase annual Plan liabilities by more than $1 million per amendment; the Company's Chief Executive Officer shall report all such amendments to the Board of Directors no less frequently than annually. The Chief Human Resources Officer may make any amendment to the Plan that does not increase the annual Plan liabilities materially, or as required by law upon the advice of counsel. In all other cases, the Plan may only be amended by resolution of the Board of Directors, who shall be entitled to delegate such authority. Under no circumstances shall the Plan be amended to cause any of the assets of the Investment Funds to be used for or be diverted to any purpose other than the exclusive benefit of Participants or their beneficiaries and defraying reasonable expenses of administering the Plan, or to cause the elimination or reduction of any Plan benefit as prohibited under the provisions of Code Section 411(d)(6). Furthermore, no amendment may retroactively reduce the rate at which a Participant shall make contributions to such Investment Funds, or, except as may be required to conform with future governmental regulations, adversely affect the rights of any Participant with respect to contributions made on his behalf prior to the date of such amendment.

12.2 Termination

The Plan may be terminated, in whole or in part, at any time, by resolution of the Board of Directors. The Trustee will thereafter be directed to liquidate the Investment Funds. Upon any termination of the Plan other than as provided in Section 13.9, all Participant Contribution Accounts, Company Matching Contribution Accounts, Employee Stock Accounts, Rollover Accounts, and dividends, if any, accumulated under the provisions of Section 8.5(b), shall be deemed to be matured, and distribution of the balances in such accounts shall be promptly made by the Trustee in accordance with direction from the Plan Administrator. In making such distribution, any and all determinations, divisions, appraisals, apportionments, and allotments so made shall be final and conclusive.

12.3 Merger or Consolidation

In the event of any merger or consolidation of the Plan with, or transfer of any assets or liabilities of the Plan to, any other plan, each Participant shall be entitled to receive a benefit immediately after such merger, consolidation, or transfer (computed as if such other plan had then terminated) which is equal to or greater than the benefit he would have been entitled to receive immediately before such merger, consolidation, or transfer (computed as if the Plan had then terminated).

Article XIII – General Provisions

13.1 Source of Payment

Benefits under the Plan shall be payable only out of the Investment Funds. The Company shall have no responsibility or liability (legal or otherwise) to make any payment of benefits under the Plan. No persons shall have any rights under the Plan with respect to such Investment Funds, or against the Plan Administrator (and his delegatees), the Company, any other Employer, the Board of Directors, the Executive Group, the Investment Committee, the Administrative Committee, or the Trustee, except as specifically provided for under the Plan.

13.2 Inalienability of Benefits

13.2(a) General

No benefit or interest available under the Plan will be subject to assignment, attachment, alienation, or other legal process, either voluntarily or involuntarily. Except as provided in Section 13.2(b), the preceding sentence will also apply to the creation, assignment, or recognition of a right to any benefit payable with respect to a Participant pursuant to a domestic relations order. Except as provided in Section 13.2(c), benefits under the Plan will be made available to and in the name of the person entitled to such benefits under the terms of the Plan, or to and in the name of such person's authorized representative. Payments to any financial institution to the credit of such person will constitute payments to and in the name of the person entitled to such payments under the terms of the Plan.

In addition, to the extent permitted by Code Section 401(a)(13), a Participant's benefits may be offset against an amount that the Participant is ordered or required to pay to this Plan pursuant to a judgment in a criminal action involving this Plan, a civil judgment in connection with a violation or alleged violation of Part 4 of Subtitle B of Title I of ERISA, or a settlement agreement between the Secretary of Labor and the Participant in connection with a violation or alleged violation of such Part. Furthermore, this Section 13.2(a) shall not preclude either (i) the enforcement of a Federal tax levy made pursuant to Code Section 6331, or (ii) the collection by the United Sates on a judgment resulting from an unpaid tax assessment, to the extent permitted under Code Section 401(a)(13) and the regulations thereunder.

13.2(b) Qualified Domestic Relations Orders

The anti-alienation provisions of Section 13.2(a) do not apply to qualified domestic relations orders, as the term is defined in Code Section 414(p), ERISA 206(d)(3) and any applicable regulations thereunder. The Plan Administrator has established and will maintain written procedures to determine the qualified status of domestic relations orders and to administer distributions under such qualified orders. Further, to the extent provided under a qualified domestic relations order, a former Spouse of a Participant shall be treated as the Spouse or surviving Spouse for all purposes under the Plan.

13.2(c) Miscellaneous Exceptions

The anti-alienation provisions of Section 13.2(a) do not apply to the payment of taxes to any governmental agency, to the extent such payment is authorized by the person entitled to such payment under the terms of the Plan, or is otherwise required by a law that is not preempted by the ERISA anti-alienation provisions.

13.3 Section 16 of the Securities Exchange Act of 1934

Each Participant who is subject to Section 16 of the Securities Exchange Act of 1934 and the rules and regulations promulgated thereunder shall, in effecting any transaction in the Plan, comply with all applicable provisions of such law, rules, and regulations in addition to the applicable Plan provisions.

13.4 Put Option Rights Applicable to Common Stock

Effective February 1, 2006, but only to the extent required under the applicable rules of Code section 4975(e)(7) with regard to an employee stock ownership plan of the type represented by the CEG Common Stock Fund, shares of Company Stock distributed to a Participant or Beneficiary with respect to the CEG Common Stock Fund (including a distribution that is a withdrawal) that at the time of the distribution, are not readily tradable on an established market within the meaning of Code section 409(h), as determined by the Plan Administrator, shall be subject to a put option which shall permit the Participant or Beneficiary to sell such stock to the Company at any time during two option periods, at the fair market value of such shares (as of the most recent valuation date). The first period shall be for at least 60 days beginning on the date of distribution. The second period shall be for at least 60 days beginning on the first valuation date in the calendar year following the year in which the distribution was made. The Plan Administrator may direct the Trustee to purchase shares tendered to the Company under a put option. Notwithstanding the foregoing, the period during which the put option is exercisable shall not include any time when the shares are determined by the Plan Administrator to be readily tradable, or when a Participant or Beneficiary is unable to exercise the put option because the Company is prohibited from honoring it, as determined by the Company's chief legal officer, by applicable federal or state laws, including for these purposes any insider trading policy adopted by the Company in furtherance of applicable federal or state laws. Payment for any shares of stock sold under a put option shall be made in a lump sum or in substantially equal annual installments over a period not exceeding five years, with interest payable at a reasonable rate (as determined by the Plan Administrator). For purposes of this Section, shares of Company Stock that are listed on a national securities exchange registered under Section 6 of the Securities Exchange Act of 1934 or that are quoted on a system sponsored by a national securities association registered under section 15A(b) of the Securities Exchange Act of 1934 shall not be treated as ceasing to be readily tradable for these purposes merely because the Participant or Beneficiary who receives a distribution of such shares (i) is subject to a stock ownership policy of the Company, (ii) would be subject to liability under Section 16(b) of the Securities Exchange Act of 1934 if the Participant or Beneficiary transferred such shares, or (iii) is subject to volume limitation or manner of sale requirements pursuant to Rule 144 under the Securities Act of 1933 with respect to transfers of such shares. Except as may be permitted under applicable law or regulations, the rights of a Distributee of Company Stock under this Section 13.4 shall survive the termination of the Plan and any amendment of the Plan. The Plan is not obligated to acquire securities from a Participant or Beneficiary at an indefinite time that is determined upon the happening of an event, such as the death of the Participant or Beneficiary.

13.5 Loss or Decline in Value

Neither the Plan Administrator, the Company, the Board of Directors, the Executive Group, the Investment Committee, the Administrative Committee, any officer or employee of any Employer, the Trustee, nor their delegatees, guarantees the assets of the Trust in any manner against loss or decline in value.

13.6 No Right to Employment

Nothing contained in this Plan shall be construed as a contract of employment between any Participating Employer and any Employee, or as a right of any Employee to continue in the employment of any Participating Employer or as a limitation of the right of any Participating Employer to discharge any Employee with or without cause.

13.7 Controlling Law

The Plan and its administration shall be governed by the laws of the State of Maryland, except to the extent preempted by Federal law.

13.8 Gender and Number

The masculine pronoun, when used herein, refers to both men and women, and words used in the singular are intended to include the plural, whenever appropriate.

13.9 Titles and Headings

Titles of Articles and headings to Sections in the Plan are placed herein solely for convenience of reference and, in any case of conflict, the text of the Plan, rather than such titles and headings, shall control.

13.10 Approvals and Effective Date

This Plan as amended and restated shall become effective, provisionally, on September 1, 2006, and shall be submitted to the Internal Revenue Service for its review and approval. The Company may make further amendments to this Plan which it deems necessary or advisable to achieve Internal Revenue Service approval. Upon such approval, the effectiveness of this Plan as amended and restated shall become final. If such approval is not forthcoming in a form satisfactory to the Company, this Plan as amended and restated shall be treated as null and void ab initio; and the Plan as previously approved by the Internal Revenue Service shall be deemed to have continued in operation in all respects and without change from that day forward.

****

IN WITNESS WHEREOF, this restatement and the appendices attached thereto, effective January 31, 2012, were duly executed on this ______ day of January, 2012.

____
Mary Lauria
Chief Human Resources Officer

APPENDIX A

DEFINITIONS

As used in the Plan, the following terms shall have the meaning set forth below, unless a different meaning is clearly required by the context in which the term is used.

1 "Administrative Committee" means the Adminstrative Committee consisting of members appointed from time to time by the Chief Executive Officer of the Company, or his delegate.

2 "After-Tax Option" (formerly known as the "Thrift Option") means the portion of the Plan under which an eligible Employee may contribute after-tax amounts to the Plan through payroll deduction.

3 "Appropriate Request" is a request by a Participant, in the written, electronic, telephonic, or other form and manner provided by the Plan Administrator that is appropriate for the intended purpose. To constitute an Appropriate Request, such request must be completed correctly and, if required to be in writing, duly executed and delivered to the Plan Administrator or his designated representative.

4 "Basic Contribution" means a Participant's contribution to the Plan through the After-Tax and/or Before-Tax Options in an amount up to six percent (6%) of the Participant's Eligible Compensation.

5 "Board of Directors" means the Board of Directors of the Company.

6 "Before-Tax Option" (formerly known as the "Deferred Compensation Option") means the portion of the Plan under which an eligible Employee may contribute pre-tax amounts to the Plan through payroll deduction.

7 "CEG Common Stock Fund" means the Investment Fund under the Plan composed of shares of Common Stock and any amounts allocated to the CEG Common Stock Fund but not yet invested in Common Stock. The CEG Common Stock Fund also includes the earnings on amounts not yet invested in Common Stock. The shares of Common Stock held by the CEG Common Stock Fund are purchased by the Trustee either in the open market or otherwise acquired.

8 “Closing Price” means the price as of the close of the New York Stock Exchange as determined by the Trustee based upon valuations provided by Investment Managers (as that term is defined in the Trust Agreement), trustee of group trusts, sponsors of Mutual Funds, records of securities exchanges or valuation services, market data providers or qualified appraisers.

9 “Code” means the Internal Revenue Code of 1986, as amended or replaced from time to time.

10 “Common Stock” means the Common Stock of the Company.

11 “Company” means Constellation Energy Group, Inc. and its successors and assigns.

12 “Company Matching Contribution Account” means an account established for each Participant into which Company Matching Contributions are made. A Company Matching Contribution Account is established for each Participant in the Default Investment Fund, the CEG Common Stock Fund and the Other Investment Funds pursuant to the Participant’s investment designations. Prior to January 1, 2012, it meant an account established for each Participant in the CEG Common Stock Fund, into which shares of Common Stock purchased or acquired by the Trustee with Company Matching Contributions, loan repayments, or dividends on shares of Common Stock already in such account are invested, or an account established for each Participant in the Default Investment Fund and the Other Investment Funds pursuant to the interfund transfer provisions as set forth in the Plan.

13 <u>“Company Matching Contributions”</u> means contributions made by the Company to the Plan in an amount equal to one-half (1/2) of each Participant’s Basic Contribution ($.50 for each $1.00).

14 <u>“Compensation”</u> as used throughout this Plan is intended to have the same meaning as under Code Section 414(s), and is limited to amounts earned while an Employee.

In addition to other applicable limitations set forth in the Plan, and notwithstanding any other provision of the Plan to the contrary, annual Compensation of each Employee taken into account for any Plan Year beginning after December 31, 2001 under the Plan shall not exceed $200,000, as adjusted for cost-of-living increases in accordance with Code Section 401(a)(17)(B). The cost-of-living adjustment in effect for a calendar year applies to annual compensation for such Plan Year.

Compensation shall also include any elective deferrals, within the meaning of Code Section 402(g)(3), of the Employer with respect to the Employee, and any amount which is contributed or deferred by the Employer at the election of the Employee and which is not includable in the gross income of the Employee by reasons of Code Sections 125 or 132(f)(4). A differential wage payment (as defined in Code Section 3401(h)(2)) shall not be included in the definition of Compensation.

15 <u>“Corporate Performance Award Program”</u> means the program established by the Company through which the Company made an annual contribution to the Employee Stock Account of each eligible Employee based on the attainment of certain annual performance goals established by the management of the Company. Corporate Performance Award Program contributions and earnings thereon are taxed to the Employee when distributed or withdrawn from the Plan. The Company ceased making Corporate Performance Award Program contributions to the Plan after 1992.

16 <u>“Default Investment Fund”</u> means the T. Rowe Price Retirement Fund dated nearest to the year of the Participant’s 65th birthday, or such other fund as may be designated by the Investment Committee.

17 <u>“Designating Authority”</u> means the Board of Directors or the Executive Group; provided, however, that (i) the Executive Group shall be a Designating Authority only if the designation of a Participating Employer does not increase annual Plan liabilities by more than $1 million, and (ii) the Company’s Chief Executive Officer shall report all designations of Participating Employers by the Executive Group to the Board of Directors no less frequently than annually.

18 <u>“Direct Rollover”</u> means a payment by the Plan to the Eligible Retirement Plan specified by the Distributee.

19 <u>“Distributee”</u> means an Employee or former Employee. In addition, the Employee’s or former Employee’s surviving Spouse (or a non-spouse beneficiary as described in Section 402(c)(11) of the Code) and the Employee’s or former Employee’s Spouse or former Spouse who is the alternate payee under a qualified domestic relations order, as defined in Section 414(p) of the Code, are Distributees with regard to the interest of the Spouse or former Spouse.

20 “<u>Effective Date</u>” means October 1, 2004.

21 <u>“Eligible Compensation”</u> means the base rate of pay paid by the Employer to an Employee for the Plan Year, before any reductions, but excluding overtime, and certain bonuses, incentives, or other forms of extra compensation. The bonuses and incentives to be included in Eligible Compensation are those forms of compensation enumerated in Appendix C attached hereto.

In addition to other applicable limitations set forth in the Plan, and notwithstanding any other provision of the Plan to the contrary, annual Compensation of each Employee taken into account for any Plan Year beginning after December 31, 2001 under the Plan shall not exceed $200,000, as adjusted for cost-of-living increases in accordance with Code Section 401(a)(17)(B). The cost of living adjustment in effect for a calendar year applies to annual compensation for such Plan Year.

22 “Eligible Retirement Plan” means an individual retirement account described in Section 408(a) of the Code, a Roth individual retirement account described in 408A(b) of the Code (subject to current Roth individual retirement account conversion rules), an individual retirement annuity described in Section 408(b) of the Code, an annuity plan described in Section 403(a) of the Code, an annuity contract described in Section 403(b) of the Code, an eligible plan under Section 457(b) of the Code which is maintained by a state, political subdivision of a state, or any agency or instrumentality of a state or political subdivision of a state and which agrees to separately account for amounts transferred into such plan from this Plan, or a qualified trust described in Section 401(a) of the Code, that accepts the Distributee’s Eligible Rollover Distribution. The definition of Eligible Retirement Plan shall also apply in the case of a distribution to a surviving Spouse, or to a Spouse or former Spouse who is the alternate payee under a qualified domestic relations order, as defined in Section 414(p) of the Code.

23 “Eligible Rollover Distribution” means any distribution from an Eligible Retirement Plan of all or any portion of the balance to the credit of a Distributee, except that an Eligible Rollover Distribution does not include: any distribution that is one of a series of substantially equal periodic payments (not less frequently than annually) made for the life (or life expectancy) of the Distributee or the joint lives (or joint life expectancies) of the Distributee and the Distributee’s designated beneficiary, or for a specified period of ten years or more; any distribution to the extent such distribution is required under Section 401(a)(9) of the Code; any amount that is distributed on account of hardship; and the portion of any distribution that is not includible in gross income unless specifically allowed under Section 3.3 (determined without regard to the exclusion for net unrealized appreciation with respect to employer securities).

24 “Employee” means any person who is employed by the Employer maintaining the Plan or any other Employer required to be aggregated with such Employer under Code Sections 414(b), (c), (m), or (o), but excludes any person who is paid and classified by the Employer as an independent contractor (regardless of whether such person is classified prospectively or retroactively by any court, governmental agency, or other authority as an employee under any federal, state, or local law, regulation, or rule for any income tax, wage withholding, wage and hour, or other purposes). Employee shall include a leased employee within the meaning of Code Sections 414(n)(2). Notwithstanding the foregoing, if leased employees are covered by a plan described in Code Section 414(n)(5) and such leased employees do not constitute more than 20% of the Employer’s Nonhighly Compensated Employee work force, the term “leased employee” shall not include such leased employees.

An Employee may be a Full-Time Employee or an On-Call Employee. A Full-Time Employee is any Employee employed on an ongoing and regular basis who has a basic workweek generally consisting of 40 hours, although Employees who work part-time on a regular and ongoing basis with a basic workweek of less than 40 hours are also considered to be Full-Time Employees. On-Call Employees constitute a reasonable classification of Employees who do not have a basic workweek, but rather work on an irregular, “on call” basis and do not participate in any “time off” or related benefit plans and are compensated only for those hours actually worked.

25 “Employee Stock Account” means an account established for each Participant in the CEG Common Stock Fund, into which shares of Common Stock purchased or acquired by the Trustee with Corporate Performance Award Program contributions, loan repayments, or with dividends on shares of Common Stock already in

such account are invested. The Employee Stock Account in the CEG Common Stock Fund is also comprised of amounts for an Employee or former Employee who elected to direct the transfer of the entire balance of his account in the Baltimore Gas and Electric Company Employee Stock Ownership Plan (ESOP) to this Plan upon termination of the ESOP. An Employee Stock Account is also established for each Participant in the Default Investment Fund and the Other Investment Funds pursuant to the interfund transfer provisions as set forth in the Plan.

26 "Employer" means the Company and any successor which shall maintain this Plan, and any subsidiaries or other affiliates required to be aggregated with the Company under Code Sections 414(b), (c), (m), or (o).

27 "ERISA" means the Employee Retirement Income Security Act of 1974, as amended from time to time, and the pertinent rules and regulations promulgated thereunder.

28 "Executive Group" means the Company's Chief Executive Officer, Chief Financial Officer, General Counsel, and Chief Human Resources Officer (or the positions succeeding to those functions), acting collectively.

29 "Full-Time Employee" – See definition of "Employee."

30 "Highly Compensated Employee", for purposes of the operation of the Plan, generally means an Employee who either received compensation greater than the amount prescribed in Code Section 414(q)(1) in the year preceding the current Plan Year (e.g., $90,000 for 2003 to determine who is a Highly Compensated Employee in 2004). As used in this definition, compensation means compensation under Code Section 414(q)(4) and the accompanying regulations.

As used below in describing a Highly Compensated Employee, the “determination year” is the Plan Year for which testing is performed, and the “look-back year” is the immediately preceding 12-month period. Highly Compensated Employees may include both active and former Highly Compensated Employees.

As provided under Code Section 414(q), an active Highly Compensated Employee includes any Employee who performed services for the Employer during the determination year and who is described in either paragraphs (a) or (b) below.

(a) Employees who at any time during the determination year or look-back year were 5-percent owners of the Employer, within the meaning of Code Section 414(q)(2).

(b) Employees who received compensation during the look-back year from the Employer in excess of $80,000 (as adjusted under Code Section 414(q)(1)).

A former Highly Compensated Employee includes any former Employee who separated from service (or was deemed to have separated) prior to the determination year, performs no service for the Employer during the determination year, and was an active Highly Compensated Employee for either the separation year or any determination year ending on or after the day the Employee reaches age fifty-five (55).

Unless otherwise specified, the term Highly Compensated Employee as used throughout the Plan shall refer to an active Highly Compensated Employee.

The determination of who is a Highly Compensated Employee will be made in accordance with Code Section 414(q) and the regulations thereunder.

31 “Hour(s) of Service” means: (1) each hour for which an Employee is directly or indirectly compensated or is entitled to receive Compensation from the Employer for the performance of duties during the applicable computation period; (2) each hour for which an Employee is directly or indirectly compensated or entitled to receive Compensation from the Employer (irrespective of whether the employment

relationship has terminated) for reasons other than performance of duties (such as vacation, holidays, sickness, jury duty, disability, lay-off, military duty, or leave of absence) during the applicable computation period; (3) each hour otherwise recognized under one or more of the medical or time-off fringe benefit plans maintained by the Employer; and (4) each hour for which back pay is awarded or agreed to by the Employer without regard to mitigation of damages. The same Hour of Service shall not be credited under (1), (2), or (3), as the case may be, and under (4).

Notwithstanding (2) above, no more than 501 Hours of Service are required to be credited to an Employee on account of any single continuous period during which the Employee performs no duties (whether or not such period occurs in a single computation period). An hour for which an Employee is directly or indirectly paid, or is entitled to payment on account of a period during which no duties are performed is not required to be credited to the Employee if such payment is made or due under a plan maintained solely for the purpose of complying with applicable worker's compensation, or unemployment compensation or disability insurance laws. An Hour of Service is not required to be credited for a payment which solely reimburses an Employee for medical or medically related expenses incurred by the Employee.

For purposes of (2) above, a payment shall be deemed to be made by or due from the Employer regardless of whether such payment is made by or due from the Employer directly, or indirectly through, among others, a trust fund, or insurer, to which the Employer contributes or pays premiums and regardless of whether contributions made or due to the trust fund, insurer, or other entity are for the benefit of particular Employees or are on behalf of a group of Employees.

An Hour of Service must be counted for the purpose of determining employment commencement date (or reemployment commencement date). The provisions of Department of Labor Regulations 2530.200b-2(b) and (c) are incorporated herein by reference.

32 Reserved.

33 “Investment Committee” means the Investment Committee consisting of members of senior management of the Company appointed from time to time by the Chief Executive Officer of the Company. The Investment Committee shall have the authority to delegate its duties and responsibilities hereunder in writing.

34 “Investment Fund(s)” means, dependent upon the context in which used, one or more of the following funds:

(1) CEG Common Stock Fund,

(2) Default Investment Fund, or

(3) any Other Investment Fund.

35 “Military Leave of Absence” means a leave of absence from an Employer for a period of “qualified military service” as defined under Code Section 414(u)(5).

36 “Mutual Fund” means any mutual fund selected by the Investment Committee as an Investment Fund (other than the CEG Common Stock Fund and the Default Investment Fund).

37 “Nonhighly Compensated Employee” means any Employee who is not a Highly Compensated Employee.

38 “On-Call Employee” – See definition of “Employee.”

39 “Other Investment Fund” means any Mutual Fund, common, collective, or master trust fund, or other pooled investment fund selected by the Investment Committee as an Investment Fund (other than the CEG Common Stock Fund and Default Investment Fund).

40 “Participant” means, except as provided in Articles VII, VIII, and IX, any eligible Employee who has completed the length-of-service requirements and become a member of the Plan under the provisions of Article II.

41 “Participant Contribution Account” means an account(s) established to receive contributions made by a Participant, or made by the Company on the Participant’s behalf, under the After-Tax and/or Before-Tax Options, and to which loan repayments and earnings on amounts held in the respective accounts are allocated. A Participant Contribution Account is established in one or more of the Investment Funds at the election of the Participant. Where the Participant Contribution Account is established in the CEG Common Stock Fund, shares of Common Stock are allocated to the account. The Common Stock allocated to the account is purchased by the Trustee with cash contributions and with dividends received on shares of Common Stock already in such account. Where a Participant Contribution Account is established in one of the other Investment Funds, cash contributions and earnings on amounts already in the Participant Contribution Account, are allocated to the Account. A Participant Contribution Account is also comprised of allocations of any cash contributed during a Payroll Period by the Participant, or by the Company on the Participant’s behalf, but not yet transferred to the Trustee.

42 “Participant Contributions” means a Participant’s Basic Contributions and Supplemental Contributions, as applicable.

43 “Participating Employer” means any Employer that has been designated as a Participating Employer by the Designating Authority, as set forth in Appendix E.

44 “Party in Interest” is an active Employee and any other person described as a party in interest under ERISA Section 3(14).

45 “Payroll Period” means the basic work period of an Employee, which (i) for Employees paid on a weekly basis consists of seven (7) twenty-four (24) hour days, Monday through Sunday, (ii) for Employees paid on a bi-weekly basis consists of fourteen (14) twenty-four (24) hour days, Monday through the second following Sunday, and (iii) for Employees paid on a monthly basis consists of the days of each calendar month.

46 “Plan” means the Constellation Energy Group, Inc. Employee Savings Plan.

47 “Plan Administrator” means the Director – Corporate Benefits of the Company (or the position succeeding to that function) appointed by the Board of Directors.

48 “Plan Year” means the Plan’s accounting year of twelve (12) months beginning on January 1 of each year and ending the following December 31.

49 “Qualified Nonelective Contributions” means the contributions, if any, made by the Company to the Plan in the Company’s sole discretion, provided that such contributions are:

(i) allocated uniformly on the basis of Compensation to the Participant Contribution Account of each Participant who is a Nonhighly Compensated Employee and is eligible to participate in the Before-Tax Option under the Plan; and

(ii) for all purposes under the Plan, except as provided in Section 7.6 with respect to hardship withdrawals, treated as amounts contributed under the Before-Tax Option.

50 “Rollover Account” means an account(s) established when a Participant transfers, in cash, all or a portion of an Eligible Rollover Distribution to the Plan in accordance with the rollover provisions of the Plan as set forth in Article III. A Rollover Account is established in one or more of the Investment Funds at the election of the Participant. Where the Rollover Account is established in the CEG Common Stock

Fund, shares of Common Stock are allocated to the Account. Such shares are purchased by the Trustee with the transferred cash and with dividends received on shares of Common Stock already in such Account. Where a Rollover Account is established in one of the other Investment Funds, transferred cash and earnings on amounts already in the Rollover Account, are allocated to the Account.

51 "Spouse" means a person of the opposite sex recognized as a Participant's spouse under Federal law on the determination date.

52 "Supplemental Contribution" means a Participant's contribution to the Plan through the After-Tax and/or Before-Tax Options in excess of the Participant's Basic Contributions.

53 "Total Account Balance" means, for purposes of determining the maximum loan available under the Plan, the total dollar value of the Participant's Plan accounts (except dividends, if any, accumulated under the provisions of Section 8.5) as of the date the Plan receives the Participant's executed loan agreement.

54 "Transaction Price" means the actual price, net of commissions, the Trustee receives or pays for Common Stock when the Trustee sells or buys Common Stock on the open market in order to satisfy Plan provisions relating to contributions, interfund transfers, withdrawals, distributions and loans.

55 "Treasury" means the federal Treasury Department.

56 "Trust" means the trust established under the provisions of Article XI of the Plan.

57 "Trust Agreement" means the agreement between the Company and the Trustee, under which the assets of the Plan are held and managed pursuant to Article XI of the Plan.

58 "Trustee" means T. Rowe Price Trust Company or any successor Trustee appointed by the Board of Directors.

APPENDIX B

CODE LIMITATIONS ON CONTRIBUTIONS TO THE PLAN

B-1 Dollar Limitation on Participants' Before-Tax Option Contributions – During any Plan Year, a Participant's contributions under the Before-Tax Option of the Plan, when combined with his elective deferrals within the meaning of Code Section 402(g)(3) under all other plans of the Employer and any other employer during the Plan Year, may not exceed the limitation of Code Section 402(g) (e.g., $13,000 in 2004). This dollar limitation will be adjusted annually at the same time and in the same manner as provided under Code Section 402(g)(5). To prevent the limitation from being exceeded in any Plan Year, the Plan Administrator may prospectively limit the rate of contribution which a Participant may elect to contribute under the Before-Tax Option. Participants whose Before-Tax Option contributions are limited by this Section B-1 are automatically treated as electing to increase their contributions under the After-Tax Option by an amount equal to the Participant's Before-Tax Option contribution percentage in excess of the limitation.

If due to an administrative error a Participant's contributions under the Before-Tax Option exceed the limitation of Code Section 402(g) as of the close of any Plan Year, the Participant will receive a distribution from the Plan of the amount constituting such excess Before-Tax Option contributions and any income or loss allocable thereto by no later than April 15th following the close of the Plan Year to which such excess deferrals relate.

If during the Plan Year in which such excess Before-Tax Option contributions occurred, or prior to March 1st following the close of such Plan Year, a Participant submits a written certification to the Plan Administrator stating that all or a portion of the Participant's contributions to the Plan under the Before-Tax Option constitute excess deferrals within the meaning of Code Section 402(g), the Participant will receive a distribution of such excess deferrals, which will be designated as such by the Company, and any income or loss allocable to such excess deferrals by no later than April 15th following the close of the Plan Year to which the excess deferrals relate.

To the extent any Company Matching Contributions were allocable to the Participant's account as a result of excess deferrals, such Company Matching Contributions and any income or loss allocable thereto will be forfeited and thereafter applied to reduce future Company contributions to the Plan.

Distributions of excess deferrals required under this Section B-1 shall be made first from Participant's Supplemental Contributions made under the Before-Tax Option and income or loss allocable thereto and, thereafter, from Participant's Basic Contributions made under the Before-Tax Option, and income or loss allocable thereto.

Income or loss allocable to excess deferrals for the Plan Year will be computed using either a reasonable method that meets the requirements of Treasury Regulation Section 1.402(g)-1(e)(5)(ii) or the fractional method under Treasury Regulation Section 1.402(g)-1(e)(5)(iii). For the purposes of clarity, the income or loss allocable to excess deferrals will not be calculated for the period after the close of the Plan Year in which the excess deferral occurred and prior to the distribution (i.e. the 'gap period').

For purposes of computing the Section B-2 limitations under Code Section 415(c), excess deferrals under Code Section 402(g) will be treated as contributions under the Before-Tax Option, unless a distribution of such excess deferrals and any income or loss allocable thereto is made no later than April 15th following the close of the Plan Year to which such excess deferrals relate. Excess deferrals under Code Section 402(g) will be treated as contributions under the Before-Tax Option for purposes of computing the Code Section 401(k) limitations as provided in Section B-4.1, but only for contributions on behalf of Highly Compensated Employees, even if such excess deferrals and any income or loss allocable thereto is distributed by April 15th following the close of the Plan Year to which such excess deferrals relate. Excess deferrals by Nonhighly Compensated Employees will not be taken into account.

It is the intent of the Plan that the limitations set forth above will conform to the limitations prescribed by Code Section 402(g). As of the date of any adjustment in the limitations prescribed by Code Section 402(g), the provisions of this Section B-1 will be deemed to have been amended to reflect such adjustment.

B-2 Limitation on Total Annual Additions

B-2.1 Maximum Annual Additions – The total annual additions to a Participant's account under this Plan and any and all other defined contribution plans of the Employer shall not in any limitation year exceed the lesser of the limitation in effect under Code Section 415(c)(1)(A) ($49,000 for 2009) as adjusted for cost of living increases pursuant to Code Section 415(d) or 100% of the Compensation as defined in Section 4.2(b) of the Plan actually paid or made available to the Participant during such limitation year. "Annual addition", for purposes of this Appendix B-2, means the sum of the following amounts allocated to the Participant's Plan accounts for the limitation year:

(a) Employer contributions,

(b) Employee contributions, and

(c) Forfeitures.

Amounts contributed by the Participant under the rollover provisions of the Plan are not considered to be annual additions to a Participant's account for purposes of determining the limitations under this Section. Catch-up contributions under Section 3.1(a) of the Plan and repayment of loans to Participants under Article IX of the Plan are not annual additions to a Participant's account for purposes of determining the limitations under this Section.

B-2.2 Elimination of Excess Annual Additions — To the extent necessary to prevent the limitation of this Section B-2 from being exceeded in any limitation year, the Plan Administrator may prospectively reduce contributions under the Plan during such limitation year. A Participant's prospective Supplemental Contributions under the After-Tax Option will be reduced first, followed in order by Supplemental Contributions under the Before-Tax Option, Basic Contributions under the After-Tax Option, and Basic Contributions under the Before-Tax Option until such reductions eliminate any excess annual additions.

B-2.3 Limitation Year — For purposes of applying the limitations of Code Section 415 to the Plan, the "limitation year" shall be the calendar year.

If the Employer maintains multiple defined contribution plans that are aggregated with the Plan for purposes of Code Section 415 pursuant to Appendix B-2.4 and that have different limitation years, the rules of Code Section 415(c) will be applied to the limitation year of the Plan, and are to be applied with respect to each limitation year of each other such plan. For each limitation year of the Plan, the requirements of Code Section 415 are applied to annual additions that are made for that time period with respect to the Participant under all such aggregated plans.

B-2.4 Aggregated Plans — The sum of the annual additions credited to a Participant's account in any limitation year for all of the qualified defined contribution plans of the Employer or a predecessor employer (as such term in used in Code Section 415(f) and the regulations thereunder), regardless of whether a plan is terminated, may not exceed the limitations of Code Section 415(c).

B-2.5 Incorporation by Reference — Notwithstanding anything contained in this Appendix B or Article IV of the Plan to the contrary, the limitations, adjustments, and other requirements prescribed in this Appendix B-2 shall at all times comply with the provisions of Code Section 415 and the regulations thereunder, the terms of which are specifically incorporated herein by reference. As of the date of any adjustment in the limitations prescribed by Code Section 415(c), the provisions of this Appendix B-2 will be deemed to have been amended to reflect such adjustment.

B-3 Reserved.

B-4 Limitation on Participant Contributions Under the Before-Tax Option (ADP Test)

B-4.1 Maximum Annual Contributions — For each Plan Year, annual Participant contributions under the Before-Tax Option shall satisfy one of the following actual deferral percentage (ADP) tests:

(1) The actual deferral percentage for the group of Highly Compensated Employees who are eligible to participate under the Before-Tax Option for the Plan Year shall not be more than 125 percent of the actual deferral percentage for the group of Nonhighly Compensated Employees who are eligible to participate under the Before-Tax Option for the Plan Year, or

(2) The excess of the actual deferral percentage for the group of Highly Compensated Employees who are eligible to participate under the Before-Tax Option for the Plan Year over the actual deferral percentage for the group of Nonhighly Compensated Employees who are eligible to participate under the Before-Tax Option for the Plan Year shall not be more than two (2) percentage points. Additionally, the actual deferral percentage for the group of Highly Compensated Employees who are eligible to participate under the Before-Tax Option for the Plan Year shall not exceed the actual deferral percentage for the group of Nonhighly Compensated Employees who are eligible to participate under the Before-Tax Option for the Plan Year, multiplied by two (2).

In determining whether the Plan satisfies the limitation under this Section B-4, all Before-Tax Option contributions and other elective deferrals, that are made to the Plan and any other plans of the Employer that are aggregated with the Plan for purposes of Code Section 401(a)(4) and 410(b) (other than Code Section 410(b)(2)(A)(ii)), are to be treated as made under a single plan. If the Plan and any other plans of the Employer are permissively aggregated for purposes of satisfying this limitation under Section B-4, the aggregated plans must also satisfy Code Sections 401(a)(4) and 410(b) as though they were a single plan.

For the purposes of this Section "actual deferral percentage" means, with respect to the group of Highly Compensated Employees who are eligible to participate under the Before-Tax Option and the group of Nonhighly Compensated Employees who are eligible to participate under the Before-Tax Option for the Plan Year, the average of the actual deferral ratios, calculated separately for each Employee who is eligible to participate under the Before-Tax Option for the Plan Year in each group.

The "actual deferral ratio" for each such Employee is equal to the annual Participant contributions under the Before-Tax Option and any "Qualified Nonelective Contribution" made on behalf of such Participant divided by the Participant's Compensation. For purposes of this Section, Compensation generally means an Employee's total Compensation for the Plan Year; however, Compensation does not include amounts related to any portion of the Plan Year in which an Employee was not eligible to participate in the Before-Tax Option of the Plan. The actual deferral ratio of a Highly Compensated Employee is determined by treating all plans of the Employer that are subject to Code Section 401(k) under which the Highly Compensated Employee is eligible to participate (other than those that may not be permissively aggregated) as a single plan.

The actual deferral ratio for each Employee who is eligible to participate under the Before-Tax Option and the actual deferral percentage for the Highly Compensated Employee group and the Nonhighly Compensated Employee group shall be calculated to the nearest one-hundredth of one percent.

B-4.2 Elimination of Excess Contributions – To prevent the limitation under this Section B-4 from being exceeded in any Plan Year, the Plan Administrator may prospectively limit the rate of contribution which a Highly Compensated Employee may elect to contribute under the Before-Tax Option.

The Plan Administrator will establish a maximum rate of contribution for Highly Compensated Employees to avoid exceeding the limits of this Section B-4.

The maximum rate of contribution for Highly Compensated Employees will be determined by first reducing by 1/10 of a percent the rate of contribution under the Before-Tax Option of the Highly Compensated Employees having the highest actual deferral ratio. The rate of contribution will be reduced until the ADP test is satisfied, or until the actual deferral ratio is reduced to the point where it equals the ratio of the Highly Compensated Employee with the next highest actual deferral ratio. This "leveling" process will be repeated until the ADP test is satisfied.

Highly Compensated Employee Participants whose Before-Tax Option contributions are prospectively limited by this Section B-4 are automatically treated as electing to increase their contributions under the After-Tax Option by an amount equal to the Participant's Before-Tax Option contribution percentage in excess of the limitation.

If, after the end of the Plan Year, it is determined that the limitation of this Section B-4 has been exceeded, the Plan Administrator may authorize the Trustee to distribute the excess contributions and the income or loss allocable thereto to the Highly Compensated Employees with the highest dollar deferral amounts. Excess contributions are determined by first determining how much the actual deferral ratio of the Highly Compensated Employee with the highest actual deferral ratio would have to be reduced to satisfy the ADP test or cause such ratio to equal the actual deferral ratio of the Highly Compensated Employee with the next highest ratio. Second, this process is repeated until the ADP test would be satisfied. The amount of excess contributions is equal to the sum of these hypothetical reductions multiplied by the Highly Compensated Employee's Compensation. Excess contributions shall be distributed or recharacterized as contributions under the After-Tax Option (each as set forth below), starting with the Highly Compensated Employee with the greatest dollar amount of contributions under the Before-Tax Option during the Plan Year until the amount of excess contributions has been accounted for. At the discretion of the Plan Administrator, the excess contributions may be distributed on or before March 15th following the end of the Plan Year for which the limitation of this Section B-4 is exceeded. With respect to the distribution of excess contributions, such distribution may be postponed, but not later than the close of the Plan Year following the Plan Year to which the contributions are allocable. To the extent any Company Matching Contributions were allocable to the Participant's account as a result of excess contributions, such Company Matching Contributions and income or loss allocable thereto will be forfeited and thereafter applied to reduce Company contributions to the Plan.

Distributions required under this Section B-4.2 shall be made first from Participants' Supplemental Contributions made under the Before-Tax Option and income or loss allocable thereto and, thereafter, from Participants' Basic Contributions made under the Before-Tax Option, and income or loss allocable thereto.

Income or loss allocable to excess contributions for the Plan Year will be computed using either a reasonable method that meets the requirements of Treasury Regulation Section 1.401(k)-2(b)(2)(iv)(B) or the fractional method under Treasury Regulation Section 1.401(k)-2(b)(2)(iv)(C). Income allocable to excess contributions shall be determined on a date that is no more than 7 days before such contributions are distributed.

In the event a distribution of excess contributions occurs, the Company will designate that the distribution is comprised of excess contributions and income or loss allocable thereto.

As an alternative to the distribution of amounts exceeding the limitation of this Section B-4.2 after the end of the Plan Year, the Plan Administrator may cause the excess contributions to be recharacterized first as "catch-up contributions" in accordance with, and subject to the limitations of, Section 414(v) of the Code to the extent that the Participant would otherwise be eligible to make such catch-up contributions under Section 3.1(a) of the Plan, and then as contributions under the After-Tax Option. The option to recharacterize excess contributions is provided at the sole discretion of the Plan Administrator.

The limitation set forth in this Section B-4 will be determined and the computation of any distribution or recharacterization of contributions required under this Section B-4.2 will be made after adjustments are made to contributions under the Before-Tax Option as necessary to avoid exceeding the Code Section 402(g) dollar limitations on contributions as provided in Section B-1.

It is the intent of the Plan that the limitations set forth in Section B-4.1 and the corrective measures set forth in Section B-4.2 will conform to the respective provisions of Code Section 401(k) and the accompanying regulations. As of the date of any adjustment in the limitations prescribed by Code Section 401(k), the provisions of this Section B-4 will be deemed to have been amended to reflect such adjustment.

B-5 Limitation on Participant Contributions Under the After-Tax Option and Company Matching Contributions (ACP Test)

B-5.1 Maximum Annual Contribution – For each Plan Year, the actual contribution percentage (ACP) for the group of Highly Compensated Employees who are eligible to participate through Payroll Deduction for the Plan Year shall not exceed the greater of:

(1) 125 percent of the actual contribution percentage for the group of Nonhighly Compensated Employees who are eligible to participate through Payroll Deduction for the Plan Year; or

(2) the lesser of (a) 200 percent of the actual contribution percentage for the group of Nonhighly Compensated Employees who are eligible to participate through Payroll Deduction for the Plan Year, or (b) the actual contribution percentage for the group of Nonhighly Compensated Employees who are eligible to participate through Payroll Deduction for the Plan Year plus two (2) percentage points.

In determining whether the Plan satisfies the limitation under this Section B-5, all employee and matching contributions that are made to the Plan and any other plans of the Employer that are aggregated with the Plan for purposes of Code Sections 401(a)(4) and 410(b) (other than Code Section 410(b)(2)(A)(ii)), are to be treated as made under a single plan. If the Plan and any other plans of the Employer are permissively aggregated for purposes of satisfying this limitation under Section B-5, the aggregated plans must also satisfy Code Sections 401(a)(4) and 410(b) as though they were a single plan.

For purposes of this Section, "actual contribution percentage" for a Plan Year means, with respect to the group of Highly Compensated Employees who are eligible to participate through the After-Tax and/or Before-Tax Options and the group of Nonhighly Compensated Employees who are eligible to participate through the After-Tax and/or Before-Tax Options for the Plan Year, the average of the actual contribution ratios, calculated separately for each Employee who is eligible to participate through the After-Tax and/or Before-Tax Options for the Plan Year in each group.

The "actual contribution ratio" for each such Employee is equal to the sum of their annual Participant contributions under the After-Tax Option and the Company Matching Contributions allocated to their accounts, divided by the Participant's Compensation. For purposes of this Section, Compensation generally means an Employee's total Compensation for the Plan Year; however, Compensation does not include amounts related to any portion of the Plan Year in which an Employee was not eligible to participate under the After-Tax Option of the Plan or to have Company Matching Contributions allocated to his account. The actual contribution ratio of a Highly Compensated Employee is determined by treating all plans of the Employer that are subject to Code Section 401(m) under which the Highly Compensated Employee is eligible to participate (other than those that may not be permissively aggregated) as a single plan.

The actual contribution ratio for each Employee who is eligible to participate through the After-Tax and/or Before-Tax Options and the actual contribution percentage for the Highly Compensated Employee group and the Nonhighly Compensated Employee group shall be calculated to the nearest one-hundredth of one percent.

To the extent provided by Treasury regulations, the Plan Administrator may elect to apply the limitation under this Section by including Employee elective deferrals under the Before-Tax Option.

B-5.2 Elimination of Excess Contributions – To prevent the limitation under this Section B-5 from being exceeded in any Plan Year, the Plan Administrator may prospectively limit the rate of contribution which a Highly Compensated Employee may elect to contribute under the After-Tax Option and, if necessary, may reduce amounts which would otherwise be contributed for a Highly Compensated Employee as a Company Matching Contribution.

The Plan Administrator will establish a maximum rate of contribution for Highly Compensated Employees to avoid exceeding the limits of this Section B-5.

The maximum rate of contribution for Highly Compensated Employees will be determined by first reducing by 1/10 of a percent the rate of contribution under the After-Tax Option, and any related Company Matching Contribution, of the Highly Compensated Employees having the highest actual contribution ratio. The rate of contribution will be reduced until the ACP test is satisfied, or until the actual contribution ratio is reduced to the point where it equals the ratio of the Highly Compensated Employee with the next highest actual contribution ratio. This "leveling" process will be repeated until the ACP test is satisfied.

Any After-Tax Option contributions resulting from the recharacterization of Before-Tax Option contributions under the provisions of Section B-4.2 are included in the computation of the actual contribution percentage and are subject to limitation under this Section B-5. If the After-Tax Option contributions of the Highly Compensated Employee with the highest average contribution ratio have been reduced to zero, and further reduction is necessary to avoid exceeding the limitation, then Company Matching Contributions relating to Before-Tax Option contributions will be reduced also.

Highly Compensated Employees whose After-Tax Option contributions are limited by this Section B-5, may elect to either prospectively increase their contributions under the Before-Tax Option or increase their cash compensation by an amount equal to the percentage of Eligible Compensation in excess of the limitation. If the Participant fails to make an election regarding such excess, the excess will be paid to the Participant as cash compensation. Any recharacterization elected by the Participant will be permitted only if it does not cause any other limitations described in Appendix B to be exceeded.

If, after the end of the Plan Year, it is determined that the limitation of this Section B-5 has been exceeded, the Plan Administrator may authorize the Trustee to distribute the excess aggregate contributions and income or loss allocable thereto to the Highly Compensated Employees with the highest dollar contribution amounts. Excess contributions are determined by first determining how much the actual contribution ratio of the Highly Compensated Employee with the highest actual contribution ratio would have to be reduced to satisfy the ACP test or cause such ratio to equal the actual contribution ratio of the Highly Compensated Employee with the next highest ratio. Second, this process is repeated until the ACP test would be satisfied. The amount of excess contributions is equal to the sum of these hypothetical reductions multiplied by the Highly Compensated Employee's Compensation. Excess contributions shall be distributed as set forth below, starting with the Highly Compensated Employee with the greatest dollar amount of contributions under the After-Tax Option during the Plan Year until the amount of excess contributions has been accounted for. At the discretion of the Plan Administrator, the excess aggregate contributions may be distributed on or before March 15th following the end of the Plan Year for which the limitation of this Section B-5 was exceeded. With respect to the distribution of excess aggregate contributions, such distribution may be postponed, but not later than the close of the Plan Year following the Plan Year to which the contributions are allocable.

Distributions required under this Section B-5.2 shall be made first from Participants' Supplemental Contributions made under the After-Tax Option and income or loss allocable thereto, and, thereafter, from Basic Contributions made under the After-Tax Option and income or loss allocable thereto, and Company Matching Contributions and income or loss allocable thereto.

Income or loss allocable to excess aggregate contributions for the Plan Year will be computed using either a reasonable method that meets the requirements of Treasury Regulation Section 1.401(m)-2(b)(2)(iv)(B) or the fractional method under Treasury Regulation Section 1.401(m)-2(b)(2)(iv)(C). Income allocable to excess aggregate contributions shall be determined on a date that is no more than 7 days before such contributions are distributed.

In the event a distribution of excess aggregate contributions occurs, the Company will designate that the distribution is comprised of excess aggregate contributions and income or loss allocable thereto.

The limitation of this Section B-5 will be determined and the computation of any distribution of contributions required under this Section B-5.2 will be made after adjustments are made to contributions under the Before-Tax Option as necessary to avoid exceeding Code Section 402(g) dollar limitations on contributions as provided in Section B-1 or the Code Section 401(k) limitations on contributions as provided in Section B-4.

It is the intent of the Plan that the limitations set forth in Section B-5.1 and the corrective measures set forth in Section B-5.2 will conform to the respective provisions of Code Section 40l(m) and the accompanying regulations. As of the date of any adjustment in the limitations prescribed by Code Section 40l(m), the provisions of this Section B-5 will be deemed to have been amended to reflect such adjustment.

B-6 Gap Period Income on Excess Contributions and Excess Aggregate Contributions — The Plan Administrator will not calculate and distribute allocable income for the gap period (*i.e.*, the period after the close of the Plan Year in which the excess contribution or excess aggregate contribution occurred and prior to the distribution). For purposes of this Appendix B-6, the term excess contribution is defined as in Code Section 401(k)(8)(B) and excess aggregate contribution is defined as in Code Section 401(m)(6)(B).

APPENDIX C

EMPLOYEE SAVINGS PLAN
BONUSES AND INCENTIVES
INCLUDABLE IN BASIC COMPENSATION
FOR PARTICIPATING EMPLOYERS

The base rate of pay in the calculation of Eligible Compensation paid by the Participating Employer to an Employee includes the following:

- NRC License Bonus
- Electrician License Bonus
- Plumber License Bonus
- Service Operators Bonus
- Outage Schedulers Bonus
- Fire and Safety Responder (FASER) Bonus

The following bonuses and/or incentive awards paid by the respective Participating Employers are includable in the calculation of Eligible Compensation for purposes of determining a Participant's After-Tax and Before-Tax Option contributions and Company Matching Contributions:

1. Annual Bonuses*
2. Annual Incentive Award (excluding Nine Mile Point Nuclear Station, LLC)*
3. Annual Performance Award*
4. Commission Payments
5. Contract Incentive Rate Award
6. Emergency Work Payment
7. Lump Sum Pay Adjustments
8. Piece Work Payment
9. Promotion Recognition Award
10. Reliability Award*
11. Results Incentive Award*
12. Sales Bonus

13. Sales Incentive Award

14. Scale Rate Payment

* Prior to January 1, 2004, each Participant employed by the applicable Participating Employer may elect to exclude the indicated bonus/award from Eligible Compensation, pursuant to an election which may be made available to all Employees of such Participating Employer at the Plan Administrator's discretion.

APPENDIX D

TOP HEAVY PROVISIONS

D-1 Purpose – If the Plan is or becomes top-heavy in any Plan Year, the following provisions will supersede any conflicting provisions in the Plan.

D-2 Definitions – As used in the Plan, the following terms shall have the meaning set forth below, unless a different meaning is clearly required by the context in which the term is used.

D-2.1 RESERVED

D-2.2 "Anniversary Date" means December 31, the last day of the Plan Year.

D-2.3 "Controlled Group" shall mean any group of corporations, partnerships or proprietorships which, together with the Company, are members of a Controlled Group within the meaning of Code Section 1563(a), determined without regard to Code Section 1563(a)(4) or (e)(3)(C) or would be a part of such a group if Code Section 1563(a) applied to partnerships or proprietorships.

D-2.4 "Key-Employee" shall mean any person who meets the requirements of Code Section 416(i), and the regulations promulgated thereunder, which are hereby incorporated by reference as if fully set out herein. For purposes of determining whether or not the Plan meets the requirements of Section D-3.2, the term Key-Employee shall also include the beneficiary of a Key-Employee.

D-2.5 "Permissive Aggregation Group" shall mean all plans in the Required Aggregation Group and any other Qualified Plan maintained by the Company or by any member of the Controlled Group or Affiliated Service Group, but only if such group of plans would satisfy, in the aggregate, the requirements of Code Sections 401(a)(4) and 410 and contributions or benefits in the other Qualified Plans are comparable to contributions or benefits in the plans of the Required Aggregation Group. The Plan Administrator shall determine which plan or plans shall be taken into account in determining the Permissive Aggregation Group.

D-2.6 "Qualified Plan" shall mean any plan which is qualified under Code Section 401(a).

D-2.7 "Required Aggregation Group" shall mean:

(a) Each Qualified Plan of the Company or any member of the Controlled Group or the Affiliated Service Group in which at least one (1) Key-Employee participates; and

(b) Any other Qualified Plan of the Company or any member of the Controlled Group or the Affiliated Service Group which enables a Plan described in Section D-2.7(a) to meet the requirements of Code Sections 401(a)(4) and 410.

D-2.8 "Top-Heavy Plan" shall mean the Plan, for any Plan Year in which the Plan meets the requirements of Section D-3.2.

D-3 Top-Heavy Plan Requirements and Determination

D-3.1 Top-Heavy Plan Requirements – For any Plan Year in which the Plan is determined to be a Top-Heavy Plan in accordance with Section D-3.2, the Plan shall be subject to the following:

(a) special vesting requirements of Code Section 416(b); and

(b) special minimum allocation requirements of Code Section 416(c).

D-3.2 Top-Heavy Plan Determination

(a) The Plan shall be considered a Top-Heavy Plan and shall be subject to the additional requirements of Section D-3.1, with respect to any Plan Year, if, as of the Anniversary Date of the preceding Plan Year (hereinafter referred to as the "determination date") either:

(i) the sum of the value of the aggregate accounts of Key-Employees exceeds sixty percent (60%) of a similar sum determined for all Participants (the "60% Test"); or

(ii) the Plan is part of a Required Aggregation Group, and the sum of the present value of accrued benefits and the value of the aggregate accounts of Key-Employees in all Plans in such group exceeds sixty percent (60%) of a similar sum determined for all Participants.

(b) For purposes of this Section D-3.2, the aggregate account of a Participant as of the determination date is the sum of:

(i) the Company Matching Contribution Account and Employee Stock Account of such Participant as of the determination date adjusted for any contributions due as of the determination date, and further adjusted by including any Plan distributions made during a (1) year period ending on the most recent determination date, except that in the case of any distribution made for a reason other than severance from employment, death, or disability, this provision shall be applied by substituting five (5) year period for (1) year period; and

(ii) the Participant Contribution Account of such Participant.

(c) For purposes of this Section D-3.2, present value of accrued benefits shall be determined, in the case of a defined benefit pension plan, under the provisions of such a plan or plans.

(d) Notwithstanding the provisions of subsection (a) hereinabove, the Plan shall not be a Top-Heavy Plan, if the Plan Administrator elects to treat the Plan as part of a Permissive Aggregation Group, and the Permissive Aggregation Group is not determined to be Top-Heavy using the criteria of the "60% Test" hereinabove.

(e) Only those plans in which the determination dates fall within the same calendar year shall be included in a Required or a Permissive Aggregation Group in order to determine whether the Plan is a Top-Heavy Plan.

(f) The account (and any accrued benefit) of an individual who has not performed services for the Employer at any time during the one (1) year period ending on the determination date shall not be taken into account for purposes of Section D-3.2.

D-4 Additional Top-Heavy Provisions – For purposes of determining whether or not the Plan meets the requirements of Section D-3.2, the term "Participant" as defined in Appendix A of the Plan shall also include the beneficiary of a Participant.

Notwithstanding the provisions in Section 3.2(a) regarding the rate of Company Matching Contributions, for any Plan Year in which the Plan, or any Permissive or Required Aggregation Group of which this Plan is a member, is a Top-Heavy Plan, the Company contributions to provide the minimum allocation or benefit requirement applicable to Top-Heavy Plans for allocation on behalf of any Participant who is not a Key-Employee and who is employed by the Company on the last day of the Plan Year will be provided under the Company's defined benefit pension plan. In the event the Company's defined benefit pension plan should be amended to not include the above minimum allocation or benefit requirement, then the minimum allocation or benefit will be provided under this Plan less any Company contribution that might be provided in any other Company defined contribution plan pursuant to Code Section 416(c).

APPENDIX E

PARTICIPATING EMPLOYERS

The following Employers are Participating Employers as of the corresponding effective dates:

Participating Employers	Employer Code	Participation Effective Date
(a) Baltimore Gas and Electric Company	001	July 1, 1978
(b) BGE Home Products & Services, LLC (formerly known as BGE Home Products & Services, Inc.)	006	July 1, 1994
(c) CER Generation, LLC	464	February 14, 2008
(d) CNE Gas Holdings, Inc. (formerly known as Fellon-McCord Associates, Inc.)	035	January 1, 2003
(e) Constellation Energy Commodities Group, Inc. (formerly known as Constellation Power Source, Inc.)	013	March 1, 1997
(f) Constellation Energy Group, Inc.	018	April 30, 1999
(g) Constellation Energy Projects and Services Group Advisors, LLC	603	March 28, 2011
(h) Constellation Energy Projects and Services Group, Inc. (formerly known as Constellation Energy Source, Inc.)	011	December 1, 1995
(i) Constellation NewEnergy, Inc.	034	September 1, 2002

Special Provisions:

- Under Section 3.3, Participants who are active employees of Constellation NewEnergy, Inc. on the date of the closing of the transaction contemplated in the Stock Purchase Agreement, may also roll over as part of a distribution from the AES Corporation Profit Sharing and Stock Ownership Plan ("DC Plan") notes evidencing such employee's DC Plan loans and the portion of such distribution that is not includable in gross income.

- Under Section 7.1(c), rollover of a distribution from the DC Plan for Participants who are active employees of Constellation NewEnergy, Inc. on the date of the closing of the transaction contemplated in the Stock Purchase Agreement mature immediately.

(j) Constellation Operating Services	023	April 1, 2003
(k) Constellation Power, Inc.	014	June 1, 1998
(l) Constellation Power Source Generation, Inc.	028	April 1, 2001
(m) COSI Sunnyside, Inc.	024	April 1, 2003

The following Employers were Participating Employers as of the corresponding effective dates, but are no longer:

Participating Employers	**Employer Code**	**Participation Effective Date**
(a) BGE Commercial Building Systems, Inc.	008	January 1, 1996 through October 31, 2003
(b) Constellation Investments, Inc.	012	January 1, 1997 through December 31, 1999
(c) Constellation Operating Services, Inc.	029	April 1, 2003 through October 1, 1999
(d) Constellation Power Source Holdings, Inc.	032	July 1, 2000
(e) Constellation Real Estate, Inc.	017	April 1, 2001 through December 31, 2003
(f) COSI Central Wayne, Inc. (Employees represented by a union under a collective bargaining agreement are not eligible to participate.)	021	April 1, 2003 through September 8, 2003
(g) COSI Puna, Inc.	022	April 1, 2003 through June 6, 2004
(h) COSI Synfuels, Inc.	025	April 1, 2003 through June 10, 2008

Exhibit 10.69

**FIRST AMENDMENT TO THE
CONSTELLATION ENERGY GROUP, INC.
EMPLOYEE SAVINGS PLAN**

(Amended and Restated Effective January 31, 2012)

WHEREAS, Exelon Corporation (the "Company") sponsors the Constellation Energy Group, Inc. Employee Savings Plan for (Amended and Restated Effective as of January 31, 2012) (the "Plan"), which is intended to meet the requirements of the provisions of the Internal Revenue Code of 1986, (as amended) (the "Code"); and

WHEREAS, the Company desires to amend the Plan in certain respects; and

WHEREAS, pursuant to Section 12.1 of the Plan the Chief Human Resources Officer may authorize any amendment to the Plan that does not increase Plan liabilities materially;

NOW, THEREFORE, BE IT RESOLVED, that the Plan is hereby amended as follows, effective January 1, 2012:

1. By adding a new paragraph at the end of Section 11.5(a) as follows:

   Notwithstanding the foregoing, with respect to a tender offer for the purchase or exchange of less than five percent (5%) of the outstanding shares of Common Stock, the Company shall direct the Trustee with respect to the sale, exchange or transfer of the shares of Common Stock held in the Trust Fund, and the Trustee shall follow the direction of the Company.

****

IN WITNESS WHEREOF, Exelon Corporation has caused this instrument to be executed by its Senior Vice President & Chief Human Resources Officer, on this _____ day of June, 2012.

EXELON CORPORATION

By: ______________________________

Senior Vice President &
Chief Human Resources Officer

Exhibit 10.70

SECOND AMENDMENT TO THE CONSTELLATION ENERGY GROUP, INC. EMPLOYEE SAVINGS PLAN

(Amended and Restated Effective January 31, 2012)

WHEREAS, Exelon Corporation (the "Company"), a Pennsylvania corporation, sponsors and maintain a qualified retirement plan for the benefit of employees of the Company and certain of its subsidiaries titled, "Constellation Energy Group, Inc. Employee Savings Plan" (the "Plan"), which has been amended and restated effective as of January 31, 2012;

WHEREAS, the Company has entered into that Agreement and Plan of Merger, dated as of April 28, 2011, by and among Exelon Corporation, Bolt Acquisition Corporation (the "Merger Sub") and Constellation Energy Group, Inc. ("Constellation") (the "Merger Agreement");

WHEREAS, pursuant to the Merger Agreement, the Merger Sub merged with and into Constellation and the separate existence of the Merger Sub ceased; Constellation merged with and into Exelon, and the separate existence of Constellation ceased; and Exelon continued as the surviving corporation; and

WHEREAS, the Company desires to amend the Plan to restrict participation in the Plan to individuals participating in the Plan immediately before the Effective Time (as such term is defined in the Merger Agreement) and to other eligible individuals who are initially employed on or after the Effective Time at a facility owned immediately before the Effective Time by: (i) the Constellation, or (ii) an affiliate that was an affiliate of Constellation immediately before the Effective Time; and

WHEREAS, the Company desires to amend the Plan in certain aspects to resemble more closely the Company's Employee Savings Plan, a profit sharing plan with a qualified cash or deferred arrangement, and to reflect the Company's administrative and fiduciary practices;

WHEREAS, pursuant to the January 24, 2012 resolutions of the Company Board of Directors, Company officers are authorized to take such actions and execute such documents, including amendments to the Constellation plan as deemed necessary to meet the goals set forth therein;

NOW, THEREFORE, BE IT RESOLVED, that the Plan is hereby amended as follows, effective as of the Effective Time, unless otherwise noted:

1. By replacing the word "CEG" with the word "Company" in the phrases "CEG Common Stock" and "CEG Common Stock Fund" in each instance that it appears.

2. By adding a sentence to the end of Section 1.1, as follows:

> Effective as of the Effective Time, shares of common stock of Constellation Energy Group, Inc. were converted to common shares of Exelon Corporation, pursuant to the Merger Agreement, at a conversion rate of .9300. Effective January 1, 2013, the Plan is designated as a "profit sharing plan" within the meaning of section 1.401-1(a)(2)(ii) of the Regulations; and is also designated as an ERISA section 404(c) Plan within the meaning of section 2550.404c-1 of the Regulations.

3. Effective January 1, 2013, by adding the phrase "and Profit Sharing Matching Contributions" after the phrase "Company Matching Contributions" in the third sentence of Section 1.2.

4. Effective January 1, 2013, by renaming Section 1.3(c) from "Company Matching Contributions" to "Employer Contributions" and adding a second paragraph to the end of the section, as follows:

In addition, and likewise subject to the limitations of Articles III and IV and Appendix B of the Plan, each Participant shall be eligible to receive a Profit Sharing Matching Contribution, provided that such Participant either (i) is an Employee on the last day of such Plan Year, (ii) is not employed on such day as a result of an approved unpaid leave of absence during such Plan Year, (iii) terminates employment during such Plan Year (1) after attaining age 50 and completing at least 10 years of service, as determined by the Plan Administrator, (2) as a result of circumstances entitling the Participant to separation benefits under an Employer's severance benefit plan, (3) as a result of a disability that entitles the Participant to benefits under an Employer's long-term disability plan, or (4) on account of the Participant's death. Participants shall be eligible for Matching Contributions beginning with any such contribution made in 2014 based on Plan Year 2013 performance in accordance with Section A-48(a).

5. By adding a new section 2.1(d), as follows:

2.1(d) Effect of Merger Agreement

If an Employee who was an Employee on or prior to the Effective Time transfers employment to or is reemployed by Exelon in a job classification with respect to which similarly situated employees of Exelon are not eligible to participate in the Plan but are instead eligible to participate in a Parent Benefit Plan (as such term is defined in the Merger Agreement) that is intended to be qualified under Section 401(a) or 401(k) of the Code (each such plan, an "Exelon Retirement Plan"), then such individual shall upon such transfer or reemployment remain a Participant in the Plan and shall not participate in the Exelon Retirement Plan. If a participant in an Exelon Retirement Plan who was a participant in such plan on or prior to the Effective Time transfers employment to or is reemployed by a Participating Employer in a job classification with respect to which similarly situated employees of such Participating Employer are not eligible to participate in such plan but are instead eligible to participate in the Plan, then such individual shall upon such transfer or reemployment remain a participant in the Exelon Retirement Plan and shall not participate in the Plan.

6. Effective January 1, 2013, by deleting and replacing the first sentence of Section 3.1(e) as follows:

> An authorized leave of absence shall not constitute a termination of employment, but shall, except as provided in Section 3.1(f), operate to suspend Participant contributions, related Company Matching Contributions, and Profit Sharing Matching Contributions (the latter as set forth in Section 1.3(c)).

7. Effective January 1, 2013, by adding a new sentence immediately before the last sentence in the first paragraph of Section 3.1, as follows:

> A Profit Sharing Matching Contribution will be made in accordance with Section 3.3.

8. Effective January 1, 2013, by adding a new Section 3.3, as follows, and re-numbering the subsequent sections:

> **3.3 Profit Sharing Matching Contributions**
>
> Beginning with any Profit Sharing Matching Contribution made in 2014 based on Plan Year 2013 performance in accordance with Section A-48(a) and subject to the limitations described in Article IV and Appendix B, the Company will contribute the Profit Sharing Matching Contribution to the Plan on behalf of each Participant at its discretion.
>
> Profit Sharing Matching Contributions will be made completely in cash and are invested in the Investment Funds designated by the Participant.

9. Effective 1/1/2012, by adding a sentence after the first sentence of current Section 3.3 (to be renumbered as Section 3.4), and correcting any cross-references to former section 3.3, as follows:

> A Participant who rolls over an Eligible Rollover Distribution from a qualified retirement plan, or on whose behalf a direct transfer is made, in conjunction with a corporate transaction shall also be permitted to rollover or transfer in-kind any promissory notes evidencing any loans under that plan, to the extent the agreement memorializing the transaction so provides.

10. By replacing the phrase “Investment Committee” with the phrase “Investment Office” in Sections 5.1(a)(3) and 13.1.

11. Effective January 1, 2013, reference to “Company Matching Contributions” and “Company Matching Contributions Account” shall be replaced by reference to “Employer Contributions” and “Employer Contribution Account” in Sections 4.1, 4.2(b), 4.2(d), 5.1(a), the heading and Paragraph 2 of 5.1(d), 5.2(b), 5.3(a), 6.2), 7.1(c), 7.3(c), 7,4, 8,2(b), 8.4(b), 8.4(c), 8.6, 9.5, 11.4, 11.5(a), 11.5(b), 12.2), Appendix B-1, Appendix B-4.2, Appendix B-5, Appendix C, Appendix D-3.2(b)(i), Appendix D-4

12. Effective January 1, 2013 by deleting “As with Company Matching Contributions,” from the last sentence of Section 5.1(e).

13. By deleting Sections 10.1, 10.2, 10.3, 10.4, 10.5, 10.7 and 10.8, and replacing them as follows, and re-numbering the remaining, subsequent sections:

Section 10.1 The Plan Administrator, the Investment Office and the Corporate Investment Committee.

10.1(a) The Plan Administrator

The Company, acting through its Director, Employee Benefit Plans & Programs, or such other person or committee appointed by the Chief Human Resources Officer from time to time (such director or other person or committee, the “Plan Administrator”), shall be the “administrator” of the Plan, within the meaning of such term as used in ERISA. In addition, the Plan Administrator shall be the “named fiduciary” of the Plan, within the meaning of such term as used in ERISA, solely with respect to administrative matters involving the Plan and not with respect to any investment of the Plan’s assets. The Plan Administrator shall have the following duties, responsibilities and rights:

(i) The Plan Administrator shall have the duty and discretionary authority to interpret and construe the Plan in regard to all questions of eligibility, the status and rights of Participants, distributees and other persons under the Plan, and the manner, time, and amount of payment of any distribution under the Plan. Benefits under the Plan shall be paid to a Participant or Beneficiary only if the Plan Administrator, in its discretion, determines that such person is entitled to benefits.

(ii) The Plan Administrator shall direct the Trustee to make payments of amounts to be distributed from the Trust under Article 8 (relating to withdrawals and distributions).

(iii) The Plan Administrator shall supervise the collection of Participants' contributions made pursuant to Article 5 (relating to Employee contributions) and the delivery of such contributions to the Trustee.

(iv) The Plan Administrator shall have all powers and responsibilities necessary to administer the Plan, except those powers that are specifically vested in the Investment Office, the Corporate Investment Committee or the Trustee.

(v) Each Employer shall, from time to time, upon request of the Plan Administrator, furnish to the Plan Administrator such data and information as the Plan Administrator shall require in the performance of its duties.

(vi) The Plan Administrator may require a Participant or Beneficiary to complete and file certain applications or forms approved by the Plan Administrator and to furnish such information requested by the Plan Administrator. The Plan Administrator and the Plan may rely upon all such information so furnished to the Plan Administrator.

(vii) The Plan Administrator shall be the Plan's agent for service of legal process and forward all necessary communications to the Trustee.

10.1(b) Removal of Plan Administrator

The Chief Human Resources Officer shall have the right at any time, with or without cause, to remove the Plan Administrator (including any member of a committee that constitutes the Plan Administrator). The Plan Administrator may resign and the resignation shall be effective upon delivery of the written resignation to the Chief Human Resources Officer or upon the Administrator's termination of employment with the Employers. Upon the resignation, removal or failure or inability for any reason of the Plan Administrator to act hereunder, the Chief Human Resources Officer shall appoint a successor. Any successor Plan Administrator shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor. None of the Company, any officer, employee or member of the board of directors of the Company who is not the Chief Human Resources Officer, nor any other person shall have any responsibility regarding the retention or removal of the Plan Administrator.

10.1(c) The Investment Office

The Investment Office, shall be the “named fiduciary” of the Plan, within the meaning of such term as used in ERISA, solely with respect to matters involving the investment of assets of the Plan and, any contrary provision of the Plan notwithstanding, in all events subject to the limitations contained in Sections 404(a)(2) and 404(c) of ERISA, the terms of the Plan, and all other applicable limitations. The Investment Office shall have the following duties, responsibilities and rights:

(i) The Investment Office shall be the “named fiduciary” for purposes of designating the investment funds under Section 6.2 and for purposes of appointing one or more investment managers as described in ERISA.

(ii) The Investment Office shall be solely responsible for all matters involving investment of the Employer Stock Fund described in Section 6.2 and no other person shall have any responsibility with respect to investment of such fund; provided, however, that effective June 21, 2012, the Investment Office has appointed an independent investment manager under section 3(38) of ERISA to manage the investment of the Common Stock in the Company Common Stock Fund and such investment manager (rather than the Investment Office) shall be solely responsible for any and all investment decisions relating thereto.

(iii) Each Employer shall, from time to time, upon request of the Investment Office, furnish to the Investment Office such data and information as the Investment Office shall require in the performance of its duties.

10.1(d) The Corporate Investment Committee

The Company acting through the Corporate Investment Committee shall be responsible for overall monitoring of the performance of the Investment Office. The Corporate Investment Committee and the Company’s Chief Investment Officer shall have the right at any time, with or without cause, to remove one or more employees of the Exelon Investment Office or to appoint another person or committee to act as Investment Office. Any successor Investment Office employee shall have all the rights, privileges and duties of the predecessor, but shall not be held accountable for the acts of the predecessor. The power and authority of the Corporate Investment Committee with respect to the Plan shall be limited solely to the monitoring and removal of the employees of the Investment Office and the Corporate Investment Committee shall have no other duties or responsibilities with respect to the Plan. None of the Company, any officer employee, or member of the board of directors who is not a member of the Corporate Investment Committee, nor any other person shall have any responsibility regarding the appointment or removal of the employees of Investment Office.

10.1(e) Status of Plan Administrator, the Investment Office and the Corporate Investment Committee

The Plan Administrator, any person acting as, or on behalf of, the Investment Office, and any member of the Corporate Investment Committee may, but need not, be an Employee, trustee or officer of an Employer and such status shall not disqualify such person from taking any action hereunder or render such person accountable for any distribution or other material advantage received by him or her under this Plan, provided that no Plan Administrator, person acting as, or on behalf of, the Investment Office, or any member of the Corporate Investment Committee who is a Participant shall take part in any action of the Plan Administrator or the Investment Office on any matter involving solely his or her rights under this Plan.

10.1(f) Notice to Trustee of Members

The Trustee shall be notified as to the names of the Plan Administrator and the person or persons authorized to act on behalf of the Investment Office.

10.1(g) Allocation of Responsibilities

Each of the Plan Administrator, the Investment Office and the Corporate Investment Committee may allocate their respective responsibilities and may designate any person, persons, partnership or corporation to carry out any of such responsibilities with respect to the Plan. Any such allocation or designation shall be reduced to writing and such writing shall be kept with the records of the Plan.

10.1(h) General Governance

The Corporate Investment Committee shall elect one of its members as chairman and appoint a secretary, who may or may not be a member of such Committee. All decisions of the Corporate Investment Committee shall be made by the majority, including actions taken by written consent. The Plan Administrator, the Investment Office and the Corporate Investment Committee may adopt such rules and procedures as it deems desirable for the conduct of its affairs, provided that any such rules and procedures shall be consistent with the provisions of the Plan.

10.1(i) Indemnification

The Employers hereby jointly and severally indemnify the Plan Administrator, the persons employed in the Exelon Investment Office, the members of the Corporate Investment Committee, the Chief Human Resources Officer, and the directors, officers and employees of the Employers and each of them, from the effects and consequences of their acts, omissions and conduct in their official capacity with respect to the Plan (including but not limited to judgments, attorney fees and costs with respect to any and all related claims, subject to the Company's notice of and right to direct any litigation, select any counsel or advisor, and approve any settlement), except to the extent that such effects and consequences result from their own willful misconduct. The foregoing indemnification shall be in addition to (and secondary to) such other rights such persons may enjoy as a matter of law or by reason of insurance coverage of any kind.

10.1(j) No Compensation

None of the Plan Administrator, any person employed in the Exelon Investment Office nor any member of the Corporate Investment Committee may receive any compensation or fee from the Plan for services as the Plan Administrator, the Investment Office or a member of the Corporate Investment Committee; provided, however that nothing contained herein shall preclude the Plan from reimbursing the Company or any Employer for compensation paid to any such person if such compensation constitutes “direct expenses” for purposes of ERISA. The Employers shall reimburse the Plan Administrator, the persons employed in the Exelon Investment Office and the members of the Corporate Investment Committee for any reasonable expenditures incurred in the discharge of their duties hereunder.

10.1(k) Employ of Counsel and Agents

The Plan Administrator, the Investment Office and the Corporate Investment Committee may employ such counsel (who may be counsel for an Employer) and agents and may arrange for such clerical and other services as each may require in carrying out its respective duties under the Plan.

10.2 Claims Procedure

Any Participant or distributee who believes he or she is entitled to benefits in an amount greater than those which he or she is receiving or has received may file a claim with the Plan Administrator. Such a claim shall be in writing and state the nature of the claim, the facts supporting the claim, the amount claimed, and the address of the claimant. The Plan Administrator shall review the claim and, unless special circumstances require an extension of time, within 90 days after receipt of the claim, give notice to the claimant, either in writing by registered or certified mail or in an electronic notification, of the Plan Administrator’s decision with respect to the claim. Any electronic notice delivered to the claimant shall comply with the standards imposed by applicable Regulations. If the Plan Administrator determines that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 90-day period and in no event shall such an extension exceed 90 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which the Plan Administrator expects to render the benefit determination. The notice of the decision of the Plan Administrator with respect to the claim shall be written in a manner calculated to be understood by the claimant and, if the claim is wholly or partially denied, the Plan Administrator shall notify the claimant of the adverse benefit determination and shall set forth the specific reasons for the adverse determination, the references to the specific Plan provisions on which the determination is based, a description of any additional material or information necessary for the claimant to perfect the claim, an explanation of why such material or information is necessary, and a description of the claim review procedure under the Plan and the time limits applicable to such procedures, including a statement of the claimant's right (subject to the limitations described in Sections 13.11 and 13.13) to bring a civil action under Section 502 of ERISA following an adverse benefit determination on review. The Plan Administrator shall also advise the claimant that the claimant or the claimant's duly authorized representative may request a review by the by the Vice President, Health & Benefits (or such other officer designated from time to time by the Chief Human Resources Officer) of the adverse benefit determination by filing with such officer, within 60 days after receipt of a notification of an adverse benefit determination, a written request for such review. The claimant shall be informed that, within the same 60-day period, he or she (a) may be provided, upon request and free of charge, reasonable access to, and copies of, all documents, records and other information relevant to the claimant's claim for benefits and (b) may submit to such officer written comments, documents, records and other information relating to the claim for benefits. If a request is so filed, review of the adverse benefit determination shall be made by such officer within, unless special circumstances require an extension of time, 60 days after receipt of such request, and the claimant shall be given written notice of the officer's final decision. If the reviewing officer determines that special circumstances require an extension of time for processing the claim, the claimant shall be so advised in writing within the initial 60-day period and in no event shall such an extension exceed 60 days. The extension notice shall indicate the special circumstances requiring an extension of time and the date by which the officer expects to render the determination on review. The review of the officer shall take into account all comments, documents, records and other information submitted by the claimant relating to the claim, without regard to whether such information was submitted or considered in the initial benefit determination. The notice of the final decision shall include specific reasons for the determination and references to the specific Plan provisions on which the determination is based and shall be written in a manner calculated to be understood by the claimant.

14. By deleting paragraph 1 of current Section 10.6 (now renumbered 10.3), and replacing it in its entirety as follows:

Except as provided below (relating to expenses of various investments), all costs and expenses incurred in administering the Plan and the Trust, including, but not limited to, "direct expenses" incurred in administering the Plan and the Trust (including compensation paid to any employee of an Employer or an Affiliate who is engaged in the administration of the Plan or the Trust), the expenses of the Plan Administrator and the Investment Office, the fees of counsel and any agents for the Plan Administrator and the Investment Office, the fees and expenses of the Trustee, the fees of counsel for the Trustee and other administrative expenses shall, to the extent permitted by law, be paid from the Trust Fund to the extent such expenses are not paid by the Participating Employers. Notwithstanding the foregoing, the Plan Administrator may authorize

Employer to pay any expenses, and Employer shall be reimbursed from the Trust Fund for such payments. The Plan Administrator, in its discretion, having regard to the nature of a particular expense, shall determine the portion of the expense that is to be borne by each Participating Employer.

16. By deleting paragraph 5 of Section 10.6 (now renumbered 10.3) and replacing it in its entirety as follows:

None of the Plan Administrator, any person employed in the Exelon Investment Office nor any member of the Corporate Investment Committee may receive any compensation or fee from the Plan for services as the Plan Administrator, the Investment Office or a member of the Corporate Investment Committee; provided, however that nothing contained herein shall preclude the Plan from reimbursing the Company or any Employer for compensation paid to any such person if such compensation constitutes “direct expenses” for purposes of ERISA. The Employers shall reimburse the Plan Administrator, the persons employed in the Exelon Investment Office and the members of the Corporate Investment Committee for any reasonable expenditures incurred in the discharge of their duties hereunder.

17. By deleting the first five sentences of Section 12.1, and replacing them as follows:

The Company may at any time and from time to time amend or modify the Plan by resolution of the Board of Directors of the Company or the Compensation Committee thereof; provided, however, that in the case of any amendment or modification that would not result in an aggregate annual cost to the Company of more than $50,000,000, the Plan may be amended or modified by action of the Chief Human Resources Officer (with the consent of the Chief Executive Officer in the case of a discretionary amendment or modification expected to result in an increase in annual expense or liability account balance exceeding $250,000) or another executive officer holding title of equivalent or greater responsibility.

18. By adding the following sentence to the end of Section 13.2(b), as follows:

A Participant who submits a qualified domestic relations order for certification may be charged an order processing fee, as determined from time to time by the Plan Administrator, which will be deducted from the Participant’s Plan account balance in the same manner set forth in Section 9.5.

19. By inserting new Sections 13.11, 13.12, and 13.13 as follows:

13.11 Statute of Limitations for Actions under the Plan

Except for actions to which the statute of limitations prescribed by Section 413 of ERISA applies, (a) no legal or equitable action relating to a claim for benefits under Section 502 of ERISA may be commenced later than one year after the claimant receives a final decision from the Company's Vice President, Health & Benefits (or such other officer designated from time to time by the Chief Human Resources Officer) in response to the claimant's request for review of the adverse benefit determination and (b) no other legal or equitable action involving the Plan may be commenced later than two years from the time the person bringing an action knew, or had reason to know, of the circumstances giving rise to the action. This provision shall not be interpreted to extend any otherwise applicable statute of limitations, nor to bar the Plan or its fiduciaries from recovering overpayments of benefits or other amounts incorrectly paid to any person under the Plan at any time or bringing any legal or equitable action against any party.

13.12 Forum for Legal Actions under the Plan.

Any legal action involving the Plan that is brought by any Participant, any Beneficiary or any other person shall be litigated in the federal courts located in the District of Maryland.

13.13 Legal Fees.

Any award of legal fees in connection with an action involving the Plan shall be calculated pursuant to a method that results in the lowest amount of fees being paid, which amount shall be no more than the amount that is reasonable. In no event shall legal fees be awarded for work related to (a) administrative proceedings under the Plan, (b) unsuccessful claims brought by a Participant, Beneficiary or any other person, or (c) actions that are not brought under ERISA. In calculating any award of legal fees, there shall be no enhancement for the risk of contingency, nonpayment or any other risk nor shall there be applied a contingency multiplier or any other multiplier. In any action brought by a Participant, Beneficiary or any other person against the Plan, the Administrator, the Investment Office, the Vice President, Health & Benefits, any Plan fiduciary, the Chief Human Resources Officer, the Company, its affiliates or their respective officers, directors, employees, or agents (the "Plan Parties"), legal fees of the Plan Parties in connection with such action shall be paid by the Participant, Beneficiary or other person bringing the action, unless the court specifically finds that there was a reasonable basis for the action.

20. By deleting the definition set forth in Section Appendix A-1, and labeling it "Reserved," and deleting references to the "Administrative Committee" from Sections 13.1 and 13.5.

21. By deleting the definition set forth in Section Appendix A-17, and labeling it "Reserved."

22. By adding a new Section Appendix A-14(a), immediately after Appendix A-14, as follows:

14(a) “Corporate Investment Committee” means the Company acting through the Committee consisting of the executives or other persons designated from time to time in the charter of such Committee.

23. By deleting the definition set forth Section Appendix A-28 and labeling it “Reserved,” all deleting all references to the “Executive Group.”

24. By adding a new section Appendix A-20(a), immediately after Appendix A-20, as follows:

20(a) “Effective Time” means the effective time of the transaction that is the subject of the Merger Agreement, as such term is defined in the Merger Agreement.

25. By adding a new section Appendix A-28(a), immediately after Appendix A-28, as follows:

28(a) “Exelon” means Exelon Corporation and any of its affiliates that was an affiliate immediately before the Effective Time.

26. By adding a new section Appendix A-34(a), immediately after Appendix A-34, as follows:

34(a) “Merger Agreement” means that Agreement and Plan of Merger, dated as of April 28, 2011, by and among Exelon Corporation, Bolt Acquisition Corporation and Constellation Energy Group, Inc.

27. By adding a sentence after the first sentence of section Appendix A-24, as follows:

Effective as of the Effective Time, Employee shall not include any person who was: (i) employed immediately prior to the Effective Time at Exelon or a facility owned immediately before the Effective Time by Exelon or (ii) initially employed on or after the Effective Time at a facility owned immediately before the Effective Time by Exelon.

28. By replacing section Appendix A-47 in its entirety as follows:

47 “Plan Administrator” means the Director, Employee Plans and Programs of Exelon (or the position succeeding to that function).

29. By deleting Section Appendix A-33 and replacing it with a new section Appendix A-33, as follows:

33 “Investment Office” mean the Company acting through the Exelon Investment Office.

30. By adding a new section Appendix A-14(a), as follows, and adding the word “Corporate” in front of the words “Investment Committee” in Sections 5.1(a)(3), 13.1 and 13.5:

14(a) “Corporate Investment Committee” means the Committee consisting of the executives or other persons designated from time to time in the charter of such Committee.

31. Effective January 1, 2013, by adding a new Section Appendix A-48(a), as follows:

48(a) “Profit Sharing Matching Contribution” means an amount (if any) determined by the Board of Directors of the Company (or the Compensation Committee thereof) in its sole discretion based on attainment of specified performance goals, and not exceeding one-half of each Participant’s Basic Contribution.

32. Effective January 1, 2013, by adding a new section Appendix A-26(a), as follows:

26(a) “Employer Contribution” means the aggregate of Company Matching Contributions and Profit Sharing Matching Contributions.

33. By adding a sentence to the end of the footnote in Appendix C as follows:

Effective on and after January 1, 2013, bonuses indicated by an asterisk (*) payable in 2014 and thereafter shall no longer be Eligible Compensation.

34. By amending Appendix E to add the following:

(n) Exelon Business Services Corporation [1]

(o) Exelon Generation Company, LLC[2]

1 For Employees who were Employees of Constellation Energy Group, Inc. immediately prior to the Effective Time.
2 For Employees who were Employees of Constellation Energy Group, Inc. immediately prior to the Effective Time.

****

IN WITNESS WHEREOF, Exelon Corporation has caused this instrument to be executed by its Senior Vice President, Human Resources, on this ____ day of December, 2012.

