In August 2012, the District of Columbia mayor issued an Executive Order establishing the Mayor's Power Line Undergrounding Task Force (the DC Undergrounding Task Force). The stated purpose of the DC Undergrounding Task Force was to pool the collective resources available in the District of Columbia to produce an analysis of the technical feasibility, infrastructure options and reliability implications of undergrounding new or existing overhead distribution facilities in the District of Columbia. These resources included legislative bodies, regulators, utility personnel, experts and other parties who could contribute in a meaningful way to the DC Undergrounding Task Force. On May 13, 2013, the DC Undergrounding Task Force issued a written recommendation endorsing a $1 billion plan of the DC Undergrounding Task Force to underground 60 of the District of Columbia's most outage-prone power lines, which lines would be owned and maintained by Pepco. The legislation providing for implementation of the report's recommendations contemplates that: (i) Pepco would fund approximately

$500 million of the $1 billion estimated cost to complete this project, recovering those costs through surcharges on the electric bills of Pepco District of Columbia customers; (ii) $375 million of the undergrounding project cost would be financed by the District of Columbia's issuance of securitized bonds, which bonds would be repaid through surcharges on the electric bills of Pepco District of Columbia customers (Pepco would not earn a return on or of the cost of the assets funded with the proceeds received from the issuance of the securitized bonds, but ownership and responsibility for the operation and maintenance of such assets would be transferred to Pepco for a nominal amount); and (iii) the remaining amount would be funded through the District of Columbia Department of Transportation's existing capital projects program. This legislation was approved in the Council of the District of Columbia on February 4, 2014 and is awaiting the signature of the Mayor of the District of Columbia. Once signed by the Mayor and transmitted to Congress, the legislation will undergo a 30-day Congressional review period before becoming law, which is expected to occur in the second quarter of 2014. The final step would be DCPSC approval of the underground project plan and financing orders required by the legislation to establish the customer surcharges contemplated by the legislation, a decision on which is expected during the fourth quarter of 2014.

MAPP Project

On August 24, 2012, the board of PJM terminated the MAPP project and removed it from PJM's regional transmission expansion plan. Pepco had been directed to construct the MAPP project, a 152-mile high-voltage interstate transmission line, to address the reliability needs of the region's transmission system. In December 2012, Pepco submitted a filing to FERC seeking recovery of approximately $50 million of abandoned MAPP costs over a five-year recovery period. The FERC filing addressed, among other things, the prudence of the recoverable costs incurred, the proposed period over which the abandoned costs are to be amortized and the rate of return on these costs during the recovery period.

In February 2013, FERC issued an order concluding that the MAPP project was cancelled for reasons beyond the control of Pepco, finding that the prudently incurred costs associated with the abandonment of the MAPP project are eligible to be recovered, and setting for hearing and settlement procedures the prudence of the abandoned costs and the amortization period for those costs.

On December 18, 2013, Pepco submitted a settlement agreement to FERC, which provides for recovery of Pepco's abandoned MAPP costs over a three-year recovery period beginning June 1, 2013. The settlement agreement, which is subject to FERC approval, would resolve all issues concerning the recovery of abandonment costs associated with the cancellation of the MAPP project. Pepco cannot predict the timing or results of a final FERC decision in this proceeding.

As of December 31, 2013, Pepco had a regulatory asset related to the MAPP abandoned costs of approximately $37 million, representing the original filing amount of approximately $50 million of abandoned costs referred to above less: (i) approximately $1 million of disallowed costs written off in 2013; (ii) $4 million of materials transferred to inventories for use on other projects; and (iii) $8 million of amortization expense recorded in 2013. The regulatory asset balance includes the costs of land, land rights, engineering and design, environmental services, and project management and administration.

(7) PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment is comprised of the following:

	Original Cost	Accumulated Depreciation	Net Book Value
		(millions of dollars)	
At December 31, 2013			
Distribution	$5,287	$ 2,027	$ 3,260
Transmission	1,223	444	779
Construction work in progress	312	—	312
Non-operating and other property	488	301	187
Total	$7,310	$ 2,772	$ 4,538
At December 31, 2012			
Distribution	$4,949	$ 1,995	$ 2,954
Transmission	1,166	419	747
Construction work in progress	303	—	303
Non-operating and other property	432	291	141
Total	$6,850	$ 2,705	$ 4,145

The non-operating and other property amounts include balances for general plant, distribution plant and transmission plant held for future use, intangible plant and non-utility property. Utility plant is generally subject to a first mortgage lien.

Capital Leases

Pepco leases its consolidated control center, which is an integrated energy management center used by Pepco to centrally control the operation of its transmission and distribution systems. This lease is accounted for as a capital lease and was initially recorded at the present value of future lease payments. The lease requires semi-annual payments of approximately $8 million over a 25-year period that began in December 1994, and provides for transfer of ownership of the system to Pepco for $1 at the end of the lease term. Under FASB guidance on regulated operations, the amortization of leased assets is modified so that the total interest expense charged on the obligation and amortization expense of the leased asset is equal to the rental expense allowed for rate-making purposes. The amortization expense is included within Depreciation and amortization in the statements of income. This lease is treated as an operating lease for rate-making purposes.

Capital lease assets recorded within Property, plant and equipment at December 31, 2013 and 2012 are comprised of the following:

	Original Cost	Accumulated Amortization (millions of dollars)	Net Book Value
At December 31, 2013			
Transmission	$ 76	$ 41	$ 35
Distribution	76	42	34
Other	3	3	—
Total	$ 155	$ 86	$ 69
At December 31, 2012			
Transmission	$ 76	$ 37	$ 39
Distribution	76	37	39
Other	3	3	—
Total	$ 155	$ 77	$ 78

The approximate annual commitments under capital leases are $15 million for each year 2014 through 2018, and $16 million thereafter.