Pre-tax income from continuing operations after adjustment for income or loss from equity investees and capitalized interest plus fixed charges	5,381	5,255	4,894	3,145	4,401
Ratio of earnings to fixed charges	5.4	4.9	4.9	2.4	2.6

(a) Represents one-third of rental expense relating to operating leases, which is a reasonable approximation of the interest factor.

Exelon Corporation
Ratio of Earnings to Fixed Charges and Preferred Stock Dividends

	Years Ended December 31,				
	2009	2010	2011	2012	2013
Pre-tax income from continuing operations	4,418	4,221	3,952	1,798	2,773
Plus: Loss from equity investees	27	—	1	91	(10)
Less: Capitalized interest	(55)	(43)	(57)	(75)	(67)
Preference security dividend requirements	(7)	(7)	(6)	(26)	(32)
Pre-tax income from continuing operations after adjustment for income or loss from equity investees, capitalized interest and preference security dividend requirements	4,383	4,171	3,890	1,788	2,664
Fixed Charges:					
Interest expensed and capitalized, amortization of debt discount and premium on all indebtedness	761	836	761	1,021	1,436
Interest component of rental expense (a)	230	241	237	310	269
Preference security dividend requirements of consolidated subsidiaries	7	7	6	26	32
Total fixed charges	998	1,084	1,004	1,357	1,737
Pre-tax income from continuing operations after adjustment for income or loss from equity investees, capitalized interest and preference security dividend requirements plus fixed charges	5,381	5,255	4,894	3,145	4,401
Ratio of earnings to fixed charges and preferred stock dividends	5.4	4.8	4.9	2.3	2.5

Exhibit 12.2

Exelon Generation Company, LLC
Ratio of Earnings to Fixed Charges

	Years Ended December 31,				
	2009	2010	2011	2012	2013
Pre-tax income from continuing operations	3,555	3,150	2,827	1,058	1,675
Plus: (Income) or loss from equity investees	3	—	1	91	(10)
Less: Capitalized interest	(49)	(38)	(49)	(67)	(54)
Pre-tax income from continuing operations after adjustment for income or loss from equity investees and capitalized interest	3,509	3,112	2,779	1,082	1,611
Fixed Charges:					
Interest expensed and capitalized, amortization of debt discount and premium on all indebtedness	162	191	219	402	445
Interest component of rental expense (a)	212	222	220	291	248
Total fixed charges	374	413	439	693	693
Pre-tax income from continuing operations after adjustment for income or loss from equity investees and capitalized interest plus fixed charges	3,883	3,525	3,218	1,775	2,304
Ratio of earnings to combined fixed charges	10.4	8.5	7.3	2.6	3.3

(a) Represents one-third of rental expense relating to operating leases, which is a reasonable approximation of the interest factor.

Exhibit 12.3

Commonwealth Edison Company
Ratio of Earnings to Fixed Charges

	Years Ended December 31,				
	2009	2010	2011	2012	2013
Pre-tax income from continuing operations	602	693	666	618	401
Plus: Loss from equity investees	—	—	—	—	—
Less: Capitalized interest	(3)	(2)	(4)	(3)	(5)
Pre-tax income from continuing operations after adjustment for income or loss from equity investees and capitalized interest	599	691	662	615	396
Fixed Charges:					
Interest expensed and capitalized, amortization of debt discount and premium on all indebtedness (a)	301	368	330	297	575
Interest component of rental expense (b)	7	6	6	6	5
Total fixed charges	308	374	336	303	580
Pre-tax income from continuing operations after adjustment for income or loss from equity investees, capitalized interest plus fixed charges	907	1,065	998	918	976
Ratio of earnings to fixed charges	2.9	2.8	3.0	3.0	1.7

(a) Represents one-third of rental expense relating to operating leases, which is a reasonable approximation of the interest factor.

(b) Includes interest expense of $294 million for the year ended December 31, 2013, related to the remeasurement of the like-kind exchange tax position. See Note 14 — Income taxes of the Exelon Form 10-K for the year ended December 31, 2013, for additional information regarding the like-kind exchange tax position.

Exhibit 12.4

PECO Energy Company
Ratio of Earnings to Fixed Charges

	Years Ended December 31,				
	2009	2010	2011	2012	2013
Pre-tax income from continuing operations	499	476	535	508	557
Plus: Loss from equity investees	24	—	—	—	—
Less: Capitalized interest	(2)	(4)	(4)	(2)	(2)
Pre-tax income from continuing operations after adjustment for income or loss from equity investees and capitalized interest	521	472	531	506	555
Fixed Charges:					
Interest expensed and capitalized, amortization of debt discount and premium on all indebtedness	185	193	135	122	114
Interest component of rental expense (a)	9	10	9	9	7
Total fixed charges	194	203	144	131	121
Pre-tax income from continuing operations after adjustment for income or loss from equity investees and capitalized interest plus fixed charges	715	675	675	637	676
Ratio of earnings to combined fixed charges	3.7	3.3	4.7	4.9	5.6

(a) Represents one-third of rental expense relating to operating leases, which is a reasonable approximation of the interest factor.

PECO Energy Company
Ratio of Earnings to Fixed Charges and Preferred Stock Dividends

	Years Ended December 31,				
	2009	2010	2011	2012	2013
Pre-tax income from continuing operations	499	476	535	508	557
Plus: Loss from equity investees	24	—	—	—	—
Less: Capitalized interest	(2)	(4)	(4)	(2)	(2)
Preference security dividend requirements	(6)	(6)	(6)	(5)	(10)
Pre-tax income from continuing operations after adjustment for income or loss from equity investees, capitalized interest and preference security dividend requirements	515	466	525	501	545
Fixed Charges:					
Interest expensed and capitalized, amortization of debt discount and premium on all indebtedness	185	193	135	122	114
Interest component of rental expense (a)	9	10	9	9	7
Preference security dividend requirements	6	6	6	5	10
Total fixed charges	200	209	150	136	131
Pre-tax income from continuing operations after adjustment for income or loss from equity investees, capitalized interest and preference security dividend requirements plus fixed charges	715	675	675	637	676
Ratio of earnings to fixed charges and preferred stock dividends	3.6	3.2	4.5	4.6	5.2

(a) Represents one-third of rental expense relating to operating leases, which is a reasonable approximation of the interest factor.

Exhibit 12.5

BGE
Ratio of Earnings to Fixed Charges

	Years Ended December 31,				
	2009	2010	2011	2012	2013
Pre-tax income from continuing operations	155	244	211	11	344
Less: Capitalized interest	(4)	(6)	(7)	(5)	(6)
Pre-tax income from continuing operations after adjustment for income or loss from equity investees and capitalized interest	151	238	204	6	338
Fixed Charges:					
Interest expensed and capitalized, amortization of debt discount and premium on all indebtedness	148	137	136	149	127
Interest component of rental expense (a)	5	4	5	4	4
Total fixed charges	153	141	141	153	131
Pre-tax income from continuing operations after adjustment for income or loss from equity investees, capitalized interest and preference security dividend requirements plus fixed charges	304	379	345	159	469
Ratio of earnings to fixed charges	2.0	2.7	2.4	1.0	3.6

(a) Represents one-third of rental expense relating to operating leases, which is a reasonable approximation of the interest factor.

BGE
Ratio of Earnings to Fixed Charges and Preference Stock Dividends

	Years Ended December 31,				
	2009	2010	2011	2012	2013
Pre-tax income from continuing operations	155	244	211	11	344
Less: Capitalized interest	(4)	(6)	(7)	(5)	(6)
Preference security dividend requirements	(22)	(20)	(20)	(20)	(21)
Pre-tax income from continuing operations after adjustment for income or loss from equity investees and capitalized interest	129	218	184	(14)	317
Fixed Charges:					
Interest expensed and capitalized, amortization of debt discount and premium on all indebtedness	148	137	136	149	127
Interest component of rental expense (a)	5	4	5	4	4
Preference security dividend requirements	22	20	20	20	21
Total fixed charges	175	161	161	173	152
Pre-tax income from continuing operations after adjustment for income or loss from equity investees, capitalized interest and preference security dividend requirements plus fixed charges	304	379	345	159	469
Ratio of earnings to fixed charges and preferred stock dividends	1.7	2.4	2.1	0.9(b)	3.1

(a) Represents one-third of rental expense relating to operating leases, which is a reasonable approximation of the interest factor.
(b) The ratio coverage was less than 1:1. The registrant must generate additional earnings of $14 million to achieve a coverage ratio of 1:1.

Exhibit 31-1

CERTIFICATION PURSUANT TO RULE 13a-14(a) AND 15d-14(a) OF THE SECURITIES AND EXCHANGE ACT OF 1934

I, Christopher M. Crane, certify that:

1. I have reviewed this annual report on Form 10-K of Exelon Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and
5. The registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

1. I have reviewed this annual report on Form 10-K of Baltimore Gas and Electric Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO RULE 13a-14(a) AND 15d-14(a) OF THE SECURITIES AND EXCHANGE ACT OF 1934

I, Carim V. Khouzami, certify that:

1. I have reviewed this annual report on Form 10-K of Baltimore Gas and Electric Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2013

Commission File Number	Exact Name of Registrant as Specified in its Charter, State or Other Jurisdiction of Incorporation, Address of Principal Executive Offices, Zip Code and Telephone Number (Including Area Code)	I.R.S. Employer Identification Number
001-31403	**PEPCO HOLDINGS, INC.** (Pepco Holdings or PHI), a Delaware corporation 701 Ninth Street, N.W. Washington, D.C. 20068 Telephone: (202)872-2000	52-2297449
001-01072	**POTOMAC ELECTRIC POWER COMPANY** (Pepco), a District of Columbia and Virginia corporation 701 Ninth Street, N.W. Washington, D.C. 20068 Telephone: (202)872-2000	53-0127880
001-01405	**DELMARVA POWER & LIGHT COMPANY** (DPL), a Delaware and Virginia corporation 500 North Wakefield Drive, 2nd Floor Newark, DE 19702 Telephone: (202)872-2000	51-0084283
001-03559	**ATLANTIC CITY ELECTRIC COMPANY** (ACE), a New Jersey corporation 500 North Wakefield Drive, 2nd Floor Newark, DE 19702 Telephone: (202)872-2000	21-0398280

Securities registered pursuant to Section 12(b) of the Act:

Registrant	Title of Each Class	Name of Each Exchange on Which Registered
Pepco Holdings	**Common Stock, $.01 par value**	**New York Stock Exchange**

Securities registered pursuant to Section 12(g) of the Act:

Registrant	Title of Each Class
Pepco	**Common Stock, $.01 par value**
DPL	**Common Stock, $2.25 par value**
ACE	**Common Stock, $3.00 par value**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Pepco Holdings	Yes ☒ No ☐	Pepco	Yes ☐ No ☒
DPL	Yes ☐ No ☒	ACE	Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Pepco Holdings	Yes ☐ No ☒	Pepco	Yes ☐ No ☒
DPL	Yes ☐ No ☒	ACE	Yes ☐ No ☒

Indicate by check mark whether each registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months and (2) has been subject to such filing requirements for the past 90 days.

Pepco Holdings	Yes ☒ No ☐	Pepco	Yes ☒ No ☐
DPL	Yes ☒ No ☐	ACE	Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Pepco Holdings	Yes ☒ No ☐	Pepco	Yes ☒ No ☐
DPL	Yes ☒ No ☐	ACE	Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K (applicable to Pepco Holdings only). ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Pepco Holdings	Yes ☐ No ☒	Pepco	Yes ☐ No ☒
DPL	Yes ☐ No ☒	ACE	Yes ☐ No ☒

Pepco, DPL, and ACE meet the conditions set forth in General Instruction I(1)(a) and (b) of Form 10-K and are therefore filing this Form 10-K with the reduced disclosure format specified in General Instruction I(2) of Form 10-K.

Registrant	Aggregate Market Value of Voting and Non-Voting Common Equity Held by Non-Affiliates of the Registrant at June 28, 2013	Number of Shares of Common Stock of the Registrant Outstanding at February 14, 2014
Pepco Holdings	$ 5,010.3 million (a)	250,517,109 ($.01 par value)
Pepco	None (b)	100 ($.01 par value)
DPL	None (c)	1,000 ($2.25 par value)
ACE	None (c)	8,546,017 ($3.00 par value)

(a) Solely for purposes of calculating this aggregate market value, PHI has defined its affiliates to include (i) those persons who were, as of June 28, 2013, its executive officers, directors and beneficial owners of more than 10% of its common stock, and (ii) such other persons who were deemed, as of June 28, 2013, to be controlled by, or under common control with, PHI or any of the persons described in clause (i) above.
(b) All voting and non-voting common equity is owned by Pepco Holdings.
(c) All voting and non-voting common equity is owned by Conectiv, LLC, a wholly owned subsidiary of Pepco Holdings.

THIS COMBINED FORM 10-K IS SEPARATELY FILED BY PEPCO HOLDINGS, PEPCO, DPL AND ACE. INFORMATION CONTAINED HEREIN RELATING TO ANY INDIVIDUAL REGISTRANT IS FILED BY SUCH REGISTRANT ON ITS OWN BEHALF. EACH REGISTRANT MAKES NO REPRESENTATION AS TO INFORMATION RELATING TO THE OTHER REGISTRANTS.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Pepco Holdings, Inc. definitive proxy statement for the 2014 Annual Meeting of Stockholders to be filed with the Securities and Exchange Commission within 120 days after December 31, 2013 are incorporated by reference into Part III of this report.

TABLE OF CONTENTS

GLOSSARY OF TERMS

The following is a glossary of terms, abbreviations and acronyms that are used in the Reporting Companies' SEC reports. The terms, abbreviations and acronyms used have the meanings set forth below, unless the context requires otherwise.

Term	Definition
2012 LTIP	Pepco Holdings, Inc. 2012 Long-Term Incentive Plan
ACE	Atlantic City Electric Company
ACE Funding	Atlantic City Electric Transition Funding LLC
AFUDC	Allowance for funds used during construction
AOCL	Accumulated Other Comprehensive Loss
AMI	Advanced metering infrastructure, a system that collects, measures and analyzes energy usage data from advanced digital electric and gas meters known as smart meters
ASC	Accounting Standards Codification
BGE	Baltimore Gas and Electric Company
BGS	Basic Generation Service (the supply of electricity by ACE to retail customers in New Jersey who have not elected to purchase electricity from a competitive supplier)
Bondable Transition Property	Principal and interest payments on the Transition Bonds and related taxes, expenses and fees
BSA	Bill Stabilization Adjustment
Budget Support Act	The Fiscal Year 2012 Budget Support Act of 2011, approved by the Council of the District of Columbia on June 14, 2011
CAA	Federal Clean Air Act
Calpine	Calpine Corporation
CERCLA	Comprehensive Environmental Response, Compensation, and Liability Act of 1980
Conectiv	Conectiv, LLC, a wholly owned subsidiary of PHI and the parent of DPL and ACE
Conectiv Energy	Subsidiaries of Conectiv Energy Holding Company, a disposition plan for which was approved by PHI's Board of Directors in April 2010 and has been completed
CRMC	PHI's Corporate Risk Management Committee
CTA	Consolidated tax adjustment
CWIP	Construction work in progress
DC Undergrounding Task Force	The District of Columbia Mayor's Power Line Undergrounding Task Force
DCPSC	District of Columbia Public Service Commission
DDOE	District of Columbia Department of the Environment
Default Electricity Supply	The supply of electricity by PHI's electric utility subsidiaries at regulated rates to retail customers who do not elect to purchase electricity from a competitive supplier, and which, depending on the jurisdiction, is also known as Standard Offer Service or BGS
DPL	Delmarva Power & Light Company
DEDA	Delaware Economic Development Authority
DEMEC	Delaware Municipal Electric Corporation, Inc.
DOE	U.S. Department of Energy
DPSC	Delaware Public Service Commission
DRP	Direct Stock Purchase and Dividend Reinvestment Plan
EBITDA	Earnings before interest, taxes, depreciation, and amortization
EDC	Electricity Distribution Company
EmPower Maryland	A Maryland demand-side management program for Pepco and DPL
EPA	U.S. Environmental Protection Agency
Exchange Act	Securities Exchange Act of 1934, as amended
FASB	Financial Accounting Standards Board
FERC	Federal Energy Regulatory Commission

Term	Definition
FLRP	Forward Looking Rate Plan
FPA	Federal Power Act
GAAP	Accounting principles generally accepted in the United States of America
GCR	Gas Cost Rate
GenOn	GenOn MD Ash Management, LLC
GWh	Gigawatt hour
HPS	Hourly Priced Service
IMU	Interface management unit
IRS	Internal Revenue Service
ISDA	International Swaps and Derivatives Association Master Agreement
ISRA	Industrial Site Recovery Act
LIBOR	London Interbank Offered Rate
LTIP	Pepco Holdings, Inc. Long-Term Incentive Plan
MAPP	Mid-Atlantic Power Pathway
Mcf	Thousand Cubic Feet
MDC	MDC Industries, Inc.
Medicare Act	Medicare Prescription Drug Improvement and Modernization Act of 2003
Medicare Part D	A prescription drug benefit under the Medicare Act
MFVRD	Modified fixed variable rate design
MMBtu	One Million British Thermal Units
MPSC	Maryland Public Service Commission
MW	Megawatt
MWh	Megawatt hour
NAV	Net Asset Value
NERC	North American Electric Reliability Corporation
New Jersey Societal Benefit Charge	A surcharge related to the New Jersey Societal Benefit Program
New Jersey Societal Benefit Program	A New Jersey public interest program for low income customers
NJ SOCA Law	The New Jersey law under which the SOCAs were established
NJBPU	New Jersey Board of Public Utilities
NPCC	Northeast Power Coordinating Council
NPDES	National Pollutant Discharge Elimination System
NUGs	Non-utility generators
NYMEX	New York Mercantile Exchange
OPC	Office of People's Counsel
OPEB	Other postretirement benefit
PCI	Potomac Capital Investment Corporation and its subsidiaries
Pepco	Potomac Electric Power Company
Pepco Energy Services	Pepco Energy Services, Inc. and its subsidiaries
Pepco Holdings or PHI	Pepco Holdings, Inc.
PHI OPEB Plan	The Pepco Holdings, Inc. Welfare Plan for Retirees
PJM	PJM Interconnection, LLC
PJM RTO	PJM regional transmission organization
Power Delivery	The transmission, distribution and default supply of electricity and, to a lesser extent, the distribution and supply of natural gas, conducted through Pepco, DPL and ACE, PHI's regulated public utility subsidiaries
PPA	Power purchase agreement
PRP	Potentially responsible party
PUHCA 2005	Public Utility Holding Company Act of 2005

Term	Definition
RECs	Renewable energy credits
Regulated T&D Electric Revenue	Revenue from the transmission and the distribution of electricity to PHI's customers within its service territories at regulated rates
Regulatory Asset Recovery Charge	Costs associated with deferred, NJBPU-approved expenses incurred as part of ACE's obligation to serve the public
Reporting Company	PHI, Pepco, DPL or ACE
Revenue Decoupling Adjustment	An adjustment equal to the amount by which revenue from distribution sales differs from the revenue that Pepco and DPL are entitled to earn based on the approved distribution charge per customer
RFC	Reliability*First* Corporation
RI/FS	Remedial investigation and feasibility study
ROE	Return on equity
RPS	Renewable Energy Portfolio Standards
Sarbanes-Oxley Act	Sarbanes-Oxley Act of 2002
SEC	Securities and Exchange Commission
SOCA	Standard Offer Capacity Agreement required to be entered into by ACE pursuant to the NJ SOCA Law
SOS	Standard Offer Service, how Default Electricity Supply is referred to in Delaware, the District of Columbia and Maryland
SPCC	Spill Prevention, Control, and Countermeasure plans, required pursuant to federal regulations requiring plans for facilities using oil-containing equipment in proximity to surface waters
SRECs	Solar renewable energy credits
T&D	Transmission and distribution
TEFA	Transitional Energy Facility Assessment, a New Jersey tax surcharge providing a gradual transition from the previous franchise and gross receipts tax eliminated in 1997, to its new total liability under the corporation business tax and the sales-and-use tax (this surcharge was eliminated in 2013)
Transition Bond Charge	Revenue ACE receives, and pays to ACE Funding, to fund the principal and interest payments on Transition Bonds and related taxes, expenses and fees
Transition Bonds	Transition Bonds issued by ACE Funding
USCG	U.S. Coast Guard
VRDBs	Variable Rate Demand Bonds
WACC	Weighted average cost of capital

FORWARD-LOOKING STATEMENTS

Some of the statements contained in this Annual Report on Form 10-K with respect to Pepco Holdings, Inc. (PHI or Pepco Holdings), Potomac Electric Power Company (Pepco), Delmarva Power & Light Company (DPL) and Atlantic City Electric Company (ACE), including each of their respective subsidiaries, are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), and Section 27A of the Securities Act of 1933, as amended, and are subject to the safe harbor created thereby under the Private Securities Litigation Reform Act of 1995. These statements include declarations regarding the intents, beliefs, estimates and current expectations of one or more of PHI, Pepco, DPL or ACE (each, a Reporting Company) or their subsidiaries. In some cases, you can identify forward-looking statements by terminology such as "may," "might," "will," "should," "could," "expects," "intends," "assumes," "seeks to," "plans," "anticipates," "believes," "projects," "estimates," "predicts," "potential," "future," "goal," "objective," or "continue" or the negative of such terms or other variations thereof or comparable terminology, or by discussions of strategy that involve risks and uncertainties. Forward-looking statements involve estimates, assumptions, known and unknown risks, uncertainties and other factors that may cause one or more Reporting Companies' or their subsidiaries' actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Therefore, forward-looking statements are not guarantees or assurances of future performance, and actual results could differ materially from those indicated by the forward-looking statements.

The forward-looking statements contained herein are qualified in their entirety by reference to the following important factors, which are difficult to predict, contain uncertainties, are beyond each Reporting Company's or its subsidiaries' control and may cause actual results to differ materially from those contained in forward-looking statements:

- Changes in governmental policies and regulatory actions affecting the energy industry or one or more of the Reporting Companies specifically, including allowed rates of return, industry and rate structure, acquisition and disposal of assets and facilities, operation and construction of transmission and distribution facilities and the recovery of purchased power expenses;
- The outcome of pending and future rate cases and other regulatory proceedings, including (i) challenges to the base return on equity (ROE) and the application of the formula rate process previously established by the Federal Energy Regulatory Commission (FERC) for transmission services provided by Pepco, DPL and ACE; (ii) challenges to DPL's 2011, 2012 and 2013 annual FERC formula rate updates; and (iii) other possible disallowances of recovery of costs and expenses or delays in the recovery of such costs;
- The resolution of outstanding tax matters with the Internal Revenue Service (IRS), and the funding of any additional taxes, interest or penalties that may be due;
- The expenditures necessary to comply with regulatory requirements, including regulatory orders, and to implement reliability enhancement, emergency response and customer service improvement programs;
- Possible fines, penalties or other sanctions assessed by regulatory authorities against a Reporting Company or its subsidiaries;
- The impact of adverse publicity and media exposure which could render one or more Reporting Companies or their subsidiaries vulnerable to negative customer perception and could lead to increased regulatory oversight or other sanctions;
- Weather conditions affecting usage and emergency restoration costs;
- Population growth rates and changes in demographic patterns;

- Changes in customer energy demand due to, among other things, conservation measures and the use of renewable energy and other energy-efficient products, as well as the impact of net metering and other issues associated with the deployment of distributed generation and other new technologies;
- General economic conditions, including the impact on energy use caused by an economic downturn or recession, or by changes in the level of commercial activity in a particular region or service territory, or affecting a particular business or industry located therein;
- Changes in and compliance with environmental and safety laws and policies;
- Changes in tax rates or policies;
- Changes in rates of inflation;
- Changes in accounting standards or practices;
- Unanticipated changes in operating expenses and capital expenditures;
- Rules and regulations imposed by, and decisions of, federal and/or state regulatory commissions, PJM Interconnection, LLC (PJM), the North American Electric Reliability Corporation (NERC) and other applicable electric reliability organizations;
- Legal and administrative proceedings (whether civil or criminal) and settlements that affect a Reporting Company's or its subsidiaries' business and profitability;
- Pace of entry into new markets;
- Interest rate fluctuations and the impact of credit and capital market conditions on the ability to obtain funding on favorable terms; and
- Effects of geopolitical and other events, including the threat of terrorism or cyber attacks.

These forward-looking statements are also qualified by, and should be read together with, the risk factors included in Part I, Item 1A. "Risk Factors" and other statements in this Annual Report on Form 10-K, and investors should refer to such risk factors and other statements in evaluating the forward-looking statements contained in this Annual Report on Form 10-K.

Any forward-looking statements speak only as to the date this Annual Report on Form 10-K for each Reporting Company was filed with the SEC and none of the Reporting Companies undertakes an obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for a Reporting Company to predict all such factors. Furthermore, it may not be possible to assess the impact of any such factor on such Reporting Company's or its subsidiaries' business (viewed independently or together with the business or businesses of some or all of the other Reporting Companies or their subsidiaries), or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statement. The foregoing factors should not be construed as exhaustive.

Part I

Item 1. BUSINESS

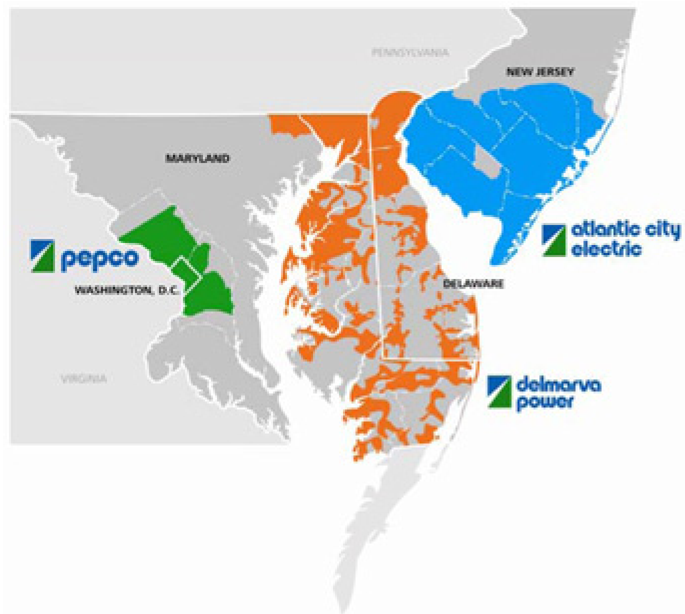
Overview

Pepco Holdings, Inc. (Pepco Holdings or PHI) is a holding company that was incorporated in Delaware in 2001. Through its regulated public utility subsidiaries, PHI is engaged primarily in the transmission, distribution and default supply of electricity, and, to a lesser extent, the distribution and supply of natural gas. The principal executive offices of PHI are located at 701 Ninth Street, N.W., Washington, D.C. 20068.

PHI's public utility subsidiaries are:

Name of Utility	State and Year of Incorporation	Business	Service Territories	Address of Principal Executive Offices
Potomac Electric Power Company (Pepco)	District of Columbia (1896) Virginia (1949)	Transmission, distribution and default supply of electricity	District of Columbia Major portions of Montgomery and Prince George's Counties, Maryland	701 Ninth Street, N.W., Washington, D.C. 20068
Delmarva Power & Light Company (DPL)	Delaware (1909) Virginia (1979)	Transmission, distribution and default supply of electricity Distribution and supply of natural gas	Portions of Delaware and Maryland (electricity) Portions of New Castle County, Delaware (natural gas)	500 North Wakefield Drive, Newark, Delaware 19702
Atlantic City Electric Company (ACE)	New Jersey (1924)	Transmission, distribution and default supply of electricity	Portions of Southern New Jersey	500 North Wakefield Drive, Newark, Delaware 19702

The service territories of each of Pepco Holdings' utilities are depicted in the map below:



PHI's three utility subsidiaries comprise a single operating segment for accounting purposes, which is referred to herein as "Power Delivery."

In addition to its regulated utility operations, Pepco Holdings, through Pepco Energy Services, Inc. and its subsidiaries (collectively, Pepco Energy Services), is engaged in the following activities:

- providing energy savings performance contracting services principally to federal, state and local government customers;
- designing, constructing and operating combined heat and power, and thermal energy plants; and
- providing high voltage underground transmission construction and maintenance services and low voltage electric construction and maintenance services and streetlight construction services.

The operations of Pepco Energy Services collectively comprise a separate, second operating segment for accounting purposes. During 2013, Pepco Energy Services completed the wind-down of its retail electricity and natural gas supply businesses, and, as a result, these businesses are being accounted for as discontinued operations, as described below under "Discontinued Operations."

Through its wholly owned subsidiary, Potomac Capital Investment Corporation (PCI), PHI previously held a portfolio of cross-border energy lease investments. During 2013, Pepco Holdings completed the termination of its interests in its cross-border energy lease investments, and as a result, these investments are being accounted for as discontinued operations, as described below under "Discontinued Operations."

The following table shows PHI's consolidated operating revenue and net income from continuing operations derived from the Power Delivery and Pepco Energy Services segments over the three preceding fiscal years.

	2013	2012	2011
		(millions of dollars)	
Operating Revenue			
Power Delivery	$4,472	$4,378	$4,650
Pepco Energy Services	203	256	330
Net Income (Loss) from Continuing Operations			
Power Delivery	$ 289	$ 235	$ 210
Pepco Energy Services	3	(8)	22

For additional financial information with respect to PHI's segments, see Note (5), "Segment Information," to the consolidated financial statements of PHI.

PHI Service Company, a wholly owned subsidiary of PHI, provides a variety of support services, including legal, accounting, treasury, tax, purchasing and information technology services, to PHI and its operating subsidiaries. These services are provided pursuant to service agreements among PHI, PHI Service Company and the participating operating subsidiaries. The expenses of PHI Service Company are charged to PHI and the participating operating subsidiaries in accordance with cost allocation methodologies set forth in the service agreements.

Business Strategy

PHI's business objective is to be a top-performing, regulated power delivery company that delivers safe and reliable electric and natural gas service to its customers and through its regulatory proceedings, earns a just and reasonable rate of return on, and receives timely recovery of, its utility investments.

In seeking to achieve this objective, Pepco Holdings' business strategy is guided by its core values of safety, integrity and diversity and its mission of environmental stewardship, and is focused on the following initiatives:

- investing in its utilities' transmission and distribution infrastructure;
- building a smarter grid and implementing other technological enhancements designed to:
  - automate power delivery system functions and improve the reliability of the power distribution system;
  - enable its utilities to restore power more quickly and efficiently;
  - offer customers detailed information about, and options to help customers better manage, their energy usage; and
  - enhance the customer experience and PHI's communications with customers; and
- through Pepco Energy Services, providing comprehensive energy management solutions and developing, installing and operating renewable energy solutions.

In furtherance of its business strategy, PHI may from time to time enter into various transactions involving its businesses. These transactions may include joint ventures, the disposition of existing businesses or the acquisitions of new businesses. PHI also may from time to time refine components of its business strategy as it deems necessary or appropriate in response to business factors and other conditions, including regulatory requirements.

Overview of the Power Delivery Business

Distribution and Default Supply of Electricity

Each of PHI's utility subsidiaries owns and operates a network of wires, substations and other equipment that are classified as transmission facilities, distribution facilities or common facilities (which are used for both transmission and distribution). Transmission facilities carry wholesale electricity into, out of and across the utilities' service territories. Distribution facilities carry electricity from the transmission facilities to the customers located in the utilities' service territories.

Each utility subsidiary is responsible for the distribution of electricity to customers within its service territory or territories and for which it is paid tariff rates established by the applicable public service commissions. While the transmission and distribution of electricity is regulated, the law of each of these service territories allows for competition in the supply of electricity, which enables distribution customers to contract to purchase their electricity from a supplier approved by the applicable public service commission. PHI's utility subsidiaries supply electricity at regulated rates to customers who do not elect to purchase their electricity from a competitive supplier. These "default" supply services are referred to generally in this Form 10-K as Default Electricity Supply. The regulatory term for Default Electricity Supply is Standard Offer Service (SOS) in Delaware, the District of Columbia and Maryland, and Basic Generation Service (BGS) in New Jersey. The results of operations of PHI's utility subsidiaries are only minimally impacted when customers choose to obtain their electricity through competitive suppliers because the utilities earn their approved rates of return by providing distribution service, and not by supplying the electricity.

Transmission of Electricity and Relationship With PJM

Each of PHI's utility subsidiaries provides transmission services within the jurisdictions that encompass its electricity distribution service territory. In the aggregate, PHI owns approximately 4,600 miles of interconnected transmission lines with voltages ranging from 115 kilovolts (kV) to 500 kV. Under the Open Access Transmission Tariff adopted by the FERC, each owner of transmission services is required to provide transmission customers with non-discriminatory access to its transmission facilities at tariff rates approved by FERC.

The transmission facilities owned by Pepco, DPL and ACE are interconnected with the transmission facilities of contiguous utilities and are part of an interstate power transmission grid over which electricity is transmitted throughout a region encompassing the mid-Atlantic portion of the United States and parts of the Midwest. PJM is the FERC-approved independent operator of this transmission grid and manages the wholesale electricity market within its region. Pepco, DPL and ACE each are members of the PJM Regional Transmission Organization (PJM RTO), the regional transmission organization designated by FERC to coordinate the movement of wholesale electricity in PJM's region.

In accordance with FERC-approved rules, Pepco, DPL, ACE and the other transmission-owning utilities in the PJM region make their transmission facilities available to PJM, and PJM directs and controls the operation of these transmission facilities. Each transmission owner is compensated at transmission rates approved by FERC for the use of its transmission facilities. PJM provides billing and settlement services, collects transmission service revenue from transmission service customers and distributes the revenue to the transmission owners.

PJM also directs the regional transmission planning process within its region. The Board of Managers of PJM reviews and approves all transmission expansion plans within the PJM region, including the construction of new transmission facilities by PJM members. Changes in the current policies for building new transmission lines ordered by FERC and implemented by PJM could result in additional competition to build transmission lines in the PJM region, including in the service territories of PHI's utility subsidiaries, and could allow PHI's utility subsidiaries the opportunity to construct transmission facilities in other service territories.

For a discussion of the regulation of transmission rates, see Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Regulatory and Other Matters – Rate Proceedings – Transmission" and for a discussion of recently completed and pending FERC transmission rate proceedings, see Note (7), "Regulatory Matters – Rate Proceedings – Federal Energy Regulatory Commission," to the consolidated financial statements of PHI.

Distribution and Supply of Natural Gas

DPL owns pipelines and other equipment for the distribution and supply of natural gas. DPL uses its natural gas distribution facilities to deliver natural gas to retail customers in its service territory and provides transportation-only services to customers that purchase natural gas from another supplier. Intrastate transportation customers pay DPL distribution service rates approved by the Delaware Public Service Commission (DPSC). Rates for the interstate transportation and sale of wholesale natural gas are regulated by FERC. DPL purchases natural gas supplies for resale to its retail service customers from marketers and producers through a combination of long-term agreements and next-day distribution arrangements.

PHI's Utility Subsidiaries

Potomac Electric Power Company

Pepco's electric distribution service territory consists of the District of Columbia and major portions of Prince George's County and Montgomery County in Maryland. The service territory covers approximately 640 square miles and, as of December 31, 2013, had a population of approximately 2.2 million. This region is economically diverse and includes key industries that contribute to the regional economic base:

- Commercial activities in the region include professional and medical services, government and education, shopping malls, tourism and transportation.
- Industrial activities in the region include chemical, glass, pharmaceutical, steel manufacturing, food processing and oil refining.

The following table shows the number of Pepco distribution customers in each of its service territories as of the end of each of the preceding three years.

	2013	2012	2011
		(in thousands)	
District of Columbia	264	260	257
Maryland	537	533	531
Total	801	793	788

Pepco distributed a total of 25,801,000, 26,006,000 and 26,895,000 megawatt (MW) hours (MWh) of electricity in 2013, 2012 and 2011, respectively. The following table shows the allocation by percentage among customer types of the total MWh of electricity delivered by Pepco in each of its service territories during each of the preceding three fiscal years:

	2013	2012	2011
District of Columbia:			
Residential	13%	13%	13%
Commercial, industrial and other	30%	30%	30%
Total	43%	43%	43%
Maryland:			
Residential	17%	17%	17%
Commercial, industrial and other	40%	40%	40%
Total	57%	57%	57%

Pepco has been designated as the default electricity supplier in its District of Columbia and Maryland service territories by the District of Columbia Public Service Commission (DCPSC) and the Maryland Public Service Commission (MPSC), respectively. Pepco purchases the electricity required to satisfy its SOS obligations from wholesale suppliers primarily under contracts entered into in accordance with competitive bid procedures approved and supervised by each of the DCPSC and the MPSC. For commercial customers in the District of Columbia and large commercial customers in Maryland that do not purchase their electricity from a competitive supplier, Pepco is obligated to provide Hourly Priced Service (HPS), a form of SOS service for which Pepco purchases the electricity in the next-day and other short-term PJM RTO markets.

Under orders issued by the DCPSC, Pepco is obligated to provide SOS to residential and small, medium-sized and large commercial customers in the District of Columbia indefinitely. Under orders issued by the MPSC, Pepco is obligated to provide SOS to residential and small commercial customers and to medium-sized commercial customers in Maryland through November 2014. As contracts expire, they are rebid annually by Pepco through the MPSC-approved request for proposal process. Pepco is paid tariff rates for the transmission and distribution of electricity over its transmission and distribution facilities to all electricity customers in its service territory, whether the customer receives SOS or HPS, or purchases electricity from a competitive supplier, and is entitled to recover from its SOS and HPS customers the costs of acquiring the electricity, plus an administrative charge that is intended to allow it to recover its administrative costs, plus a modest margin, which varies depending on the customer class.

The following table shows for Pepco customers in the District of Columbia and Maryland the percentage of distribution sales (measured by MWh) over the past three fiscal years to SOS customers.

	2013	2012	2011
District of Columbia	25%	25%	27%
Maryland	41%	40%	43%

In the District of Columbia, under various acts of Congress, pursuant to Pepco's corporate charter, and subject to the supervision of the DCPSC, Pepco has the non-exclusive authority to install and maintain overhead and underground transmission and distribution lines and other related facilities for the furnishing of electricity. Pepco's right to occupy public space for utility purposes is by permit from the District of Columbia and the federal government. Pepco is the only public utility that distributes electricity for sale to the public in the District of Columbia.

In Maryland, Pepco operates pursuant to state-wide franchises granted by Maryland's General Assembly that are unlimited in duration. These franchises were granted to Pepco or to predecessor companies acquired by Pepco, and confer, among other things, the ability to construct electric transmission and distribution lines. Pursuant to statute, public service companies in Maryland may exercise a franchise to the extent authorized by the MPSC. The service territories for Pepco, as well as for other electric utilities in the state, were precisely delineated in 1966 by the MPSC and have been modified in minor ways over the years.

Delmarva Power & Light Company

DPL is engaged in the transmission, distribution and default supply of electricity in portions of Delaware and Maryland. In northern Delaware, DPL also supplies and delivers natural gas to retail customers and provides transportation-only services to retail customers that purchase natural gas from another supplier.

In Maryland, DPL operates pursuant to state-wide franchises that are substantially similar in nature to those described above with respect to Pepco's Maryland operations. DPL's exclusive and continuing authority to distribute electricity and natural gas in its non-municipal service territories in Delaware is derived from legislation, through which the DPSC has established exclusive service territories. With respect to municipalities that it serves, DPL provides service under various franchises granted to DPL and predecessor companies, which franchises are generally either unlimited as to time or renew automatically.

Distribution and Supply of Electricity

DPL's electric distribution service territory consists of the state of Delaware, and Caroline, Cecil, Dorchester, Harford, Kent, Queen Anne's, Somerset, Talbot, Wicomico and Worcester counties in Maryland. This territory covers approximately 5,000 square miles and, as of December 31, 2013, had a population of approximately 1.4 million. This region is economically diverse and includes the following key industries that contribute to the regional economic base:

- Commercial activities in the region include banking, government, insurance, shopping malls, casinos and tourism.
- Industrial activities in the region include chemical, pharmaceutical, steel manufacturing and oil refining.

The following table shows the number of DPL electricity distribution customers in each of its service territories as of the end of each of the preceding three fiscal years.

	2013	2012	2011
		(in thousands)	
Delaware	305	303	301
Maryland	201	200	200
Total	506	503	501

DPL distributed a total of 12,465,000, 12,641,000 and 12,688,000 MWh of electricity in 2013, 2012 and 2011, respectively. The following table shows the allocation by percentage among customer types of the total MWh of electricity delivered by DPL in each of its service territories during each of the preceding three fiscal years:

	2013	2012	2011
Delaware:			
Residential	27%	27%	27%
Commercial and industrial	39%	40%	39%
Total	66%	67%	66%
Maryland:			
Residential	14%	13%	14%
Commercial and industrial	20%	20%	20%
Total	34%	33%	34%

DPL has been designated as the default electricity supplier in its Delaware and Maryland service territories by the DPSC and the MPSC, respectively. DPL purchases the electricity required to satisfy its SOS obligations from wholesale suppliers primarily under contracts entered into in accordance with competitive bid procedures approved and supervised by each of the DPSC and the MPSC. DPL also has an obligation to provide HPS for its largest customers in Delaware and its large customers in Maryland. DPL acquires power to supply its HPS customers in the next-day and other short-term PJM RTO markets.

Under orders issued by the DPSC, DPL is obligated to provide SOS to residential, small commercial and industrial customers in Delaware through May 2017, and to medium, large and general service commercial customers in Delaware through May 2015. Under orders issued by the MPSC, DPL is obligated to provide SOS to residential and small commercial customers in Maryland until further action of the Maryland General Assembly, and to medium-sized commercial customers in Maryland through November 2014. As contracts expire, they are rebid annually by DPL through the MPSC approved request for proposal process. In Delaware and Maryland, DPL is paid tariff rates for the transmission and distribution of electricity over its transmission and distribution facilities to all electricity customers in its service territories, whether the customer receives SOS or HPS, or purchases electricity from a competitive supplier. In Delaware, DPL is also entitled to recover from its SOS and HPS customers the associated costs of acquiring the electricity (including transmission, capacity and ancillary services costs and costs to satisfy renewable energy requirements), plus an amount referred to as a Reasonable Allowance for Retail Margin. In Maryland, DPL is entitled to recover from its SOS and HPS customers the costs of acquiring the electricity, plus an administrative charge that is intended to allow it to recover its administrative costs, plus a modest margin, which varies depending on the customer class.

The following table shows for DPL customers in Delaware and Maryland the percentage of distribution sales (measured in MWh) over the past three fiscal years to SOS customers.

	2013	2012	2011
Delaware	44%	47%	51%
Maryland	51%	53%	58%

Distribution and Supply of Natural Gas

DPL provides regulated natural gas supply and distribution service to customers in a service territory consisting of a major portion of New Castle County in Delaware. This service territory covers approximately 275 square miles and, as of December 31, 2013, had a population of approximately 500,000.

Large volume commercial, institutional, and industrial natural gas customers may purchase natural gas from DPL. Alternatively, a customer receiving a “transportation-only” service from DPL will purchase natural gas from a competitive supplier and have the natural gas delivered through DPL’s distribution facilities. The following table provides certain information regarding DPL’s natural gas distribution business for each of the last three fiscal years.

	2013	2012	2011
	(in thousands, except percentages)		
Number of natural gas customers	126	125	124
Thousand cubic feet (Mcf) of natural gas delivered	19,796	16,815	18,754
Percentage of natural gas supplied and Delivered by DPL	64%	60%	64%

The following table shows on a percentage basis the allocation among customer types of the Mcf of natural gas delivered by DPL in Delaware in each of the preceding three fiscal years.

	2013	2012	2011
Residential	40%	38%	39%
Commercial and industrial	25%	22%	24%
Transportation and other	35%	40%	37%

Atlantic City Electric Company

Electricity Distribution and Supply

ACE's electric distribution service territory consists of Gloucester, Camden, Burlington, Ocean, Atlantic, Cape May, Cumberland and Salem counties in southern New Jersey. The service territory covers approximately 2,700 square miles and had, as of December 31, 2013, a population of approximately 1.1 million. This region is economically diverse and includes key industries that contribute to the regional economic base:

- Commercial activities in the region include professional services, government, shopping malls, casinos, and tourism.
- Industrial activities in the region include chemical, glass, food processing and oil refining.

The following table provides certain information regarding ACE's electric distribution business for each of the last three fiscal years.

	2013	2012	2011
		(in thousands)	
Number of electric distribution customers	545	545	547
MWh of electricity delivered	9,231	9,495	9,683

The following table shows the allocation by percentage among customer types of the total MWh of electricity delivered by ACE during each of the preceding three fiscal years.

	2013	2012	2011
Residential	46%	46%	46%
Commercial and industrial	54%	54%	54%

ACE has been designated as the default electricity supplier in its service territory by the New Jersey Board of Public Utilities (NJBPU). In New Jersey, each of the state's electric distribution companies, including ACE, jointly obtains the electricity to meet such companies' collective BGS obligations from competitive suppliers selected through auctions authorized by the NJBPU for the supply of New Jersey's total BGS requirements. Each winning bidder is required to supply its committed portion of the BGS customer load with full requirements service, consisting of power supply and transmission service. ACE provides two types of BGS:

- fixed price BGS, which is provided to smaller commercial and residential customers at seasonally-adjusted fixed prices (which as of December 31, 2013, had a peak load of approximately 1,429 MW and represented approximately 97% of ACE's total BGS load); and
- commercial and industrial energy price BGS, which is provided to large customers at hourly PJM RTO real-time market prices for a term of 12 months (which as of December 31, 2013, had a peak load of approximately 42 MW and represented approximately 3% of ACE's total BGS load).

ACE is paid tariff supply rates established by the NJBPU that compensate it for the cost of obtaining the BGS supply. These rates are set such that ACE does not make any profit or incur any loss with respect to the supply component of its BGS obligations. ACE is also paid tariff rates for the transmission and distribution of electricity over its transmission and distribution facilities to all electricity customers in its service territory, whether the customer receives BGS or purchases electricity from a competitive supplier.

For the year ended December 31, 2013, 48% of ACE's total distribution sales (measured in MWh) were to BGS customers, as compared to 51% and 56% in 2012 and 2011, respectively.

ACE operates under non-exclusive franchises that have been granted by the NJBPU and under certain non-exclusive consents from municipalities in which ACE provides service. While most of the municipal consents were granted in perpetuity, two of the municipal consents require renewal on a periodic basis in accordance with their terms, and are subject to the ultimate review and approval of the NJBPU. All of the franchises and consents are currently in full force and effect.

Atlantic City Electric Transition Funding LLC

In 2001, ACE established Atlantic City Electric Transition Funding LLC (ACE Funding) solely for the purpose of securitizing authorized portions of ACE's recoverable stranded costs through the issuance and sale of bonds (Transition Bonds). The proceeds of the sale of each series of Transition Bonds were transferred to ACE in exchange for the transfer by ACE to ACE Funding of the right to collect a non-bypassable transition bond charge (Transition Bond Charge) from ACE customers pursuant to bondable stranded costs rate orders issued by the NJBPU in an amount sufficient to fund the principal and interest payments on the Transition Bonds and related taxes, expenses and fees (Bondable Transition Property). The assets of ACE Funding, including the Bondable Transition Property, and the Transition Bond Charges (representing revenue ACE receives, and pays to ACE Funding, to fund the principal and interest payments on Transition Bonds and related taxes, expenses and fees) collected from ACE's customers, are not available to creditors of ACE. The holders of Transition Bonds have recourse only to the assets of ACE Funding.

Smart Grid Initiatives

PHI's utility subsidiaries are engaged in transforming the power grid that they own and operate into a "smart grid," a network of automated digital devices capable of collecting and communicating large amounts of real-time data. PHI believes that the smart grid benefits its customers by:

- improving service reliability of the energy distribution system;
- automating specific distribution system functions;
- enabling its utilities to restore energy to customers more quickly and efficiently;
- facilitating more efficient use of energy to meet the challenges of rising energy costs and governmental energy reduction goals;
- permitting its utilities to obtain and communicate to their customers timely and accurate information regarding energy usage and outages; and
- enhancing communications with its customers and the overall customer experience.

A central component of the smart grid is advanced metering infrastructure (AMI), a system that collects, measures and analyzes energy usage data from advanced digital meters, known as "smart meters." Also critical to the operation of the smart grid is distribution automation technology, which is comprised of automated devices that have internal intelligence and can be controlled remotely to better manage power flow and restore service quickly and more safely. Both the AMI system and distribution automation are enabled by advanced technology that communicates with devices installed on the energy delivery system and transmits energy usage data to the host utility. The implementation of the AMI system and distribution automation involves an integration of technologies provided by multiple vendors.

The installation of smart meters in the service territories of each of PHI's utility subsidiaries is subject to approval by the applicable public service commissions. The regulatory and implementation status of Pepco Holdings' AMI smart meter activities as of December 31, 2013 was as follows:

Utility	Jurisdiction	Regulatory Status	Installation and Activation Status
Pepco	Maryland	Approved	Complete
	District of Columbia	Approved	Complete
DPL (Electric)	Delaware	Approved	Complete
	Maryland	Approved	Estimated Completion 3Q 2014
DPL (Natural Gas)	Delaware	Approved	Substantially Complete
ACE	New Jersey	Not approved	N/A

The DCPSC, the MPSC and the DPSC have approved the creation by PHI's utility subsidiaries of regulatory assets to defer AMI costs between rate cases and to accrue returns on the deferred costs. Thus, these costs will be recovered in the future through base rates; however, for AMI costs incurred by Pepco in Maryland with respect to test years after 2011, pursuant to an MPSC order, the recovery of such costs will be allowed when Pepco demonstrates that the AMI system is cost-effective. The MPSC's July 2013 order in Pepco's November 2012 electric distribution base rate application excluded the cost of AMI meters from Pepco's rate base until such time as Pepco demonstrates the cost effectiveness of the AMI system. As a result, costs for AMI meters incurred with respect to the 2012 test year and beyond will be treated as other incremental AMI costs incurred in conjunction with the deployment of the AMI system that are deferred and on which a return is earned, but only until such cost effectiveness has been demonstrated and such costs are included in rates.

In 2010, two of PHI's utility subsidiaries were granted cash awards in the aggregate amount of $168 million by the U.S. Department of Energy to support their smart grid initiatives.

- Pepco was awarded $149 million for AMI, direct load control, distribution automation and communications infrastructure, of which $145 million has been received through December 31, 2013.
- ACE was awarded $19 million for direct load control, distribution automation and communications infrastructure, of which $17 million has been received through December 31, 2013.

For a discussion of the projected capital expenditures of each utility subsidiary associated with PHI's smart grid initiatives over the period 2014 through 2018, see Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Resources and Liquidity – Capital Requirements."

Utility Capital Expenditures

PHI's utility subsidiaries devote a substantial portion of their total capital expenditures to improving the reliability of their electrical transmission and distribution systems and replacing aging infrastructure throughout their service territories. These activities include:

- identifying and upgrading under-performing feeder lines;
- adding new facilities to support load;
- installing distribution automation systems on both the overhead and underground network systems; and
- rejuvenating and replacing underground residential cables.

In addition, PHI's utility subsidiaries devote capital expenditures to increasing transmission and distribution system capacity, providing resiliency against major storm events, providing operating and system flexibility and installing and upgrading facilities for new and existing customers. For a discussion of PHI's consolidated capital expenditure plan for 2014 through 2018, see Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Resources and Liquidity – Capital Requirements – Capital Expenditures."

Maryland Grid Resiliency Task Force

In September 2012, a Grid Resiliency Task Force established through an executive order issued by the Governor of Maryland issued a report containing 11 recommendations on improving the resiliency and reliability of the electric distribution system in Maryland. In October 2012, the Governor of Maryland forwarded the report to the MPSC and urged the MPSC to implement quickly four of the Grid Resiliency Task Force's recommendations:

- strengthen existing reliability and storm restoration regulations;
- accelerate the investment necessary to meet the enhanced metrics;
- allow surcharge recovery for the accelerated investment; and
- implement clearly defined performance metrics into the traditional ratemaking scheme.

Components of Pepco's electric distribution base rate case filed with the MPSC in November 2012 and DPL's electric distribution base rate case filed with the MPSC in March 2013 were intended to address the Grid Resiliency Task Force recommendations. In July and August 2013, the MPSC issued orders in these base rate cases that only partially approved these components. See Note (7), "Regulatory Matters – Rate Proceedings – Maryland" to the consolidated financial statements of PHI for more information about these base rate cases.

District of Columbia Proposed Undergrounding Legislation

In August 2012, the Mayor of the District of Columbia issued an Executive Order establishing the Mayor's Power Line Undergrounding Task Force (the DC Undergrounding Task Force). In May 2013, the DC Undergrounding Task Force issued a written recommendation endorsing a $1 billion plan to underground 60 of the District of Columbia's most outage-prone power lines, which lines would be owned and maintained by Pepco. The legislation providing for implementation of the DC Undergrounding Task Force recommendations contemplates that:

- $500 million of the estimated cost would be funded by Pepco, with recovery of its investment to be made through surcharges to be billed to Pepco District of Columbia customers;
- $375 million of the estimated cost would be financed by the District of Columbia's issuance of securitized bonds, which bonds would be repaid through surcharges to be billed to Pepco District of Columbia customers (Pepco would not earn a return on or of the cost of the assets funded with the proceeds of these securitized bonds); and
- the remaining $125 million would be funded through the District of Columbia Department of Transportation's existing capital projects program.

This legislation was approved by the Council of the District of Columbia on February 4, 2014 and is awaiting the signature of the Mayor of the District of Columbia. Once signed by the Mayor and transmitted to Congress, the legislation will undergo a 30-day Congressional review period before becoming law, which is expected to be completed in the second quarter of 2014. The final step would be for the DCPSC to approve the underground project plan and issue financing orders to establish the customer surcharges contemplated by the undergrounding law. A decision by the DCPSC on such actions would likely occur during the fourth quarter of 2014.

NERC Reliability Standards

NERC has established, and FERC has approved, reliability standards with regard to the bulk power system that impose certain operating, planning and cyber security requirements on Pepco, DPL and ACE. There are eight NERC regional oversight entities, including Reliability*First* Corporation (RFC), of which Pepco, DPL, ACE and Pepco Energy Services are members. These oversight entities are charged with the day-to-day implementation and enforcement of NERC's reliability standards, which impose certain operating, planning and cybersecurity requirements on the bulk power systems of each utility. RFC performs compliance audits on entities registered with NERC based on reliability standards and criteria established by NERC. NERC and RFC also conduct compliance investigations in response to a system disturbance, complaint, or possible violation of a reliability standard identified by other means. Each of PHI's utility subsidiaries are subject to routine audits and monitoring for compliance with applicable NERC reliability standards, including standards requested by FERC to increase the number of assets designated as "critical assets" (including cybersecurity assets) subject to NERC's cybersecurity standards. NERC is empowered to impose financial penalties, fines and other sanctions for non-compliance with certain rules and regulations.

Energy Efficiency Initiatives

Dynamic Pricing

Dynamic pricing provides customers with incentives to reward them for decreasing their energy use during peak energy demand periods, when energy demand and consequently, the cost of supplying electricity, are higher. PHI's dynamic pricing rate structures, implemented in tandem with PHI's smart grid, provide customers with billing credits when they reduce their power usage in response to their utility's request.

Dynamic pricing has been approved by the respective public service commissions and is in place for Pepco customers in Maryland and DPL customers in Delaware. As of December 31, 2013, approximately 625,000 Pepco customers in Maryland and 293,000 DPL customers in Delaware have received dynamic pricing program credits. Dynamic pricing has been approved in concept pending AMI deployment for DPL's Maryland SOS customers. Pepco's dynamic pricing proposal in the District of Columbia was rejected by the DCPSC on February 7, 2014. Pepco is considering its options in that jurisdiction with respect to dynamic pricing. Dynamic pricing has not been approved at this time by the NJBPU for ACE's customers in New Jersey.

Utility Energy Efficiency Programs

Each of Pepco, DPL and ACE has implemented the Energy Wise Rewards™ program, which allows participating customers to reduce energy usage and costs by authorizing the utility to cycle their air conditioner compressors off and on during high energy demand periods. Customers participating in this program are eligible to receive a credit on their bill. Pepco and DPL have also implemented a portfolio of energy efficiency programs designed to reduce energy consumption in Maryland, including appliance rebate and recycling, home energy check-ups, rebates on the purchase of energy efficiency equipment and services and discounts on energy efficient light bulbs and lighting fixtures. The MPSC has approved a customer surcharge through 2014 to recover Pepco's and DPL's costs associated with these energy efficiency programs.

Pepco Energy Services

Pepco Energy Services is engaged in the following:

- Energy savings performance contracting business: designing, constructing and operating energy efficiency projects and distributed generation equipment, including combined heat and power plants, principally for federal, state and local government customers;
- Underground transmission and distribution business: providing underground transmission and distribution construction and maintenance services for electric utilities in North America; and
- Thermal business: providing steam and chilled water under long-term contracts through systems owned and operated by Pepco Energy Services, primarily to hotels and casinos in Atlantic City, New Jersey.

The energy savings performance contracting business is highly competitive, and Pepco Energy Services competes with other energy services companies primarily with respect to contracts with federal, state and local governments and independent agencies. Many of these energy services companies are subsidiaries of larger building controls and equipment providers or utility holding companies. Competitive offerings include a wide range of electrical and thermal system upgrades, improved controls, and generation equipment such as combined heat and power units. Among the factors as to which companies in this business compete are the amount and duration of the guarantees provided in energy savings performance contracts and the quality and value of service provided to customers. In connection with many of Pepco Energy Services' energy savings performance contracts, Pepco Energy Services provides performance guarantees, including guarantees of a certain level of energy savings. This business is affected by new entrants into the market, the financial strength of customers, governmental directives regarding energy efficiency, energy prices, and general economic conditions. Pepco Energy Services' backlog of construction contracts in this business increased to $91 million at year-end 2013 from $82 million at year-end 2012. Pepco Energy Services estimates that it will complete $88 million of the construction contracts in its backlog in 2014 and $3 million in 2015.

Most of Pepco Energy Services' energy savings performance contracts with federal, state and local governments, as well as those with independent agencies, such as housing and water authorities, contain provisions authorizing the governmental authority or independent agency to terminate the contract at any time. Those provisions include explicit mechanisms which, if exercised, would require the other party to pay Pepco Energy Services for work performed through the date of termination and for additional costs incurred as a result of the termination.

Through its wholly owned subsidiary, W.A. Chester, L.L.C., Pepco Energy Services constructs and maintains underground transmission and distribution projects for electric utilities in North America. W.A. Chester is one of the two largest North American contractors that specializes in the installation and maintenance of pipe-type cable systems, a technology that W.A. Chester believes currently accounts for the majority of existing underground transmission circuit miles in North America. W.A. Chester's primary competitor in the pipe-type cable system market is UTEC Constructors Corporation, and there are several other contractors that do not specialize in this cable system but rather undertake installation projects on a more limited basis. W.A. Chester also competes in the market for the installation and maintenance of solid dielectric cable, which is a relatively newer technology compared to pipe-type cable systems. The solid dielectric cable installation and maintenance market is highly competitive and composed of numerous different competitors, and the barriers to entry in this market are relatively low. The principal factors for competition in both of these markets are price, experience, customer service and ability to handle a wide range of utility applications. W.A. Chester believes its competitive strengths in both of these markets are the breadth of its experience in working with both technologies in various utility applications (including new installations, modifications, upgrades and maintenance of existing systems), its in-depth knowledge of the U.S. and Canadian utility industries and utility customers' needs, and its ability to manage successfully all phases of these projects for the customer. W.A. Chester's backlog of construction contracts increased to $84 million at year-end 2013 from $38 million at year-end 2012. W.A. Chester estimates that it will complete $73 million of the construction contracts in its backlog in 2014 and $11 million in 2015.

Revenues associated with Pepco Energy Services' combined heat and power thermal generating plant and operations are concentrated with a few major customers in the Atlantic City hotel and casino industry. Pepco Energy Services has long-term contracts with these customers, and for the largest customer, the contracts expire in 2017. The Atlantic City hotel and casino industry has been experiencing a decrease in gaming revenues and overcapacity, as well as potential future competition from casinos that are being constructed in nearby markets. As a result, Pepco Energy Services is exposed to the risk that it may not be able to renew these contracts or that the contract counterparties may fail to perform their obligations thereunder.

PHI guarantees the obligations of Pepco Energy Services under certain contracts in its energy savings performance contracting business and underground transmission and distribution construction business. At December 31, 2013, PHI's guarantees of Pepco Energy Services' obligations under these contracts totaled $190 million. PHI also guarantees the obligations of Pepco Energy Services under surety bonds obtained by Pepco Energy Services for construction projects in these businesses. These guarantees totaled $229 million at December 31, 2013.

During 2012, Pepco Energy Services deactivated its Buzzard Point oil-fired generation facility and its Benning Road oil-fired generation facility, and in 2013 began work to demolish the Benning Road facility. This demolition is expected to be completed by the end of 2014. At December 31, 2013, Pepco Energy Services owned five renewable energy generating facilities, with an aggregate generating capacity of 17,400 KW. See Part I, Item 2. "Properties – Generating Facilities" for more information about these facilities.

Discontinued Operations

Through its subsidiary Potomac Capital Investment Corporation, PHI maintained a portfolio of cross-border energy lease investments. During the third quarter of 2013, PHI completed the termination of its interests in its cross-border energy lease investments. These activities, which previously comprised substantially all of the operations of the Other Non-Regulated segment, are being accounted for as discontinued operations. The remaining operations of the Other Non-Regulated segment, which no longer meet the definition of a separate segment for financial reporting purposes, are being included in Corporate and Other. Substantially all of the information in the notes to the consolidated financial statements of PHI with respect to the cross-border energy lease investments has been consolidated in Note (19), "Discontinued Operations – Cross-Border Energy Lease Investments."

In 2013, Pepco Energy Services completed a previously announced wind-down of its retail electric and retail natural gas supply businesses. These operations are being accounted for as discontinued operations and are no longer a part of the Pepco Energy Services segment for financial reporting purposes. Substantially all of the information in the notes to the consolidated financial statements of PHI with respect to Pepco Energy Services' retail electric and retail natural gas supply businesses has been consolidated in Note (19), "Discontinued Operations – Retail Electric and Natural Gas Supply Businesses of Pepco Energy Services."

Seasonality

Power Delivery

The operating results of Power Delivery historically have been directly related to the volume of electricity delivered to its customers, producing higher revenues and net income during periods when customers consumed higher amounts of electricity (usually during periods of extreme temperatures) and lower revenues and net income during periods when customers consumed lower amounts of electricity (usually during periods of mild temperatures). This has been due in part to the longstanding practice of tying the distribution charges paid by customers to kilowatt-hours of electricity used. Because most of the costs associated with the distribution of electricity do not vary with the volume of electricity delivered, this pricing mechanism also contributed to seasonal variations in net income.

As a result of the implementation of a bill stabilization adjustment (BSA) for retail customers of Pepco and DPL in Maryland and for customers of Pepco in the District of Columbia, distribution revenues from utility customers in these jurisdictions have been decoupled from the amount of electricity delivered. Under the BSA, utility customers pay an approved distribution charge for their electric service which does not vary by electricity usage. This change has had the effect of aligning annual distribution revenues more closely with annual distribution costs. In addition, the change has had the effect of eliminating changes in customer electricity usage, whether due to weather conditions or for any other reason, as a factor having an impact on annual distribution revenue and net income in those jurisdictions. The BSA also eliminates what otherwise might be a disincentive for the utility to aggressively develop and promote efficiency programs. A comparable revenue decoupling mechanism proposed for DPL electricity and natural gas customers in Delaware is under consideration by the DPSC although there was little activity in this matter in 2013. Distribution revenues are not decoupled for the distribution of electricity by ACE in New Jersey, and thus are subject to variability due to changes in customer consumption.

In contrast to electricity distribution costs, the cost of the electricity supplied, which is the largest component of a customer's bill, does vary directly in relation to the volume of electricity used by a customer. Accordingly, whether or not a BSA is in effect for the jurisdiction, the revenues of Pepco, DPL and ACE from the supply of electricity and natural gas vary based on consumption and on this basis are seasonal. Because the revenues received by each of the utility subsidiaries for the default supply of electricity and natural gas closely approximate the supply costs, the impact on net income is immaterial, and therefore is not seasonal.

Pepco Energy Services

The energy services business of Pepco Energy Services is not seasonal, except with respect to its thermal operations. The thermal operations of Pepco Energy Services provide steam and chilled water to customers year-round. Steam usage peaks during months with colder temperatures and chilled water usage peaks during months with warmer temperatures. The rates charged customers adjust quarterly for the cost of natural gas used to produce steam and electricity used to produce chilled water. Pepco Energy Services' revenues and gross profit from its thermal operations will fluctuate based on the volumes of steam and chilled water delivered to customers.

Regulation

The operations of PHI's utility subsidiaries, including the rates and tariffs they are permitted to charge customers for the transmission and distribution of electricity, and, in the case of DPL, the distribution and transportation of natural gas, are subject to regulation by governmental agencies in the jurisdictions in which the subsidiaries provide utility service as described above in " – PHI's Utility Subsidiaries." Rates and tariffs are established by these regulatory commissions. PHI's utility subsidiaries have filed or plan to file rate cases in each of its jurisdictions as further described in Note (7), "Regulatory Matters – Rate Proceedings," to the consolidated financial statements of PHI.

In addition to the other regulatory matters described elsewhere in this section and in Note (7), "Regulatory Matters," to the consolidated financial statements of PHI, provided below are summary descriptions of certain regulatory matters involving PHI's utility subsidiaries.

Mitigation of Regulatory Lag

An important factor in the ability of PHI's utility subsidiaries to earn their authorized ROE is the willingness of applicable public service commissions to adequately address the shortfall in revenues in a utility's rate structure due to the delay in time or "lag" between when costs are incurred and when they are reflected in rates. This delay is commonly known as "regulatory lag." Pepco, DPL and ACE are currently experiencing significant regulatory lag because investments in rate base and operating expenses are increasing more rapidly than their revenue growth.

In an effort to minimize the effects of regulatory lag, PHI's utility subsidiaries are:

- filing electric distribution base rate cases every nine to twelve months in each of their jurisdictions,
- pursuing alternative ratemaking mechanisms,
- evaluating potential reductions in planned capital expenditures, and
- continuing outreach to the regulatory community and other stakeholders, to discuss the changing regulatory model economics that are causing regulatory lag.

Alternative mechanisms that may reduce regulatory lag include adjusting historic test periods in distribution base rate cases to recognize plant additions which are already being used to provide service to customers when new rates go into effect, grid resiliency charges to allow contemporaneous cost recovery of costs for infrastructure related to system reliability, and multi-year rate plans.

Each of PHI's utility subsidiaries will continue to seek cost recovery from applicable public service commissions to reduce the effects of regulatory lag and have an opportunity to earn its authorized ROE. There can be no assurance that any attempts by PHI's utility subsidiaries to mitigate regulatory lag will be approved or, that even if approved, the cost recovery mechanisms will fully mitigate the effects of regulatory lag.

FERC MAPP Abandonment Cost Filing

On August 24, 2012, the board of PJM terminated the Mid-Atlantic Power Pathway (MAPP) project and removed it from PJM's regional transmission expansion plan. PHI had been directed to construct MAPP, a 152-mile high-voltage interstate transmission line, to address the reliability needs of the region's transmission system. In December 2012, PHI submitted a filing to FERC seeking recovery of $88 million of abandoned MAPP costs over a five-year period. The FERC filing addressed, among other things, the prudence of the recoverable costs incurred, the proposed period over which the abandoned costs are to be amortized and the rate of return on these costs during the recovery period.

In February 2013, FERC issued an order concluding that the MAPP project was cancelled for reasons beyond the control of Pepco and DPL, finding that the prudently incurred costs associated with the abandonment of the MAPP project are eligible to be recovered, and setting for hearing and settlement procedures the prudence of the abandoned costs and the amortization period for those costs.

In December 2013, PHI submitted a settlement agreement to FERC with respect to this matter. Under the terms of the proposed settlement agreement, Pepco and DPL would recover their abandoned MAPP costs over a three-year recovery period beginning June 1, 2013. The settlement agreement, which is subject to FERC approval, would resolve all issues concerning the recovery of abandonment costs associated with the cancellation of the MAPP project. The terms of this settlement, if approved, would not be subject to the pending formula rate or transmission ROE challenges at FERC or modification through any other FERC proceeding. PHI cannot predict the timing or results of a final FERC decision in this proceeding.

MPSC New Generation Contract Requirement

In September 2009, the MPSC initiated an investigation into whether Maryland electric distribution companies (EDCs) should be required to enter into long-term contracts with entities that construct, acquire or lease, and operate, new electric generation facilities in Maryland. In April 2012, the MPSC issued an order requiring Pepco, DPL and Baltimore Gas and Electric Company (BGE) (collectively, the Contract EDCs) to negotiate and enter into a contract with the winning bidder for the construction of a 661 MW natural gas-fired combined cycle generation plant in Waldorf, Maryland, with an expected commercial operation date of June 1, 2015. The April 2012 order specified that each of the Contract EDCs will recover its costs associated with the contract through surcharges on its SOS customers.

In April 2012, a group of generating companies operating in the PJM region filed a complaint in the U.S. District Court for the District of Maryland challenging the MPSC order. In May 2012, the Contract EDCs and other parties also filed notices of appeal in circuit courts in Maryland requesting judicial review of the MPSC order, and these notices of appeal were consolidated in a single appeal in the Circuit Court for Baltimore City.

In September and October 2013, the U.S. District Court issued a final decision and order, respectively, holding that the MPSC order violated the Supremacy Clause of the U.S. Constitution and finding that the contracts that had been entered into in June 2013 between each of the Contract EDCs and the winning bidder (as mandated by an April 2013 order of the MPSC) were illegal and unenforceable. In November 2013, the MPSC and the winning bidder appealed the U.S. District Court's decision and order to the U.S. Circuit Court of Appeals for the Fourth Circuit. This appeal presently remains pending.

In October 2013, the Maryland Circuit Court for Baltimore County issued a ruling upholding the MPSC's orders requiring the Contract EDCs to enter into the contracts. The Contract EDCs, the Maryland Office of People's Counsel and one generating company have appealed the Maryland Circuit Court's ruling to the Maryland Court of Special Appeals. This appeal presently remains pending.

PHI, Pepco and DPL continue to evaluate these proceedings to determine, if the contracts are found to be valid and enforceable: (i) the extent of the negative effect that the contracts may have on the credit metrics of PHI, Pepco and DPL, as calculated by independent rating agencies that evaluate and rate PHI, Pepco and DPL, and their debt issuances, (ii) the effect on the ability of Pepco and DPL to recover their associated costs of the contracts if a significant number of SOS customers elect to buy their energy from competitive energy suppliers, and (iii) the effect of the contracts on the financial condition, results of operations and cash flows of PHI, Pepco and DPL.

ACE Standard Offer Capacity Agreements

In April 2011, ACE entered into three Standard Offer Capacity Agreements (SOCAs) by order of the NJBPU, each with a different generation company, as more fully described in Note (13), "Derivative Instruments and Hedging Activities," to the consolidated financial statements of PHI. One of the three SOCAs was terminated effective July 1, 2013 because of an event of default of the generation company that was a party to the SOCA.

ACE and the other EDCs in New Jersey entered into the SOCAs under protest, arguing that the EDCs were denied due process and that the SOCAs violate certain of the requirements under the New Jersey law under which the SOCAs were established (the NJ SOCA Law). This dispute was pending before the NJBPU; however, in April 2013, it was consolidated with an appeal filed in June 2011 by the EDCs in the Superior Court of New Jersey Appellate Division.

In February 2011, ACE joined other plaintiffs in an action filed in the U.S. District Court for the District of New Jersey challenging the NJ SOCA Law on the grounds that it violates the Commerce Clause and the Supremacy Clause of the U.S. Constitution. In October 2013, the U.S. District Court issued a ruling that the NJ SOCA Law is preempted by the Federal Power Act and violates the Supremacy Clause, and is therefore null and void, and an order deciding that the remaining SOCAs are void, invalid and unenforceable. The U.S. District Court decision's has been appealed to the U.S. Third Circuit Court of Appeals, and this appeal presently remains pending. In light of the U.S. District Court's decision, the New Jersey Appellate Division dismissed the EDCs' appeal without prejudice, subject to the EDCs' rights to revive their appeal if the U.S. District Court's decision is reversed.

Delaware Renewable Energy Portfolio Standards

DPL is subject to Renewable Energy Portfolio Standards (RPS) in the state of Delaware that require it to obtain renewable energy credits (RECs) for energy delivered to its customers. In July 2011, the Governor of the State of Delaware signed legislation that expanded DPL's RPS obligations beginning in 2012. Before this legislation, DPL was required to obtain RECs for energy delivered only to SOS customers in Delaware; the legislation expands that requirement to energy delivered to all of DPL's distribution customers in Delaware. DPL's costs associated with obtaining RECs to fulfill its RPS obligations are recoverable from its distribution customers by law.

The legislation also establishes that the energy output from fuel cells manufactured in Delaware capable of running on renewable fuels is an eligible resource for RECs under the Renewable Portfolio Standards Act. The legislation requires that the DPSC adopt a tariff under which DPL would be an agent that collects payments from its customers and disburses the amounts collected to a qualified fuel cell provider that deploys Delaware-manufactured fuel cells as part of a 30-megawatt generation facility. The legislation also provides for a reduction in DPL's REC and solar REC requirements based upon the actual energy output of the 30-megawatt generation facility. In October 2011, the DPSC approved the tariff submitted by DPL in response to the legislation. For more information on the tariff, see Note (16), "Variable Interest Entities – DPL Renewable Energy Transactions," to the consolidated financial statements of PHI.

Environmental Matters

PHI, through its subsidiaries, is subject to regulation by various federal, regional, state, and local authorities with respect to the environmental effects of its operations, including air and water quality control, solid and hazardous waste disposal, greenhouse gas emissions, and limitations on land use. In addition, federal and state statutes authorize governmental agencies to compel responsible parties to clean up certain abandoned or unremediated hazardous waste sites. PHI's subsidiaries may incur costs to clean up currently or formerly owned facilities or sites found to be contaminated, as well as other facilities or sites that may have been contaminated due to past disposal practices. PHI's subsidiaries may also be responsible for ongoing environmental remediation costs associated with facilities or operations that have been sold to third parties as further described in Note (15), "Commitments and Contingencies – Environmental Matters – Conectiv Energy Wholesale Power Generation Sites," to the consolidated financial statements of PHI.

PHI's subsidiaries' currently projected capital expenditures for the replacement of existing or installation of new environmental control facilities that are necessary for compliance with environmental laws, rules or agency orders are approximately $7.5 million in 2014, $7.8 million in 2015, and $2.4 million in each of 2016, 2017 and 2018. The projections for these capital expenditures could change depending on the outcome of the matters addressed below or as a result of the imposition of additional environmental requirements or new or different interpretations of existing environmental laws, rules and agency orders. In view of the sale of the Conectiv Energy wholesale power generation business in 2010 and the deactivation in 2012 of two generating facilities located in the District of Columbia owned by Pepco Energy Services, PHI is no longer significantly affected by air quality and other environmental regulations applicable to electricity generating facilities.

Air Quality Regulation

The generating facilities owned by Pepco Energy Services were subject to federal, state and local laws and regulations, including the Federal Clean Air Act (CAA), which limit emissions of air pollutants, require permits for operation of facilities and impose recordkeeping and reporting requirements. Following the June 2012 deactivation of Pepco Energy Services' Buzzard Point and Benning Road oil-fired generating facilities, both of which were considered major sources under the CAA, Pepco Energy Services received authorization in 2013 from the District Department of the Environment (DDOE) to exclude these major sources from the CAA Title V operating permits. DDOE also agreed to transfer the CAA Title V operating permit covering the remaining minor sources (e.g., Pepco-operated emergency generators) to Pepco. Pepco has filed minor source permit applications with DDOE for these minor sources.

Greenhouse Gas Emissions Reporting

In October 2009, the U.S. Environmental Protection Agency (EPA) adopted regulations requiring sources that emit designated greenhouse gases – specifically, carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, and other fluorinated gases (e.g., nitrogen trifluoride and hydrofluorinated ethers) – in excess of specified thresholds to file annual reports with EPA disclosing the amount of such emissions. Under these regulations:

- For the operating period ending with the two oil-fired generating units' deactivation in June 2012, Pepco Energy Services reported CO_2, methane and nitrous oxide for its Benning Road units.

- By April 1 of each year, DPL is required to report with respect to its gas distribution operations CO_2 emissions that would result assuming the complete combustion or oxidation of the annual volume of natural gas it distributed to its customers during the previous calendar year. In addition, DPL is required to report fugitive CO_2 and methane emissions for its gas distribution operations for the previous calendar year. DPL's liquefied natural gas storage facility does not meet the reporting threshold (25,000 metric tons) for fugitive emissions.
- By April 1 of each year, Pepco, DPL and ACE are required to report sulfur hexafluoride emissions from electrical equipment for the previous calendar year.

<u>*Water Quality Regulation*</u>

Clean Water Act

Provisions of the federal Water Pollution Control Act, also known as the Clean Water Act, establish the basic legal structure for regulating the discharge of pollutants from point sources to surface waters of the United States. Among other things, the Clean Water Act requires that any person wishing to discharge pollutants from a point source (generally a confined, discrete conveyance such as a pipe) obtain a National Pollutant Discharge Elimination System (NPDES) permit issued by EPA or by a state agency under a federally authorized state program.

Pepco holds a NPDES permit issued by EPA with a July 19, 2009 effective date, which authorizes discharges from the Benning Road facility, including the now deactivated Pepco Energy Services generating facility located at that site. The permit imposes compliance monitoring and storm water best management practices to satisfy the District of Columbia's Total Maximum Daily Load (TMDL) standards for polychlorinated biphenyls, oil and grease, metals and other substances. As required by the permit, Pepco has initiated a study to identify the source of the regulated substances to determine appropriate best management practices for minimizing the presence of the substances in storm water discharges from the facility. The initial study report was completed in May 2012. Pepco has completed the implementation of the first two phases of the best management practices recommended in the study report (consisting principally of installing metal absorbing filters to capture contaminants from storm water flows, removing stored equipment from areas exposed to the weather, covering and painting exposed metal pipes, and covering and cleaning dumpsters). Pepco will be evaluating the effectiveness of these initial best management practices and will consult with EPA regarding the need for additional measures. The capital expenditures, if any, that may be needed to implement additional best management practices to satisfy TMDL requirements will not be known until Pepco and EPA have completed the assessment of the effectiveness of these initial best management practices. In December 2013, Pepco filed an application with EPA to renew this permit, which is scheduled to expire on June 19, 2014.

EPA Oil Pollution Prevention Regulations

Facilities that, because of their location, store or use oil and could reasonably be expected to discharge oil into water bodies or adjacent shorelines in quantities that may be harmful to the environment are subject to EPA's oil pollution prevention regulations. These regulations require entities to prepare and implement Spill Prevention, Control, and Countermeasure (SPCC) plans and specify site-specific measures to prevent and respond to an oil discharge. The SPCC regulations generally require the use of containment and/or diversionary structures to prevent the discharge of oil in the event of a leak or release of oil at the facility. As an alternative to the containment/diversionary structure requirement, owners of certain oil-filled operational equipment, such as electric system transformers, may comply with EPA's regulations by implementing an inspection and monitoring program, developing an oil spill contingency plan, and providing a written commitment of resources to control and remove any discharge of oil. Pepco, DPL and ACE are complying with the SPCC regulations by employing containment/diversionary structures and by means of inspection and monitoring measures, in each case where such measures have been determined to be appropriate. Total costs of complying with these regulations in 2013 for Pepco, DPL and ACE collectively were approximately $6.6 million. PHI projects total expenditures of approximately $22.5 million over the next five years for its subsidiaries to comply with these regulations, as shown in the capital expenditure projection set forth in "Environmental Matters" above, all of which are to install additional containment facilities and to replace certain oil-filled breakers with gas-filled breakers to eliminate the possibility of an oil release from such equipment. Compliance costs for Pepco Energy Services have not been material, and PHI does not expect that they will become material in the foreseeable future.

Hazardous Substance Regulation

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) authorizes EPA, and comparable state laws authorize state environmental authorities, to issue orders and bring enforcement actions to compel responsible parties to investigate and take remedial actions at any site that is determined to present an actual or potential threat to human health or the environment because of an actual or threatened release of one or more hazardous substances. Parties that generated or transported hazardous substances to such sites, as well as the owners and operators of such sites, may be deemed liable under CERCLA or comparable state laws. Each of Pepco, DPL and ACE has been named by EPA or a state environmental agency as a potentially responsible party in pending proceedings involving certain contaminated sites. For additional information on these matters, see Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Resources and Liquidity – Capital Requirements – Environmental Remediation Obligations," and Note (15), "Commitments and Contingencies – Environmental Matters," to the consolidated financial statements of PHI.

Employees

At December 31, 2013, PHI had the following employees:

		In Collective Bargaining Agreements			
	Non-union	International Brotherhood of Electrical Workers	International Union of Operating Engineers	Other	Total
Pepco	372	1,099	—	—	1,471
DPL	230	650	—	—	880
ACE	191	353	—	—	544
Pepco Energy Services	161	238	42	31	472
PHI Service Company and Other	1,359	299	—	—	1,658
Total PHI Employees	2,313	2,639	42	31	5,025

PHI's subsidiaries are parties to five collective bargaining agreements with four local unions. Collective bargaining agreements are generally renegotiated every three to five years.

Executive Officers of PHI

The names of the executive officers of PHI, their ages and the positions they held as of February 26, 2014, are set forth in the following table. The business experience of each executive officer during the past five years is set forth adjacent to his or her name under the heading "Office and Length of Service" in the following table and in the applicable footnote.

Name	Age	Office and Length of Service
Joseph M. Rigby	57	**Chairman of the Board** 5/09 - Present, **President** 3/08 - Present, and **Chief Executive Officer** 3/09 -Present (1)
David M. Velazquez	54	**Executive Vice President** 3/09 - Present (2)
Kevin C. Fitzgerald	51	**Executive Vice President and General Counsel** 9/12 - Present (3)
Frederick J. Boyle	56	**Senior Vice President and Chief Financial Officer** 4/12 - Present (4)
Kenneth J. Parker	51	**Senior Vice President, Government Affairs and Corporate Citizenship** 9/12 - Present (5)
Thomas H. Graham	53	**Vice President** 8/13 - Present (6)
Ronald K. Clark	58	**Vice President and Controller** 8/05 - Present
Laura L. Monica	57	**Vice President** 8/11 - Present (7)
Hallie M. Reese	50	**Vice President, PHI Service Company** 5/05 - Present
John U. Huffman	54	**President** 6/06 - Present, and **Chief Executive Officer, Pepco Energy Services, Inc.** 3/09 - Present (8)

(1) Mr. Rigby was Chief Operating Officer of PHI from September 2007 until February 28, 2009 and Executive Vice President of PHI from September 2007 until March 2008, Senior Vice President of PHI from August 2002 until September 2007 and Chief Financial Officer of PHI from May 2004 until September 2007. Mr. Rigby was President and Chief Executive Officer of Pepco, DPL and ACE from September 1, 2007 to February 28, 2009. Mr. Rigby has been Chairman of Pepco, DPL and ACE since March 1, 2009. On January, 24, 2014, Mr. Rigby notified PHI that he would be stepping down from his positions as President and Chief Executive Officer of PHI by the end of 2014 and would remain employed by PHI through May 1, 2015 to facilitate the transition of these roles. Mr. Rigby intends to remain as PHI's Chairman of the Board through the 2015 Annual Meeting of Stockholders.

(2) Mr. Velazquez served as President of Conectiv Energy Holding Company, formerly an affiliate of PHI, from June 2006 to February 28, 2009, Chief Executive Officer of Conectiv Energy Holding Company from January 2007 to February 28, 2009 and Chief Operating Officer of Conectiv Energy Holding Company from June 2006 to December 2006.

(3) Mr. Fitzgerald joined PHI in September 2012 as Executive Vice President and General Counsel. Prior to such time, he was a partner with the law firm of Troutman Sanders, LLP in Washington, D.C. since 1997. Mr. Fitzgerald was Managing Partner of that firm's Washington, D.C. office from 1999 until 2010 and Executive Partner for Client Development Strategic Planning from 2010 to September 2012.

(4) Mr. Boyle joined PHI in April 2012 as Senior Vice President and Chief Financial Officer. Prior to such time, he served as Senior Vice President and Chief Financial Officer of DPL Inc. and its wholly owned utility subsidiary, The Dayton Power and Light Company, from December 2010 until its acquisition in 2011. He served as Senior Vice President, Chief Financial Officer and Treasurer of both companies from May 2009 to December 2010, Senior Vice President, Chief Financial Officer, Treasurer and Controller of both companies from December 2008 to May 2009, Vice President, Finance, Chief Accounting Officer and Controller of both companies from June 2008 to November 2008, Vice President, Chief Accounting Officer and Controller of both companies from July 2007 to June 2008, and Vice President and Chief Accounting Officer of both companies from June 2006 to July 2007.
(5) Mr. Parker became Senior Vice President, Government Affairs and Corporate Citizenship effective September 1, 2012. Prior to such time, he served as Vice President of Public Policy from June 2009 to September 2012 and the ACE Region President from March 2005 to June 2009.
(6) Mr. Graham became Vice President, People Strategy and Human Resources effective August 1, 2013. Prior to such time, he served as the Pepco Region President from March 2005 to August 2013.
(7) Ms. Monica joined PHI in August 2011 as Vice President, Corporate Communications. From October 2006 to October 2010, Ms. Monica was Senior Vice President, Corporate Communications at American Water Works Company (NYSE: AWK), and from September 1991 to October 2006, Ms. Monica was President of High Point Communications, a strategic communications firm. Ms. Monica rejoined High Point Communications as President from October 2010 to August 2011.
(8) Mr. Huffman has been employed by Pepco Energy Services since June 2003. He was Chief Operating Officer from April 2006 to February 28, 2009, Senior Vice President from February 2005 to March 2006 and Vice President from June 2003 to February 2005.

Each PHI executive officer is elected annually and serves until his or her respective successor has been elected and qualified or his or her earlier resignation or removal.

Investor Information

Each Reporting Company maintains an Internet web site, at the Internet address listed below:

Reporting Company	Internet Address
PHI	http://www.pepcoholdings.com
Pepco	http://www.pepco.com
DPL	http://www.delmarva.com
ACE	http://www.atlanticcityelectric.com

Each Reporting Company files reports with the SEC under the Exchange Act. Copies of the Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all amendments to those reports, of each Reporting Company are routinely made available free of charge on PHI's Internet Web site (http://www.pepcoholdings.com/investors) as soon as reasonably practicable after such documents are electronically filed with or furnished to the SEC. PHI recognizes its website as a key channel of distribution to reach public investors and as a means of disclosing material non-public information to comply with each Reporting Company's disclosure obligations under SEC Regulation FD. The information contained on the web sites listed above shall not be deemed incorporated into, or to be part of, this Annual Report on Form 10-K, and any web site references included herein are not intended to be made through active hyperlinks.

INFORMATION FOR THIS ITEM IS NOT REQUIRED FOR PEPCO, DPL, AND ACE AS THEY MEET THE CONDITIONS SET FORTH IN GENERAL INSTRUCTIONS I(1)(a) AND (b) OF FORM 10-K AND THEREFORE ARE FILING THIS FORM WITH THE REDUCED FILING FORMAT.

Item 1A. RISK FACTORS

The businesses of each Reporting Company are subject to numerous risks and uncertainties, including the events or conditions identified below. The occurrence of one or more of these events or conditions could have an adverse effect on the business of any one or more of the Reporting Companies, including, depending on the circumstances, its financial condition, results of operations and cash flow. Unless otherwise noted, each risk factor set forth below applies to each Reporting Company.

PHI's utility subsidiaries are subject to comprehensive regulation which significantly affects their operations. PHI's utility subsidiaries may be subject to fines, penalties and other sanctions for the inability to meet these requirements.

The regulated utilities that comprise Power Delivery are subject to extensive regulation by various federal, state and local regulatory agencies. Each of Pepco, DPL and ACE is regulated by the state agencies for each service territory in which it operates, with respect to, among other things, the manner in which utility service is provided to customers, as well as rates it can charge customers for the distribution and supply of electricity (and, additionally for DPL, the distribution and supply of natural gas). NERC has also established, and FERC has approved, reliability standards with regard to the bulk power system that impose certain operating, planning and cyber security requirements on Pepco, DPL, ACE and Pepco Energy Services. Further, FERC regulates the electricity transmission facilities of Pepco, DPL and ACE.

Approval of these regulators is required in connection with changes in rates and other aspects of the utilities' operations. These regulatory authorities, and NERC with respect to electric reliability, are empowered to impose financial penalties, fines and other sanctions including setting rates at a level that may be inadequate to permit recovery of costs against the utilities for non-compliance with certain rules and regulations. In this regard, in December 2011, the MPSC sanctioned Pepco related to its reliability in connection with major storm events that occurred in July and August 2010. These sanctions included imposing a fine on Pepco and requiring Pepco to file a work plan detailing, among other things, its reliability improvement objectives and progress in meeting those objectives, while raising the possibility of additional fines or cost recovery disallowances for failing to meet those objectives.

NERC's eight regional oversight entities, including RFC, of which Pepco, DPL, ACE and Pepco Energy Services are members, and the Northeast Power Coordinating Council (NPCC), of which Pepco Energy Services is a member, are charged with the day-to-day implementation and enforcement of NERC's standards. RFC and NPCC perform compliance audits on entities registered with NERC based on reliability standards and criteria established by NERC. NERC, RFC and NPCC also conduct compliance investigations in response to a system disturbance, complaint, or possible violation of a reliability standard identified by other means. Pepco, DPL, ACE and Pepco Energy Services are subject to routine audits and monitoring with respect to compliance with applicable NERC reliability standards, including standards requested by FERC to increase the number of assets (including cyber security assets) subject to NERC cyber security standards that are designated as "critical assets." From time to time, Pepco, DPL and ACE have entered into settlement agreements with RFC resolving alleged violations and resulting in fines. There can be no assurance that additional settlements resolving issues related to RFC or NPCC requirements will not occur in the future. The imposition of additional sanctions and civil fines by these enforcement entities could have a material adverse effect on a Reporting Company's results of operations, cash flow and financial condition.

PHI's utility subsidiaries, as well as Pepco Energy Services, are also required to have numerous permits, approvals and certificates from governmental agencies that regulate their businesses. Although PHI believes that each of its subsidiaries has, and each of Pepco, DPL and ACE believes it has, obtained or sought renewal of the material permits, approvals and certificates necessary for its existing operations and that its business is conducted in accordance with applicable laws, PHI is unable to predict the impact that future regulatory activities may have on its business. Changes in or reinterpretations of existing laws or regulations, or the imposition of new laws or regulations, may require any one or more of PHI's subsidiaries to incur additional expenses or significant capital expenditures or to change the way it conducts its operations.

PHI's profitability is largely dependent on its ability to recover costs of providing utility services to its customers and to earn an adequate return on its capital investments. The failure of PHI's utility subsidiaries to obtain timely recognition of costs in rates may have a negative effect on PHI's results of operations and financial condition.

The public service commissions which regulate PHI's utility subsidiaries establish utility rates and tariffs intended to provide the utility the opportunity to obtain revenues sufficient to recover its prudently incurred costs, together with a reasonable return on investor supplied capital. These regulatory authorities also determine how Pepco, DPL and ACE recover from their customers purchased power and natural gas and other operating costs, including transmission and other costs. The utilities cannot change their rates without approval by the applicable regulatory authority. There can be no assurance that the regulatory authorities will consider all costs to have been prudently incurred, nor can there be any assurance that the regulatory process by which rates are determined will always result in rates that achieve full and timely recovery of costs or a just and reasonable rate of return on investments. In addition, if the costs incurred by any of the utilities in operating its business exceed the amounts on which its approved rates are based, the financial results of that utility, and correspondingly PHI, may be adversely affected.

For example, PHI's utility subsidiaries are exposed to "regulatory lag," which refers to a shortfall in revenues in a utility's rate structure due to the delay in time or "lag" between when costs are incurred and when they are reflected in rates. All of PHI's utilities are currently experiencing significant regulatory lag because their investments in rate base and operating expenses are increasing more rapidly than their revenue growth. PHI anticipates that this trend will continue for the foreseeable future. The failure to timely recognize costs in rates could have a material adverse effect on PHI's and each utility subsidiary's business, results of operations, cash flow and financial condition.

Each of PHI's utility subsidiaries will continue to seek cost recovery from applicable public service commissions to reduce the effects of regulatory lag and have an opportunity to earn its authorized return on equity. See Part I, Item 1. "Business – Regulation – Mitigation of Regulatory Lag." There can be no assurance that any attempts by Pepco, DPL and ACE to mitigate regulatory lag will be approved, or that even if approved, the cost recovery mechanisms will fully mitigate the effects of regulatory lag. The inability of PHI's utility subsidiaries to obtain relief from the impact of regulatory lag through base rate cases or otherwise may have a material adverse effect on the business, results of operations, cash flow and financial condition of PHI and each utility subsidiary.

The operating results of Power Delivery fluctuate on a seasonal basis and can be adversely affected by changes in weather.

The Power Delivery business historically has been seasonal and, as a result, weather has had a material impact on its operating performance. Demand for electricity is generally higher in the summer months associated with cooling and demand for electricity and natural gas is generally higher in the winter months associated with heating as compared to other times of the year. Accordingly, each of PHI, Pepco, DPL and ACE historically has generated less revenue and income when temperatures are warmer in the winter and cooler in the summer. In addition, severe weather conditions can produce storms that cause extensive damage to the transmission and distribution systems, as well as related facilities, that can require the utilities to incur additional operation and maintenance expense, as well as capital expenditures. These additional costs can be significant and the rates charged to customers may not always be timely or adequately adjusted to reflect these higher costs.

In the District of Columbia and Maryland, Pepco and DPL are subject to a bill stabilization adjustment mechanism applicable to retail customers, which decouples distribution revenue for a given reporting period from the amount of power delivered during the period. The bill stabilization mechanism has the effect in those jurisdictions of reducing the impact of changes in the use of electricity by retail customers due to weather conditions or for other reasons on reported distribution revenue and income. A comparable revenue decoupling mechanism for DPL electricity and natural gas customers in Delaware is under consideration by the DPSC. In those jurisdictions that have not adopted a bill stabilization adjustment or similar mechanism, operating results continue to be affected by weather conditions.

Facilities and related systems may not operate as planned or may require significant capital or operation and maintenance expenditures, which could decrease revenues or increase expenses.

Operation of the Pepco, DPL and ACE transmission and distribution facilities and related systems involves many risks, including: the breakdown or failure of equipment; accidents; labor disputes; theft of copper wire or pipe; failure of computer systems, software or hardware; and performance below expected levels. Older facilities, systems and equipment, even if maintained in accordance with sound engineering practices, may require significant capital expenditures for additions or upgrades to provide reliable operations or to comply with changing environmental requirements. Thefts of copper wire or pipe, which seek to capitalize on the current high market price of copper, increase the likelihood of poor system voltage control, electricity and streetlight outages, damage to equipment and property, and injury or death, as well as increasing the likelihood of damage to fuel lines, which can create an unsafe and potentially explosive condition. Natural disasters and weather, including tornadoes, hurricanes and snow and ice storms, also can disrupt transmission and distribution systems. Disruption of the operation of transmission or distribution facilities and related systems can reduce revenues and result in the incurrence of additional expenses that may not be recoverable from customers or through insurance. Upgrades and improvements to computer systems and networks may require substantial amounts of management's time and financial resources to complete, and may also result in system or network defects or operational errors due to employees' inexperience of using a new or upgraded system.

In connection with the replacement of certain customers' existing electric and natural gas meters with smart meters as part of the AMI system, Pepco and DPL were required to construct a wireless network across certain of their service territories and to implement and integrate new and existing information technology systems to collect and manage data made available by the smart meters and the AMI system. The implementation of the AMI system involves a combination of technologies provided by multiple vendors. If the AMI system results in lower than projected performance, PHI's utility subsidiaries could experience higher than anticipated maintenance expenditures.

Energy companies are subject to adverse publicity and reputational risks, which make them vulnerable to negative customer perception and could lead to increased regulatory oversight or other sanctions.

Utility companies, including PHI's utility subsidiaries, have a large consumer customer base and as a result have been the subject of public criticism focused on the reliability of their distribution services and the speed with which they are able to respond to outages caused by storm damage or other unanticipated events. Adverse publicity of this nature may render legislatures and other governing bodies, public service commissions and other regulatory authorities, and government officials less likely to view energy companies such as PHI and its subsidiaries in a favorable light, and may cause PHI and its subsidiaries to be susceptible to less favorable legislative and regulatory outcomes, as well as increased regulatory oversight and more stringent regulatory requirements. Unfavorable regulatory outcomes can include the enactment of more stringent laws and regulations governing PHI's operations, such as reliability and customer service quality standards or vegetation management requirements, as well as fines, penalties or other sanctions or requirements. The imposition of any of the foregoing could have a material negative impact on PHI's and each utility subsidiary's business, results of operations, cash flow and financial condition.

Unfavorable regulatory developments and compliance with new or more rigorous regulatory requirements will subject PHI's utility subsidiaries to higher operating costs.

PHI's utility subsidiaries are subject to and will continue to be subject to changing regulatory requirements, including those related to reliability and customer service, in the various jurisdictions in which they operate. For example, in 2012, the MPSC adopted rules establishing reliability and customer service requirements. In April 2014, DPL expects to file an annual report with the MPSC in which it will indicate that it was not in compliance with certain of these reliability requirements for 2013. In addition, in July 2011, the DCPSC adopted regulations that establish specific maximum outage frequency and outage duration levels beginning in 2013 and continuing through 2020 and thereafter and are intended to require Pepco to achieve a reliability level in the first quartile of all utilities in the nation by 2020. Pepco believes that the DCPSC's standards are achievable in the short term, but believes that the standards may not be realistically achievable at an acceptable cost over the longer term. The reliability standards permit Pepco to petition the DCPSC to reevaluate these standards for the period from 2016 to 2020 to address feasibility and cost issues.

Each of Pepco and DPL expect that it will have to incur significant operating and maintenance and capital expenses to comply with these requirements. Furthermore, each of Pepco and DPL would be subject to civil penalties or other sanctions if it does not meet the required performance or reliability standards. Other jurisdictions in which PHI's utility subsidiaries have operations have already adopted or may in the future adopt reliability and customer service quality standards, the violation of which could also result in the imposition of penalties, fines and other sanctions. Compliance, and any failure to comply, with current, proposed or future regulatory requirements may have a material adverse effect on PHI and each utility subsidiary's business, results of operations, cash flow and financial condition.

The resolution of tax matters involving PHI's former cross-border energy lease investments may have a material negative impact on PHI's results of operations and financial condition. (PHI only).

Prior to July 2013, a wholly-owned subsidiary of PHI had maintained a portfolio of cross-border energy lease investments involving public utility assets located outside of the United States, which investments were terminated during the third quarter of 2013 prior to the expiration date of the leases. The aggregate financial impact to PHI of the completion of these early terminations resulted in a pre-tax loss, including transaction costs, of approximately $3 million ($2 million after-tax) for the year ended December 31, 2013.

These cross-border energy lease investments, each of which was with a tax-indifferent party, have been under examination by the IRS as part of normal PHI federal income tax audits. In connection with the audits of PHI's federal income tax returns from 2001 to 2008, the IRS disallowed the depreciation and interest deductions in excess of rental income claimed by PHI with respect to its cross-border energy lease investments. In addition, the IRS has sought to recharacterize the leases as loan transactions. In January 2012, PHI commenced litigation in the U.S. Court of Federal Claims regarding the disallowance of certain tax benefits claimed by PHI on its federal tax returns for 2001 and 2002.

In January 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in an unrelated case that disallowed tax benefits associated with a lease-in, lease-out transaction. After analyzing this ruling, in the first quarter of 2013, PHI determined that its tax position with respect to the tax benefits associated with its cross-border energy leases no longer met the more-likely-than-not standard of recognition for accounting purposes. Accordingly, PHI recorded non-cash charges of $383 million (after-tax) in the first half of 2013, consisting of a non-cash charge to reduce the carrying value of the cross-border energy lease investments and a non-cash charge to reflect the anticipated additional interest expense related to changes in estimated federal and state income tax obligations for the period over which the tax benefits may be disallowed.

After consideration of certain tax benefits arising from matters unrelated to these lease investments, PHI estimated that, as of March 31, 2013, it would have been obligated to pay approximately $192 million in additional federal and state taxes and approximately $50 million of interest on the additional federal and state taxes. In order to mitigate PHI's ongoing interest costs associated with the $242 million estimate of additional taxes and interest, PHI made an advanced payment to the IRS of $242 million in the first quarter of 2013. While PHI presently believes that it is more likely than not that no penalty will be incurred, the IRS could require PHI to pay a penalty of up to 20% of the amount of additional taxes due. In order to mitigate the cost of continued litigation related to the cross-border energy lease investments, PHI and its subsidiaries have entered into discussions with the IRS with the intention of seeking a settlement of all tax issues for open tax years 2001 through 2011, including the cross-border energy lease issue. PHI currently believes that it is possible that a settlement with the IRS may be reached in 2014. If a settlement of all tax issues or a standalone settlement on the cross-border energy leases is not reached, PHI may move forward with its litigation with the IRS. Further discovery in the case is stayed until April 24, 2014, pursuant to an order issued by the court on January 30, 2014.

Given the uncertainties associated with PHI's litigation with the IRS, as well as with other efforts by PHI to address and resolve tax matters associated with its former cross-border energy leases in tax years not subject to this litigation, the aggregate financial impact, and timing of the resolution, of all of these matters cannot be determined presently; however, PHI presently believes that any such impact on PHI's consolidated results of operations and financial condition could be material.

Power Delivery's transmission facilities are interconnected with the facilities of other transmission facility owners. Failures of neighboring transmission systems could have a negative impact on Power Delivery's operations.

The electricity transmission facilities of Pepco, DPL and ACE are interconnected with the transmission facilities of neighboring utilities and are part of the interstate power transmission grid. Pepco, DPL and ACE are members of the PJM RTO, a regional transmission organization that operates the portion of the interstate transmission grid that includes the PHI transmission facilities. Although PJM's systems and operations are designed to ensure the reliable operation of the transmission grid and prevent the operations of one utility from having an adverse impact on the operations of the other utilities, there can be no assurance that service interruptions originating at other utilities will not cause interruptions in the Pepco, DPL or ACE service territories. Thus, due to the interconnected nature of the interstate power transmission grid, an outage in a neighboring utility could trigger a system outage in either Pepco, DPL or ACE. If Pepco, DPL or ACE were to suffer such a service interruption, it could have a negative impact on its and PHI's business, results of operations, cash flow and financial condition.

Changes in technology, distributed generation and conservation measures may adversely affect Power Delivery.

Increased conservation and end-user generation made possible through current or future advances in technology, such as through fuel and solar (photovoltaic) cells, wind power and microturbines, could reduce demand for the transmission and distribution facilities of Power Delivery and adversely affect the results of operations of PHI and one or more of its utility subsidiaries. Alternative technologies that produce electricity, the development of which has expanded due to climate change and other environmental concerns, could ultimately provide alternative sources of electricity and permit current customers to adopt distributed generation systems which would allow them to generate electricity for their own use. As these and other technologies are created, developed and improved, the quantity and frequency of electricity usage by customers could decline, which could have a negative impact on the business, results of operations, cash flow and financial condition of PHI or its utility subsidiaries.

The cost of compliance with environmental laws is significant and implementation of new and existing environmental laws may increase operating costs.

The operations of PHI's subsidiaries are subject to extensive federal, state and local environmental laws and regulations relating to air quality, water quality, spill prevention, waste management, natural resource protection, site remediation, greenhouse gas emissions and health and safety. These laws and regulations may require significant capital and other expenditures to, among other things, meet emissions and effluent standards, conduct site remediation, complete environmental studies and perform environmental monitoring. If a company fails to comply with applicable environmental laws and regulations, even if caused by factors beyond its control, such failure could result in the assessment of civil or criminal penalties and liabilities and the need to expend significant sums to achieve compliance.

In addition, PHI's subsidiaries are required to obtain and comply with a variety of environmental permits, licenses, inspections and other approvals. If there is a delay in obtaining any required environmental regulatory approval, or if there is a failure to obtain, maintain or comply with any such approval, operations at affected facilities could be halted or subjected to additional costs.

Failure to retain and attract key skilled and properly motivated professional and technical employees could have an adverse effect on operations.

PHI and its subsidiaries operate in a highly regulated industry that requires the continued operation of sophisticated systems and technology. One of the challenges they face in implementing their business strategy is to attract, motivate and retain a skilled, efficient and cost-effective workforce while recruiting new talent to replace losses in knowledge and skills due to retirements. Over the course of the next three years, PHI estimates that approximately one-third of this skilled workforce will reach retirement age. Competition for skilled employees in some areas is high and the inability to attract and retain these employees, especially as existing skilled workers retire in the near future, could adversely affect the business, operations and financial condition of PHI or the affected company.

PHI's subsidiaries are subject to collective bargaining agreements that could impact their business and operations.

As of December 31, 2013, 54% of employees of PHI and its subsidiaries, collectively, were represented by various labor unions. PHI's subsidiaries are parties to five collective bargaining agreements with four local unions that represent these employees. Collective bargaining agreements are generally renegotiated every three to five years, and the risk exists that there could be a work stoppage after expiration of an agreement until a new collective bargaining agreement has been reached. Labor negotiations typically involve bargaining over wages, benefits and working conditions, including management rights. PHI's last work stoppage, a two-week strike by DPL's employees, occurred in 2010. During that strike, DPL used management and contractor employees to maintain essential operations. Though PHI believes that protracted work stoppages are unlikely, such an event could result in a disruption of the operations of the affected utility, which could, in turn, have a material adverse effect upon the business, results of operations, cash flow and financial condition of the affected utility and PHI.

The energy savings business of Pepco Energy Services is highly competitive and its thermal operation in Atlantic City is exposed to customer concentration. (PHI only)

Unlike PHI's regulated business, Pepco Energy Services' energy savings business is unregulated and its energy savings performance contracting business is highly competitive. This competition puts downward pressure on margins and increases costs. The energy savings business is affected by new entrants into the market, financial strength of customers, energy prices and general economic conditions. These factors may negatively affect Pepco Energy Services' ability to market its services to new customers or renew existing contracts, as well as the prices Pepco Energy Services may charge.

Among the factors on which the energy savings business competes are the amount and duration of the guarantees provided in energy savings performance contracts. In connection with many of its energy savings performance installation projects, Pepco Energy Services guarantees a minimum level of annual energy cost savings over a period of typically up to 15 years. Currently, Pepco Energy Services does not insure against this risk, and accordingly could suffer financial losses if a project does not achieve the guaranteed level of performance.

Under the Budget Control Act of 2011, mandatory federal spending cuts, also known as “sequestration,” are effective for years 2013 through 2021 unless Congress agrees to a deficit reduction plan. In January 2013, Congress passed, and the President signed, the American Taxpayer Relief Act of 2012 that addressed rising federal income tax rates that would have taken effect on January 1, 2013. Although Congress has enacted the Consolidated Appropriations Act of 2014, which is expected to alleviate the effects of sequestration on the Department of Defense through October 2014, the continuation of other substantial federal spending cuts could make it more difficult for Pepco Energy Services to enter into new energy savings performance contracts with federal, state and local government agencies and thus could have a material adverse effect on the energy savings business of Pepco Energy Services.

In addition, revenues associated with Pepco Energy Services’ combined heat and power thermal generating plant and operation in Atlantic City, New Jersey are concentrated with a few major customers in the Atlantic City hotel and casino industry. Pepco Energy Services has long-term contracts with these customers, and for the largest customer, the contracts expire in 2017. The Atlantic City hotel and casino industry has been experiencing a decrease in gaming revenues and overcapacity, as well as potential future competition from casinos that are being constructed in nearby markets. Pepco Energy Services is exposed to the risk that it is not able to renew these contracts or that the contract counterparties may fail to perform their obligations thereunder. In either case, Pepco Energy Services may be required to conclude that the assets with an aggregate carrying value as of December 31, 2013 of approximately $85 million associated with the generating plant or operation have been impaired, which would require Pepco Energy Services to reduce the carrying value of these assets by the amount of the impairment and record a corresponding non-cash charge to earnings. Any of these events could have a material adverse effect on PHI’s and Pepco Energy Services’ financial condition, results of operations and cash flow.

Under its energy savings performance contracts, Pepco Energy Services is responsible for maintaining, repairing and replacing energy equipment, which obligations may require Pepco Energy Services to incur significant costs many years after an installation of a project is completed. (PHI only)

Pepco Energy Services owns energy equipment and is also responsible for operating and maintaining additional energy equipment that it does not own. In addition, it is generally Pepco Energy Services’ responsibility to repair or replace this energy equipment in the event of a failure. These equipment maintenance, repair and replacement obligations could be material and could adversely affect PHI’s results of operations, cash flow and financial condition.

Pepco Energy Services’ obligations in connection with its combined heat and power construction projects, energy savings construction projects and energy savings performance contracts may have a material adverse effect on PHI. (PHI only)

Pepco Energy Services has undertaken projects which include design, construction, startup and testing activities related to combined heat and power and energy savings construction projects, pursuant to guaranteed maximum price or fixed-price contracts. Pepco Energy Services will generally secure commitments from subcontractors and vendors to perform within contract pricing commitments, equipment-performance standards, jobsite safety requirements, and other key parameters. Under a number of these projects, the customer of Pepco Energy Services has required Pepco Energy Services to obtain surety bonds securing the performance of Pepco Energy Services, or its subcontractors or vendors. PHI has been required to guarantee the performance of Pepco Energy Services under the surety bonds and certain of these construction contracts. PHI also guarantees the obligations of Pepco Energy Services under certain of its energy savings performance contracts. At December 31, 2013, PHI's guarantees of Pepco Energy Services' obligations under its energy savings performance, combined heat and power, and construction contracts totaled $190 million, and PHI's guarantees of Pepco Energy Services' obligations under surety bonds for construction projects totaled $229 million.

As a result, PHI may bear responsibility in the event of unexcused failures by Pepco Energy Services or its subcontractors or vendors to perform in accordance with the terms of these contracts, or if the customer does not realize the energy savings provided for in a performance contract. When such events occur, Pepco Energy Services and PHI may experience reputational harm and claims for money damages and other relief that may be sought in connection with such contracts, guarantees and surety bonds, which could, depending upon the nature of the claim and the amount of damages or other relief sought, have a material adverse effect upon Pepco Energy Services' and PHI's business, results of operations, cash flow and financial condition.

If PHI is not successful in mitigating the risks inherent in its business, its operations could be adversely affected.

PHI and its subsidiaries are faced with a number of different types of risk. PHI confronts legislative, regulatory policy, compliance and other risks, including:

- PHI's inability to timely recover capital and operating costs, which may result in a shortfall in revenues;
- resource planning and other long-term planning risks, including resource acquisition risks, which may hinder PHI's ability to maintain adequate resources;
- financial risks, including credit, interest rate and capital market risks, which could increase the cost of capital or make raising capital more difficult; and
- macroeconomic risks, and risks related to economic conditions and changes in demand for electricity and natural gas in the service territories of PHI's utility subsidiaries (including changes due to or in connection with the loss of one or more commercial customers of a utility subsidiary), as well as with respect to Pepco Energy Services' business, which could negatively impact the operations of the affected business.

PHI management seeks to mitigate the risks inherent in the implementation of PHI's business strategy through its established risk mitigation process, which includes adherence to PHI's business policies and other compliance policies, operation of formal risk management structures and groups, and overall business management. PHI management is responsible for identifying, assessing and managing risks, and developing risk-management strategies, while the Board of Directors and its various committees oversee the assessment, management and mitigation of risk. However, there can be no assurance these risk mitigation efforts will adequately address all such risks or that such efforts will be successful, and a failure to successfully mitigate such risks may have a material adverse effect on the business, results of operations, cash flow or financial condition of one or more of the Reporting Companies.

PHI and its subsidiaries are exposed to contractual and credit risks associated with certain of their operations.

PHI and its subsidiaries are subject to a number of contractual and credit risks associated with certain of their operations. To mitigate contractual or credit risk, PHI or a subsidiary may give to or receive from the counterparty collateral or other types of performance assurance, which may be in the form of cash, letters of credit or parent guarantees, to protect against performance and credit risk. Even where collateral is provided, capital market disruptions, the lowered rating or insolvency of the issuer or guarantor, changes in the power supply market prices and other events may prevent a party from being able to meet its obligations or may degrade the value of collateral, letters of credit and guarantees, and the collateral, guarantee or other performance assurance provided may prove insufficient to protect against all losses that a party may ultimately suffer. In the event of a bankruptcy of a counterparty to any contract to which PHI or any of its subsidiaries is a party, bankruptcy law, in some circumstances, could require the surrender of collateral or other guarantees held or payments received.

Business operations could be adversely affected by terrorism and cyber attacks.

The threat of, or actual acts of, terrorism may affect the operations of PHI and its subsidiaries in unpredictable ways and may cause changes in the insurance markets, force an increase in security measures and cause electrical disruptions or disruptions of fuel supplies and markets, including natural gas. Utility industry operations require the continued deployment and utilization of sophisticated information technology systems and network infrastructure. While PHI has implemented protective measures designed to mitigate its vulnerability to physical and cyber threats and attacks, such protective measures, and technology systems generally, are vulnerable to disability or failure due to cyber attack, acts of war or terrorism, and other causes. As a result, there can be no assurance that such protective measures will be completely effective in protecting PHI's infrastructure or assets from a physical or cyber attack or the effects thereof. If any of Pepco's, DPL's or ACE's infrastructure facilities, including their transmission or distribution facilities, were to be a direct target, or an indirect casualty, of an act of terrorism, the operations of PHI, Pepco, DPL or ACE could be adversely affected. Furthermore, any threats or actions that negatively impact the physical security of PHI's and its subsidiaries' facilities, or the integrity or security of their computer networks and systems (and any programs or data stored thereon or therein), could adversely affect PHI's and its subsidiaries' ability to manage these facilities, networks, systems, programs and data efficiently or effectively, which in turn could have a material adverse effect on PHI's or its subsidiaries' results of operations and financial condition. Corresponding instability in the financial markets as a result of threats or acts of terrorism or threatened or actual cyber attacks also could adversely affect the ability of PHI or its subsidiaries to raise needed capital.

New accounting standards or changes to existing accounting standards could materially impact how a Reporting Company reports its results of operations, cash flow and financial condition.

Each Reporting Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The SEC, the Public Company Accounting Oversight Board, the Financial Accounting Standards Board (FASB) or other authoritative bodies or governmental entities may issue new pronouncements or new interpretations of existing accounting standards that may require the Reporting Companies to change their accounting policies. These changes are beyond the control of the Reporting Companies, can be difficult to predict and could materially impact how they report their results of operations, cash flow and financial condition. Each Reporting Company could be required to apply a new or revised standard retroactively, which could adversely affect its results of operations, cash flow and financial condition.

Undetected errors in internal controls and information reporting could result in the disallowance of cost recovery and noncompliant disclosure.

Each Reporting Company's internal controls, accounting policies and practices and internal information systems are designed to enable the Reporting Company to capture and process transactions and information in a timely and accurate manner in compliance with GAAP, taxation requirements, federal securities laws and regulations and other laws and regulations (including pursuant to federal and state administrative grant programs) applicable to it. Such compliance permits each Reporting Company to, among other things, disclose and report financial and other information in connection with the recovery of its costs and with the reporting requirements for each Reporting Company under federal securities, tax and other laws and regulations.

Each Reporting Company has implemented corporate governance, internal control and accounting policies and procedures in connection with the Sarbanes-Oxley Act of 2002 (the Sarbanes-Oxley Act) and relevant SEC rules, as well as other applicable regulations. Such internal controls and policies have been and continue to be closely monitored by each Reporting Company's management and PHI's Board of Directors to ensure continued compliance with these laws, rules and regulations. Management is also responsible for establishing and maintaining internal control over financial reporting and is required to assess annually the effectiveness of these controls. While PHI believes these controls, policies, practices and systems are adequate to verify data integrity, unanticipated and unauthorized actions of employees or temporary lapses in internal controls due to shortfalls in oversight or resource constraints could lead to undetected errors that could result in the disallowance of cost recovery and noncompliant disclosure and reporting. The consequences of these events could have a negative impact on the results of operations and financial condition of the affected Reporting Company. The inability of management to certify as to the effectiveness of these controls due to the identification of one or more material weaknesses in these controls could also increase financing costs or could also adversely affect the ability of a Reporting Company to access the capital markets.

Insurance coverage may not be sufficient to cover all casualty or property losses that PHI and its subsidiaries might incur.

PHI and its subsidiaries, including Pepco, DPL and ACE, as well as Pepco Energy Services, currently have insurance coverage for their facilities and operations in amounts and with deductibles that they consider appropriate. However, there is no assurance that such insurance coverage will be available in the future on commercially reasonable terms or at all. In addition, some risks and losses, such as weather related casualties, may not be insurable, and, where a risk has been insured, a risk or loss may be deemed to be excluded from coverage or coverage may otherwise be denied in whole or in part. In the case of loss or damage to property, plant, equipment or other assets, there is no assurance that the insurance proceeds received, if any, will be sufficient to cover the entire loss, including costs of replacement or repair.

PHI and its subsidiaries are dependent on obtaining access to the capital markets and bank financing to satisfy their capital and liquidity requirements. The inability to obtain required financing when needed would have an adverse effect on their respective businesses.

PHI and its subsidiaries, including Pepco, DPL and ACE, have significant capital requirements, including the funding of construction expenditures and the refinancing of maturing debt. Each of the Reporting Companies relies primarily on cash flow from operations, access to the capital markets and medium- and long-term bank financing, to meet these long-term financing needs. The operating activities of PHI and its subsidiaries also require continued access to short-term sources of liquidity, including issuances by a Reporting Company of commercial paper and access to money markets and short-term bank financing, to provide for short-term liquidity needs that are not met by cash flows from their operations. Adverse business developments or market disruptions could increase the cost of financing or prevent PHI or any of its subsidiaries from accessing these sources of short-term and long-term capital. Events that could cause or contribute to a disruption of the financial markets include, but are not limited to:

- a recession or an economic slowdown;
- the bankruptcy of one or more energy companies or financial institutions;
- a significant change in energy prices;
- a terrorist or cyber attack or threatened attacks;
- the outbreak of a pandemic or other similar event; or
- a significant electricity or natural gas transmission disruption.

Any reductions in or other actions with respect to the credit ratings of PHI or any of its subsidiaries could increase its financing costs and the cost of maintaining certain contractual relationships.

Nationally recognized rating agencies currently rate each Reporting Company and debt securities issued by Pepco, DPL and ACE. Ratings are not recommendations to buy or sell securities. PHI or its subsidiaries may, in the future, incur new indebtedness with interest rates that may be affected by changes in or other actions associated with these credit ratings. Each of the rating agencies reviews its ratings periodically, and previous ratings may not be maintained in the future. Rating agencies may also place a Reporting Company under review for potential downgrade in certain circumstances or if any of them seek to take certain actions that it believes would otherwise be in its best interests. A downgrade of these debt ratings or other negative action, such as a review for a potential downgrade, could affect the market price of existing indebtedness and the ability to raise additional debt without incurring increases in the cost of capital. In addition, a downgrade of these ratings, or other negative action, could make it more difficult to raise capital to refinance any maturing debt obligations, to support business growth and to maintain or improve the current financial strength of PHI's business and operations.

The agreements that govern PHI's primary credit facility, as well as term loan agreements that have been entered into from time to time, contain a consolidated indebtedness covenant that may limit discretion of each borrower to incur indebtedness or reduce its equity.

Under the terms of PHI's primary credit facility, of which each Reporting Company is a borrower, and of term loan agreements that have been entered into from time to time, the consolidated indebtedness of a borrower cannot exceed 65% of its consolidated capitalization. If a borrower's equity were to decline or its debt were to increase to a level that caused its debt to exceed this limit, lenders under the credit facility would be entitled to refuse any further extension of credit and to declare all of the outstanding debt under the credit facility or the term loan immediately due and payable. To avoid such a default, a waiver or renegotiation of this covenant would be required, which would likely increase funding costs and could result in additional covenants that would restrict each Reporting Company's operational and financing flexibility.

Each borrower's ability to comply with this covenant is subject to various risks and uncertainties, including events beyond the borrower's control. For example, events that could cause a reduction in PHI's equity include, without limitation, potential IRS taxes, interest and penalties associated with PHI's former cross-border energy lease investments or a significant write-down of PHI's goodwill. Even if each borrower is able to comply with this covenant, the limitations on its operational and financial flexibility could harm its and PHI's business by, among other things, limiting the borrower's ability to incur indebtedness or reduce equity in connection with financings or other corporate opportunities that it may believe would be in its best interests or the interests of PHI's stockholders to complete.

PHI's cash flow, ability to pay dividends and ability to satisfy debt obligations depend on the performance of its regulated and competitive operating subsidiaries, access to the capital markets and other sources of liquidity. PHI's unsecured obligations are effectively subordinated to the liabilities of its subsidiaries. (PHI only)

PHI is a holding company that conducts its operations entirely through its regulated and competitive subsidiaries, and all of PHI's consolidated operating assets are held by its subsidiaries. Accordingly, PHI's cash flow, its ability to satisfy its obligations to creditors and its ability to pay dividends on its common stock are dependent upon the earnings of its subsidiaries, each Reporting Company's access to the capital markets and all sources of cash flow and liquidity that may be available to PHI. PHI's subsidiaries are separate legal entities and have no obligation to pay any amounts due on any debt or equity securities issued by PHI or to make any funds available for such payment. The ability of PHI's subsidiaries to pay dividends and make other payments to PHI may be restricted by, among other things, applicable corporate, tax and other laws and regulations and agreements made by PHI and its subsidiaries, including under the terms of indebtedness, and PHI's financial objective of maintaining a common equity ratio at its utility subsidiaries of between 49% and 50%. Because the claims of the creditors of PHI's subsidiaries are superior to PHI's entitlement to dividends, the unsecured debt and obligations of PHI are effectively subordinated to all existing and future liabilities of its subsidiaries, including trade creditors. In addition, claims of creditors, including trade creditors, of PHI's subsidiaries will generally have priority with respect to the assets and earnings of such subsidiaries over the claims of PHI's creditors.

PHI has a significant goodwill balance related to its Power Delivery business. A determination that goodwill is impaired could result in a significant non-cash charge to earnings.

PHI had a goodwill balance at December 31, 2013, of approximately $1.4 billion, primarily attributable to Pepco's acquisition of Conectiv in 2002. An impairment charge must be recorded under GAAP to the extent that the implied fair value of goodwill is less than the carrying value of goodwill, as shown on the consolidated balance sheet. PHI is required to test goodwill for impairment at least annually and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors that may result in an interim impairment test include, but are not limited to: an adverse change in business conditions; a protracted decline in stock price causing market capitalization to fall significantly below book value; an adverse regulatory action; impairment of long-lived assets in the reporting unit; or a change in identified reporting units. If PHI were to determine that its goodwill is impaired, PHI would be required to reduce its goodwill balance by the amount of the impairment and record a corresponding non-cash charge to earnings. Depending on the amount of the impairment, an impairment determination could have a material adverse effect on PHI's financial condition, results of operations and cash flow.

The funding of future defined benefit pension plan and post-retirement benefit plan obligations is based on assumptions regarding the valuation of future benefit obligations and the projected performance of plan assets. If market performance decreases plan assets or changes in assumptions regarding the valuation of benefit obligations increase plan liabilities, any of the Reporting Companies may be required to make significant cash contributions to fund these plans.

PHI holds assets in trust to meet its obligations under PHI's defined benefit pension plan and its post-retirement benefit plan. The amounts that PHI is required to contribute (including the amounts for which Pepco, DPL and ACE are responsible) to fund the trusts are determined based on assumptions made as to the valuation of future benefit obligations, and the projected investment performance of the plan assets. Accordingly, the performance of the capital markets will affect the value of plan assets. A decline in the market value of plan assets as well as a decline in the rate of return on plan assets may increase the plan funding requirements to meet the future benefit obligations. In addition, changes in interest rates affect the valuation of the liabilities of the plans. As interest rates decrease, the present value of the liabilities increase, potentially requiring additional funding. Demographic changes, such as a change in the expected timing of retirements or changes in life expectancy assumptions, also may increase the funding requirements of the plans. A need for significant additional funding of the plans could have a material adverse effect on the cash flows of any of the Reporting Companies. Future increases in pension plan and other post-retirement benefit plan costs, to the extent they are not recoverable in the base rates of PHI's utility subsidiaries, could have a material adverse effect on the results of operations, cash flow and financial condition of any of the Reporting Companies.

Provisions of the Delaware General Corporation Law and in PHI's constituent documents may discourage an acquisition of PHI. (PHI only)

PHI is governed by the provisions of Section 203 of the Delaware General Corporation Law, which prohibit a public Delaware corporation from engaging in a business combination with an interested stockholder (as defined in Section 203) for a period commencing three years from the date in which the person became an interested stockholder, unless:

- the board of directors approved the transaction which resulted in the stockholder becoming an interested stockholder;

- upon consummation of the transaction which resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation (excluding shares owned by officers, directors, or certain employee stock purchase plans); or
- at or subsequent to the time the transaction is approved by the board of directors, there is an affirmative vote of at least 66 2/3% of the outstanding voting stock not owned by the interested stockholder approving the transaction.

Section 203 could prohibit or delay mergers or other takeover attempts against PHI, and accordingly, may discourage or prevent attempts to acquire or control PHI through a tender offer, proxy contest or otherwise.

In addition, PHI's restated certificate of incorporation and amended and restated bylaws contain provisions that may discourage, delay or prevent a third party from acquiring PHI, even if doing so would be beneficial to its stockholders. For example, under PHI's restated certificate of incorporation, only its board of directors may call special meetings of stockholders. Further, stockholder actions may only be taken at a duly called annual or special meeting of stockholders and not by written consent. Moreover, directors of PHI may be removed by stockholders only for cause and only by the effective vote of at least a majority of the outstanding shares of capital stock of PHI entitled to vote generally in the election of directors (voting together as a single class) at a meeting of stockholders called for that purpose. In addition, under PHI's amended and restated bylaws, stockholders must comply with advance notice requirements for nominating candidates for election to PHI's board of directors or for proposing matters that can be acted upon by stockholders at stockholder meetings, and this provision may be amended or repealed by stockholders only upon the affirmative vote of the holders of two-thirds of the outstanding shares of PHI capital stock entitled to vote generally in the election of directors, voting together as a single class.

Issuances of additional series of PHI preferred stock could adversely affect holders of PHI's common stock. (PHI only)

PHI's board of directors is authorized to issue shares of PHI preferred stock in series without any action on the part of PHI stockholders. PHI's board of directors also has the power, without stockholder approval, to set the terms of any such series of preferred stock, including with respect to dividend rights, redemption rights and sinking fund provisions, conversion rights, voting rights, and other preferential rights, limitations and restrictions. As of December 31, 2013, there were no shares of PHI preferred stock issued or outstanding.

If PHI issues preferred stock in the future that has a preference over PHI's common stock with respect to the payment of dividends or upon its liquidation, dissolution or winding up, or if preferred stock is issued with voting rights that dilute the voting power of the common stock, the rights of holders of PHI's common stock or the market price of such common stock could be adversely affected. Furthermore, issuances of preferred stock can be used to discourage, delay or prevent a third party from acquiring PHI where the acquisition might be perceived as being beneficial to stockholders.

Because Pepco, DPL and ACE are direct or indirect wholly owned subsidiaries of PHI and have directors and executive officers who are also officers of PHI, PHI can effectively exercise control over their dividend policies and significant business and financial transactions. (Pepco, DPL and ACE only)

All of the members of each of Pepco's, DPL's and ACE's board of directors, as well as many of their respective executive officers, are officers of PHI, and Pepco, DPL and ACE are direct or indirect wholly owned subsidiaries of PHI. Among other decisions, each of Pepco's, DPL's and ACE's board of directors is responsible for decisions regarding payment of dividends, financing and capital raising activities and acquisition and disposition of assets. Within the limitations of applicable law, and subject to the financial covenants under each company's respective outstanding debt instruments, each of Pepco's, DPL's and ACE's board of directors will base its decisions concerning the amount and timing of dividends, and other business decisions, on its capital structure, which is based in part on earnings and cash flow, and also may take into account the business plans and financial requirements of PHI and its other subsidiaries.

Item 2. PROPERTIES

Transmission and Distribution Systems

On a combined basis, the electric transmission and distribution systems owned by Pepco, DPL and ACE at December 31, 2013, consisted of approximately 4,000 transmission circuit miles of overhead lines, 600 transmission circuit miles of underground cables, 18,200 distribution circuit miles of overhead lines, and 15,900 distribution circuit miles of underground cables, primarily in their respective service territories. DPL and ACE own and operate distribution system control centers in New Castle, Delaware and Mays Landing, New Jersey, respectively. Pepco also operates a distribution system control center in Bethesda, Maryland. The computer equipment and systems contained in Pepco's control center are financed through a sale and leaseback transaction.

DPL owns a liquefied natural gas facility located in Wilmington, Delaware, with a storage capacity of approximately 3 million gallons and an emergency sendout capability of 25,000 Mcf per day. DPL owns 10 natural gas city gate stations at various locations in New Castle County, Delaware. These stations have a total primary delivery point contractual entitlement of 202,075 Mcf per day. DPL also owns approximately 104 pipeline miles of natural gas transmission mains, 1,836 pipeline miles of natural gas distribution mains, and 1,321 pipeline miles of natural gas service lines. In addition, DPL has a 10% undivided interest in approximately 7 miles of natural gas transmission mains, which are used by DPL for its natural gas operations and by the 90% owner for distribution of natural gas to its electric generating facilities.

Substantially all of the transmission and distribution property, plant and equipment owned by each of Pepco, DPL and ACE is subject to the liens of the respective mortgages under which the companies issue First Mortgage Bonds. See Note (10), "Debt" to the consolidated financial statements of PHI.

Generating Facilities

The following table identifies the electric generating facilities owned by PHI's subsidiaries at December 31, 2013.

Electric Generating Facilities	Location	Owner	Generating Capacity (kilowatts)
Landfill Gas-Fired Units			
Fauquier Landfill Project	Fauquier County, VA	Pepco Energy Services	2,000
Eastern Landfill Project	Baltimore County, MD	Pepco Energy Services	3,000
Bethlehem Landfill Project	Northampton, PA	Pepco Energy Services	5,000
			10,000
Solar Photovoltaic			
Atlantic City Convention Center	Atlantic City, NJ	Pepco Energy Services	2,000
Combined Heat and Power Generating			
Mid Town Plant	Atlantic City, NJ	Pepco Energy Services	5,400
Total Electric Generating Capacity			17,400

The preceding table sets forth the net summer electric generating capacity of each electric generating facility owned. Although the generating capacity may be higher during the winter months, the facilities are used to meet summer peak loads that are generally higher than winter peak loads. Accordingly, the summer generating capacity more accurately reflects the operational capability of the facilities.

Item 3. LEGAL PROCEEDINGS

Pepco Holdings

Other than litigation incidental to PHI and its subsidiaries' business, PHI is not a party to, and PHI and its subsidiaries' property is not subject to, any material pending legal proceedings except as described in Note (15), "Commitments and Contingencies," to the consolidated financial statements of PHI.

Pepco

Other than litigation incidental to its business, Pepco is not a party to, and its property is not subject to, any material pending legal proceedings except as described in Note (12), "Commitments and Contingencies," to the financial statements of Pepco.

DPL

Other than litigation incidental to its business, DPL is not a party to, and its property is not subject to, any material pending legal proceedings except as described in Note (14), "Commitments and Contingencies," to the financial statements of DPL.

ACE

Other than litigation incidental to its business, ACE is not a party to, and its property is not subject to, any material pending legal proceedings except as described in Note (13), "Commitments and Contingencies," to the consolidated financial statements of ACE.

Item 4. MINE SAFETY DISCLOSURES

Not applicable.

Part II

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The New York Stock Exchange is the principal market on which Pepco Holdings common stock is traded. The following table presents the dividends declared per share on the Pepco Holdings common stock and the high and low sales prices for the common stock based on composite trading as reported by the New York Stock Exchange during each quarter in the last two years.

	Dividends Per Share	Price Range High	Price Range Low
2013:			
First Quarter	$ 0.27	$21.43	$18.82
Second Quarter	0.27	22.72	19.35
Third Quarter	0.27	20.90	18.04
Fourth Quarter	0.27	19.62	18.19
	$ 1.08		
2012:			
First Quarter	$ 0.27	$20.48	$18.63
Second Quarter	0.27	19.63	18.14
Third Quarter	0.27	20.30	18.67
Fourth Quarter	0.27	20.06	18.80
	$ 1.08		

At February 14, 2014, there were 46,622 holders of record of Pepco Holdings common stock.

Dividends

On January 23, 2014, the PHI Board of Directors declared a dividend on common stock of 27 cents per share payable March 31, 2014, to shareholders of record on March 10, 2014.

See Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Resources and Liquidity – Capital Requirements – Dividends," and Note (12), "Stock-Based Compensation, Dividend Restrictions, and Calculations of Earnings Per Share of Common Stock – Dividend Restrictions," of the consolidated financial statements of PHI for information regarding restrictions on the ability of PHI and its subsidiaries to pay dividends.

PHI Subsidiaries

One of PHI's financial objectives is to maintain an equity ratio of 49%-50% in each of its operating utilities. Each quarter, PHI may contribute equity into its utility subsidiaries or the utility subsidiaries may make a dividend payment to PHI in order to maintain an equity ratio of 49%-50% in each of the utility subsidiaries. During 2013, PHI made capital contributions of $175 million and $75 million to Pepco and ACE, respectively, and in 2012, PHI made capital contributions of $50 million and $60 million to Pepco and DPL, respectively.

All of Pepco's common stock is held by Pepco Holdings, and all of DPL's and ACE's common stock is held by Conectiv, LLC (Conectiv), which in turn is wholly owned by Pepco Holdings. The table below presents the aggregate amount of common stock dividends paid by Pepco to PHI, and by DPL and ACE to Conectiv, during each quarter in the last two years. Dividends received by PHI in 2013 and 2012 from Pepco were used to support the payment of its common stock dividend. Dividends paid by ACE and DPL in 2013 and 2012 were used by Conectiv to pay down its short-term debt owed to PHI.

	Pepco	DPL	ACE
2013:			
First Quarter	$ —	$ —	$ —
Second Quarter	15,000,000	20,000,000	—
Third Quarter	31,000,000	10,000,000	25,000,000
Fourth Quarter	—	—	35,000,000
	$46,000,000	$30,000,000	$60,000,000
2012:			
First Quarter	$ —	$ —	$ —
Second Quarter	—	—	15,000,000
Third Quarter	35,000,000	—	20,000,000
Fourth Quarter	—	—	—
	$35,000,000	$ —	$35,000,000

Item 6. SELECTED FINANCIAL DATA

The following table sets forth selected historical consolidated data for PHI as of and for each of the years ended December 31, 2013, 2012, 2011, 2010, and 2009, derived from PHI's audited consolidated financial statements.

PEPCO HOLDINGS CONSOLIDATED FINANCIAL HIGHLIGHTS

	2013	2012	2011	2010	2009
		(in millions, except per share data)			
Consolidated Operating Results					
Total Operating Revenue	$ 4,666	$ 4,625	$ 4,964	$ 5,407	$ 5,175
Net Income from Continuing Operations	110(a)	218	222	91(b)	163
Net (Loss) Income	(212)	285	257	32	235
Common Stock Information					
Basic Earnings Per Share of Common Stock from Continuing Operations	$ 0.45	$ 0.95	$ 0.98	$ 0.41	$ 0.74
Basic (Loss) Earnings Per Share of Common Stock	(0.86)	1.25	1.14	0.14	1.06
Weighted Average Shares Outstanding—Basic	246	229	226	224	221
Cash Dividends Per Share of Common Stock	1.08	1.08	1.08	1.08	1.08
Year-End Stock Price	19.13	19.61	20.30	18.25	16.85
Net Book Value Per Common Share (c)	17.23	19.19	18.92	18.65	19.00
Other Information					
Total Assets	14,848	15,794	15,001	14,654	16,074
Capitalization					
Short-term Debt	$ 565	$ 965	$ 732	$ 534	$ 530
Long-term Debt	4,053	3,648	3,794	3,629	4,470
Current Portion of Long-Term Debt and Project Funding	446	569	112	75	536
Transition Bonds issued by ACE Funding	214	256	295	332	368
Capital Lease Obligations due within one year	9	8	8	8	7
Capital Lease Obligations	60	70	78	86	92
Long-Term Project Funding	10	12	13	15	17
Non-controlling Interest	—	—	—	6	6
Common Shareholders' Equity (c)	4,315	4,414	4,304	4,198	4,224
Total Capitalization (c)	$ 9,672	$ 9,942	$ 9,336	$ 8,883	$10,250

(a) Includes a charge of $101 million to establish valuation allowances related to certain PCI deferred tax assets and a charge of $66 million to reflect the anticipated additional interest expense on estimated federal and state income tax obligations resulting from the change in assessment of the tax benefits associated with the cross-border energy lease investments.

(b) Includes a loss on extinguishment of debt of $189 million ($113 million after-tax).

(c) Amounts for net book value per common share, common shareholders' equity and total capitalization for 2009 to 2012 have been adjusted for a revision to prior period financial statements related to deferred income tax liabilities for PCI that reduced equity by $32 million, as shown below. Amounts for total equity as filed and as revised below exclude non-controlling interests of $6 million as of December 31, 2010 and 2009.

	Total Equity As Filed	Adjustment	Total Equity As Revised
		(millions of dollars)	
December 31, 2012	$ 4,446	$ (32)	$ 4,414
December 31, 2011	$ 4,336	$ (32)	$ 4,304
December 31, 2010	$ 4,230	$ (32)	$ 4,198
December 31, 2009	$ 4,256	$ (32)	$ 4,224

INFORMATION FOR THIS ITEM IS NOT REQUIRED FOR PEPCO, DPL, AND ACE AS THEY MEET THE CONDITIONS SET FORTH IN GENERAL INSTRUCTIONS I(1)(a) AND (b) OF FORM 10-K AND THEREFORE ARE FILING THIS FORM WITH THE REDUCED FILING FORMAT.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The information required by this item is contained herein, as follows:

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Pepco Holdings, Inc.

General Overview

PHI, a Delaware corporation incorporated in 2001, is a holding company that, through its regulated public utility subsidiaries, is engaged primarily in the transmission, distribution and default supply of electricity, and, to a lesser extent, the distribution and supply of natural gas (Power Delivery). Through Pepco Energy Services, Inc. and its subsidiaries (collectively, Pepco Energy Services), PHI provides energy savings performance contracting services, underground transmission and distribution construction and maintenance services and steam and chilled water under long-term contracts. For additional discussion, see "Pepco Energy Services" below.

Each of Power Delivery and Pepco Energy Services constitutes a separate segment for financial reporting purposes. Through its subsidiary Potomac Capital Investment Corporation (PCI), PHI maintained a portfolio of cross-border energy lease investments. PHI completed the termination of its interests in its cross-border energy lease investments during 2013. As a result, the cross-border energy lease investments, which comprised substantially all of the operations of the Other Non-Regulated segment, are being accounted for as discontinued operations. The remaining operations of the Other Non-Regulated segment, which no longer meet the definition of a separate segment for financial reporting purposes, are being included in Corporate and Other.

The following table sets forth the percentage contributions to consolidated operating revenue and operating income from continuing operations attributable to PHI segments for each of the preceding three years:

	2013	2012	2011
Percentage of Consolidated Operating Revenue			
Power Delivery	96%	95%	94%
Pepco Energy Services	4%	6%	7%
Corporate and Other	—	(1)%	(1)%
Percentage of Consolidated Operating Income			
Power Delivery	97%	98%	90%
Pepco Energy Services	—	(3)%	5%
Corporate and Other	3%	5%	5%
Percentage of Consolidated Operating Revenue—Power Delivery			
Power Delivery Electric	96%	96%	95%
Power Delivery Gas	4%	4%	5%

Power Delivery

Power Delivery Electric consists primarily of the transmission, distribution and default supply of electricity, and Power Delivery Gas consists of the delivery and supply of natural gas.

The Pepco, DPL and ACE service territories are located within a corridor extending from the District of Columbia to southern New Jersey. These service territories are economically diverse and include key industries that contribute to the regional economic base:

- Commercial activities in the region include banking and other professional and medical services, government and education, insurance, shopping malls, casinos, tourism and transportation.
- Industrial activities in the region include chemical, glass, pharmaceutical, steel manufacturing, food processing and oil refining.

Each utility comprising Power Delivery is a regulated public utility in the jurisdictions that comprise its service territory. Each utility is responsible for the distribution of electricity and, in the case of DPL, natural gas in its service territory, for which it is paid tariff rates established by the applicable local public service commission in each jurisdiction. Each utility also supplies electricity at regulated rates to retail customers in its service territory who do not elect to purchase electricity from a competitive energy supplier. The regulatory term for this supply service is SOS in Delaware, the District of Columbia and Maryland, and BGS in New Jersey. These supply service obligations are referred to generally as Default Electricity Supply.

Each of Pepco, DPL and ACE is responsible for the transmission of wholesale electricity into and across its service territory. The rates each utility is permitted to charge for the wholesale transmission of electricity are regulated by FERC. Transmission rates are updated annually based on a FERC-approved formula methodology.

The profitability of Power Delivery depends on its ability to recover costs and earn a reasonable return on its capital investments through the rates it is permitted to charge. Operating results also can be affected by economic conditions generally, the level of commercial activity affecting a region, industry or business sector within a service territory, energy prices, the impact of energy efficiency measures on customer usage of electricity and weather.

Power Delivery's results historically have been seasonal, generally producing higher revenue and income in the warmest and coldest periods of the year. For retail customers of Pepco and DPL in Maryland and of Pepco in the District of Columbia, revenue is not affected by unseasonably warmer or colder weather because a BSA was implemented that provides for a fixed distribution charge per customer rather than a charge based upon energy usage. The BSA has the effect of decoupling the distribution revenue recognized in a reporting period from the amount of power delivered during the period. As a result, the only factors that will cause distribution revenue from retail customers in Maryland and the District of Columbia to fluctuate from period to period are changes in the number of customers and changes in the approved distribution charge per customer. A comparable revenue decoupling mechanism for DPL electricity and natural gas customers in Delaware is under consideration by the DPSC.

In accounting for the BSA in Maryland and the District of Columbia, a Revenue Decoupling Adjustment (an adjustment equal to the amount by which revenue from distribution sales differs from the revenue that Pepco and DPL are entitled to earn based on the approved distribution charge per customer) is recorded representing either (i) a positive adjustment equal to the amount by which revenue from retail distribution sales falls short of the revenue that Pepco and DPL are entitled to earn based on the approved distribution charge per customer or (ii) a negative adjustment equal to the amount by which revenue from such distribution sales exceeds the revenue that Pepco and DPL are entitled to earn based on the approved distribution charge per customer.

PHI's utility subsidiaries devote a substantial portion of their total capital expenditures to improving the reliability of their electrical transmission and distribution systems and replacing aging infrastructure throughout their service territories. These activities include:

- identifying and upgrading under-performing feeder lines;
- adding new facilities to support load;
- installing distribution automation systems on both the overhead and underground network systems; and
- rejuvenating and replacing underground residential cables.

PHI's capital expenditures for continuing reliability enhancement efforts are included in the table of projected capital expenditures within "Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Resources and Liquidity – Capital Requirements – Capital Expenditures."

Power Delivery Initiatives and Activities

Smart Grid Initiatives

PHI's utility subsidiaries are engaged in transforming the power grid that they own and operate into a "smart grid," a network of automated digital devices capable of collecting and communicating large amounts of real-time data.

A central component of the smart grid is AMI, a system that collects, measures and analyzes energy usage data from advanced digital meters, known as "smart meters." Also critical to the operation of the smart grid is distribution automation technology, which is comprised of automated devices that have internal intelligence and can be controlled remotely to better manage power flow and restore service quickly and more safely. Both the AMI system and distribution automation are enabled by advanced technology that communicates with devices installed on the energy delivery system and transmits energy usage data to the host utility. The implementation of the AMI system and distribution automation involves an integration of technologies provided by multiple vendors.

The DCPSC, the MPSC and the DPSC have approved the creation by PHI's utility subsidiaries of regulatory assets to defer AMI costs between rate cases and to accrue returns on the deferred costs. Thus, these costs will be recovered in the future through base rates; however, for AMI costs incurred by Pepco in Maryland with respect to test years after 2011, pursuant to an MPSC order, the recovery of such costs will be allowed when Pepco demonstrates that the AMI system is cost-effective. The MPSC's July 2013 order in Pepco's November 2012 electric distribution base rate application excluded the cost of AMI meters from Pepco's rate base until such time as Pepco demonstrates the cost effectiveness of the AMI system. As a result, costs for AMI meters incurred with respect to the 2012 test year and beyond will be treated as other incremental AMI costs incurred in conjunction with the deployment of the AMI system that are deferred and on which a return is earned, but only until such cost effectiveness has been demonstrated and such costs are included in rates.

In 2010, two of PHI's utility subsidiaries were granted cash awards in the aggregate amount of $168 million by the U.S. Department of Energy to support their smart grid initiatives.

- Pepco was awarded $149 million for AMI, direct load control, distribution automation and communications infrastructure, of which $145 has been received through December 31, 2013.
- ACE was awarded $19 million for direct load control, distribution automation and communications infrastructure, of which $17 has been received through December 31, 2013.

For a discussion of the projected capital expenditures of each utility subsidiary associated with PHI's smart grid initiatives over the period 2014 through 2018, see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Resources and Liquidity – Capital Requirements."

Mitigation of Regulatory Lag

An important factor in the ability of PHI's utility subsidiaries to earn their authorized ROE is the willingness of applicable public service commissions to adequately address the shortfall in revenues in a utility's rate structure due to the delay in time or "lag" between when costs are incurred and when they are reflected in rates. This delay is commonly known as "regulatory lag." Pepco, DPL and ACE are currently experiencing significant regulatory lag because investments in rate base and operating expenses are increasing more rapidly than their revenue growth.

In an effort to minimize the effects of regulatory lag, PHI's utility subsidiaries are:

- filing electric distribution base rate cases every nine to twelve months in each of their jurisdictions,
- pursuing alternative ratemaking mechanisms,
- evaluating potential reductions in planned capital expenditures, and
- continuing outreach to the regulatory community and other stakeholders, to discuss the changing regulatory model economics that are causing regulatory lag.

Alternative mechanisms that may reduce regulatory lag include adjusting historic test periods in distribution base rate cases to recognize plant additions which are already being used to provide service to customers when new rates go into effect, grid resiliency charges to allow contemporaneous recovery of costs for infrastructure related to system reliability, and multi-year rate plans.

Each of PHI's utility subsidiaries will continue to seek cost recovery from applicable public service commissions to reduce the effects of regulatory lag and have an opportunity to earn its authorized ROE. There can be no assurance that any attempts by PHI's utility subsidiaries to mitigate regulatory lag will be approved or, that even if approved, the cost recovery mechanisms will fully mitigate the effects of regulatory lag.

MAPP Project

On August 24, 2012, the board of PJM terminated the MAPP project and removed it from PJM's regional transmission expansion plan. PHI had been directed to construct MAPP, a 152-mile high-voltage interstate transmission line, to address the reliability needs of the region's transmission system. In December 2012, PHI submitted a filing to FERC seeking recovery of $88 million of abandoned MAPP costs over a five-year period. The FERC filing addressed, among other things, the prudence of the recoverable costs incurred, the proposed period over which the abandoned costs are to be amortized and the rate of return on these costs during the recovery period.

In February 2013, FERC issued an order concluding that the MAPP project was cancelled for reasons beyond the control of Pepco and DPL, finding that the prudently incurred costs associated with the abandonment of the MAPP project are eligible to be recovered, and setting for hearing and settlement procedures the prudence of the abandoned costs and the amortization period for those costs.

In December 2013, PHI submitted a settlement agreement to FERC with respect to this matter. Under the terms of the proposed settlement agreement, Pepco and DPL would recover their abandoned MAPP costs over a three-year recovery period beginning June 1, 2013. The settlement agreement, which is subject to FERC approval, would resolve all issues concerning the recovery of abandonment costs associated with the cancellation of the MAPP project. The terms of this settlement, if approved, would not be subject to the pending formula rate or transmission ROE challenges at FERC or modification through any other FERC proceeding. PHI cannot predict the timing or results of a final FERC decision in this proceeding.

As of December 31, 2013, PHI had a regulatory asset related to the MAPP abandoned costs of approximately $68 million, representing the original filing amount of approximately $88 million of abandoned costs referred to above less: (i) approximately $2 million of disallowed costs written off in

2013; (ii) $4 million of materials transferred to inventories for use on other projects; and (iii) $14 million of amortization expense recorded in 2013. The regulatory asset balance includes the costs of land, land rights, engineering and design, environmental services, and project management and administration.

Transmission ROE Challenge

On February 27, 2013, the public service commissions and public advocates of the District of Columbia, Maryland, Delaware and New Jersey, as well as the Delaware Electric Municipal Corporation, Inc., filed a joint complaint with FERC against Pepco, DPL and ACE, as well as BGE. The complainants challenged the base ROE and the application of the formula rate process, each associated with the transmission service that PHI's utilities provide. The complainants support an ROE within a zone of reasonableness of 6.78% and 10.33%, and have argued for a base ROE of 8.7%. The base ROE currently authorized by FERC for PHI's utilities is (i) 11.3% for facilities placed into service after January 1, 2006, and (ii) 10.8% for facilities placed into service prior to 2006. As currently authorized, the 10.8% base ROE for facilities placed into service prior to 2006 is eligible for a 50-basis-point incentive adder for being a member of a regional transmission organization. PHI, Pepco, DPL and ACE believe the allegations in this complaint are without merit and are vigorously contesting it. On April 3, 2013, Pepco, DPL and ACE filed their answer to this complaint, requesting that FERC dismiss the complaint against them on the grounds that it failed to meet the required burden to demonstrate that the existing rates and protocols are unjust and unreasonable. PHI cannot predict when a final FERC decision in this proceeding will be issued.

Pepco Energy Services

Pepco Energy Services is focused on growing its energy savings business and its underground transmission and distribution construction business while managing its thermal assets in Atlantic City. The energy savings business focuses on developing, building and operating energy savings performance contracting solutions primarily for federal, state and local government customers. After a significant slowdown in 2012, the energy savings market improved in 2013, however the market has not returned to the level of activity prior to 2012. The market is expected to continue to improve as the long-term fundamentals of the energy savings business remain strong. Pepco Energy Services' underground transmission and distribution construction business focuses on providing construction and maintenance services for electric power utilities in North America.

PHI guarantees the obligations of Pepco Energy Services under certain contracts in its energy savings performance contracting business and underground transmission and distribution construction business. At December 31, 2013, PHI's guarantees of Pepco Energy Services' obligations under these contracts totaled $190 million.

During 2012, Pepco Energy Services deactivated its Buzzard Point and Benning Road oil-fired generation facilities. Pepco Energy Services placed the facilities into an idle condition termed a "cold closure." A cold closure requires that the utility service be disconnected so that the facilities are no longer operable and require only essential maintenance until they are completely decommissioned. During the third quarter of 2013, Pepco Energy Services determined that it would be more cost effective to pursue the demolition of the Benning Road generation facility and realization of the scrap metal salvage value of the facility instead of maintaining cold closure status. The demolition of the facility commenced in the fourth quarter of 2013 and is expected to be completed by the end of 2014. Pepco Energy Services will recognize the salvage proceeds associated with the scrap metals at the facility as realized.

Corporate and Other

Between 1990 and 1999, PCI, through various subsidiaries, entered into certain transactions involving investments in aircraft and aircraft equipment, railcars and other assets. In connection with these transactions, PCI recorded deferred tax assets in prior years of $101 million in the aggregate. Following events that took place during the first quarter of 2013, which included (i) court decisions in favor of the IRS with respect to both Consolidated Edison's cross-border lease transaction (discussed in "– Discontinued Operations – Cross-Border Energy Lease Investments" below) and another taxpayer's structured transactions, (ii) the change in PHI's tax position with respect to the tax benefits associated with its cross-border energy leases, and (iii) PHI's decision in March 2013 to begin to pursue the early termination of its remaining cross-border energy lease investments (which represented a substantial portion of the remaining assets within PCI) without the intent to reinvest these proceeds in income-producing assets, management evaluated the likelihood that PCI would be able to realize the $101 million of deferred tax assets in the future. Based on this evaluation, PCI established valuation allowances against these deferred tax assets totaling $101 million in the first quarter of 2013. Further, during the fourth quarter of 2013, in light of additional court decisions in favor of the IRS involving other taxpayers, and after consideration of all relevant factors, management determined that it would abandon the further pursuit of these deferred tax assets, and these assets totaling $101 million were charged off against the previously established valuation allowances. This charge is included in Corporate and Other, as presented in Note (5), "Segment Information," to the consolidated financial statements of PHI, because the remaining operations of the former Other Non-Regulated segment are now included in Corporate and Other.

Discontinued Operations

In this Management's Discussion and Analysis of Financial Condition and Results of Operations, all references to continuing operations exclude the following discontinued operations.

Cross-Border Energy Lease Investments

Through its subsidiary PCI, PHI held a portfolio of cross-border energy lease investments. During July 2013, PHI completed the termination of its interest in its cross-border energy lease investments. With the completion of the termination of the cross-border energy leases, the cross-border energy lease investments are being accounted for as discontinued operations.

As discussed in Note (15), "Commitments and Contingencies – PHI's Cross-Border Energy Lease Investments," to the consolidated financial statements of PHI, PHI is involved in ongoing litigation with the IRS concerning certain benefits associated with previously held investments in cross-border energy leases. On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which PHI is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. As a result of the court's ruling in this case, PHI determined in the first quarter of 2013 that its tax position with respect to the benefits associated with its cross-border energy leases no longer met the more-likely-than-not standard of recognition for accounting purposes, and PCI recorded non-cash charges of $323 million (after-tax) in the first quarter of 2013 and $6 million (after-tax) in the second quarter of 2013, consisting of the following components:

- A non-cash pre-tax charge of $373 million ($313 million after-tax) to reduce the carrying value of these cross-border energy lease investments under FASB guidance on leases (Accounting Standards Codification (ASC) 840). This pre-tax charge was originally recorded in the consolidated statements of (loss) income as a reduction in operating revenue and is now reflected in (loss) income from discontinued operations, net of income taxes.
- A non-cash charge of $16 million after-tax to reflect the anticipated additional net interest expense under FASB guidance for income taxes (ASC 740), related to estimated federal and state income tax obligations for the period over which the tax benefits may be disallowed. This after-tax charge was originally recorded in the consolidated statements of (loss) income as an increase

in income tax expense and is now reflected in (loss) income from discontinued operations, net of income taxes. The after-tax interest charge for PHI on a consolidated basis was $70 million and this amount was allocated to each member of PHI's consolidated group as if each member was a separate taxpayer, resulting in the recognition of a $12 million interest benefit for the Power Delivery segment and interest expense of $16 million for PCI and $66 million for Corporate and Other, respectively.

Retail Electric and Natural Gas Supply Businesses of Pepco Energy Services

In December 2009, PHI announced the wind-down of the retail energy supply component of the Pepco Energy Services business which was comprised of the retail electric and natural gas supply businesses. Pepco Energy Services implemented the wind-down by not entering into any new retail electric or natural gas supply contracts while continuing to perform under its existing retail electric and natural gas supply contracts through their respective expiration dates. On March 21, 2013, Pepco Energy Services entered into an agreement whereby a third party assumed all the rights and obligations of the remaining retail natural gas supply customer contracts, and the associated supply obligations, inventory and derivative contracts. The transaction was completed on April 1, 2013. In addition, Pepco Energy Services completed the wind-down of its retail electric supply business in the second quarter of 2013 by terminating its remaining customer supply and wholesale purchase obligations beyond June 30, 2013.

The operations of Pepco Energy Services' retail electric and natural gas supply businesses have been classified as discontinued operations and are no longer a part of the Pepco Energy Services segment for financial reporting purposes.

Earnings Overview

Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

	2013	2012	Change
	(millions of dollars)		
Power Delivery	$ 289	$235	$ 54
Pepco Energy Services	3	(8)	11
Corporate and Other	(182)	(9)	(173)
Net Income from Continuing Operations	110	218	(108)
Discontinued Operations	(322)	67	(389)
Total PHI Net (Loss) Income	$(212)	$285	$ (497)

Net income from continuing operations for the year ended December 31, 2013 was $110 million, or $0.45 per share, compared to $218 million, or $0.95 per share, for the year ended December 31, 2012.

Net income from continuing operations for the year ended December 31, 2013 included the charges set forth below in Corporate and Other, which are presented, where applicable, net of related federal and state income taxes and are in millions of dollars:

Charge to establish valuation allowances related to certain PCI deferred tax assets	$ 101
Charge to reflect the anticipated additional interest expense on estimated federal and state income tax obligations allocated to Corporate and Other (as if it were a separate taxpayer) resulting from the change in assessment of the tax benefits associated with the cross-border energy lease investments ($102 million pre-tax)	$ 66

Excluding the items listed above for the year ended December 31, 2013, net income from continuing operations would have been $277 million, or $1.13 per share. PHI discloses net income from continuing operations and related per share data excluding these items because management believes that these items are not representative of PHI's ongoing business operations. Management uses this information, and believes that such information is useful to investors, in evaluating PHI's period-over-period performance. The inclusion of this disclosure is intended to complement, and should not be considered as an alternative to, PHI's reported net income from continuing operations and related per share data in accordance with GAAP.

Net loss from discontinued operations for the year ended December 31, 2013 was $322 million, or $1.31 per share, compared to net income of $67 million, or $0.30 per share ($0.29 per share on a diluted basis), for the year ended December 31, 2012.

Discussion of Operating Segment Net Income Variances:

Power Delivery's $54 million increase in earnings was primarily due to the following:

- An increase of $64 million from electric distribution base rate increases (Pepco in the District of Columbia and Maryland, DPL in Maryland and Delaware and ACE in New Jersey).
- An increase of $16 million due to lower operation and maintenance expense, primarily associated with higher storm restoration and system maintenance in 2012, partially offset by recovery in 2012 of 2011 storm restoration costs and regulatory expenses.
- An increase of $4 million primarily due to higher sales from colder winter weather, partially offset by lower sales from milder summer weather.
- A decrease of $12 million due to higher depreciation and amortization expense associated primarily with regulatory assets and increases in plant investment, partially offset by lower depreciation rates.
- A decrease of $7 million due to higher interest expense resulting from an increase in outstanding debt.
- A decrease of $6 million associated with Default Electricity Supply margins for DPL Delaware, primarily due to favorable adjustments in 2012 related to the under-recognition of allowed returns on net uncollectible expense and regulatory taxes.

Pepco Energy Services' $11 million increase in earnings was primarily due to the following:

- An increase of $6 million primarily due to improved performance in the energy savings business and thermal business in Atlantic City, New Jersey, as well as lower compensation expenses.
- An increase of $5 million due to lower asset impairment charges.

Corporate and Other's $173 million increase in net loss was primarily due to the following:

- An after-tax charge of $101 million to establish valuation allowances against certain PCI deferred tax assets.
- An after-tax charge of $66 million to reflect the anticipated additional interest expense allocated to Corporate and Other related to changes in PHI's consolidated estimated federal and state income tax obligations resulting from the change in assessment regarding the tax benefits related to the cross-border energy lease investments.

Discussion of Discontinued Operations Variance:

Net earnings from discontinued operations for the year ended December 31, 2013 decreased by $389 million as a result of the following:

- An aggregate after-tax charge of $313 million recorded in 2013 to reduce the carrying value of PCI's cross-border energy lease investments ($373 million pre-tax).
- An after-tax charge of $16 million recorded in 2013 to reflect the anticipated additional interest expense on estimated federal and state income tax obligations allocated to PCI (as if it were a separate taxpayer) resulting from the change in assessment of the tax benefits associated with the cross-border energy lease investments ($25 million pre-tax).
- An after-tax gain of $9 million recorded in 2012 related to the early termination of certain cross-border energy leases ($39 million pre-tax) and an after-tax loss of $2 million recorded in 2013 ($3 million pre-tax), associated with the completion of the early termination of the remaining cross-border energy lease investments.
- A decrease of $27 million as a result of holding fewer cross-border energy leases in 2013.
- A decrease of $21 million as a result of lower sales volume in 2013 due to the wind-down of the retail electric and natural gas supply businesses.

Consolidated Results of Operations

The following results of operations discussion compares the year ended December 31, 2013 to the year ended December 31, 2012. All amounts in the tables (except sales and customers) are in millions of dollars.

Continuing Operations

Operating Revenue

A detail of the components of PHI's consolidated operating revenue is as follows:

	2013	2012	Change
Power Delivery	$4,472	$4,378	$ 94
Pepco Energy Services	203	256	(53)
Corporate and Other	(9)	(9)	—
Total Operating Revenue	$4,666	$4,625	$ 41

Power Delivery

The following table categorizes Power Delivery's operating revenue by type of revenue.

	2013	2012	Change
Regulated T&D Electric Revenue	$2,146	$2,006	$ 140
Default Electricity Supply Revenue	2,075	2,124	(49)
Other Electric Revenue	60	65	(5)
Total Electric Operating Revenue	4,281	4,195	86
Regulated Gas Revenue	165	151	14
Other Gas Revenue	26	32	(6)
Total Gas Operating Revenue	191	183	8
Total Power Delivery Operating Revenue	$4,472	$4,378	$ 94

Regulated Transmission and Distribution (T&D) Electric Revenue includes revenue from the distribution of electricity, including the distribution of Default Electricity Supply, by PHI’s utility subsidiaries to customers within their service territories at regulated rates. Regulated T&D Electric Revenue also includes transmission service revenue that PHI’s utility subsidiaries receive as transmission owners from PJM at rates regulated by FERC. Transmission rates are updated annually based on a FERC-approved formula methodology.

Default Electricity Supply Revenue is the revenue received from the supply of electricity by PHI’s utility subsidiaries at regulated rates to retail customers who do not elect to purchase electricity from a competitive energy supplier. The costs related to Default Electricity Supply are included in Fuel and Purchased Energy. Default Electricity Supply Revenue also includes revenue from non-bypassable Transition Bond Charges that ACE receives, and pays to ACE Funding, to fund the principal and interest payments on Transition Bonds, and revenue in the form of transmission enhancement credits that PHI utility subsidiaries receive as transmission owners from PJM in consideration for approved regional transmission expansion plan expenditures.

Other Electric Revenue includes work and services performed on behalf of customers, including other utilities, which is generally not subject to price regulation. Work and services include mutual assistance to other utilities, highway relocation, rentals of pole attachments, late payment fees and collection fees.

Regulated Gas Revenue includes the revenue DPL receives from on-system natural gas delivered sales and the transportation of natural gas for customers within its service territory at regulated rates.

Other Gas Revenue consists of DPL’s off-system natural gas sales and the short-term release of interstate pipeline transportation and storage capacity not needed to serve customers. Off-system sales are made possible when low demand for natural gas by regulated customers creates excess pipeline capacity.

Regulated T&D Electric

	2013	2012	Change
Regulated T&D Electric Revenue			
Residential	$ 781	$ 722	$ 59
Commercial and industrial	970	923	47
Transmission and other	395	361	34
Total Regulated T&D Electric Revenue	$ 2,146	$ 2,006	$ 140

	2013	2012	Change
Regulated T&D Electric Sales (Gigawatt hour (GWh))			
Residential	17,168	17,150	18
Commercial and industrial	30,070	30,734	(664)
Transmission and other	259	258	1
Total Regulated T&D Electric Sales	47,497	48,142	(645)

	2013	2012	Change
Regulated T&D Electric Customers (in thousands)			
Residential	1,650	1,641	9
Commercial and industrial	200	198	2
Transmission and other	2	2	—
Total Regulated T&D Electric Customers	1,852	1,841	11

Regulated T&D Electric Revenue increased by $140 million primarily due to:

- An increase of $107 million due to distribution rate increases (Pepco in the District of Columbia effective October 2012, and in Maryland effective July 2013 and July 2012; DPL in Maryland effective July 2012 and September 2013, and in Delaware effective October 2013 and July 2012; ACE effective November 2012 and July 2013).
- An increase of $14 million in transmission revenue related to the recovery of MAPP abandonment costs, as approved by FERC (which is offset in Depreciation and Amortization).
- An increase of $14 million in transmission revenue rates effective June 1, 2012 and June 1, 2013 related to increases in transmission plant investment and operating expenses.
- An increase of $7 million in transmission revenue related to the resale by DPL of renewable energy in Delaware (which is substantially offset in Purchased Energy and Depreciation and Amortization).
- An increase of $6 million primarily due to a rate increase in the New Jersey Societal Benefit Charge (related to the New Jersey Societal Benefit Program, which is a New Jersey public interest program for low income customers) effective July 2012 (which is offset in Deferred Electric Service Costs).
- An increase of $6 million in transmission revenue primarily attributable to higher capacity as a result of expanding Maryland demand side management programs (which is partially offset in Depreciation and Amortization).
- An increase of $5 million primarily due to a Renewable Portfolio Surcharge in Delaware effective June 2012 (which is substantially offset in Fuel and Purchased Energy and Depreciation and Amortization).
- An increase of $3 million due to Pepco and DPL customer growth in 2013, primarily in the residential class.

The aggregate amount of these increases was partially offset by:

- A decrease of $13 million due to lower non-weather related average residential and commercial customer usage.
- A decrease of $6 million in transmission revenue associated with the change in FERC formula rate true-ups.
- A decrease of $4 million in distribution revenue due to lower pass-through revenue (which is substantially offset by a corresponding decrease in Other Taxes) primarily the result of a decrease in utility taxes collected by Pepco on behalf of Montgomery County, Maryland.
- A decrease of $1 million in transmission revenue primarily attributable to a peak-load rate decrease effective January 2013.

Default Electricity Supply

	2013	2012	Change
Default Electricity Supply Revenue			
Residential	$1,376	$1,467	$ (91)
Commercial and industrial	542	542	—
Other	157	115	42
Total Default Electricity Supply Revenue	$2,075	$2,124	$ (49)

Other Default Electricity Supply Revenue consists primarily of (i) revenue from the resale by ACE in the PJM RTO market of energy and capacity purchased under contracts with unaffiliated non-utility generators (NUGs), and (ii) revenue from transmission enhancement credits.

	2013	2012	Change
Default Electricity Supply Sales (Gigawatt hours (GWh))			
Residential	13,743	14,245	(502)
Commercial and industrial	5,079	5,508	(429)
Other	55	55	—
Total Default Electricity Supply Sales	18,877	19,808	(931)

	2013	2012	Change
Default Electricity Supply Customers (in thousands)			
Residential	1,352	1,366	(14)
Commercial and industrial	125	128	(3)
Other	—	1	(1)
Total Default Electricity Supply Customers	1,477	1,495	(18)

Default Electricity Supply Revenue decreased by $49 million primarily due to:

- A decrease of $76 million due to lower sales, primarily as a result of customer migration to competitive suppliers.
- A decrease of $22 million due to lower ACE and DPL non-weather related average customer usage.

The aggregate amount of these decreases was partially offset by:

- An increase of $36 million in wholesale energy and capacity resale revenues primarily due to higher market prices for the resale of electricity and capacity purchased from NUGs.
- An increase of $6 million due to higher Pepco and DPL revenue from transmission enhancement credits.
- An increase of $4 million due to higher sales primarily as a result of colder weather during the 2013 fall months, as compared to 2012.
- A net increase of $2 million as a result of higher Pepco Default Electricity Supply rates, partially offset by lower DPL and ACE rates.

Regulated Gas

	2013	2012	Change
Regulated Gas Revenue			
Residential	$ 103	$ 94	$ 9
Commercial and industrial	52	47	5
Transportation and other	10	10	—
Total Regulated Gas Revenue	$ 165	$ 151	$ 14

	2013	2012	Change
Regulated Gas Sales (million cubic feet)			
Residential	7,861	6,428	1,433
Commercial and industrial	4,945	3,636	1,309
Transportation and other	6,990	6,751	239
Total Regulated Gas Sales	19,796	16,815	2,981

	2013	2012	Change
Regulated Gas Customers (in thousands)			
Residential	117	115	2
Commercial and industrial	9	10	(1)
Transportation and other	—	—	—
Total Regulated Gas Customers	126	125	1

DPL’s natural gas service territory is located in New Castle County, Delaware. Several key industries contribute to the economic base as well as to growth as follows:

- Commercial activities in the region include banking, government, insurance, shopping malls, casinos and tourism.
- Industrial activities in the region include chemical, pharmaceutical, steel manufacturing and oil refining.

Regulated Gas Revenue increased by $14 million primarily due to:

- An increase of $22 million due to higher sales primarily as a result of colder weather during the winter months of 2013 as compared to 2012.
- An increase of $7 million due to higher non-weather related average commercial customer usage.
- An increase of $4 million due to a revenue adjustment recorded in June 2012 for a reduction in the estimate of gas sold but not yet billed to customers (which is partially offset by an increase in Purchased Energy).
- An increase of $2 million due to a distribution rate increase effective July 2013.

The aggregate amount of these increases was partially offset by a decrease of $22 million due to a Gas Cost Rate (GCR) decrease effective November 2012.

Other Gas Revenue

Other Gas Revenue decreased by $6 million primarily due to lower average prices and lower volumes for off-system sales to electric generators and gas marketers.

Pepco Energy Services

Pepco Energy Services' operating revenue decreased by $53 million primarily due to:

- A decrease of $36 million primarily in energy savings construction activities.
- A decrease of $18 million associated with the retirement of the two remaining oil-fired generation facilities in the second quarter of 2012.

Operating Expenses

Fuel and Purchased Energy and Other Services Cost of Sales

A detail of PHI's consolidated Fuel and Purchased Energy and Other Services Cost of Sales is as follows:

	2013	2012	Change
Power Delivery	$2,070	$2,109	$ (39)
Pepco Energy Services	148	186	(38)
Corporate and Other	(2)	(2)	—
Total	$2,216	$2,293	$ (77)

Power Delivery

Power Delivery's Fuel and Purchased Energy consists of the cost of electricity and natural gas purchased by its utility subsidiaries to fulfill their respective Default Electricity Supply and Regulated Gas obligations and, as such, is recoverable from customers in accordance with the terms of public service commission orders. It also includes the cost of natural gas purchased for off-system sales. Fuel and Purchased Energy expense decreased by $39 million primarily due to:

- A decrease of $85 million primarily due to customer migration to competitive suppliers.
- A decrease of $20 million in deferred electricity expense primarily due to higher DPL Default Electricity Supply cost of service rates, which resulted in a lower rate of recovery of Default Electricity Supply costs.
- A decrease of $13 million from the settlement of financial hedges entered into as part of DPL's hedge program for the purchase of regulated natural gas.
- A decrease of $5 million in the cost of gas purchases for off-system sales as a result of lower volumes.