(8) PENSION AND OTHER POSTRETIREMENT BENEFITS

Pepco accounts for its participation in its parent's single-employer plans, Pepco Holding's non-contributory retirement plan (the PHI Retirement Plan) and the Pepco Holdings, Inc. Welfare Plan for Retirees (the PHI OPEB Plan), as participation in multiemployer plans. For 2013, 2012 and 2011, Pepco was responsible for $34 million, $39 million and $43 million, respectively, of the pension and other postretirement net periodic benefit cost incurred by PHI. Pepco made a discretionary, tax-deductible contribution of zero, $85 million and $40 million to the PHI Retirement Plan for the years ended December 31, 2013, 2012 and 2011, respectively. In addition, Pepco made contributions of $6 million, $5 million and $7 million, respectively, to the PHI OPEB Plan for the years ended December 31, 2013, 2012 and 2011. At December 31, 2013 and 2012, Pepco's Prepaid pension expense of $332 million and $353 million, respectively, and Other postretirement benefit obligations of $61 million and $66 million, respectively, effectively represent assets and benefit obligations resulting from Pepco's participation in the Pepco Holdings benefit plans.

Other Postretirement Benefit Plan Amendments

During 2013, PHI approved two amendments to its other postretirement benefits plan. These amendments impacted the retiree health care and the retiree life insurance benefits, and were effective on January 1, 2014. As a result of the amendments, which were cumulatively significant, PHI remeasured its accumulated postretirement benefit obligation for other postretirement benefits as of July 1, 2013. The remeasurement resulted in a $4 million reduction in Pepco's net periodic benefit cost for other postretirement benefits in 2013. Approximately 38% of net periodic other postretirement benefit costs were capitalized in 2013.

(9) DEBT

Long-Term Debt

The components of long-term debt are shown in the table below:

Type of Debt	Interest Rate	Maturity	2013	2012
			(millions of dollars)	
First Mortgage Bonds	4.95%(a)(b)	2013	$ —	$ 200
	4.65%(a)(b)	2014	175	175
	3.05%	2022	200	200
	6.20%(c)(d)	2022	110	110
	5.75%(a)(b)	2034	100	100
	5.40%(a)(b)	2035	175	175
	6.50%(a)(c)	2037	500	500
	7.90%	2038	250	250
	4.15%	2043	250	—
	4.95%	2043	150	—
Total long-term debt			1,910	1,710
Net unamortized discount			(11)	(9)
Current portion of long-term debt			(175)	(200)
Total net long-term debt			$1,724	$1,501

(a) Represents a series of Collateral First Mortgage Bonds securing a series of senior notes issued by Pepco.
(b) Represents a series of Collateral First Mortgage Bonds (as defined herein) which must be cancelled and released as security for Pepco's obligations under the corresponding series of senior notes or tax-exempt bonds, at such time as Pepco does not have any first mortgage bonds outstanding (other than its Collateral First Mortgage Bonds).
(c) Represents a series of Collateral First Mortgage Bonds which must be cancelled and released as security for Pepco's obligations under the corresponding series of senior notes or tax-exempt bonds, at such time as Pepco does not have any first mortgage bonds outstanding (other than its Collateral First Mortgage Bonds), except that Pepco may not permit such release of collateral unless Pepco substitutes comparable obligations for such collateral.
(d) Represents a series of Collateral First Mortgage Bonds securing a series of senior notes issued by Pepco, which in turn secures a series of tax-exempt bonds issued for the benefit of Pepco.

The outstanding first mortgage bonds are issued under a mortgage and deed of trust and are secured by a first lien on substantially all of Pepco's property, plant and equipment, except for certain property excluded from the lien of the mortgage.

Maturities of Pepco's long-term debt outstanding at December 31, 2013, are $175 million in 2014, zero in 2015 through 2018 and $1,735 million thereafter.

Pepco's long-term debt is subject to certain covenants. As of December 31, 2013, Pepco is in compliance with all such covenants.

The table above does not separately identify $1,060 million in aggregate principal amount of senior notes issued by Pepco and $110 million in aggregate principal amount of tax-exempt bonds issued for the benefit of Pepco. These senior notes are secured by a like amount of first mortgage bonds (Collateral First Mortgage Bonds) of Pepco. In addition, these tax-exempt bonds are secured by a like amount of Collateral First Mortgage Bonds issued by Pepco. The principal terms of each such series of senior notes, or Pepco's obligations in respect of each such series of tax-exempt bonds, are identical to the same terms of the corresponding series of Collateral First Mortgage Bonds. Payments of principal and interest made on a series of such senior notes, or the satisfaction of Pepco's obligations in respect of a series of such tax-exempt bonds, satisfy the corresponding obligations on the related series of Collateral First Mortgage Bonds. For these reasons, each such series of Collateral First Mortgage Bonds and the corresponding senior notes and/or tax-exempt bonds together effectively represent a single financial obligation and are not identified in the table above separately.

Bond Issuances

During 2013, Pepco issued $250 million of 4.15% first mortgage bonds due March 15, 2043 and $150 million of 4.95% first mortgage bonds due November 15, 2043. Net proceeds from the issuance of the 4.15% bonds were used to repay Pepco's outstanding commercial paper and for general corporate purposes. The net proceeds from the 4.95% bonds were used to repay outstanding commercial paper, including commercial paper issued to repay in full at maturity $200 million of 4.95% senior notes due November 15, 2013, plus accrued but unpaid interest thereon. The senior notes were secured by a like principal amount of first mortgage bonds, which under the mortgage and deed of trust were deemed to be satisfied with the repayment of the senior notes.