The aggregate amount of these decreases was partially offset by:

- A net increase of $45 million due to higher average electricity costs under Pepco and DPL Default Electricity Supply contracts, partially offset by lower ACE costs.
- An increase of $13 million in deferred electricity expense primarily due to a Renewable Portfolio Surcharge in Delaware effective June 2012 (which is substantially offset in Regulated T&D Electric Revenue and Depreciation and Amortization).
- An increase of $11 million in the cost of gas purchases for on-system sales as a result of higher average gas prices.

- An increase of $6 million due to higher electricity sales primarily as a result of colder weather during the 2013 fall months, as compared to 2012.
- An increase of $4 million in the costs associated with purchasing Renewable Energy Credits in Delaware (which is offset by a corresponding increase in Regulated T&D Electric Revenue).
- An increase of $4 million in the cost of gas purchases for on-system sales as a result of an adjustment recorded in June 2012 for a reduction in the estimate of gas sold but not yet billed to customers (which is offset by an increase in Regulated Gas Revenue).
- An increase of $2 million in the costs associated with purchases under wind power purchase agreements in Delaware (which is offset by a corresponding increase in Regulated T&D Electric Revenue).

Pepco Energy Services

Pepco Energy Services' Fuel and Purchased Energy and Other Services Cost of Sales decreased by $38 million primarily due to:

- A decrease of $30 million primarily due to lower energy savings construction activity.
- A decrease of $7 million due to lower purchases of capacity and lower fuel usage, both attributable to the retirement of the remaining oil-fired generation facilities in the second quarter of 2012.

Other Operation and Maintenance

A detail of PHI's Other Operation and Maintenance expense is as follows:

	2013	2012	Change
Power Delivery	$871	$901	$ (30)
Pepco Energy Services	42	58	(16)
Corporate and Other	(62)	(61)	(1)
Total	$851	$898	$ (47)

Power Delivery

Other Operation and Maintenance expense for Power Delivery decreased by $30 million primarily due to:

- A decrease of $16 million in storm restoration costs.
- A decrease of $15 million associated with lower maintenance costs.
- A decrease of $9 million in customer service costs.
- A decrease of $1 million primarily due to 2012 total incremental storm restoration costs for major storm events as described in the following table:

	2013	2012	Change
Regulatory asset established for future recovery of January 2011 winter storm costs	$ —	$ (9)	$ 9
Costs associated with derecho storm (June 2012)	—	38	(38)
Regulatory assets established for future recovery of derecho storm costs	—	(34)	34
Costs associated with Hurricane Sandy (October 2012)	—	28	(28)
Regulatory assets established for future recovery of Hurricane Sandy costs	—	(22)	22
Total incremental major storm restoration costs	$ —	$ 1	$ (1)

- In January 2011, Pepco incurred incremental storm restoration costs of $10 million associated with a severe winter storm, all of which were expensed in 2011. In July 2012, the MPSC issued an order allowing for the deferral and recovery of $9 million of such costs over a five-year period.
- During 2012, Pepco, DPL and ACE incurred incremental storm restoration costs of $38 million associated with the June 2012 derecho which resulted in widespread damage to the electric distribution system in each of their service territories. PHI's utility subsidiaries deferred $34 million of these costs as regulatory assets to reflect the probable recovery of these storm restoration costs in Maryland and New Jersey. The MPSC approved the recovery of these costs in Maryland for both Pepco and DPL in its July 2013 and August 2013 rate orders, respectively, over a five-year period. ACE's stipulation of settlement approved by the NJBPU in June 2013 provides for recovery of these costs in New Jersey over a three-year period. The remaining costs of $4 million relate to repair work completed in Delaware and the District of Columbia which are not deferrable in those jurisdictions.
- In the fourth quarter of 2012, Pepco, DPL and ACE incurred incremental storm restoration costs of $28 million associated with Hurricane Sandy which resulted in widespread damage to the electric distribution system in each of their service territories. PHI's utility subsidiaries deferred $22 million of these costs as regulatory assets to reflect the probable recovery of these storm restoration costs in Maryland and New Jersey. The MPSC approved the recovery of these costs in Maryland for both Pepco and DPL in its July 2013 and August 2013 rate orders, respectively, over a five-year period. ACE's stipulation of settlement approved by the NJBPU in June 2013 provides for recovery of these costs in New Jersey over a three-year period. The remaining costs of $6 million relate to repair work completed in Delaware and the District of Columbia which are not deferrable in those jurisdictions.

The aggregate amount of these decreases was partially offset by:

- An increase of $6 million resulting from a 2012 deferred cost adjustment associated with DPL Default Electricity Supply. The deferred cost adjustments were primarily due to the under-recognition of allowed returns on net uncollectible expense and regulatory taxes.

- An increase of $3 million associated with the write-off of disallowed MAPP and associated transmission projects costs.
- An increase of $3 million in environmental remediation costs.

Pepco Energy Services

Other Operation and Maintenance expense for Pepco Energy Services decreased by $16 million primarily due to:

- A decrease of $5 million in personnel costs in its energy savings business primarily due to a reduction in the number of employees in the second half of 2012.
- A decrease of $4 million in contractual costs associated with the retirement of the two remaining oil-fired generation facilities in the second quarter of 2012.
- A decrease of $3 million in bid and proposal costs in its energy savings business.
- A decrease of $1 million associated with an accrual for an energy savings guarantee shortfall in 2012.
- A decrease of $1 million in operating, repairs and maintenance expenses at its combined heat and power thermal operations in Atlantic City.

Depreciation and Amortization

Depreciation and Amortization expense increased by $19 million to $473 million in 2013 from $454 million in 2012 primarily due to:

- An increase of $14 million in amortization of regulatory assets primarily related to recoverable AMI costs, major storm costs and rate case costs.
- An increase of $14 million in amortization of MAPP abandonment costs (which is offset in T&D Electric Revenue).
- An increase of $6 million in amortization due to the expiration in August 2013 of the excess depreciation reserve regulatory liability of ACE.

The aggregate amount of these increases was partially offset by:

- A decrease of $8 million due to the deactivation of Pepco Energy Services' oil-fired generating facilities in the second quarter of 2012 and a reduction in the Benning Road asset retirement obligation in 2013 resulting from the decision to pursue the demolition of the Benning Road oil-fired generating facility.
- A decrease of $7 million in the Delaware Renewable Energy Portfolio Standards deferral (which is substantially offset by a corresponding increase in Fuel and Purchased Energy).

Power Delivery depreciation reflected no change from 2012 due to an increase from higher plant investment offset by lower depreciation rates in Pepco and DPL, approved by the MPSC effective July 20, 2012.

Other Taxes

Other Taxes decreased by $4 million to $428 million in 2013 from $432 million in 2012. The decrease was primarily due to lower sales that resulted in a decrease in utility taxes that are collected and passed through by Power Delivery (substantially offset by a corresponding decrease in Regulated T&D Electric Revenue).

Deferred Electric Service Costs

Deferred Electric Service Costs, which relate only to ACE, represent (i) the over or under recovery of electricity costs incurred by ACE to fulfill its Default Electricity Supply obligation and (ii) the over or under recovery of New Jersey Societal Benefit Program costs incurred by ACE. The cost of electricity purchased is reported under Fuel and Purchased Energy and the corresponding revenue is reported under Default Electricity Supply Revenue. The cost of the New Jersey Societal Benefit Program is reported under Other Operation and Maintenance and the corresponding revenue is reported under Regulated T&D Electric Revenue.

Deferred Electric Service Costs increased by $31 million to an expense of $26 million in 2013 as compared to an expense reduction of $5 million in 2012 primarily due to an increase in deferred electricity expense as a result of higher Default Electricity Supply and New Jersey Societal Benefit Program revenue rates and lower electricity supply costs.

Impairment Losses

Impairment losses decreased by $8 million to $4 million in 2013 from $12 million in 2012. The decrease was primarily due to 2012 impairment losses of $12 million ($7 million after-tax) at Pepco Energy Services associated with the combustion turbines at Buzzard Point and certain landfill gas-fired electric generation facilities, partially offset by a 2013 impairment loss of $4 million ($3 million after-tax) associated with a landfill gas-fired electric generation facility.

Other Income (Expenses)

Other Expenses (which are net of Other Income) increased by $19 million to a net expense of $239 million in 2013 from a net expense of $220 million in 2012. The increase reflects a $16 million increase in interest expense primarily associated with higher long-term debt and $3 million associated with lower income related to the allowance for funds used during construction (AFUDC) that is applied to capital projects.

Income Tax Expense

PHI's income tax expense increased by $216 million to $319 million in 2013 from $103 million in 2012.

PHI's consolidated effective income tax rates for the years ended December 31, 2013 and 2012 were 74.4% and 32.1%, respectively.

The increase in the effective tax rate for the year ended December 31, 2013 occurred as a result of recording $56 million of changes in estimates and interest related to uncertain and effectively settled tax positions in the first quarter of 2013. In addition, the increase in the effective tax rate resulted from the establishment of valuation allowances of $101 million in the first quarter of 2013 against certain deferred tax assets in PCI, which is now included in Corporate and Other. Between 1990 and 1999, PCI, through various subsidiaries, entered into certain transactions involving investments in aircraft and aircraft equipment, railcars and other assets. In connection with these transactions, PCI recorded deferred tax assets in prior years of $101 million in the aggregate. Following events that took place during the first quarter of 2013, which included (i) court decisions in favor of the IRS with respect to both Consolidated Edison's cross-border lease transaction (as discussed in Note (19), "Discontinued Operations – Cross-Border Energy Lease Investments," to the consolidated financial statements of PHI) and another taxpayer's structured transactions, (ii) the change in PHI's tax position with respect to the tax benefits associated with its cross-border energy leases, and (iii) PHI's decision in March 2013 to begin to pursue the early termination of its remaining cross-border energy lease investments (which represented a substantial portion of the remaining assets within PCI) without the intent to reinvest these proceeds in income-producing assets, management evaluated the likelihood that PCI would be able to realize the $101 million of deferred tax assets in the future. Based on this evaluation, PCI established valuation allowances against these deferred tax assets totaling $101 million in the first quarter of 2013. Further, during the fourth quarter of 2013, in light of additional court decisions in favor of the IRS involving other taxpayers, and after consideration of the relevant factors, management determined that it would abandon the further pursuit of these deferred tax assets, and these assets totaling $101 million were charged off against the previously established valuation allowances.

The effective income tax rate for the year ended December 31, 2012 includes income tax benefits of $8 million related to uncertain and effectively settled tax positions, primarily due to the effective settlement with the IRS in the first quarter of 2012 with respect to the methodology used historically to calculate deductible mixed service costs and the expiration of the statute of limitations associated with an uncertain tax position in Pepco.

The rate for the year ended December 31, 2012 also reflects an increase in deductible asset removal costs for Pepco in 2012 related to a higher level of asset retirements.

Discontinued Operations

PHI's (loss) income from discontinued operations, net of income taxes, is comprised of the following:

	2013	2012	Change
Cross-border energy lease investments	$(327)	$41	$ (368)
Pepco Energy Services' retail electric and natural gas supply businesses	5	26	(21)
(Loss) income from discontinued operations, net of income taxes	$(322)	$67	$ (389)

For the years ended December 31, 2013 and 2012, (loss) income from discontinued operations, net of income taxes, was a loss of $322 million and income of $67 million, respectively. The decrease of $389 million is comprised of a decrease of $368 million related to PHI's cross-border lease investments and a decrease of $21 million related to the retail electric and natural gas supply businesses at Pepco Energy Services.

The decrease in (loss) income from discontinued operations, net of income taxes, for PHI's cross-border energy lease investments is primarily due to after-tax non-cash charges of $323 million recorded in the first quarter of 2013 and $6 million in the second quarter of 2013, each related to a change in assessment regarding the tax benefits related to the cross-border energy lease investments and consisting of a $373 million pre-tax non-cash charge ($313 million after-tax) to reduce the carrying value of the investments and a $16 million after-tax non-cash charge to reflect the anticipated additional interest expense related to the change in PCI's estimated federal and state income tax obligations as if it were a separate taxpayer. The (loss) income from discontinued operations, net of income taxes, was reduced further by lower cross-border energy lease investment earnings as a result of terminating the cross-border lease investments in 2013, the loss recorded on the early termination of the remaining cross-border energy lease investments during 2013, and gains recorded on the early termination of certain leases within the cross-border energy lease portfolio in the third quarter of 2012.

The decrease in (loss) income from discontinued operations, net of income taxes, at Pepco Energy Services is due to a reduction in sales volume associated with the wind-down of the retail electric and natural gas supply businesses, a reduction in mark-to-market gains, and costs incurred to accelerate the wind-down of the retail electric supply business.

The following results of operations discussion compares the year ended December 31, 2012 to the year ended December 31, 2011. All amounts in the tables (except sales and customers) are in millions of dollars.

Continuing Operations

Operating Revenue

A detail of the components of PHI's consolidated operating revenue is as follows:

	2012	2011	Change
Power Delivery	$4,378	$4,650	$ (272)
Pepco Energy Services	256	330	(74)
Corporate and Other	(9)	(16)	7
Total Operating Revenue	$4,625	$4,964	$ (339)

Power Delivery

The following table categorizes Power Delivery's operating revenue by type of revenue.

	2012	2011	Change
Regulated T&D Electric Revenue	$2,006	$1,891	$ 115
Default Electricity Supply Revenue	2,124	2,462	(338)
Other Electric Revenue	65	67	(2)
Total Electric Operating Revenue	4,195	4,420	(225)
Regulated Gas Revenue	151	183	(32)
Other Gas Revenue	32	47	(15)
Total Gas Operating Revenue	183	230	(47)
Total Power Delivery Operating Revenue	$4,378	$4,650	$ (272)

Regulated T&D Electric Revenue includes revenue from the distribution of electricity, including the distribution of Default Electricity Supply, by PHI's utility subsidiaries to customers within their service territories at regulated rates. Regulated T&D Electric Revenue also includes transmission service revenue that PHI's utility subsidiaries receive as transmission owners from PJM at rates regulated by FERC. Transmission rates are updated annually based on a FERC-approved formula methodology.

Default Electricity Supply Revenue is the revenue received from the supply of electricity by PHI's utility subsidiaries at regulated rates to retail customers who do not elect to purchase electricity from a competitive energy supplier. The costs related to Default Electricity Supply are included in Fuel and Purchased Energy. Default Electricity Supply Revenue also includes revenue from Transition Bond Charges that ACE receives, and pays to ACE Funding, to fund the principal and interest payments on Transition Bonds issued by ACE Funding, and revenue in the form of transmission enhancement credits that PHI utility subsidiaries receive as transmission owners from PJM for approved regional transmission expansion plan costs.

Other Electric Revenue includes work and services performed on behalf of customers, including other utilities, which is generally not subject to price regulation. Work and services include mutual assistance to other utilities, highway relocation, rentals of pole attachments, late payment fees and collection fees.

Regulated Gas Revenue includes the revenue DPL receives from on-system natural gas delivered sales and the transportation of natural gas for customers within its service territory at regulated rates.

Other Gas Revenue consists of DPL's off-system natural gas sales and the short-term release of interstate pipeline transportation and storage capacity not needed to serve customers. Off-system sales are made possible when low demand for natural gas by regulated customers creates excess pipeline capacity.

Regulated T&D Electric

	2012	2011	Change
Regulated T&D Electric Revenue			
Residential	$ 722	$ 683	$ 39
Commercial and industrial	923	884	39
Transmission and other	361	324	37
Total Regulated T&D Electric Revenue	$ 2,006	$ 1,891	$ 115

	2012	2011	Change
Regulated T&D Electric Sales (GWh)			
Residential	17,150	17,728	(578)
Commercial and industrial	30,734	31,282	(548)
Transmission and other	258	256	2
Total Regulated T&D Electric Sales	48,142	49,266	(1,124)

	2012	2011	Change
Regulated T&D Electric Customers (in thousands)			
Residential	1,641	1,636	5
Commercial and industrial	198	198	—
Transmission and other	2	2	—
Total Regulated T&D Electric Customers	1,841	1,836	5

Regulated T&D Electric Revenue increased by $115 million primarily due to:

- An increase of $46 million due to distribution rate increases in all jurisdictions (Pepco in the District of Columbia effective October 2012, and in Maryland effective July 2012; DPL in Maryland effective July 2012 and July 2011, and in Delaware effective July 2012; ACE effective November 2012).
- An increase of $35 million in transmission revenue primarily attributable to higher Pepco and DPL rates effective June 1, 2012 and June 1, 2011 related to increases in transmission plant investment and operating expenses.
- An increase of $17 million due to EmPower Maryland (a demand-side management program) rate increases in February 2012 (which is substantially offset by a corresponding increase in Depreciation and Amortization).
- An increase of $15 million primarily due to a Renewable Portfolio Surcharge in Delaware effective June 2012 (which is substantially offset by a corresponding increase in Fuel and Purchased Energy and Depreciation and Amortization).
- An increase of $15 million primarily due to a rate increase in the New Jersey Societal Benefit Charge effective July 2012 (which is offset in Deferred Electric Service Costs).
- An increase of $7 million due to Pepco customer growth in 2012, primarily in the residential class.

The aggregate amount of these increases was partially offset by:

- A decrease of $13 million due to lower pass-through revenue (which is substantially offset by a corresponding decrease in Other Taxes) primarily the result of a decrease in Montgomery County, Maryland utility taxes that are collected by Pepco on behalf of the jurisdiction.
- A decrease of $6 million in Transitional Energy Facility Assessment (TEFA) rate revenue in New Jersey due to a rate decrease effective January 2012 (which is primarily offset by a corresponding decrease in Other Taxes).

Default Electricity Supply

	2012	2011	Change
Default Electricity Supply Revenue			
Residential	$1,467	$1,668	$ (201)
Commercial and industrial	542	642	(100)
Other	115	152	(37)
Total Default Electricity Supply Revenue	$2,124	$2,462	$ (338)

Other Default Electricity Supply Revenue consists primarily of (i) revenue from the resale by ACE in the PJM RTO market of energy and capacity purchased under contracts with unaffiliated NUGs, and (ii) revenue from transmission enhancement credits.

	2012	2011	Change
Default Electricity Supply Sales (GWh)			
Residential	14,245	15,545	(1,300)
Commercial and industrial	5,508	6,168	(660)
Other	55	73	(18)
Total Default Electricity Supply Sales	19,808	21,786	(1,978)

	2012	2011	Change
Default Electricity Supply Customers (in thousands)			
Residential	1,366	1,432	(66)
Commercial and industrial	128	137	(9)
Other	1	—	1
Total Default Electricity Supply Customers	1,495	1,569	(74)

Default Electricity Supply Revenue decreased by $338 million primarily due to:

- A decrease of $140 million due to lower sales, primarily as a result of customer migration to competitive suppliers.
- A net decrease of $100 million as a result of lower Pepco and DPL Default Electricity Supply rates, partially offset by higher ACE rates.
- A decrease of $38 million in wholesale energy and capacity resale revenues primarily due to lower market prices for the resale of electricity and capacity purchased from NUGs.
- A decrease of $35 million due to lower sales as a result of milder weather during the 2012 winter and spring months, as compared to 2011.
- A net decrease of $26 million due to lower Pepco and ACE non-weather related average residential customer usage, partially offset by higher DPL residential customer usage.

The aggregate amount of these decreases was partially offset by an increase of $5 million due to higher Pepco revenue from transmission enhancement credits.

Regulated Gas

	2012	2011	Change
Regulated Gas Revenue			
Residential	$ 94	$ 113	$ (19)
Commercial and industrial	47	61	(14)
Transportation and other	10	9	1
Total Regulated Gas Revenue	$ 151	$ 183	$ (32)

	2012	2011	Change
Regulated Gas Sales (million cubic feet)			
Residential	6,428	7,346	(918)
Commercial and industrial	3,636	4,442	(806)
Transportation and other	6,751	6,966	(215)
Total Regulated Gas Sales	16,815	18,754	(1,939)

	2012	2011	Change
Regulated Gas Customers (in thousands)			
Residential	115	115	—
Commercial and industrial	10	9	1
Transportation and other	—	—	—
Total Regulated Gas Customers	125	124	1

Regulated Gas Revenue decreased by $32 million primarily due to:

- A decrease of $14 million due to lower sales primarily as a result of milder weather during the winter months of 2012 as compared to 2011.
- A decrease of $9 million due to GCR decreases effective November 2011 and November 2012.
- A decrease of $5 million due to lower non-weather related average customer usage.
- A decrease of $4 million due to a revenue adjustment recorded in June 2012 for a reduction in the estimate of gas sold but not yet billed to customers (which is offset by a decrease in Fuel and Purchased Energy).

The aggregate amount of these decreases was partially offset by an increase of $1 million due to a distribution rate increase effective July 2011.

Other Gas Revenue

Other Gas Revenue decreased by $15 million primarily due to lower average prices and lower volumes for off-system sales to electric generators and gas marketers.

Pepco Energy Services

Pepco Energy Services' operating revenue decreased by $74 million primarily due to:

- A decrease of $55 million due to lower generation and capacity revenues attributable to the retirement of the remaining generation facilities in the second quarter of 2012.
- A decrease of $19 million primarily due to decreased energy savings construction activities.

Operating Expenses

Fuel and Purchased Energy and Other Services Cost of Sales

A detail of PHI's consolidated Fuel and Purchased Energy and Other Services Cost of Sales is as follows:

	2012	2011	Change
Power Delivery	$2,109	$2,490	$ (381)
Pepco Energy Services	186	221	(35)
Corporate and Other	(2)	(2)	—
Total	$2,293	$2,709	$ (416)

Power Delivery

Power Delivery's Fuel and Purchased Energy consists of the cost of electricity and natural gas purchased by its utility subsidiaries to fulfill their respective Default Electricity Supply and Regulated Gas obligations and, as such, is recoverable from customers in accordance with the terms of public service commission orders. It also includes the cost of natural gas purchased for off-system sales. Fuel and Purchased Energy expense decreased by $381 million primarily due to:

- A decrease of $158 million due to lower average electricity costs under Default Electricity Supply contracts.
- A decrease of $142 million primarily due to customer migration to competitive suppliers.
- A decrease of $29 million due to lower electricity sales primarily as a result of milder weather during the winter and spring months of 2012, as compared to the corresponding periods in 2011.
- A decrease of $21 million in the cost of gas purchases for on-system sales as a result of lower average gas prices and lower volumes purchased.
- A decrease of $18 million in deferred electricity expense primarily due to lower Pepco and DPL Default Electricity Supply revenue rates, which resulted in a lower rate of recovery of Default Electricity Supply costs.
- A decrease of $12 million in the cost of gas purchases for off-system sales as a result of lower average gas prices and lower volumes purchased.
- A decrease of $11 million from the settlement of financial hedges entered into as part of DPL's hedge program for the purchase of regulated natural gas.
- A decrease of $4 million in the cost of gas purchases for on-system sales as a result of an adjustment recorded in June 2012 for a reduction in the estimate of gas sold but not yet billed to customers (which is offset by a decrease in Regulated Gas Revenue).

The aggregate amount of these decreases was partially offset by:

- An increase of $6 million in deferred gas expense as a result of a higher rate of recovery of natural gas supply costs due to lower average gas prices.
- An increase of $6 million in costs to purchase Renewable Energy Credits in Delaware (which is offset by a corresponding increase in Regulated T&D Electric Revenue).

Pepco Energy Services

Pepco Energy Services' Fuel and Purchased Energy and Other Services Cost of Sales decreased by $35 million primarily due to:

- A decrease of $29 million due to lower purchases of capacity and lower fuel usage, both attributable to the retirement of the remaining generation facilities in the second quarter of 2012.
- A decrease of $7 million due to lower energy savings construction activity partially offset by higher costs associated with energy services and underground transmission construction activities.

Other Operation and Maintenance

A detail of PHI's Other Operation and Maintenance expense is as follows:

	2012	2011	Change
Power Delivery	$ 901	$ 884	$ 17
Pepco Energy Services	58	62	(4)
Corporate and Other	(61)	(57)	(4)
Total	$ 898	$ 889	$ 9

Power Delivery

Other Operation and Maintenance expense for Power Delivery increased by $17 million primarily due to:

- An increase of $16 million in employee-related costs, primarily pension and other employee benefits.
- An increase of $10 million resulting from a decrease in deferred cost adjustments associated with DPL Default Electricity Supply. The deferred costs adjustments were primarily due to the under-recognition of allowed returns on working capital and administrative costs in 2011, partially offset by favorable adjustments in 2012 related to allowed returns on net uncollectible expense and recovery of regulatory taxes.
- An increase of $8 million in customer support service and system support costs.
- An increase of $5 million in New Jersey Societal Benefit Program costs that are deferred and recoverable.
- An increase of $4 million in expenses related to regulatory filings.
- An increase of $4 million in self-insurance reserves for general and auto liability claims.

The aggregate amount of these increases was partially offset by:

- A decrease of $15 million primarily due to a decrease in total incremental storm restoration costs for major storm events as described in the following table:

	2012	2011	Change
Costs associated with severe winter storm (January 2011)	$ —	$ 10	$ (10)
Regulatory asset established for future recovery of January 2011 winter storm costs	(9)	—	(9)
Costs associated with derecho storm (June 2012)	38	—	38
Regulatory asset established for future recovery of derecho storm costs	(34)	—	(34)
Costs associated with Hurricane Sandy (October 2012)	28	—	28
Regulatory asset established for future recovery of Hurricane Sandy costs	(22)	—	(22)
Costs associated with Hurricane Irene (August 2011)	—	28	(28)
Regulatory asset established for future recovery of Hurricane Irene costs	—	(22)	22
Total incremental major storm restoration costs	$ 1	$ 16	$ (15)

  - In January 2011, Pepco incurred incremental storm restoration costs of $10 million associated with a severe winter storm, all of which were expensed in 2011. In July 2012, the MPSC issued an order allowing for the deferral and recovery of $9 million of such costs over a five-year period.
  - During 2012, Pepco, DPL and ACE incurred incremental storm restoration costs of $38 million associated with the June 2012 derecho which resulted in widespread damage to the electric distribution system in each of their service territories. PHI's utility subsidiaries deferred $34 million of these costs as regulatory assets to reflect the probable recovery of these storm restoration costs in Maryland and New Jersey, and will be pursuing recovery of these incremental storm restoration costs in their respective jurisdictions in their electric distribution base rate cases. The remaining costs of $4 million primarily relate to repair work completed in Delaware and the District of Columbia which are not deferrable in those jurisdictions.
  - In the fourth quarter of 2012, Pepco, DPL and ACE incurred incremental storm restoration costs of $28 million associated with Hurricane Sandy which resulted in widespread damage to the electric distribution system in each of their service territories. PHI's utility subsidiaries deferred $22 million of these costs as regulatory assets to reflect the probable recovery of these storm restoration costs in Maryland and New Jersey, and will be pursuing recovery of these incremental storm restoration costs in their respective jurisdictions in their electric distribution base rate cases. The remaining costs of $6 million primarily relate to repair work completed in Delaware and the District of Columbia which are not deferrable in those jurisdictions.
  - During 2011, Pepco, DPL and ACE incurred incremental storm restoration costs of $28 million associated with Hurricane Irene which resulted in widespread damage to the electric distribution system in each of their service territories. PHI's utility subsidiaries deferred $22 million of these costs as regulatory assets to reflect the probable recovery of these storm restoration costs in Maryland and New Jersey. The MPSC approved the recovery of these costs in Maryland for both Pepco and DPL in its July 2012 rate orders over a five-year period. ACE's stipulation of settlement approved by the NJBPU in October 2012 provides for recovery of these costs in New Jersey over a three-year period. The remaining costs of $6 million relate to repair work completed in Delaware and the District of Columbia which are not deferrable in those jurisdictions.
- A decrease of $8 million in bad debt expenses.
- A decrease of $4 million associated with lower preventative maintenance and tree trimming costs due to accelerated efforts made in 2011 to improve reliability.

- A decrease of $3 million due to the deferral of distribution rate case costs previously charged to Other Operation and Maintenance expense. These deferrals were recorded in accordance with the MPSC rate order issued in July 2012 and the DCPSC rate order issued in September 2012, each allowing for the recovery of these costs.

Pepco Energy Services

Other Operation and Maintenance expense for Pepco Energy Services decreased by $4 million primarily due to the closing of the oil-fired generation facilities in the second quarter of 2012, partially offset by higher energy services expenses.

Depreciation and Amortization

Depreciation and Amortization expense increased by $29 million to $454 million in 2012 from $425 million in 2011 primarily due to:

- An increase of $22 million in amortization of regulatory assets primarily due to EmPower Maryland surcharge rate increases effective February 2012 and expanding Demand Side Management Programs (which are substantially offset by corresponding increases in Regulated T&D Electric Revenue).
- An increase of $11 million in amortization of AMI projects.
- An increase of $5 million due to utility plant additions, partially offset by lower depreciation rates.
- An increase of $4 million in the Delaware Renewable Energy Portfolio Standards deferral associated with the over-recovery of renewable energy procurement costs (which is offset by a corresponding increase in Regulated T&D Electric Revenue).

The aggregate amount of these increases was partially offset by:

- A decrease of $12 million in amortization of stranded costs primarily as the result of lower revenue due to rate decreases effective October 2011 for the ACE Transition Bond Charge and Market Transition Charge Tax (revenue ACE receives and pays to ACE Funding to recover income taxes associated with Transition Bond Charge revenue) (partially offset in Default Electricity Supply Revenue).
- A decrease of $4 million primarily due to the deactivation of Pepco Energy Services generating facilities in May 2012.

The MPSC reduced the depreciation rates for Pepco and DPL in their most recent electric distribution base rate cases, which is expected to lower annual Depreciation and Amortization expense for PHI by approximately $31 million effective July 20, 2012.

Other Taxes

Other Taxes decreased by $19 million to $432 million in 2012 from $451 million in 2011. The decrease was primarily due to:

- A decrease of $10 million, primarily due to a decrease in utility taxes that are collected and passed through by Power Delivery (substantially offset by a corresponding decrease in Regulated T&D Electric Revenue).
- A decrease of $5 million in TEFA tax collections due to a rate decrease effective January 2012 (partially offset by a corresponding decrease in Regulated T&D Electric Revenue).

Deferred Electric Service Costs

Deferred Electric Service Costs, which relate only to ACE, represent (i) the over or under recovery of electricity costs incurred by ACE to fulfill its Default Electricity Supply obligation and (ii) the over or under recovery of New Jersey Societal Benefit Program costs incurred by ACE. The cost of electricity purchased is reported under Fuel and Purchased Energy and the corresponding revenue is reported under Default Electricity Supply Revenue. The cost of New Jersey Societal Benefit Programs is reported under Other Operation and Maintenance and the corresponding revenue is reported under Regulated T&D Electric Revenue.

Deferred Electric Service Costs increased by $58 million, to an expense reduction of $5 million in 2012 as compared to an expense reduction of $63 million in 2011, primarily due to an increase in deferred electricity expense as a result of higher Default Electricity Supply revenue rates, partially offset by higher electricity supply costs.

Impairment Losses

PHI's operating expenses for the year ended December 31, 2012, included impairment losses of $12 million ($7 million after-tax) at Pepco Energy Services associated with the combustion turbines at Buzzard Point and certain landfill gas-fired electric generation facilities.

Other Income (Expenses)

Other Expenses (which are net of Other Income) increased by $3 million to a net expense of $220 million in 2012 from a net expense of $217 million in 2011. The increase reflects a $14 million increase in interest expense primarily associated with higher long-term debt and lower capitalized interest. The increase was mostly offset by an increase of $10 million in other income primarily from losses and impairments on equity investments in 2011 that did not occur in 2012.

Income Tax Expense

PHI's income tax expense decreased by $11 million to $103 million in 2012 from $114 million in 2011.

PHI's consolidated effective income tax rates for the years ended December 31, 2012 and 2011 were 32.1% and 33.9%, respectively.

The effective income tax rate for the year ended December 31, 2012 includes income tax benefits of $10 million related to uncertain and effectively settled tax positions, primarily due to the effective settlement with the IRS in the first quarter of 2012 with respect to the methodology used historically to calculate deductible mixed service costs and the expiration of the statute of limitations associated with an uncertain tax position in Pepco. During the year ended December 31, 2011, PHI recorded tax benefits of $17 million related to uncertain and effectively settled tax positions, primarily resulting from the settlement with the IRS on interest due on its 1996 through 2002 tax years.

The rate for the year ended December 31, 2012 also reflects an increase in deductible asset removal costs for Pepco in 2012 related to a higher level of asset retirements.

Discontinued Operations

PHI's income from discontinued operations, net of income taxes, is comprised of the following:

	2012	2011	Change
Cross-border energy lease investments	$ 41	$36	$ 5
Pepco Energy Services' retail electric and natural gas supply businesses	26	2	24
Conectiv Energy	—	(3)	3
Income from discontinued operations, net of income taxes	$ 67	$35	$ 32

Income from discontinued operations, net of income taxes, increased by $32 million to $67 million in 2012 from $35 million in 2011.

The increase of $5 million in income from discontinued operations, net of income taxes, attributable to PHI's cross-border energy lease investments was primarily due to higher gains recorded on the early termination of certain leases within the cross-border energy lease portfolio in 2012 as compared to 2011. The pre-tax gains were $39 million for each of the years ended December 31, 2012 and 2011, and the after-tax gains were $9 million and $3 million for the years ended December 31, 2012 and 2011, respectively.

The increase of $24 million in income from discontinued operations, net of income taxes, attributable to Pepco Energy Services' retail electric and natural gas supply businesses was primarily due to higher gross margins related to gains from mark-to-market accounting for derivatives used to manage commodity price risk and decreases in other operation and maintenance expenses. These increases were partially offset by reduced sales volumes associated with the ongoing wind-down of the retail electric and natural gas supply businesses.

The loss from discontinued operations, net of income taxes, for Conectiv Energy in 2011 resulted from the recognition of a loss related to the disposition of the remaining assets and businesses of Conectiv Energy not included in the sale of such assets and businesses to Calpine Corporation.

Capital Resources and Liquidity

This section discusses PHI's working capital, cash flow activity, capital requirements and other uses and sources of capital.

Working Capital

At December 31, 2013, PHI's current assets on a consolidated basis totaled $1.4 billion and its consolidated current liabilities totaled $2.3 billion, resulting in a working capital deficit of $0.9 billion. PHI expects the working capital deficit at December 31, 2013 to be funded during 2014 in part through cash flows from operations and from the issuance of long-term debt. At December 31, 2012, PHI's current assets on a consolidated basis totaled $1.3 billion and its consolidated current liabilities totaled $2.5 billion, for a working capital deficit of $1.2 billion. The decrease of $361 million in the working capital deficit from December 31, 2012 to December 31, 2013 was primarily due to a decrease in short-term debt, the repayment of which was primarily funded with cash received from the early terminations of the cross-border energy leases, a decrease in the current portion of long-term debt, and an increase in income taxes receivable, partially offset by an increase in liabilities and accrued interest related to uncertain tax positions.

At December 31, 2013, PHI's consolidated cash and cash equivalents totaled $23 million, which consisted of cash and uncollected funds but excluded current Restricted Cash Equivalents (cash that is available to be used only for designated purposes) that totaled $13 million. At December 31, 2012, PHI's consolidated cash and cash equivalents totaled $25 million, which consisted of cash and uncollected funds but excluded current Restricted Cash Equivalents that totaled $10 million.

PHI’s short-term debt balances and current portions of long-term debt and project funding balances are summarized below:

Type	PHI Parent	Pepco	DPL	ACE	ACE Funding	Pepco Energy Services	PCI	PHI Consolidated
	As of December 31, 2013 (millions of dollars)							
Variable Rate Demand Bonds	$ —	$—	$105	$ 18	$ —	$ —	$—	$ 123
Commercial Paper	24	151	147	120	—	—	—	442
Total Short-Term Debt	$ 24	$151	$252	$138	$ —	$ —	$—	$ 565
Current Portion of Long-Term Debt and Project Funding	$ —	$175	$100	$107	$ 41	$ 12	$ 11	$ 446

Type	PHI Parent	Pepco	DPL	ACE	ACE Funding	Pepco Energy Services	PHI Consolidated
	As of December 31, 2012 (millions of dollars)						
Variable Rate Demand Bonds	$ —	$ —	$105	$ 23	$ —	$ —	$ 128
Commercial Paper	264	231	32	110	—	—	637
Term Loan Agreement	200	—	—	—	—	—	200
Total Short-Term Debt	$ 464	$ 231	$137	$133	$ —	$ —	$ 965
Current Portion of Long-Term Debt and Project Funding	$ —	$ 200	$250	$ 69	$ 39	$ 11	$ 569

Commercial Paper

PHI, Pepco, DPL and ACE maintain commercial paper programs to address short-term liquidity needs. As of December 31, 2013, the maximum capacity available under these programs was $875 million, $500 million, $500 million and $350 million, respectively, subject to available borrowing capacity under the unsecured syndicated credit facility described below.

The weighted average interest rate for commercial paper issued by PHI, Pepco, DPL and ACE during 2013 was 0.70%, 0.34%, 0.29% and 0.31%, respectively. The weighted average maturity of all commercial paper issued by PHI, Pepco, DPL and ACE during 2013 was five, five, three and four days, respectively.

Equity Forward Transaction

During 2012, PHI entered into an equity forward transaction in connection with a public offering of PHI common stock. Pursuant to the terms of this transaction, a forward counterparty borrowed 17,922,077 shares of PHI’s common stock from third parties and sold them to a group of underwriters for $19.25 per share, less an underwriting discount equal to $0.67375 per share. Under the terms of the equity forward transaction, upon physical settlement thereof, PHI was required to issue and deliver shares of PHI common stock to the forward counterparty at the then applicable forward sale price. The forward sale price was initially determined to be $18.57625 per share at the time the equity forward transaction was entered into and was subject to reduction from time to time in accordance with the terms of the equity forward transaction. PHI believed that the equity forward transaction substantially eliminated future equity price risk because the forward sale price was determinable as of the date that PHI entered into the equity forward transaction and was only reduced pursuant to the contractual terms of the equity forward transaction through the settlement date, which reductions were not affected by a future change in the market price of the PHI common stock. On February 27, 2013, PHI physically settled the equity forward at the then applicable forward sale price of $17.39 per share. The proceeds of approximately $312 million were used to repay outstanding commercial paper, a portion of which had been issued in order to make capital contributions to the utilities, and for general corporate purposes.

Credit Facility

PHI, Pepco, DPL and ACE maintain an unsecured syndicated credit facility to provide for their respective liquidity needs, including obtaining letters of credit, borrowing for general corporate purposes and supporting their commercial paper programs. On August 1, 2011, PHI, Pepco, DPL and ACE entered into an amended and restated credit agreement which, on August 2, 2012, was amended to extend the term of the credit facility to August 1, 2017 and to amend the pricing schedule to decrease certain fees and interest rates payable to the lenders under the facility. On August 1, 2013, as permitted under the existing terms of the credit agreement, a request by PHI, Pepco, DPL and ACE to extend the credit facility termination date to August 1, 2018 was approved. All of the terms and conditions, as well as pricing, remained the same after such extension.

The aggregate borrowing limit under the amended and restated credit facility is $1.5 billion, all or any portion of which may be used to obtain loans and up to $500 million of which may be used to obtain letters of credit. The facility also includes a swingline loan sub-facility, pursuant to which each company may make same day borrowings in an aggregate amount not to exceed 10% of the total amount of the facility. Any swingline loan must be repaid by the borrower within fourteen days of receipt. The credit sublimit is $750 million for PHI and $250 million for each of Pepco, DPL and ACE. The sublimits may be increased or decreased by the individual borrower during the term of the facility, except that (i) the sum of all of the borrower sublimits following any such increase or decrease must equal the total amount of the facility, and (ii) the aggregate amount of credit used at any given time by (a) PHI may not exceed $1.25 billion, and (b) each of Pepco, DPL or ACE may not exceed the lesser of $500 million or the maximum amount of short-term debt the company is permitted to have outstanding by its regulatory authorities. The total number of the sublimit reallocations may not exceed eight per year during the term of the facility.

For additional discussion of the Credit Facility, see Note (10), “Debt,” to the consolidated financial statements of PHI.

Term Loan Agreements

PHI Term Loan Agreement

On March 28, 2013, PHI entered into a $250 million term loan agreement due March 27, 2014, pursuant to which PHI had borrowed $250 million at a rate of interest equal to the prevailing Eurodollar rate, which is determined by reference to the London Interbank Offered Rate (LIBOR) with respect to the relevant interest period, all as defined in the loan agreement, plus a margin of 0.875%. PHI used the net proceeds of the loan under the loan agreement to repay its outstanding $200 million term loan obtained in 2012, and for general corporate purposes. On May 29, 2013, PHI repaid the $250 million term loan with a portion of the net proceeds from the early termination of the cross-border energy lease investments.

ACE Term Loan Agreement

On May 10, 2013, ACE entered into a $100 million term loan agreement, pursuant to which ACE has borrowed (and may not re-borrow) $100 million at a rate of interest equal to the prevailing Eurodollar rate, which is determined by reference to the LIBOR with respect to the relevant interest period, all as defined in the loan agreement, plus a margin of 0.75%. ACE’s Eurodollar borrowings under the loan agreement may be converted into floating rate loans under certain circumstances, and, in that event, for so long as any loan remains a floating rate loan, interest would accrue on that loan at a rate per year equal to (i) the highest of (a) the prevailing prime rate, (b) the federal funds effective rate plus 0.5%, or (c) the one-month Eurodollar rate plus 1%, plus (ii) a margin of 0.75%. As of December 31, 2013, outstanding borrowings under the loan agreement bore interest at an annual rate of 0.92%, which is subject to adjustment from time to time. All borrowings under the loan agreement are unsecured, and the aggregate principal amount of all loans, together with any accrued but unpaid interest due under the loan agreement, must be repaid in full on or before November 10, 2014.

Under the terms of the term loan agreement, ACE must maintain compliance with specified covenants, including (i) the requirement that ACE maintain a ratio of total indebtedness to total capitalization of 65% or less, computed in accordance with the terms of the loan agreement, which calculation excludes from the definition of total indebtedness certain trust preferred securities and deferrable interest subordinated debt (not to exceed 15% of total capitalization), (ii) a restriction on sales or other dispositions of assets, other than certain permitted sales and dispositions, and (iii) a restriction on the incurrence of liens (other than liens permitted by the loan agreement) on the assets of ACE. The loan agreement does not include any rating triggers. ACE was in compliance with all covenants under this loan agreement as of December 31, 2013.

Long-Term Project Funding

On October 24, 2013, Pepco Energy Services entered into an agreement with a lender to receive up to $8 million in construction financing at an interest rate of 4.68% for an energy savings project that is expected to be completed in 2014. The agreement includes a transfer of receivables from Pepco Energy Services to the lender after construction is completed, under which the customer would make contractual payments over a 23-year period to repay the financing. If there are shortfalls in Pepco Energy Services' energy savings guarantee or other performance obligations to the customer that reduce customer payments below the contractual payment amounts, then Pepco Energy Services would compensate the lender for the unpaid amounts. PHI has guaranteed the performance obligations of Pepco Energy Services under the financing agreement.

Cash and Credit Facility Available as of December 31, 2013

	Consolidated PHI	PHI Parent	Utility Subsidiaries
		(millions of dollars)	
Credit Facility (Total Capacity)	$ 1,500	$ 750	$ 750
Less: Letters of Credit issued	2	2	—
Commercial Paper outstanding	442	24	418
Remaining Credit Facility Available	1,056	724	332
Cash Invested in Money Market Funds and on hand (a)	7	7	—
Total Cash and Credit Facility Available	$ 1,063	$ 731	$ 332

(a) Cash and cash equivalents reported on the PHI consolidated balance sheet totaled $23 million, of which $7 million was invested in money market funds, and the balance was held in cash and uncollected funds.

PHI's Cross-Border Energy Lease Investments

PHI has an ongoing dispute with the IRS regarding the appropriateness of certain significant income tax benefits claimed by PHI related to its cross-border energy lease investments beginning with its 2001 federal income tax return. In the first quarter of 2013, PHI estimated that, in the event the IRS were to be fully successful in its challenge to PHI's tax position on the cross-border energy leases, PHI would have been obligated to pay $192 million in additional federal taxes and $50 million of interest on the additional federal taxes, totaling $242 million as of March 31, 2013. The estimate of additional federal taxes due includes PHI's estimate of the expected resolution of other uncertain and effectively settled tax positions unrelated to the leases, the carrying back or carrying forward of any existing net operating losses, and the application of certain amounts paid in advance to the IRS.

In order to mitigate PHI's ongoing interest costs associated with the $242 million estimate of additional taxes and interest, PHI made a $242 million advanced payment to the IRS for the estimated additional taxes and related interest in the first quarter of 2013. This advanced payment was funded from then currently available sources of liquidity and short-term borrowings. In March 2013, PHI began to pursue the early termination of its six remaining cross-border energy lease investments, which had a net carrying value of approximately $869 million as of March 31, 2013. During the second and third quarters of 2013, PHI terminated early all of its interests in the six remaining lease investments. PHI received aggregate net cash proceeds of $873 million (net of aggregate termination payments of $2.0 billion used to retire the non-recourse debt associated with the terminated leases) and recorded an aggregate pre-tax loss, including transaction costs, of approximately $3 million ($2 million after-tax), representing the excess of the carrying value of the terminated leases over the net cash proceeds received. A portion of the net cash proceeds from the terminated leases was used to repay borrowings utilized to fund the advanced payment discussed above.

Pension and Other Postretirement Benefit Plans

PHI sponsors a non-contributory, defined benefit pension plan (the PHI Retirement Plan) that covers substantially all employees of Pepco, DPL and ACE and certain employees of other PHI subsidiaries. PHI also provides supplemental retirement benefits to certain eligible executive and key employees through nonqualified retirement plans. PHI's funding policy with regard to the PHI Retirement Plan is to maintain a funding level that is at least equal to the target liability as defined under the Pension Protection Act of 2006.

Under the Pension Protection Act, if a plan incurs a funding shortfall in the preceding plan year, there can be required minimum quarterly contributions in the current and following plan years. In 2014, PHI, Pepco, DPL and ACE do not expect to make discretionary tax-deductible contributions to the PHI Retirement Plan. Management expects that the current balance of the PHI Retirement Plan assets is at least equal to the funding target liability for 2014 under the Pension Protection Act. During 2013, PHI, DPL and ACE made discretionary tax-deductible contributions to the PHI Retirement Plan in the amounts of $80 million, $10 million and $30 million, respectively. During 2012, Pepco, DPL and ACE made discretionary tax-deductible contributions to the PHI Retirement Plan in the amounts of $85 million, $85 million and $30 million, respectively. PHI satisfied the minimum required contribution rules under the Pension Protection Act in 2013, 2012 and 2011. For additional discussion of PHI's Pension and Other Postretirement Benefits, see Note (9), "Pension and Other Postretirement Benefits," to the consolidated financial statements of PHI.

PHI provides certain postretirement health care and life insurance benefits for eligible retired employees. Most employees hired on January 1, 2005 or later will not have company subsidized retiree health care coverage; however, they will be able to purchase coverage at full cost through PHI.

In 2013 and 2012, Pepco contributed $6 million and $5 million, respectively, DPL contributed $3 million and $7 million, respectively, and ACE contributed $6 million and $7 million, respectively, to the other postretirement benefit plan. In 2013 and 2012, contributions of $7 million and $13 million, respectively, were made by other PHI subsidiaries.

Based on the results of the 2013 actuarial valuation, PHI's net periodic pension and other postretirement benefit (OPEB) costs were approximately $94 million in 2013 versus $110 million in 2012. The current estimate of benefit cost for 2014 is $67 million. The utility subsidiaries are responsible for substantially all of the total PHI net periodic pension and OPEB costs. Approximately 37% of net periodic pension and OPEB costs were capitalized in 2013. PHI estimates that its net periodic pension and OPEB expense will be approximately $40 million in 2014, as compared to $57 million in 2013 and $67 million in 2012.

Other Postretirement Benefit Plan Amendment

During 2013, PHI approved two amendments to its other postretirement benefits plan. These amendments impacted the retiree health care and retiree life insurance benefits, and were effective on January 1, 2014. As a result of the amendments, which were cumulatively significant, PHI remeasured its accumulated postretirement benefit obligation as of July 1, 2013. The remeasurement resulted in a $193 million reduction of the accumulated postretirement benefit obligation, which included recording a prior service credit of $124 million, which will be amortized over approximately ten years, and a $69 million reduction from a change in the discount rate from 4.10% as of December 31, 2012 to 4.95% as of July 1, 2013.

Cash Flow Activity

PHI's cash flows during 2013, 2012 and 2011 are summarized below:

	Cash Source (Use)		
	2013	2012	2011
	(millions of dollars)		
Operating Activities	$ 497	$ 592	$ 686
Investing Activities	(411)	(969)	(747)
Financing Activities	(88)	293	149
Net (decrease) increase in cash and cash equivalents	$ (2)	$ (84)	$ 88

Operating Activities

Cash flows from operating activities during 2013, 2012 and 2011 are summarized below:

	Cash Source (Use)		
	2013	2012	2011
	(millions of dollars)		
Net income from continuing operations	$ 110	$ 218	$ 222
Non-cash adjustments to net income	465	451	410
Pension contributions	(120)	(200)	(110)
Advanced payment made to taxing authority	(242)	—	—
Changes in cash collateral related to derivative activities	31	88	9
Changes in other assets and liabilities	206	60	90
Changes in net current assets held for disposition or sale	47	(25)	65
Net cash from operating activities	$ 497	$ 592	$ 686

Net cash from operating activities decreased $95 million for the year ended December 31, 2013, compared to the same period in 2012. The decrease was primarily due to a decrease in net income of $108 million and a $242 million advanced payment to the IRS for estimated additional taxes and related interest, partially offset by an $80 million decrease in pension contributions and a $72 million reduction in net current assets held for disposition or sale associated with the early termination of all cross-border energy lease investments and the wind-down of Pepco Energy Services' retail electric and natural gas supply businesses.

Net cash from operating activities decreased $94 million for the year ended December 31, 2012, compared to the same period in 2011. The decrease was due primarily to a $90 million increase in pension contributions compared to 2011, the disposition of substantially all of Conectiv Energy's remaining assets in 2011 and a $46 million increase in Pepco Energy Services net assets held for disposition. This was partially offset by a $79 million decrease in cash collateral related to derivative activities.

Investing Activities

Cash flows used by investing activities during 2013, 2012 and 2011 are summarized below:

	Cash (Use) Source 2013	2012	2011
	(millions of dollars)		
Investment in property, plant and equipment	$(1,310)	$(1,216)	$(941)
DOE capital reimbursement awards received	22	40	52
Changes in restricted cash equivalents	1	(1)	(10)
Net other investing activities	3	6	(9)
Proceeds from disposal of assets held for disposition	873	202	161
Net cash used by investing activities	$ (411)	$ (969)	$(747)

Net cash used by investing activities decreased $558 million for the year ended December 31, 2013, compared to the same period in 2012. The decrease was primarily due to proceeds from the early termination of all cross-border energy lease investments.

Net cash used by investing activities increased $222 million for the year ended December 31, 2012, compared to the same period in 2011. The increase was due primarily to a $275 million increase in capital expenditures associated with new customer services, distribution reliability and transmission. This increase was partially offset by $41 million in increased proceeds received from the early termination of certain cross-border energy lease investments.

Financing Activities

Cash flows from financing activities during 2013, 2012 and 2011 are summarized below:

	Cash (Use) Source 2013	2012	2011
	(millions of dollars)		
Dividends paid on common stock	$(270)	$(248)	$(244)
Common stock issued for the Direct Stock Purchase and Dividend Reinvestment Plan (DRP) and employee-related compensation (a)	50	51	47
Issuances of common stock	324	—	—
Redemption of preferred stock of subsidiaries	—	—	(6)
Issuances of long-term debt	800	450	235
Reacquisitions of long-term debt	(558)	(176)	(70)
(Repayments) issuances of short-term debt, net	(200)	33	198
Issuances of term loans	250	200	—
Repayments of term loans	(450)	—	—
Cost of issuances	(23)	(9)	(10)
Net other financing activities	(11)	(8)	(1)
Net cash (used by) from financing activities	$ (88)	$ 293	$ 149

(a) Prior to October 1, 2013, the DRP was named the Shareholder Dividend Reinvestment Plan.

Net cash from financing activities decreased $381 million for the year ended December 31, 2013, compared to the same period in 2012. The decrease was primarily due to a net decrease of $400 million in term loans and an increase of $233 million in short-term debt repayments, partially offset by issuances of common stock of $324 million primarily due to the settlement of the equity forward transaction.

Net cash from financing activities increased $144 million for the year ended December 31, 2012 compared to the same period in 2011. The increase was due primarily to a $200 million term loan issuance and a $109 million net increase in long-term debt partially offset by a $165 million net decrease in short-term debt issuances.

Common Stock Dividends

Common stock dividend payments were $270 million in 2013, $248 million in 2012, and $244 million in 2011. The increase in common stock dividends paid in 2013 and 2012 was the result of additional shares outstanding, primarily shares issued upon settlement of the equity forward transaction in February 2013 and under the DRP.

Changes in Outstanding Common Stock

PHI issued approximately 1 million shares of common stock in each of 2013, 2012 and 2011 under PHI's long-term incentive plans.

Under the DRP, PHI issued 1.6 million shares of common stock in 2013, 1.7 million shares of common stock in 2012, and 1.6 million shares of common stock in 2011.

In February 2013, PHI issued 17.9 million shares of common stock pursuant to the settlement of the equity forward transaction discussed above.

Changes in Outstanding Long-Term Debt

Cash flows from issuances and reacquisitions of long-term debt in 2013, 2012 and 2011 are summarized in the tables below:

Issuances	**2013**	**2012**	**2011**
	(millions of dollars)		
Pepco			
3.05% First mortgage bonds due 2022	$—	$200	$—
4.15% First mortgage bonds due 2043	250	—	—
4.95% First mortgage bonds due 2043	150	—	—
	400	200	—
DPL			
0.75% Tax-exempt bonds due 2026 (a)	—	—	35
4.00% First mortgage bonds due 2042	—	250	—
3.50% First mortgage bonds due 2023	300	—	—
	300	250	35
ACE			
4.35% First mortgage bonds due 2021	—	—	200
Variable rate term loan due 2014	100	—	—
	100	—	200
Pepco Energy Services	—	—	—
	$800	$450	$235

(a) Consists of Pollution Control Refunding Revenue Bonds (DPL Bonds) issued by the Delaware Economic Development Authority (DEDA) for the benefit of DPL that were purchased by DPL in May 2011. See footnote (b) to the Reacquisitions table below. The DPL Bonds were resold to the public in June 2011. While DPL held the DPL Bonds, they remained outstanding as a contractual matter, but were considered extinguished for accounting purposes. In connection with the resale of the DPL Bonds, the interest rate on the bonds was adjusted from 4.90% to a fixed rate of 0.75%.

Reacquisitions	2013	2012	2011
	(millions of dollars)		
Pepco			
5.375% Tax-exempt bonds due 2024 (a)	$—	$ 38	$—
4.95% First mortgage bonds due 2013	200	—	—
	200	38	—
DPL			
4.90% Tax-exempt bonds due 2026 (b)	—	—	35
0.75% Tax-exempt bonds due 2026(a)	—	35	—
1.80% Tax-exempt bonds due 2025(c)	—	15	—
2.30% Tax-exempt bonds due 2028(c)	—	16	—
5.20% Tax-exempt bonds due 2019	—	31	—
6.40% First mortgage bonds due 2013	250	—	—
	250	97	35
ACE			
Securitization bonds due 2011-2013	39	37	35
5.60% First mortgage bonds due 2025(a)	—	4	—
6.625% First mortgage bonds due 2013	69	—	—
	108	41	35
	$558	$176	$ 70

(a) These bonds were secured by an outstanding series of collateral first mortgage bonds issued by the utility, which had maturity dates, optional and mandatory redemption provisions, interest rates and interest payment dates that are identical to the terms of the tax-exempt bonds. The collateral first mortgage bonds were automatically redeemed simultaneously with the redemption of the tax-exempt bonds.

(b) Repurchased by DPL in May 2011 pursuant to a mandatory purchase provision in the indenture for the bonds that was triggered by the expiration of the original interest period for the bonds. The bonds were resold by DPL in June 2011. See footnote (a) to the Issuances table above.

(c) Repurchased by DPL in June 2012 pursuant to a mandatory purchase obligation and then retired.

Tax Exempt Auction Rate and First Mortgage Bond Issuances

During 2013, Pepco issued $250 million of 4.15% first mortgage bonds due March 15, 2043 and $150 million of 4.95% first mortgage bonds due November 15, 2043. These bonds were issued under a Mortgage and Deed of Trust and are secured thereunder by a first lien, subject to certain leases, permitted liens and other exceptions, on substantially all of Pepco's properties, except for such property excluded from the lien of the Mortgage and Deed of Trust. Net proceeds from the issuance of the 4.15% bonds were used to repay Pepco's outstanding commercial paper and for general corporate purposes. The net proceeds from the 4.95% bonds were used to repay outstanding commercial paper, including commercial paper issued to repay in full at maturity $200 million of Pepco 4.95% senior notes due November 15, 2013, plus accrued but unpaid interest thereon. The senior notes were secured by a like principal amount of Pepco first mortgage bonds, which under Pepco's Mortgage and Deed of Trust were deemed to be satisfied with the repayment of the senior notes.

During 2013, DPL issued $300 million of 3.50% first mortgage bonds due November 15, 2023. These bonds were issued under a Mortgage and Deed of Trust and are secured thereunder by a first lien, subject to certain leases, permitted liens and other exceptions, on substantially all of DPL's properties, except for such property excluded from the lien of the Mortgage and Deed of Trust. The net proceeds from the issuance of the long-term debt were used to repay at maturity $250 million of DPL's 6.40% first mortgage bonds, plus accrued but unpaid interest thereon, to repay outstanding commercial paper and for general corporate purposes.

During 2012, Pepco issued $200 million of 3.05% first mortgage bonds due April 1, 2022. Net proceeds from the issuance of the long-term debt were used primarily (i) to repay Pepco's outstanding commercial paper that was issued to temporarily fund capital expenditures and working capital, (ii) to fund the redemption, prior to maturity, of all of the $38.3 million outstanding of the 5.375% pollution control revenue refunding bonds due in 2024 issued by the Industrial Development Authority of the City of Alexandria, Virginia (IDA), on Pepco's behalf and (iii) for general corporate purposes.

During 2012, DPL issued $250 million of 4.00% first mortgage bonds due June 1, 2042. Net proceeds from the issuance of the long-term debt were used primarily (i) to repay $215 million of DPL's outstanding commercial paper that was issued (a) to temporarily fund capital expenditures and working capital and (b) to fund the redemption in June 2012, prior to maturity, of $65.7 million in aggregate principal amount of three series of outstanding tax-exempt pollution control refunding revenue bonds issued by DEDA for DPL's benefit; (ii) to fund the redemption, prior to maturity, of $31 million of tax-exempt bonds issued by DEDA for DPL's benefit; and (iii) for general corporate purposes.

In 2011, DPL resold $35 million of Pollution Control Refunding Revenue Bonds (Delmarva Power & Light Company Project) Series 2001C due 2026 (the Series 2001C Bonds). The Series 2001C Bonds were issued for the benefit of DPL in 2001 and were repurchased by DPL on May 2, 2011, pursuant to a mandatory repurchase provision in the indenture for the Series 2001C Bonds triggered by the expiration of the original interest rate period specified by the Series 2001C Bonds. See footnote (b) to the Reacquisitions table above.

In connection with the issuance of the Series 2001C Bonds, DPL entered into a continuing disclosure agreement under which it is obligated to furnish certain information to the bondholders. At the time of the resale, the continuing disclosure agreement was amended and restated to designate the Municipal Securities Rulemaking Board as the sole repository for these continuing disclosure documents. The amendment and restatement of the continuing disclosure agreement did not change the operating or financial data that are required to be provided by DPL under such agreement.

In 2011, ACE issued $200 million of 4.35% first mortgage bonds due April 1, 2021. The net proceeds were used to repay short-term debt and for general corporate purposes.

Tax Exempt Auction Rate and First Mortgage Bond Redemptions

During 2013, Pepco repaid at maturity $200 million of its 4.95% senior notes, which were secured by a like principal amount of Pepco's first mortgage bonds as previously discussed.

During 2013, DPL repaid at maturity $250 million of its 6.40% first mortgage bonds.

During 2013, ACE repaid at maturity $69 million of its 6.625% non-callable first mortgage bonds. ACE also funded the redemption, prior to maturity, of $4 million of outstanding weekly rate pollution control revenue refunding bonds due 2017, issued by the Pollution Control Financing Authority of Salem County, New Jersey for ACE's benefit.

During 2012, all of the $38.3 million of the outstanding 5.375% pollution control revenue refunding bonds issued by IDA for Pepco's benefit were redeemed. In connection with the redemption, Pepco redeemed all of the $38.3 million outstanding of its 5.375% first mortgage bonds due in 2024 that secured the obligations under the pollution control bonds.

During 2012, DPL funded the redemption by DEDA, prior to maturity, of $65.7 million of outstanding tax-exempt pollution control refunding revenue bonds issued by DEDA for DPL's benefit, as described above. Of the pollution control refunding revenue bonds redeemed, $34.5 million in aggregate principal amount bore interest at 0.75% per year and matured in 2026, $15.0 million in aggregate principal amount bore interest at 1.80% per year and matured in 2025, and $16.2 million in aggregate principal amount bore interest at 2.30% per year and matured in 2028. In connection with such redemption, on June 1, 2012, DPL redeemed, prior to maturity, all of the $34.5 million in aggregate principal amount outstanding of its 0.75% first mortgage bonds due 2026 that secured the obligations under one of the series of pollution control refunding revenue bonds redeemed by DEDA.

During 2012, DPL redeemed, prior to maturity, $31 million of 5.20% tax-exempt pollution control refunding revenue bonds due 2019, issued by DEDA for DPL's benefit. Contemporaneously with this redemption, DPL redeemed $31 million of its outstanding 5.20% first mortgage bonds due 2019 that secured the obligations under the pollution control bonds.

During 2012, ACE redeemed, prior to maturity, $4 million of 5.60% tax-exempt pollution control revenue bonds due 2025 issued by the Industrial Pollution Control Financing Authority of Salem County, New Jersey for ACE's benefit. Contemporaneously with this redemption, ACE redeemed, prior to maturity, $4 million of its outstanding 5.60% first mortgage bonds due 2025 that secured the obligations under the pollution control bonds.

Changes in Short-Term Debt

As of December 31, 2013, PHI had a total of $442 million of commercial paper outstanding as compared to $637 million and $586 million of commercial paper outstanding at December 31, 2012 and 2011, respectively.

On March 28, 2013, PHI entered into a $250 million term loan agreement, pursuant to which PHI had borrowed (and was not permitted to re-borrow) $250 million. PHI used the net proceeds of the loan under the loan agreement to repay its outstanding $200 million term loan made in 2012, and for general corporate purposes. On May 29, 2013, PHI repaid the $250 million term loan with a portion of the net proceeds from the early termination of the cross-border energy lease investments.

Capital Requirements

Capital Expenditures

Pepco Holdings' capital expenditures for the year ended December 31, 2013 totaled $1,310 million, an increase of $94 million from $1,216 million in 2012. Capital expenditures in 2013 were $576 million for Pepco, $357 million for DPL, $261 million for ACE, $4 million for Pepco Energy Services and $112 million for Corporate and Other. The Power Delivery expenditures were primarily related to capital costs associated with new customer services, distribution reliability and transmission. Corporate and Other capital expenditures primarily consisted of hardware and software expenditures that will be allocated to Power Delivery when the assets are placed in service.

The table below shows the projected capital expenditures for Power Delivery, Pepco Energy Services and Corporate and Other for the five-year period 2014 through 2018. PHI expects to fund these expenditures through internally generated cash and external financing.

	For the Year Ended December 31,					
	2014	2015	2016	2017	2018	Total
	(millions of dollars)					
Power Delivery						
Distribution	$ 774	$ 707	$ 771	$ 729	$ 744	$3,725
Distribution – Smart Grid (AMI)	2	—	—	—	8	10
Transmission	318	290	260	255	285	1,408
Gas Delivery	29	28	28	28	29	142
Other	167	102	99	96	65	529
Total for Power Delivery	1,290	1,127	1,158	1,108	1,131	5,814
Pepco Energy Services	6	6	7	6	3	28
Corporate and Other	6	6	6	6	6	30
Total PHI	$1,302	$1,139	$1,171	$1,120	$1,140	$5,872

Transmission and Distribution

The projected capital expenditures listed in the table for distribution (other than the smart grid), transmission and gas delivery are primarily for facility replacements and upgrades to accommodate customer growth and service reliability, including capital expenditures for continuing reliability enhancement efforts. For a more detailed discussion of these efforts, see "General Overview – Power Delivery."

DOE Capital Reimbursement Awards

In 2009, the U.S. Department of Energy (DOE) announced awards under the American Recovery and Reinvestment Act of 2009 of:

- $105 million and $44 million in Pepco's Maryland and District of Columbia service territories, respectively, for the implementation of an AMI system, direct load control, distribution automation, and communications infrastructure.
- $19 million in ACE's New Jersey service territory for the implementation of direct load control, distribution automation, and communications infrastructure.

Of the total $168 million in DOE awards, $130 million is being used for the smart grid and other capital expenditures of Pepco and ACE. The remaining $38 million is being used to offset incremental expenditures associated with direct load control and other Pepco and ACE programs. During 2013, Pepco and ACE received award payments of $30 million and $4 million, respectively. The cumulative award payments received by Pepco and ACE as of December 31, 2013, were $145 million and $17 million, respectively.

The IRS has announced that, to the extent these grants are expended on capital items, they will not be considered taxable income.

Dividends

Pepco Holdings' annual dividend rate on its common stock is determined by the Board of Directors on a quarterly basis and takes into consideration, among other factors, current and possible future developments that may affect PHI's income and cash flows. In 2013, PHI's Board of Directors declared quarterly dividends of 27 cents per share of common stock payable on March 28, 2013, June 28, 2013, September 30, 2013 and December 31, 2013.

On January 23, 2014, the Board of Directors declared a dividend on common stock of 27 cents per share payable March 31, 2014, to shareholders of record on March 10, 2014.

PHI, on a stand-alone basis, generates no operating income of its own. Accordingly, its ability to pay dividends to its shareholders depends on dividends received from its subsidiaries. In addition to their future financial performance, the ability of each of PHI's direct and indirect subsidiaries to pay dividends is subject to limits imposed by: (i) state corporate laws, which impose limitations on the funds that can be used to pay dividends and when such dividends can be paid, and, in the case of ACE, the regulatory requirement that it obtain the prior approval of the NJBPU before dividends can be paid if its equity as a percent of its total capitalization, excluding securitization debt, falls below 30%; (ii) the prior rights of holders of existing and future mortgage bonds and other long-term debt issued by the subsidiaries, and any preferred stock that may be issued by the subsidiaries in the future, (iii) any other restrictions imposed in connection with the incurrence of liabilities; and (iv) certain provisions of ACE's charter that impose restrictions on payment of common stock dividends for the benefit of preferred stockholders. None of Pepco, DPL or ACE currently have shares of preferred stock outstanding. Currently, the capitalization ratio limitation to which ACE is subject and the restriction in the ACE charter do not limit ACE's ability to pay common stock dividends. PHI had approximately $595 million and $1,077 million of retained earnings free of restrictions at December 31, 2013 and 2012, respectively. These amounts represent the total retained earnings balances at those dates.

Contractual Obligations and Commercial Commitments

Summary information about Pepco Holdings' consolidated contractual obligations and commercial commitments at December 31, 2013, is as follows:

Contractual Obligations	**Total**	**Contractual Maturity** Less than 1 Year	2-3 Years	4-5 Years	After 5 Years
		(millions of dollars)			
Variable rate demand bonds	$ 123	$ 123	$ —	$ —	$ —
Commercial paper	442	442	—	—	—
Long-term debt (a)	4,725	444	747	419	3,115
Long-term project funding	12	2	3	3	4
Interest payments on debt	3,579	241	441	378	2,519
Capital leases, including interest	91	15	30	30	16
Operating leases	540	44	81	73	342
Estimated OPEB and SERP plan contributions	12	12	—	—	—
Non-derivative power purchase contracts (b)	2,712	278	562	486	1,386
Total (c)	$12,236	$1,601	$1,864	$1,389	$7,382

(a) Includes transition bonds issued by ACE Funding.
(b) Excludes contracts for the purchase of electricity to satisfy Default Electricity Supply load service obligations which have neither a fixed commitment amount nor a minimum purchase amount. In addition, costs are recoverable from customers.
(c) Excludes $606 million of net current and non-current liabilities related to uncertain tax positions due to uncertainty in the timing of the associated cash payments.

Guarantees, Indemnifications and Off-Balance Sheet Arrangements

PHI and certain of its subsidiaries have various financial and performance guarantees and indemnification obligations that they have entered into in the normal course of business to facilitate commercial transactions with third parties.

PHI guarantees the obligations of Pepco Energy Services under certain contracts in its energy savings performance contracting business and underground transmission and distribution construction business. At December 31, 2013, PHI's guarantees of Pepco Energy Services' obligations under these contracts totaled $190 million. PHI also guarantees the obligations of Pepco Energy Services under surety bonds obtained by Pepco Energy Services for construction projects in these businesses. These guarantees totaled $229 million at December 31, 2013.

In addition, PHI guarantees certain obligations of Pepco, DPL and ACE under surety bonds obtained by these subsidiaries, for construction projects and self-insured workers compensation matters. These guarantees totaled $29 million at December 31, 2013.

For additional discussion of PHI's third party guarantees, indemnifications, obligations and off-balance sheet arrangements, see Note (15), "Commitments and Contingencies – Third Party Guarantees, Indemnifications, and Off-Balance Sheet Arrangements," to the consolidated financial statements of PHI.

Contractual Arrangements with Credit Rating Triggers or Margining Rights

Under certain contractual arrangements entered into by PHI's subsidiaries, the subsidiary may be required to provide cash collateral or letters of credit as security for its contractual obligations if the credit ratings of PHI or the subsidiary are downgraded. In the event of a downgrade, the amount required to be posted would depend on the amount of the underlying contractual obligation existing at the time of the downgrade. Based on contractual provisions in effect at December 31, 2013, a downgrade in the unsecured debt credit ratings of PHI and each of its rated subsidiaries to below "investment grade" would increase the collateral obligation of PHI and its subsidiaries by up to $78 million. This amount is attributable primarily to energy services contracts and accounts payable to independent system operators and distribution companies. PHI believes that it and its subsidiaries currently have sufficient liquidity to fund their operations and meet their financial obligations.

Many of the contractual arrangements entered into by PHI's subsidiaries in connection with Default Electricity Supply activities include margining rights pursuant to which the PHI subsidiary or a counterparty may request collateral if the market value of the contractual obligations reaches levels in excess of the credit thresholds established in the applicable arrangements. Pursuant to these margining rights, the affected PHI subsidiary may receive, or be required to post, collateral due to energy price movements. PHI believes that it and its subsidiaries currently have sufficient liquidity to fund their operations and meet their financial obligations.

Environmental Remediation Obligations

PHI's accrued liabilities for environmental remediation obligations as of December 31, 2013 totaled approximately $30 million, of which approximately $4 million is expected to be incurred in 2014, for potential environmental cleanup and related costs at sites owned or formerly owned by an operating subsidiary where an operating subsidiary is a potentially responsible party or is alleged to be a third-party contributor. For further information concerning the remediation obligations associated with these sites, see Note (15), "Commitments and Contingencies – Environmental Matters," to the consolidated financial statements of PHI. The most significant environmental remediation obligations as of December 31, 2013, are for the following items:

- Environmental investigation and remediation costs payable by Pepco with respect to the Benning Road site.
- Amounts payable by Pepco in connection with a January 2011 mineral oil release at Pepco's Potomac River substation in Alexandria, Virginia.
- Estimated costs for implementation of a closure plan and cap on a Pepco right-of-way that traverses the GenOn MD Ash Management, LLC fly ash disposal site in Brandywine, Prince George's County, Maryland. PHI and Pepco believe that the costs incurred in this matter will be recoverable from GenOn under a 2000 asset purchase and sale agreement, the terms of which specify that the buyer of Pepco's generation assets assumed environmental liability for hazardous substances, including ash, which remain on or have been removed from the land on which the acquired generating stations are situated.
- Costs associated with investigation and resolution of potential impacts from a September 2013 mineral oil release from a Pepco underground feeder to Watts Branch.
- Amounts payable by DPL in accordance with a 2001 consent agreement reached with the Delaware Department of Natural Resources and Environmental Control, for remediation, site restoration, natural resource damage compensatory projects and other costs associated with environmental contamination that resulted from an oil release at the Indian River power plant, which DPL sold in June 2001.

- Potential compliance remediation costs under New Jersey's Industrial Site Recovery Act payable by PHI associated with the retained environmental exposure from the sale of the Conectiv Energy wholesale power generation business.
- Amounts payable by DPL in connection with the Wilmington Coal Gas South site located in Wilmington, Delaware, to remediate residual material from the historical operation of a manufactured gas plant.

Sources of Capital

PHI's sources to meet its long-term funding needs, such as capital expenditures, dividends, and new investments, and its short-term funding needs, such as working capital and the temporary funding of long-term funding needs, include internally generated funds, issuances by PHI, Pepco, DPL and ACE under their commercial paper programs, securities issuances, medium- and short-term loans, and bank financing under new or existing facilities. PHI's ability to generate funds from its operations and to access capital and credit markets is subject to risks and uncertainties. Volatile and deteriorating financial market conditions, diminished liquidity and tightening credit may affect access to certain of PHI's potential funding sources.

Cash Flow from Operations

Cash flow generated by regulated utility subsidiaries in Power Delivery is the primary source of PHI's cash flow from operations. Additional cash flows are generated by the business of Pepco Energy Services and from the occasional sale of non-core assets.

Short-Term Funding Sources

Pepco Holdings and its regulated utility subsidiaries have traditionally used a number of sources to fulfill short-term funding needs, such as commercial paper, short-term notes and bank term loans and lines of credit. Proceeds from short-term borrowings are used primarily to meet working capital needs but may also be used to temporarily fund long-term capital requirements. For additional discussion of PHI's short-term debt, see Note (10), "Debt," to the consolidated financial statements of PHI.

Long-Term Funding Sources

The sources of long-term funding for PHI and its subsidiaries are the issuance of debt and equity securities and borrowing under long-term credit agreements. Proceeds from long-term financings are used primarily to fund long-term capital requirements, such as capital expenditures and new investments, and to repay or refinance existing indebtedness.

Regulatory Restrictions on Financing Activities

The issuance of debt securities by PHI's principal subsidiaries requires the approval of either FERC or one or more state public utility commissions. Neither FERC approval nor state public utility commission approval is required as a condition to the issuance of securities by PHI.

State Financing Authority

Pepco's long-term financing activities (including the issuance of securities and the incurrence of long-term debt) are subject to authorization by the DCPSC and MPSC. DPL's long-term financing activities are subject to authorization by the MPSC and the DPSC. ACE's long-term and short-term (consisting of debt instruments with a maturity of one year or less) financing activities are subject to authorization by the NJBPU. Each utility, through periodic filings with the state public service commission(s) having jurisdiction over its financing activities, has maintained standing authority sufficient to cover its projected financing needs over a multi-year period.

FERC Financing Authority

Under the Federal Power Act (FPA), FERC has jurisdiction over the issuance of long-term and short-term securities of public utilities, but only if the issuance is not regulated by the state public utility commission in which the public utility is organized and operating. Under these provisions, FERC has jurisdiction over the issuance of short-term debt by Pepco and DPL. Pepco and DPL have obtained FERC authority for the issuance of short-term debt. Because Pepco Energy Services also qualifies as a public utility under the FPA and is not regulated by a state utility commission, FERC also has jurisdiction over the issuance of securities by Pepco Energy Services. Pepco Energy Services has obtained the requisite FERC financing authority in its market-based rate orders.

Money Pool

Pepco Holdings operates a system money pool under a blanket authorization adopted by FERC. The money pool is an unsecured cash management mechanism used by Pepco Holdings to manage the short-term investment and borrowing requirements of its subsidiaries that participate in the money pool. Pepco Holdings may invest in but not borrow from the money pool. Eligible subsidiaries with surplus cash may deposit those funds in the money pool. Deposits in the money pool are guaranteed by Pepco Holdings. Eligible subsidiaries with cash requirements may borrow from the money pool. Depositors in the money pool receive, and borrowers from the money pool pay, an interest rate based primarily on Pepco Holdings' short-term borrowing rate. Pepco Holdings deposits funds in the money pool to the extent that the pool has insufficient funds to meet the borrowing needs of its participants, which may require Pepco Holdings to borrow funds for deposit from external sources.

Regulatory and Other Matters

<u>*Rate Proceedings*</u>

Distribution

The rates that each of Pepco, DPL and ACE is permitted to charge for the retail distribution of electricity and natural gas to its various classes of customers are based on the principle that the utility is entitled to generate an amount of revenue sufficient to recover the cost of providing the service, including a reasonable rate of return on its invested capital. These "base rates" are intended to cover all of each utility's reasonable and prudent expenses of constructing, operating and maintaining its distribution facilities (other than costs covered by specific cost-recovery surcharges).

A change in base rates in a jurisdiction requires the approval of the public service commission. In the rate application submitted to the public service commission, the utility specifies an increase in its "revenue requirement," which is the additional revenue that the utility is seeking authorization to earn. The "revenue requirement" consists of (i) the allowable expenses incurred by the utility, including operation and maintenance expenses, taxes and depreciation, and (ii) the utility's cost of capital. The compensation of the utility for its cost of capital takes the form of an overall "rate of return" allowed by the public service commission on the utility's distribution "rate base" to compensate the utility's investors for their debt and equity investments in the company. The rate base is the aggregate value of the investment in property used by the utility in providing electricity and natural gas distribution services and generally consists of plant in service net of accumulated depreciation and accumulated deferred taxes, plus cash working capital, material and operating supplies and, depending on the jurisdiction, construction work in progress. Over time, the rate base is increased by utility property additions and reduced by depreciation and property retirements and write-offs.

In addition to its base rates, some of the costs of providing distribution service are recovered through the operation of surcharges. Examples of costs recovered by PHI's utility subsidiaries through surcharges, which vary depending on the jurisdiction, include: a surcharge to reimburse the utility for the cost of purchasing electricity from NUGs (New Jersey); surcharges to reimburse the utility for costs of public interest programs for low income customers and for demand-side management programs (New Jersey, Maryland, Delaware and the District of Columbia); a surcharge to pay the Transitional Bond Charge (New Jersey); surcharges to reimburse the utility for certain environmental costs (Delaware and Maryland); and surcharges related to the BSA (Maryland and the District of Columbia). Each utility subsidiary regularly reviews its distribution rates in each jurisdiction of its service territory, and files applications to adjust its rates as necessary in an effort to ensure that its revenues are sufficient to cover its operating expenses and its cost of capital. The timing of future rate filings and the change in the distribution rate requested will depend on a number of factors, including changes in revenues and expenses and the incurrence or the planned incurrence of capital expenditures. PHI's utility subsidiaries currently plan to, among other things, file electric distribution base rate cases every 9 to 12 months and evaluate potential reductions in planned capital expenditures in an effort to mitigate the effects of regulatory lag. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – General Overview – Power Delivery Initiatives and Activities – Mitigation of Regulatory Lag."

In general, a request for new distribution rates is made on the basis of "test year" balances for rate base allowable operating expenses and a requested rate of return. The test year amounts used in the filing may be historical or partially projected. The public service commission may, however, select a different test period than that proposed by the applicable utility. Although the approved tariff rates are intended to be forward-looking, and therefore provide for the recovery of some future changes in rate base and operating costs, they typically do not reflect all of the changes in costs for the period in which the new rates are in effect.

The following table shows, for each of the PHI utility subsidiaries, the authorized return on equity as determined in the most recently concluded base rate proceeding and the effective date of the authorized return:

	Authorized Return on Equity	Rate Effective Date
Pepco:		
District of Columbia (electricity)	9.50%	October 2012
Maryland (electricity)	9.36%	July 2013
DPL:		
Delaware (electricity)	9.75%	July 2012
Maryland (electricity)	9.81% (a)	September 2013
Delaware (natural gas)	9.75% (b)	November 2013
ACE:		
New Jersey (electricity)	9.75%	July 2013

(a) ROE has not been determined by any proceeding and is specified only for the purposes of calculating the AFUDC and regulatory asset carrying costs.

(b) ROE has not been determined by any proceeding and is specified only for reporting purposes and for calculating the AFUDC, construction work in progress (CWIP), regulatory asset carrying costs and other accounting metrics.

Transmission

The rates Pepco, DPL and ACE are permitted to charge for the transmission of electricity are regulated by FERC and are based on each utility's transmission rate base, transmission operating expenses and an overall rate of return that is approved by FERC. For each utility subsidiary, FERC has approved a formula for the calculation of the utility transmission rate, which is referred to as a "formula rate." The formula rates include both fixed and variable elements. Certain of the fixed elements, such as the return on equity and depreciation rates, can be changed only in a FERC transmission rate proceeding. The variable elements of the formula, including the utility's rate base and operating expenses, are updated annually, effective June 1 of each year, with data from the utility's most recent annual FERC Form 1 filing. In addition to its formula rate, each utility's return on equity is supplemented by incentive rates, sometimes referred to as "adders," and other incentives, which are authorized by FERC to promote capital investment in transmission infrastructure. The base ROE currently authorized by FERC for PHI's utilities is (i) 11.3% for facilities placed into service after January 1, 2006, and (ii) 10.8% for facilities placed into service prior to 2006. As currently authorized, the 10.8% base ROE for PHI's utilities for facilities placed into service prior to 2006 is eligible for a 50-basis-point incentive adder for being a member of a regional transmission organization. In addition, ROE adders are in effect for each of Pepco, DPL and ACE relating to specific transmission upgrades and improvements, as well as in consideration for each utility's continued membership in PJM. As members of PJM, the transmission rates of Pepco, DPL and ACE are set out in PJM's Open Access Transmission Tariff.

For a discussion of pending state public utility commission and FERC transmission rate and other regulatory proceedings, see Note (7), "Regulatory Matters," to the consolidated financial statements of PHI.

Legal Proceedings and Regulatory Matters

For a discussion of legal proceedings, see Note (15), "Commitments and Contingencies," to the consolidated financial statements of PHI, and for a discussion of regulatory matters, see Note (7), "Regulatory Matters," to the consolidated financial statements of PHI.

Critical Accounting Policies

General

PHI has identified the following critical accounting policies that result in having to make certain estimates that, as a result of the judgments, uncertainties, uniqueness and complexities of the underlying accounting standards and estimates involved, could result in material changes in its financial condition or results of operations under different conditions or using different assumptions. PHI has discussed the development, selection and disclosure of each of these policies with the Audit Committee of the Board of Directors.

Goodwill Impairment Evaluation

Substantially all of PHI's goodwill was generated by Pepco's acquisition of Conectiv in 2002 and is allocated entirely to the Power Delivery reporting unit for purposes of assessing impairment under FASB guidance on goodwill and other intangibles (ASC 350). PHI has identified Power Delivery as a single reporting unit because its components have similar economic characteristics, similar products and services, similar distribution methods and support processes, and operate in a similar regulatory environment.

PHI tests its goodwill for impairment annually as of November 1 and whenever an event occurs or circumstances change in the interim that would more likely than not (that is, a greater than 50% chance) reduce the estimated fair value of a reporting unit below the carrying amount of its net assets.

Factors that may result in an interim impairment test include, but are not limited to: an adverse change in business conditions; a protracted decline in stock price causing market capitalization to fall significantly below book value; an adverse regulatory action; impairment of long-lived assets in the reporting unit; or a change in identified reporting units.

The first step of the goodwill impairment test compares the estimated fair value of the reporting unit with its carrying amount, including goodwill. PHI uses its best judgment to make reasonable projections of future cash flows and selection of a discount rate for the associated risk with those cash flows when estimating the reporting unit's fair value. These judgments are inherently uncertain, and actual results could vary from those used in PHI's estimates. The impact of such variations could significantly alter the results of a goodwill impairment test, which could materially impact the estimated fair value of Power Delivery and potentially the amount of any impairment recorded in the financial statements.

PHI's November 1, 2013 annual impairment test indicated that its goodwill was not impaired. See Note (6), "Goodwill," to the consolidated financial statements of PHI.

In order to estimate the fair value of the Power Delivery reporting unit, PHI prepares an analysis of traditional valuation techniques: an income approach and a market approach. The income approach estimates fair value based on a discounted future cash flow analysis and a terminal value that is consistent with Power Delivery's long-term view of the business. This approach uses a discount rate based on the estimated weighted average cost of capital (WACC) for the reporting unit. PHI determines the estimated WACC by considering appropriate market-based information for the cost of equity and cost of debt as of the measurement date. The market approach estimates fair value based on a multiple of earnings before interest, taxes, depreciation, and amortization (EBITDA) that PHI believes is consistent with EBITDA multiples for comparable utilities. PHI has consistently used this valuation technique to estimate the fair value of Power Delivery.

The estimation of fair value is dependent on a number of factors including but not limited to interest rates, growth assumptions, returns on rate base, operating and capital expenditure requirements, and other factors, changes in which could materially impact the results of impairment testing. Assumptions used were consistent with historical experience, including assumptions concerning the recovery of operating costs and capital expenditures, and current market-based information. A hypothetical 10 percent decrease in estimated fair value of the Power Delivery reporting unit at November 1, 2013 would not have resulted in the Power Delivery reporting unit failing the first step of the impairment test, as defined in the guidance, as the estimated fair value of the reporting unit would have been above its carrying value. Sensitive, interrelated and uncertain variables that could decrease the estimated fair value of the Power Delivery reporting unit include utility sector market performance, sustained adverse business conditions, change in forecasted revenues, higher operating and maintenance capital expenditure requirements, a significant increase in the weighted average cost of capital, and other factors.