Bond Redemptions

During 2013, Pepco repaid at maturity $200 million of its 4.95% senior notes, which were secured by a like principal amount of its first mortgage bonds.

Short-Term Debt

Pepco has traditionally used a number of sources to fulfill short-term funding needs, such as commercial paper, short-term notes, and bank lines of credit. Proceeds from short-term borrowings are used primarily to meet working capital needs, but may also be used to temporarily fund long-term capital requirements.

The components of Pepco's short-term debt at December 31, 2013 and 2012 are as follows:

	2013	2012
	(millions of dollars)	
Commercial paper	$ 151	$ 231
Total	$ 151	$ 231

Commercial Paper

Pepco maintains an ongoing commercial paper program to address its short-term liquidity needs. As of December 31, 2013, the maximum capacity available under the program was $500 million, subject to available borrowing capacity under the credit facility.

Pepco had $151 million and $231 million of commercial paper outstanding at December 31, 2013 and 2012, respectively. The weighted average interest rates for commercial paper issued by Pepco during 2013 and 2012 were 0.34% and 0.43%, respectively. The weighted average maturity of all commercial paper issued by Pepco during each of 2013 and 2012 was five days.

Credit Facility

PHI, Pepco, DPL and ACE maintain an unsecured syndicated credit facility to provide for their respective liquidity needs, including obtaining letters of credit, borrowing for general corporate purposes and supporting their commercial paper programs. On August 1, 2011, PHI, Pepco, DPL and ACE entered into an amended and restated credit agreement which, on August 2, 2012, was amended to extend the term of the credit facility to August 1, 2017 and to amend the pricing schedule to decrease certain fees and interest rates payable to the lenders under the facility. On August 1, 2013, as permitted under the existing terms of the credit agreement, a request by PHI, Pepco, DPL and ACE to extend the credit facility termination date to August 1, 2018 was approved. All of the terms and conditions as well as pricing remained the same.

The aggregate borrowing limit under the amended and restated credit facility is $1.5 billion, all or any portion of which may be used to obtain loans and up to $500 million of which may be used to obtain letters of credit. The facility also includes a swingline loan sub-facility, pursuant to which each company may make same day borrowings in an aggregate amount not to exceed 10% of the total amount of the facility. Any swingline loan must be repaid by the borrower within fourteen days of receipt. The credit sublimit is $750 million for PHI and $250 million for each of Pepco, DPL and ACE. The sublimits may be increased or decreased by the individual borrower during the term of the facility, except that (i) the sum of all of the borrower sublimits following any such increase or decrease must equal the total amount of the facility and (ii) the aggregate amount of credit used at any given time by (a) PHI may not exceed $1.25 billion and (b) each of Pepco, DPL or ACE may not exceed the lesser of $500 million and the maximum amount of short-term debt the company is permitted to have outstanding by its regulatory authorities. The total number of the sublimit reallocations may not exceed eight per year during the term of the facility.

The interest rate payable by each company on utilized funds is, at the borrowing company's election, (i) the greater of the prevailing prime rate, the federal funds effective rate plus 0.5% and the one month London Interbank Offered Rate plus 1.0%, or (ii) the prevailing Eurodollar rate, plus a margin that varies according to the credit rating of the borrower.

In order for a borrower to use the facility, certain representations and warranties must be true and correct, and the borrower must be in compliance with specified financial and other covenants, including (i) the requirement that each borrowing company maintain a ratio of total indebtedness to total capitalization of 65% or less, computed in accordance with the terms of the credit agreement, which calculation excludes from the definition of total indebtedness certain trust preferred securities and deferrable interest subordinated debt (not to exceed 15% of total capitalization), (ii) with certain exceptions, a restriction on sales or other dispositions of assets, and (iii) a restriction on the incurrence of liens on the assets of a borrower or any of its significant subsidiaries other than permitted liens. The credit agreement contains certain covenants and other customary agreements and requirements that, if not complied with, could result in an event of default and the acceleration of repayment obligations of one or more of the borrowers thereunder. Each of the borrowers was in compliance with all covenants under this facility as of December 31, 2013.

The absence of a material adverse change in PHI's business, property, results of operations or financial condition is not a condition to the availability of credit under the credit agreement. The credit agreement does not include any rating triggers.

As of December 31, 2013 and 2012, the amount of cash plus borrowing capacity under the credit facility available to meet the liquidity needs of PHI's utility subsidiaries in the aggregate was $332 million and $477 million, respectively. Pepco's borrowing capacity under the credit facility at any given time depends on the amount of the subsidiary borrowing capacity being utilized by DPL and ACE and the portion of the total capacity being used by PHI.

(10) INCOME TAXES

Pepco, as a direct subsidiary of PHI, is included in the consolidated federal income tax return of PHI. Federal income taxes are allocated to Pepco pursuant to a written tax sharing agreement that was approved by the Securities and Exchange Commission in connection with the establishment of PHI as a holding company. Under this tax sharing agreement, PHI's consolidated federal income tax liability is allocated based upon PHI's and its subsidiaries' separate taxable income or loss.

The provision for income taxes, reconciliation of income tax expense, and components of deferred income tax liabilities (assets) are shown below.