PHI believes that the estimates involved in its goodwill impairment evaluation process represent "Critical Accounting Estimates" because they are subjective and susceptible to change from period to period as PHI makes assumptions and judgments, and the impact of a change in such assumptions and estimates could be material to financial results.

Long-Lived Assets Impairment Evaluation

PHI believes that the estimates involved in its long-lived asset impairment evaluation process represent "Critical Accounting Estimates" because (i) they are highly susceptible to change from period to period because PHI is required to make assumptions and judgments about when events indicate the carrying value may not be recoverable and how to estimate undiscounted and discounted future cash flows and fair values, which are inherently uncertain, (ii) actual results could vary from those used in PHI's estimates and the impact of such variations could be material, and (iii) the impact that recognizing an impairment would have on PHI's assets as well as the net loss related to an impairment charge could be material. The primary assets subject to a long-lived asset impairment evaluation are property, plant, and equipment.

The FASB guidance on the accounting for the impairment or disposal of long-lived assets (ASC 360), requires that certain long-lived assets must be tested for recoverability whenever events or circumstances indicate that the carrying amount may not be recoverable, such as (i) a significant decrease in the market price of a long-lived asset or asset group, (ii) a significant adverse change in the extent or manner in which a long-lived asset or asset group is being used or in its physical condition, (iii) a significant adverse change in legal factors or in the business climate, including an adverse action or assessment by a regulator, (iv) an accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of a long-lived asset or asset group, (v) a current-period operating or cash flow loss combined with a history of operating or cash flow losses or a projection or forecast that demonstrates continuing losses associated with the use of a long-lived asset or asset group, and (vi) a current expectation that, more likely than not, a long-lived asset or asset group will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

An impairment loss may only be recognized if the carrying amount of an asset is not recoverable and the carrying amount exceeds its estimated fair value. The asset is deemed not to be recoverable when its carrying amount exceeds the sum of the undiscounted future cash flows expected to result from the use and eventual disposition of the asset. PHI uses reasonable estimates in making these evaluations of an asset's future cash flows and considers various factors, including forward price curves for energy, related fuel costs, legislative initiatives, operating costs, and historical cash flows.

Accounting for Derivatives

PHI believes that the estimates involved in accounting for its derivative instruments represent "Critical Accounting Estimates" because PHI exercises judgment in the following areas, any of which could have a material impact on its financial statements: (i) the application of the definition of a derivative to contracts to identify embedded or free-standing derivatives, (ii) the election of the normal purchases and normal sales exception from derivative accounting, (iii) the application of cash flow hedge accounting, and (iv) the estimation of fair value used in the measurement of derivatives and hedged items, which are highly susceptible to changes in value over time due to market trends or, in certain circumstances, significant uncertainties in modeling techniques used to measure fair value that could result in actual results being materially different from PHI's estimates. See Note (2), "Significant Accounting Policies - Accounting for Derivatives," and Note (13), "Derivative Instruments and Hedging Activities," to the consolidated financial statements of PHI.

PHI and its subsidiaries may use derivative instruments primarily to manage risk associated with commodity prices and interest rates. The definition of a derivative in the FASB guidance on derivatives (ASC 815) results in PHI having to exercise judgment, such as whether there is a notional amount or net settlement provision in contracts. PHI assesses a number of factors before determining whether it can designate derivatives for the normal purchase or normal sale exception from derivative accounting, including whether it is probable that the contracts will physically settle with delivery of the underlying commodity. The application of cash flow hedge accounting often requires judgment in the prospective and retrospective assessment and measurement of hedge effectiveness as well as whether it is probable that the forecasted transaction will occur. The fair value of derivatives is determined using quoted exchange prices where available. For instruments that are not traded on an exchange, external broker quotes may also be used to determine fair value. For some custom and complex instruments, internal models use market-based information when external broker quotes are not available. For certain long-dated instruments, broker or exchange data are extrapolated, or capacity prices are forecasted, for future periods where information is limited. Models are also used to estimate volumes for certain transactions. The same valuation methods are used for risk management purposes to determine the value of non-derivative, commodity exposure.

Pension and Other Postretirement Benefit Plans

PHI believes that the estimates involved in reporting the costs of providing pension and OPEB benefits represent Critical Accounting Estimates because (i) they are based on an actuarial calculation that includes a number of assumptions which are subjective in nature, (ii) they are dependent on numerous factors resulting from actual plan experience and assumptions of future experience, and (iii) changes in assumptions could impact PHI's expected future cash funding requirements for the benefit plans and would have an impact on the benefit obligations, which affect the reported amount of net periodic pension and OPEB cost on the consolidated income statement.

Assumptions about the future, including the discount rate applied to benefit obligations, the expected long-term rate of return on plan assets, the anticipated rate of increase in health care costs, average remaining service period and life expectancy, and participant compensation have a significant impact on net periodic pension and OPEB costs.

The discount rate for determining the pension benefit obligation was 5.05% and 4.15% as of December 31, 2013 and 2012, respectively. The discount rate for determining the postretirement benefit obligation was 5.00% and 4.10% as of December 31, 2013 and 2012, respectively. PHI utilizes an analytical tool developed by its actuaries to select the discount rate. The analytical tool utilizes a high-quality bond portfolio with cash flows that match the benefit payments expected to be made under the plans.

The expected long-term rate of return on pension and postretirement benefit plan assets used to determine net periodic pension and OPEB cost was 7.00% and 7.25% for 2013 and 2012, respectively. PHI uses a building block approach to estimate the expected rate of return on plan assets. Under this approach, the percentage of plan assets in each asset class according to PHI's target asset allocation, at the measurement date of net periodic cost, is applied to the expected asset return for the related asset class. PHI incorporates long-term assumptions for real returns, inflation expectations, volatility, and correlations among asset classes to determine expected returns for the related asset class. The pension and postretirement benefit plan assets consist of equity, fixed income, real estate and private equity investments.

The average remaining service periods for participating employees of the benefit plans was approximately 11 years for both 2013 and 2012. PHI utilizes plan census data to estimate these average remaining service periods. PHI uses the IRS prescribed mortality tables to estimate the average life expectancy. The IRS prescribed tables for 2013 and 2012 were used to determine net periodic pension and OPEB cost for the same respective years. The tables for 2014 and 2013 were used for determining the benefit obligations as of December 31, 2013 and 2012, respectively.

The following table reflects the effect on the projected benefit obligation for the pension plans and the accumulated benefit obligation for the OPEB plan, as well as the net periodic cost, if there were changes in these critical actuarial assumptions while holding all other actuarial assumptions constant:

(in millions, except percentages)	Change in Assumptions	Impact on Benefit Obligation	Projected Increase in 2013 Net Periodic Cost
Pension Plans			
Discount rate	(0.25)%	$ 77	$ 6
Expected return	(0.25)%	—	5
Postretirement Benefit Plan (a)			
Discount rate	(0.25)%	16	1
Expected return	(0.25)%	—	1
Health care cost trend rate	1.00%	17	2

(a) The impact on benefit obligation and the projected increase in 2013 net periodic cost were determined assuming that the plan amendments that were effective July 1, 2013 were put into effect on January 1, 2014.

The impact of changes in assumptions and the difference between actual and expected or estimated results on pension and postretirement benefit obligations is generally recognized over the average remaining service period of the employees who benefit under the plans rather than immediate recognition in the statement of income.

For additional discussion, see Note (9), "Pension and Other Postretirement Benefits," to the consolidated financial statements of PHI.

Accounting for Regulated Activities

FASB guidance on the accounting for regulated operations (ASC 980), applies to Power Delivery and can result in the deferral of costs or revenue that would otherwise be recognized by non-regulated entities. PHI defers the recognition of costs and records regulatory assets when it is probable that those costs will be recovered in future customer rates. PHI defers the recognition of revenues and records regulatory liabilities when it is probable that it will refund payments received from customers in the future or that it will incur future costs related to the payments currently received from customers. PHI believes that the judgments involved in accounting for its regulated operations represent "Critical Accounting Estimates" because (i) PHI must interpret laws and regulatory commission orders to assess the probability of the recovery of costs in customer rates or the return of revenues to customers when determining whether those costs or revenues should be deferred, (ii) decisions made by regulatory commissions or legislative changes at a later date could vary from earlier interpretations made by PHI and the impact of such variations could be material, and (iii) the elimination of a regulatory asset because deferred costs are no longer probable of recovery in future customer rates could have a material negative impact on PHI's assets and earnings.

PHI's most significant judgment is whether to defer costs or revenues when there is not a current regulatory order specific to the item being considered for deferral. In those cases, PHI considers relevant historical precedents of the regulatory commissions, the results of recent rate orders, and any new information from its more current interactions with the regulatory commissions on that item. PHI regularly evaluates whether it should defer costs or revenues and reviews whether adjustments to its previous conclusions regarding its regulatory assets and liabilities are necessary based on the current regulatory and legislative environment as well as recent rate orders.

For additional discussion, see Note (7), "Regulatory Matters," to the consolidated financial statements of PHI.

Unbilled Revenue

Unbilled revenue represents an estimate of revenue earned from services rendered by PHI's utility operations that have not yet been billed. PHI's utility operations calculate unbilled revenue using an output-based methodology. The calculation is based on the supply of electricity or natural gas distributed to customers but not yet billed, adjusted for estimated line losses (estimates of electricity and gas expected to be lost in the process of a utility's transmission and distribution to customers).

PHI estimates involved in its unbilled revenue process represent "Critical Accounting Estimates" because PHI is required to make assumptions and judgments about factors to the unbilled revenue calculation. Specifically, the determination of estimated line losses is inherently uncertain. Estimated line losses is defined as the estimates of electricity and natural gas expected to be lost in the process of its transmission and distribution to customers. A change in estimated line losses can change the output available for sale which is a factor in the unbilled revenue calculation. Certain factors can influence the estimated line losses such as weather and a change in customer mix. These factors may vary between companies due to geography and density of service territory, and the impact of changes in these factors could be material. PHI seeks to reduce the risk of an inaccurate estimate of unbilled revenue through corroboration of the estimate with historical information and other output-based observable metrics.

Accounting for Income Taxes

PHI exercises significant judgment about the outcome of income tax matters in its application of the FASB guidance on accounting for income taxes (ASC 740) and believes it represents a "Critical Accounting Estimate" because: (i) it records a current tax liability for estimated current tax expense on its federal and state tax returns; (ii) it records deferred tax assets for temporary differences between the financial statement and tax return determination of pre-tax income and the carrying amount of assets and liabilities that are more likely than not going to result in tax deductions in future years; (iii) it determines whether a valuation allowance is needed against deferred tax assets if it is more likely than not that some portion of the future tax deductions will not be realized; (iv) it records deferred tax liabilities for temporary differences between the financial statement and tax return determination of pre-tax income and the carrying amount of assets and liabilities if it is more likely than not that they are expected to result in tax payments in future years; (v) the measurement of deferred tax assets and deferred tax liabilities requires it to estimate future effective tax rates and future taxable income on its federal and state tax returns; (vi) it must consider the effect of newly enacted tax law on its estimated effective tax rate and in measuring deferred tax balances; and (vii) it asserts that tax positions in its tax returns or expected to be taken in its tax returns are more likely than not to be sustained assuming that the tax positions will be examined by taxing authorities with full knowledge of all relevant information prior to recording the related tax benefit in the financial statements.

Assumptions, judgment and the use of estimates are required in determining if the more-likely-than-not measurement threshold (that is, the cumulative result for a greater than 50% chance of being realized) has been met when developing the provision for current and deferred income taxes and the associated current and deferred tax assets and liabilities. PHI's assumptions, judgments and estimates take into account current tax laws and regulations, interpretation of current tax laws and regulations, the impact of newly enacted tax laws and regulations, developments in case law, settlements of tax positions, and the possible outcomes of current and future investigations conducted by tax authorities. PHI has established reserves for income taxes to address potential exposures involving tax positions that could be challenged by tax authorities. Although PHI believes that these assumptions, judgments and estimates are reasonable, changes in tax laws and regulations or its interpretation of tax laws and regulations as well as the resolutions of the current and any future investigations or legal proceedings could significantly impact the financial results from applying the accounting for income taxes in the consolidated financial statements. PHI reviews its application of the more-likely-than-not measurement threshold quarterly.

PHI also evaluates quarterly the probability of realizing deferred tax assets by reviewing a forecast of future taxable income and prudent and feasible tax planning strategies that can be implemented, if necessary, to realize deferred tax assets. Failure to achieve forecasted taxable income or successfully implement tax planning strategies may affect the realization of deferred tax assets and the amount of any associated valuation allowance. The forecast of future taxable income is dependent on a number of factors that can change over time, including growth assumptions, business conditions, returns on rate base, operating and capital expenditures, cost of capital, tax laws and regulations, the legal structure of entities and other factors, which could materially impact the realizability of deferred tax assets and the associated financial results in the consolidated financial statements.

New Accounting Standards and Pronouncements

For information concerning new accounting standards and pronouncements that have recently been adopted, or will be required to be adopted in the future, by PHI and its subsidiaries , see Note (3), "Newly Adopted Accounting Standards," and Note (4), "Recently Issued Accounting Standards, Not Yet Adopted," to the consolidated financial statements of PHI.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Potomac Electric Power Company

Pepco meets the conditions set forth in General Instruction I(1)(a) and (b) to Form 10-K, and accordingly information otherwise required under this Item has been omitted in accordance with General Instruction I(2)(a) to Form 10-K.

General Overview

Pepco is engaged in the transmission and distribution of electricity in the District of Columbia and major portions of Prince George's County and Montgomery County in suburban Maryland. Pepco also provides Default Electricity Supply. Pepco's service territory covers approximately 640 square miles and, as of December 31, 2013, had a population of approximately 2.2 million. As of December 31, 2013, approximately 57% of delivered electricity sales were to Maryland customers and approximately 43% were to District of Columbia customers.

Pepco's results historically have been seasonal, generally producing higher revenue and income in the warmest and coldest periods of the year. For retail customers of Pepco in Maryland and in the District of Columbia, revenue is not affected by unseasonably warmer or colder weather because a BSA for retail customers was implemented that provides for a fixed distribution charge per customer rather than a charge based on energy usage. The BSA has the effect of decoupling the distribution revenue recognized in a reporting period from the amount of power delivered during the period. As a result, the only factors that will cause distribution revenue from customers in Maryland and the District of Columbia to fluctuate from period to period are changes in the number of customers and changes in the approved distribution charge per customer. Changes in customer usage (due to weather conditions, energy prices, energy savings programs or other reasons) from period to period have no impact on reported distribution revenue for customers to whom the BSA applies.

In accounting for the BSA in Maryland and the District of Columbia, a Revenue Decoupling Adjustment is recorded representing either (i) a positive adjustment equal to the amount by which revenue from Maryland and District of Columbia retail distribution sales falls short of the revenue that Pepco is entitled to earn based on the approved distribution charge per customer or (ii) a negative adjustment equal to the amount by which revenue from such distribution sales exceeds the revenue that Pepco is entitled to earn based on the approved distribution charge per customer.

Pepco is a wholly owned subsidiary of PHI. Because PHI is a public utility holding company subject to the Public Utility Holding Company Act of 2005 (PUHCA 2005), the relationship between each of PHI, PHI Service Company (a subsidiary service company of PHI, which provides a variety of support services, including legal, accounting, treasury, tax, purchasing and information technology services to PHI and its operating subsidiaries) and Pepco, as well as certain activities of Pepco, are subject to FERC's regulatory oversight under PUHCA 2005.

Utility Capital Expenditures

Pepco devotes a substantial portion of its total capital expenditures to improving the reliability of its electrical transmission and distribution systems and replacing aging infrastructure throughout its service territories. These activities include one or more of the following:

- identifying and upgrading under-performing feeder lines;
- adding new facilities to support load;
- installing distribution automation systems on both the overhead and underground network systems; and
- rejuvenating and replacing underground residential cables.

Pepco's capital expenditures for continuing reliability enhancement efforts are included in the table of projected capital expenditures within "Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Requirements – Capital Expenditures."

Smart Grid

Pepco is building a "smart grid" which is designed to meet the challenges of rising energy costs, improve service reliability of the energy distribution system, provide timely and accurate customer information and address government energy reduction goals. For a discussion of the smart grid, see PHI's "Management's Discussion and Analysis of Financial Condition and Results of Operations – General Overview – Power Delivery Initiatives and Activities – Smart Grid."

Mitigation of Regulatory Lag

An important factor in the ability of Pepco to earn its authorized ROE is the willingness of the DCPSC and the MPSC to adequately address the shortfall in revenues in Pepco's rate structure due to the delay in time or "lag" between when costs are incurred and when they are reflected in rates. This delay is commonly known as "regulatory lag." Pepco is currently experiencing significant regulatory lag because investments in rate base and operating expenses are increasing more rapidly than revenue growth. For a more detailed discussion of regulatory lag, see PHI's "Management's Discussion and Analysis of Financial Condition and Results of Operations – General Overview – Power Delivery Initiatives and Activities – Mitigation of Regulatory Lag."

MAPP Project

On August 24, 2012, the board of PJM terminated the MAPP project and removed it from PJM's regional transmission expansion plan. Pepco had been directed to construct MAPP, a 152-mile high-voltage interstate transmission line, to address the reliability needs of the region's transmission system. In December 2012, Pepco submitted a filing to FERC seeking recovery of approximately $50 million of abandoned MAPP costs over a five-year period. The FERC filing addressed, among other things, the prudence of the recoverable costs incurred, the proposed period over which the abandoned costs are to be amortized and the rate of return on these costs during the recovery period.

In February 2013, FERC issued an order concluding that the MAPP project was cancelled for reasons beyond the control of Pepco, finding that the prudently incurred costs associated with the abandonment of the MAPP project are eligible to be recovered, and setting for hearing and settlement procedures the prudence of the abandoned costs and the amortization period for those costs.

In December 2013, Pepco submitted a settlement agreement to FERC with respect to this matter. Under the terms of the proposed settlement agreement, Pepco would recover its abandoned MAPP costs over a three-year recovery period beginning June 1, 2013. The settlement agreement, which is subject to FERC approval, would resolve all issues concerning the recovery of abandonment costs associated with the cancellation of the MAPP project. The terms of this settlement, if approved, would not be subject to the pending formula rate or transmission ROE challenges at FERC or modification through any other FERC proceeding. Pepco cannot predict the timing or results of a final FERC decision in this proceeding.

As of December 31, 2013, Pepco had a regulatory asset related to MAPP abandoned costs of $37 million, representing the original filing amount of approximately $50 million of abandoned costs less: (i) approximately $1 million of disallowed costs written off in 2013; (ii) $4 million of materials transferred to inventories for use on other projects; and (iii) $8 million of amortization expense recorded in 2013. The regulatory asset balance includes the costs of land, land rights, engineering and design, environmental services, and project management and administration.

Transmission ROE Challenge

On February 27, 2013, the public service commissions and public advocates of the District of Columbia, Maryland, Delaware and New Jersey, as well as the Delaware Electric Municipal Corporation, Inc., filed a joint complaint with FERC against Pepco, among others. The complainants challenged the base ROE and the application of the formula rate process, each associated with the transmission service that Pepco provides. The complainants support an ROE within a zone of reasonableness of 6.78% and 10.33%, and have argued for a base ROE of 8.7%. The base ROE currently authorized by FERC for Pepco is (i) 11.3% for facilities placed into service after January 1, 2006, and (ii) 10.8% for facilities placed into service prior to 2006. As currently authorized, the 10.8% base ROE for facilities placed into service prior to 2006 is eligible for a 50-basis-point incentive adder for being a member of a regional transmission organization. Pepco believes the allegations in this complaint are without merit and is vigorously contesting it. On April 3, 2013, Pepco filed its answer to this complaint, requesting that FERC dismiss the complaint against it on the grounds that it failed to meet the required burden to demonstrate that the existing rates and protocols are unjust and unreasonable. Pepco cannot predict when a final FERC decision in this proceeding will be issued.

Earnings Overview

Net Income For the Year Ended December 31, 2013 Compared to the Year Ended December 31, 2012

Pepco's net income for the year ended December 31, 2013 was $150 million compared to $126 million for the year ended December 31, 2012. The $24 million increase in earnings was primarily due to the following:

- An increase of $24 million from electric distribution base rate increases in the District of Columbia and Maryland.
- An increase of $7 million due to lower operation and maintenance expense, primarily associated with higher storm restoration and system maintenance in 2012, partially offset by recovery in 2012 of 2011 storm restoration costs and regulatory expenses.
- An increase of $2 million due to customer growth and other distribution revenue increases.
- An increase of $2 million due to higher transmission revenue attributable to higher rates related to increases in transmission plant investment.
- A decrease of $8 million due to lower tax benefits related to uncertain and effectively settled tax positions.
- A decrease of $5 million due to higher interest expense resulting from an increase in outstanding debt.

Results of Operations

The following results of operations discussion compares the year ended December 31, 2013 to the year ended December 31, 2012. All amounts in the tables (except sales and customers) are in millions of dollars.

A condensed summary of Pepco's statement of income for the year ended December 31, 2013 compared to the year ended December 31, 2012, is set forth in the table below:

	2013	2012	Change
Operating revenue	$2,026	$1,948	$ 78
Purchased energy	750	726	24
Other operation and maintenance	391	403	(12)
Depreciation and amortization	196	190	6
Other taxes	368	372	(4)
Total operating expenses	1,705	1,691	14
Operating income	321	257	64
Other income (expenses)	(92)	(83)	(9)
Income before income tax expense	229	174	55
Income tax expense	79	48	31
Net income	$ 150	$ 126	$ 24

Operating Revenue

	2013	2012	Change
Regulated T&D Electric Revenue	$1,215	$1,159	$ 56
Default Electricity Supply Revenue	778	755	23
Other Electric Revenue	33	34	(1)
Total Operating Revenue	$2,026	$1,948	$ 78

The table above shows the amount of Operating Revenue earned that is subject to price regulation (Regulated T&D Electric Revenue and Default Electricity Supply Revenue) and that which is not subject to price regulation (Other Electric Revenue).

Regulated T&D Electric Revenue includes revenue from the distribution of electricity, including the distribution of Default Electricity Supply, to Pepco's customers within its service territories at regulated rates. Regulated T&D Electric Revenue also includes transmission service revenue that Pepco receives as a transmission owner from PJM at rates regulated by FERC. Transmission rates are updated annually based on a FERC-approved formula methodology.

The costs related to Default Electricity Supply are included in Purchased Energy. Default Electricity Supply Revenue also includes transmission enhancement credits that Pepco receives as a transmission owner from PJM in consideration for approved regional transmission expansion plan expenditures.

Other Electric Revenue includes work and services performed on behalf of customers, including other utilities, which is generally not subject to price regulation. Work and services includes mutual assistance to other utilities, highway relocation, rentals of pole attachments, late payment fees and collection fees.

Regulated T&D Electric

	2013	2012	Change
Regulated T&D Electric Revenue			
Residential	$ 359	$ 339	$ 20
Commercial and industrial	678	658	20
Transmission and other	178	162	16
Total Regulated T&D Electric Revenue	$1,215	$1,159	$ 56

	2013	2012	Change
Regulated T&D Electric Sales (GWh)			
Residential	7,832	7,742	90
Commercial and industrial	17,806	18,104	(298)
Transmission and other	163	160	3
Total Regulated T&D Electric Sales	25,801	26,006	(205)

	2013	2012	Change
Regulated T&D Electric Customers (in thousands)			
Residential	727	720	7
Commercial and industrial	74	73	1
Transmission and other	—	—	—
Total Regulated T&D Electric Customers	801	793	8

Regulated T&D Electric Revenue increased by $56 million primarily due to:

- An increase of $41 million due to distribution rate increases in the District of Columbia effective October 2012 and in Maryland effective July 2012 and July 2013.
- An increase of $10 million in transmission revenue rates effective June 1, 2012 and June 1, 2013 related to increases in transmission plant investment and operating expenses.
- An increase of $8 million in transmission revenue related to the recovery of MAPP abandonment costs, as approved by FERC (which is offset in Depreciation and Amortization).
- An increase of $4 million in transmission revenue primarily attributable to higher capacity as a result of expanding Maryland demand side management programs (which is partially offset in Depreciation and Amortization).
- An increase of $2 million due to customer growth in 2013, primarily in the residential class.

The aggregate amount of these increases was partially offset by:

- A decrease of $7 million in transmission revenue associated with the change in FERC formula rate true-ups.
- A decrease of $4 million in distribution revenue due to lower pass-through revenue (which is substantially offset by a corresponding decrease in Other Taxes) primarily the result of a decrease in utility taxes collected by Pepco on behalf of Montgomery County, Maryland.

Default Electricity Supply

	2013	2012	Change
Default Electricity Supply Revenue			
Residential	$ 539	$ 537	$ 2
Commercial and industrial	222	206	16
Other	17	12	5
Total Default Electricity Supply Revenue	$ 778	$ 755	$ 23

	2013	2012	Change
Default Electricity Supply Sales (GWh)			
Residential	5,944	6,092	(148)
Commercial and industrial	2,700	2,670	30
Other	14	7	7
Total Default Electricity Supply Sales	8,658	8,769	(111)

	2013	2012	Change
Default Electricity Supply Customers (in thousands)			
Residential	569	574	(5)
Commercial and industrial	44	44	—
Other	—	—	—
Total Default Electricity Supply Customers	613	618	(5)

Default Electricity Supply Revenue increased by $23 million primarily due to:

- An increase of $27 million as a result of higher Default Electricity Supply rates.
- An increase of $5 million primarily due to higher revenue from transmission enhancement credits.
- An increase of $2 million due to higher sales, primarily as a result of colder weather during the 2013 fall months, as compared to 2012.

The aggregate amount of these increases was partially offset by a decrease of $11 million due to lower sales, primarily as a result of customer migration to competitive suppliers.

The following table shows the percentages of Pepco's total distribution sales by jurisdiction that are derived from customers receiving Default Electricity Supply from Pepco. Amounts are for the year ended December 31:

	2013	2012
Sales to District of Columbia customers	25%	25%
Sales to Maryland customers	41%	40%

<u>*Operating Expenses*</u>

Purchased Energy

Purchased Energy consists of the cost of electricity purchased by Pepco to fulfill its Default Electricity Supply obligation and, as such, is recoverable from customers in accordance with the terms of public service commission orders. Purchased Energy increased by $24 million to $750 million in 2013 from $726 million in 2012 primarily due to:

- An increase of $33 million due to higher average electricity costs under Default Electricity Supply contracts.
- An increase of $2 million due to higher electricity sales primarily as a result of colder weather during the 2013 fall months, as compared to 2012.

The aggregate amount of these increases was partially offset by a decrease of $11 million primarily due to customer migration to competitive suppliers.

Other Operation and Maintenance

Other Operation and Maintenance expense decreased by $12 million to $391 million in 2013 from $403 million in 2012 primarily due to:

- A decrease of $10 million associated with lower maintenance and tree trimming costs.
- A decrease of $7 million in other storm restoration costs.
- A decrease of $4 million in customer service costs.

The aggregate amount of these decreases was partially offset by:

- An increase of $4 million primarily due to 2012 total incremental storm restoration costs for major storm events as described in the following table:

	2013	2012	Change
Regulatory asset established for future recovery of January 2011 winter storm costs	$ —	$ (9)	$ 9
Costs associated with derecho storm (June 2012)	—	22	(22)
Regulatory assets established for future recovery of derecho storm costs	—	(19)	19
Costs associated with Hurricane Sandy (October 2012)	—	6	(6)
Regulatory assets established for future recovery of Hurricane Sandy costs	—	(4)	4
Total incremental major storm restoration costs	$ —	$ (4)	$ 4

  - In January 2011, Pepco incurred incremental storm restoration costs of $10 million associated with a severe winter storm, all of which were expensed in 2011. In July 2012, the MPSC issued an order allowing for the deferral and recovery of $9 million of such costs over a five-year period.
  - During 2012, Pepco incurred incremental storm restoration costs of $22 million associated with the June 2012 derecho which resulted in widespread damage to the electric distribution system in each of Pepco's service territories. Pepco deferred $19 million of these costs as a regulatory asset to reflect the probable recovery of these storm restoration costs in Maryland. The MPSC approved the recovery of these costs for Pepco in its July 2013 rate order over a five-year period. The remaining costs of $3 million relate to repair work completed in the District of Columbia which are not deferrable.
  - In the fourth quarter of 2012, Pepco incurred incremental storm restoration costs of $6 million associated with Hurricane Sandy which resulted in widespread damage to the electric distribution system in each of Pepco's service territories. Pepco deferred $4 million of these costs as regulatory assets to reflect the probable recovery of these storm restoration costs in Maryland. The MPSC approved the recovery of these costs for Pepco in its July 2013 rate order over a five-year period. The remaining costs of $2 million relate to repair work completed in the District of Columbia which are not deferrable.
- An increase of $3 million in environmental remediation costs.
- An increase of $1 million associated with the write-off of disallowed MAPP costs.

Depreciation and Amortization

Depreciation and Amortization expense increased by $6 million to $196 million in 2013 from $190 million in 2012 primarily due to:

- An increase of $8 million in amortization of MAPP abandonment costs (which is offset in Regulated T&D Electric Revenue).
- An increase of $4 million in amortization of regulatory assets primarily related to recoverable major storm costs and rate case costs.
- An increase of $2 million associated with expanding Maryland demand side management programs (which is offset in Regulated T&D Electric Revenue).

The aggregate amount of these increases was partially offset by:

- A decrease of $5 million primarily due to lower depreciation rates, partially offset by plant additions.
- A decrease of $3 million in amortization of software related to AMI projects.

Other Taxes

Other Taxes decreased by $4 million to $368 million in 2013 from $372 million in 2012. The decrease was primarily due to decreases in the Montgomery County, Maryland utility taxes that are collected and passed through by Pepco (substantially offset by a corresponding decrease in Regulated T&D Electric Revenue).

Other Income (Expenses)

Other Expenses (which are net of Other Income) increased by $9 million to a net expense of $92 million in 2013 from a net expense of $83 million in 2012. The increase was primarily due to an increase of $9 million in interest expense primarily associated with higher long-term debt.

Income Tax Expense

Pepco's income tax expense increased by $31 million to $79 million in 2013 from $48 million in 2012. Pepco's effective income tax rates for the years ended December 31, 2013 and 2012 were 34.5% and 27.6%, respectively. The increase in the effective tax rate primarily resulted from changes in estimates and interest related to uncertain and effectively settled tax positions.

On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which Pepco is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. As a result of the court's ruling in this case, PHI determined in the first quarter of 2013 that it could no longer support its current assessment with respect to the likely outcome of tax positions associated with its cross-border energy lease investments held by its wholly-owned subsidiary Potomac Capital Investment Corporation, and PHI recorded an after-tax charge of $377 million in the first quarter of 2013. Included in the $377 million charge was an after-tax interest charge of $54 million and this amount was allocated to each member of PHI's consolidated group as if each member was a separate taxpayer, resulting in Pepco recording a $5 million interest benefit in the first quarter of 2013.

In 2012, Pepco recorded tax benefits of $11 million for changes in estimates and interest related to uncertain and effectively settled tax positions primarily due to the effective settlement with the IRS with respect to the methodology used historically to calculate deductible mixed service costs and the expiration of the statute of limitations associated with an uncertain tax position.

Capital Requirements

Sources of Capital

Pepco has a range of capital sources available, in addition to internally generated funds, to meet its long-term and short-term funding needs. The sources of long-term funding include the issuance of mortgage bonds and other debt securities and bank financings, as well as the ability to issue preferred stock. Proceeds from long-term financings are used primarily to fund long-term capital requirements, such as capital expenditures, and to repay or refinance existing indebtedness. Pepco traditionally has used a number of sources to fulfill short-term funding needs, including commercial paper, short-term notes, bank lines of credit and borrowings under the PHI money pool. Proceeds from short-term borrowings are used primarily to meet working capital needs, but may also be used to temporarily fund long-term capital requirements. Pepco's ability to generate funds from its operations and to access the capital and credit markets is subject to risks and uncertainties. Volatile and deteriorating financial market conditions, diminished liquidity and tightening credit may affect access to certain of Pepco's potential funding sources.

Debt Securities

Pepco has a Mortgage and Deed of Trust (the Mortgage) under which it issues First Mortgage Bonds. First Mortgage Bonds issued under the Mortgage are secured by a lien on substantially all of Pepco's property, plant and equipment, except for such property excluded from the lien of the Mortgage. The principal amount of First Mortgage Bonds that Pepco may issue under the Mortgage is limited by the principal amount of retired First Mortgage Bonds and 60% of the lesser of the cost or fair value of new property additions that have not been used as the basis for the issuance of additional First Mortgage Bonds. Pepco also has an indenture under which it issues senior notes secured by First Mortgage Bonds and an indenture under which it can issue unsecured debt securities, including medium-term notes. To fund the construction of pollution control facilities, Pepco also has from time to time raised capital through tax-exempt bonds issued by a municipality or public agency, the proceeds of which are loaned to Pepco by the municipality or agency.

Information concerning the principal amount and terms of Pepco's outstanding debt securities, as of December 31, 2013, is set forth in Note (9), "Debt," to the financial statements of Pepco.

Bank Financing

As further discussed in Note (9), "Debt," to the financial statements of Pepco, Pepco is a borrower under a $1.5 billion unsecured syndicated credit facility, along with PHI, DPL and ACE, which expires in August 2018. This credit facility provides for Pepco's liquidity needs, including obtaining letters of credit, borrowing for general corporate purposes and supporting its commercial paper program. Pepco's credit limit under the facility is the lesser of $250 million and the maximum amount of short-term debt Pepco is permitted to have outstanding by its regulatory authorities. The short-term borrowing limit established by FERC for Pepco is $500 million.

Commercial Paper Program

Pepco maintains an ongoing commercial paper program to address its short-term liquidity needs. As of December 31, 2013, the maximum capacity available under the program was $500 million, subject to available borrowing capacity under the credit facility.

Pepco had $151 million of commercial paper outstanding at December 31, 2013. The weighted average interest rate for commercial paper issued by Pepco during 2013 was 0.34% and the weighted average maturity of all commercial paper issued by Pepco during 2013 was five days.

Money Pool

Pepco participates in the money pool operated by PHI under authorization received from FERC. The money pool is an unsecured cash management mechanism used by PHI and eligible subsidiaries to manage their short-term investment and borrowing requirements. PHI may invest in, but not borrow from, the money pool. Eligible subsidiaries with surplus cash may deposit those funds in the money pool. Deposits in the money pool are guaranteed by PHI. Eligible subsidiaries with cash requirements may borrow from the money pool. Depositors in the money pool receive, and borrowers from the money pool pay, an interest rate based primarily on PHI's short-term borrowing rate. PHI deposits funds in the money pool to the extent that the pool has insufficient funds to meet the borrowing needs of its participants, which may require PHI to borrow funds for deposit from external sources.

Preferred Stock

Under its Articles of Incorporation, Pepco is authorized to issue and have outstanding up to 6 million shares of preferred stock in one or more series, with each series having such rights, preferences and limitations, including dividend and voting rights and redemption provisions, as the Board of Directors may establish. As of December 31, 2013 and 2012, there were no shares of Pepco preferred stock outstanding.

Regulatory Restrictions on Financing Activities

Pepco's long-term financing activities (including the issuance of securities and the incurrence of debt) are subject to authorization by the DCPSC and MPSC. Through its periodic filings with the respective utility commissions, Pepco generally maintains standing authority sufficient to cover its projected financing needs over a multi-year period. Under the FPA, FERC has jurisdiction over the issuance of long-term and short-term securities of public utilities, but only if the issuance is not regulated by the state public utility commission in which the public utility is organized and operating. Pepco has obtained FERC authorization for the issuance of short-term debt under these provisions.

Capital Expenditures

Pepco's capital expenditures for the year ended December 31, 2013 were $576 million. These expenditures were primarily related to capital costs associated with new customer services, distribution reliability and transmission. The expenditures also include an allocation by PHI of hardware and software expenditures that primarily benefit Power Delivery and are allocated to Pepco when the assets are placed in service.

Pepco's projected capital expenditures for the five-year period from 2014 through 2018 are summarized below. Pepco expects to fund these expenditures through internally generated cash, external financing and capital contributions from PHI.

	For the Year Ended December 31,					
	2014	2015	2016	2017	2018	Total
	(millions of dollars)					
Pepco						
Distribution	$505	$480	$481	$442	$465	$2,373
Transmission	113	74	43	74	91	395
Other	91	54	36	29	23	233
Total Pepco	$709	$608	$560	$545	$579	$3,001

Pepco has several construction projects within its service territory where performance has been subcontracted to Pepco Energy Services. Pepco guarantees the obligations of Pepco Energy Services under surety bonds obtained by Pepco Energy Services for these projects. These guarantees totaled $14 million at December 31, 2013.

Transmission and Distribution

The projected capital expenditures listed in the table above for distribution and transmission are primarily for facility replacements and upgrades to accommodate customer growth and service reliability, including capital expenditures for continuing reliability enhancement efforts.

DOE Capital Reimbursement Awards

During 2009, the DOE announced a $168 million award to PHI under the American Recovery and Reinvestment Act of 2009 for the implementation of an AMI system, direct load control, distribution automation, and communications infrastructure. Pepco was awarded $149 million, with $105 million to be used in the Maryland service territory and $44 million to be used in the District of Columbia service territory.

During 2010, Pepco and the DOE signed agreements formalizing Pepco's $149 million share of the $168 million award. Of the $149 million, $118 million is being used for the smart grid and other capital expenditures of Pepco. The remaining $31 million is being used to offset incremental expenditures associated with direct load control and other programs. During 2013, Pepco received award payments of $30 million. The cumulative award payments received by Pepco as of December 31, 2013, were $145 million.

The IRS has announced that, to the extent these grants are expended on capital items, they will not be considered taxable income.

Pension and Other Postretirement Benefit Plans

Pepco participates in pension and OPEB plans sponsored by PHI for its employees. Pepco contributed $85 million to the PHI Retirement Plan during 2012. In 2013 and 2012, Pepco contributed $6 million and $5 million, respectively, to the other postretirement benefit plan.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Delmarva Power & Light Company

DPL meets the conditions set forth in General Instruction I(1)(a) and (b) to Form 10-K, and accordingly information otherwise required under this Item has been omitted in accordance with General Instruction I(2)(a) to Form 10-K.

General Overview

DPL is engaged in the transmission and distribution of electricity in portions of Delaware and Maryland. DPL also provides Default Electricity Supply. DPL's electricity distribution service territory covers approximately 5,000 square miles and, as of December 31, 2013, had a population of approximately 1.4 million. As of December 31, 2013, approximately 66% of delivered electricity sales were to Delaware customers and approximately 34% were to Maryland customers. In northern Delaware, DPL also supplies and distributes natural gas to retail customers and provides transportation-only services to retail customers who purchase natural gas from other suppliers. DPL's natural gas distribution service territory covers approximately 275 square miles and, as of December 31, 2013, had a population of approximately 500,000.

DPL's results historically have been seasonal, generally producing higher revenue and income in the warmest and coldest periods of the year. For retail customers of DPL in Maryland, revenues are not affected by unseasonably warmer or colder weather because a BSA for retail customers was implemented that provides for a fixed distribution charge per customer. The BSA has the effect of decoupling the distribution revenue recognized in a reporting period from the amount of power delivered during the period. As a result, the only factors that will cause distribution revenue from customers in Maryland to fluctuate from period to period are changes in the number of customers and changes in the approved distribution charge per customer. A modified fixed variable rate design, which would provide for a charge not tied to a customer's volumetric consumption of electricity or natural gas, has been proposed for DPL electricity and natural gas customers in Delaware. Changes in customer usage (due to weather conditions, energy prices, energy efficiency programs or other reasons) from period to period have no impact on reported distribution revenue for customers to whom the BSA applies.

In accounting for the BSA in Maryland, a Revenue Decoupling Adjustment is recorded representing either (i) a positive adjustment equal to the amount by which revenue from Maryland retail distribution sales falls short of the revenue that DPL is entitled to earn based on the approved distribution charge per customer or (ii) a negative adjustment equal to the amount by which revenue from such distribution sales exceeds the revenue that DPL is entitled to earn based on the approved distribution charge per customer.

DPL is a wholly owned subsidiary of Conectiv which is wholly owned by PHI. Because each of PHI and Conectiv is a public utility holding company subject to PUHCA 2005, the relationship between each of PHI, Conectiv, PHI Service Company and DPL, as well as certain activities of DPL, are subject to FERC's regulatory oversight under PUHCA 2005.

Utility Capital Expenditures

DPL devotes a substantial portion of its total capital expenditures to improving the reliability of its electrical transmission and distribution systems and replacing aging infrastructure throughout its service territories. These activities include one or more of the following:

- Identifying and upgrading under-performing feeders;
- Adding new facilities to support load;
- Installing distribution automation systems on both the overhead and underground network systems; and
- Rejuvenating and replacing underground residential cables.

DPL's capital expenditures for continuing reliability enhancement efforts are included in the table of projected capital expenditures within "Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Requirements – Capital Expenditures."

Smart Grid

DPL is building a smart grid which is designed to meet the challenges of rising energy costs, improve service reliability of the energy distribution system, provide timely and accurate customer information and address government energy reduction goals. For a discussion of the smart grid, see PHI's "Management's Discussion and Analysis of Financial Condition and Results of Operations – General Overview – Power Delivery Initiatives and Activities – Smart Grid."

Mitigation of Regulatory Lag

An important factor in the ability of DPL to earn its authorized ROE is the willingness of the DPSC and the MPSC to adequately address the shortfall in revenues in DPL's rate structure due to the delay in time or "lag" between when costs are incurred and when they are reflected in rates. This delay is commonly known as "regulatory lag." DPL is currently experiencing significant regulatory lag because investments in rate base and operating expenses are increasing more rapidly than revenue growth. For a more detailed discussion of regulatory lag, see PHI's "Management's Discussion and Analysis of Financial Condition and Results of Operations – General Overview – Power Delivery Initiatives and Activities – Mitigation of Regulatory Lag."

MAPP Project

On August 24, 2012, the board of PJM terminated the MAPP project and removed it from PJM's regional transmission expansion plan. DPL had been directed to construct MAPP, a 152-mile high-voltage interstate transmission line, to address the reliability needs of the region's transmission system. In December 2012, DPL submitted a filing to FERC seeking recovery of $38 million of abandoned MAPP costs over a five-year period. The FERC filing addressed, among other things, the prudence of the recoverable costs incurred, the proposed period over which the abandoned costs are to be amortized and the rate of return on these costs during the recovery period.

In February 2013, FERC issued an order concluding that the MAPP project was cancelled for reasons beyond the control of DPL, finding that the prudently incurred costs associated with the abandonment of the MAPP project are eligible to be recovered, and setting for hearing and settlement procedures the prudence of the abandoned costs and the amortization period for those costs.

In December 2013, DPL submitted a settlement agreement to FERC with respect to this matter. Under the terms of the proposed settlement agreement, DPL would recover its abandoned MAPP costs over a three-year recovery period beginning June 1, 2013. The settlement agreement, which is subject to FERC approval, would resolve all issues concerning the recovery of abandonment costs associated with the cancellation of the MAPP project. The terms of this settlement, if approved, would not be subject to the pending formula rate or transmission ROE challenges at FERC or modification through any other FERC proceeding. DPL cannot predict the timing or results of a final FERC decision in this proceeding.

As of December 31, 2013, DPL had a regulatory asset related to the MAPP abandoned costs of $31 million, representing the original filing amount of approximately $38 million of abandoned costs referred to above less: (i) approximately $1 million of disallowed costs written off in 2013; and (ii) $6 million of amortization expense recorded in 2013. The regulatory asset balance includes the costs of land, land rights, engineering and design, environmental services, and project management and administration.

Transmission ROE Challenge

On February 27, 2013, the public service commissions and public advocates of the District of Columbia, Maryland, Delaware and New Jersey, as well as the Delaware Electric Municipal Corporation, Inc., filed a joint complaint with FERC against DPL, among others. The complainants challenged the base ROE and the application of the formula rate process, each associated with the transmission service that DPL provides. The complainants support an ROE within a zone of reasonableness of 6.78% and 10.33%, and have argued for a base ROE of 8.7%. The base ROE currently authorized by FERC for DPL is (i) 11.3% for facilities placed into service after January 1, 2006, and (ii) 10.8% for facilities placed into service prior to 2006. As currently authorized, the 10.8% base ROE for facilities placed into service prior to 2006 is eligible for a 50-basis-point incentive adder for being a member of a regional transmission organization. DPL believes the allegations in this complaint are without merit and is vigorously contesting it. On April 3, 2013, DPL filed its answer to this complaint, requesting that FERC dismiss the complaint against it on the grounds that it failed to meet the required burden to demonstrate that the existing rates and protocols are unjust and unreasonable. DPL cannot predict when a final FERC decision in this proceeding will be issued.

Earnings Overview

Net Income For the Year Ended December 31, 2013 Compared to the Year Ended December 31, 2012

DPL's net income for the year ended December 31, 2013 was $89 million compared to $73 million for the year ended December 31, 2012. The $16 million increase in earnings was primarily due to the following:

- An increase of $16 million from electric distribution base rate increases in Maryland and Delaware.
- An increase of $8 million due to lower operation and maintenance expense, primarily associated with higher storm restoration and system maintenance in 2012.
- An increase of $6 million primarily due to higher sales from colder winter weather, partially offset by lower sales from milder summer weather.
- A decrease of $6 million associated with Default Electricity Supply margins for DPL Delaware, primarily due to favorable adjustments in 2012 related to the under-recognition of allowed returns on net uncollectible expense and regulatory taxes.
- A decrease of $4 million due to higher depreciation and amortization expense associated primarily with regulatory assets and increases in plant investment, partially offset by lower depreciation rates.
- A decrease of $2 million due to higher interest expense resulting from an increase in outstanding debt.

Results of Operations

The following results of operations discussion compares the year ended December 31, 2013 to the year ended December 31, 2012. All amounts in the tables (except sales and customers) are in millions of dollars.

A condensed summary of DPL's statement of income for the year ended December 31, 2013 compared to the year ended December 31, 2012, is set forth in the table below:

	2013	2012	Change
Operating revenue	$1,244	$1,233	$ 11
Purchased energy	552	568	(16)
Gas purchased	109	113	(4)
Other operation and maintenance	251	260	(9)
Depreciation and amortization	107	102	5
Other taxes	40	36	4
Total operating expenses	1,059	1,079	(20)
Operating income	185	154	31
Other income (expenses)	(40)	(37)	(3)
Income before income tax expense	145	117	28
Income tax expense	56	44	12
Net income	$ 89	$ 73	$ 16

Electric Operating Revenue

	2013	2012	Change
Regulated T&D Electric Revenue	$ 502	$ 455	$ 47
Default Electricity Supply Revenue	538	579	(41)
Other Electric Revenue	13	16	(3)
Total Electric Operating Revenue	$1,053	$1,050	$ 3

The table above shows the amount of Electric Operating Revenue earned that is subject to price regulation (Regulated T&D Electric Revenue and Default Electricity Supply Revenue) and that which is not subject to price regulation (Other Electric Revenue).

Regulated T&D Electric Revenue includes revenue from the distribution of electricity, including the distribution of Default Electricity Supply, to DPL's customers within its service territories at regulated rates. Regulated T&D Electric Revenue also includes transmission service revenue that DPL receives as a transmission owner from PJM at rates regulated by FERC. Transmission rates are updated annually based on a FERC-approved formula methodology.

The costs related to Default Electricity Supply are included in Purchased Energy. Default Electricity Supply Revenue also includes transmission enhancement credits that DPL receives as a transmission owner from PJM in consideration for approved regional transmission expansion plan expenditures.

Other Electric Revenue includes work and services performed on behalf of customers, including other utilities, which is generally not subject to price regulation. Work and services includes mutual assistance to other utilities, highway relocation, rentals of pole attachments, late payment fees and collection fees.

Regulated T&D Electric

	2013	2012	Change
Regulated T&D Electric Revenue			
Residential	$ 232	$ 213	$ 19
Commercial and industrial	144	133	11
Transmission and other	126	109	17
Total Regulated T&D Electric Revenue	$ 502	$ 455	$ 47

	2013	2012	Change
Regulated T&D Electric Sales (GWh)			
Residential	5,122	5,051	71
Commercial and industrial	7,295	7,540	(245)
Transmission and other	48	50	(2)
Total Regulated T&D Electric Sales	12,465	12,641	(176)

	2013	2012	Change
Regulated T&D Electric Customers (in thousands)			
Residential	445	442	3
Commercial and industrial	60	60	—
Transmission and other	1	1	—
Total Regulated T&D Electric Customers	506	503	3

Regulated T&D Electric Revenue increased by $47 million primarily due to:

- An increase of $27 million due to distribution rate increases in Maryland effective July 2012 and September 2013, and in Delaware effective July 2012 and October 2013.
- An increase of $7 million in transmission revenue related to the resale by DPL of renewable energy in Delaware (which is substantially offset in Purchased Energy and Depreciation and Amortization).
- An increase of $5 million primarily due to a Renewable Portfolio Surcharge in Delaware effective June 2012 (which is substantially offset in Purchased Energy and Depreciation and Amortization).
- An increase of $6 million in transmission revenue related to the recovery of MAPP abandonment costs, as approved by FERC (which is offset in Depreciation and Amortization).
- An increase of $4 million in transmission revenue rates effective June 1, 2013 related to increases in transmission plant investment and operating expenses.
- An increase of $1 million in distribution revenue related to customer growth in all Delaware and Maryland customer classes.

The aggregate amount of these increases was partially offset by:

- A decrease of $7 million due to lower non-weather related average customer usage.
- A decrease of $1 million in transmission revenue associated with the change in FERC formula rate true-ups.

Default Electricity Supply

	2013	2012	Change
Default Electricity Supply Revenue			
Residential	$ 412	$ 448	$ (36)
Commercial and industrial	114	121	(7)
Other	12	10	2
Total Default Electricity Supply Revenue	$ 538	$ 579	$ (41)

	2013	2012	Change
Default Electricity Supply Sales (GWh)			
Residential	4,464	4,579	(115)
Commercial and industrial	1,342	1,622	(280)
Other	27	29	(2)
Total Default Electricity Supply Sales	5,833	6,230	(397)

	2013	2012	Change
Default Electricity Supply Customers (in thousands)			
Residential	390	402	(12)
Commercial and industrial	38	39	(1)
Other	—	1	(1)
Total Default Electricity Supply Customers	428	442	(14)

Default Supply Revenue decreased by $41 million primarily due to:

- A decrease of $27 million due to lower sales, primarily as a result of customer migration to competitive suppliers.
- A decrease of $17 million as a result of lower Default Electricity Supply rates.
- A decrease of $8 million due to lower non-weather related average customer usage.

The aggregate amount of these decreases was partially offset by an increase of $8 million due to higher sales primarily as a result of colder weather during the 2013 winter months, as compared to 2012.

The following table shows the percentages of DPL's total distribution sales by jurisdiction that are derived from customers receiving Default Electricity Supply from DPL. Amounts are for the years ended December 31:

	2013	2012
Sales to Delaware customers	44%	47%
Sales to Maryland customers	51%	53%

Natural Gas Operating Revenue

	2013	2012	Change
Regulated Gas Revenue	$165	$151	$ 14
Other Gas Revenue	26	32	(6)
Total Natural Gas Operating Revenue	$191	$183	$ 8

The table above shows the amounts of Natural Gas Operating Revenue from sources that are subject to price regulation (Regulated Gas Revenue) and those that generally are not subject to price regulation (Other Gas Revenue). Regulated Gas Revenue includes the revenue DPL receives from on-system natural gas delivered sales and the transportation of natural gas for customers within its service territory at regulated rates. Other Gas Revenue consists of off-system natural gas sales and the short-term release of interstate pipeline transportation and storage capacity not needed to serve customers. Off-system sales are made possible when low demand for natural gas by regulated customers creates excess pipeline capacity.

Regulated Gas

	2013	2012	Change
Regulated Gas Revenue			
Residential	$ 103	$ 94	$ 9
Commercial and industrial	52	47	5
Transportation and other	10	10	—
Total Regulated Gas Revenue	$ 165	$ 151	$ 14

	2013	2012	Change
Regulated Gas Sales (million cubic feet)			
Residential	7,861	6,428	1,433
Commercial and industrial	4,945	3,636	1,309
Transportation and other	6,990	6,751	239
Total Regulated Gas Sales	19,796	16,815	2,981

	2013	2012	Change
Regulated Gas Customers (in thousands)			
Residential	117	115	2
Commercial and industrial	9	10	(1)
Transportation and other	—	—	—
Total Regulated Gas Customers	126	125	1

Regulated Gas Revenue increased by $14 million primarily due to:

- An increase of $22 million due to higher sales primarily as a result of colder weather during the winter months of 2013 as compared to 2012.
- An increase of $7 million due to higher non-weather related average commercial customer usage.
- An increase of $4 million due to a revenue adjustment recorded in June 2012 for a reduction in the estimate of gas sold but not yet billed to customers (which is partially offset by an increase in Purchased Energy).
- An increase of $2 million due to a distribution rate increase effective July 2013.

The aggregate amount of these increases was partially offset by a decrease of $22 million due to a GCR decrease effective November 2012.

Other Gas Revenue

Other Gas Revenue decreased by $6 million primarily due to lower average prices and lower volumes for off-system sales to electric generators and gas marketers.

Operating Expenses

Purchased Energy consists of the cost of electricity purchased by DPL to fulfill its Default Electricity Supply obligation and, as such, is recoverable from customers in accordance with the terms of public service commission orders. Purchased Energy decreased by $16 million to $552 million in 2013 from $568 million in 2012 primarily due to:

- A decrease of $39 million primarily due to customer migration to competitive suppliers.
- A decrease of $20 million in deferred electricity expense primarily due to higher Default Electricity Supply cost of service rates, which resulted in a lower rate of recovery of Default Electricity Supply costs.

The aggregate amount of these decreases was partially offset by:

- An increase of $17 million due to higher average electricity costs under Default Electricity Supply contracts.
- An increase of $13 million in deferred electricity expense primarily due to a Renewable Portfolio Surcharge in Delaware effective June 2012 (which is substantially offset in Regulated T&D Electric Revenue and Depreciation and Amortization).
- An increase of $7 million due to higher electricity sales primarily as a result of colder weather during the 2013 winter months, as compared to 2012.
- An increase of $4 million in the costs associated with purchasing Renewable Energy Credits in Delaware (which is offset by a corresponding increase in Regulated T&D Electric Revenue).
- An increase of $2 million in the costs associated with purchases under wind power purchase agreements in Delaware (which is offset by a corresponding increase in Regulated T&D Electric Revenue).

Gas Purchased

Gas Purchased consists of the cost of gas purchased by DPL to fulfill its obligation to regulated gas customers and, as such, is recoverable from customers in accordance with the terms of public service commission orders. It also includes the cost of gas purchased for off-system sales. Total Gas Purchased decreased by $4 million to $109 million in 2013 from $113 million in 2012 primarily due to:

- A decrease of $13 million from the settlement of financial hedges entered into as part of DPL's hedge program for the purchase of regulated natural gas.
- A decrease of $5 million in the cost of gas purchases for off-system sales as a result of lower volumes.

The aggregate amount of these decreases was partially offset by:

- An increase of $11 million in the cost of gas purchases for on-system sales as a result of higher average gas prices.
- An increase of $4 million in the cost of gas purchases for on-system sales as a result of an adjustment recorded in June 2012 for a reduction in the estimate of gas sold but not yet billed to customers (which is offset by an increase in Regulated Gas Revenue).

Other Operation and Maintenance

Other Operation and Maintenance expense decreased by $9 million to $251 million in 2013 from $260 million in 2012 primarily due to:

- A decrease of $5 million associated with lower maintenance costs.
- A decrease of $5 million primarily due to 2012 total incremental storm restoration costs for major storm events as described in the following table:

	2013	2012	Change
Costs associated with derecho storm (June 2012)	$ —	$ 2	$ (2)
Regulatory asset established for future recovery of derecho storm costs	—	(1)	1
Costs associated with Hurricane Sandy (October 2012)	—	9	(9)
Regulatory asset established for future recovery of Hurricane Sandy costs	—	(5)	5
Total incremental major storm restoration costs	$ —	$ 5	$ (5)

  - During 2012, DPL incurred incremental storm restoration costs of $2 million associated with the June 2012 derecho which resulted in widespread damage to the electric distribution system in each of DPL's service territories. DPL deferred $1 million of these costs as a regulatory asset to reflect the probable recovery of these storm restoration costs in Maryland. The MPSC approved the recovery of these costs for DPL in its August 2013 electric distribution base rate order over a five-year period. The remaining costs of $1 million relate to repair work completed in Delaware which are not deferrable.
  - In the fourth quarter of 2012, DPL incurred incremental storm restoration costs of $9 million associated with Hurricane Sandy which resulted in widespread damage to the electric distribution system in each of DPL's service territories. DPL deferred $5 million of these costs as a regulatory asset to reflect the probable recovery of these storm restoration costs in Maryland. The MPSC approved the recovery of these costs for DPL in its August 2013 electric distribution base rate order over a five-year period. The remaining costs of $4 million relate to repair work completed in Delaware which are not deferrable.
- A decrease of $4 million in customer service costs.
- A decrease of $4 million in other storm restoration costs.

The aggregate amount of these decreases was partially offset by:

- An increase of $6 million resulting from 2012 deferred cost adjustments associated with DPL Default Electricity Supply. The deferred cost adjustments were primarily due to the under-recognition of allowed returns on net uncollectible expense and regulatory taxes.
- An increase of $2 million associated with the write-offs of disallowed MAPP and associated transmission projects costs.

Depreciation and Amortization

Depreciation and Amortization expense increased by $5 million to $107 million in 2013 from $102 million in 2012 primarily due to:

- An increase of $6 million in amortization of MAPP abandonment costs (which is offset by a corresponding increase in Regulated T&D Electric Revenue).

- An increase of $4 million due to utility plant additions.
- An increase of $2 million in amortization of regulatory assets primarily related to recoverable AMI costs, major storm costs and rate case costs.

The aggregate amount of these increases was partially offset by a decrease of $7 million in the Delaware Renewable Energy Portfolio Standards deferral (which is substantially offset by a corresponding increase in Fuel and Purchased Energy).

Other Taxes

Other Taxes increased by $4 million to $40 million in 2013 from $36 million in 2012. The increase was primarily due to higher property taxes.

Other Income (Expenses)

Other Expenses (which are net of Other Income) increased by $3 million to a net expense of $40 million in 2013 from a net expense of $37 million in 2012. The increase was primarily due to an increase in long-term debt interest expense due to the issuance of $250 million of First Mortgage Bonds in June 2012.

Income Tax Expense

DPL's income tax expense increased by $12 million to $56 million in 2013 from $44 million in 2012. DPL's effective income tax rates for the years ended December 31, 2013 and 2012 were 38.6% and 37.6%, respectively. The increase in the effective tax rate primarily resulted from adjustments to prior year taxes recorded during the year ended December 31, 2012.

On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which DPL is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. As a result of the court's ruling in this case, PHI determined in the first quarter of 2013 that it could no longer support its current assessment with respect to the likely outcome of tax positions associated with its cross-border energy lease investments held by its wholly-owned subsidiary Potomac Capital Investment Corporation, and PHI recorded an after-tax charge of $377 million in the first quarter of 2013. Included in the $377 million charge was an after-tax interest charge of $54 million and this amount was allocated to each member of PHI's consolidated group as if each member was a separate taxpayer, resulting in DPL recording a $1 million interest benefit in the first quarter of 2013.

Capital Requirements

Sources of Capital

DPL has a range of capital sources available, in addition to internally generated funds, to meet its long-term and short-term funding needs. The sources of long-term funding include the issuance of mortgage bonds and other debt securities and bank financings, as well as the ability to issue preferred stock. Proceeds from long-term financings are used primarily to fund long-term capital requirements, such as capital expenditures, and to repay or refinance existing indebtedness. DPL traditionally has used a number of sources to fulfill short-term funding needs, including commercial paper, medium- and short-term notes, bank lines of credit, and borrowings under the PHI money pool. Proceeds from short-term borrowings are used primarily to meet working capital needs, but may also be used to temporarily fund long-term capital requirements. DPL's ability to generate funds from its operations and to access the capital and credit markets is subject to risks and uncertainties. Volatile and deteriorating financial market conditions, diminished liquidity and tightening credit may affect access to certain of DPL's potential funding sources.

Debt Securities

DPL has a Mortgage and Deed of Trust (the Mortgage) under which it issues First Mortgage Bonds. First Mortgage Bonds issued under the Mortgage are secured by a lien on substantially all of DPL's property, plant and equipment, except for such property excluded from the lien of the Mortgage. The principal amount of First Mortgage Bonds that DPL may issue under the Mortgage is limited by the principal amount of retired First Mortgage Bonds and 60% of the lesser of the cost or fair value of new property additions that have not been used as the basis for the issuance of additional First Mortgage Bonds. DPL also has an indenture under which it issues unsecured senior notes, medium-term notes and Variable Rate Demand Bonds (VRDBs). To fund the construction of pollution control facilities, DPL also has from time to time raised capital through tax-exempt bonds, including tax-exempt VRDBs, issued by a public agency, the proceeds of which are loaned to DPL by the agency.

Information concerning the principal amount and terms of DPL's outstanding First Mortgage Bonds, senior notes, medium-term notes and tax-exempt bonds issued for the benefit of DPL, as of December 31, 2013, is set forth in Note (10), "Debt," to the financial statements of DPL.

Bank Financing

As further discussed in Note (10), "Debt," to the financial statements of DPL, DPL is a borrower under a $1.5 billion unsecured syndicated credit facility, along with PHI, Pepco and ACE, which expires in August 2018. This credit facility provides for DPL's liquidity needs, including obtaining letters of credit, borrowing for general corporate purposes and supporting its commercial paper program. DPL's credit limit under the facility is the lesser of $250 million and the maximum amount of short-term debt DPL is permitted to have outstanding by its regulatory authorities. The short-term borrowing limit established by FERC for DPL is $500 million.

Commercial Paper Program

DPL maintains an ongoing commercial paper program to address its short-term liquidity needs. As of December 31, 2013, the maximum capacity available under the program was $500 million, subject to available borrowing capacity under the credit facility.

DPL had $147 million of commercial paper outstanding at December 31, 2013. The weighted average interest rate for commercial paper issued by DPL during 2013 was 0.29% and the weighted average maturity of all commercial paper issued by DPL during 2013 was three days.

Money Pool

DPL participates in the money pool operated by PHI under authorization received from FERC. The money pool is an unsecured cash management mechanism used by PHI and eligible subsidiaries to manage their short-term investment and borrowing requirements. PHI may invest in, but not borrow from, the money pool. Eligible subsidiaries with surplus cash may deposit those funds in the money pool. Deposits in the money pool are guaranteed by PHI. Eligible subsidiaries with cash requirements may borrow from the money pool. Depositors in the money pool receive, and borrowers from the money pool pay, an interest rate based primarily on PHI's short-term borrowing rate. PHI deposits funds in the money pool to the extent that the pool has insufficient funds to meet the borrowing needs of its participants, which may require PHI to borrow funds for deposit from external sources.

<u>Regulatory Restrictions on Financing Activities</u>

DPL's long-term financing activities (including the issuance of securities and the incurrence of debt) is subject to authorization by the DPSC and the MPSC. Through its periodic filings with the respective utility commissions, DPL generally maintains standing authority sufficient to cover its projected financing needs over a multi-year period. Under the FPA, FERC has jurisdiction over the issuance of long-term and short-term securities of public utilities, but only if the issuance is not regulated by the state public utility commission in which the public utility is organized and operating. DPL has obtained FERC authorization for the issuance of short-term debt under these provisions.

Capital Expenditures

DPL's capital expenditures for the year ended December 31, 2013 were $357 million. These expenditures were primarily related to capital costs associated with new customer services, distribution reliability and transmission. The expenditures also include an allocation by PHI of hardware and software expenditures that primarily benefit Power Delivery and are allocated to DPL when the assets are placed in service.

DPL's projected capital expenditures for the five-year period from 2014 through 2018 are summarized below. DPL expects to fund these expenditures through internally generated cash, external financing and capital contributions from PHI.

	For the Year Ended December 31,					
	2014	2015	2016	2017	2018	Total
			(millions of dollars)			
DPL						
Distribution	$162	$149	$153	$159	$155	$ 778
Distribution – Smart Grid (AMI)	2	—	—	—	—	2
Transmission	96	88	119	96	138	537
Gas Delivery	29	28	28	28	29	142
Other	51	32	24	28	20	155
Total DPL	$340	$297	$324	$311	$342	$1,614

Transmission and Distribution

The projected capital expenditures listed in the table above for distribution (other than the smart grid), transmission and gas delivery are primarily for facility replacements and upgrades to accommodate customer growth and service reliability, including capital expenditures for reliability enhancement efforts.

Pension and Other Postretirement Benefit Plans

DPL participates in pension and OPEB plans sponsored by PHI for its employees. DPL contributed $10 million and $85 million to the PHI Retirement Plan during 2013 and 2012, respectively. In 2013 and 2012, DPL contributed $3 million and $7 million, respectively, to the other postretirement benefit plan.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Atlantic City Electric Company

ACE meets the conditions set forth in General Instruction I(1)(a) and (b) to Form 10-K, and accordingly information otherwise required under this Item has been omitted in accordance with General Instruction I(2)(a) to Form 10-K.

General Overview

ACE is engaged in the transmission and distribution of electricity in portions of southern New Jersey. ACE also provides Default Electricity Supply. Default Electricity Supply is known as BGS in New Jersey. ACE's service territory covers approximately 2,700 square miles and, as of December 31, 2013, had a population of approximately 1.1 million.

ACE is a wholly owned subsidiary of Conectiv, which is wholly owned by PHI. Because each of PHI and Conectiv is a public utility holding company subject to PUHCA 2005, the relationship between each of PHI, Conectiv, PHI Service Company and ACE, as well as certain activities of ACE, are subject to FERC's regulatory oversight under PUHCA 2005.

Utility Capital Expenditures

ACE devotes a substantial portion of its total capital expenditures to improving the reliability of its electrical transmission and distribution systems and replacing aging infrastructure throughout its service territory. These activities include one or more of the following:

- Identifying and upgrading under-performing feeders;
- Adding new facilities to support load;
- Installing distribution automation systems on both the overhead and underground network systems; and
- Rejuvenating and replacing underground residential cables.

ACE's capital expenditures for continuing reliability enhancement efforts are included in the table of projected capital expenditures within "Management's Discussion and Analysis of Financial Condition and Results of Operations – Capital Requirements – Capital Expenditures."

Mitigation of Regulatory Lag

An important factor in the ability of ACE to earn its authorized ROE is the willingness of the NJBPU to adequately address the shortfall in revenues in ACE's rate structure due to the delay in time or "lag" between when costs are incurred and when they are reflected in rates. This delay is commonly known as "regulatory lag." ACE is currently experiencing significant regulatory lag because investments in rate base and operating expenses are increasing more rapidly than revenue growth. For a more detailed discussion of regulatory lag, see PHI's "Management's Discussion and Analysis of Financial Condition and Results of Operations – General Overview – Power Delivery Initiatives and Activities – Mitigation of Regulatory Lag."

Transmission ROE Challenge

On February 27, 2013, the public service commissions and public advocates of the District of Columbia, Maryland, Delaware and New Jersey, as well as the Delaware Electric Municipal Corporation, Inc., filed a joint complaint with FERC against ACE, among others. The complainants challenged the base ROE and the application of the formula rate process, each associated with the transmission service that ACE provides. The complainants support an ROE within a zone of reasonableness of 6.78% and 10.33%, and have argued for a base ROE of 8.7%. The base ROE currently authorized by FERC for ACE is (i) 11.3% for facilities placed into service after January 1, 2006, and (ii) 10.8% for facilities placed into service prior to 2006. As currently authorized, the 10.8% base ROE for facilities placed into service prior to 2006 is eligible for a 50-basis-point incentive adder for being a member of a regional transmission organization. ACE believes the allegations in this complaint are without merit and is vigorously contesting it. On April 3, 2013, ACE filed its answer to this complaint, requesting that FERC dismiss the complaint against it on the grounds that it failed to meet the required burden to demonstrate that the existing rates and protocols are unjust and unreasonable. ACE cannot predict when a final FERC decision in this proceeding will be issued.

Earnings Overview

Net Income For the Year Ended December 31, 2013 Compared to the Year Ended December 31, 2012

ACE's consolidated net income for the year ended December 31, 2013 was $50 million compared to $35 million for the year ended December 31, 2012. The $15 million increase in earnings was primarily due to the following:

- An increase of $24 million from electric distribution base rate increases in New Jersey.
- An increase of $6 million due to higher tax benefits related to uncertain and effectively settled tax positions.
- An increase of $3 million due to lower operation and maintenance expense, primarily associated with higher storm restoration and system maintenance in 2012.
- A decrease of $8 million due to higher depreciation and amortization expense associated primarily with regulatory assets and increases in plant investment.
- A decrease of $4 million due to lower non-weather related average customer usage in New Jersey.
- A decrease of $2 million primarily due to lower sales from milder summer weather.
- A decrease of $2 million due to lower income related to AFUDC that is applied to capital projects.

Results of Operations

The following results of operations discussion compares the year ended December 31, 2013 to the year ended December 31, 2012. All amounts in the tables (except sales and customers) are in millions of dollars.

A condensed summary of ACE's consolidated statement of income for the year ended December 31, 2013 compared to the year ended December 31, 2012, is set forth in the table below:

	2013	2012	Change
Operating revenue	$1,202	$1,198	$ 4
Purchased energy	660	703	(43)
Other operation and maintenance	230	239	(9)
Depreciation and amortization	136	124	12
Other taxes	14	18	(4)
Deferred electric service costs	26	(5)	31
Total operating expenses	1,066	1,079	(13)
Operating income	136	119	17
Other income (expenses)	(67)	(66)	(1)
Income before income tax expense	69	53	16
Income tax expense	19	18	1
Consolidated Net Income	$ 50	$ 35	$ 15

Operating Revenue

	2013	2012	Change
Regulated T&D Electric Revenue	$ 429	$ 392	$ 37
Default Electricity Supply Revenue	759	790	(31)
Other Electric Revenue	14	16	(2)
Total Operating Revenue	$1,202	$1,198	$ 4

The table above shows the amount of Operating Revenue earned that is subject to price regulation (Regulated T&D Electric Revenue and Default Electricity Supply Revenue) and that which is not subject to price regulation (Other Electric Revenue).

Regulated T&D Electric Revenue includes revenue from the distribution of electricity, including the distribution of Default Electricity Supply, to ACE's customers within its service territory at regulated rates. Regulated T&D Electric Revenue also includes transmission service revenue that ACE receives as a transmission owner from PJM at rates regulated by FERC. Transmission rates are updated annually based on a FERC-approved formula methodology.

The costs related to Default Electricity Supply are included in Purchased Energy. Default Electricity Supply Revenue also includes revenue from Transition Bond Charges that ACE receives, and pays to ACE Funding, to fund the principal and interest payments on Transition Bonds, and revenue in the form of transmission enhancement credits.

Other Electric Revenue includes work and services performed on behalf of customers, including other utilities, which is generally not subject to price regulation. Work and services includes mutual assistance to other utilities, highway relocation, rentals of pole attachments, late payment fees and collection fees.

Regulated T&D Electric

	2013	2012	Change
Regulated T&D Electric Revenue			
Residential	$190	$170	$ 20
Commercial and industrial	148	132	16
Transmission and other	91	90	1
Total Regulated T&D Electric Revenue	$429	$392	$ 37

	2013	2012	Change
Regulated T&D Electric Sales (GWh)			
Residential	4,214	4,357	(143)
Commercial and industrial	4,969	5,090	(121)
Transmission and other	48	48	—
Total Regulated T&D Electric Sales	9,231	9,495	(264)

	2013	2012	Change
Regulated T&D Electric Customers (in thousands)			
Residential	478	479	(1)
Commercial and industrial	66	65	1
Transmission and other	1	1	—
Total Regulated T&D Electric Customers	545	545	—

Regulated T&D Electric Revenue increased by $37 million primarily due to:

- An increase of $39 million due to distribution rate increases effective November 2012 and July 2013, and a customer charge rate increase effective November 2012.
- An increase of $6 million primarily due to a rate increase in the New Jersey Societal Benefit Charge effective July 2012 (which is offset in Deferred Electric Service Costs).
- An increase of $2 million in transmission revenue associated with the change in FERC formula rate true-ups.

The aggregate amount of these increases was partially offset by:

- A decrease of $6 million due to lower non-weather related average residential and commercial customer usage.
- A decrease of $3 million due to lower sales primarily as a result of milder weather during the 2013 summer months, as compared to 2012.
- A decrease of $1 million in transmission revenue primarily attributable to a peak-load rate decrease effective January 2013.

Default Electricity Supply

	2013	2012	Change
Default Electricity Supply Revenue			
Residential	$425	$482	$ (57)
Commercial and industrial	206	215	(9)
Other	128	93	35
Total Default Electricity Supply Revenue	$759	$790	$ (31)

Other Default Electricity Supply Revenue consists primarily of (i) revenue from the resale in the PJM RTO market of energy and capacity purchased under contracts with unaffiliated NUGs and (ii) revenue from transmission enhancement credits.

	2013	2012	Change
Default Electricity Supply Sales (GWh)			
Residential	3,335	3,574	(239)
Commercial and industrial	1,037	1,216	(179)
Other	14	19	(5)
Total Default Electricity Supply Sales	4,386	4,809	(423)

	2013	2012	Change
Default Electricity Supply Customers (in thousands)			
Residential	393	390	3
Commercial and industrial	43	45	(2)
Other	—	—	—
Total Default Electricity Supply Customers	436	435	1

Default Electricity Supply Revenue decreased by $31 million primarily due to:

- A decrease of $38 million due to lower sales, primarily as a result of customer migration to competitive suppliers.
- A decrease of $14 million due to lower non-weather related average residential and commercial customer usage.
- A decrease of $8 million as a result of lower Default Electricity Supply rates, primarily due to a Basic Generation Service rate decrease that became effective June 2013, partially offset by a Non-utility Generation Charge rate increase that became effective June 2013.
- A decrease of $6 million due to lower sales, primarily as a result of milder weather during the 2013 summer months, as compared to 2012.

The aggregate amount of these decreases was partially offset by an increase of $36 million in wholesale energy and capacity resale revenues primarily due to higher market prices for the resale of electricity and capacity purchased from NUGs.

For the years ended December 31, 2013 and 2012, the percentages of ACE's total distribution sales that are derived from customers receiving Default Electricity Supply are 48% and 51%, respectively.

<u>Operating Expenses</u>

Purchased Energy

Purchased Energy consists of the cost of electricity purchased by ACE to fulfill its Default Electricity Supply obligation and, as such, is recoverable from customers in accordance with the terms of public service commission orders. Purchased Energy decreased by $43 million to $660 million in 2013 from $703 million in 2012 primarily due to:

- A decrease of $35 million primarily due to customer migration to competitive suppliers.
- A decrease of $5 million due to lower average electricity costs under Default Electricity Supply contracts.
- A decrease of $3 million due to lower electricity sales, primarily as a result of milder weather during the 2013 summer months, as compared to 2012.

Other Operation and Maintenance

Other Operation and Maintenance expense decreased by $9 million to $230 million in 2013 from $239 million in 2012 primarily due to:

- A decrease of $5 million in other storm restoration costs.
- A decrease of $2 million in bad debt expense that is deferred and recoverable.
- A decrease of $1 million associated with lower maintenance costs.

Other Operation and Maintenance expense also includes the effects of 2012 total incremental storm restoration costs for major storm events as described in the following table:

	2013	2012	Change
Costs associated with derecho storm (June 2012)	$ —	$ 14	$ (14)
Regulatory asset established for future recovery of derecho storm costs	—	(14)	14
Costs associated with Hurricane Sandy (October 2012)	—	13	(13)
Regulatory asset established for future recovery of Hurricane Sandy costs	—	(13)	13
Total incremental major storm restoration costs	$ —	$ —	$ —

- During 2012, ACE incurred incremental storm restoration costs of $14 million associated with the June 2012 derecho which resulted in widespread damage to the electric distribution system. ACE deferred all of these costs as a regulatory asset to reflect the probable recovery of these storm restoration costs in New Jersey. ACE's stipulation of settlement approved by the NJBPU in June 2013, provides for recovery of these costs over a three-year period.
- During the fourth quarter of 2012, ACE incurred incremental storm restoration costs of $13 million associated with Hurricane Sandy which resulted in widespread damage to the electric distribution system. ACE deferred all of these costs as a regulatory asset to reflect the probable recovery of these storm restoration costs in New Jersey. ACE's stipulation of settlement approved by the NJBPU in June 2013 provides for recovery of these costs over a three-year period.

Depreciation and Amortization

Depreciation and Amortization expense increased by $12 million to $136 million in 2013 from $124 million in 2012 primarily due to:

- An increase of $7 million in amortization of major storm costs.
- An increase of $6 million in amortization due to the expiration of the excess depreciation reserve regulatory liability in August 2013.

Other Taxes

Other Taxes decreased by $4 million to $14 million in 2013 from $18 million in 2012. The decrease was primarily due to decreased Transitional Energy Facility Assessment taxes due to a rate decrease effective January 2013 (partially offset by a corresponding decrease in Regulated T&D Electric Revenue).

Deferred Electric Service Costs

Deferred Electric Service Costs represent (i) the over or under recovery of electricity costs incurred by ACE to fulfill its Default Electricity Supply obligation and (ii) the over or under recovery of New Jersey Societal Benefit Program costs incurred by ACE. The cost of electricity purchased is reported under Purchased Energy and the corresponding revenue is reported under Default Electricity Supply Revenue. The cost of the New Jersey Societal Benefit Program is reported under Other Operation and Maintenance expense and the corresponding revenue is reported under Regulated T&D Electric Revenue.

Deferred Electric Service Costs increased by $31 million to an expense of $26 million in 2013 as compared to an expense reduction of $5 million in 2012, primarily due to an increase in deferred electricity expense as a result of higher Default Electricity Supply and New Jersey Societal Benefit Program revenue rates and lower electricity supply costs.

Other Income (Expenses)

Other Expenses (which are net of Other Income) increased by $1 million to a net expense of $67 million in 2013 from a net expense of $66 million in 2012 primarily due to lower income related to AFUDC that is applied to capital projects.

Income Tax Expense

ACE's consolidated income tax expense increased by $1 million to $19 million in 2013 from $18 million in 2012. ACE's consolidated effective income tax rates for the years ended December 31, 2013 and 2012 were 27.5% and 34.0%, respectively. The change in the effective tax rate primarily resulted from changes in estimates and interest related to uncertain and effectively settled tax positions. In the first quarter of 2013, ACE recorded an interest benefit of $6 million as discussed further below. In the first quarter of 2012, ACE recorded an interest benefit as a result of the effective settlement with the IRS with respect to the methodology used historically to calculate deductible mixed service costs.

On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which ACE is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. As a result of the court's ruling in this case, PHI determined in the first quarter of 2013 that it could no longer support its current assessment with respect to the likely outcome of tax positions associated with its cross-border energy lease investments held by its wholly-owned subsidiary Potomac Capital Investment Corporation, and PHI recorded an after-tax charge of $377 million in the first quarter of 2013. Included in the $377 million charge was an after-tax interest charge of $54 million and this amount was allocated to each member of PHI's consolidated group as if each member was a separate taxpayer, resulting in ACE recording a $6 million interest benefit in the first quarter of 2013.

Capital Requirements

Sources of Capital

ACE has a range of capital sources available, in addition to internally generated funds, to meet its long-term and short-term funding needs. The sources of long-term funding include the issuance of mortgage bonds and other debt securities and bank financings, as well as preferred stock. Proceeds from long-term financings are used primarily to fund long-term capital requirements, such as capital expenditures, and to repay or refinance existing indebtedness. ACE traditionally has used a number of sources to fulfill medium- and short-term funding needs, including commercial paper, medium- and short-term notes, bank lines of credit, and under certain circumstances, borrowings under the PHI money pool. Proceeds from short-term borrowings are used primarily to meet working capital needs, but may also be used to temporarily fund long-term capital requirements. ACE's ability to generate funds from its operations and to access the capital and credit markets is subject to risks and uncertainties. Volatile and deteriorating financial market conditions, diminished liquidity and tightening credit may affect access to certain of ACE's potential funding sources.

Debt Securities

ACE has a Mortgage and Deed of Trust (the Mortgage) under which it issues First Mortgage Bonds. First Mortgage Bonds issued under the Mortgage are secured by a lien on substantially all of ACE's property, plant and equipment, except for such property excluded from the lien of the Mortgage. The principal amount of First Mortgage Bonds that ACE may issue under the Mortgage is limited by the principal amount of retired First Mortgage Bonds and 65% of the lesser of the cost or fair value of new property additions that have not been used as the basis for the issuance of additional First Mortgage Bonds. ACE also has an indenture under which it issues senior notes secured by First Mortgage Bonds and an indenture under which it can issue unsecured debt securities, including VRDBs. To fund the construction of pollution control facilities, ACE also has from time to time raised capital through tax-exempt bonds, including tax-exempt VRDBs, issued by a municipality, the proceeds of which are loaned to ACE by the municipality.

Information concerning the principal amount and terms of ACE's outstanding First Mortgage Bonds, senior notes and tax-exempt bonds issued for the benefit of ACE, as of December 31, 2013, is set forth in Note (9), "Debt," to the consolidated financial statements of ACE.

Bank Financing

As further discussed in Note (9), "Debt," to the consolidated financial statements of ACE, ACE is a borrower under a $1.5 billion unsecured syndicated credit facility, along with PHI, Pepco and DPL, which expires in August 2018. This credit facility provides for ACE's liquidity needs, including obtaining letters of credit, borrowing for general corporate purposes and supporting its commercial paper program. ACE's credit limit under the facility is the lesser of $250 million and the maximum amount of short-term debt ACE is permitted to have outstanding by its regulatory authorities. The short-term borrowing limit established by the NJBPU for ACE is $350 million.

Commercial Paper Program

ACE maintains an ongoing commercial paper program to address its short-term liquidity needs. As of December 31, 2013, the maximum capacity available under the program was $250 million, subject to available borrowing capacity under the credit facility.

ACE had $120 million of commercial paper outstanding at December 31, 2013. The weighted average interest rate for commercial paper issued by ACE during 2013 was 0.31% and the weighted average maturity of all commercial paper issued by ACE during 2013 was four days.

Money Pool

ACE participates in the money pool operated by PHI under authorization received from the NJBPU. The money pool is an unsecured cash management mechanism used by PHI and eligible subsidiaries to manage their short-term investment and borrowing requirements. PHI may invest in, but not borrow from, the money pool. Eligible subsidiaries with surplus cash may deposit those funds in the money pool. Deposits in the money pool are guaranteed by PHI. Eligible subsidiaries with cash requirements may borrow from the money pool. Depositors in the money pool receive, and borrowers from the money pool pay, an interest rate based primarily on PHI's short-term borrowing rate. PHI deposits funds in the money pool to the extent that the pool has insufficient funds to meet the borrowing needs of its participants, which may require PHI to borrow funds for deposit from external sources. By regulatory order, the NJBPU has restricted ACE's participation in the PHI money pool. ACE may not invest in the money pool, but may borrow from it if the rates are lower than the rates at which ACE could borrow funds externally.

Preferred Stock

Under its Certificate of Incorporation, ACE is authorized to issue and have outstanding up to (i) 799,979 shares of Cumulative Preferred Stock, (ii) 2 million shares of No Par Preferred Stock and (iii) 3 million shares of Preference Stock, each such type of preferred stock having such terms and conditions as are set forth in or authorized by the Certificate of Incorporation. As of December 31, 2013 and 2012, ACE had no shares of preferred stock outstanding.

Regulatory Restrictions on Financing Activities

ACE's long-term and short-term (consisting of debt instruments with a maturity of one year or less) financing activities are subject to authorization by the NJBPU. Through its periodic filings with the NJBPU, ACE generally maintains standing authority sufficient to cover its projected financing needs over a multi-year period. ACE's long-term and short-term financing activities do not require FERC approval.

State corporate laws impose limitations on the funds that can be used to pay dividends. In addition, ACE must obtain the approval of the NJBPU before dividends can be paid if its equity as a percent of its total capitalization, excluding securitization debt, falls below 30%. As of December 31, 2013, ACE complied with this requirement without the need to seek approval of the NJBPU.

Capital Expenditures

ACE's capital expenditures for the year ended December 31, 2013 were $261 million. These expenditures were primarily related to capital costs associated with new customer services, distribution reliability and transmission. The expenditures also include an allocation by PHI of hardware and software expenditures that primarily benefit Power Delivery and are allocated to ACE when the assets are placed in service.

ACE's projected capital expenditures for the five-year period from 2014 through 2018 are summarized below. ACE expects to fund these expenditures through internally generated cash, external financing and capital contributions from PHI.

	For the Year Ended December 31,					
	2014	**2015**	**2016**	**2017**	**2018**	**Total**
	(millions of dollars)					
ACE						
Distribution	$107	$ 78	$137	$128	$124	$ 574
Distribution – Smart Grid (AMI)	—	—	—	—	8	8
Transmission	109	128	98	85	56	476
Other	25	16	39	39	22	141
Total ACE	$241	$222	$274	$252	$210	$1,199

Transmission and Distribution

The projected capital expenditures listed in the table for distribution (other than the smart grid) and transmission are primarily for facility replacements and upgrades to accommodate customer growth and service reliability, including continued capital expenditures for reliability enhancement efforts.