Provision for Income Taxes

	For the Year Ended December 31, 2013	2012	2011
		(millions of dollars)	
Current Tax Benefit			
Federal	$ (39)	$ (84)	$ (19)
State and local	(1)	(27)	(16)
Total Current Tax Benefit	(40)	(111)	(35)
Deferred Tax Expense (Benefit)			
Federal	96	127	54
State and local	24	33	19
Investment tax credit amortization	(1)	(1)	(2)
Total Deferred Tax Expense	119	159	71
Total Income Tax Expense	$ 79	$ 48	$ 36

Reconciliation of Income Tax Expense

	For the Year Ended December 31, 2013		2012		2011	
			(millions of dollars)			
Income tax at Federal statutory rate	$ 80	35.0%	$ 61	35.0%	$47	35.0 %
Increases (decreases) resulting from:						
State income taxes, net of Federal effect	13	5.7%	10	5.7%	8	5.5%
Asset removal costs	(14)	(6.1)%	(11)	(6.3)%	(7)	(5.0)%
Change in estimates and interest related to uncertain and effectively settled tax positions	(3)	(1.3)%	(11)	(6.3)%	(9)	(6.6)%
Other, net	3	1.2%	(1)	(0.5)%	(3)	(2.2)%
Income Tax Expense	$ 79	34.5%	$ 48	27.6%	$36	26.7%

Year ended December 31, 2013

Pepco's effective income tax rate for the year ended December 31, 2013 of 34.5% reflects income tax benefits totaling $3 million related to uncertain and effectively settled tax positions.

On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which Pepco is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. As a result of the court's ruling in this case, PHI determined in the first quarter of 2013 that it could no longer support its current assessment with respect to the likely outcome of tax positions associated with its cross-border energy lease investments held by its wholly-owned subsidiary Potomac Capital Investment Corporation, and PHI recorded an after-tax charge of $377 million in the first quarter of 2013. Included in the $377 million charge was an after-tax interest charge of $54 million and this amount was allocated to each member of PHI's consolidated group as if each member was a separate taxpayer, resulting in Pepco recording a $5 million (after-tax) interest benefit in the first quarter of 2013.

Year ended December 31, 2012

Pepco's effective income tax rate for the year ended December 31, 2012 of 27.6% primarily reflects tax benefits related to asset removal costs and changes in estimates and interest related to uncertain and effectively settled tax positions.

During 2012, Pepco recorded income tax benefits of $10 million related to uncertain and effectively settled tax positions primarily due to the effective settlement with the Internal Revenue Service (IRS) with respect to the methodology used historically to calculate deductible mixed service costs and the expiration of the statute of limitations associated with an uncertain tax position.

The effective income tax rate also reflects an increase in deductible asset removal costs for Pepco in 2012 related to a higher level of asset retirements.

Year ended December 31, 2011

Pepco's effective income tax rate for the year ended December 31, 2011 of 26.7% includes income tax benefits totaling $9 million related to uncertain and effectively settled tax positions.

During 2011, PHI reached a settlement with the IRS with respect to interest due on its federal tax liabilities related to the November 2010 audit settlement for years 1996 through 2002. In connection with this agreement, PHI reallocated certain amounts that have been on deposit with the IRS since 2006 among liabilities in the settlement years and subsequent years. Primarily related to the settlement and reallocations, Pepco recorded a tax benefit of $5 million (after-tax) in the second quarter of 2011.

During the third quarter of 2011, Pepco recalculated interest on its uncertain tax positions for open tax years based on different assumptions related to the application of its deposit made with the IRS in 2006. This resulted in an additional tax expense of $1 million (after-tax).

During 2011, Pepco decided to adopt the safe harbor tax accounting method for certain repairs pursuant to IRS guidance. As a result, Pepco reversed $23 million of previously recorded liabilities on uncertain tax positions and reversed the associated $1 million of accrued interest.

In May 2011, Pepco received refunds of approximately $5 million and recorded tax benefits of approximately $4 million (after-tax) related to the filing of amended state tax returns. These amended returns reduced state taxable income due to an increase in tax basis on certain prior years' asset dispositions.

Components of Deferred Income Tax Liabilities (Assets)

	At December 31, 2013	At December 31, 2012
	(millions of dollars)	
Deferred Tax Liabilities (Assets)		
Depreciation and other basis differences related to plant and equipment	$1,240	$1,105
Pension and other postretirement benefits	105	111
Deferred taxes on amounts to be collected through future rates	43	28
Federal and state net operating losses	(169)	(174)
Other	145	140
Total Deferred Tax Liabilities, net	1,364	1,210
Deferred tax assets included in Current Assets	48	9
Total Deferred Tax Liabilities, net non-current	$1,412	$1,219

The net deferred tax liability represents the tax effect, at presently enacted tax rates, of temporary differences between the financial statement basis and tax basis of assets and liabilities. The portion of the net deferred tax liability applicable to Pepco's operations, which has not been reflected in current service rates, represents income taxes recoverable through future rates, net, and is recorded as a regulatory asset on the balance sheet. No valuation allowance for deferred tax assets was required or recorded at December 31, 2013 and 2012. Federal and state net operating losses generally expire over 20 years from 2029 to 2032.

The Tax Reform Act of 1986 repealed the investment tax credit for property placed in service after December 31, 1985, except for certain transition property. Investment tax credits previously earned on Pepco's property continue to be amortized to income over the useful lives of the related property.

Reconciliation of Beginning and Ending Balances of Unrecognized Tax Benefits

	2013	2012	2011
		(millions of dollars)	
Balance as of January 1	$ 91	$ 173	$190
Tax positions related to current year:			
Additions	1	—	—
Reductions	—	—	—
Tax positions related to prior years:			
Additions	12	60	12
Reductions	(3)	(142)(a)	(26)
Settlements	—	—	(3)
Balance as of December 31	$101	$ 91	$173

(a) These reductions of unrecognized tax benefits in 2012 primarily relate to a resolution reached with the IRS for determining deductible mixed service costs for additions to property, plant and equipment.

Unrecognized Benefits That, If Recognized, Would Affect the Effective Tax Rate

Unrecognized tax benefits are related to tax positions that have been taken or are expected to be taken in tax returns that are not recognized in the financial statements because management has either measured the tax benefit at an amount less than the benefit claimed, or expected to be claimed, or has concluded that it is not more likely than not that the tax position will be ultimately sustained. For the majority of these tax positions, the ultimate deductibility is highly certain, but there is uncertainty about the timing of such deductibility. At December 31, 2013, Pepco had less than $1 million of unrecognized tax benefits that, if recognized, would lower the effective tax rate.

Interest and Penalties

Pepco recognizes interest and penalties relating to its uncertain tax positions as an element of income tax expense. For the years ended December 31, 2013, 2012 and 2011, Pepco recognized $5 million of pre-tax interest income ($3 million after-tax), $18 million of pre-tax interest income ($11 million after-tax), and $8 million of pre-tax interest income ($5 million after-tax), respectively, as a component of income tax expense. As of December 31, 2013, 2012 and 2011, Pepco had accrued interest receivable of $9 million, accrued interest receivable of $5 million and accrued interest payable of $6 million, respectively, related to effectively settled and uncertain tax positions.

Possible Changes to Unrecognized Tax Benefits

It is reasonably possible that the amount of the unrecognized tax benefit with respect to some of Pepco's uncertain tax positions will significantly increase or decrease within the next 12 months. PHI and its subsidiaries have entered into discussions with the IRS with the intention of seeking a settlement of all tax issues of Pepco for open tax years 2001 through 2011. PHI currently believes that it is possible that a settlement with the IRS may be reached in 2014, which could significantly impact the balances of unrecognized tax benefits and the related interest accruals of Pepco. At this time, it is estimated that there will be a $65 million to $85 million decrease in unrecognized tax benefits within the next 12 months.

Tax Years Open to Examination

Pepco, as a direct subsidiary of PHI, is included on PHI's consolidated Federal income tax return. Pepco's federal income tax liabilities for all years through 2002 have been determined, subject to adjustment to the extent of any net operating loss or other loss or credit carrybacks from subsequent years. The open tax years for the significant states where Pepco files state income tax returns (District of Columbia and Maryland) are the same as for the Federal returns. As a result of the final determination of these years, Pepco filed amended state returns requesting $20 million in refunds which are subject to review by the various states. To date, Pepco has received $4 million in refunds and legislation has been enacted in the District of Columbia (subject to a 30-day Congressional review period before becoming law) which will allow for the recovery of the remaining $16 million in refunds.

Final IRS Regulations on Repair of Tangible Property

In September 2013, the IRS issued final regulations on expense versus capitalization of repairs with respect to tangible personal property. The regulations are effective for tax years beginning on or after January 1, 2014, and provide an option to early adopt the final regulations for tax years beginning on or after January 1, 2012. It is expected that the IRS will issue revenue procedures that will describe how taxpayers may implement the final regulations. The final repair regulations retain the operative rule that the Unit of Property for network assets is determined by the taxpayer's particular facts and circumstances except as provided in published guidance. In 2012, with the filing of its 2011 tax return, PHI filed a request for an automatic change in accounting method related to repairs of its network assets in accordance with IRS Revenue Procedure 2011-43. Pepco does not expect the effects of the final regulations to be significant and will continue to evaluate the impact of the new guidance on its financial statements.

Other Taxes

Taxes other than income taxes for each year are shown below. These amounts are recoverable through rates.

	2013	2012	2011
	(millions of dollars)		
Gross Receipts/Delivery	$108	$106	$109
Property	45	46	44
County Fuel and Energy	153	160	170
Environmental, Use and Other	62	60	59
Total	$368	$372	$382

(11) FAIR VALUE DISCLOSURES

Financial Instruments Measured at Fair Value on a Recurring Basis

Pepco applies FASB guidance on fair value measurement and disclosures (ASC 820) that established a framework for measuring fair value and expanded disclosures about fair value measurements. As defined in the guidance, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). Pepco utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated or generally unobservable. Accordingly, Pepco utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The guidance establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3).

The following tables set forth, by level within the fair value hierarchy, Pepco's financial assets and liabilities that were accounted for at fair value on a recurring basis as of December 31, 2013 and 2012. As required by the guidance, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Pepco's assessment of the significance of a particular input to the fair value measurement requires the exercise of judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

	Fair Value Measurements at December 31, 2013			
Description	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1) (a)	Significant Other Observable Inputs (Level 2) (a)	Significant Unobservable Inputs (Level 3)
		(millions of dollars)		
ASSETS				
Restricted cash equivalents				
Treasury fund	$ 3	$ 3	$ —	$ —
Executive deferred compensation plan assets				
Money market funds	13	13	—	—
Life insurance contracts	61	—	43	18
	$ 77	$ 16	$ 43	$ 18
LIABILITIES				
Executive deferred compensation plan liabilities				
Life insurance contracts	$ 7	$ —	$ 7	$ —
	$ 7	$ —	$ 7	$ —

(a) There were no transfers of instruments between level 1 and level 2 valuation categories during the year ended December 31, 2013.