DOE Capital Reimbursement Awards

During 2009, the DOE announced a $168 million award to PHI under the American Recovery and Reinvestment Act of 2009 for the implementation of an AMI system, direct load control, distribution automation, and communications infrastructure, of which $19 million was for ACE's service territory.

During 2010, ACE and the DOE signed agreements formalizing ACE's $19 million share of the $168 million award. Of the $19 million, $12 million is being used for the smart grid and other capital expenditures of ACE. The remaining $7 million is being used to offset incremental expenditures associated with direct load control and other programs. During 2013, ACE received award payments of $4 million. The cumulative award payments received by ACE as of December 31, 2013, were $17 million.

The IRS has announced that, to the extent these grants are expended on capital items, they will not be considered taxable income.

Pension and Other Postretirement Benefit Plans

ACE participates in pension and OPEB plans sponsored by PHI for its employees. ACE contributed $30 million to the PHI Retirement Plan during each of 2013 and 2012. In 2013 and 2012, ACE contributed $6 million and $7 million, respectively, to the other postretirement benefit plan.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Risk management policies for PHI and its subsidiaries are determined by PHI's Corporate Risk Management Committee (CRMC), the members of which are PHI's Chief Risk Officer, Executive Vice President (Power Delivery), Chief Financial Officer, General Counsel, Chief Information Officer and other senior executives. The CRMC monitors interest rate fluctuation, commodity price fluctuation, and credit risk exposure, and sets risk management policies that establish limits on unhedged risk and determine risk reporting requirements. For information about PHI's derivative activities, other than the information otherwise disclosed herein, refer to Note (2), "Significant Accounting Policies – Accounting For Derivatives," and Note (13), "Derivative Instruments and Hedging Activities," of the consolidated financial statements of PHI.

Pepco Holdings, Inc.

Interest Rate Risk

Pepco Holdings and its subsidiaries' variable or floating rate debt is subject to the risk of fluctuating interest rates in the normal course of business. Pepco Holdings manages interest rate risk through the use of fixed and, to a lesser extent, variable rate debt. The effect of a hypothetical 10% change in interest rates on the annual interest costs for short-term and variable rate debt was less than $1 million as of December 31, 2013.

Potomac Electric Power Company

Interest Rate Risk

Pepco's debt is subject to the risk of fluctuating interest rates in the normal course of business. Pepco manages interest rate risk through the use of fixed and, to a lesser extent, variable rate debt. The effect of a hypothetical 10% change in interest rates on the annual interest costs for short-term debt and variable rate debt was less than $1 million as of December 31, 2013.

Delmarva Power & Light Company

Commodity Price Risk

DPL uses derivative instruments (for example, forward contracts, futures, swaps, and exchange-traded and over-the-counter options) primarily to reduce natural gas commodity price volatility. DPL also manages commodity risk with capacity contracts that do not meet the definition of derivatives. The primary goal of these activities is to reduce the exposure of its regulated retail natural gas customers to natural gas price spikes. All premiums paid and other transaction costs incurred as part of DPL's natural gas hedging activity, in addition to all gains and losses on the natural gas hedging activity, are fully recoverable through the GCR clause included in DPL's natural gas tariff rates approved by the DPSC and are deferred until recovered. At December 31, 2013, after the effects of cash collateral and netting of derivative assets and liabilities available to be offset under master netting arrangements, DPL had no net derivative assets or liabilities. At December 31, 2012, after the effects of cash collateral and netting of derivative assets and liabilities available to be offset under master netting arrangements, DPL had a net derivative liability of $4 million, offset by a $4 million regulatory asset.

Interest Rate Risk

DPL's debt is subject to the risk of fluctuating interest rates in the normal course of business. DPL manages interest rate risk through the use of fixed and, to a lesser extent, variable rate debt. The effect of a hypothetical 10% change in interest rates on the annual interest costs for short-term debt and variable rate debt was less than $1 million as of December 31, 2013.

Atlantic City Electric Company

Interest Rate Risk

ACE's debt is subject to the risk of fluctuating interest rates in the normal course of business. ACE manages interest rate risk through the use of fixed and, to a lesser extent, variable rate debt. The effect of a hypothetical 10% change in interest rates on the annual interest costs for short-term debt and variable rate debt was less than $1 million as of December 31, 2013.

Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Listed below is a table that sets forth, for each registrant, the page number where the information is contained herein.

* Pepco and DPL have no operating subsidiaries and, therefore, their financial statements are not consolidated.

Management's Report on Internal Control over Financial Reporting

The management of Pepco Holdings, Inc. (Pepco Holdings) is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) and Rule 15d-15(f) under the Exchange Act. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management of Pepco Holdings assessed Pepco Holdings' internal control over financial reporting as of December 31, 2013 based on the framework in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its assessment, the management of Pepco Holdings concluded that Pepco Holdings' internal control over financial reporting was effective as of December 31, 2013.

PricewaterhouseCoopers LLP, the independent registered public accounting firm that audited the consolidated financial statements of Pepco Holdings included in this Annual Report on Form 10-K, has also issued its attestation report on the effectiveness of Pepco Holdings' internal control over financial reporting, which is included herein.

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of
Pepco Holdings, Inc.

In our opinion, the consolidated financial statements listed in the accompanying index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Pepco Holdings, Inc. and its subsidiaries at December 31, 2013 and December 31, 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the accompanying index appearing under Item 15(a)(2) present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control—Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

PEPCO HOLDINGS, INC.

(1) ORGANIZATION

Pepco Holdings, Inc. (PHI or Pepco Holdings), a Delaware corporation incorporated in 2001, is a holding company that, through the following regulated public utility subsidiaries, is engaged primarily in the transmission, distribution and default supply of electricity and the distribution and supply of natural gas (Power Delivery):

- Potomac Electric Power Company (Pepco), which was incorporated in Washington, D.C. in 1896 and became a domestic Virginia corporation in 1949,
- Delmarva Power & Light Company (DPL), which was incorporated in Delaware in 1909 and became a domestic Virginia corporation in 1979, and
- Atlantic City Electric Company (ACE), which was incorporated in New Jersey in 1924.

Each of PHI, Pepco, DPL and ACE is also a reporting company under the Securities Exchange Act of 1934, as amended. Together, Pepco, DPL and ACE constitute the Power Delivery segment for financial reporting purposes.

Through Pepco Energy Services, Inc. and its subsidiaries (collectively, Pepco Energy Services), PHI provides energy savings performance contracting services, underground transmission and distribution construction and maintenance services, and steam and chilled water under long-term contracts.

PHI Service Company, a subsidiary service company of PHI, provides a variety of support services, including legal, accounting, treasury, tax, purchasing and information technology services to PHI and its operating subsidiaries. These services are provided pursuant to service agreements among PHI, PHI Service Company and the participating operating subsidiaries. The expenses of PHI Service Company are charged to PHI and the participating operating subsidiaries in accordance with cost allocation methodologies set forth in the service agreements.

Power Delivery

Each of Pepco, DPL and ACE is a regulated public utility in the jurisdictions that comprise its service territory. Each utility owns and operates a network of wires, substations and other equipment that is classified as transmission facilities, distribution facilities or common facilities (which are used for both transmission and distribution). Transmission facilities are high-voltage systems that carry wholesale electricity into, or across, the utility’s service territory. Distribution facilities are low-voltage systems that carry electricity to end-use customers in the utility’s service territory.

Each utility is responsible for the distribution of electricity, and in the case of DPL, the distribution and supply of natural gas, in its service territory, for which it is paid tariff rates established by the applicable local public service commissions. Each utility also supplies electricity at regulated rates to retail customers in its service territory who do not elect to purchase electricity from a competitive energy supplier. The regulatory term for this supply service is Standard Office Service (SOS) in Delaware, the District of Columbia and Maryland, and Basic Generation Service (BGS) in New Jersey. In these Notes to the consolidated financial statements, these supply service obligations are referred to generally as Default Electricity Supply.

Pepco Energy Services

Pepco Energy Services is engaged in the following businesses:

- Energy savings performance contracting business: designing, constructing and operating energy efficiency projects and distributed generation equipment, including combined heat and power plants, principally for federal, state and local government customers;
- Underground transmission and distribution business: providing underground transmission and distribution construction and maintenance services for electric utilities in North America; and
- Thermal business: providing steam and chilled water under long-term contracts through systems owned and operated by Pepco Energy Services, primarily to hotels and casinos in Atlantic City, New Jersey.

During 2012, Pepco Energy Services deactivated its Buzzard Point and Benning Road oil-fired generation facilities. Pepco Energy Services placed the facilities into an idle condition termed a "cold closure." A cold closure requires that the utility service be disconnected so that the facilities are no longer operable and require only essential maintenance until they are completely decommissioned. During the third quarter of 2013, Pepco Energy Services determined that it would be more cost effective to pursue the demolition of the Benning Road generation facility and realization of the scrap metal salvage value of the facility instead of maintaining cold closure status. As a result of this change in intent, Pepco Energy Services reduced its asset retirement obligation related to the facility by $2 million. The demolition of the facility commenced in the fourth quarter of 2013 and is expected to be completed by the end of 2014. Pepco Energy Services will recognize the salvage proceeds associated with the scrap metals at the facility as realized.

Other Non-Regulated

Between 1990 and 1999, PCI, through various subsidiaries, entered into certain transactions involving investments in aircraft and aircraft equipment, railcars and other assets. In connection with these transactions, PCI recorded deferred tax assets in prior years of $101 million in the aggregate. Following events that took place during the first quarter of 2013, which included (i) court decisions in favor of the Internal Revenue Service (IRS) with respect to both Consolidated Edison's cross-border lease transaction and another taxpayer's structured transactions (see additional discussion at "- Discontinued Operations – Cross-Border Energy Lease Investments" below), (ii) the change in PHI's tax position with respect to the tax benefits associated with its cross-border energy leases, and (iii) PHI's decision in March 2013 to begin to pursue the early termination of its remaining cross-border energy lease investments (which represented a substantial portion of the remaining assets within PCI) without the intent to reinvest these proceeds in income-producing assets, management evaluated the likelihood that PCI would be able to realize the $101 million of deferred tax assets in the future. Based on this evaluation, PCI established valuation allowances against these deferred tax assets totaling $101 million in the first quarter of 2013. Further, during the fourth quarter of 2013, in light of additional court decisions in favor of the IRS involving other taxpayers, and after consideration of all relevant factors, management determined that it would abandon the further pursuit of these deferred tax assets, and these assets totaling $101 million were charged off against the previously established valuation allowances.

Discontinued Operations

Cross-Border Energy Lease Investments

Through its subsidiary PCI, PHI held a portfolio of cross-border energy lease investments. During July 2013, PHI completed the termination of its interest in its cross-border energy lease investments. With the completion of the termination of the cross-border energy leases, the cross-border energy lease investments are being accounted for as discontinued operations.

As discussed in Note (15), "Commitments and Contingencies – PHI's Cross-Border Energy Lease Investments," PHI is involved in ongoing litigation with the IRS concerning certain benefits associated with previously held investments in cross-border energy leases. On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which PHI is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. As a result of the court's ruling in this case, PHI determined in the first quarter of 2013 that its tax position with respect to the benefits associated with its cross-border energy leases no longer met the more-likely-than-not standard of recognition for accounting purposes, and PCI recorded non-cash charges of $323 million (after-tax) in the first quarter of 2013 and $6 million (after-tax) in the second quarter of 2013, consisting of the following components:

- A non-cash pre-tax charge of $373 million ($313 million after-tax) to reduce the carrying value of these cross-border energy lease investments under Financial Accounting Standards Board (FASB) guidance on leases (Accounting Standards Codification (ASC) 840). This pre-tax charge was originally recorded in the consolidated statements of (loss) income as a reduction in operating revenue and is now reflected in (loss) income from discontinued operations, net of income taxes.
- A non-cash charge of $16 million after-tax to reflect the anticipated additional net interest expense under FASB guidance for income taxes (ASC 740), related to estimated federal and state income tax obligations for the period over which the tax benefits may be disallowed. This after-tax charge was originally recorded in the consolidated statements of (loss) income as an increase in income tax expense and is now reflected in (loss) income from discontinued operations, net of income taxes. The after-tax interest charge for PHI on a consolidated basis was $70 million and this amount was allocated to each member of PHI's consolidated group as if each member was a separate taxpayer, resulting in the recognition of a $12 million interest benefit for the Power Delivery segment and interest expense of $16 million for PCI and $66 million for Corporate and Other, respectively.

Pepco Energy Services

In December 2009, PHI announced the wind-down of the retail energy supply component of the Pepco Energy Services business which was comprised of the retail electric and natural gas supply businesses. Pepco Energy Services implemented the wind-down by not entering into any new retail electric or natural gas supply contracts while continuing to perform under its existing retail electric and natural gas supply contracts through their respective expiration dates. On March 21, 2013, Pepco Energy Services entered into an agreement whereby a third party assumed all the rights and obligations of the remaining retail natural gas supply customer contracts, and the associated supply obligations, inventory and derivative contracts. The transaction was completed on April 1, 2013. In addition, Pepco Energy Services completed the wind-down of its retail electric supply business in the second quarter of 2013 by terminating its remaining customer supply and wholesale purchase obligations beyond June 30, 2013.

The operations of Pepco Energy Services' retail electric and natural gas supply businesses have been classified as discontinued operations and are no longer a part of the Pepco Energy Services segment for financial reporting purposes.

(2) SIGNIFICANT ACCOUNTING POLICIES

Consolidation Policy

The accompanying consolidated financial statements include the accounts of Pepco Holdings and its wholly owned subsidiaries. All material intercompany balances and transactions between subsidiaries have been eliminated. Pepco Holdings uses the equity method to report investments, corporate joint ventures, partnerships, and affiliated companies in which it holds an interest and can exercise significant influence over the operations and policies of the entity. Certain transmission and other facilities currently held, are consolidated in proportion to PHI's percentage interest in the facility.

Consolidation of Variable Interest Entities

PHI assesses its contractual arrangements with variable interest entities to determine whether it is the primary beneficiary and thereby has to consolidate the entities in accordance with FASB ASC 810. The guidance addresses conditions under which an entity should be consolidated based upon variable interests rather than voting interests. See Note (16), "Variable Interest Entities," for additional information.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make certain estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities in the consolidated financial statements and accompanying notes. Although Pepco Holdings believes that its estimates and assumptions are reasonable, they are based upon information available to management at the time the estimates are made. Actual results may differ significantly from these estimates.

Significant matters that involve the use of estimates include the assessment of contingencies, the calculation of future cash flows and fair value amounts for use in asset and goodwill impairment calculations, fair value calculations for derivative instruments, pension and other postretirement benefit assumptions, the assessment of the probability of recovery of regulatory assets, accrual of storm restoration costs, accrual of unbilled revenue, recognition of changes in network service transmission rates for prior service year costs, accrual of loss contingency liabilities for general and auto liability claims, accrual of interest related to income taxes, the recognition of lease income and income tax benefits for investments in finance leases held in trust associated with PHI's portfolio of cross-border energy lease investments (see Note (19), "Discontinued Operations – Cross-Border Energy Lease Investments"), and income tax provisions and reserves. Additionally, PHI is subject to legal, regulatory and other proceedings and claims that arise in the ordinary course of its business. PHI records an estimated liability for these proceedings and claims when it is probable that a loss has been incurred and the loss is reasonably estimable.

Revenue Recognition

Regulated Revenue

Power Delivery recognizes revenue upon distribution of electricity and natural gas to its customers, including unbilled revenue for services rendered but not yet billed. PHI's unbilled revenue was $177 million and $182 million as of December 31, 2013 and 2012, respectively, and these amounts are included in Accounts receivable. PHI's utility subsidiaries calculate unbilled revenue using an output-based methodology. This methodology is based on the supply of electricity or natural gas intended for distribution to customers. The unbilled revenue process requires management to make assumptions and judgments about input factors such as customer sales mix, temperature and estimated line losses (estimates of electricity and natural gas expected to be lost in the process of its transmission and distribution to customers). The assumptions and judgments are inherently uncertain and susceptible to change from period to period, and if the actual results differ from the projected results, the impact could be material.

Taxes related to the consumption of electricity and natural gas by the utility customers, such as fuel, energy, or other similar taxes, are components of the tariff rates charged by PHI's utility subsidiaries and, as such, are billed to customers and recorded in Operating revenue. Accruals for the remittance of these taxes are recorded in Other taxes.

Pepco Energy Services Revenue

Revenue for Pepco Energy Services' energy savings performance construction business is recognized using the percentage-of-completion method which recognizes revenue as work is completed on its contracts. Revenues from its operation and maintenance activities and measurement and verification activities in its energy savings business are recognized when earned.

Taxes Assessed by a Governmental Authority on Revenue-Producing Transactions

Taxes included in PHI's gross revenues were $346 million, $356 million and $378 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Accounting for Derivatives

PHI and its subsidiaries may use derivative instruments primarily to manage risk associated with commodity prices and interest rates. Risk management policies are determined by PHI's Corporate Risk Management Committee (CRMC). The CRMC monitors interest rate fluctuation, commodity price fluctuation and credit risk exposure, and sets risk management policies that establish limits on unhedged risk.

PHI accounts for its derivative activities in accordance with FASB guidance on derivatives and hedging. Derivatives are recorded on the consolidated balance sheets as Derivative assets or Derivative liabilities and measured at fair value.

Changes in the fair value of derivatives held by DPL that do not qualify for hedge accounting or are not designated as hedges are presented on the consolidated statements of (loss) income as Fuel and purchased energy expense or Operating revenue, respectively. Changes in the fair value of derivatives held by DPL are deferred as regulatory assets or liabilities under the accounting guidance for regulated operations.

The gain or loss on a derivative that qualifies as a cash flow hedge of an exposure to variable cash flows of a forecasted transaction is initially recorded in accumulated other comprehensive loss (AOCL) (a separate component of equity) to the extent that the hedge is effective and is subsequently reclassified into earnings, in the same category as the item being hedged, when the gain or loss from the forecasted transaction occurs. If it is probable that a forecasted transaction will not occur, the deferred gain or loss in AOCL is immediately reclassified to earnings. Gains or losses related to any ineffective portion of cash flow hedges are also recognized in earnings immediately.

Changes in the fair value of derivatives designated as fair value hedges, as well as changes in the fair value of the hedged asset, liability or firm commitment, are recorded in the consolidated statements of (loss) income.

The impact of derivatives that are marked to market through current earnings, the ineffective portion of cash flow hedges, and the portion of fair value hedges that flows to current earnings are presented on a net basis in the consolidated statements of (loss) income as Operating revenue or as Fuel and purchased energy expense. When a hedging gain or loss is realized, it is presented on a net basis in the same line item as the underlying item being hedged. Unrealized derivative gains and losses are presented gross on the consolidated balance sheets except where contractual netting agreements are in place with individual counterparties.

The fair value of derivatives is determined using quoted exchange prices where available. For instruments that are not traded on an exchange, pricing services and external broker quotes may also be used to determine fair value. For some custom and complex instruments, internal models use market-based information when external broker quotes are not available. For certain long-dated instruments, broker or exchange data are extrapolated, or capacity prices are forecasted, for future periods where information is limited. Models are also used to estimate volumes for certain transactions.

PHI may enter into master netting arrangements to mitigate credit risk related to its derivatives. Under FASB guidance on offsetting of balance sheet accounts (ASC 210-20), amounts recognized for derivative assets and liabilities and the fair value amounts recognized for any related collateral positions executed with the same counterparty under such master netting agreements are offset.

See Note (13), "Derivative Instruments and Hedging Activities," for more information about the types of derivatives employed by PHI, the components of any unrealized and realized gains and losses and Note (14), "Fair Value Disclosures," for the methodologies used to value them.

Stock-Based Compensation

PHI recognizes compensation expense for stock-based awards, modifications or cancellations based on the grant-date fair value. Compensation expense is recognized over the requisite service period. A deferred tax asset and deferred tax benefit are also recognized concurrently with compensation expense for the tax effect of the deduction of stock options and restricted stock awards, which are deductible only upon exercise and vesting.

Historically, PHI's compensation awards had included both time-based restricted stock awards that vest over a three-year service period and performance-based restricted stock units that were earned based on performance over a three-year period. Beginning in 2011, stock-based compensation awards have been granted primarily in the form of restricted stock units. The compensation expense associated with these awards is calculated based on the estimated fair value of the awards at the grant date and is recognized over the service or performance period.

PHI estimated the fair value of stock option awards on the date of grant using the Black-Scholes-Merton option pricing model. This model used assumptions related to expected term, expected volatility, expected dividend yield, and the risk-free interest rate. PHI used historical data to estimate award exercises and employee terminations within the valuation model; groups of employees that have similar historical exercise behavior were considered separately for valuation purposes.

PHI's current policy is to issue new shares to satisfy vested awards of restricted stock units.

Income Taxes

PHI and the majority of its subsidiaries file a consolidated federal income tax return. Federal income taxes are allocated among PHI and the subsidiaries included in its consolidated group pursuant to a written tax sharing agreement, which was approved by the Securities and Exchange Commission (SEC) in 2002 in connection with the establishment of PHI as a public utility holding company. Under this tax sharing agreement, PHI's consolidated federal income tax liability is allocated based upon PHI's and its subsidiaries' separate taxable income or loss amounts.

The consolidated financial statements include current and deferred income taxes. Current income taxes represent the amount of tax expected to be reported on PHI's and its subsidiaries' federal and state income tax returns. Deferred income tax assets and liabilities represent the tax effects of temporary differences between the financial statement basis and tax basis of existing assets and liabilities, and they are measured using presently enacted tax rates. See Note (11), "Income Taxes," for a listing of primary deferred tax assets and liabilities. The portions of Pepco's, DPL's and ACE's deferred tax liabilities applicable to their utility operations that have not been recovered from utility customers represent income taxes recoverable in the future and are included in Regulatory Assets on the consolidated balance sheets. See Note (7), "Regulatory Matters – Regulatory Assets and Regulatory Liabilities," for additional information.

PHI recognizes interest on underpayments and overpayments of income taxes, interest on uncertain tax positions and tax-related penalties in income tax expense. Deferred income tax expense generally represents the net change during the reporting period in the net deferred tax liability and deferred recoverable income taxes.

Investment tax credits are amortized to income over the useful lives of the related property.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash invested in money market funds and commercial paper held with original maturities of three months or less.

Restricted Cash Equivalents

The Restricted cash equivalents included in Current assets and the Restricted cash equivalents included in Other assets consist of (i) cash held as collateral that is restricted from use for general corporate purposes and (ii) cash equivalents that are specifically segregated based on management's intent to use such cash equivalents for a particular purpose. The classification as current or non-current conforms to the classification of the related liabilities.

Accounts Receivable and Allowance for Uncollectible Accounts

PHI's Accounts receivable balances primarily consist of customer accounts receivable arising from the sale of goods and services to customers within PHI's service territories, other accounts receivable, and accrued unbilled revenue. Accrued unbilled revenue represents revenue earned in the current period but not billed to the customer until a future date (usually within one month after the receivable is recorded).

PHI maintains an allowance for uncollectible accounts and changes in the allowance are recorded as an adjustment to Other operation and maintenance expense in the consolidated statements of (loss) income. PHI determines the amount of the allowance based on specific identification of material amounts at risk by customer and maintains a reserve based on its historical collection experience. The adequacy of this allowance is assessed on a quarterly basis by evaluating all known factors, such as the aging of the receivables, historical collection experience, the economic and competitive environment and changes in the creditworthiness of its customers. Accounts receivable are written off in the period in which the receivable is deemed uncollectible and collection efforts have been exhausted. Recoveries of Accounts receivable previously written off are recorded when it is probable they will be recovered. Although PHI believes its allowance is adequate, it cannot anticipate with any certainty the changes in the financial condition of its customers. As a result, PHI records adjustments to the allowance for uncollectible accounts in the period in which the new information that requires an adjustment to the reserve becomes known.

Inventories

Inventory is valued at the lower of cost or market value. Included in Inventories are generation, transmission and distribution materials and supplies, natural gas and fuel oil.

PHI utilizes the weighted average cost method of accounting for inventory items. Under this method, an average price is determined for the quantity of units acquired at each price level and is applied to the ending quantity to calculate the total ending inventory balance. Materials and supplies are recorded in Inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed.

The cost of natural gas, including transportation costs, is included in Inventory when purchased and charged to Fuel and Purchased Energy expense when used.

Goodwill

Goodwill represents the excess of the purchase price of an acquisition over the fair value of the net assets acquired at the acquisition date. PHI tests its goodwill for impairment annually as of November 1 and whenever an event occurs or circumstances change in the interim that would more likely than not (that is, a greater than 50% chance) reduce the estimated fair value of a reporting unit below the carrying amount of its net assets. Factors that may result in an interim impairment test include, but are not limited to: a change in the identified reporting units; an adverse change in business conditions; a protracted decline in PHI's stock price causing market capitalization to fall significantly below book value; an adverse regulatory action; or an impairment of long-lived assets in the reporting unit. PHI performed its most recent annual impairment test as of November 1, 2013, and its goodwill was not impaired as described in Note (6), "Goodwill."

Regulatory Assets and Regulatory Liabilities

The operations of Pepco are regulated by the District of Columbia Public Service Commission (DCPSC) and the Maryland Public Service Commission (MPSC). The operations of DPL are regulated by the Delaware Public Service Commission (DPSC) and the MPSC. DPL's interstate transportation and wholesale sale of natural gas are regulated by the Federal Energy Regulatory Commission (FERC). The operations of ACE are regulated by the New Jersey Board of Public Utilities (NJBPU). The transmission of electricity by Pepco, DPL and ACE is regulated by FERC.

The FASB guidance on regulated operations (ASC 980) applies to Power Delivery. It allows regulated entities, in appropriate circumstances, to defer the income statement impact of certain costs that are expected to be recovered in future rates through the establishment of regulatory assets and defer certain revenues that are expected to be refunded to customers through the establishment of regulatory liabilities. Management's assessment of the probability of recovery of regulatory assets requires judgment and interpretation of laws, regulatory commission orders and other factors. If management subsequently determines, based on changes in facts or circumstances, that a regulatory asset is not probable of recovery, then the regulatory asset would be eliminated through a charge to earnings.

Effective June 2007, the MPSC approved a bill stabilization adjustment (BSA) mechanism for retail customers of Pepco and DPL. Effective November 2009, the DCPSC approved a BSA for Pepco's retail customers. For customers to whom the BSA applies, Pepco and DPL recognize distribution revenue based on an approved distribution charge per customer. From a revenue recognition standpoint, the BSA has the effect of decoupling the distribution revenue recognized in a reporting period from the amount of power delivered during that period. Pursuant to this mechanism, Pepco and DPL recognize either (i) a positive adjustment equal to the amount by which revenue from Maryland and the District of Columbia retail distribution sales falls short of the revenue that Pepco and DPL are entitled to earn based on the approved distribution charge per customer, or (ii) a negative adjustment equal to the amount by which revenue from such distribution sales exceeds the revenue that Pepco and DPL are entitled to earn based on the approved distribution charge per customer (a Revenue Decoupling Adjustment). A net positive Revenue Decoupling Adjustment is recorded as a regulatory asset and a net negative Revenue Decoupling Adjustment is recorded as a regulatory liability.

Leasing Activities

Pepco Holdings' lease transactions include plant, office space, equipment, software, vehicles and elements of power purchase agreements (PPAs). In accordance with FASB guidance on leases (ASC 840), these leases are classified as either leveraged leases, operating leases or capital leases.

Leveraged Leases

Income from investments in leveraged lease transactions, in which PHI is an equity participant, was accounted for using the financing method. In accordance with the financing method, investments in leased property were recorded as a receivable from the lessee to be recovered through the collection of future rentals. Income was recognized over the life of the lease at a constant rate of return on the positive net investment. Each quarter, PHI reviewed the carrying value of each lease, which included a review of the underlying financial assumptions, the timing and collectibility of cash flows, and the credit quality of the lessee. Changes to the underlying assumptions, if any, were accounted for in accordance with FASB guidance on leases and reflected in the carrying value of the lease effective for the quarter within which they occurred.

Operating Leases

An operating lease in which PHI or a subsidiary is the lessee generally results in a level income statement charge over the term of the lease, reflecting the rental payments required by the lease agreement. If rental payments are not made on a straight-line basis, PHI's policy is to recognize rent expense on a straight-line basis over the lease term unless another systematic and rational allocation basis is more representative of the time pattern in which the leased property is physically employed.

Capital Leases

For ratemaking purposes, capital leases in which PHI or a subsidiary is the lessee are treated as operating leases; therefore, in accordance with FASB guidance on regulated operations (ASC 980), the amortization of the leased asset is based on the recovery of rental payments through customer rates. Investments in equipment under capital leases are stated at cost, less accumulated depreciation. Depreciation is recorded on a straight-line basis over the equipment's estimated useful life.

Arrangements Containing a Lease

PPAs contain a lease if the arrangement conveys the right to control the use of property, plant or equipment. If so, PHI determines the appropriate lease accounting classification.

Property, Plant and Equipment

Property, plant and equipment is recorded at original cost, including labor, materials, asset retirement costs and other direct and indirect costs including capitalized interest. The carrying value of Property, plant and equipment is evaluated for impairment whenever circumstances indicate the carrying value of those assets may not be recoverable. Upon retirement, the cost of regulated property, net of salvage, is charged to Accumulated depreciation. For non-regulated property, the cost and accumulated depreciation of the property, plant and equipment retired or otherwise disposed of are removed from the related accounts and included in the determination of any gain or loss on disposition.

The annual provision for depreciation on electric and natural gas property, plant and equipment is computed on a straight-line basis using composite rates by classes of depreciable property. Accumulated depreciation is charged with the cost of depreciable property retired, less salvage and other recoveries. Non-operating and other property is generally depreciated on a straight-line basis over the useful lives of the assets. The table below provides system-wide composite annual depreciation rates for the years ended December 31, 2013, 2012 and 2011.

	Transmission and Distribution			Generation		
	2013	**2012**	**2011**	**2013**	**2012**	**2011**
Pepco	2.2%	2.5%	2.6%	—	—	—
DPL	2.6%	2.7%	2.8%	—	—	—
ACE	2.8%	3.0%	3.0%	—	—	—
Pepco Energy Services (a)	—	—	—	0.4%	6.4%	10.2%

(a) Percentages reflect accelerated depreciation of the Benning Road and Buzzard Point generating facilities retired during 2012.

In 2010, subsidiaries of PHI received awards from the U.S. Department of Energy (DOE) under the American Recovery and Reinvestment Act of 2009. Pepco was awarded $149 million from DOE to fund a portion of the costs incurred for the implementation of an advanced metering infrastructure (AMI) system (a system that collects, measures and analyzes energy usage data from advanced digital meters known as smart meters), direct load control, distribution automation and communications infrastructure in its Maryland and District of Columbia service territories. ACE was awarded $19 million from DOE to fund a portion of the costs incurred for the implementation of direct load control, distribution automation and communications infrastructure in its New Jersey service territory. PHI has elected to recognize the award proceeds as a reduction in the carrying value of the assets acquired rather than grant income over the service period.

Long-Lived Asset Impairment Evaluation

PHI evaluates long-lived assets to be held and used, such as generating property and equipment, and real estate, for impairment whenever events or changes in circumstances indicate that their carrying value may not be recoverable. Examples of such events or changes include a significant decrease in the market price of a long-lived asset or a significant adverse change in the manner in which an asset is being used or its physical condition. A long-lived asset to be held and used is written down to its estimated fair value if the expected future undiscounted cash flow from the asset is less than its carrying value.

For long-lived assets held for sale, an impairment loss is recognized to the extent that the asset's carrying value exceeds its estimated fair value including costs to sell.

Capitalized Interest and Allowance for Funds Used During Construction

In accordance with FASB guidance on regulated operations (ASC 980), PHI's utility subsidiaries can capitalize the capital costs of financing the construction of plant and equipment as allowance for funds used during construction (AFUDC). This results in the debt portion of AFUDC being recorded as a reduction of Interest expense and the equity portion of AFUDC being recorded as an increase to Other income in the accompanying consolidated statements of (loss) income.

Pepco Holdings recorded AFUDC for borrowed funds of $7 million, $7 million and $11 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Pepco Holdings recorded amounts for the equity component of AFUDC of $11 million, $14 million and $15 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Amortization of Debt Issuance and Reacquisition Costs

Pepco Holdings defers and amortizes debt issuance costs and long-term debt premiums and discounts over the lives of the respective debt issuances. When PHI utility subsidiaries refinance existing debt or redeem existing debt, any unamortized premiums, discounts and debt issuance costs, as well as debt redemption costs, are classified as Regulatory assets and are amortized over the life of the original or new issue.

Asset Removal Costs

In accordance with FASB guidance, asset removal costs are recorded by PHI utility subsidiaries as Regulatory liabilities. At December 31, 2013 and 2012, $275 million and $324 million, respectively, of asset removal costs are included in Regulatory liabilities in the accompanying consolidated balance sheets.

Pension and Postretirement Benefit Plans

PHI sponsors the PHI Retirement Plan, a non-contributory, defined benefit pension plan that covers substantially all employees of Pepco, DPL, ACE and certain employees of other PHI subsidiaries. PHI also provides supplemental retirement benefits to certain eligible executives and key employees through nonqualified retirement plans and provides certain postretirement health care and life insurance benefits for eligible retired employees. Most employees hired after January 1, 2005 will not have retiree health care coverage.

Net periodic benefit cost is included in Other operation and maintenance expense, net of the portion of the net periodic benefit cost capitalized as part of the cost of labor for internal construction projects. After intercompany allocations, the three utility subsidiaries are responsible for substantially all of the total PHI net periodic benefit cost.

PHI accounts for the PHI Retirement Plan, the nonqualified retirement plans, and the retirement health care and life insurance benefit plans in accordance with FASB guidance on retirement benefits (ASC 715).

See Note (9), "Pension and Other Postretirement Benefits," for additional information.

Reclassifications and Adjustments

Certain prior period amounts have been reclassified in order to conform to the current period presentation. The following adjustments have been recorded and are not considered material individually or in the aggregate to either the current period or prior period financial results:

Income Tax Expense Related to Continuing Operations

During 2013, Pepco recorded certain adjustments to correct prior period errors related to income taxes. These adjustments resulted from the completion of additional analysis of deferred tax balances and resulted in an increase in Income tax expense of $4 million, for the year ended December 31, 2013.

During 2011, PHI recorded adjustments to correct certain income tax errors related to prior periods associated with the interest on uncertain tax positions. The adjustment resulted in an increase in Income tax expense of $2 million for the year ended December 31, 2011.

Pepco Energy Services Derivative Accounting Adjustment

During 2011, PHI recorded an adjustment associated with an increase in the value of certain derivatives from October 1, 2010 to December 31, 2010, which had been erroneously recorded in other comprehensive income at December 31, 2010. This adjustment resulted in a decrease in Loss from discontinued operations, net of income taxes of $1 million for the year ended December 31, 2011.

DPL Operating Revenue Adjustment

During 2012, DPL recorded an adjustment to correct an overstatement of unbilled revenue in its natural gas distribution business related to prior periods. The adjustment resulted in a decrease in Operating revenue of $1 million for the year ended December 31, 2012.

DPL Default Electricity Supply Revenue and Cost Adjustments

During 2011, DPL recorded adjustments to correct certain errors associated with the accounting for Default Electricity Supply revenue and costs. These adjustments primarily arose from the under-recognition of allowed returns on the cost of working capital and resulted in a pre-tax decrease in Other operation and maintenance expense of $11 million for the year ended December 31, 2011.

ACE BGS Deferred Electric Service Costs Adjustments

In 2012, ACE recorded an adjustment to correct errors associated with its calculation of deferred electric service costs. This adjustment resulted in an increase of $3 million to deferred electric service costs, all of which relates to periods prior to 2012.

Revision to Prior Period Financial Statements

PCI Deferred Income Tax Liability Adjustment

Since 1999, PCI had not recorded a deferred tax liability related to a temporary difference between the financial reporting basis and the tax basis of an investment in a wholly owned partnership. In the second quarter of 2013, PHI re-evaluated this accounting treatment and found it to be in error, requiring an adjustment related to prior periods. PHI determined that the cumulative adjustment required, representing a charge to earnings of $32 million, related to a period prior to the year ended December 31, 2009 (the earliest period for which selected consolidated financial data is presented in the table entitled “Selected Financial Data” in Part II, Item 6 of this Annual Report on Form 10-K). Consistent with PHI’s Quarterly Report on Form 10-Q for the quarter ended June 30, 2013, the accompanying consolidated financial statements reflect the correction of this error as an adjustment to shareholders’ equity for the earliest period presented. The adjustment to correct the error did not affect PHI’s consolidated statements of (loss) income, comprehensive (loss) income and cash flows for each of the three years in the period ended December 31, 2013, and only affected PHI’s reported balances of deferred income tax liabilities and retained earnings as reflected in the consolidated balance sheets as of December 31, 2013 and 2012 and the reported balances of retained earnings and total equity as reflected in the consolidated statements of equity for each of the three years in the period ended December 31, 2013. The adjustment is not considered to be material to PHI’s reported balances of retained earnings and total equity reflected in the PHI consolidated financial statements included in this Annual Report on Form 10-K. The table below illustrates the effects of the revision on reported balances in PHI’s consolidated financial statements.

	As Filed	Adjustment	As Revised
		(millions of dollars)	
December 31, 2012			
Deferred income tax liabilities, net	$3,176	$ 32	$ 3,208
Total deferred credits	4,819(a)	32	4,851
Retained earnings	1,109	(32)	1,077
Total equity	4,446	(32)	4,414
December 31, 2011			
Deferred income tax liabilities, net	$2,863	$ 32	$ 2,895
Total deferred credits	4,549(a)	32	4,581
Retained earnings	1,072	(32)	1,040
Total equity	4,336	(32)	4,304
December 31, 2010			
Retained earnings	$1,059	$ (32)	$ 1,027
Total equity	4,230(b)	(32)	4,198

(a) The amount of total deferred credits differs from the amount orginially reported in PHI’s 2012 Form 10-K due to certain reclassifications.
(b) The amount represents total shareholders’ equity, which excludes a non-controlling interest of $6 million.

(3) NEWLY ADOPTED ACCOUNTING STANDARDS

Balance Sheet (ASC 210)

In December 2011, the FASB issued new disclosure requirements for financial assets and financial liabilities, such as derivatives, that are subject to contractual netting arrangements. The new disclosure requirements include information about the gross exposure of the instruments and the net exposure of the instruments under contractual netting arrangements, how the exposures are presented in the financial statements, and the terms and conditions of the contractual netting arrangements. PHI adopted the new guidance during the first quarter of 2013 and concluded it did not have a material impact on its consolidated financial statements.

Comprehensive Income (ASC 220)

The new disclosure requirements for reclassifications from accumulated other comprehensive income were effective for PHI beginning with its March 31, 2013 consolidated financial statements and required PHI to present additional information about its reclassifications from accumulated other comprehensive income in a single footnote or on the face of its consolidated financial statements. The additional information required to be disclosed includes a presentation of the components of accumulated other comprehensive income that have been reclassified by source (e.g., commodity derivatives), and the income statement line item (e.g., Fuel and purchased energy) affected by the reclassification. PHI has provided the new required disclosures in Note (17), "Accumulated Other Comprehensive Loss."

(4) RECENTLY ISSUED ACCOUNTING STANDARDS, NOT YET ADOPTED

Joint and Several Liability Arrangements (ASC 405)

In February 2013, the FASB issued new recognition and disclosure requirements for certain joint and several liability arrangements where the total amount of the obligation is fixed at the reporting date. For arrangements within the scope of this standard, PHI will be required to include in its liabilities the additional amounts it expects to pay on behalf of its co-obligors, if any. PHI will also be required to provide additional disclosures including the nature of the arrangements with its co-obligors, the total amounts outstanding under the arrangements between PHI and its co-obligors, the carrying value of the liability, and the nature and limitations of any recourse provisions that would enable recovery from other entities.

The new requirements are effective retroactively beginning on January 1, 2014, with implementation required for prior periods if joint and several liability arrangement obligations exist as of January 1, 2014. PHI does not expect this new guidance to have a material impact on its consolidated financial statements.

Income Taxes (ASC 740)

In July 2013, the FASB issued new guidance that will require the netting of certain unrecognized tax benefits against a deferred tax asset for a loss or other similar tax carryforward that would apply upon settlement of the uncertain tax position. The new requirements are effective prospectively beginning with PHI's March 31, 2014 consolidated financial statements for all unrecognized tax benefits existing at the adoption date. Retrospective implementation and early adoption of the guidance are permitted. PHI does not expect this new guidance to have a material impact on its consolidated financial statements.

(5) SEGMENT INFORMATION

Pepco Holdings' management has identified its operating segments at December 31, 2013 as Power Delivery and Pepco Energy Services. In the tables below, the Corporate and Other column is included to reconcile the segment data with consolidated data and includes unallocated Pepco Holdings' (parent company) capital costs, such as financing costs. Through its subsidiary PCI, PHI maintained a portfolio of cross-border energy lease investments. PHI completed the termination of its interests in its cross-border energy lease investments during 2013. As a result, the cross-border energy lease investments, which comprised substantially all of the operations of the former Other Non-Regulated segment, are being accounted for as discontinued operations. The remaining operations of the former Other Non-Regulated segment, which no longer meet the definition of a separate segment for financial reporting purposes, are now included in Corporate and Other. Segment financial information for continuing operations at and for the years ended December 31, 2013, 2012 and 2011, is as follows:

	Year Ended December 31, 2013 (millions of dollars)			
	Power Delivery	**Pepco Energy Services**	**Corporate and Other (a)**	**PHI Consolidated**
Operating Revenue	$ 4,472	$ 203	$ (9)	$ 4,666
Operating Expenses (b)	3,828	201(e)	(31)	3,998
Operating Income	644	2	22	668
Interest Expense	228	1	44	273
Other Income	28	3	3	34
Income Tax Expense (c)	155	1	163 (d)	319
Net Income (Loss) from Continuing Operations	289	3	(182)	110
Total Assets (excluding Assets Held for Disposition)	13,027	335	1,485	14,847
Construction Expenditures	$ 1,194	$ 4	$ 112	$ 1,310

(a) Total Assets in this column includes Pepco Holdings' goodwill balance of $1.4 billion, all of which is allocated to Power Delivery for purposes of assessing impairment. Total assets also include capital expenditures related to certain hardware and software expenditures which primarily benefit Power Delivery. These expenditures are recorded as incurred in Corporate and Other and are allocated to Power Delivery once the assets are placed in service. Corporate and Other includes intercompany amounts of $(10) million for Operating Revenue, $(9) million for Operating Expenses and $(5) million for Interest Expense.

(b) Includes depreciation and amortization expense of $473 million, consisting of $439 million for Power Delivery, $6 million for Pepco Energy Services and $28 million for Corporate and Other.

(c) Includes after-tax interest associated with uncertain and effectively settled tax positions allocated to each member of the consolidated group, including a $12 million interest benefit for Power Delivery and interest expense of $66 million for Corporate and Other.

(d) Includes non-cash charges of $101 million representing the establishment of valuation allowances against certain deferred tax assets of PCI included in Corporate and Other.

(e) Includes pre-tax impairment losses of $4 million ($3 million after-tax) at Pepco Energy Services associated with a landfill gas-fired electric generation facility.

	Power Delivery	Pepco Energy Services	Corporate and Other (a)	PHI Consolidated
	Year Ended December 31, 2012 *(millions of dollars)*			
Operating Revenue	$ 4,378	$ 256(b)	$ (9)	$ 4,625
Operating Expenses (c)	3,847	271(b)(d)	(34)	4,084
Operating Income (Loss)	531	(15)	25	541
Interest Income	1	1	(1)	1
Interest Expense	219	2	35	256
Impairment Losses	—	—	(1)	(1)
Other Income	32	1	3	36
Income Tax Expense (Benefit)	110	(7)	—	103
Net Income (Loss) from Continuing Operations	235	(8)	(9)	218
Total Assets (excluding Assets Held for Disposition)	12,149	342	2,028	14,519
Construction Expenditures	$ 1,168	$ 11	$ 37	$ 1,216

(a) Total Assets in this column includes Pepco Holdings' goodwill balance of $1.4 billion, all of which is allocated to Power Delivery for purposes of assessing impairment. Total assets also include capital expenditures related to certain hardware and software expenditures which primarily benefit Power Delivery. These expenditures are recorded as incurred in Corporate and Other and are allocated to Power Delivery once the assets are placed in service. Corporate and Other includes intercompany amounts of $(11) million for Operating Revenue, $(10) million for Operating Expenses, $(21) million for Interest Income and $(18) million for Interest Expense.

(b) Includes $9 million of intra-company revenues (and associated costs) previously eliminated in consolidation which will continue to be recognized from third parties subsequent to the completion of the wind-down of the Pepco Energy Services' retail electric and natural gas supply businesses.

(c) Includes depreciation and amortization expense of $454 million, consisting of $416 million for Power Delivery, $14 million for Pepco Energy Services and $24 million for Corporate and Other.

(d) Includes impairment losses of $12 million pre-tax ($7 million after-tax) at Pepco Energy Services associated primarily with investments in landfill gas-fired electric generation facilities, and the combustion turbines at Buzzard Point.

	Power Delivery	Pepco Energy Services	Corporate and Other (a)	PHI Consolidated
	Year Ended December 31, 2011 *(millions of dollars)*			
Operating Revenue	$ 4,650	$ 330(b)	$ (16)	$ 4,964
Operating Expenses (c)	4,150	301(b)	(40)	4,411
Operating Income	500	29	24	553
Interest Income	1	1	(1)	1
Interest Expense	208	2	32	242
Impairment Losses	—	—	(5)	(5)
Other Income (Expenses)	29	2	(2)	29
Income Tax Expense (Benefit) (d)	112	8	(6)	114
Net Income (Loss) from Continuing Operations	210	22	(10)	222
Total Assets (excluding Assets Held for Disposition)	11,008	529	1,988	13,525
Construction Expenditures	$ 888	$ 14	$ 39	$ 941

(a) Total Assets in this column includes Pepco Holdings' goodwill balance of $1.4 billion, all of which is allocated to Power Delivery for purposes of assessing impairment. Total assets also include capital expenditures related to certain hardware and software expenditures which primarily benefit Power Delivery. These expenditures are recorded as incurred in Corporate and Other and are allocated to Power Delivery once the assets are placed in service. Corporate and Other includes intercompany amounts of $(16) million for Operating Revenue, $(15) million for Operating Expense, $(22) million for Interest Income and $(22) million for Interest Expense.

(b) Includes $15 million of intra-company revenues (and associated costs) previously eliminated in consolidation which will continue to be recognized from third parties subsequent to the completion of the wind-down of the Pepco Energy Services' retail electric and natural gas supply businesses.

(c) Includes depreciation and amortization expense of $425 million, consisting of $394 million for Power Delivery, $16 million for Pepco Energy Services and $15 million for Corporate and Other.

(d) Includes tax benefits of $14 million for Power Delivery primarily associated with an interest benefit related to federal tax liabilities.

(6) GOODWILL

Substantially all of PHI's goodwill balance as of December 31, 2013 and 2012 was generated by Pepco's acquisition of Conectiv in 2002 and is allocated entirely to the Power Delivery reporting unit based on the aggregation of its regulated public utility company components for purposes of assessing impairment under FASB guidance on goodwill and other intangibles (ASC 350).

In order to estimate the fair value of the Power Delivery reporting unit, PHI uses two valuation techniques: an income approach and a market approach. The income approach estimates fair value based on a discounted future cash flow analysis and a terminal value that is consistent with Power Delivery's long-term view of the business. This approach uses a discount rate based on the estimated weighted average cost of capital (WACC) for the reporting unit. PHI determines the estimated WACC by considering appropriate market-based information for the cost of equity and cost of debt as of the measurement date. The market approach estimates fair value based on a multiple of earnings before interest, taxes, depreciation, and amortization (EBITDA) that management believes is consistent with EBITDA multiples for comparable utilities. PHI has consistently used this valuation technique to estimate the fair value of Power Delivery.

The estimation of fair value is dependent on a number of factors including but not limited to interest rates, growth assumptions, returns on rate base, operating and capital expenditure requirements, and other factors, changes in which could materially affect the results of impairment testing. Assumptions used were consistent with historical experience, including assumptions concerning the recovery of operating costs and capital expenditures and current market-based information. Sensitive, interrelated and uncertain variables that could decrease the estimated fair value of the Power Delivery reporting unit include utility sector market performance, sustained adverse business conditions, changes in forecasted revenues, higher operating and maintenance capital expenditure requirements, a significant increase in the weighted-average cost of capital and other factors.

In addition to estimating the fair value of its Power Delivery reporting unit, PHI estimated the fair value of its other reporting units at November 1, 2013. The sum of the estimated fair values of all reporting units was reconciled to PHI's market capitalization at November 1, 2013 to corroborate PHI's estimates of the fair values of its reporting units. The sum of the estimated fair values of all reporting units exceeded the market capitalization of PHI at November 1, 2013. PHI believes that the excess of the estimated fair value of PHI's reporting units as compared to PHI's market capitalization reflects a control premium that is reasonable when compared to control premiums observed in historical acquisitions in the utility industry and giving consideration to the current economic environment.

As of December 31, 2013 and 2012, PHI's goodwill balance was $1,407 million, which is net of accumulated impairment losses of $18 million.

(7) REGULATORY MATTERS

Regulatory Assets and Regulatory Liabilities

The components of Pepco Holdings' regulatory asset and liability balances at December 31, 2013 and 2012 are as follows:

	2013	2012
	(millions of dollars)	
Regulatory Assets		
Pension and OPEB costs	$ 667	$1,171
Securitized stranded costs (a)	350	416
Smart Grid costs (a)	251	230
Recoverable income taxes	225	177
Deferred energy supply costs (a)	136	183
Demand-side management costs (a)	125	57
Incremental storm restoration costs (a)	72	89
MAPP abandonment costs (a)	68	88
Deferred debt extinguishment costs (a)	47	53
Recoverable workers' compensation and long-term disability costs	26	31
Deferred losses on gas derivatives	—	4
Other	120	115
Total Regulatory Assets	$2,087	$2,614
Regulatory Liabilities		
Asset removal costs	$ 275	$ 324
Deferred energy supply costs	46	78
Deferred income taxes due to customers	45	45
Deferred gains on gas derivatives	1	—
Excess depreciation reserve	—	11
Other	32	43
Total Regulatory Liabilities	$ 399	$ 501

(a) A return is generally earned on these deferrals.

A description for each category of regulatory assets and regulatory liabilities follows:

Pension and OPEB Costs: Represents unrecognized net actuarial losses and prior service cost (credit) for Pepco Holdings' defined benefit pension and other postretirement benefit (OPEB) plans that are expected to be recovered by Pepco, DPL and ACE in rates. The utilities have historically included these items as a part of its cost of service in its customer rates. This regulatory asset is adjusted at least annually when the funded status of Pepco Holdings' defined benefit pension and OPEB plans are re-measured. See Note (9), "Pension and Other Postretirement Benefits," for more information about the components of the unrecognized pension and OPEB costs.

Securitized Stranded Costs: Certain contract termination payments under a contract between ACE and an unaffiliated non-utility generator (NUG) and costs associated with the regulated operations of ACE's electricity generation business are no longer recoverable through customer rates (collectively referred to as "stranded costs"). The stranded costs are amortized over the life of Transition Bonds issued by Atlantic City Electric Transition Funding LLC (ACE Funding) (Transition Bonds) to securitize the recoverability of these stranded costs. These bonds mature between 2014 and 2023. A customer surcharge is collected by ACE to fund principal and interest payments on the Transition Bonds.

Smart Grid Costs: Represents AMI costs associated with the installation of smart meters and the early retirement of existing meters throughout Pepco's and DPL's service territories that are recoverable from customers. AMI has not been approved by the NJBPU for ACE in New Jersey.

Recoverable Income Taxes: Represents amounts recoverable from Power Delivery's customers for tax benefits applicable to utility operations of Pepco, DPL and ACE previously recognized in income tax expense before the companies were ordered to account for the tax benefits as deferred income taxes. As the temporary differences between the financial statement basis and tax basis of assets reverse, the deferred recoverable balances are reversed.

Deferred Energy Supply Costs: The regulatory asset represents primarily deferred costs associated with a net under-recovery of Default Electricity Supply costs incurred by Pepco, DPL and ACE that are probable of recovery in rates. The regulatory liability represents primarily deferred costs associated with a net over-recovery of Default Electricity Supply costs incurred that will be refunded by Pepco, DPL and ACE to customers.

Demand-Side Management Costs: Represents recoverable costs associated with customer energy efficiency and conservation programs in Pepco's and DPL's Maryland jurisdictions.

Incremental Storm Restoration Costs: Represents total incremental storm restoration costs incurred for repair work due to major storm events in 2012 and 2011, including Hurricane Sandy, the June 2012 derecho, Hurricane Irene and the 2011 severe winter storm (for Pepco), that are recoverable from customers in the Maryland and New Jersey jurisdictions. Pepco's and DPL's costs related to Hurricane Sandy, the June 2012 derecho, Hurricane Irene and Pepco's costs related to the 2011 severe winter storm are being amortized and recovered in rates, each over a five-year period. ACE's costs related to Hurricane Sandy, the June 2012 derecho and Hurricane Irene are being amortized and recovered in rates, each over a three-year period.

MAPP Abandonment Costs: Represents the probable recovery of abandoned costs prudently incurred in connection with the Mid-Atlantic Power Pathway (MAPP) project which was terminated by PJM Interconnection, LLC (PJM) on August 24, 2012. The regulatory asset includes the costs of land, land rights, supplies and materials, engineering and design, environmental services, and project management and administration. The regulatory asset will be reduced as the result of sale or alternative use of these assets. As of December 31, 2013, these assets were earning a return of 12.8%. For additional information, see "MAPP Project" discussion below.

Deferred Debt Extinguishment Costs: Represents the costs of debt extinguishment of Pepco, DPL and ACE associated with issuances of debt for which recovery through regulated utility rates is considered probable, and if approved, will be amortized to interest expense during the authorized rate recovery period.

Recoverable Workers' Compensation and Long-Term Disability Costs: Represents accrued workers' compensation and long-term disability costs for Pepco, which are recoverable from customers when actual claims are paid to employees.

Deferred Losses on Gas Derivatives: Represents losses associated with hedges of natural gas purchases that are recoverable through the Gas Cost Rate approved by the DPSC.

Other: Represents miscellaneous regulatory assets that generally are being amortized over 1 to 20 years.

Asset Removal Costs: The depreciation rates for Pepco and DPL include a component for removal costs, as approved by the relevant federal and state regulatory commissions. Accordingly, Pepco and DPL have recorded regulatory liabilities for their estimate of the difference between incurred removal costs and the amount of removal costs recovered through depreciation rates.

Deferred Income Taxes Due to Customers: Represents the portions of deferred income tax assets applicable to utility operations of Pepco and DPL that have not been reflected in current customer rates for which future payment to customers is probable. As the temporary differences between the financial statement basis and tax basis of assets reverse, deferred recoverable income taxes are amortized.

Deferred Gains on Gas Derivatives: Represents gains associated with hedges of natural gas purchases that will be refunded to customers through the Gas Cost Rate approved by the DPSC.

Excess Depreciation Reserve: The excess depreciation reserve was recorded as part of an ACE New Jersey rate case settlement. This excess reserve is the result of a change in estimated depreciable lives and a change in depreciation technique from remaining life to whole life that caused an over-recovery for depreciation expense from customers when the remaining life method had been used. The excess was amortized as a reduction in Depreciation and amortization expense over an 8.25 year period, and expired in 2013.

Other: Includes miscellaneous regulatory liabilities.

Rate Proceedings

The following table shows, for each of PHI's utility subsidiaries, the electric distribution base rate cases currently pending. Additional information concerning each of these filings is provided in the discussion below.

Jurisdiction/Company	Requested Revenue Requirement Increase *(millions of dollars)*	Requested Return on Equity	Filing Date	Expected Timing of Decision
DC – Pepco	$ 44.8(a)	10.25%	March 8, 2013	Q1, 2014
DE – DPL (Electric)	$ 39.0(b)	10.25%	March 22, 2013	Q2, 2014
MD – Pepco	$ 43.3	10.25%	December 4, 2013	Q3, 2014

(a) Reflects Pepco's updated revenue requirement as filed on December 3, 2013.
(b) Reflects DPL's updated revenue requirement as filed on September 20, 2013.

The following table shows, for each of PHI's utility subsidiaries, the distribution base rate cases completed in 2013. Additional information concerning each of these cases is provided in the discussion below.

Jurisdiction/Company	Approved Revenue Requirement Increase *(millions of dollars)*	Approved Return on Equity	Completion Date	Rate Effective Date
NJ – ACE	$ 25.5	9.75%	June 21, 2013	July 1, 2013
MD – Pepco	$ 27.9	9.36%	July 12, 2013	July 12, 2013
MD – DPL	$ 15.0	9.81% (a)	August 30, 2013	September 15, 2013
DE – DPL (Gas)	$ 6.8	9.75% (b)	October 22, 2013	November 1, 2013

(a) Return on equity (ROE) has not been determined by any proceeding and is specified only for the purposes of calculating the AFUDC and regulatory asset carrying costs.
(b) ROE has not been determined by any proceeding and is specified only for reporting purposes and for calculating the AFUDC, construction work in process (CWIP), regulatory asset carrying costs and other accounting metrics.

Bill Stabilization Adjustment

PHI's utility subsidiaries have proposed in each of their respective jurisdictions the adoption of a mechanism to decouple retail distribution revenue from the amount of power delivered to retail customers. To date:

- A BSA has been approved and implemented for Pepco and DPL electric service in Maryland and for Pepco electric service in the District of Columbia.
- A proposed modified fixed variable rate design (MFVRD) for DPL electric and natural gas service in Delaware was filed in 2009 for consideration by the DPSC and while there was little activity associated with this filing in 2013, the proceeding remains open.
- In New Jersey, a BSA proposed by ACE in 2009 was not approved and there is no BSA proposal currently pending.

Under the BSA, customer distribution rates are subject to adjustment (through a credit or surcharge mechanism), depending on whether actual distribution revenue per customer exceeds or falls short of the revenue-per-customer amount approved by the applicable public service commission. The MFVRD proposed in Delaware contemplates a fixed customer charge (i.e., not tied to the customer's volumetric consumption of electricity or natural gas) to recover the utility's fixed costs, plus a reasonable rate of return.

Delaware

Electric Distribution Base Rates

On March 22, 2013, DPL submitted an application with the DPSC to increase its electric distribution base rates. The filing seeks approval of an annual rate increase of approximately $39 million (as adjusted by DPL on September 20, 2013), based on a requested ROE of 10.25%. The requested rate increase seeks to recover expenses associated with DPL's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. The DPSC suspended the full proposed increase and, as permitted by state law, DPL implemented an interim increase of $2.5 million on June 1, 2013, subject to refund and pending final DPSC approval. On October 8, 2013, the DPSC approved DPL's request to implement an additional interim increase of $25.1 million, effective on October 22, 2013, bringing the total interim rates in effect subject to refund to $27.6 million. A final DPSC decision is expected by the second quarter of 2014.

Forward Looking Rate Plan

On October 2, 2013, DPL filed a multi-year rate plan, referred to as the Forward Looking Rate Plan (FLRP). As proposed, the FLRP would provide for annual electric distribution base rate increases over a four-year period in the aggregate amount of approximately $56 million. The FLRP as proposed provides the opportunity to achieve estimated earned ROEs of 7.41% and 8.80% in years one and two, respectively, and 9.75% in both years three and four of the plan.

In addition, DPL proposed that as part of the FLRP, in order to provide a higher minimum required standard of reliability for DPL's customers than that to which DPL is currently subject, the standards by which DPL's reliability is measured would be made more stringent in each year of the FLRP. In addition, DPL has offered to refund an aggregate of $500,000 to customers in each year of the FLRP that it fails to meet the proposed stricter minimum reliability standards.

On October 22, 2013, the DPSC opened a docket for the purpose of reviewing the details of the FLRP, but stated that it would not address the FLRP until the pending electric distribution base rate case discussed above was concluded. DPL expects that the FLRP will be updated and re-filed at the conclusion of the electric distribution base rate case. A schedule for the FLRP docket has not yet been established.

Gas Distribution Base Rates

On December 7, 2012, DPL submitted an application with the DPSC to increase its natural gas distribution base rates. The filing sought approval of an annual rate increase of approximately $12.0 million (as adjusted by DPL on July 15, 2013), based on a requested ROE of 10.25%. The requested rate increase sought to recover expenses associated with DPL's ongoing efforts to maintain safe and reliable gas service. On October 22, 2013, the DPSC approved a settlement entered into on August 27, 2013 by the DPSC Staff, the Delaware Division of the Public Advocate and DPL, which provides for an annual rate increase of $6.8 million. While the approved settlement provided that no understanding was reached concerning the appropriate ROE, it specified that for reporting purposes and for calculating the AFUDC, CWIP, regulatory asset carrying costs and other accounting metrics, the rate of 9.75% should be used. The new rates became effective on November 1, 2013.

The approved settlement also provides for a phase-in of the recovery of the deferred costs associated with DPL's deployment of the interface management unit (IMU). The IMU is part of its AMI and allows for the remote reading of gas meters. Recovery of such costs will occur through base rates over a two-year period, assuming specific milestones are met and pursuant to the following schedule: 50% of the IMU portion of DPL's AMI will be put into rates on May 1, 2014, and the remainder will be put into rates on March 1, 2015. DPL also agreed in the settlement that its next natural gas distribution base rate application may be filed with the DPSC no earlier than January 1, 2015.

Gas Cost Rates

DPL makes an annual Gas Cost Rate (GCR) filing with the DPSC for the purpose of allowing DPL to recover natural gas procurement costs through customer rates. On August 28, 2013, DPL made its 2013 GCR filing. The rates proposed in the 2013 GCR filing would result in a GCR decrease of approximately 5.5%. On September 26, 2013, the DPSC issued an order authorizing DPL to place the new rates into effect on November 1, 2013, subject to refund and pending final DPSC approval.

<u>District of Columbia</u>

On March 8, 2013, Pepco filed an application with the DCPSC to increase its annual electric distribution base rates by approximately $44.8 million (as adjusted by Pepco on December 3, 2013), based on a requested ROE of 10.25%. The requested rate increase seeks to recover expenses associated with Pepco's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. Evidentiary hearings were held in November 2013 and a final DCPSC decision is expected in the first quarter of 2014.

<u>Maryland</u>

DPL Electric Distribution Base Rates

On March 29, 2013, DPL submitted an application with the MPSC to increase its electric distribution base rates by approximately $22.8 million, based on a requested ROE of 10.25%. The requested rate increase sought to recover expenses associated with DPL's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. DPL also proposed a three-year Grid Resiliency Charge rider for recovery of costs totaling approximately $10.2 million associated with its plan to accelerate investments in electric distribution infrastructure in a condensed timeframe. Acceleration of resiliency improvements was one of several recommendations included in a September 2012 report from Maryland's Grid Resiliency Task Force (as discussed below under "Resiliency Task Forces"). Specific projects under DPL's Grid Resiliency Charge plan included accelerating its tree-trimming cycle and upgrading five additional feeders per year for two years. In addition, DPL proposed a reliability performance-based mechanism that would allow DPL to earn up to $500,000 as an incentive for meeting enhanced reliability goals in 2015, but provided for a credit to customers of up to $500,000 in total if DPL did not meet at least the minimum reliability performance targets. DPL requested that any credits or charges would flow through the proposed Grid Resiliency Charge rider.

On August 30, 2013, the MPSC issued a final order approving a settlement among DPL, the MPSC staff and the Maryland Office of People's Counsel (OPC). The approved settlement provides for an annual rate increase of approximately $15 million. While the settlement does not specify an overall ROE, the parties did agree that the ROE for purposes of calculating the AFUDC and regulatory asset carrying costs would be 9.81%. The approved settlement also provides for (i) recovery of storm restoration costs incurred as a result of recent major storm events, including the derecho storm in June 2012 and Hurricane Sandy in October 2012, by amortizing the related deferred operation and maintenance expenses of approximately $6 million over a five-year period with the unamortized balance included in rate base, and (ii) a Grid Resiliency Charge for recovery of costs totaling approximately $4.2 million associated with DPL's proposed plan to accelerate investments related to certain priority feeders, provided that before implementing the surcharge, DPL provides additional information to the MPSC related to performance objectives, milestones and costs, and makes annual filings with the MPSC thereafter concerning this project, which will permit the MPSC to establish the applicable Grid Resiliency Charge rider for the following year. The approved settlement does not provide for approval of a portion of the Grid Resiliency Charge related to the proposed acceleration of the tree-trimming cycle, or DPL's proposed reliability performance-based mechanism. The new rates became effective on September 15, 2013.

Pepco Electric Distribution Base Rates

In December 2011, Pepco submitted an application with the MPSC to increase its electric distribution base rates. The filing sought approval of an annual rate increase of approximately $68.4 million (subsequently reduced by Pepco to $66.2 million), based on a requested ROE of 10.75%. In July 2012, the MPSC issued an order approving an annual rate increase of approximately $18.1 million, based on an ROE of 9.31%. The order also reduced Pepco's depreciation rates, which lowered annual depreciation and amortization expenses by an estimated $27.3 million. The lower depreciation rates resulted from, among other things, the rebalancing of excess reserves for estimated future removal costs identified in a depreciation study conducted as part of the rate case filing. The identified excess reserves for estimated future removal costs, reported as Regulatory liabilities, were reclassified to Accumulated depreciation among various plant accounts. Among other things, the order additionally authorized Pepco to recover the actual cost of AMI meters installed during the 2011 test year and states that cost recovery for AMI deployment will be allowed in future rate cases in which Pepco demonstrates that the system is cost effective. The new revenue rates and lower depreciation rates were effective on July 20, 2012. The Maryland OPC has sought rehearing on the portion of the order allowing Pepco to recover the costs of AMI meters installed during the test year; that motion remains pending.

On November 30, 2012, Pepco submitted an application with the MPSC to increase its electric distribution base rates. The filing sought approval of an annual rate increase of approximately $60.8 million, based on a requested ROE of 10.25%. The requested rate increase sought to recover expenses associated with Pepco's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. Pepco also proposed a three-year Grid Resiliency Charge rider for recovery of costs totaling approximately $192 million associated with its plan to accelerate investments in infrastructure in a condensed timeframe. Acceleration of resiliency improvements was one of several recommendations included in a September 2012 report from Maryland's Grid Resiliency Task Force (as discussed below under "Resiliency Task Forces"). Specific projects under Pepco's Grid Resiliency Charge plan included acceleration of its tree-trimming cycle, upgrade of 12 additional feeders per year for two years and undergrounding of six distribution feeders. In addition, Pepco proposed a reliability performance-based mechanism that would allow Pepco to earn up to $1 million as an incentive for meeting enhanced reliability goals in 2015, but provided for a credit to customers of up to $1 million in total if Pepco does not meet at least the minimum reliability performance targets. Pepco requested that any credits/charges would flow through the proposed Grid Resiliency Charge rider.

On July 12, 2013, the MPSC issued an order related to Pepco's November 30, 2012 application approving an annual rate increase of approximately $27.9 million, based on an ROE of 9.36%. The order provides for the full recovery of storm restoration costs incurred as a result of recent major storm events, including the derecho storm in June 2012 and Hurricane Sandy in October 2012, by including the related capital costs in the rate base and amortizing the related deferred operation and maintenance expenses of $23.6 million over a five-year period. The order excludes the cost of AMI meters from Pepco's rate base until such time as Pepco demonstrates the cost effectiveness of the AMI system; as a result, costs for AMI meters incurred with respect to the 2012 test year and beyond will be treated as other incremental AMI costs incurred in conjunction with the deployment of the AMI system that are deferred and on which a return is earned, but only until such cost effectiveness has been demonstrated and such costs are included in rates. However, the MPSC's July 2012 order in Pepco's previous electric distribution base rate case, which allowed Pepco to recover the costs of meters installed during the 2011 test year for that case, remains in effect, and the Maryland OPC's motion for rehearing in that case remains pending.

The order also approved a Grid Resiliency Charge for recovery of costs totaling approximately $24.0 million associated with Pepco's proposed plan to accelerate investments related to certain priority feeders, provided that, before implementing the surcharge, Pepco provides additional information to the MPSC related to performance objectives, milestones and costs, and makes annual filings with the MPSC thereafter concerning this project, which will permit the MPSC to establish the applicable Grid Resiliency Charge rider for each following year. The MPSC did not approve the proposed acceleration of the tree-trimming cycle or the undergrounding of six distribution feeders. The MPSC also rejected Pepco's proposed reliability performance-based mechanism. The new rates were effective on July 12, 2013.

On July 26, 2013, Pepco filed a notice of appeal of the July 12, 2013 order in the Circuit Court for the City of Baltimore. Other parties also have filed notices of appeal, which have been consolidated with Pepco's appeal. In its memorandum filed with the appeals court, Pepco asserts that the MPSC erred in failing to grant Pepco an adequate ROE, denying a number of other cost recovery mechanisms and limiting Pepco's test year data to no more than four months of forecasted data in future rate cases. The memoranda filed with the appeals court by the other parties primarily assert that the MPSC erred or acted arbitrarily and capriciously in allowing the recovery of certain costs by Pepco and refusing to reduce Pepco's rate base by known and measurable accumulated depreciation.

On December 4, 2013, Pepco submitted an application with the MPSC to increase its electric distribution base rates. The filing seeks approval of an annual rate increase of approximately $43.3 million, based on a requested ROE of 10.25%. The requested rate increase seeks to recover expenses associated with Pepco's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. A decision is expected in the third quarter of 2014.

New Jersey

Electric Distribution Base Rates

On December 11, 2012, ACE submitted an application with the NJBPU, updated on January 4, 2013, to increase its electric distribution base rates by approximately $70.4 million (excluding sales-and-use taxes), based on a requested ROE of 10.25%. This proposed net increase was comprised of (i) a proposed increase to ACE's distribution rates of approximately $72.1 million and (ii) a net decrease to ACE's Regulatory Asset Recovery Charge (a customer charge to recover deferred, NJBPU-approved expenses incurred as part of ACE's public service obligation) in the amount of approximately $1.7 million. The requested rate increase seeks to recover expenses associated with ACE's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service and to recover system restoration costs associated with the derecho storm in June 2012 and Hurricane Sandy in October 2012. On June 21, 2013, the NJBPU approved a settlement of the parties providing for an increase in ACE's electric distribution base rates in the amount of $25.5 million, based on an ROE of 9.75%. The base distribution revenue increase includes full recovery of the approximately $70.0 million in incremental storm restoration costs incurred as a result of recent major storm events, including the derecho storm and Hurricane Sandy, by including the related capital costs of approximately $44.2 million in rate base and amortizing the related deferred operation and maintenance expenses of approximately $25.8 million over a three-year period. Rates were effective on July 1, 2013.

Update and Reconciliation of Certain Under-Recovered Balances

In February 2012 and March 2013, ACE submitted petitions with the NJBPU seeking to reconcile and update (i) charges related to the recovery of above-market costs associated with ACE's long-term power purchase contracts with the NUGs, (ii) costs related to surcharges for the New Jersey Societal Benefit Program (a statewide public interest program for low income customers) and ACE's uncollected accounts and (iii) operating costs associated with ACE's residential appliance cycling program. In June 2012, the NJBPU approved a stipulation of settlement related to ACE's February 2012 filing, which provided for an overall annual rate increase of $55.3 million that went into effect on July 1, 2012. In May 2013, the NJBPU approved a stipulation of settlement related to ACE's March 2013 filing, which provided for an overall annual rate increase of $52.2 million (in addition to the $55.3 million approved by the NJBPU in June 2012) that went into effect on June 1, 2013. These rate increases, which primarily provide for the recovery of above-market costs associated with the NUG contracts and will have no effect on ACE's operating income, were placed into effect provisionally and were subject to a review by the NJBPU of the final underlying costs for reasonableness and prudence. On February 19, 2014, the NJBPU approved a stipulation of settlement for both proceedings, which made final the provisional rates that went into effect on July 1, 2012 and June 1, 2013, respectively.

Service Extension Contributions Refund Order

On July 19, 2013, in compliance with a 2012 Superior Court of New Jersey Appellate Division (Appellate Division) court decision, the NJBPU released an order requiring utilities to issue refunds to persons or entities that paid non-refundable contributions for utility service extensions to certain areas described as "Areas Not Designated for Growth." The order is limited to eligible contributions paid between March 20, 2005 and December 20, 2009. ACE is processing the refund requests that meet the eligibility criteria established in the order as they are received. Although ACE believes it received approximately $11 million of contributions between March 20, 2005 and December 20, 2009, it is currently unable to reasonably estimate the amount that it may be required to refund using the eligibility criteria established by the order. At this time, ACE does not expect that any such amount refunded will have a material effect on its consolidated financial condition, results of operations or cash flows, as any amounts that may be refunded will generally increase the value of ACE's property, plant and equipment and may ultimately be recovered through depreciation and cost of service. It is anticipated that the NJBPU will commence a rulemaking proceeding to further implement the directives of the Appellate Division decision.

Generic Consolidated Tax Adjustment Proceeding

In January 2013, the NJBPU initiated a generic proceeding to examine whether a consolidated tax adjustment (CTA) should continue to be used, and if so, how it should be calculated in determining a utility's cost of service. Under the NJBPU's current policy, when a New Jersey utility is included in a consolidated group income tax return, an allocated amount of any reduction in the consolidated group's taxes as a result of losses by affiliates is used to reduce the utility's rate base, upon which the utility earns a return. Consequently, this policy has substantially reduced ACE's rate base and ACE's position is that the CTA should be eliminated. A stakeholder process has been initiated by the NJBPU to aid in this examination. No formal schedule has been set for the remainder of the proceeding or for the issuance of a decision.

Federal Energy Regulatory Commission

On October 17, 2013, the FERC issued a ruling on challenges filed by the Delaware Municipal Electric Corporation, Inc. (DEMEC) to DPL's 2011 and 2012 annual formula rate updates. In 2006, FERC approved a formula rate for DPL that is incorporated into the PJM tariff. The formula rate establishes the treatment of costs and revenues and the resulting rates for DPL. Pursuant to the protocols approved by FERC and after a period of discovery, interested parties have an opportunity to file challenges regarding the application of the formula rate. The FERC order sets various issues in this proceeding for hearing, including challenges regarding formula rate inputs, deferred income items, prepayments of estimated income taxes, rate base reductions, various administrative and general expenses and the inclusion in rate base of CWIP related to the MAPP project (which has been abandoned). Settlement discussions began in this matter on November 5, 2013 before an administrative law judge at FERC.

On December 12, 2013, DEMEC filed a formal challenge to the DPL 2013 annual formula rate update, including a request to consolidate the 2013 challenge with the two prior challenges. This challenge is pending at FERC. PHI cannot predict when a final FERC decision in this proceeding will be issued.

On February 27, 2013, the public service commissions and public advocates of the District of Columbia, Maryland, Delaware and New Jersey, as well as DEMEC, filed a joint complaint with FERC against Pepco, DPL and ACE, as well as Baltimore Gas and Electric Company (BGE). The complainants challenged the base ROE and the application of the formula rate process, each associated with the transmission service that PHI's utilities provide. The complainants support an ROE within a zone of reasonableness of 6.78% and 10.33%, and have argued for a base ROE of 8.7%. The base ROE currently authorized by FERC for PHI's utilities is (i) 11.3% for facilities placed into service after January 1, 2006, and (ii) 10.8% for facilities placed into service prior to 2006. As currently authorized, the 10.8% base ROE for facilities placed into service prior to 2006 is eligible for a 50-basis-point incentive adder for being a member of a regional transmission organization. PHI, Pepco, DPL and ACE believe the allegations in this complaint are without merit and are vigorously contesting it. On April 3, 2013, Pepco, DPL and ACE filed their answer to this complaint, requesting that FERC dismiss the complaint against them on the grounds that it failed to meet the required burden to demonstrate that the existing rates and protocols are unjust and unreasonable. PHI cannot predict when a final FERC decision in this proceeding will be issued.

MPSC New Generation Contract Requirement

In September 2009, the MPSC initiated an investigation into whether Maryland electric distribution companies (EDCs) should be required to enter into long-term contracts with entities that construct, acquire or lease, and operate, new electric generation facilities in Maryland. In April 2012, the MPSC issued an order determining that there is a need for one new power plant in the range of 650 to 700 megawatts (MWs) beginning in 2015. The order requires Pepco, DPL and BGE (collectively, the Contract EDCs) to negotiate and enter into a contract with the winning bidder of a competitive bidding process in amounts proportional to their relative SOS loads. Under the contract, the winning bidder will construct a 661 MW natural gas-fired combined cycle generation plant in Waldorf, Maryland, with an expected commercial operation date of June 1, 2015. The order acknowledged the Contract EDCs' concerns about the requirements of the contract and directed them to negotiate with the winning bidder and submit any proposed changes in the contract to the MPSC for approval. The order further specified that each of the Contract EDCs will recover its costs associated with the contract through surcharges on its respective SOS customers.

In April 2012, a group of generating companies operating in the PJM region filed a complaint in the U.S. District Court for the District of Maryland challenging the MPSC's order on the grounds that it violates the Commerce Clause and the Supremacy Clause of the U.S. Constitution. In May 2012, the Contract EDCs and other parties filed notices of appeal in circuit courts in Maryland requesting judicial review of the MPSC's order. The Maryland circuit court appeals were consolidated in the Circuit Court for Baltimore City.

On April 16, 2013, the MPSC issued an order approving a final form of the contract and directing the Contract EDCs to enter into the contract with the winning bidder in amounts proportional to their relative SOS loads. On June 4, 2013, Pepco and DPL each entered into identical contracts in accordance with the terms of the MPSC's order; however, under each contract's terms, it will not become effective, if at all, until all legal proceedings related to these contracts and the actions of the MPSC in the related proceeding have been resolved.

On September 30, 2013, the U.S. District Court for the District of Maryland issued a ruling that the MPSC's April 2012 order violated the Supremacy Clause of the U.S. Constitution by attempting to regulate wholesale prices. In contrast, on October 1, 2013, the Maryland Circuit Court for Baltimore City upheld the MPSC's orders requiring the Contract EDCs to enter into the contracts.

On October 24, 2013, the Federal district court issued an order ruling that the contracts are illegal and unenforceable. The Federal district court order and its associated ruling could impact the state circuit court appeal, to which the Contract EDCs are parties, although such impact, if any, cannot be determined at this time. The Contract EDCs, the Maryland Office of People's Counsel and one generating company have appealed the Maryland Circuit Court's decision to the Maryland Court of Special Appeals. In addition, in November 2013 both the winning bidder and the MPSC appealed the Federal district court decision to the U.S. Court of Appeals for the Fourth Circuit. These appeals remain pending.

Assuming the contracts, as currently written, were to become effective by the expected commercial operation date of June 1, 2015, PHI continues to believe that Pepco and DPL may be required to account for their proportional share of the contracts as a derivative instrument at fair value with an offsetting regulatory asset because they would recover any payments under the contracts from SOS customers. PHI, Pepco and DPL have concluded that any accounting for these contracts would not be required until all legal proceedings related to these contracts and the actions of the MPSC in the related proceeding have been resolved.

PHI, Pepco and DPL continue to evaluate these proceedings to determine, should the contracts be found to be valid and enforceable, (i) the extent of the negative effect that the contracts may have on PHI's, Pepco's and DPL's respective credit metrics, as calculated by independent rating agencies that evaluate and rate PHI, Pepco and DPL and their debt issuances, (ii) the effect on Pepco's and DPL's ability to recover their associated costs of the contracts if a significant number of SOS customers elect to buy their energy from alternative energy suppliers, and (iii) the effect of the contracts on the financial condition, results of operations and cash flows of each of PHI, Pepco and DPL.

ACE Standard Offer Capacity Agreements

In April 2011, ACE entered into three Standard Offer Capacity Agreements (SOCAs) by order of the NJBPU, each with a different generation company, as more fully described in Note (13), "Derivative Instruments and Hedging Activities." ACE and the other New Jersey EDCs entered into the SOCAs under protest, arguing that the EDCs were denied due process and that the SOCAs violate certain of the requirements under the New Jersey law under which the SOCAs were established (the NJ SOCA Law). On October 22, 2013, in light of the decision of the U.S. District Court for the District of New Jersey described below, the state appeals of the NJBPU implementation orders filed by the EDCs and generators, were dismissed without prejudice subject to the parties exercising their appellate rights in the Federal courts.

In February 2011, ACE joined other plaintiffs in an action filed in the U.S. District Court for the District of New Jersey challenging the NJ SOCA Law on the grounds that it violates the Commerce Clause and the Supremacy Clause of the U.S. Constitution. On October 11, 2013, the Federal district court issued a ruling that the NJ SOCA Law is preempted by the Federal Power Act and violates the Supremacy Clause, and is therefore null and void. On October 21, 2013 a joint motion to stay the Federal district court's decision pending appeal was filed by the NJBPU and one of the SOCA generation companies. In that motion, the NJBPU notified the Federal district court that it would take no action to force implementation of the SOCAs pending the appeal or such other action—such as FERC approval of the SOCAs—that would cure the constitutional issues to the Federal district court's satisfaction. On October 25, 2013, the Federal district court issued an order denying the joint motion to stay and ruling that the SOCAs are void, invalid and unenforceable. On October 31, 2013, one of the SOCA generation companies filed a notice of appeal of the October 25, 2013 Federal district court decision with the U.S. Court of Appeals for the Third Circuit (the Federal circuit court). On November 8, 2013, the other remaining SOCA generating company filed a motion to intervene in the proceedings and a notice of appeal of the October 25, 2013 Federal district court decision. On November 21, 2013, the NJBPU filed its notice of appeal of the October 25, 2013 Federal district court decision. On November 14, 2013, the Federal circuit court granted the motion to intervene and on December 13, 2013, the Federal circuit court issued an order consolidating the appeals filed by the NJBPU and the SOCA generating companies of the October 25, 2013 Federal district court decision. The matter has been placed on an expedited schedule and appeal proceedings remain pending. The Federal circuit court is tentatively scheduled to hear the appeal on March 27, 2014.

One of the three SOCAs was terminated effective July 1, 2013 because of an event of default of the generation company that was a party to the SOCA. The remaining two SOCAs were terminated effective November 19, 2013, as a result of a termination notice delivered by ACE after the Federal district court's October 25, 2013 decision.

In light of the Federal district court order (which has not been stayed pending appeal), ACE derecognized both the derivative assets (liabilities) for the estimated fair value of the SOCAs and the offsetting regulatory liabilities (assets) in the fourth quarter of 2013.

Resiliency Task Forces

In July 2012, the Maryland governor signed an Executive Order directing his energy advisor, in collaboration with certain state agencies, to solicit input and recommendations from experts on how to improve the resiliency and reliability of the electric distribution system in Maryland. The resulting Grid Resiliency Task Force issued its report in September 2012, in which it made 11 recommendations. The governor forwarded the report to the MPSC in October 2012, urging the MPSC to quickly implement the first four recommendations: (i) strengthen existing reliability and storm restoration regulations; (ii) accelerate the investment necessary to meet the enhanced metrics; (iii) allow surcharge recovery for the accelerated investment; and (iv) implement clearly defined performance metrics into the traditional ratemaking scheme. Pepco's electric distribution base rate case filed with the MPSC on November 30, 2012 and DPL's electric distribution base rate case filed with the MPSC on March 29, 2013, each attempted to address the Grid Resiliency Task Force recommendations. In July and August 2013, the MPSC issued orders in the Pepco and DPL Maryland electric distribution base rate cases, respectively, that only partially approved the proposed Grid Resiliency Charge. See "Rate Proceedings – Maryland" above for more information about these base rate cases.

In August 2012, the District of Columbia mayor issued an Executive Order establishing the Mayor's Power Line Undergrounding Task Force (the DC Undergrounding Task Force). The stated purpose of the DC Undergrounding Task Force was to pool the collective resources available in the District of Columbia to produce an analysis of the technical feasibility, infrastructure options and reliability implications of undergrounding new or existing overhead distribution facilities in the District of Columbia. These resources included legislative bodies, regulators, utility personnel, experts and other parties who could contribute in a meaningful way to the DC Undergrounding Task Force. On May 13, 2013, the DC Undergrounding Task Force issued a written recommendation endorsing a $1 billion plan of the DC Undergrounding Task Force to underground 60 of the District of Columbia's most outage-prone power lines, which lines would be owned and maintained by Pepco. The legislation providing for implementation of the report's recommendations contemplates that: (i) Pepco would fund approximately

$500 million of the $1 billion estimated cost to complete this project, recovering those costs through surcharges on the electric bills of Pepco District of Columbia customers; (ii) $375 million of the undergrounding project cost would be financed by the District of Columbia's issuance of securitized bonds, which bonds would be repaid through surcharges on the electric bills of Pepco District of Columbia customers (Pepco would not earn a return on or of the cost of the assets funded with the proceeds received from the issuance of the securitized bonds, but ownership and responsibility for the operation and maintenance of such assets would be transferred to Pepco for a nominal amount); and (iii) the remaining amount would be funded through the District of Columbia Department of Transportation's existing capital projects program. This legislation was approved in the Council of the District of Columbia on February 4, 2014 and is awaiting the signature of the Mayor of the District of Columbia. Once signed by the Mayor and transmitted to Congress, the legislation will undergo a 30-day Congressional review period before becoming law, which is expected to occur in the second quarter of 2014. The final step would be DCPSC approval of the underground project plan and financing orders required by the legislation to establish the customer surcharges contemplated by the legislation, a decision on which is expected during the fourth quarter of 2014.