	Fair Value Measurements at December 31, 2012			
Description	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1) (a)	Significant Other Observable Inputs (Level 2) (a)	Significant Unobservable Inputs (Level 3)
		(millions of dollars)		
ASSETS				
Executive deferred compensation plan assets				
Money market funds	$ 15	$ 15	$ —	$ —
Life insurance contracts	56	—	38	18
	$ 71	$ 15	$ 38	$ 18
LIABILITIES				
Executive deferred compensation plan liabilities				
Life insurance contracts	$ 9	$ —	$ 9	$ —
	$ 9	$ —	$ 9	$ —

(a) There were no transfers of instruments between level 1 and level 2 valuation categories during the year ended December 31, 2012.

Pepco classifies its fair value balances in the fair value hierarchy based on the observability of the inputs used in the fair value calculation as follows:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 – Pricing inputs are other than quoted prices in active markets included in level 1, which are either directly or indirectly observable as of the reporting date. Level 2 includes those financial instruments that are valued using broker quotes in liquid markets and other observable data. Level 2 also includes those financial instruments that are valued using methodologies that have been corroborated by observable market data through correlation or by other means. Significant assumptions are observable in the marketplace throughout the full term of the instrument and can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace.

Executive deferred compensation plan assets and liabilities categorized as level 2 consist of life insurance policies and certain employment agreement obligations. The life insurance policies are categorized as level 2 assets because they are valued based on the assets underlying the policies, which consist of short-term cash equivalents and fixed income securities that are priced using observable market data and can be liquidated for the value of the underlying assets as of December 31, 2013. The level 2 liability associated with the life insurance policies represents a deferred compensation obligation, the value of which is tracked via underlying insurance sub-accounts. The sub-accounts are designed to mirror existing mutual funds and money market funds that are observable and actively traded.

The value of certain employment agreement obligations (which are included in life insurance contracts in the tables above) is derived using a discounted cash flow valuation technique. The discounted cash flow calculations are based on a known and certain stream of payments to be made over time that are discounted to determine their net present value. The primary variable input, the discount rate, is based on market-corroborated and observable published rates. These obligations have been classified as level 2 within the fair value hierarchy because the payment streams represent contractually known and certain amounts and the discount rate is based on published, observable data.

Level 3 – Pricing inputs that are significant and generally less observable than those from objective sources. Level 3 includes those financial instruments that are valued using models or other valuation methodologies.

Executive deferred compensation plan assets include certain life insurance policies that are valued using the cash surrender value of the policies, net of loans against those policies. The cash surrender values do not represent a quoted price in an active market; therefore, those inputs are unobservable and the policies are categorized as level 3. Cash surrender values are provided by third parties and reviewed by Pepco for reasonableness.

Reconciliations of the beginning and ending balances of Pepco’s fair value measurements using significant unobservable inputs (Level 3) for the years ended December 31, 2013 and 2012 are shown below.

	Life Insurance Contracts	
	Year Ended December 31,	
	2013	**2012**
	(millions of dollars)	
Balance as of January 1	$ 18	$ 17
Total gains (losses) (realized and unrealized):		
Included in income	4	4
Included in accumulated other comprehensive loss	—	—
Purchases	—	—
Issuances	(3)	(3)
Settlements	(1)	—
Transfers in (out) of level 3	—	—
Balance as of December 31	$ 18	$ 18

The breakdown of realized and unrealized gains on level 3 instruments included in income as a component of Other operation and maintenance expense for the periods below were as follows:

	Year Ended December 31, 2013	Year Ended December 31, 2012
	(millions of dollars)	
Total gains included in income for the period	$ 4	$ 4
Change in unrealized gains relating to assets still held at reporting date	$ 4	$ 4

Other Financial Instruments

The estimated fair values of Pepco's Long-term debt instruments that are measured at amortized cost in Pepco's financial statements and the associated level of the estimates within the fair value hierarchy as of December 31, 2013 and 2012 are shown in the tables below. As required by the fair value measurement guidance, debt instruments are classified in their entirety within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. Pepco's assessment of the significance of a particular input to the fair value measurement requires the exercise of judgment, which may affect the valuation of fair value debt instruments and their placement within the fair value hierarchy levels.

The fair value of Long-term debt categorized as level 2 is based on a blend of quoted prices for the debt and quoted prices for similar debt on the measurement date. The blend places more weight on current pricing information when determining the final fair value measurement. The fair value information is provided by brokers and Pepco reviews the methodologies and results.

	Fair Value Measurements at December 31, 2013			
Description	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(millions of dollars)			
LIABILITIES				
Debt instruments				
Long-term debt (a)	$2,127	$ —	$ 2,127	$ —
	$2,127	$ —	$ 2,127	$ —

(a) The carrying amount for Long-term debt is $1,899 million as of December 31, 2013.

	Fair Value Measurements at December 31, 2012			
Description	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1)(a)	Significant Other Observable Inputs (Level 2)(a)	Significant Unobservable Inputs (Level 3)
	(millions of dollars)			
LIABILITIES				
Debt instruments				
Long-term debt (b)	$2,160	$ —	$ 2,160	$ —
	$2,160	$ —	$ 2,160	$ —

(a) Certain debt instruments that were categorized as level 1 at December 31, 2012, have been reclassified as level 2 to conform to the current period presentation.
(b) The carrying amount for Long-term debt is $1,701 million as of December 31, 2012.

The carrying amount of all other financial instruments in the accompanying financial statements approximate fair value.

(12) COMMITMENTS AND CONTINGENCIES

General Litigation

From time to time, Pepco is named as a defendant in litigation, usually relating to general liability or auto liability claims that resulted in personal injury or property damage to third parties. Pepco is self-insured against such claims up to a certain self-insured retention amount and maintains insurance coverage against such claims at higher levels, to the extent deemed prudent by management. In addition, Pepco's contracts with its vendors generally require the vendors to name Pepco as an additional insured for the amount at least equal to Pepco's self-insured retention. Further, Pepco's contracts with its vendors require the vendors to indemnify Pepco for various acts and activities that may give rise to claims against Pepco. Loss contingency liabilities for both asserted and unasserted claims are recognized if it is probable that a loss will result from such a claim and if the amounts of the losses can be reasonably estimated. Although the outcome of the claims and proceedings cannot be predicted with any certainty, management believes that there are no existing claims or proceedings that are likely to have a material adverse effect on Pepco's financial condition, results of operations or cash flows. At December 31, 2013, Pepco had loss contingency liabilities for general litigation totaling approximately $19 million (including amounts related to the matter specifically described below) and the portion of these loss contingency liabilities in excess of the self-insured retention amount was substantially offset by insurance receivables.

Substation Injury Claim

In May 2013, a contract worker erecting a scaffold at a Pepco substation came into contact with an energized station service feeder and suffered serious injuries. In August 2013, the individual filed suit against Pepco in the Circuit Court for Montgomery County, Maryland, seeking damages for medical expenses, loss of future earning capacity, pain and suffering and the cost of a life care plan aggregating to a maximum claim of approximately $28.1 million. Discovery is ongoing in the case and, if a settlement cannot be reached with respect to this matter, a trial is expected to begin in October 2014. Pepco has notified its insurers of the incident and believes that the insurance policies in force at the time of the incident, including the policies of the contractor performing the scaffold work (which name Pepco as an additional insured), will offset substantially all of Pepco's costs associated with the resolution of this matter, including Pepco's self-insured retention amount. At December 31, 2013, Pepco has concluded that a loss is probable with respect to this matter and has recorded an estimated loss contingency liability, which is included in the liability for general litigation referred to above as of December 31, 2013. Pepco has also concluded as of December 31, 2013 that realization of its insurance claims associated with this matter is probable and, accordingly, has recorded an estimated insurance receivable offsetting substantially all of the related loss contingency liability.

Environmental Matters

Pepco is subject to regulation by various federal, regional, state and local authorities with respect to the environmental effects of its operations, including air and water quality control, solid and hazardous waste disposal and limitations on land use. Although penalties assessed for violations of environmental laws and regulations are not recoverable from customers of Pepco, environmental clean-up costs incurred by Pepco generally are included in its cost of service for ratemaking purposes. The total accrued liabilities for the environmental contingencies of Pepco described below at December 31, 2013 are summarized as follows:

	Transmission and Distribution	Legacy Generation - Regulated	Total
	(millions of dollars)		
Balance as of January 1	$ 14	$ 3	$ 17
Accruals	5	—	5
Payments	(1)	—	(1)
Balance as of December 31	18	3	21
Less amounts in Other Current Liabilities	2	—	2
Amounts in Other Deferred Credits	$ 16	$ 3	$ 19

Peck Iron and Metal Site

The U.S. Environmental Protection Agency (EPA) informed Pepco in a May 2009 letter that Pepco may be a potentially responsible party (PRP) under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) with respect to the cleanup of the Peck Iron and Metal site in Portsmouth, Virginia, and for costs EPA has incurred in cleaning up the site. The EPA letter states that Peck Iron and Metal purchased, processed, stored and shipped metal scrap from military bases, governmental agencies and businesses and that Peck's metal scrap operations resulted in the improper storage and disposal of hazardous substances. EPA bases its allegation that Pepco arranged for disposal or treatment of hazardous substances sent to the site on information provided by former Peck Iron and Metal personnel, who informed EPA that Pepco was a customer at the site. Pepco has advised EPA by letter that its records show no evidence of any sale of scrap metal by Pepco to the site. Even if EPA has such records and such sales did occur, Pepco believes that any such scrap metal sales may be entitled to the recyclable material exemption from CERCLA liability. In a Federal Register notice published in November 2009, EPA placed the Peck Iron and Metal site on the National Priorities List. The National Priorities List, among other things, serves as a guide to EPA in determining which sites warrant further investigation to assess the nature and extent of the human health and environmental risks associated with a site. In September 2011, EPA initiated a remedial investigation/feasibility study (RI/FS) using federal funds. Pepco cannot at this time estimate an amount or range of reasonably possible loss associated with this RI/FS, any remediation activities to be performed at the site or any other costs that EPA might seek to impose on Pepco.

Ward Transformer Site

In April 2009, a group of PRPs with respect to the Ward Transformer site in Raleigh, North Carolina, filed a complaint in the U.S. District Court for the Eastern District of North Carolina, alleging cost recovery and/or contribution claims against a number of entities, including Pepco, based on its alleged sale of transformers to Ward Transformer, with respect to past and future response costs incurred by the PRP group in performing a removal action at the site. In a March 2010 order, the court denied the defendants' motion to dismiss. The litigation is moving forward with certain "test case" defendants (not including Pepco) filing summary judgment motions regarding liability. The case has been stayed as to the remaining defendants pending rulings upon the test cases. In a January 31, 2013 order, the Federal district court granted summary judgment for the test case defendant whom plaintiffs alleged was liable based on its sale of transformers to Ward Transformer. The Federal district court's order, which plaintiffs have appealed to the U.S. Court of Appeals for the Fourth Circuit, addresses only the liability of the test case defendant. Pepco has concluded that a loss is reasonably possible with respect to this matter, but is unable to estimate an amount or range of reasonably possible losses to which it may be exposed. Pepco does not believe that it had extensive business transactions, if any, with the Ward Transformer site.