MAPP Project

On August 24, 2012, the board of PJM terminated the MAPP project and removed it from PJM's regional transmission expansion plan. PHI had been directed to construct the MAPP project, a 152-mile high-voltage interstate transmission line, to address the reliability needs of the region's transmission system. In December 2012, PHI submitted a filing to FERC seeking recovery of approximately $88 million of abandoned MAPP costs over a five-year recovery period. The FERC filing addressed, among other things, the prudence of the recoverable costs incurred, the proposed period over which the abandoned costs are to be amortized and the rate of return on these costs during the recovery period.

In February 2013, FERC issued an order concluding that the MAPP project was cancelled for reasons beyond the control of Pepco and DPL, finding that the prudently incurred costs associated with the abandonment of the MAPP project are eligible to be recovered, and setting for hearing and settlement procedures the prudence of the abandoned costs and the amortization period for those costs.

On December 18, 2013, PHI submitted a settlement agreement to FERC, which provides for recovery of PHI's abandoned MAPP costs over a three-year recovery period beginning June 1, 2013. The settlement agreement, which is subject to FERC approval, would resolve all issues concerning the recovery of abandonment costs associated with the cancellation of the MAPP project. PHI cannot predict the timing or results of a final FERC decision in this proceeding.

As of December 31, 2013, PHI had a regulatory asset related to the MAPP abandoned costs of approximately $68 million, representing the original filing amount of approximately $88 million of abandoned costs referred to above less: (i) approximately $2 million of disallowed costs written off in 2013; (ii) $4 million of materials transferred to inventories for use on other projects; and (iii) $14 million of amortization expense recorded in 2013. The regulatory asset balance includes the costs of land, land rights, engineering and design, environmental services, and project management and administration.

(8) PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment is comprised of the following:

	Original Cost	Accumulated Depreciation	Net Book Value
	(millions of dollars)		
At December 31, 2013			
Generation	$ 105	$ 99	$ 6
Distribution	8,896	2,961	5,935
Transmission	2,991	908	2,083
Gas	481	142	339
Construction work in progress	677	—	677
Non-operating and other property	1,417	753	664
Total	$14,567	$ 4,863	$ 9,704
At December 31, 2012			
Generation	$ 107	$ 97	$ 10
Distribution	8,320	2,954	5,366
Transmission	2,783	866	1,917
Gas	458	137	321
Construction work in progress	692	—	692
Non-operating and other property	1,265	725	540
Total	$13,625	$ 4,779	$ 8,846

The non-operating and other property amounts include balances for general plant, intangible plant, distribution plant and transmission plant held for future use as well as other property held by non-utility subsidiaries. Utility plant is generally subject to a first mortgage lien.

Pepco Holdings' utility subsidiaries use separate depreciation rates for each electric plant account. The rates vary from jurisdiction to jurisdiction.

Jointly Owned Plant

PHI's consolidated balance sheets include its proportionate share of assets and liabilities related to jointly owned plant. At December 31, 2013 and 2012, PHI's subsidiaries had a net book value ownership interest of $12 million and $13 million, respectively, in transmission and other facilities in which various parties also have ownership interests. PHI's share of the operating and maintenance expenses of the jointly-owned plant is included in the corresponding expenses in the consolidated statements of (loss) income. PHI is responsible for providing its share of the financing for the above jointly-owned facilities.

Capital Leases

Pepco leases its consolidated control center, which is an integrated energy management center used by Pepco to centrally control the operation of its transmission and distribution systems. This lease is accounted for as a capital lease and was initially recorded at the present value of future lease payments, which totaled $152 million. The lease requires semi-annual payments of approximately $8 million over a 25-year period that began in December 1994, and provides for transfer of ownership of the system to Pepco for $1 at the end of the lease term. Under FASB guidance on regulated operations, the amortization of leased assets is modified so that the total interest expense charged on the obligation and amortization expense of the leased asset is equal to the rental expense allowed for rate-making purposes. The amortization expense is included within Depreciation and amortization in the consolidated statements of (loss) income. This lease is treated as an operating lease for rate-making purposes.

Capital lease assets recorded within Property, Plant and Equipment at December 31, 2013 and 2012, in millions of dollars, are comprised of the following:

	Original Cost	Accumulated Amortization	Net Book Value
At December 31, 2013			
Transmission	$ 76	$ 41	$ 35
Distribution	76	42	34
General	3	3	—
Total	$ 155	$ 86	$ 69
At December 31, 2012			
Transmission	$ 76	$ 37	$ 39
Distribution	76	37	39
General	3	3	—
Total	$ 155	$ 77	$ 78

The approximate annual commitments under all capital leases are $15 million for each year 2014 through 2018, and $16 million thereafter.

Deactivation of Pepco Energy Services' Generating Facilities

During 2012, Pepco Energy Services deactivated its Buzzard Point and Benning Road oil-fired generation facilities. The facilities were located in Washington, D.C. and had a generating capacity of approximately 790 megawatts. During the years ended December 31, 2012 and 2011, PHI has recorded decommissioning costs of $3 million and $2 million, respectively, related to these generating facilities.

Pepco Energy Services placed the facilities into an idle condition termed a "cold closure." A cold closure requires that the utility service be disconnected so that the facilities are no longer operable and require only essential maintenance until they are completely decommissioned. During the third quarter of 2013, Pepco Energy Services determined that it would be more cost effective to pursue the demolition of the Benning Road generation facility and realization of the scrap metal salvage value of the facility instead of maintaining cold closure status. The demolition of the facility commenced in the fourth quarter of 2013 and is expected to be completed by the end of 2014. Pepco Energy Services will recognize the salvage proceeds associated with the scrap metals at the facility as realized.

Long-Lived Asset Impairment

For the years ended December 31, 2013 and 2012, PHI recorded impairment losses of $4 million ($3 million after-tax) and $12 million ($7 million after-tax), respectively, at Pepco Energy Services associated primarily with its investments in landfill gas-fired electric generation facilities. In 2012, the impairment loss also included the reduction in the estimated net realizable value of the combustion turbines at Buzzard Point. PHI performed a long-lived asset impairment test on the landfill generation facilities of Pepco Energy Services as a result of a sustained decline in energy prices and recent production levels. The asset value of the facilities was written down to their estimated fair value because the future expected cash flows of the facilities were not sufficient to provide recovery of the facilities' carrying value. PHI estimated the fair value of the facilities by calculating the present value of expected future cash flows using an appropriate discount rate. Both the expected future cash flows and the discount rate used primarily unobservable inputs.

Asset Retirement Obligations

PHI recognizes liabilities related to the retirement of long-lived assets in accordance with ASC 410. In connection with Pepco Energy Services' decommissioning of the Buzzard Point and Benning Road generation facilities, PHI has recorded an asset retirement obligation of $2 million and $9 million as of December 31, 2013 and 2012, respectively on its consolidated balance sheets.

During 2013, Pepco Energy Services determined that it would be more cost effective to pursue the demolition of the Benning Road generation facility instead of maintaining cold closure status. As a result of this change in intent, Pepco Energy Services reduced its asset retirement obligation related to the facility by $2 million.

The sale of the Conectiv Energy wholesale power generation business to Calpine Corporation (Calpine) did not include a coal ash landfill site located at the Edge Moor generating facility, which PHI intends to close. The preliminary estimate of the costs to PHI to close the coal ash landfill ranges from approximately $2 million to $3 million, plus annual post-closure operations, maintenance and monitoring costs for 30 years. PHI has recorded an asset retirement obligation of $6 million on its consolidated balance sheet related to the Edge Moor landfill.

(9) PENSION AND OTHER POSTRETIREMENT BENEFITS

The following table shows changes in the benefit obligation and plan assets for the years ended December 31, 2013 and 2012:

	Pension Benefits		Other Postretirement Benefits	
	2013	2012	2013	2012
	(millions of dollars)			
Change in Benefit Obligation				
Benefit obligation as of January 1	$2,494	$2,124	$ 775	$ 750
Service cost	53	35	8	7
Interest cost	100	107	29	35
Amendments	3	—	(124)	—
Actuarial (gain) loss	(277)	341	(71)	24
Benefits paid (a)	(135)	(113)	(43)	(41)
Benefit obligation as of December 31	$2,238	$2,494	$ 574	$ 775
Change in Plan Assets				
Fair value of plan assets as of January 1	$2,039	$1,694	$ 321	$ 281
Actual return on plan assets	86	252	56	38
Company and participant contributions	126	206	34	43
Benefits paid (a)	(135)	(113)	(43)	(41)
Fair value of plan assets as of December 31	$2,116	$2,039	$ 368	$ 321
Funded Status at end of year (plan assets less plan obligations)	$ (122)	$ (455)	$ (206)	$ (454)

(a) Other Postretirement Benefits paid is net of Medicare Part D subsidy receipts of zero and $4 million in 2013 and 2012, respectively.

At December 31, 2013 and 2012, the PHI Retirement Plan's accumulated benefit obligation was approximately $2.1 billion and $2.3 billion, respectively. The accumulated benefit obligation differs from the pension benefit obligation presented in the table above in that the accumulated benefit obligation includes no assumption about future compensation levels.

The following table provides the amounts recorded in PHI's consolidated balance sheets as of December 31, 2013 and 2012:

	Pension Benefits		Other Postretirement Benefits	
	2013	2012	2013	2012
	(millions of dollars)			
Regulatory asset	$ 664	$ 934	$ 3	$ 237
Current liabilities	(6)	(6)	—	—
Pension benefit obligation	(116)	(449)	—	—
Other postretirement benefit obligations	—	—	(206)	(454)
Deferred income tax liabilities, net	(217)	(216)	82	88
Accumulated other comprehensive loss, net of tax	25	32	—	—
Net amount recorded	$ 350	$ 295	$ (121)	$ (129)

Amounts included in AOCL (pre-tax) and Regulatory assets at December 31, 2013 and 2012, consist of:

	Pension Benefits		Other Postretirement Benefits	
	2013	2012	2013	2012
	(millions of dollars)			
Unrecognized net actuarial loss	$694	$979	$ 117	$ 238
Unamortized prior service cost (credit)	10	9	(114)	(1)
Total	$704	$988	$ 3	$ 237
Accumulated other comprehensive loss ($25 million and $32 million, net of tax, at December 31, 2013 and 2012, respectively)	$ 40	$ 54	$ —	$ —
Regulatory assets	664	934	3	237
Total	$704	$988	$ 3	$ 237

Under FASB guidance on regulated operations, a portion of actuarial gains and losses and prior service costs (credits) are included in Regulatory assets (liabilities) in the consolidated balance sheets to reflect expected regulatory recovery of such amounts, which otherwise would be recorded to AOCL. The table below provides the changes in plan assets and benefit obligations recognized in AOCL and Regulatory assets for the years ended December 31, 2013, 2012 and 2011.

	Pension Benefits			Other Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
	(millions of dollars)					
Amounts amortized during the year:						
Amortization of prior service (cost) credit	$ (2)	$ (1)	$ —	$ 11	$ 4	$ 5
Amortization of net actuarial (loss)	(67)	(64)	(47)	(12)	(14)	(14)
Amounts arising during the year:						
Current year prior service cost (credit)	3	—	19	(124)	—	6
Current year actuarial (gain) loss	(218)	220	177	(109)	4	53
Total recognized in AOCL and Regulatory assets for the year ended December 31	$(284)	$155	$ 149	$(234)	$ (6)	$ 50

The estimated net actuarial loss and prior service cost for the defined benefit pension plans that will be amortized from AOCL or Regulatory assets into net periodic benefit cost over the next reporting year are $44 million and $2 million, respectively. The estimated net actuarial loss and prior service credit for the OPEB plan that will be amortized from AOCL or Regulatory assets into net periodic benefit cost over the next reporting year are $6 million and $13 million, respectively.

The table below provides the components of net periodic benefit costs recognized for the years ended December 31, 2013, 2012 and 2011:

	Pension Benefits			Other Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
	(millions of dollars)					
Service cost	$ 53	$ 35	$ 35	$ 8	$ 7	$ 5
Interest cost	100	107	107	29	35	37
Expected return on plan assets	(145)	(132)	(128)	(20)	(18)	(19)
Amortization of prior service cost (credit)	2	1	—	(11)	(4)	(5)
Amortization of net actuarial loss	67	64	47	12	14	14
Termination benefits	—	—	—	—	1	1
Net periodic benefit cost	$ 77	$ 75	$ 61	$ 18	$ 35	$ 33

The table below provides the split of the combined pension and other postretirement net periodic benefit costs among subsidiaries for the years ended December 31, 2013, 2012 and 2011:

	2013	2012	2011
	(millions of dollars)		
Pepco	$34	$ 39	$43
DPL	18	23	23
ACE	17	24	21
Other subsidiaries	26	24	7
Total	$95	$110	$94

The following weighted average assumptions were used to determine the benefit obligations at December 31:

	Pension Benefits		Other Postretirement Benefits	
	2013	2012	2013	2012
Discount rate	5.05%	4.15%	5.00%	4.10%
Rate of compensation increase	5.00%	5.00%	5.00%	5.00%
Health care cost trend rate assumed for current year – pre 65	—	—	7.00%	7.50%
Health care cost trend rate assumed for current year – post 65	—	—	5.60%	7.50%
Rate to which the cost trend rate is assumed to decline for all eligible retirees (the ultimate trend rate)	—	—	5.00%	5.00%
Year that the cost trend rate reaches the ultimate trend rate	—	—	2020	2018

Assumed health care cost trend rates may have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects, in millions of dollars:

	1-Percentage-Point Increase	1-Percentage-Point Decrease
Increase (decrease) in total service and interest cost	$ 1	$ (1)
Increase (decrease) in postretirement benefit obligation	$ 17	$ (19)

The following weighted average assumptions were used to determine the net periodic benefit cost for the years ended December 31:

	Pension Benefits			Other Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
Discount rate	4.15%	5.00%	5.65%	4.10%/4.95% (a)	4.90%	5.60%
Expected long-term return on plan assets	7.00%	7.25%	7.75%	7.00%	7.25%	7.75%
Rate of compensation increase	5.00%	5.00%	5.00%	5.00%	5.00%	5.00%
Health care cost trend rate	—	—	—	7.50%	8.00%	8.00%

(a) The discount rate was updated for remeasurement to 4.95% on July 1, 2013.

PHI utilizes an analytical tool developed by its actuaries to select the discount rate. The analytical tool utilizes a high-quality bond portfolio with cash flows that match the benefit payments expected to be made under the plans.

PHI uses a building block approach to estimate the expected rate of return on plan assets. Under this approach, the percentage of plan assets in each asset class according to PHI's target asset allocation, at the beginning of the year, is applied to the expected asset return for the related asset class. PHI incorporates long-term assumptions for real returns, inflation expectations, volatility and correlations among asset classes to determine expected returns for a given asset allocation. The pension and postretirement benefit plan assets consist of equity, fixed income, real estate and private equity investments. PHI periodically reviews its asset mix and rebalances assets to the target allocation.

The average remaining service periods for participating employees of the benefit plans was approximately 11 years for both 2013 and 2012. PHI utilizes plan census data to estimate these average remaining service periods. PHI uses the IRS prescribed mortality tables to estimate the average life expectancy. The IRS prescribed tables for 2013 and 2012 were used to determine net periodic pension and OPEB cost for the same respective years. The tables for 2014 and 2013 were used for determining the benefit obligations as of December 31, 2013 and 2012, respectively.

Benefit Plan Modifications

During 2013, PHI approved two amendments to its other postretirement benefits plan. These amendments impacted the retiree health care and the retiree life insurance benefits, and were effective on January 1, 2014. As a result of the amendments, which were cumulatively significant, PHI remeasured its accumulated postretirement benefit obligation for other postretirement benefits as of July 1, 2013. The remeasurement resulted in a $193 million reduction of the accumulated postretirement benefit obligation, which included recording a prior service credit of $124 million, which will be amortized over approximately ten years, and a $69 million reduction from a change in the discount rate from 4.10% as of December 31, 2012 to 4.95% as of July 1, 2013. The remeasurement resulted in a $17 million reduction in net periodic benefit cost for other postretirement benefits during 2013, when compared to 2012. Approximately 37% of net periodic other postretirement benefit costs were capitalized in 2013.

Plan Assets

Investment Policies and Strategies

In developing its allocation policy for the assets in the PHI Retirement Plan and the other postretirement benefit plan, PHI examined projections of asset returns and volatility over a long-term horizon. In connection with this analysis, PHI evaluated the risk and return tradeoffs of alternative asset classes and asset mixes given long-term historical relationships as well as prospective capital market returns. PHI also conducted an asset-liability study to match projected asset growth with projected liability growth to determine whether there is sufficient liquidity for projected benefit payments. PHI developed its asset mix guidelines by incorporating the results of these analyses with an assessment of its risk posture, and taking into account industry practices. PHI periodically evaluates its investment strategy to ensure that plan assets are sufficient to meet the benefit obligations of the plans. As part of the ongoing evaluation, PHI may make changes to its targeted asset allocations and investment strategy.

PHI's pension investment strategy is designed to meet the following investment objectives:

- Generate investment returns that, in combination with funding contributions from PHI, provide adequate funding to meet all current and future benefit obligations of the plan.
- Provide investment results that meet or exceed the assumed long-term rate of return, while maintaining the funded status of the plan at acceptable levels.
- Improve funded status over time.
- Decrease contribution and expense volatility as funded status improves.

To achieve these investment objectives, PHI's investment strategy divides the pension program into two primary portfolios:

Return-Seeking Assets—These assets are intended to provide investment returns in excess of pension liability growth and reduce existing deficits in the funded status of the plan. The category includes a diversified mix of U.S. large and small cap equities, non-U.S. developed and emerging market equities, real estate, and private equity.

Liability-Hedging Assets—These assets are intended to reflect the sensitivity of the plan's liabilities to changes in discount rates. This category includes a diversified mix of long duration, primarily investment grade credit and U.S. treasury securities.

PHI follows an asset-liability management strategy for PHI Retirement Plan assets in order to reduce the effects of future volatility of the fair value of its pension plan assets relative to its pension plan liabilities. For example, in 2013, this strategy uses a 66% target allocation to fixed income investments, primarily in high quality, longer-maturity fixed income securities. The PHI Retirement Plan asset allocations at December 31, 2013 and 2012, by asset category, were as follows:

Asset Category	Plan Assets at December 31,		Target Plan Asset Allocation	
	2013	2012	2013	2012
Equity	31%	30%	28%	32%
Fixed Income	62%	62%	66%	62%
Other (real estate, private equity)	7%	8%	6%	6%
Total	100%	100%	100%	100%

PHI's other postretirement benefit plan asset allocations at December 31, 2013 and 2012, by asset category, were as follows:

Asset Category	Plan Assets at December 31,		Target Plan Asset Allocation	
	2013	2012	2013	2012
Equity	63%	62%	60%	60%
Fixed Income	31%	36%	35%	35%
Cash	6%	2%	5%	5%
Total	100%	100%	100%	100%

PHI will rebalance the plan asset portfolios when the actual allocations fall outside the ranges outlined in the investment policy or as funded status improves over a reasonable period of time.

Risk Management

Pension and other postretirement benefit plan assets may be invested in separately managed accounts in which there is ownership of individual securities, shares of commingled funds or mutual funds, or limited partnerships. Commingled funds and mutual funds are subject to detailed policy guidelines set forth in the fund's prospectus or fund declaration, and limited partnerships are subject to the terms of the partnership agreement.

Separate account investment managers are responsible for achieving a level of diversification in their portfolio that is consistent with their investment approach and their role in PHI's overall investment structure. Separate account investment managers must follow risk management guidelines established by PHI unless authorized in writing by PHI.

Derivative instruments are permissible in an investment portfolio to the extent they comply with policy guidelines and are consistent with risk and return objectives. Under no circumstances may such instruments be used speculatively or to leverage the portfolio. Separately managed accounts are prohibited from holding securities issued by the following firms:

- PHI and its subsidiaries,
- PHI's pension plan trustee, its parent or its affiliates,
- PHI's pension plan consultant, its parent or its affiliates, and
- PHI's pension plan investment manager, its parent or its affiliates

Fair Value of Plan Assets

As defined in the FASB guidance on fair value measurement and disclosures (ASC 820), fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The FASB's fair value framework includes a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level input that is significant to the fair value measurement of the instrument. Investments are classified within the fair value hierarchy as follows:

Level 1: Investments are valued using quoted prices in active markets for identical instruments.

Level 2: Investments are valued using other significant observable inputs (e.g., quoted prices for similar investments, interest rates, credit risks, etc).

Level 3: Investments are valued using significant unobservable inputs, including internal assumptions.

There were no significant transfers between level 1 and level 2 during the years ended December 31, 2013 and 2012.

The following tables present the fair values of PHI's pension and other postretirement benefit plan assets by asset category within the fair value hierarchy levels, as of December 31, 2013 and 2012:

	Fair Value Measurements at December 31, 2013 *(millions of dollars)*			
Asset Category	**Total**	**Quoted Prices in Active Markets for Identical Instruments (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
Pension Plan Assets:				
Equity				
Domestic (a)	$ 432	$ 185	$ 213	$ 34
International (b)	217	215	1	1
Fixed Income (c)	1,309	—	1,298	11
Other				
Private Equity	53	—	—	53
Real Estate	61	—	—	61
Cash Equivalents (d)	44	44	—	—
Pension Plan Assets Subtotal	2,116	444	1,512	160
Other Postretirement Plan Assets:				
Equity (e)	233	204	29	—
Fixed Income (f)	113	113	—	—
Cash Equivalents	22	22	—	—
Postretirement Plan Assets Subtotal	368	339	29	—
Total Pension and Other Postretirement Assets	$2,484	$ 783	$ 1,541	$ 160

(a) Predominantly includes domestic common stock and commingled funds.
(b) Predominantly includes foreign common and preferred stock and warrants.
(c) Predominantly includes corporate bonds, government bonds, municipal/provincial bonds, collateralized mortgage obligations and commingled funds.
(d) Predominantly includes cash investment in short-term investment funds.
(e) Includes domestic and international commingled funds.
(f) Includes fixed income commingled funds.

Asset Category	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	Fair Value Measurements at December 31, 2012 *(millions of dollars)*			
Pension Plan Assets:				
Equity				
Domestic (a)	$ 367	$ 169	$ 170	$ 28
International (b)	254	250	1	3
Fixed Income (c)	1,256	—	1,243	13
Other				
Private Equity	56	—	—	56

Cash Equivalents (d)	32	32	—	—
Pension Plan Assets Subtotal	2,039	451	1,414	174
Other Postretirement Plan Assets:				
Equity (e)	199	171	28	—
Fixed Income (f)	115	115	—	—
Cash Equivalents	7	7	—	—
Postretirement Plan Assets Subtotal	321	293	28	—
Total Pension and Other Postretirement Plan Assets	$2,360	$ 744	$ 1,442	$ 174

(a) Predominantly includes domestic common stock and commingled funds.
(b) Predominantly includes foreign common and preferred stock and warrants.
(c) Predominantly includes corporate bonds, government bonds, municipal/provincial bonds, collateralized mortgage obligations and commingled funds.
(d) Predominantly includes cash investment in short-term investment funds.
(e) Includes domestic and international commingled funds.
(f) Includes fixed income commingled funds.

There were no significant concentrations of risk in pension and OPEB plan assets at December 31, 2013 and 2012.

Valuation Techniques Used to Determine Fair Value

Equity

Equity securities are primarily comprised of securities issued by public companies in domestic and foreign markets plus investments in commingled funds, which are valued on a daily basis. PHI can exchange shares of the publicly traded securities and the fair values are primarily sourced from the closing prices on stock exchanges where there is active trading, therefore they would be classified as level 1 investments. If there is less active trading, then the publicly traded securities would typically be priced using observable data, such as bid/ask prices, and these measurements would be classified as level 2 investments. Investments that are not publicly traded and valued using unobservable inputs would be classified as level 3 investments.

Commingled funds with publicly quoted prices and active trading are classified as level 1 investments. For commingled funds that are not publicly traded and have ongoing subscription and redemption activity, the fair value of the investment is the net asset value (NAV) per fund share, derived from the underlying securities' quoted prices in active markets, and are classified as level 2 investments. Investments in commingled funds with redemption restrictions that use NAV are classified as level 3 investments.

Fixed Income

Fixed income investments are primarily comprised of fixed income securities and fixed income commingled funds. The prices for direct investments in fixed income securities are generated on a daily basis. Like the equity securities, fair values generated from active trading on exchanges are classified as level 1 investments. Prices generated from less active trading with wider bid/ask prices are classified as level 2 investments. If prices are based on uncorroborated and unobservable inputs, then the investments are classified as level 3 investments.

Commingled funds with publicly quoted prices and active trading are classified as level 1 investments. For commingled funds that are not publicly traded and have ongoing subscription and redemption activity, the fair value of the investment is the NAV per fund share, derived from the underlying securities' quoted prices in active markets, and are classified as level 2 investments. Investments in commingled funds with redemption restrictions that use NAV are classified as level 3 investments.

Other – Private Equity and Real Estate

Investments in private equity and real estate funds are primarily invested in privately held real estate investment properties, trusts and partnerships, as well as equity and debt issued by public or private companies. As a practical expedient, PHI's interest in the fund or partnership is estimated at NAV. PHI's interest in these funds cannot be readily redeemed due to the inherent lack of liquidity and the primarily long-term nature of the underlying assets. Distribution is made through the liquidation of the underlying assets. PHI views these investments as part of a long-term investment strategy. These investments are valued by each investment manager based on the underlying assets. The majority of the underlying assets are valued using significant unobservable inputs and often require significant management judgment or estimation based on the best available information. Market data includes observations of the trading multiples of public companies considered comparable to the private companies being valued. The funds utilize valuation techniques consistent with the market, income and cost approaches to measure the fair value of certain real estate investments. As a result, PHI classifies these investments as level 3 investments.

The investments in private equity and real estate funds require capital commitments, which may be called over a specific number of years. Unfunded capital commitments as of December 31, 2013 and 2012 totaled $12 million and $15 million, respectively.

Reconciliations of the beginning and ending balances of PHI's fair value measurements using significant unobservable inputs (level 3) for investments in the pension plan for the years ended December 31, 2013 and 2012 are shown below:

	Fair Value Measurements Using Significant Unobservable Inputs (Level 3) *(millions of dollars)*				
	Equity	**Fixed Income**	**Private Equity**	**Real Estate**	**Total Level 3**
Balance as of January 1, 2013	$ 31	$ 13	$ 56	$ 74	$ 174

Cash Flows

Contributions—PHI Retirement Plan

PHI's funding policy with regard to the PHI Retirement Plan is to maintain a funding level that is at least equal to the target liability as defined under the Pension Protection Act of 2006. During 2013, PHI, DPL and ACE made discretionary tax-deductible contributions to the PHI Retirement Plan in the amounts of $80 million, $10 million and $30 million, respectively, which brought the PHI Retirement Plan assets to the funding target level for 2013 under the Pension Protection Act. During 2012, Pepco, DPL and ACE made discretionary tax-deductible contributions to the PHI Retirement Plan in the amounts of $85 million, $85 million and $30 million, respectively, which brought plan assets to the funding target level for 2012 under the Pension Protection Act.

Contributions—Other Postretirement Benefit Plan

In 2013 and 2012, Pepco contributed $6 million and $5 million, respectively, DPL contributed $3 million and $7 million, respectively, and ACE contributed $6 million and $7 million, respectively, to the other postretirement benefit plan. In 2013 and 2012, contributions of $7 million and $13 million, respectively, were made by other PHI subsidiaries.

Expected Benefit Payments

Estimated future benefit payments to participants in PHI's pension and other postretirement benefit plans, which reflect expected future service as appropriate, are as follows:

Years	Pension Benefits	Other Postretirement Benefits
	(millions of dollars)	
2014	$ 159	$ 38
2015	136	39
2016	139	39
2017	142	40
2018	147	40
2019 through 2023	$ 795	$ 201

Medicare Prescription Drug Improvement and Modernization Act of 2003 (Medicare Act)

On December 8, 2003, the Medicare Act became effective. The Medicare Act introduced Medicare Part D, as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. Pepco Holdings sponsors postretirement health care plans that provide prescription drug benefits that PHI plan actuaries have determined are actuarially equivalent to Medicare Part D. In 2012, Pepco Holdings received $4 million in federal Medicare prescription drug subsidies. PHI did not receive the Part D subsidy in 2013 and will not receive it in the future due to the implementation of an Employer Group Waiver Plan which is not eligible for Part D reimbursements.

Pepco Holdings Retirement Savings Plan

Pepco Holdings has a defined contribution retirement savings plan. Participation in the plan is voluntary. All participants are 100% vested and have a nonforfeitable interest in their own contributions and in the Pepco Holdings' company matching contributions, including any earnings or losses thereon. Pepco Holdings' matching contributions were $12 million, $12 million and $11 million for the years ended December 31, 2013, 2012 and 2011, respectively.

(10) DEBT

Long-Term Debt

The components of long-term debt are shown in the table below:

Interest Rate	Maturity	At December 31, 2013	At December 31, 2012
		(millions of dollars)

Total Net Long-Term Debt		$ 4,053	$ 3,648

(a) Represents a series of Collateral First Mortgage Bonds securing a series of senior notes issued by Pepco.
(b) Represents a series of Collateral First Mortgage Bonds (as defined herein) which must be cancelled and released as security for the issuer's obligations under the corresponding series of issuer notes (as defined herein) or tax-exempt bonds, at such time as the issuer does not have any first mortgage bonds outstanding (other than its Collateral First Mortgage Bonds).
(c) Represents a series of Collateral First Mortgage Bonds which must be cancelled and released as security for the issuer's obligations under the corresponding series of issuer notes or tax-exempt bonds, at such time as the issuer does not have any first mortgage bonds outstanding (other than its Collateral First Mortgage Bonds), except that the issuer may not permit such release of collateral unless the issuer substitutes comparable obligations for such collateral.
(d) Represents a series of Collateral First Mortgage Bonds securing a series of senior notes issued by Pepco, which in turn secures a series of tax-exempt bonds issued for the benefit of Pepco.
(e) Represents a series of Collateral First Mortgage Bonds securing a series of medium term notes issued by ACE.
(f) Represents a series of Collateral First Mortgage Bonds securing a series of tax-exempt bonds issued for the benefit of ACE.
(g) Represents a series of Collateral First Mortgage Bonds securing a series of senior notes issued by ACE.
(h) Represents a series of Collateral First Mortgage Bonds securing a series of debt securities issued by DPL.

The outstanding first mortgage bonds issued by each of Pepco, DPL and ACE are issued under a mortgage and deed of trust and are secured by a first lien on substantially all of the issuing company's property, plant and equipment, except for certain property excluded from the lien of the respective mortgage.

PHI's long-term debt is subject to certain covenants. As of December 31, 2013, PHI and its subsidiaries were in compliance with all such covenants.

The table above does not separately identify $1,060 million, $100 million and $249 million in aggregate principal amount of senior notes, medium term notes and other debt securities (issuer notes) issued by each of Pepco, DPL and ACE, respectively, and $110 million and $62 million in aggregate principal amount of tax-exempt bonds issued for the benefit of Pepco and ACE, respectively. These issuer notes are secured by a like amount of first mortgage bonds (Collateral First Mortgage Bonds) of each respective issuer. In addition, these tax-exempt bonds are secured by a like amount of Collateral First Mortgage Bonds issued by the utility subsidiary for whose benefit the tax-exempt bonds were issued. The principal terms of each such series of issuer notes, or the issuer's obligations in respect of each such series of tax-exempt bonds, are identical to the same terms of the corresponding series of Collateral First Mortgage Bonds. Payments of principal and interest made on a series of such issuer notes, or the satisfaction of the issuer's obligations in respect of a series of such tax-exempt bonds, satisfy the corresponding obligations on the related series of Collateral First Mortgage Bonds. For these reasons, each such series of Collateral First Mortgage Bonds and the corresponding issuer notes and/or tax-exempt bonds together effectively represent a single financial obligation and are not identified in the table above separately.

Bond Issuances

During 2013, Pepco issued $250 million of 4.15% first mortgage bonds due March 15, 2043 and $150 million of 4.95% first mortgage bonds due November 15, 2043. Net proceeds from the issuance of the 4.15% bonds were used to repay Pepco's outstanding commercial paper and for general corporate purposes. The net proceeds from the 4.95% bonds were used to repay outstanding commercial paper, including commercial paper issued to repay in full at maturity $200 million of Pepco's 4.95% senior notes due November 15, 2013, plus accrued but unpaid interest thereon. The senior notes were secured by a like principal amount of Pepco's first mortgage bonds, which under Pepco's Mortgage and Deed of Trust were deemed to be satisfied with the repayment of the senior notes.

During 2013, DPL issued $300 million of 3.50% first mortgage bonds due November 15, 2023. The net proceeds from the issuance of the long-term debt were used to repay at maturity $250 million of DPL's 6.40% first mortgage bonds, plus accrued but unpaid interest thereon, to repay outstanding commercial paper and for general corporate purposes.

Bond Redemptions

During 2013, Pepco repaid at maturity $200 million of its 4.95% senior notes, which were secured by a like principal amount of its first mortgage bonds as previously discussed.

During 2013, DPL repaid at maturity $250 million of its 6.40% first mortgage bonds.

During 2013, ACE repaid at maturity $69 million of its 6.63% non-callable first mortgage bonds. ACE also funded the redemption, prior to maturity, of $4 million of outstanding weekly variable rate pollution control revenue refunding bonds due 2017, issued by the Pollution Control Financing Authority of Salem County, New Jersey for ACE's benefit.

ACE Term Loan Agreement

On May 10, 2013, ACE entered into a $100 million term loan agreement, pursuant to which ACE has borrowed (and may not re-borrow) $100 million at a rate of interest equal to the prevailing Eurodollar rate, which is determined by reference to the London Interbank Offered Rate (LIBOR) with respect to the relevant interest period, all as defined in the loan agreement, plus a margin of 0.75%. ACE's Eurodollar borrowings under the loan agreement may be converted into floating rate loans under certain circumstances, and, in that event, for so long as any loan remains a floating rate loan, interest would accrue on that loan at a rate per year equal to (i) the highest of (a) the prevailing prime rate, (b) the federal funds effective rate plus 0.5%, or (c) the one-month Eurodollar rate plus 1%, plus (ii) a margin of 0.75%. As of December 31, 2013, outstanding borrowings under the loan agreement bore interest at an annual rate of 0.92%, which is subject to adjustment from time to time. All borrowings under the loan agreement are unsecured, and the aggregate principal amount of all loans, together with any accrued but unpaid interest due under the loan agreement, must be repaid in full on or before November 10, 2014.

Under the terms of the term loan agreement, ACE must maintain compliance with specified covenants, including (i) the requirement that ACE maintain a ratio of total indebtedness to total capitalization of 65% or less, computed in accordance with the terms of the loan agreement, which calculation excludes from the definition of total indebtedness certain trust preferred securities and deferrable interest subordinated debt (not to exceed 15% of total capitalization), (ii) a restriction on sales or other dispositions of assets, other than certain permitted sales and dispositions, and (iii) a restriction on the incurrence of liens (other than liens permitted by the loan agreement) on the assets of ACE. The loan agreement does not include any rating triggers. ACE was in compliance with all covenants under this loan agreement as of December 31, 2013.

Transition Bonds Issued by ACE Funding

The components of transition bonds are shown in the table below:

Interest Rate	Maturity	At December 31, 2013	At December 31, 2012
		(millions of dollars)	
4.46%	2016	$ 8	$ 19
4.91%	2017	46	75
5.05%	2020	54	54
5.55%	2023	147	147
Total Transition Bonds		255	295
Net unamortized discount		—	—
Current portion of long-term debt		(41)	(39)
Total Net Long-Term Transition Bonds		$ 214	$ 256

For a description of the Transition Bonds, see Note (16), "Variable Interest Entities – ACE Funding."

Maturities of PHI's long-term debt and Transition Bonds outstanding at December 31, 2013 are $444 million in 2014, $409 million in 2015, $338 million in 2016, $133 million in 2017, $286 million in 2018 and $3,115 million thereafter.

Long-Term Project Funding

As of December 31, 2013 and 2012, Pepco Energy Services had total outstanding long-term project funding (including current maturities) of $12 million and $13 million, respectively, related to energy savings contracts performed by Pepco Energy Services. The aggregate amounts of maturities for the project funding debt outstanding at December 31, 2013, are $2 million for 2014, $2 million for 2015, $1 million for each year 2016 and 2017, $2 million for 2018, and $4 million thereafter.

Short-Term Debt

PHI and its regulated utility subsidiaries have traditionally used a number of sources to fulfill short-term funding needs, such as commercial paper, short-term notes, and bank lines of credit. Proceeds from short-term borrowings are used primarily to meet working capital needs, but may also be used to temporarily fund long-term capital requirements. The components of PHI's short-term debt at December 31, 2013 and 2012 are as follows:

	2013	2012
	(millions of dollars)	
Commercial paper	$ 442	$ 637
Variable rate demand bonds	123	128
Term loan agreement	—	200
Total	$ 565	$ 965

Commercial Paper

PHI, Pepco, DPL and ACE maintain ongoing commercial paper programs to address short-term liquidity needs. As of December 31, 2013, the maximum capacity available under these programs was $875 million, $500 million, $500 million and $350 million, respectively, subject to available borrowing capacity under the credit facility.

PHI, Pepco, DPL and ACE had $24 million, $151 million, $147 million and $120 million, respectively, of commercial paper outstanding at December 31, 2013. The weighted average interest rate for commercial paper issued by PHI, Pepco, DPL and ACE during 2013 was 0.70%, 0.34%, 0.29% and 0.31%, respectively. The weighted average maturity of all commercial paper issued by PHI, Pepco, DPL and ACE during 2013 was five, five, three and four days, respectively.

PHI, Pepco, DPL and ACE had $264 million, $231 million, $32 million and $110 million, respectively, of commercial paper outstanding at December 31, 2012. The weighted average interest rate for commercial paper issued by PHI, Pepco, DPL and ACE during 2012 was 0.87%, 0.43%, 0.43% and 0.41%, respectively. The weighted average maturity of all commercial paper issued by PHI, Pepco, DPL and ACE in 2012 was ten, five, four and three days, respectively.

Variable Rate Demand Bonds

PHI's utility subsidiaries DPL and ACE, each have outstanding obligations in respect of Variable Rate Demand Bonds (VRDB). VRDBs are subject to repayment on the demand of the holders and, for this reason, are accounted for as short-term debt in accordance with GAAP. However, bonds submitted for purchase are remarketed by a remarketing agent on a best efforts basis. PHI expects that any bonds submitted for purchase will be remarketed successfully due to the creditworthiness of the issuer and, as applicable, the credit support, and because the remarketing resets the interest rate to the then-current market rate. The bonds may be converted to a fixed-rate, fixed-term option to establish a maturity which corresponds to the date of final maturity of the bonds. On this basis, PHI views VRDBs as a source of long-term financing. As of December 31, 2013, $105 million of VRDBs issued on behalf of DPL (of which $72 million were secured by Collateral First Mortgage Bonds issued by DPL) and $18 million of VRDBs issued on behalf of ACE were outstanding.

The VRDBs outstanding at December 31, 2013 mature as follows: 2014 to 2017 ($44 million), 2024 ($33 million) and 2028 to 2029 ($46 million). The weighted average interest rate for VRDBs was 0.24% during 2013 and 0.34% during 2012.

Credit Facility

PHI, Pepco, DPL and ACE maintain an unsecured syndicated credit facility to provide for their respective liquidity needs, including obtaining letters of credit, borrowing for general corporate purposes and supporting their commercial paper programs. On August 1, 2011, PHI, Pepco, DPL and ACE entered into an amended and restated credit agreement which, on August 2, 2012, was amended to extend the term of the credit facility to August 1, 2017 and to amend the pricing schedule to decrease certain fees and interest rates payable to the lenders under the facility. On August 1, 2013, as permitted under the existing terms of the credit agreement, a request by PHI, Pepco, DPL and ACE to extend the credit facility termination date to August 1, 2018 was approved. All of the terms and conditions as well as pricing remained the same.

The aggregate borrowing limit under the amended and restated credit facility is $1.5 billion, all or any portion of which may be used to obtain loans and up to $500 million of which may be used to obtain letters of credit. The facility also includes a swingline loan sub-facility, pursuant to which each company may make same day borrowings in an aggregate amount not to exceed 10% of the total amount of the facility. Any swingline loan must be repaid by the borrower within fourteen days of receipt. The credit sublimit is $750 million for PHI and $250 million for each of Pepco, DPL and ACE. The sublimits may be increased or decreased by the individual borrower during the term of the facility, except that (i) the sum of all of the borrower sublimits following any such increase or decrease must equal the total amount of the facility and (ii) the aggregate amount of credit used at any given time by (a) PHI may not exceed $1.25 billion and (b) each of Pepco, DPL or ACE may not exceed the lesser of $500 million and the maximum amount of short-term debt the company is permitted to have outstanding by its regulatory authorities. The total number of the sublimit reallocations may not exceed eight per year during the term of the facility.

The interest rate payable by each company on utilized funds is, at the borrowing company's election, (i) the greater of the prevailing prime rate, the federal funds effective rate plus 0.5% and the one month LIBOR plus 1.0%, or (ii) the prevailing Eurodollar rate, plus a margin that varies according to the credit rating of the borrower.

In order for a borrower to use the facility, certain representations and warranties must be true and correct, and the borrower must be in compliance with specified financial and other covenants, including (i) the requirement that each borrowing company maintain a ratio of total indebtedness to total capitalization of 65% or less, computed in accordance with the terms of the credit agreement, which calculation excludes from the definition of total indebtedness certain trust preferred securities and deferrable interest subordinated debt (not to exceed 15% of total capitalization), (ii) with certain exceptions, a restriction on sales or other dispositions of assets, and (iii) a restriction on the incurrence of liens on the assets of a borrower or any of its significant subsidiaries other than permitted liens. The credit agreement contains certain covenants and other customary agreements and requirements that, if not complied with, could result in an event of default and the acceleration of repayment obligations of one or more of the borrowers thereunder. Each of the borrowers was in compliance with all covenants under this facility as of December 31, 2013.

The absence of a material adverse change in PHI's business, property, results of operations or financial condition is not a condition to the availability of credit under the credit agreement. The credit agreement does not include any rating triggers.

As of December 31, 2013 and 2012, the amount of cash plus unused borrowing capacity under the credit facility available to meet the future liquidity needs of PHI and its utility subsidiaries on a consolidated basis totaled $1,063 million and $861 million, respectively. PHI's utility subsidiaries had combined cash and unused borrowing capacity under the credit facility of $332 million and $477 million at December 31, 2013 and 2012, respectively.

Other Financing Activities

PHI Term Loan Agreement

On March 28, 2013, PHI entered into a $250 million term loan agreement due March 27, 2014, pursuant to which PHI had borrowed $250 million at a rate of interest equal to the prevailing Eurodollar rate, which is determined by reference to the LIBOR with respect to the relevant interest period, all as defined in the loan agreement, plus a margin of 0.875%. PHI used the net proceeds of the loan under the loan agreement to repay its outstanding $200 million term loan obtained in 2012, and for general corporate purposes. On May 29, 2013, PHI repaid the $250 million term loan with a portion of the net proceeds from the early termination of the cross-border energy lease investments.

Long-Term Project Funding

On October 24, 2013, Pepco Energy Services entered into an agreement with a lender to receive up to $8 million in construction financing at an interest rate of 4.68% for an energy savings project that is expected to be completed in 2014. The agreement includes a transfer of receivables from Pepco Energy Services to the lender after construction is completed, under which the customer would make contractual payments over a 23-year period to repay the financing. If there are shortfalls in Pepco Energy Services' energy savings guarantee or other performance obligations to the customer that reduce customer payments below the contractual payment amounts, then Pepco Energy Services would compensate the lender for the unpaid amounts. PHI has guaranteed the performance obligations of Pepco Energy Services under the financing agreement.

(11) INCOME TAXES

PHI and the majority of its subsidiaries file a consolidated federal income tax return. Federal income taxes are allocated among PHI and the subsidiaries included in its consolidated group pursuant to a written tax sharing agreement that was approved by the SEC in 2002 in connection with the establishment of PHI as a public utility holding company. Under this tax sharing agreement, PHI's consolidated federal income tax liability is allocated based upon PHI's and its subsidiaries' separate taxable income or loss.

The provision for consolidated income taxes, reconciliation of consolidated income tax expense, and components of consolidated deferred tax liabilities (assets) are shown below.

Provision for Consolidated Income Taxes – Continuing Operations

	For the Year Ended December 31,		
	2013	2012	2011
		(millions of dollars)	
Current Tax (Benefit) Expense			
Federal	$ (128)	$ (166)	$ (72)

Change in estimates and interest related to uncertain and effectively settled tax positions	56	13.1%	(8)	(2.6)%	(5)	(1.6)%
Establishment of valuation allowances related to deferred tax assets	101	23.5%	—	—	—	—
Other, net	(1)	(0.2)%	(9)	(2.9)%	(15)	(4.1)%
Consolidated Income Tax Expense Related to Continuing Operations	$319	74.4%	$103	32.1%	$114	33.9%

Year ended December 31, 2013

PHI's consolidated effective income tax rate for the year ended December 31, 2013 of 74.4% reflects a charge of $56 million for changes in estimates and interest related to uncertain and effectively settled tax positions recorded in the first quarter of 2013 and the establishment of valuation allowances of $101 million in the first quarter of 2013 against certain deferred tax assets in PCI, which is now included in Corporate and Other. The income tax charge of $56 million is primarily related to the anticipated additional interest expense on estimated federal and state income tax obligations that was allocated to PHI's continuing operations resulting from a change in assessment of tax benefits associated with the former cross-border energy lease investments of PCI.

Between 1990 and 1999, PCI, through various subsidiaries, entered into certain transactions involving investments in aircraft and aircraft equipment, railcars and other assets. In connection with these transactions, PCI recorded deferred tax assets in prior years of $101 million in the aggregate. Following events that took place during the first quarter of 2013, which included (i) court decisions in favor of the IRS with respect to both Consolidated Edison's cross-border lease transaction (as discussed in Note (19), "Discontinued Operations – Cross-Border Energy Lease Investments") and another taxpayer's structured transactions, (ii) the change in PHI's tax position with respect to the tax benefits associated with its cross-border energy leases, and (iii) PHI's decision in March 2013 to begin to pursue the early termination of its remaining cross-border energy lease investments (which represented a substantial portion of the remaining assets within PCI) without the intent to reinvest these proceeds in income-producing assets, management evaluated the likelihood that PCI would be able to realize the $101 million of deferred tax assets in the future. Based on this evaluation, PCI established valuation allowances against these deferred tax assets totaling $101 million in the first quarter of 2013. Further, during the fourth quarter of 2013, in light of additional court decisions in favor of the IRS involving other taxpayers, and after consideration of all relevant factors, management determined that it would abandon the further pursuit of these deferred tax assets, and these assets totaling $101 million were charged off against the previously established valuation allowances.

Year ended December 31, 2012

PHI's consolidated effective income tax rate for the year ended December 31, 2012 of 32.1% includes income tax benefits totaling $8 million related to uncertain and effectively settled tax positions, primarily due to the effective settlement with the IRS in the first quarter of 2012 with respect to the methodology used historically to calculate deductible mixed service costs and the expiration of the statute of limitations associated with an uncertain tax position in Pepco. The rate for the year ended December 31, 2012 also reflects an increase in deductible asset removal costs for Pepco in 2012 related to a higher level of asset retirements.

Year ended December 31, 2011

PHI's consolidated effective income tax rate for the year ended December 31, 2011 of 33.9% includes income tax benefits totaling $5 million related to uncertain and effectively settled tax positions. In 2011, PHI reached a settlement with the IRS with respect to interest due on its federal tax liabilities related to the November 2010 audit settlement for years 1996 through 2002. In connection with this agreement, PHI reallocated certain amounts that have been on deposit with the IRS since 2006 among liabilities in the settlement years and subsequent years and recorded the tax benefits, primarily in the second quarter of 2011.

In addition, as discussed further in Note (15), "Commitments and Contingencies – District of Columbia Tax Legislation," on June 14, 2011, the Council of the District of Columbia approved the Fiscal Year 2012 Budget Support Act of 2011 (the Budget Support Act). The Budget Support Act includes a provision that requires corporate taxpayers in the District of Columbia to calculate taxable income allocable or apportioned to the District by reference to the income and apportionment factors applicable to commonly controlled entities organized within the United States that are engaged in a unitary business. Previously, only the income of companies with direct nexus to the District of Columbia was taxed. As a result of the change, during 2011 PHI recorded additional state income tax expense of $2 million.

Components of Consolidated Deferred Tax Liabilities (Assets)

	At December 31,	
	2013	**2012**
	(millions of dollars)	
Deferred Tax Liabilities (Assets)		
Depreciation and other basis differences related to plant and equipment	$2,628	$2,299
Deferred electric service and electric restructuring liabilities	91	110
Cross-border energy lease investments	(6)	756
Federal and state net operating losses	(350)	(394)
Valuation allowances on state net operating losses	21	21
Pension and other postretirement benefits	135	128
Deferred taxes on amounts to be collected through future rates	75	58
Other (a)	285	204(b)
Total Deferred Tax Liabilities, net	2,879	3,182(b)
Deferred tax assets included in Current Assets	51	28
Deferred tax liabilities included in Other Current Liabilities	(2)	(2)
Total Consolidated Deferred Tax Liabilities, net non-current	$2,928	$3,208(b)

(a) PCI established valuation allowances against certain of these other deferred taxes totaling $101 million in the first quarter of 2013. Management determined during the fourth quarter of 2013 to abandon the further pursuit of the related deferred tax assets and, accordingly, these assets were charged off against the valuation allowances.

(b) The amounts for Other, Total Deferred Tax Liabilities, net and Total Consolidated Deferred Tax Liabilities, net non-current, are presented after the effect of the revision to prior period financial statements discussed in Note (2), " Significant Accounting Policies – Revision to Prior Period Financial Statements."

The net deferred tax liability represents the tax effect, at presently enacted tax rates, of temporary differences between the financial statement basis and tax basis of assets and liabilities. The portion of the net deferred tax liability applicable to PHI's utility operations, which has not been reflected in current service rates, represents income taxes recoverable through future rates, net, and is recorded as a Regulatory asset on the balance sheet. Federal and state net operating losses generally expire over 20 years from 2029 to 2032.

The Tax Reform Act of 1986 repealed the investment tax credit for property placed in service after December 31, 1985, except for certain transition property. Investment tax credits previously earned on Pepco's, DPL's and ACE's property continue to be amortized to income over the useful lives of the related property.

Reconciliation of Beginning and Ending Balances of Unrecognized Tax Benefits

	2013	2012	2011
		(millions of dollars)	
Balance as of January 1,	$200	$ 357	$395
Tax positions related to current year:			
Additions	3	1	2
Reductions	—	—	—
Tax positions related to prior years:			
Additions	646(a)	79	20
Reductions	(12)	(235)(b)	(57)
Settlements	(6)	(2)	(3)
Balance as of December 31,	$831	$ 200	$357

(a) These additions of unrecognized tax benefits in 2013 primarily relate to the cross-border energy lease investments of PCI.
(b) These reductions of unrecognized tax benefits in 2012 primarily relate to a resolution reached with the IRS for determining deductible mixed service costs for additions to property, plant and equipment.

Unrecognized Benefits That, If Recognized, Would Affect the Effective Tax Rate

Unrecognized tax benefits are related to tax positions that have been taken or are expected to be taken in tax returns that are not recognized in the financial statements because management has either measured the tax benefit at an amount less than the benefit claimed or expected to be claimed, or has concluded that it is not more likely than not that the tax position will be ultimately sustained. For the majority of these tax positions, the ultimate deductibility is highly certain, but there is uncertainty about the timing of such deductibility. Unrecognized tax benefits at December 31, 2013 included $9 million that, if recognized, would lower the effective tax rate.

Interest and Penalties

PHI recognizes interest and penalties relating to its uncertain tax positions as an element of income tax expense. For the years ended December 31, 2013, 2012 and 2011, PHI recognized $125 million of pre-tax interest expense ($75 million after-tax), $23 million of pre-tax interest income ($14 million after-tax), and $23 million of pre-tax interest income ($14 million after-tax), respectively, as a component of income tax expense related to continuing and discontinued operations. As of December 31, 2013, 2012 and 2011, PHI had accrued interest receivable of $2 million, accrued interest receivable of $10 million and accrued interest payable of $4 million, respectively, related to effectively settled and uncertain tax positions.

Possible Changes to Unrecognized Tax Benefits

It is reasonably possible that the amount of unrecognized tax benefits with respect to PHI's uncertain tax positions will significantly increase or decrease within the next 12 months. In order to mitigate the cost of continued litigation of tax matters related to the former cross-border energy lease investments, PHI and its subsidiaries have entered into discussions with the IRS with the intention of seeking a settlement of all tax issues for open tax years 2001 through 2011. PHI currently believes that it is possible that a settlement with the IRS may be reached in 2014, which could significantly impact the balances of unrecognized tax benefits and the related interest accruals. At this time, it is estimated that there will be a $700 million to $800 million decrease in unrecognized tax benefits within the next 12 months. See Note (15), "Commitments and Contingencies – PHI's Cross-Border Energy Lease Investments," for additional discussion.

Tax Years Open to Examination

PHI's federal income tax liabilities for Pepco legacy companies for all years through 2002, and for Conectiv legacy companies for all years through 2002, have been determined by the IRS, subject to adjustment to the extent of any net operating loss or other loss or credit carrybacks from subsequent years. PHI has not reached final settlement with the IRS with respect to the cross-border energy lease deductions. The open tax years for the significant states where PHI files state income tax returns (District of Columbia, Maryland, Delaware, New Jersey, Pennsylvania and Virginia) are the same as for the Federal returns.

Final IRS Regulations on Repair of Tangible Property

In September 2013, the IRS issued final regulations on expense versus capitalization of repairs with respect to tangible personal property. The regulations are effective for tax years beginning on or after January 1, 2014, and provide an option to early adopt the final regulations for tax years beginning on or after January 1, 2012. It is expected that the IRS will issue revenue procedures that will describe how taxpayers may implement the final regulations. The final repair regulations retain the operative rule that the Unit of Property for network assets is determined by the taxpayer's particular facts and circumstances except as provided in published guidance. In 2012, with the filing of its 2011 tax return, PHI filed a request for an automatic change in accounting method related to repairs of its network assets in accordance with IRS Revenue Procedure 2011-43. PHI does not expect the effects of the final regulations to be significant and will continue to evaluate the impact of the new guidance on its consolidated financial statements.

Other Taxes

Other taxes for continuing operations are shown below. The annual amounts include $422 million, $426 million and $445 million for the years ended December 31, 2013, 2012 and 2011, respectively, related to Power Delivery, which are recoverable through rates.

	2013	2012	2011
	(millions of dollars)		
Gross Receipts/Delivery	$133	$135	$145
Property	77	75	71
County Fuel and Energy	153	160	170
Environmental, Use and Other	65	62	65
Total	$428	$432	$451

(12) STOCK-BASED COMPENSATION, DIVIDEND RESTRICTIONS, AND CALCULATIONS OF EARNINGS PER SHARE OF COMMON STOCK

Stock-Based Compensation

Pepco Holdings maintains the 2012 Long-Term Incentive Plan (2012 LTIP), the successor plan to the Long-Term Incentive Plan (LTIP), the objective of which is to increase shareholder value by providing long-term and equity incentives to reward officers, key employees and non-employee directors of Pepco Holdings and its subsidiaries and to increase the ownership of Pepco Holdings common stock by such individuals. Any officer, key employee or non-employee director of Pepco Holdings or its subsidiaries may be designated as a participant. Under these plans, awards to officers, key employees and non-employee directors may be in the form of restricted stock, restricted stock units, stock options, performance shares and/or units, stock appreciation rights, unrestricted stock and dividend equivalents. At inception, 10 million and 8 million shares of common stock were authorized for issuance under the LTIP and the 2012 LTIP, respectively. The LTIP expired in accordance with its terms in 2012 and no new awards may be granted thereunder.

Total stock-based compensation expense recorded in the consolidated statements of (loss) income for the years ended December 31, 2013, 2012 and 2011 was $12 million, $11 million and $6 million, respectively, all of which was associated with restricted stock unit and unrestricted stock awards.

No material amount of stock compensation expense was capitalized for the years ended December 31, 2013, 2012 and 2011.

Restricted Stock and Restricted Stock Unit Awards

Description of Awards

A number of programs have been established under the LTIP and the 2012 LTIP involving the issuance of restricted stock and restricted stock unit awards, including awards of performance-based restricted stock units, time-based restricted stock and restricted stock units, and retention restricted stock and restricted stock units. A summary of each of these programs is as follows:

- Under the performance-based program, performance criteria are selected and measured over the specified performance period. Depending on the extent to which the performance criteria are satisfied, the participants are eligible to earn shares of common stock at the end of the performance period, ranging from 25% to 200% of the target award, and dividend equivalents accrued thereon.
- Generally, time-based restricted stock and restricted stock unit award opportunities have a requisite service period of up to three years and, with respect to restricted stock awards, participants have the right to receive dividends on the shares during the vesting period. Under restricted stock unit awards, dividends are credited quarterly in the form of additional restricted stock units, which are paid when vested at the end of the service period.
- In January, April and September 2012, four retention awards in the form of 150,330 time-based and performance-based restricted stock units and 5,305 shares of unrestricted stock were granted to certain PHI executives. In January and February 2013, two retention awards in the form of 45,444 performance-based restricted stock units were granted to certain PHI executives. The time-based retention awards vest at varying rates over a period of three years, and the performance-based retention awards have a one-year performance period and are subject to the continued employment of the executive at the end of the performance period.
- In 2013 and 2012, restricted stock units totaling 37,735 and 40,749, respectively, were granted to PHI's non-employee directors under the 2012 LTIP. These restricted stock units vest over a service period which ends upon the first to occur of (i) one year after the date of grant or (ii) the date of the next annual meeting of stockholders. These awards represent the equity portion of the annual retainer paid to non-employee directors for their service as a director of PHI.

Activity for the year

The 2013 activity for non-vested, time-based restricted stock, restricted stock units and performance-based restricted stock unit awards, including retention awards, is summarized in the table below. For performance-based restricted stock unit awards, the table reflects awards projected, for purposes of computing the weighted average grant date fair value, to achieve 100% of targeted performance criteria for each outstanding award cycle.

	Number of Shares	Weighted Average Grant Date Fair Value
Balance as of January 1, 2013		
Time-based restricted stock	134,607	$ 16.56
Time-based restricted stock units	513,204	19.42
Performance-based restricted stock units	1,032,396	20.34
Total	1,680,207	
Granted during 2013		
Time-based restricted stock units	237,733	19.70
Performance-based restricted stock units	444,969	17.03
Total	682,702	
Vested during 2013		
Time-based restricted stock	(134,607)	16.56
Time-based restricted stock units	(123,021)	18.45
Performance-based restricted stock units	(314,995)	20.00
Total	(572,623)	
Forfeited during 2013		
Time-based restricted stock units	(44,362)	19.64
Performance-based restricted stock units	(92,540)	19.91
Total	(136,902)	
Balance as of December 31, 2013		
Time-based restricted stock	—	—
Time-based restricted stock units	583,554	19.34
Performance-based restricted stock units	1,069,830	19.06
Total	1,653,384	

Grants included in the table above reflect 2013 grants of performance-based and time-based restricted stock units, including retention awards. PHI recognizes compensation expense related to performance-based restricted stock unit awards and time-based restricted stock and restricted stock unit awards based on the fair value of the awards at date of grant. The fair value is based on the market value of PHI common stock at the date the award opportunity is granted. The estimated fair value of the performance-based awards is also a function of PHI's projected future performance relative to established performance criteria and the resulting payout of shares based on the achieved performance levels. PHI employed a Monte Carlo simulation to forecast PHI's performance relative to the performance criteria and to estimate the potential payout of shares under the performance-based awards.

The following table provides the weighted average grant date fair value per share of those awards granted during each of the years ended December 31, 2013, 2012 and 2011:

	2013	2012	2011
Weighted average grant-date fair value of each unrestricted stock award granted during the year	$ —	$18.85	$ —
Weighted average grant-date fair value of each time-based restricted stock unit award granted during the year	$19.70	$19.69	$18.87
Weighted average grant-date fair value of each performance-based restricted stock unit award granted during the year	$17.03	$21.13	$19.56

As of December 31, 2013, there was approximately $11 million of future compensation cost (net of estimated forfeitures) related to restricted stock unit awards granted under the LTIP and the 2012 LTIP that PHI expects to recognize over a weighted-average period of approximately two years.

Stock Options

Stock options to purchase shares of PHI's common stock granted under the LTIP and the 2012 LTIP must have an exercise price at least equal to the fair market value of the underlying stock on the grant date. Stock options generally become exercisable on a specified vesting date or dates. All stock options must have an expiration date of no greater than ten years from the date of grant. No options have been granted under the LTIP or the 2012 LTIP since 2002. As of December 31, 2012, all outstanding stock options under predecessor plans have vested or expired. Total intrinsic value and tax benefits recognized for stock options exercised in 2012 and 2011 were immaterial.

Directors' Deferred Compensation

Under the Pepco Holdings' Executive and Director Deferred Compensation Plan, Pepco Holdings non-employee directors may elect to defer all or part of their cash retainer and meeting fees. Deferred retainer or meeting fees, at the election of the director, can be credited with interest at the prime rate or the return on selected investment funds or can be deemed invested in phantom shares of Pepco Holdings common stock on which dividend equivalent accruals are credited when dividends are paid on the common stock (or a combination of these options). All deferrals are settled in cash. The amount deferred by directors for each of the years ended December 31, 2013, 2012 and 2011 was not material.

Compensation expense recognized in respect of dividends and the increase in fair value for each of the years ended December 31, 2013, 2012 and 2011 was not material. The deferred compensation balances under this program were approximately $2 million and $1 million at December 31, 2013 and 2012, respectively.

A separate deferral option under the 2012 LTIP gives non-employee directors the right to elect to defer the receipt of common stock upon vesting of restricted stock unit awards.

Dividend Restrictions

PHI, on a stand-alone basis, generates no operating income of its own. Accordingly, its ability to pay dividends to its shareholders depends on dividends received from its subsidiaries. In addition to their future financial performance, the ability of PHI's direct and indirect subsidiaries to pay dividends is subject to limits imposed by: (i) state corporate laws, which impose limitations on the funds that can be used to pay dividends and, in the case of ACE, the regulatory requirement that it obtain the prior approval of the NJBPU before dividends can be paid if its equity as a percent of its total capitalization, excluding securitization debt, falls below 30%; (ii) the prior rights of holders of mortgage bonds and other long-term debt issued by the subsidiaries, and any other restrictions imposed in connection with the incurrence of liabilities; and (iii) certain provisions of ACE's charter that impose restrictions on payment of common stock dividends for the benefit of preferred stockholders. Pepco, DPL and ACE have no shares of preferred stock outstanding at December 31, 2013. Currently, the capitalization ratio limitation to which ACE is subject and the restriction in the ACE charter do not limit ACE's ability to pay common stock dividends. PHI had approximately $595 million and $1,077 million of retained earnings free of restrictions at December 31, 2013 and 2012, respectively. These amounts represent the total retained earnings balances at those dates.

For the years ended December 31, 2013, 2012 and 2011, dividends paid by PHI's subsidiaries were as follows:

Subsidiary	2013	2012	2011
		(millions of dollars)	
Pepco (paid to PHI)	$ 46	$ 35	$ 25
DPL (paid to Conectiv)	30	—	60
ACE (paid to Conectiv)	60	35	—
Total	$136	$ 70	$ 85

Calculations of Earnings per Share of Common Stock

The numerator and denominator for basic and diluted earnings per share of common stock calculations are shown below.

	For the Years Ended December 31,		
	2013	2012	2011
	(millions of dollars, except per share data)		
Income (Numerator):			
Net income from continuing operations	$ 110	$ 218	$ 222
Net (loss) income from discontinued operations	(322)	67	35
Net (loss) income	$ (212)	$ 285	$ 257
Shares (Denominator) (in millions):			
Weighted average shares outstanding for basic computation:			
Average shares outstanding	246	229	226
Adjustment to shares outstanding	—	—	—
Weighted Average Shares Outstanding for Computation of Basic Earnings Per Share of Common Stock	246	229	226
Net effect of potentially dilutive shares (a)	—	1	—
Weighted Average Shares Outstanding for Computation of Diluted Earnings Per Share of Common Stock	246	230	226
Basic earnings per share of common stock from continuing operations	$ 0.45	$ 0.95	$ 0.98
Basic (loss) earnings per share of common stock from discontinued operations	(1.31)	0.30	0.16
Basic (loss) earnings per share	$ (0.86)	$ 1.25	$ 1.14
Diluted earnings per share of common stock from continuing operations	$ 0.45	$ 0.95	$ 0.98
Diluted (loss) earnings per share of common stock from discontinued operations	(1.31)	0.29	0.16
Diluted (loss) earnings per share	$ (0.86)	$ 1.24	$ 1.14

(a) The number of options to purchase shares of common stock that were excluded from the calculation of diluted earnings per share as they are considered to be anti-dilutive were zero, zero and 14,900 for the years ended December 31, 2013, 2012 and 2011, respectively.

Equity Forward Transaction

During 2012, PHI entered into an equity forward transaction in connection with a public offering of PHI common stock. Pursuant to the terms of this transaction, a forward counterparty borrowed 17,922,077 shares of PHI's common stock from third parties and sold them to a group of underwriters for $19.25 per share, less an underwriting discount equal to $0.67375 per share. Under the terms of the equity forward transaction, upon physical settlement thereof, PHI was required to issue and deliver shares of PHI common stock to the forward counterparty at the then applicable forward sale price. The forward sale price was initially determined to be $18.57625 per share at the time the equity forward transaction was entered into and was subject to reduction from time to time in accordance with the terms of the equity forward transaction. PHI believed that the equity forward transaction substantially eliminated future equity price risk because the forward sale price was determinable as of the date that PHI entered into the equity forward transaction and was only reduced pursuant to the contractual terms of the equity forward transaction through the settlement date, which reductions were not affected by a future change in the market price of the PHI common stock. On February 27, 2013, PHI physically settled the equity forward at the then applicable forward sale price of $17.39 per share. The proceeds of approximately $312 million were used to repay outstanding commercial paper, a portion of which had been issued in order to make capital contributions to the utilities, and for general corporate purposes.

Direct Stock Purchase and Dividend Reinvestment Plan

PHI maintains a Direct Stock Purchase and Dividend Reinvestment Plan (DRP) through which participants may reinvest cash dividends. In addition, participants can make purchases of shares of PHI common stock through the investment of not less than $25 per purchase nor more than $300,000 each calendar year. Shares of common stock purchased through the DRP may be new shares, treasury shares held by PHI, or, at the election of PHI, shares purchased in the open market. Approximately 2 million new shares were issued and sold under the DRP in each of 2013, 2012 and 2011.

Pepco Holdings Common Stock Reserved and Unissued

The following table presents Pepco Holdings' common stock reserved and unissued at December 31, 2013:

Name of Plan	Number of Shares
DRP	6,104,591
Pepco Holdings Long-Term Incentive Plan (a)	7,450,404
Pepco Holdings 2012 Long-Term Incentive Plan	7,971,832
Pepco Holdings Non-Management Directors Compensation Plan	457,211
Pepco Holdings Retirement Savings Plan	4,585,079
Total	26,569,117

(a) No further awards will be made under this plan.

(13) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Derivative Instruments

DPL uses derivative instruments in the form of swaps and over-the-counter options primarily to reduce natural gas commodity price volatility and to limit its customers' exposure to increases in the market price of natural gas under a hedging program approved by the DPSC. DPL uses these derivatives to manage the commodity price risk associated with its physical natural gas purchase contracts. All premiums paid and other transaction costs incurred as part of DPL's natural gas hedging activity, in addition to all gains and losses related to hedging activities, are deferred under FASB guidance on regulated operations (ASC 980) until recovered from its customers through a fuel adjustment clause approved by the DPSC. The natural gas purchase contracts qualify as normal purchases, which are not required to be recorded in the financial statements until settled.

ACE was ordered to enter into the SOCAs by the NJBPU, and under the SOCAs, ACE would have received payments from or made payments to electric generation facilities based on i) the difference between the fixed price in the SOCAs and the price for capacity that clears PJM and ii) ACE's annual proportion of the total New Jersey load relative to the other EDCs in New Jersey. ACE began applying derivative accounting to two of its SOCAs as of June 30, 2012 because these generators cleared the 2015-2016 PJM capacity auction in May 2012. The fair value of the derivatives embedded in these SOCAs were deferred as regulatory assets or regulatory liabilities because the NJBPU allowed full recovery from ACE's distribution customers for any payments made by ACE, and ACE's distribution customers would be entitled to payments received by ACE. As further discussed in Note (7), "Regulatory Matters," in light of a Federal district court order, which ruled that the SOCAs are void, invalid and unenforceable, and ACE's subsequent termination of the SOCAs in the fourth quarter of 2013, ACE derecognized the derivative assets and derivative liabilities related to the SOCAs.

The tables below identify the balance sheet location and fair values of derivative instruments as of December 31, 2013 and 2012:

	As of December 31, 2013				
Balance Sheet Caption	**Derivatives Designated as Hedging Instruments**	**Other Derivative Instruments**	**Gross Derivative Instruments**	**Effects of Cash Collateral and Netting**	**Net Derivative Instruments**
			(millions of dollars)		
Derivative assets (current assets)	$ —	$ 1	$ 1	$ (1)	$ —

Cash Flow Hedges

Power Delivery

All premiums paid and other transaction costs incurred as part of DPL's natural gas hedging activity, in addition to all of DPL's gains and losses related to hedging activities, are deferred under FASB guidance on regulated operations until recovered from customers based on the fuel adjustment clause approved by the DPSC. For the years ended December 31, 2013, 2012 and 2011, DPL had no net unrealized derivative losses and zero, zero and $5 million, respectively, of net realized losses associated with cash flow hedges recognized in the consolidated statements of (loss) income (through Fuel and purchased energy expense) that were deferred as Regulatory assets.

Cash Flow Hedges Included in Accumulated Other Comprehensive Loss

PHI also may use derivative instruments from time to time to mitigate the effects of fluctuating interest rates on debt issued in connection with the operation of its businesses. In June 2002, PHI entered into several treasury rate lock transactions in anticipation of the issuance of several series of fixed-rate debt commencing in August 2002. Upon issuance of the fixed-rate debt in August 2002, the treasury rate locks were terminated at a loss. The loss has been deferred in AOCL and is being recognized in interest expense over the life of the debt issued as interest payments are made.

The tables below provide details regarding terminated cash flow hedges included in PHI's consolidated balance sheets as of December 31, 2013 and 2012. The data in the following tables indicate the cumulative net loss after-tax related to terminated cash flow hedges by contract type included in AOCL, the portion of AOCL expected to be reclassified to income during the next 12 months, and the maximum hedge or deferral term:

	As of December 31, 2013		
Contracts	**Accumulated Other Comprehensive Loss After-tax**	**Portion Expected to be Reclassified to Income during the Next 12 Months**	**Maximum Term**
	(millions of dollars)		
Interest rate	$ 9	$ 1	224 months
Total	$ 9	$ 1	

	As of December 31, 2012		
Contracts	**Accumulated Other Comprehensive Loss After-tax**	**Portion Expected to be Reclassified to Income during the Next 12 Months**	**Maximum Term**
	(millions of dollars)		
Interest rate	$ 10	$ 1	236 months
Total	$ 10	$ 1	

Other Derivative Activity

DPL and ACE have certain derivatives that are not in hedge accounting relationships and are not designated as normal purchases or normal sales. These derivatives are recorded at fair value on the consolidated balance sheets with the gain or loss for changes in fair value recorded in income. In accordance with FASB guidance on regulated operations, offsetting regulatory liabilities or regulatory assets are recorded on the consolidated balance sheets and the recognition of the derivative gain or loss is deferred because of the DPSC-approved fuel adjustment clause for DPL's derivatives and the NJBPU order (prior to the order in October 2013 of a Federal district court as described in Note (7), "Regulatory Matters" which caused ACE to derecognize the derivative assets and derivative liabilities related to the SOCAs in the fourth quarter of 2013) pertaining to the SOCAs within which ACE's capacity derivatives are embedded. The following table indicates the net unrealized and net realized derivative gains and (losses) arising during the period associated with these derivatives that were recognized in the consolidated statements of (loss) income (through Fuel and purchased energy expense) and that were also deferred as Regulatory assets for the years ended December 31, 2013, 2012 and 2011:

	For the Year Ended December 31,		
	2013	2012	2011
	(millions of dollars)		
Net unrealized gain (loss) arising during the period	$ 4	$ (6)	$(13)
Net realized loss recognized during the period	(4)	(16)	(22)

As of December 31, 2013 and 2012, the quantities and positions of DPL's net outstanding natural gas commodity forward contracts and ACE's capacity derivatives associated with the SOCAs that did not qualify for hedge accounting were:

	December 31, 2013		December 31, 2012	
Commodity	Quantity	Net Position	Quantity	Net Position
DPL—Natural gas (one Million British Thermal Units (MMBtu))	3,977,500	Long	3,838,000	Long
ACE—Capacity (MWs)	—	—	180	Long

Contingent Credit Risk Features

The primary contracts used by the Power Delivery segment for derivative transactions are entered into under the International Swaps and Derivatives Association Master Agreement (ISDA) or similar agreements that closely mirror the principal credit provisions of the ISDA. The ISDAs include a Credit Support Annex (CSA) that governs the mutual posting and administration of collateral security. The failure of a party to comply with an obligation under the CSA, including an obligation to transfer collateral security when due or the failure to maintain any required credit support, constitutes an event of default under the ISDA for which the other party may declare an early termination and liquidation of all transactions entered into under the ISDA, including foreclosure against any collateral security. In addition, some of the ISDAs have cross default provisions under which a default by a party under another commodity or derivative contract, or the breach by a party of another borrowing obligation in excess of a specified threshold, is a breach under the ISDA.

Under the ISDA or similar agreements, the parties establish a dollar threshold of unsecured credit for each party in excess of which the party would be required to post collateral to secure its obligations to the other party. The amount of the unsecured credit threshold varies according to the senior, unsecured debt rating of the respective parties or that of a guarantor of the party's obligations. The fair values of all transactions between the parties are netted under the master netting provisions. Transactions may include derivatives accounted for on-balance sheet as well as those designated as normal purchases and normal sales that are accounted for off-balance sheet. If the aggregate fair value of the transactions in a net loss position exceeds the unsecured credit threshold, then collateral is required to be posted in an amount equal to the amount by which the unsecured credit threshold is exceeded. The obligations of DPL are stand-alone obligations without the guarantee of PHI. If DPL's debt rating were to fall below "investment grade," the unsecured credit threshold would typically be set at zero and collateral would be required for the entire net loss position. Exchange-traded contracts are required to be fully collateralized without regard to the credit rating of the holder.

The gross fair values of DPL's derivative liabilities with credit risk-related contingent features as of December 31, 2013 and 2012, were zero and $4 million, respectively, before giving effect to offsetting transactions or collateral under master netting agreements. As of December 31, 2013 and 2012, DPL had posted no cash collateral against its gross derivative liability. If DPL's debt ratings had been downgraded below investment grade as of December 31, 2013 and 2012, DPL's net settlement amounts, including both the fair value of its derivative liabilities and its normal purchase and normal sale contracts would have been approximately zero and $2 million, respectively, and DPL would have been required to post collateral with the counterparties of approximately zero and $2 million, respectively. The net settlement and additional collateral amounts reflect the effect of offsetting transactions under master netting agreements.

DPL's primary source for posting cash collateral or letters of credit is PHI's credit facility, under which DPL is a borrower. As of December 31, 2013 and 2012, the aggregate amount of cash plus borrowing capacity under the credit facility available to meet the future liquidity needs of PHI's utility subsidiaries was $332 million and $477 million, respectively.

(14) FAIR VALUE DISCLOSURES

Financial Instruments Measured at Fair Value on a Recurring Basis

PHI applies FASB guidance on fair value measurement and disclosures (ASC 820) that established a framework for measuring fair value and expanded disclosures about fair value measurements. As defined in the guidance, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). PHI utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated or generally unobservable. Accordingly, PHI utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The guidance establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3).

The following tables set forth, by level within the fair value hierarchy, PHI's financial assets and liabilities that were accounted for at fair value on a recurring basis as of December 31, 2013 and 2012. As required by the guidance, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. PHI's assessment of the significance of a particular input to the fair value measurement requires the exercise of judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

Description	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1) (a)	Significant Other Observable Inputs (Level 2) (a)	Significant Unobservable Inputs (Level 3)
	Fair Value Measurements at December 31, 2013 (millions of dollars)			
ASSETS				
Derivative instruments (b)				
Natural gas (c)	$ 1	$ 1	$ —	$ —
Restricted cash and cash equivalents				
Treasury fund	34	34	—	—
Executive deferred compensation plan assets

Natural gas (c)	$ 4	$ —	$ —	$ 4
Capacity (d)	11	—	—	11
Executive deferred compensation plan liabilities				
Life insurance contracts	28	—	28	—
	$ 43	$ —	$ 28	$ 15

(a) There were no transfers of instruments between level 1 and level 2 valuation categories during the year ended December 31, 2012.
(b) The fair values of derivative assets and liabilities reflect netting by counterparty before the impact of collateral.
(c) Represents natural gas options purchased by DPL as part of a natural gas hedging program approved by the DPSC.
(d) Represents derivatives associated with the ACE SOCAs.

PHI classifies its fair value balances in the fair value hierarchy based on the observability of the inputs used in the fair value calculation as follows:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis, such as the New York Mercantile Exchange (NYMEX).

Level 2 – Pricing inputs are other than quoted prices in active markets included in level 1, which are either directly or indirectly observable as of the reporting date. Level 2 includes those financial instruments that are valued using broker quotes in liquid markets and other observable data. Level 2 also includes those financial instruments that are valued using methodologies that have been corroborated by observable market data through correlation or by other means. Significant assumptions are observable in the marketplace throughout the full term of the instrument and can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace.

Executive deferred compensation plan assets and liabilities categorized as level 2 consist of life insurance policies and certain employment agreement obligations. The life insurance policies are categorized as level 2 assets because they are valued based on the assets underlying the policies, which consist of short-term cash equivalents and fixed income securities that are priced using observable market data and can be liquidated for the value of the underlying assets as of December 31, 2013. The level 2 liability associated with the life insurance policies represents a deferred compensation obligation, the value of which is tracked via underlying insurance sub-accounts. The sub-accounts are designed to mirror existing mutual funds and money market funds that are observable and actively traded.

The value of certain employment agreement obligations (which are included with life insurance contracts in the tables above) is derived using a discounted cash flow valuation technique. The discounted cash flow calculations are based on a known and certain stream of payments to be made over time that are discounted to determine their net present value. The primary variable input, the discount rate, is based on market-corroborated and observable published rates. These obligations have been classified as level 2 within the fair value hierarchy because the payment streams represent contractually known and certain amounts and the discount rate is based on published, observable data.

Level 3 – Pricing inputs that are significant and generally less observable than those from objective sources. Level 3 includes those financial instruments that are valued using models or other valuation methodologies.

Derivative instruments categorized as level 3 include natural gas options used by DPL as part of a natural gas hedging program approved by the DPSC and capacity under the SOCAs entered into by ACE:

- DPL applies a Black-Scholes model to value its options with inputs, such as forward price curves, contract prices, contract volumes, the risk-free rate and implied volatility factors that are based on a range of historical NYMEX option prices. DPL maintains valuation policies and procedures and reviews the validity and relevance of the inputs used to estimate the fair value of its options. As of December 31, 2013, all of these contracts classified as level 3 derivative instruments have settled.
- ACE used a discounted cash flow methodology to estimate the fair value of the capacity derivatives embedded in the SOCAs. ACE utilized an external valuation specialist to estimate annual zonal PJM capacity prices through the 2030-2031 auction. The capacity price forecast was based on various assumptions that impact the cost of constructing new generation facilities, including zonal load forecasts, zonal fuel and energy prices, generation capacity and transmission planning, and environmental legislation and regulation. ACE reviewed the assumptions and resulting capacity price forecast for reasonableness. ACE used the capacity price forecast to estimate future cash flows. A significant change in the forecasted prices would have a significant

impact on the estimated fair value of the SOCAs. ACE employed a discount rate reflective of the estimated weighted average cost of capital for merchant generation companies since payments under the SOCAs are contingent on providing generation capacity. As further discussed in Note (7), "Regulatory Matters," ACE derecognized the derivative assets and derivative liabilities related to the SOCAs in the fourth quarter of 2013.

The tables below summarize the primary unobservable inputs used to determine the fair value of PHI's level 3 instruments and the range of values that could be used for those inputs as of December 31, 2012:

Type of Instrument	Fair Value at December 31, 2012 (millions of dollars)	Valuation Technique	Unobservable Input	Range
Natural gas options	$ (4)	Option model	Volatility factor	1.57 - 2.00
Capacity contracts, net	(3)	Discounted cash flow	Discount rate	5% - 9%

PHI used values within these ranges as part of its fair value estimates. A significant change in any of the unobservable inputs within these ranges would have an insignificant impact on the reported fair value as of December 31, 2012.

Executive deferred compensation plan assets include certain life insurance policies that are valued using the cash surrender value of the policies, net of loans against those policies. The cash surrender values do not represent a quoted price in an active market; therefore, those inputs are unobservable and the policies are categorized as level 3. Cash surrender values are provided by third parties and reviewed by PHI for reasonableness.

Reconciliations of the beginning and ending balances of PHI's fair value measurements using significant unobservable inputs (Level 3) for the years ended December 31, 2013 and 2012 are shown below:

	Year Ended December 31, 2013			Year Ended December 31, 2012		
	Natural Gas	Life Insurance Contracts	Capacity	Natural Gas	Life Insurance Contracts	Capacity
	(millions of dollars)			(millions of dollars)		
Balance as of January 1	$ (4)	$ 18	$ (3)	$ (15)	$ 17	$ —
Total gains (losses) (realized and unrealized):						
Included in income	—	4	—	—	4	—
Included in accumulated other comprehensive loss	—	—	—	—	—	—
Included in regulatory liabilities	—	—	3	(2)	—	(3)
Purchases	—	—	—	—	—	—
Issuances	—	(3)	—	—	(3)	—
Settlements	4	—	—	13	—	—
Transfers in (out) of level 3	—	—	—	—	—	—
Balance as of December 31	$ —	$ 19	$ —	$ (4)	$ 18	$ (3)

The breakdown of realized and unrealized gains or (losses) on level 3 instruments included in income as a component of Other income or Other operation and maintenance expense for the periods below were as follows:

	Year Ended December 31, 2013	2012
	(millions of dollars)	
Total net gains included in income for the period	$ 4	$ 4
Change in unrealized gains relating to assets still held at reporting date	$ 4	$ 4

Other Financial Instruments

The estimated fair values of PHI's Long-term debt instruments that are measured at amortized cost in PHI's consolidated financial statements and the associated level of the estimates within the fair value hierarchy as of December 31, 2013 and 2012 are shown in the tables below. As required by the fair value measurement guidance, debt instruments are classified in their entirety within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. PHI's assessment of the significance of a particular input to the fair value measurement requires the exercise of judgment, which may affect the valuation of fair value debt instruments and their placement within the fair value hierarchy levels.

The fair value of Long-term debt and Transition Bonds categorized as level 2 is based on a blend of quoted prices for the debt and quoted prices for similar debt on the measurement date. The blend places more weight on current pricing information when determining the final fair value measurement. The fair value information is provided by brokers, and PHI reviews the methodologies and results.

The fair value of Long-term debt categorized as level 3 is based on a discounted cash flow methodology using observable inputs, such as the U.S. Treasury yield, and unobservable inputs, such as credit spreads, because quoted prices for the debt or similar debt in active markets were insufficient. The Long-term project funding represents debt instruments issued by Pepco Energy Services related to its energy savings contracts. Long-term project funding is categorized as level 3 because PHI concluded that the amortized cost carrying amounts for these instruments approximates fair value, which does not represent a quoted price in an active market.

	Fair Value Measurements at December 31, 2013			
Description	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(millions of dollars)			
LIABILITIES				
Debt instruments				
Long-term debt (a)	$ 4,850	$ —	$ 4,289	$ 561
Transition Bonds (b)	284	—	284	—
Long-term project funding	12	—	—	12
	$ 5,146	$ —	$ 4,573	$ 573

(a) The carrying amount for Long-term debt is $4,456 million as of December 31, 2013.
(b) The carrying amount for Transition Bonds, including amounts due within one year, is $255 million as of December 31, 2013.

Description	Total	Fair Value Measurements at December 31, 2012 Quoted Prices in Active Markets for Identical Instruments (Level 1) (a)	Significant Other Observable Inputs (Level 2) (a)	Significant Unobservable Inputs (Level 3)
		(millions of dollars)		
LIABILITIES				
Debt instruments				
Long-term debt (b)	$ 5,004	$ —	$ 4,517	$ 487
Transition Bonds (c)	341	—	341	—
Long-term project funding	13	—	—	13
	$ 5,358	$ —	$ 4,858	$ 500

(a) Certain debt instruments that were categorized as level 1 at December 31, 2012, have been reclassified as level 2 to conform to the current period presentation.
(b) The carrying amount for Long-term debt is $4,177 million as of December 31, 2012.
(c) The carrying amount for Transition Bonds, including amounts due within one year, is $295 million as of December 31, 2012.

The carrying amounts of all other financial instruments in the accompanying consolidated financial statements approximate fair value.

(15) COMMITMENTS AND CONTINGENCIES

General Litigation and Other Matters

From time to time, PHI and its subsidiaries are named as defendants in litigation, usually relating to general liability or auto liability claims that resulted in personal injury or property damage to third parties. PHI and each of its subsidiaries are self-insured against such claims up to a certain self-insured retention amount and maintain insurance coverage against such claims at higher levels, to the extent deemed prudent by management. In addition, PHI’s contracts with its vendors generally require the vendors to name PHI and/or its subsidiaries as additional insureds for the amounts at least equal to PHI’s self-insured retention. Further, PHI’s contracts with its vendors require the vendors to indemnify PHI for various acts and activities that may give rise to claims against PHI. Loss contingency liabilities for both asserted and unasserted claims are recognized if it is probable that a loss will result from such a claim and if the amounts of the losses can be reasonably estimated. Although the outcome of the claims and proceedings cannot be predicted with any certainty, management believes that there are no existing claims or proceedings that are likely to have a material adverse effect on PHI’s or its subsidiaries’ financial condition, results of operations or cash flows. At December 31, 2013, PHI had loss contingency liabilities for general litigation totaling approximately $30 million (including amounts related to the matters specifically described below) and the portion of these loss contingency liabilities in excess of the self-insured retention amount was substantially offset by insurance receivables.

Pepco Substation Injury Claim

In May 2013, a contract worker erecting a scaffold at a Pepco substation came into contact with an energized station service feeder and suffered serious injuries. In August 2013, the individual filed suit against Pepco in the Circuit Court for Montgomery County, Maryland, seeking damages for medical expenses, loss of future earning capacity, pain and suffering and the cost of a life care plan aggregating to a maximum claim of approximately $28.1 million. Discovery is ongoing in the case and, if a settlement cannot be reached with respect to this matter, a trial is expected to begin in October 2014. Pepco has notified its insurers of the incident and believes that the insurance policies in force at the time of the incident, including the policies of the contractor performing the scaffold work (which name Pepco as an additional insured), will offset substantially all of Pepco’s costs associated with the resolution of this matter, including Pepco’s self-insured retention amount. At December 31, 2013, Pepco has concluded that a loss is probable with respect to this matter and has recorded an estimated loss contingency liability, which is included in the liability for general litigation referred to above as of December 31, 2013. Pepco has also concluded as of December 31, 2013 that realization of its insurance claims associated with this matter is probable and, accordingly, has recorded an estimated insurance receivable offsetting substantially all of the related loss contingency liability.

ACE Asbestos Claim

In September 2011, an asbestos complaint was filed in the New Jersey Superior Court, Law Division, against ACE (among other defendants) asserting claims under New Jersey's Wrongful Death and Survival statutes. The complaint, filed by the estate of a decedent who was the wife of a former employee of ACE, alleges that the decedent's mesothelioma was caused by exposure to asbestos brought home by her husband on his work clothes. New Jersey courts have recognized a cause of action against a premise owner in a so-called "take home" case if it can be shown that the harm was foreseeable. In this case, the complaint seeks recovery of an unspecified amount of damages for, among other things, the decedent's past medical expenses, loss of earnings, and pain and suffering between the time of injury and death, and asserts a punitive damage claim. At December 31, 2013, ACE has concluded that a loss is probable with respect to this matter and has recorded an estimated loss contingency liability, which is included in the liability for general litigation referred to above as of December 31, 2013. However, due to the inherent uncertainty of litigation, ACE is unable to estimate a maximum amount of possible loss because the damages sought are indeterminate and the matter involves facts that ACE believes are distinguishable from the facts of the "take-home" cause of action recognized by the New Jersey courts.

ACE Electrical Contact Injury Claims

In October 2010, a farm combine came into and remained in contact with a primary electric line in ACE's service territory in New Jersey. As a result, two individuals operating the combine received fatal electrical contact injuries. While attempting to rescue those two individuals, another individual sustained third-degree burns to his torso and upper extremities. In September 2012, the individual who received third-degree burns filed suit in New Jersey Superior Court, Salem County. In October 2012, additional suits were filed in the same court by or on behalf of the estates of the deceased individuals. Plaintiffs in each of the cases are seeking indeterminate damages and allege that ACE was negligent in the design, construction, erection, operation and maintenance of its poles, power lines, and equipment, and that ACE failed to warn and protect the public from the foreseeable dangers of farm equipment contacting electric lines. Discovery is ongoing in this matter and the litigation involves a number of other defendants and the filing of numerous cross-claims. ACE has notified its insurers of the incident and believes that the insurance policies in force at the time of the incident will offset ACE's costs associated with the resolution of this matter in excess of ACE's self-insured retention amount. At December 31, 2013, ACE has concluded that a loss is probable with respect to these claims and has recorded an estimated loss contingency liability, which is included in the liability for general litigation referred to above as of December 31, 2013. ACE has also concluded as of December 31, 2013 that realization of its insurance claims associated with this matter is probable and, accordingly, has recorded an estimated insurance receivable offsetting substantially all of the loss contingency liability in excess of ACE's self-insured retention amount.

Pepco Energy Services Billing Claims

During 2012, Pepco Energy Services received letters on behalf of two school districts in Maryland, which claim that invoices in connection with electricity supply contracts contained certain allegedly unauthorized charges, totaling approximately $7 million. The school districts also claim additional compounded interest totaling approximately $9 million. Although no litigation involving Pepco Energy Services related to these claims has commenced, in August and September 2013, Pepco Energy Services received correspondence from the Superintendent of each of the school districts advising of the intention to render a decision regarding an unresolved dispute between the school district and Pepco Energy Services. Pepco Energy Services filed timely answers to the Superintendents challenging the authority of the respective Superintendents to render decisions on the claims and also disputing the merits of the allegations regarding unauthorized charges as well as the claims of entitlement to compounded interest. To date, one of the two districts has submitted a late response to the answer of Pepco Energy Services maintaining that its Superintendent does have authority to render a decision but acknowledging the availability of administrative and judicial review of the merits of any decision. The response of the other district is overdue. As of December 31, 2013, Pepco Energy Services has concluded that a loss is reasonably possible with respect to these claims, but the amount of loss, if any, is not reasonably estimable.

Environmental Matters

PHI, through its subsidiaries, is subject to regulation by various federal, regional, state and local authorities with respect to the environmental effects of its operations, including air and water quality control, solid and hazardous waste disposal and limitations on land use. Although penalties assessed for violations of environmental laws and regulations are not recoverable from customers of PHI's utility subsidiaries, environmental clean-up costs incurred by Pepco, DPL and ACE generally are included by each company in its respective cost of service for ratemaking purposes. The total accrued liabilities for the environmental contingencies described below of PHI and its subsidiaries at December 31, 2013 are summarized as follows:

		Legacy Generation			
	Transmission and Distribution	Regulated	Non-Regulated	Other	Total
		(millions of dollars)			
Balance as of January 1	$ 15	$ 7	$ 5	$ 2	$ 29
Accruals	5	—	—	1	6
Payments	(1)	(1)	—	(3)	(5)
Balance as of December 31	19	6	5	—	30
Less amounts in Other Current Liabilities	3	1	—	—	4
Amounts in Other Deferred Credits	$ 16	$ 5	$ 5	$ —	$ 26

Conectiv Energy Wholesale Power Generation Sites

In July 2010, PHI sold the Conectiv Energy wholesale power generation business to Calpine. Under New Jersey's Industrial Site Recovery Act (ISRA), the transfer of ownership triggered an obligation on the part of Conectiv Energy to remediate any environmental contamination at each of the nine Conectiv Energy generating facility sites located in New Jersey. Under the terms of the sale, Calpine has assumed responsibility for performing the ISRA-required remediation and for the payment of all related ISRA compliance costs up to $10 million. PHI is obligated to indemnify Calpine for any ISRA compliance remediation costs in excess of $10 million. According to PHI's estimates, the costs of ISRA-required remediation activities at the nine generating facility sites located in New Jersey are in the range of approximately $7 million to $18 million. The amount accrued by PHI for the ISRA-required remediation activities at the nine generating facility sites is included in the table above in the column entitled "Legacy Generation – Non-Regulated."

In September 2011, PHI received a request for data from the U.S. Environmental Protection Agency (EPA) regarding operations at the Deepwater generating facility in New Jersey (which was included in the sale to Calpine) between February 2004 and July 1, 2010, to demonstrate compliance with the Clean Air Act's new source review permitting program. PHI responded to the data request. Under the terms of the Calpine sale, PHI is obligated to indemnify Calpine for any failure of PHI, on or prior to the closing date of the sale, to comply with environmental laws attributable to the construction of new, or modification of existing, sources of air emissions. At this time, PHI does not expect this inquiry to have a material adverse effect on its consolidated financial condition, results of operations or cash flows.

Franklin Slag Pile Site

In November 2008, ACE received a general notice letter from EPA concerning the Franklin Slag Pile site in Philadelphia, Pennsylvania, asserting that ACE is a potentially responsible party (PRP) that may have liability for clean-up costs with respect to the site and for the costs of implementing an EPA-mandated remedy. EPA's claims are based on ACE's sale of boiler slag from the B.L. England generating facility, then owned by ACE, to MDC Industries, Inc. (MDC) during the period June 1978 to May 1983. EPA claims that the boiler slag ACE sold to MDC contained copper and lead, which are hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), and that the sales transactions may have constituted an arrangement for the disposal or treatment of hazardous substances at the site, which could be a basis for liability under CERCLA. The EPA letter also states that, as of the date of the letter, EPA's expenditures for response measures at the site have exceeded $6 million. EPA's feasibility study for this site conducted in 2007 identified a range of alternatives for permanent remedial measures with varying cost estimates, and the estimated cost of EPA's preferred alternative is approximately $6 million.

ACE believes that the B.L. England boiler slag sold to MDC was a valuable material with various industrial applications and, therefore, the sale was not an arrangement for the disposal or treatment of any hazardous substances as would be necessary to constitute a basis for liability under CERCLA. ACE intends to contest any claims to the contrary made by EPA. In a May 2009 decision arising under CERCLA, which did not involve ACE, the U.S. Supreme Court rejected an EPA argument that the sale of a useful product constituted an arrangement for disposal or treatment of hazardous substances. While this decision supports ACE's position, at this time ACE cannot predict how EPA will proceed with respect to the Franklin Slag Pile site, or what portion, if any, of the Franklin Slag Pile site response costs EPA would seek to recover from ACE. Costs to resolve this matter are not expected to be material and are expensed as incurred.

Peck Iron and Metal Site

EPA informed Pepco in a May 2009 letter that Pepco may be a PRP under CERCLA with respect to the cleanup of the Peck Iron and Metal site in Portsmouth, Virginia, and for costs EPA has incurred in cleaning up the site. The EPA letter states that Peck Iron and Metal purchased, processed, stored and shipped metal scrap from military bases, governmental agencies and businesses and that Peck's metal scrap operations resulted in the improper storage and disposal of hazardous substances. EPA bases its allegation that Pepco arranged for disposal or treatment of hazardous substances sent to the site on information provided by former Peck Iron and Metal personnel, who informed EPA that Pepco was a customer at the site. Pepco has advised EPA by letter that its records show no evidence of any sale of scrap metal by Pepco to the site. Even if EPA has such records and such sales did occur, Pepco believes that any such scrap metal sales may be entitled to the recyclable material exemption from CERCLA liability. In a Federal Register notice published in November 2009, EPA placed the Peck Iron and Metal site on the National Priorities List. The National Priorities List, among other things, serves as a guide to EPA in determining which sites warrant further investigation to assess the nature and extent of the human health and environmental risks associated with a site. In September 2011, EPA initiated a remedial investigation/feasibility study (RI/FS) using federal funds. Pepco cannot at this time estimate an amount or range of reasonably possible loss associated with this RI/FS, any remediation activities to be performed at the site or any other costs that EPA might seek to impose on Pepco.

Ward Transformer Site

In April 2009, a group of PRPs with respect to the Ward Transformer site in Raleigh, North Carolina, filed a complaint in the U.S. District Court for the Eastern District of North Carolina, alleging cost recovery and/or contribution claims against a number of entities, including Pepco, DPL and ACE, based on their alleged sale of transformers to Ward Transformer, with respect to past and future response costs incurred by the PRP group in performing a removal action at the site. In a March 2010 order, the court denied the defendants' motion to dismiss. The litigation is moving forward with certain "test case" defendants (not including Pepco, DPL and ACE) filing summary judgment motions regarding liability. The case has been stayed as to the remaining defendants pending rulings upon the test cases. In a January 31, 2013 order, the Federal district court granted summary judgment for the test case defendant whom plaintiffs alleged was liable based on its sale of transformers to Ward Transformer. The Federal district court's order, which plaintiffs have appealed to the U.S. Court of Appeals for the Fourth Circuit, addresses only the liability of the test case defendant. PHI has concluded that a loss is reasonably possible with respect to this matter, but is unable to estimate an amount or range of reasonably possible losses to which it may be exposed. PHI does not believe that any of its three utility subsidiaries had extensive business transactions, if any, with the Ward Transformer site.

Benning Road Site

In September 2010, PHI received a letter from EPA identifying the Benning Road location, consisting of a generation facility operated by Pepco Energy Services until the facility was deactivated in June 2012, and a transmission and distribution facility operated by Pepco, as one of six land-based sites potentially contributing to contamination of the lower Anacostia River. The letter stated that the principal contaminants of concern are polychlorinated biphenyls and polycyclic aromatic hydrocarbons. In December 2011, the U.S. District Court for the District of Columbia approved a consent decree entered into by Pepco and Pepco Energy Services with the District of Columbia Department of the Environment (DDOE), which requires Pepco and Pepco Energy Services to conduct a RI/FS for the Benning Road site and an approximately 10 to 15 acre portion of the adjacent Anacostia River. The RI/FS will form the basis for DDOE's selection of a remedial action for the Benning Road site and for the Anacostia River sediment associated with the site. The consent decree does not obligate Pepco or Pepco Energy Services to pay for or perform any remediation work, but it is anticipated that DDOE will look to the companies to assume responsibility for cleanup of any conditions in the river that are determined to be attributable to past activities at the Benning Road site.

In December 2012, DDOE approved the RI/FS work plan. RI/FS field work commenced in January 2013 and is still in progress. In October 2013, Pepco and Pepco Energy Services submitted a work plan addendum for approval by DDOE identifying the location of groundwater monitoring wells to be installed at the site and sampled as the last phase of the field work. The work plan addendum has been revised in response to comments from DDOE, and it is expected that the addendum will be approved and the next phase of field work will commence before the end of the first quarter of 2014. Once all of the field work has been completed, Pepco and Pepco Energy Services will prepare RI/FS reports for review and approval by DDOE after solicitation and consideration of public comment. The next status report to the court is due on May 24, 2014.

The remediation costs accrued for this matter are included in the table above in the columns entitled "Transmission and Distribution," "Legacy Generation – Regulated," and "Legacy Generation – Non-Regulated."

Indian River Oil Release

In 2001, DPL entered into a consent agreement with the Delaware Department of Natural Resources and Environmental Control for remediation, site restoration, natural resource damage compensatory projects and other costs associated with environmental contamination resulting from an oil release at the Indian River generating facility, which was sold in June 2001. The amount of remediation costs accrued for this matter is included in the table above in the column entitled "Legacy Generation – Regulated."

Potomac River Mineral Oil Release

In January 2011, a coupling failure on a transformer cooler pipe resulted in a release of non-toxic mineral oil at Pepco's Potomac River substation in Alexandria, Virginia. An overflow of an underground secondary containment reservoir resulted in approximately 4,500 gallons of mineral oil flowing into the Potomac River.

Beginning in March 2011, DDOE issued a series of compliance directives requiring Pepco to prepare an incident report, provide certain records, and prepare and implement plans for sampling surface water and river sediments and assessing ecological risks and natural resources damages. Pepco completed field sampling during the fourth quarter of 2011 and submitted sampling results to DDOE during the second quarter of 2012. Pepco is continuing discussions with DDOE regarding the need for any further response actions but expects that additional monitoring of shoreline sediments may be required.

In June 2012, Pepco commenced discussions with DDOE regarding a possible consent decree that would resolve DDOE's threatened enforcement action, including civil penalties, for alleged violation of the District's Water Pollution Control Law, as well as for damages to natural resources. Pepco and DDOE have reached an agreement in principle that would consist of a combination of a civil penalty and Supplemental Environmental Projects (SEPs) with a total cost to Pepco of approximately $1 million. DDOE has endorsed Pepco's proposed SEP involving the installation and operation of a trash collection system at a stormwater outfall that drains to the Anacostia River. DDOE and Pepco are completing negotiations on the text of a consent decree to document the settlement of DDOE's enforcement action and a written statement of work describing the details of the trash collection system SEP. It is expected that the consent decree will be filed with the District of Columbia Superior Court by the end of the first quarter of 2014, with a request that the court approve the consent decree following a period of at least 30 days for public comment. Discussions will proceed separately with DDOE and the federal resource trustees regarding the settlement of a natural resource damage (NRD) claim under federal law. Based on discussions to date, PHI and Pepco do not believe that the resolution of DDOE's enforcement action or the federal NRD claim will have a material adverse effect on their respective financial condition, results of operations or cash flows.

As a result of the mineral oil release, Pepco implemented certain interim operational changes to the secondary containment systems at the facility which involve pumping accumulated storm water to an aboveground holding tank for off-site disposal. In December 2011, Pepco completed the installation of a treatment system designed to allow automatic discharge of accumulated storm water from the secondary containment system. Pepco currently is seeking DDOE's and EPA's approval to commence operation of the new system on a pilot basis to demonstrate its effectiveness in meeting both secondary containment requirements and water quality standards related to the discharge of storm water from the facility. In the meantime, Pepco is continuing to use the aboveground holding tank to manage storm water from the secondary containment system. Pepco also is evaluating other technical and regulatory options for managing storm water from the secondary containment system as alternatives to the proposed treatment system discharge currently under discussion with EPA and DDOE.

The amount accrued for this matter is included in the table above in the column entitled "Transmission and Distribution."

Metal Bank Site

In the first quarter of 2013, the National Oceanic and Atmospheric Administration (NOAA) contacted Pepco and DPL on behalf of itself and other federal and state trustees to request that Pepco and DPL execute a tolling agreement to facilitate settlement negotiations concerning natural resource damages allegedly caused by releases of hazardous substances, including polychlorinated biphenyls, at the Metal Bank Superfund Site located in Philadelphia, Pennsylvania. Pepco and DPL have executed the tolling agreement and will participate in settlement discussions with the NOAA, the trustees and other PRPs.

The amount accrued for this matter is included in the table above in the column entitled "Transmission and Distribution."

Brandywine Fly Ash Disposal Site

In February 2013, Pepco received a letter from the Maryland Department of the Environment (MDE) requesting that Pepco investigate the extent of waste on a Pepco right-of-way that traverses the Brandywine fly ash disposal site in Brandywine, Prince George's County, Maryland, owned by GenOn MD Ash Management, LLC (GenOn). In July 2013, while reserving its rights and related defenses under a 2000 asset purchase and sale agreement covering the sale of this site, Pepco indicated its willingness to investigate the extent of, and propose an appropriate closure plan to address, ash on the right-of-way. Pepco submitted a schedule for development of a closure plan to MDE on September 30, 2013 and, by letter dated October 18, 2013, MDE approved the schedule.

PHI and Pepco have determined that a loss associated with this matter for PHI and Pepco is probable and have estimated that the costs for implementation of a closure plan and cap on the site are in the range of approximately $3 million to $6 million. PHI and Pepco believe that the costs incurred in this matter will be recoverable from GenOn under the 2000 sale agreement.

The amount accrued for this matter is included in the table above in the column entitled "Transmission and Distribution."

Watts Branch Insulating Fluid Release

On September 13, 2013, a Washington Metropolitan Area Transit Authority contractor damaged a Pepco underground transmission feeder while drilling a grout column for a subway tunnel under a city street. The damage caused the release of approximately 11,250 gallons of insulating fluid, a small amount of which reached the Watts Branch, a tributary of the Anacostia River. The U.S. Coast Guard (USCG) issued a notice of federal interest for an oil pollution incident, informing Pepco of its responsibility under the Oil Pollution Act of 1990 for removal costs and damages from the release. In addition, on September 25, 2013, DDOE issued a compliance directive that required Pepco to prepare an incident investigation report describing the events leading up to the release. The compliance directive also required Pepco to prepare work plans for sampling the insulating fluid and for developing and implementing a biological assessment and physical habitat quality assessment to be conducted in Watts Branch. Pepco prepared the incident investigation report and work plans and submitted them to DDOE and USCG. In December 2013, Pepco received and responded to an EPA information request regarding this incident.

PHI and Pepco believe that a loss in this matter is probable; however, the costs to resolve this matter are expected to be less than $1 million and are being expensed as incurred. PHI and Pepco further believe that the costs incurred will be recoverable from the party or parties responsible for the release. On December 4, 2013, the USCG delivered a Notice of Violation with respect to this matter, which imposed a $3,000 penalty on Pepco, which Pepco has paid.

PHI's Cross-Border Energy Lease Investments

As discussed in Note (19), "Discontinued Operations – Cross-Border Energy Lease Investments," PHI held a portfolio of cross-border energy lease investments involving public utility assets located outside of the United States. Each of these investments was comprised of multiple leases and was structured as a sale and leaseback transaction commonly referred to by the IRS as a sale-in, lease-out, or SILO, transaction.

Since 2005, PHI's cross-border energy lease investments have been under examination by the IRS as part of the PHI federal income tax audits. In connection with the audit of PHI's 2001-2002 income tax returns, the IRS disallowed the depreciation and interest deductions in excess of rental income claimed by PHI for six of the eight lease investments and, in connection with the audits of PHI's 2003-2005 and 2006-2008 income tax returns, the IRS disallowed such deductions in excess of rental income for all eight of the lease investments. In addition, the IRS has sought to recharacterize each of the leases as a loan transaction in each of the years under audit as to which PHI would be subject to original issue discount income. PHI has disagreed with the IRS' proposed adjustments to the 2001-2008 income tax returns and has filed protests of these findings for each year with the Office of Appeals of the IRS. In November 2010, PHI entered into a settlement agreement with the IRS for the 2001 and 2002 tax years for the purpose of commencing litigation associated with this matter and subsequently filed refund claims in July 2011 for the disallowed tax deductions relating to the leases for these years. In January 2011, as part of this settlement, PHI paid $74 million of additional tax for 2001 and 2002, penalties of $1 million, and $28 million in interest associated with the disallowed deductions. Since the July 2011 refund claims were not approved by the IRS within the statutory six-month period, in January 2012 PHI filed complaints in the U.S. Court of Federal Claims seeking recovery of the tax payment, interest and penalties. The 2003-2005 and 2006-2011 income tax return audits continue to be in process with the IRS Office of Appeals and the IRS Exam Division, respectively, and are not presently a part of the U.S. Court of Federal Claims litigation discussed above.

On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which PHI is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. While PHI believes that its tax position with regard to its cross-border energy lease investments is appropriate, after analyzing the recent U.S. Court of Appeals ruling, PHI determined in the first quarter of 2013 that its tax position with respect to the tax benefits associated with the cross-border energy leases no longer met the more-likely-than-not standard of recognition for accounting purposes. Accordingly, PHI recorded a non-cash after-tax charge of $377 million in the first quarter of 2013 (as discussed in Note (19), "Discontinued Operations – Cross-Border Energy Lease Investments"), consisting of a charge to reduce the carrying value of the cross-border energy lease investments and a charge to reflect the anticipated additional interest expense related to changes in PHI's estimated federal and state income tax obligations for the period over which the tax benefits ultimately may be disallowed. PHI had also previously made certain business assumptions regarding foreign investment opportunities available at the end of the full lease terms. During the first quarter of 2013, management believed that its conclusions regarding these business assumptions were no longer supportable, and the tax effects of this change in conclusion were included in the charge. While the IRS could require PHI to pay a penalty of up to 20% of the amount of additional taxes due, PHI believes that it is more likely than not that no such penalty will be incurred, and therefore no amount for any potential penalty was included in the charge recorded in the first quarter of 2013.

In the event that the IRS were to be successful in disallowing 100% of the tax benefits associated with these lease investments and recharacterizing these lease investments as loans, PHI estimated that, as of March 31, 2013, it would have been obligated to pay approximately $192 million in additional federal taxes (net of the $74 million tax payment described above) and approximately $50 million of interest on the additional federal taxes. These amounts, totaling $242 million, were estimated after consideration of certain tax benefits arising from matters unrelated to the leases that would offset the taxes and interest due, including PHI's best estimate of the expected resolution of other uncertain and effectively settled tax positions, the carrying back and carrying forward of any existing net operating losses, and the application of certain amounts paid in advance to the IRS. In order to mitigate PHI's ongoing interest costs associated with the $242 million estimate of additional taxes and interest, PHI made an advanced payment to the IRS of $242 million in the first quarter of 2013. This advanced payment was funded from currently available sources of liquidity and short-term borrowings. A portion of the proceeds from lease terminations was used to repay the short-term borrowings utilized to fund the advanced payment.

In order to mitigate the cost of continued litigation related to the cross-border energy lease investments, PHI and its subsidiaries have entered into discussions with the IRS with the intention of seeking a settlement of all tax issues for open tax years 2001 through 2011, including the cross-border energy lease issue. PHI currently believes that it is possible that a settlement with the IRS may be reached in 2014. If a settlement of all tax issues or a standalone settlement on the leases is not reached, PHI may move forward with its litigation with the IRS. Further discovery in the case is stayed until April 24, 2014, pursuant to an order issued by the court on January 30, 2014.

District of Columbia Tax Legislation

In 2011, the Council of the District of Columbia approved the Budget Support Act which requires that corporate taxpayers in the District of Columbia calculate taxable income allocable or apportioned to the District of Columbia by reference to the income and apportionment factors applicable to commonly controlled entities organized within the United States that are engaged in a unitary business. In the aggregate, this new tax reporting method reduced pre-tax earnings for the year ended December 31, 2011 by $7 million ($5 million after-tax) as further discussed in Note (11), "Income Taxes," and Note (19), "Discontinued Operations." During 2012, the District of Columbia Office of Tax and Revenue adopted regulations to implement this reporting method. PHI has analyzed these regulations and determined that the regulations did not impact PHI's results of operations for the years ended December 31, 2013 and 2012.

Third Party Guarantees, Indemnifications, and Off-Balance Sheet Arrangements

PHI and certain of its subsidiaries have various financial and performance guarantees and indemnification obligations that they have entered into in the normal course of business to facilitate commercial transactions with third parties as discussed below.

As of December 31, 2013, PHI and its subsidiaries were parties to a variety of agreements pursuant to which they were guarantors for standby letters of credit, energy procurement obligations, and other commitments and obligations. The commitments and obligations, in millions of dollars, were as follows:

	Guarantor				
	PHI	Pepco	DPL	ACE	Total
	(millions of dollars)				
Energy procurement obligations of Pepco Energy Services (a)	$46	$—	$—	$—	$ 46
Guarantees associated with disposal of Conectiv Energy assets (b)	13	—	—	—	13
Guaranteed lease residual values (c)	3	5	7	4	19
Total	$62	$ 5	$ 7	$ 4	$ 78

(a) PHI has continued contractual commitments for performance and related payments of Pepco Energy Services primarily to Independent System Operators and distribution companies.
(b) Represents guarantees by PHI of Conectiv Energy's derivatives portfolio transferred in connection with the disposition of Conectiv Energy's wholesale business. The derivative portfolio guarantee is currently $13 million and covers Conectiv Energy's performance prior to the assignment. This guarantee will remain in effect until the end of 2015.
(c) Represents the maximum potential obligation in the event that the fair value of certain leased equipment and fleet vehicles is zero at the end of the maximum lease term. The maximum lease term associated with these assets ranges from 3 to 8 years. The maximum potential obligation at the end of the minimum lease term would be $55 million, $10 million of which is a guarantee by PHI, $15 million by Pepco, $17 million by DPL and $13 million by ACE. The minimum lease term associated with these assets ranges from 1 to 4 years. Historically, payments under the guarantees have not been made and PHI believes the likelihood of payments being required under the guarantees is remote.

PHI and certain of its subsidiaries have entered into various indemnification agreements related to purchase and sale agreements and other types of contractual agreements with vendors and other third parties. These indemnification agreements typically cover environmental, tax, litigation and other matters, as well as breaches of representations, warranties and covenants set forth in these agreements. Typically, claims may be made by third parties under these indemnification agreements over various periods of time depending on the nature of the claim. The maximum potential exposure under these indemnification agreements can range from a specified dollar amount to an unlimited amount depending on the nature of the claim and the particular transaction. The total maximum potential amount of future payments under these indemnification agreements is not estimable due to several factors, including uncertainty as to whether or when claims may be made under these indemnities.

Energy Savings Performance Contracts

Pepco Energy Services has a diverse portfolio of energy savings performance contracts that are associated with the installation of energy savings equipment or combined heat and power facilities for federal, state and local government customers. As part of the energy savings contracts, Pepco Energy Services typically guarantees that the equipment or systems it installs will generate a specified amount of energy savings on an annual basis over a multi-year period. As of December 31, 2013, the remaining notional amount of Pepco Energy Services' energy savings guarantees over the life of the multi-year performance contracts on: i) completed projects was $252 million with the longest guarantee having a remaining term of 12 years; and, ii) projects under construction was $187 million with the longest guarantee having a term of 23 years after completion of construction. On an annual basis, Pepco Energy Services undertakes a measurement and verification process to determine the amount of energy savings for the year and whether there is any shortfall in the annual energy savings compared to the guaranteed amount.

As of December 31, 2013, Pepco Energy Services had a performance guarantee contract associated with the production at a combined heat and power facility that is under construction totaling $15 million in notional value over 20 years.

Pepco Energy Services recognizes a liability for the value of the estimated energy savings or production shortfalls when it is probable that the guaranteed amounts will not be achieved and the amount is reasonably estimable. As of December 31, 2013, Pepco Energy Services had an accrued liability of $1 million for its energy savings contracts that it established during 2012. There was no significant change in the type of contracts issued during the year ended December 31, 2013 as compared to the year ended December 31, 2012.

Dividends

On January 23, 2014, Pepco Holdings' Board of Directors declared a dividend on common stock of 27 cents per share payable March 31, 2014, to stockholders of record on March 10, 2014.

Contractual Obligations

Power Purchase Contracts

As of December 31, 2013, Pepco Holdings' contractual obligations under non-derivative power purchase contracts were $278 million in 2014, $562 million in 2015 to 2016, $486 million in 2017 to 2018, and $1,386 million in 2019 and thereafter.

Lease Commitments

Rental expense for operating leases was $54 million, $52 million and $46 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Total future minimum operating lease payments for Pepco Holdings as of December 31, 2013, are $44 million in 2014, $42 million in 2015, $39 million in 2016, $36 million in 2017, $37 million in 2018 and $342 million thereafter.

(16) VARIABLE INTEREST ENTITIES

PHI is required to consolidate a variable interest entity (VIE) in accordance with FASB ASC 810 if PHI or a subsidiary is the primary beneficiary of the VIE. The primary beneficiary of a VIE is typically the entity with both the power to direct activities most significantly impacting economic performance of the VIE and the obligation to absorb losses or receive benefits of the VIE that could potentially be significant to the VIE. PHI performs a qualitative analysis to determine whether a variable interest provides a controlling financial interest in a VIE. Set forth below are the relationships with respect to which PHI conducted a VIE analysis as of December 31, 2013:

DPL Renewable Energy Transactions

DPL is subject to Renewable Energy Portfolio Standards (RPS) in the state of Delaware that require it to obtain renewable energy credits (RECs) for energy delivered to its customers. DPL's costs associated with obtaining RECs to fulfill its RPS obligations are recoverable from its customers by law. As of December 31, 2013, PHI, through its DPL subsidiary, is a party to three land-based wind PPAs in the aggregate amount of 128 MWs and one solar PPA with a 10 MW facility. Each of the facilities associated with these PPAs is operational, and DPL is obligated to purchase energy and RECs in amounts generated and delivered by the wind facilities and solar renewable energy credits (SRECs) from the solar facility up to certain amounts (as set forth below) at rates that are primarily fixed under the respective PPA. PHI and DPL have concluded that while VIEs exist under these contracts, consolidation is not required for any of these PPAs under the FASB guidance on the consolidation of variable interest entities as DPL is not the primary beneficiary. DPL has not provided financial or other support under these arrangements that it was not previously contractually required to provide during the periods presented, nor does DPL have any intention to provide such additional support.

Because DPL has no equity or debt interest in these renewable energy transactions, the maximum exposure to loss relates primarily to any above-market costs incurred for power or RECs. Due to unpredictability in amount of MW's ultimately purchased under the PPAs for purchased renewable energy and SRECs, PHI and DPL are unable to quantify the maximum exposure to loss. The power purchase and REC costs are recoverable from DPL's customers through regulated rates.

DPL is obligated to purchase energy and RECs from one of the wind facilities through 2024 in amounts not to exceed 50 MWs, from the second wind facility through 2031 in amounts not to exceed 40 MWs, and from the third wind facility through 2031 in amounts not to exceed 38 MWs. DPL's purchases under the three wind PPAs totaled $30 million, $27 million and $18 million for the years ended December 31, 2013, 2012 and 2011, respectively.

The term of the agreement with the solar facility is 20 years and DPL is obligated to purchase SRECs in an amount up to 70 percent of the energy output at a fixed price. DPL's purchases under the solar agreement were $3 million, $2 million and $1 million for the years ended December 31, 2013, 2012 and 2011, respectively.

On October 18, 2011, the DPSC approved a tariff submitted by DPL in accordance with the requirements of the RPS specific to fuel cell facilities totaling 30 MWs to be constructed by a qualified fuel cell provider. The tariff and the RPS establish that DPL would be an agent to collect payments in advance from its distribution customers and remit them to the qualified fuel cell provider for each MW hour (MWh) of energy produced by the fuel cell facilities over 21 years. DPL has no obligation to the qualified fuel cell provider other than to remit payments collected from its distribution customers pursuant to the tariff. The RPS provides for a reduction in DPL's REC requirements based upon the actual energy output of the facilities. At December 31, 2013 and 2012, 15 MWs and 3 MWs of capacity were available from fuel cell facilities placed in service under the tariff, respectively. DPL billed $23 million and $4 million to distribution customers during the years ended December 31, 2013 and 2012, respectively. PHI and DPL have concluded that while a VIE exists under this arrangement, consolidation is not required for this arrangement under the FASB guidance on consolidation of variable interest entities as DPL is not the primary beneficiary.

ACE Power Purchase Agreements

PHI, through its ACE subsidiary, is a party to three PPAs with unaffiliated NUGs totaling 459 MWs. One of the agreements ends in 2016 and the other two end in 2024. PHI and ACE were not involved in the creation of these contracts and have no equity or debt invested in these entities. In performing its VIE analysis, PHI has been unable to obtain sufficient information to determine whether these three entities were variable interest entities or if ACE was the primary beneficiary. As a result, PHI has applied the scope exemption from the consolidation guidance.

Because ACE has no equity or debt invested in the NUGs, the maximum exposure to loss relates primarily to any above-market costs incurred for power. Due to unpredictability in the PPAs pricing for purchased energy, PHI and ACE are unable to quantify the maximum exposure to loss. The power purchase costs are recoverable from ACE's customers through regulated rates. Purchase activities with the NUGs, including excess power purchases not covered by the PPAs, for the years ended December 31, 2013, 2012 and 2011 were approximately $221 million, $206 million and $218 million, respectively, of which approximately $206 million, $201 million and $206 million, respectively, consisted of power purchases under the PPAs.

ACE Funding

In 2001, ACE established ACE Funding solely for the purpose of securitizing authorized portions of ACE's recoverable stranded costs through the issuance and sale of Transition Bonds. The proceeds of the sale of each series of Transition Bonds were transferred to ACE in exchange for the transfer by ACE to ACE Funding of the right to collect a non-bypassable Transition Bond Charge from ACE customers pursuant to bondable stranded costs rate orders issued by the NJBPU in an amount sufficient to fund the principal and interest payments on the Transition Bonds and related taxes, expenses and fees (Bondable Transition Property). The assets of ACE Funding, including the Bondable Transition Property, and the Transition Bond Charges (representing revenue ACE receives, and pays to ACE Funding, to fund the principal and interest payments on Transition Bonds and related taxes, expenses and fees) collected from ACE's customers, are not available to creditors of ACE. The holders of Transition Bonds have recourse only to the assets of ACE Funding. ACE owns 100 percent of the equity of ACE Funding, and PHI and ACE consolidate ACE Funding in their consolidated financial statements as ACE is the primary beneficiary of ACE Funding under the variable interest entity consolidation guidance.

(17) ACCUMULATED OTHER COMPREHENSIVE LOSS

The components of Pepco Holdings' AOCL relating to continuing and discontinued operations are as follows. For additional information, see the consolidated statements of comprehensive income.

	Year Ended December 31,		
	2013	2012	2011
Balance as of January 1	$ (48)	$ (63)	$ (106)
Treasury Lock			
Balance as of January 1	(10)	(10)	(11)
Amount of pre-tax loss reclassified to Interest expense	1	—	1

(18) QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

The quarterly data presented below reflect all adjustments necessary in the opinion of management for a fair presentation of the interim results. Quarterly data normally vary seasonally because of temperature variations and differences between summer and winter rates. The totals of the four quarterly basic and diluted earnings per common share amounts may not equal the basic and diluted earnings per common share for the year due to changes in the number of shares of common stock outstanding during the year.

	2013				
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
	(millions, except per share amounts)				
Total Operating Revenue	$1,180	$1,051	$1,344	$1,091	$4,666
Total Operating Expenses	1,047	906	1,109	936(a)	3,998
Operating Income	133	145	235	155	668
Other Expenses	(59)	(62)	(60)	(58)	(239)
Income From Continuing Operations Before Income Tax Expense	74	83	175	97	429
Income Tax Expense Related to Continuing Operations	185(b)	30	65	39	319

Cash Dividends Per Share of Common Stock	0.27	0.27	0.27	0.27	1.08

(a) Includes $9 million of intra-company revenues (and associated costs) previously eliminated in consolidation which will continue to be recognized from third parties subsequent to the completion of the wind-down of the Pepco Energy Services' retail electric and natural gas supply businesses.
(b) Includes impairment losses of $12 million pre-tax ($7 million after-tax) at Pepco Energy Services associated primarily with investments in landfill gas-fired electric generation facilities, and the combustion turbines at Buzzard Point.

(19) DISCONTINUED OPERATIONS

PHI's (loss) income from discontinued operations, net of income taxes, is comprised of the following:

	For the Year Ended December 31,		
	2013	2012	2011
	(millions of dollars)		
Cross-border energy lease investments	$ (327)	$ 41	$ 36
Pepco Energy Services' retail electric and natural gas supply businesses	5	26	2
Conectiv Energy	—	—	(3)
(Loss) income from discontinued operations, net of income taxes	$ (322)	$ 67	$ 35

Cross-Border Energy Lease Investments

Between 1994 and 2002, PCI entered into cross-border energy lease investments consisting of hydroelectric generation facilities, coal-fired electric generation facilities and natural gas distribution networks located outside of the United States. Each of these lease investments was structured as a sale and leaseback transaction commonly referred to as a sale-in, lease-out, or SILO, transaction. As of December 31, 2013 and 2012, the lease portfolio consisted of zero investments and six investments, respectively, with a net investment value of zero and $1,237 million, respectively.

During the second and third quarters of 2013, PHI terminated early all of its interests in the six remaining lease investments. PHI received aggregate net cash proceeds from these early terminations of $873 million (net of aggregate termination payments of $2.0 billion used to retire the non-recourse debt associated with the terminated leases) and recorded an aggregate pre-tax loss, including transaction costs, of approximately $3 million ($2 million after-tax), representing the excess of the carrying value of the terminated leases over the net cash proceeds received. As a result, PHI has reported the results of operations of the cross-border energy lease investments as discontinued operations in all periods presented in the accompanying consolidated statements of (loss) income. Further, the assets and liabilities related to the cross-border energy lease investments are reported as held for disposition as of each date in the accompanying consolidated balance sheets.

Operating Results

The operating results for the cross-border energy lease investments are as follows:

	For the Year Ended December 31,		
	2013	2012	2011
	(millions of dollars)		
Operating revenue from PHI's cross-border energy lease investments	$ 7	$ 50	$ 55
Non-cash charge to reduce carrying value of PHI's cross-border energy lease investments	(373)	—	(7)
Total operating revenue	$ (366)	$ 50	$ 48
(Loss) income from operations of discontinued operations, net of income taxes (a)	$ (325)	$ 32	$ 33
Net (losses) gains associated with the early termination of the cross-border energy lease investments, net of income taxes (b)	(2)	9	3
(Loss) income from discontinued operations, net of income taxes	$ (327)	$ 41	$ 36

(a) Includes income tax (benefit) expense of approximately $(44) million, $5 million and $(2) million for the years ended December 31, 2013, 2012 and 2011, respectively.
(b) Includes income tax (benefit) expense of approximately $(1) million, $30 million and $36 million for the years ended December 31, 2013, 2012 and 2011, respectively.

On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which PHI is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. As a result of the court's ruling in this case, PHI determined in the first quarter of 2013 that its tax position with respect to the benefits associated with its cross-border energy leases no longer met the more-likely-than-not standard of recognition for accounting purposes, and PCI recorded after-tax non-cash charges of $323 million in the first quarter of 2013 and $6 million in the second quarter of 2013, consisting of the following components:

- A non-cash pre-tax charge of $373 million ($313 million after-tax) to reduce the carrying value of these cross-border energy lease investments under FASB guidance on leases (ASC 840). This pre-tax charge was originally recorded in the consolidated statements of (loss) income as a reduction in operating revenue and is now reflected in (loss) income from discontinued operations, net of income taxes.
- A non-cash charge of $16 million after-tax to reflect the anticipated additional net interest expense under FASB guidance for income taxes (ASC 740) related to estimated federal and state income tax obligations for the period over which the tax benefits may be disallowed. This after-tax charge was originally recorded in the consolidated statements of (loss) income as an increase in income tax expense and is now reflected in (loss) income from discontinued operations, net of income taxes. The after-tax interest charge for PHI on a consolidated basis was $70 million and this amount was allocated to each member of PHI's consolidated group as if each member was a separate taxpayer, resulting in the recognition of a $12 million interest benefit for the Power Delivery segment, and interest expense of $16 million for PCI and $66 million for Corporate and Other, respectively.

PHI had also previously made certain business assumptions regarding foreign investment opportunities available at the end of the full lease terms. In view of the change in PHI's tax position with respect to the tax benefits associated with the cross-border energy lease investments and PHI's resulting decision to pursue the early termination of these investments, management concluded in the first quarter of 2013 that these business assumptions were no longer supportable and the tax effects of this conclusion were reflected in the after-tax charge of $313 million described above.

PHI accrued no penalties associated with its re-assessment of the likely outcome of tax positions associated with the cross-border energy lease investments. While the IRS could require PHI to pay a penalty of up to 20% of the amount of additional taxes due, PHI believes that it is more likely than not that no such penalty will be incurred, and therefore no amount for any potential penalty was included in the charge.

During 2012, PHI entered into early termination agreements with two lessees involving all of the leases comprising one of the original eight lease investments. The early terminations of the leases were negotiated at the request of the lessees. PHI received net cash proceeds of $202 million (net of a termination payment of $520 million used to retire the non-recourse debt associated with the terminated leases) and recorded a pre-tax gain of $39 million, representing the excess of the net cash proceeds over the carrying value of the lease investments.

During 2011, PHI entered into early termination agreements with two lessees involving all of the leases comprising one of the original eight lease investments and a small portion of the leases comprising a second lease investment. The early terminations of the leases were negotiated at the request of the lessees. PHI received net cash proceeds of $161 million (net of a termination payment of $423 million used to retire the non-recourse debt associated with the terminated leases) and recorded a pre-tax gain of $39 million, representing the excess of the net cash proceeds over the carrying value of the lease investments.

With respect to the leases terminated in 2012 and 2011, PHI had previously made certain business assumptions regarding foreign investment opportunities available at the end of the full lease terms. Because the leases were terminated in each case earlier than full term, management decided not to pursue these opportunities and recognized the related tax consequences by recording income tax charges in the amounts of $16 million and $22 million for the years ended December 31, 2012 and 2011, respectively. The after-tax gains on the lease terminations were $9 million and $3 million for the years ended December 31, 2012 and 2011, respectively, including the income tax charges discussed above and an income tax provision at the statutory Federal rate of $14 million for each early lease termination. As of December 31, 2012, PHI had no intent to terminate early any other leases in the lease portfolio and maintained its assertion that the foreign earnings recognized at the end of the lease term with respect to certain of these remaining leases will remain invested abroad. See Note (15), "Commitments and Contingencies – PHI's Cross-Border Energy Lease Investments," regarding a subsequent change in management's intent.

PHI was required to assess on a periodic basis the likely outcome of tax positions relating to its cross-border energy lease investments and, if there was a change or a projected change in the timing of the tax benefits generated by the transactions, PHI was required to recalculate the value of its net investment. In that regard, PHI modified its tax cash flow assumptions in 2011 and recorded a non-cash pre-tax charge of $7 million to reduce the carrying value of its net investment. The tax cash flow assumptions changed in 2011 as a result of the enactment of tax regulations in the District of Columbia to implement the mandatory unitary combined reporting method. The charge was recorded as a reduction in cross-border energy lease investment revenue in 2011.

For additional information concerning these cross-border energy lease investments, see Note (15), "Commitments and Contingencies – PHI's Cross-Border Energy Lease Investments."

Balance Sheet Information

As of December 31, 2013 and 2012, the assets held for disposition and liabilities associated with assets held for disposition related to the cross-border energy lease investments are:

	2013	2012
	(millions of dollars)	
Scheduled lease payments to PHI, net of non-recourse debt	$ —	$ 1,852
Less: Unearned and deferred income	—	(615)
Assets held for disposition	$ —	$ 1,237
Liabilities associated with assets held for disposition	$ —	$ 1

To ensure credit quality, PHI regularly monitored the financial performance and condition of the lessees under the former cross-border energy lease investments. Changes in credit quality were assessed to determine whether they affected the carrying value of the leases. PHI compared each lessee's performance to annual compliance requirements set by the terms and conditions of the leases and compared published credit ratings to minimum credit rating requirements in the leases for lessees with public credit ratings. In addition, PHI routinely met with senior executives of the lessees to discuss their company and asset performance. If the annual compliance requirements or minimum credit ratings were not met, remedies would have been available under the leases.

The table below shows PHI's net investment in these leases by the published credit ratings of the lessees as of December 31:

Lessee Rating (a)	2013	2012
	(millions of dollars)	
Rated Entities		
AA/Aa and above	$ —	$ 766
A	—	471
Total	$ —	$ 1,237

(a) Excludes the credit ratings associated with collateral posted by the lessees in these transactions.

Retail Electric and Natural Gas Supply Businesses of Pepco Energy Services

On March 21, 2013, Pepco Energy Services entered into an agreement whereby a third party assumed all the rights and obligations of the remaining natural gas supply customer contracts, and the associated supply obligations, inventory and derivative contracts. The transaction was completed on April 1, 2013. In addition, in the second quarter of 2013, Pepco Energy Services completed the wind-down of its retail electric supply business by terminating its remaining customer supply and wholesale purchase obligations beyond June 30, 2013. As a result, PHI has reported the results of operations of Pepco Energy Services' retail electric and natural gas supply businesses as discontinued operations in all periods presented in the accompanying consolidated statements of (loss) income. Further, the assets and liabilities of Pepco Energy Services' retail electric and natural gas supply businesses are reported as held for disposition as of each date presented in the accompanying consolidated balance sheets.

Operating Results

The operating results for the retail electric and natural gas supply businesses of Pepco Energy Services are as follows:

	For the Year Ended December 31,		
	2013	2012	2011
	(millions of dollars)		
Operating revenue	$84	$415	$954
Income from operations of discontinued operations, net of income taxes	$ 4	$ 26	$ 2
Net gains associated with accelerated disposition of retail electric and natural gas contracts, net of income taxes	1	—	—
Income from discontinued operations, net of income taxes (a)	$ 5	$ 26	$ 2

(a) Includes income tax expense of approximately $3 million, $18 million and $1 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Balance Sheet Information

As of December 31, 2013 and 2012, the retail electric and natural gas supply businesses of Pepco Energy Services had net accounts receivable of zero and $33 million, respectively, inventory assets of $1 million and $3 million, respectively, gross derivative assets of zero and $1 million respectively, other current assets of zero and $1 million, respectively, accrued liabilities of $1 million and $20 million, respectively, gross derivative liabilities of zero and $21 million, respectively, exclusive of the collateral pledged by Pepco Energy Services against the derivative liabilities, and other current liabilities of zero and $1 million, respectively. As of December 31, 2012, the derivative assets were considered level 1 within the fair value hierarchy, and $11 million and $10 million of the derivative liabilities were considered levels 1 and 2, respectively, within the fair value hierarchy.

Derivative Instruments and Hedging Activities

Derivatives were used by the retail electric and natural gas supply businesses of Pepco Energy Services to hedge commodity price risk.

The retail electric and natural gas supply businesses of Pepco Energy Services entered into energy commodity contracts in the form of natural gas futures, swaps, options and forward contracts to hedge commodity price risk in connection with the purchase of physical natural gas and electricity for distribution to customers. The primary risk management objective was to manage the spread between retail sales commitments and the cost of supply used to service those commitments to ensure stable cash flows and lock in favorable prices and margins when they became available. There were no derivatives for Pepco Energy Services as of December 31, 2013.

Commodity contracts held by the retail electric and natural gas supply businesses of Pepco Energy Services that were not designated for hedge accounting, did not qualify for hedge accounting, or did not meet the requirements for normal purchase and normal sale accounting, were marked to market through current earnings. Forward contracts that met the requirements for normal purchase and normal sale accounting were recorded on an accrual basis.

The table below identifies the balance sheet location and fair values of the retail electric and natural gas supply businesses' derivative instruments as of December 31, 2012:

	As of December 31, 2012				
Balance Sheet Caption	**Derivatives Designated as Hedging Instruments (a)**	**Other Derivative Instruments**	**Gross Derivative Instruments**	**Effects of Cash Collateral and Netting**	**Net Derivative Instruments**
			(millions of dollars)		
Assets held for disposition (current assets)	$ —	$ 1	$ 1	$ —	$ 1
Total Derivative assets	—	1	1	—	1
Liabilities associated with assets held for disposition (current liabilities)	(10)	(9)	(19)	16	(3)
Liabilities associated with assets held for disposition (non-current liabilities)	(1)	(1)	(2)	2	—
Total Derivative liabilities	(11)	(10)	(21)	18	(3)
Net Derivative (liability) asset	$ (11)	$ (9)	$ (20)	$ 18	$ (2)

(a) Amounts included in Derivatives Designated as Hedging Instruments primarily consist of derivatives that were designated as cash flow hedges prior to Pepco Energy Services' election to discontinue cash flow hedge accounting for these derivatives.

Under FASB guidance on the offsetting of balance sheet accounts (ASC 210-20), the retail electric and natural gas supply businesses of Pepco Energy Services offset the fair value amounts recognized for derivative instruments and the fair value amounts recognized for related collateral positions executed with the same counterparty under master netting agreements. No derivative assets or liabilities were available to be offset under master netting agreements as of December 31, 2012. Cash collateral pledged to counterparties with the right to reclaim of $18 million (including cash deposits on commodity brokerage accounts) was offset against these derivative positions.

As of December 31, 2013 and 2012, all cash collateral pledged by the retail electric and natural gas supply businesses related to derivative instruments accounted for at fair value was entitled to be offset under master netting agreements.

Derivatives Designated as Hedging Instruments

At December 31, 2012, the cumulative net pre-tax loss related to effective cash flow hedges of the retail electric and natural gas supply businesses of Pepco Energy Services included in AOCL was $10 million ($6 million after-tax). With the assumption by a third party, on April 1, 2013, of all the rights and obligations of the derivative contracts associated with the retail natural gas supply business, and the completion of the wind-down of the retail electric supply business in the second quarter of 2013, all of the losses deferred in AOCL associated with derivatives that Pepco Energy Services had previously designated as cash flow hedges were reclassified into income. As a result, a loss of $10 million ($6 million after-tax) was reclassified from AOCL to (Loss) income from discontinued operations, net of income taxes, for the year ended December 31, 2013.

Other Derivative Activity

The retail electric and natural gas supply businesses of Pepco Energy Services held certain derivatives that were not in hedge accounting relationships and were not designated as normal purchases or normal sales. These derivatives were recorded at fair value on the balance sheet with the gain or loss for changes in fair value recorded through (Loss) income from discontinued operations, net of income taxes.

For the years ended December 31, 2013, 2012, and 2011, the amount of the derivative gain (loss) for the retail electric and natural gas supply businesses of Pepco Energy Services recognized in (Loss) income from discontinued operations, net of income taxes is provided in the table below:

	For the Year Ended December 31,		
	2013	2012	2011
	(millions of dollars)		
Reclassification of mark-to-market to realized on settlement of contracts	$ 10	$27	$—
Unrealized mark-to-market loss	—	(3)	(30)
Total net gain (loss)	$ 10	$24	$ (30)

As of December 31, 2013, the retail electric and natural gas supply businesses of Pepco Energy Services had no outstanding commodity forward contracts or derivative positions.

As of December 31, 2012, the retail electric and natural gas supply businesses of Pepco Energy Services had the following net outstanding commodity forward contract quantities and net position on derivatives that did not qualify for hedge accounting:

	December 31, 2012	
Commodity	Quantity	Net Position
Financial transmission rights (MWh)	181,008	Long
Electricity (MWh)	261,240	Long
Natural gas (MMBtu)	2,867,500	Long

As of December 31, 2013, Pepco Energy Services had posted net cash collateral of $3 million and letters of credit of less than $1 million. As December 31, 2012, Pepco Energy Services had posted net cash collateral of $25 million and letters of credit of less than $1 million.

Conectiv Energy

In April 2010, the Board of Directors approved a plan for the disposition of PHI's competitive wholesale power generation, marketing and supply business, which had been conducted through Conectiv Energy. On July 1, 2010, PHI completed the sale of Conectiv Energy's wholesale power generation business to Calpine. The disposition of Conectiv Energy's remaining assets and businesses, consisting of its load service supply contracts, energy hedging portfolio, certain tolling agreements and other assets not included in the Calpine sale, has been completed.

Conectiv Energy's loss from discontinued operations, net of income taxes, for the years ended December 31, 2013, 2012 and 2011, was zero, zero and $3 million, respectively. Conectiv Energy's other comprehensive income from discontinued operations, net of income taxes, for each of the years ended December 31, 2013, 2012 and 2011, was zero.

Management's Report on Internal Control over Financial Reporting

The management of Potomac Electric Power Company (Pepco) is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) and Rule 15d-15(f) under the Exchange Act. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management of Pepco assessed Pepco's internal control over financial reporting as of December 31, 2013 based on the framework in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its assessment, the management of Pepco concluded that Pepco's internal control over financial reporting was effective as of December 31, 2013.

Report of Independent Registered Public Accounting Firm

To the Shareholder and Board of Directors of
Potomac Electric Power Company

In our opinion, the financial statements of Potomac Electric Power Company (a wholly owned subsidiary of Pepco Holdings, Inc.) listed in the accompanying index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Potomac Electric Power Company at December 31, 2013 and December 31, 2012, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule of Potomac Electric Power Company listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

NOTES TO FINANCIAL STATEMENTS

POTOMAC ELECTRIC POWER COMPANY

(1) ORGANIZATION

Potomac Electric Power Company (Pepco) is engaged in the transmission and distribution of electricity in the District of Columbia and major portions of Prince George's County and Montgomery County in suburban Maryland. Pepco also provides Default Electricity Supply, which is the supply of electricity at regulated rates to retail customers in its service territories who do not elect to purchase electricity from a competitive energy supplier. Default Electricity Supply is known as Standard Offer Service in both the District of Columbia and Maryland. Pepco is a wholly owned subsidiary of Pepco Holdings, Inc. (Pepco Holdings or PHI).

(2) SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make certain estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities in the financial statements and accompanying notes. Although Pepco believes that its estimates and assumptions are reasonable, they are based upon information available to management at the time the estimates are made. Actual results may differ significantly from these estimates.

Significant matters that involve the use of estimates include the assessment of contingencies, the calculation of future cash flows and fair value amounts for use in asset impairment evaluations, pension and other postretirement benefits assumptions, the assessment of the probability of recovery of regulatory assets, accrual of storm restoration costs, accrual of unbilled revenue, recognition of changes in network service transmission rates for prior service year costs, accrual of loss contingency liabilities for general and auto liability claims and income tax provisions and reserves. Additionally, Pepco is subject to legal, regulatory, and other proceedings and claims that arise in the ordinary course of its business. Pepco records an estimated liability for these proceedings and claims when it is probable that a loss has been incurred and the loss is reasonably estimable.

Revenue Recognition

Pepco recognizes revenue upon distribution of electricity to its customers, including unbilled revenue for services rendered, but not yet billed. Pepco's unbilled revenue was $80 million and $81 million as of December 31, 2013 and 2012, respectively, and these amounts are included in Accounts receivable. Pepco calculates unbilled revenue using an output-based methodology. This methodology is based on the supply of electricity intended for distribution to customers. The unbilled revenue process requires management to make assumptions and judgments about input factors such as customer sales mix, temperature, and estimated line losses (estimates of electricity expected to be lost in the process of its transmission and distribution to customers). The assumptions and judgments are inherently uncertain and susceptible to change from period to period, and if actual results differ from projected results, the impact could be material.

Taxes related to the consumption of electricity by its customers, such as fuel, energy, or other similar taxes, are components of Pepco's tariffs and, as such, are billed to customers and recorded in Operating revenue. Accruals for the remittance of these taxes by Pepco are recorded in Other taxes.

Taxes Assessed by a Governmental Authority on Revenue-Producing Transactions

Taxes included in Pepco's gross revenues were $318 million, $324 million and $338 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Long-Lived Assets Impairment Evaluation

Pepco evaluates certain long-lived assets to be held and used (for example, equipment and real estate) for impairment whenever events or changes in circumstances indicate that their carrying value may not be recoverable. Examples of such events or changes include a significant decrease in the market price of a long-lived asset or a significant adverse change in the manner in which an asset is being used or its physical condition. A long-lived asset to be held and used is written down to its estimated fair value if the expected future undiscounted cash flow from the asset is less than its carrying value.

For long-lived assets that can be classified as assets to be disposed of by sale, an impairment loss is recognized to the extent that the asset's carrying value exceeds its estimated fair value including costs to sell.

Income Taxes

Pepco, as a direct subsidiary of Pepco Holdings, is included in the consolidated federal income tax return of PHI. Federal income taxes are allocated to Pepco based upon the taxable income or loss amounts, determined on a separate return basis.

The financial statements include current and deferred income taxes. Current income taxes represent the amount of tax expected to be reported on Pepco's state income tax returns and the amount of federal income tax allocated from Pepco Holdings.

Deferred income tax assets and liabilities represent the tax effects of temporary differences between the financial statement basis and tax basis of existing assets and liabilities and they are measured using presently enacted tax rates. The portion of Pepco's deferred tax liability applicable to its utility operations that has not been recovered from utility customers represents income taxes recoverable in the future and is included in Regulatory assets on the balance sheets. See Note (6), "Regulatory Matters," for additional information.

Deferred income tax expense generally represents the net change during the reporting period in the net deferred tax liability and deferred recoverable income taxes.

Pepco recognizes interest on underpayments and overpayments of income taxes, interest on uncertain tax positions, and tax-related penalties in income tax expense.

Investment tax credits are being amortized to income over the useful lives of the related property.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash invested in money market funds and commercial paper held with original maturities of three months or less. Additionally, deposits in PHI's money pool, which Pepco and certain other PHI subsidiaries use to manage short-term cash management requirements, are considered cash equivalents. Deposits in the money pool are guaranteed by PHI. PHI deposits funds in the money pool to the extent that the pool has insufficient funds to meet the needs of its participants, which may require PHI to borrow funds for deposit from external sources.

Restricted Cash Equivalents

The Restricted cash equivalents included in Current assets consist of (i) cash held as collateral that is restricted from use for general corporate purposes and (ii) cash equivalents that are specifically segregated based on management's intent to use such cash equivalents for a particular purpose. The classification as current conforms to the classification of the related liabilities.

Accounts Receivable and Allowance for Uncollectible Accounts

Pepco's Accounts receivable balance primarily consists of customer accounts receivable arising from the sale of goods and services to customers within its service territory, other accounts receivable, and accrued unbilled revenue. Accrued unbilled revenue represents revenue earned in the current period but not billed to the customer until a future date (usually within one month after the receivable is recorded).

Pepco maintains an allowance for uncollectible accounts and changes in the allowance are recorded as an adjustment to Other operation and maintenance expense in the statements of income. Pepco determines the amount of the allowance based on specific identification of material amounts at risk by customer and maintains a reserve based on its historical collection experience. The adequacy of this allowance is assessed on a quarterly basis by evaluating all known factors such as the aging of the receivables, historical collection experience, the economic and competitive environment and changes in the creditworthiness of its customers. Accounts receivable are written off in the period in which the receivable is deemed uncollectible and collection efforts have been exhausted. Recoveries of Accounts receivable previously written off are recorded when it is probable they will be recovered. Although Pepco believes its allowance is adequate, it cannot anticipate with any certainty the changes in the financial condition of its customers. As a result, Pepco records adjustments to the allowance for uncollectible accounts in the period in which the new information that requires an adjustment to the reserve becomes known.

Inventories

Included in Inventories are transmission and distribution materials and supplies. Pepco utilizes the weighted average cost method of accounting for inventory items. Under this method, an average price is determined for the quantity of units acquired at each price level and is applied to the ending quantity to calculate the total ending inventory balance. Materials and supplies are recorded in Inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed.

Regulatory Assets and Regulatory Liabilities

Pepco is regulated by the Maryland Public Service Commission (MPSC) and the District of Columbia Public Service Commission (DCPSC). The transmission of electricity by Pepco is regulated by the Federal Energy Regulatory Commission (FERC).

Based on the regulatory framework in which it has operated, Pepco has historically applied, and in connection with its transmission and distribution business continues to apply, the Financial Accounting Standards Board (FASB) guidance on regulated operations (Accounting Standards Codification (ASC) 980). The guidance allows regulated entities, in appropriate circumstances, to defer the income statement impact of certain costs that are expected to be recovered in future rates through the establishment of regulatory assets and defer certain revenues that are expected to be refunded to customers through the establishment of regulatory liabilities. Management's assessment of the probability of recovery of regulatory assets requires judgment and interpretation of laws, regulatory commission orders and other factors. If management subsequently determines, based on changes in facts or circumstances, that a regulatory asset is not probable of recovery, the regulatory asset would be eliminated through a charge to earnings.

Effective June 2007, the MPSC approved a bill stabilization adjustment (BSA) mechanism for retail customers. Effective November 2009, the DCPSC approved a BSA for retail customers. For customers to whom the BSA applies, Pepco recognizes distribution revenue based on an approved distribution charge per customer. From a revenue recognition standpoint, the BSA has the effect of decoupling the distribution revenue recognized in a reporting period from the amount of power delivered during that period. Pursuant to this mechanism, Pepco recognizes either (i) a positive adjustment equal to the amount by which revenue from Maryland and the District of Columbia retail distribution sales falls short of the revenue that Pepco is entitled to earn based on the approved distribution charge per customer, or (ii) a negative adjustment equal to the amount by which revenue from such distribution sales exceeds the revenue that Pepco is entitled to earn based on the approved distribution charge per customer (a Revenue Decoupling Adjustment). A net positive Revenue Decoupling Adjustment is recorded as a regulatory asset and a net negative Revenue Decoupling Adjustment is recorded as a regulatory liability.

Investment in Trust

Represents assets held in a trust for the benefit of participants in the Pepco Owned Life Insurance plan.

Property, Plant and Equipment

Property, plant and equipment is recorded at original cost, including labor, materials, asset retirement costs and other direct and indirect costs including capitalized interest. The carrying value of Property, plant and equipment is evaluated for impairment whenever circumstances indicate the carrying value of those assets may not be recoverable. Upon retirement, the cost of regulated property, net of salvage, is charged to Accumulated depreciation. For additional information regarding the treatment of asset removal obligations, see the "Asset Removal Costs" section included in this Note.

The annual provision for depreciation on electric property, plant and equipment is computed on a straight-line basis using composite rates by classes of depreciable property. Accumulated depreciation is charged with the cost of depreciable property retired, less salvage and other recoveries. Non-operating and other property is generally depreciated on a straight-line basis over the useful lives of the assets. The system-wide composite annual depreciation rates for the years ended December 31, 2013, 2012 and 2011 for Pepco's property were approximately 2.2%, 2.5% and 2.6%, respectively.

In 2010, Pepco was awarded $149 million from the U.S. Department of Energy (DOE) to fund a portion of the costs incurred for the implementation of an advanced metering infrastructure system, direct load control, distribution automation and communications infrastructure in its Maryland and District of Columbia service territories. Pepco has elected to recognize the award proceeds as a reduction in the carrying value of the assets acquired rather than grant income over the service period.

Capitalized Interest and Allowance for Funds Used During Construction

In accordance with FASB guidance on regulated operations (ASC 980), utilities can capitalize the capital costs of financing the construction of plant and equipment as Allowance for Funds Used During Construction (AFUDC). This results in the debt portion of AFUDC being recorded as a reduction of Interest expense and the equity portion of AFUDC being recorded as an increase to Other income in the accompanying statements of income.

Pepco recorded AFUDC for borrowed funds of $5 million, $4 million and $8 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Pepco recorded amounts for the equity component of AFUDC of $9 million, $8 million and $12 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Leasing Activities

Pepco's lease transactions include office space, equipment, software and vehicles. In accordance with FASB guidance on leases (ASC 840), these leases are classified as either operating leases or capital leases.

Operating Leases

An operating lease in which Pepco is the lessee generally results in a level income statement charge over the term of the lease, reflecting the rental payments required by the lease agreement. If rental payments are not made on a straight-line basis, Pepco's policy is to recognize rent expense on a straight-line basis over the lease term unless another systematic and rational allocation basis is more representative of the time pattern in which the leased property is physically employed.

Capital Leases

For ratemaking purposes, capital leases in which Pepco is the lessee are treated as operating leases; therefore, in accordance with FASB guidance on regulated operations (ASC 980), the amortization of the leased asset is based on the recovery of rental payments through customer rates. Investments in equipment under capital leases are stated at cost, less accumulated depreciation. Depreciation is recorded on a straight-line basis over the equipment's estimated useful life.

Amortization of Debt Issuance and Reacquisition Costs

Pepco defers and amortizes debt issuance costs and long-term debt premiums and discounts over the lives of the respective debt issuances. When refinancing or redeeming existing debt, any unamortized premiums, discounts and debt issuance costs, as well as debt redemption costs, are classified as Regulatory assets and are amortized generally over the life of the new issue.

Asset Removal Costs

In accordance with FASB guidance, asset removal costs are recorded as regulatory liabilities. At December 31, 2013 and 2012, $102 million and $122 million, respectively, of asset removal costs are included in Regulatory liabilities in the accompanying balance sheets.

Pension and Postretirement Benefit Plans

Pepco Holdings sponsors the PHI Retirement Plan, a non-contributory, defined benefit pension plan that covers substantially all employees of Pepco and certain employees of other Pepco Holdings subsidiaries. Pepco Holdings also provides supplemental retirement benefits to certain eligible executives and key employees through nonqualified retirement plans and provides certain postretirement health care and life insurance benefits for eligible retired employees.

The PHI Retirement Plan is accounted for in accordance with FASB guidance on retirement benefits (ASC 715).

Dividend Restrictions

All of Pepco's shares of outstanding common stock are held by PHI, its parent company. In addition to its future financial performance, the ability of Pepco to pay dividends to its parent company is subject to limits imposed by: (i) state corporate laws, which impose limitations on the funds that can be used to pay dividends, and (ii) the prior rights of holders of future preferred stock, if any, and existing and future mortgage bonds and other long-term debt issued by Pepco and any other restrictions imposed in connection with the incurrence of liabilities. Pepco has no shares of preferred stock outstanding. Pepco had approximately $992 million and $888 million of retained earnings available for payment of common stock dividends at December 31, 2013 and 2012, respectively. These amounts represent the total retained earnings balances at those dates.

Reclassifications and Adjustments

Certain prior period amounts have been reclassified in order to conform to the current period presentation. The following adjustments have been recorded and are not considered material individually or in the aggregate to either the current period or prior period financial results:

Income Tax Adjustments

During 2013, Pepco recorded certain adjustments to correct prior period errors related to income taxes. These adjustments resulted from the completion of additional analysis of deferred tax balances and resulted in an increase in Income tax expense of $4 million for the year ended December 31, 2013.

During 2011, Pepco recorded an adjustment to correct certain income tax errors related to prior periods associated with the interest on uncertain tax positions. The adjustment resulted in an increase in Income tax expense of $1 million for the year ended December 31, 2011.

(3) NEWLY ADOPTED ACCOUNTING STANDARDS

None.

(4) RECENTLY ISSUED ACCOUNTING STANDARDS, NOT YET ADOPTED

Joint and Several Liability Arrangements (ASC 405)

In February 2013, the FASB issued new recognition and disclosure requirements for certain joint and several liability arrangements where the total amount of the obligation is fixed at the reporting date. For arrangements within the scope of this standard, Pepco will be required to include in its liabilities the additional amounts it expects to pay on behalf of its co-obligors, if any. Pepco will also be required to provide additional disclosures including the nature of the arrangements with its co-obligors, the total amounts outstanding under the arrangements between Pepco and its co-obligors, the carrying value of the liability, and the nature and limitations of any recourse provisions that would enable recovery from other entities.

The new requirements are effective retroactively beginning on January 1, 2014, with implementation required for prior periods if joint and several liability arrangement obligations exist as of January 1, 2014. Pepco does not expect this new guidance to have a material impact on its financial statements.

Income Taxes (ASC 740)

In July 2013, the FASB issued new guidance that will require the netting of certain unrecognized tax benefits against a deferred tax asset for a loss or other similar tax carryforward that would apply upon settlement of the uncertain tax position. The new requirements are effective prospectively beginning with Pepco’s March 31, 2014 financial statements for all unrecognized tax benefits existing at the adoption date. Retrospective implementation and early adoption of the guidance are permitted. Pepco does not expect this new guidance to have a material impact on its financial statements.

(5) SEGMENT INFORMATION

The company operates its business as one regulated utility segment, which includes all of its services as described above.

(6) REGULATORY MATTERS

Regulatory Assets and Regulatory Liabilities

The components of Pepco's regulatory asset and liability balances at December 31, 2013 and 2012 are as follows:

	2013	2012
	(millions of dollars)	
Regulatory Assets		
Smart Grid costs (a)	$ 168	$ 159
Recoverable income taxes	107	75
Demand-side management costs (a)	98	45
Incremental storm restoration costs (a)	37	44
MAPP abandonment costs (a)	37	50
Recoverable workers' compensation and long-term disability costs	26	31
Deferred debt extinguishment costs (a)	25	28
Deferred energy supply costs	6	4
Other	59	51
Total Regulatory Assets	$ 563	$ 487
Regulatory Liabilities		
Asset removal costs	$ 102	$ 122
Other	11	19
Total Regulatory Liabilities	$ 113	$ 141

(a) A return is generally earned on these deferrals.

A description for each category of regulatory assets and regulatory liabilities follows:

Smart Grid Costs: Represents advanced metering infrastructure (AMI) costs associated with the installation of smart meters and the early retirement of existing meters throughout Pepco's service territory that are recoverable from customers.

Recoverable Income Taxes: Represents amounts recoverable from Pepco's customers for tax benefits applicable to utility operations that were previously recognized in income tax expense before the company was ordered to account for the tax benefits as deferred income taxes. As the temporary differences between the financial statement basis and tax basis of assets reverse, the deferred recoverable balances are reversed.

Demand-Side Management Costs: Represents recoverable costs associated with customer energy efficiency and conservation programs in Pepco's Maryland jurisdiction.

Incremental Storm Restoration Costs: Represents total incremental storm restoration costs incurred for repair work due to major storm events in 2012 and 2011, including Hurricane Sandy, the June 2012 derecho, Hurricane Irene, and the 2011 severe winter storm, that are recoverable from customers in the Maryland jurisdiction. Pepco's costs related to Hurricane Sandy, the June 2012 derecho, Hurricane Irene and the 2011 severe winter storm are being amortized and recovered in rates, each over a five-year period.

MAPP Abandonment Costs: Represents the probable recovery of abandoned costs prudently incurred in connection with the Mid-Atlantic Power Pathway (MAPP) project which was terminated on August 24, 2012. The regulatory asset includes the costs of land, land rights, supplies and materials, engineering and design, environmental services, and project management and administration. The regulatory asset will be reduced as the result of sale or alternative use of these assets. As of December 31, 2013, these assets were earning a return of 12.8%. For additional information, see "MAPP Project" discussion below.

Recoverable Workers' Compensation and Long-Term Disability Costs: Represents accrued workers' compensation and long-term disability costs for Pepco, which are recoverable from customers when actual claims are paid to employees.

Deferred Debt Extinguishment Costs: Represents the costs of debt extinguishment associated with issuances of debt for which recovery through regulated utility rates is considered probable, and if approved, will be amortized to interest expense during the authorized rate recovery period.

Deferred Energy Supply Costs: The regulatory asset represents primarily deferred costs associated with a net under-recovery of Default Electricity Supply costs incurred by Pepco that are probable of recovery in rates.

Other: Represents miscellaneous regulatory assets that generally are being amortized over 1 to 20 years.

Asset Removal Costs: The depreciation rates for Pepco include a component for removal costs, as approved by the relevant federal and state regulatory commissions. Accordingly, Pepco has recorded regulatory liabilities for its estimate of the difference between incurred removal costs and the amount of removal costs recovered through depreciation rates.

Other: Includes miscellaneous regulatory liabilities.

Rate Proceedings

Bill Stabilization Adjustment

Pepco proposed in each of its respective jurisdictions the adoption of a BSA mechanism to decouple retail distribution revenue from the amount of power delivered to retail customers. The BSA proposal has been approved and implemented for Pepco electric service in Maryland and in the District of Columbia.

Under the BSA, customer distribution rates are subject to adjustment (through a credit or surcharge mechanism), depending on whether actual distribution revenue per customer exceeds or falls short of the revenue-per-customer amount approved by the applicable public service commission.

District of Columbia

On March 8, 2013, Pepco filed an application with the DCPSC to increase its annual electric distribution base rates by approximately $44.8 million (as adjusted by Pepco on December 3, 2013), based on a requested ROE of 10.25%. The requested rate increase seeks to recover expenses associated with Pepco's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. Evidentiary hearings were held in November 2013 and a final DCPSC decision is expected in the first quarter of 2014.

Maryland

In December 2011, Pepco submitted an application with the MPSC to increase its electric distribution base rates. The filing sought approval of an annual rate increase of approximately $68.4 million (subsequently reduced by Pepco to $66.2 million), based on a requested ROE of 10.75%. In July 2012, the MPSC issued an order approving an annual rate increase of approximately $18.1 million, based on an ROE of 9.31%. The order also reduced Pepco's depreciation rates, which lowered annual depreciation and amortization expenses by an estimated $27.3 million. The lower depreciation rates resulted from, among other things, the rebalancing of excess reserves for estimated future removal costs identified in a depreciation study conducted as part of the rate case filing. The identified excess reserves for estimated future removal costs, reported as Regulatory liabilities, were reclassified to Accumulated depreciation among various plant accounts. Among other things, the order additionally authorized Pepco to recover the actual cost of AMI meters installed during the 2011 test year and states that cost recovery for AMI deployment will be allowed in future rate cases in which Pepco demonstrates that the system is cost effective. The new revenue rates and lower depreciation rates were effective on July 20, 2012. The Maryland OPC has sought rehearing on the portion of the order allowing Pepco to recover the costs of AMI meters installed during the test year; that motion remains pending.

On November 30, 2012, Pepco submitted an application with the MPSC to increase its electric distribution base rates. The filing sought approval of an annual rate increase of approximately $60.8 million, based on a requested ROE of 10.25%. The requested rate increase sought to recover expenses associated with Pepco's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. Pepco also proposed a three-year Grid Resiliency Charge rider for recovery of costs totaling approximately $192 million associated with its plan to accelerate investments in infrastructure in a condensed timeframe. Acceleration of resiliency improvements was one of several recommendations included in a September 2012 report from Maryland's Grid Resiliency Task Force (as discussed below under "Resiliency Task Forces"). Specific projects under Pepco's Grid Resiliency Charge plan included acceleration of its tree-trimming cycle, upgrade of 12 additional feeders per year for two years and undergrounding of six distribution feeders. In addition, Pepco proposed a reliability performance-based mechanism that would allow Pepco to earn up to $1 million as an incentive for meeting enhanced reliability goals in 2015, but provided for a credit to customers of up to $1 million in total if Pepco does not meet at least the minimum reliability performance targets. Pepco requested that any credits/charges would flow through the proposed Grid Resiliency Charge rider.

On July 12, 2013, the MPSC issued an order related to Pepco's November 30, 2012 application approving an annual rate increase of approximately $27.9 million, based on an ROE of 9.36%. The order provides for the full recovery of storm restoration costs incurred as a result of recent major storm events, including the derecho storm in June 2012 and Hurricane Sandy in October 2012, by including the related capital costs in the rate base and amortizing the related deferred operation and maintenance expenses of $23.6 million over a five-year period. The order excludes the cost of AMI meters from Pepco's rate base until such time as Pepco demonstrates the cost effectiveness of the AMI system; as a result, costs for AMI meters incurred with respect to the 2012 test year and beyond will be treated as other incremental AMI costs incurred in conjunction with the deployment of the AMI system that are deferred and on which a return is earned, but only until such cost effectiveness has been demonstrated and such costs are included in rates. However, the MPSC's July 2012 order in Pepco's previous electric distribution base rate case, which allowed Pepco to recover the costs of meters installed during the 2011 test year for that case, remains in effect, and the Maryland OPC's motion for rehearing in that case remains pending.

The order also approved a Grid Resiliency Charge for recovery of costs totaling approximately $24.0 million associated with Pepco's proposed plan to accelerate investments related to certain priority feeders, provided that, before implementing the surcharge, Pepco provides additional information to the MPSC related to performance objectives, milestones and costs, and makes annual filings with the MPSC thereafter concerning this project, which will permit the MPSC to establish the applicable Grid Resiliency Charge rider for each following year. The MPSC did not approve the proposed acceleration of the tree-trimming cycle or the undergrounding of six distribution feeders. The MPSC also rejected Pepco's proposed reliability performance-based mechanism. The new rates were effective on July 12, 2013.

On July 26, 2013, Pepco filed a notice of appeal of the July 12, 2013 order in the Circuit Court for the City of Baltimore. Other parties also have filed notices of appeal, which have been consolidated with Pepco's appeal. In its memorandum filed with the appeals court, Pepco asserts that the MPSC erred in failing to grant Pepco an adequate ROE, denying a number of other cost recovery mechanisms and limiting Pepco's test year data to no more than four months of forecasted data in future rate cases. The memoranda filed with the appeals court by the other parties primarily assert that the MPSC erred or acted arbitrarily and capriciously in allowing the recovery of certain costs by Pepco and refusing to reduce Pepco's rate base by known and measurable accumulated depreciation.

On December 4, 2013, Pepco submitted an application with the MPSC to increase its electric distribution base rates. The filing seeks approval of an annual rate increase of approximately $43.3 million, based on a requested ROE of 10.25%. The requested rate increase seeks to recover expenses associated with Pepco's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. A decision is expected in the third quarter of 2014.

Federal Energy Regulatory Commission

On February 27, 2013, the public service commissions and public advocates of the District of Columbia, Maryland, Delaware and New Jersey, as well as the Delaware Municipal Electric Corporation, Inc., filed a joint complaint with the Federal Energy Regulatory Commission (FERC) against Pepco and its affiliates Delmarva Power & Light Company (DPL) and Atlantic City Electric Company (ACE), as well as Baltimore Gas and Electric Company (BGE). The complainants challenged the base ROE and the application of the formula rate process, each associated with the transmission service that Pepco and its utility affiliates provide. The complainants support an ROE within a zone of reasonableness of 6.78% and 10.33%, and have argued for a base ROE of 8.7%. The base ROE currently authorized by FERC for Pepco and its utility affiliates is (i) 11.3% for facilities placed into service after January 1, 2006, and (ii) 10.8% for facilities placed into service prior to 2006. As currently authorized, the 10.8% base ROE for facilities placed into service prior to 2006 is eligible for a 50-basis-point incentive adder for being a member of a regional transmission organization. Pepco believes the allegations in this complaint are without merit and is vigorously contesting it. On April 3, 2013, Pepco filed its answer to this complaint, requesting that FERC dismiss the complaint against it on the grounds that it failed to meet the required burden to demonstrate that the existing rates and protocols are unjust and unreasonable. Pepco cannot predict when a final FERC decision in this proceeding will be issued.

MPSC New Generation Contract Requirement

In September 2009, the MPSC initiated an investigation into whether Maryland electric distribution companies (EDCs) should be required to enter into long-term contracts with entities that construct, acquire or lease, and operate, new electric generation facilities in Maryland. In April 2012, the MPSC issued an order determining that there is a need for one new power plant in the range of 650 to 700 megawatts (MWs) beginning in 2015. The order requires Pepco, its affiliate DPL and BGE (collectively, the Contract EDCs) to negotiate and enter into a contract with the winning bidder of a competitive bidding process in amounts proportional to their relative Standard Offer Service (SOS) loads. Under the contract, the winning bidder will construct a 661 MW natural gas-fired combined cycle generation plant in Waldorf, Maryland, with an expected commercial operation date of June 1, 2015. The order acknowledged the Contract EDCs' concerns about the requirements of the contract and directed them to negotiate with the winning bidder and submit any proposed changes in the contract to the MPSC for approval. The order further specified that each of the Contract EDCs will recover its costs associated with the contract through surcharges on its respective SOS customers.

In April 2012, a group of generating companies operating in the PJM Interconnection, LLC (PJM) region filed a complaint in the U.S. District Court for the District of Maryland challenging the MPSC's order on the grounds that it violates the Commerce Clause and the Supremacy Clause of the U.S. Constitution. In May 2012, the Contract EDCs and other parties filed notices of appeal in circuit courts in Maryland requesting judicial review of the MPSC's order. The Maryland circuit court appeals were consolidated in the Circuit Court for Baltimore City.

On April 16, 2013, the MPSC issued an order approving a final form of the contract and directing the Contract EDCs to enter into the contract with the winning bidder in amounts proportional to their relative SOS loads. On June 4, 2013, Pepco and DPL each entered into identical contracts in accordance with the terms of the MPSC's order; however, under each contract's terms, it will not become effective, if at all, until all legal proceedings related to these contracts and the actions of the MPSC in the related proceeding have been resolved.

On September 30, 2013, the U.S. District Court for the District of Maryland issued a ruling that the MPSC's April 2012 order violated the Supremacy Clause of the U.S. Constitution by attempting to regulate wholesale prices. In contrast, on October 1, 2013, the Maryland Circuit Court for Baltimore City upheld the MPSC's orders requiring the Contract EDCs to enter into the contracts.

On October 24, 2013, the Federal district court issued an order ruling that the contracts are illegal and unenforceable. The Federal district court order and its associated ruling could impact the state circuit court appeal, to which the Contract EDCs are parties, although such impact, if any, cannot be determined at this time. The Contract EDCs, the Maryland Office of People's Counsel and one generating company have appealed the Maryland Circuit Court's decision to the Maryland Court of Special Appeals. In addition, in November 2013 both the winning bidder and the MPSC appealed the Federal district court decision to the U.S. Court of Appeals for the Fourth Circuit. These appeals remain pending.

Assuming the contracts, as currently written, were to become effective by the expected commercial operation date of June 1, 2015, Pepco continues to believe that it may be required to account for its proportional share of the contracts as a derivative instrument at fair value with an offsetting regulatory asset because they would recover any payments under the contracts from SOS customers. Pepco has concluded that any accounting for these contracts would not be required until all legal proceedings related to these contracts and the actions of the MPSC in the related proceeding have been resolved.

Pepco continues to evaluate these proceedings to determine, should the contracts be found to be valid and enforceable, (i) the extent of the negative effect that the contracts may have on Pepco's credit metrics, as calculated by independent rating agencies that evaluate and rate Pepco and its debt issuances, (ii) the effect on Pepco's ability to recover its associated costs of the contracts if a significant number of SOS customers elect to buy their energy from alternative energy suppliers, and (iii) the effect of the contracts on the financial condition, results of operations and cash flows of Pepco.

Resiliency Task Forces

In July 2012, the Maryland governor signed an Executive Order directing his energy advisor, in collaboration with certain state agencies, to solicit input and recommendations from experts on how to improve the resiliency and reliability of the electric distribution system in Maryland. The resulting Grid Resiliency Task Force issued its report in September 2012, in which it made 11 recommendations. The governor forwarded the report to the MPSC in October 2012, urging the MPSC to quickly implement the first four recommendations: (i) strengthen existing reliability and storm restoration regulations; (ii) accelerate the investment necessary to meet the enhanced metrics; (iii) allow surcharge recovery for the accelerated investment; and (iv) implement clearly defined performance metrics into the traditional ratemaking scheme. Pepco's electric distribution base rate case filed with the MPSC on November 30, 2012 attempted to address the Grid Resiliency Task Force recommendations. In July 2013, the MPSC issued an order in the Pepco Maryland electric distribution base rate case that only partially approved the proposed Grid Resiliency Charge. See "Rate Proceedings – Maryland" above for more information about the base rate case.