Benning Road Site

In September 2010, PHI received a letter from EPA identifying the Benning Road location, consisting of a generation facility operated by Pepco Energy Services until the facility was deactivated in June 2012, and a transmission and distribution facility operated by Pepco, as one of six land-based sites potentially contributing to contamination of the lower Anacostia River. The letter stated that the principal contaminants of concern are polychlorinated biphenyls and polycyclic aromatic hydrocarbons. In December 2011, the U.S. District Court for the District of Columbia approved a consent decree entered into by Pepco and Pepco Energy Services with the District of Columbia Department of the Environment (DDOE), which requires Pepco and Pepco Energy Services to conduct a RI/FS for the Benning Road site and an approximately 10 to 15 acre portion of the adjacent Anacostia River. The RI/FS will form the basis for DDOE's selection of a remedial action for the Benning Road site and for the Anacostia River sediment associated with the site. The consent decree does not obligate Pepco or Pepco Energy Services to pay for or perform any remediation work, but it is anticipated that DDOE will look to the companies to assume responsibility for cleanup of any conditions in the river that are determined to be attributable to past activities at the Benning Road site.

In December 2012, DDOE approved the RI/FS work plan. RI/FS field work commenced in January 2013 and is still in progress. In October 2013, Pepco and Pepco Energy Services submitted a work plan addendum for approval by DDOE identifying the location of groundwater monitoring wells to be installed at the site and sampled as the last phase of the field work. The work plan addendum has been revised in response to comments from DDOE, and it is expected that the addendum will be approved and the next phase of field work will commence before the end of the first quarter of 2014. Once all of the field work has been completed, Pepco and Pepco Energy Services will prepare RI/FS reports for review and approval by DDOE after solicitation and consideration of public comment. The next status report to the court is due on May 24, 2014.

The remediation costs accrued for this matter are included in the table above in the columns entitled "Transmission and Distribution" and "Legacy Generation – Regulated."

Potomac River Mineral Oil Release

In January 2011, a coupling failure on a transformer cooler pipe resulted in a release of non-toxic mineral oil at Pepco's Potomac River substation in Alexandria, Virginia. An overflow of an underground secondary containment reservoir resulted in approximately 4,500 gallons of mineral oil flowing into the Potomac River.

Beginning in March 2011, DDOE issued a series of compliance directives requiring Pepco to prepare an incident report, provide certain records, and prepare and implement plans for sampling surface water and river sediments and assessing ecological risks and natural resources damages. Pepco completed field sampling during the fourth quarter of 2011 and submitted sampling results to DDOE during the second quarter of 2012. Pepco is continuing discussions with DDOE regarding the need for any further response actions but expects that additional monitoring of shoreline sediments may be required.

In June 2012, Pepco commenced discussions with DDOE regarding a possible consent decree that would resolve DDOE's threatened enforcement action, including civil penalties, for alleged violation of the District's Water Pollution Control Law, as well as for damages to natural resources. Pepco and DDOE have reached an agreement in principle that would consist of a combination of a civil penalty and Supplemental Environmental Projects (SEPs) with a total cost to Pepco of approximately $1 million. DDOE has endorsed Pepco's proposed SEP involving the installation and operation of a trash collection system at a stormwater outfall that drains to the Anacostia River. DDOE and Pepco are completing negotiations on the text of a consent decree to document the settlement of DDOE's enforcement action and a written statement of work describing the details of the trash collection system SEP. It is expected that the consent decree will be filed with the District of Columbia Superior Court by the end of the first quarter of 2014, with a request that the court approve the consent decree following a period of at least 30 days for public comment. Discussions will proceed separately with DDOE and the federal resource trustees regarding the settlement of a natural resource damage (NRD) claim under federal law. Based on discussions to date, Pepco does not believe that the resolution of DDOE's enforcement action or the federal NRD claim will have a material adverse effect on its financial condition, results of operations or cash flows.

As a result of the mineral oil release, Pepco implemented certain interim operational changes to the secondary containment systems at the facility which involve pumping accumulated storm water to an aboveground holding tank for off-site disposal. In December 2011, Pepco completed the installation of a treatment system designed to allow automatic discharge of accumulated storm water from the secondary containment system. Pepco currently is seeking DDOE's and EPA's approval to commence operation of the new system on a pilot basis to demonstrate its effectiveness in meeting both secondary containment requirements and water quality standards related to the discharge of storm water from the facility. In the meantime, Pepco is continuing to use the aboveground holding tank to manage storm water from the secondary containment system. Pepco also is evaluating other technical and regulatory options for managing storm water from the secondary containment system as alternatives to the proposed treatment system discharge currently under discussion with EPA and DDOE.

The amount accrued for this matter is included in the table above in the column entitled "Transmission and Distribution."

Metal Bank Site

In the first quarter of 2013, the National Oceanic and Atmospheric Administration (NOAA) contacted Pepco on behalf of itself and other federal and state trustees to request that Pepco execute a tolling agreement to facilitate settlement negotiations concerning natural resource damages allegedly caused by releases of hazardous substances, including polychlorinated biphenyls, at the Metal Bank Superfund Site located in Philadelphia, Pennsylvania. Pepco has executed the tolling agreement and will participate in settlement discussions with the NOAA, the trustees and other PRPs.

The amount accrued for this matter is included in the table above in the column entitled "Transmission and Distribution."

Brandywine Fly Ash Disposal Site

In February 2013, Pepco received a letter from the Maryland Department of the Environment (MDE) requesting that Pepco investigate the extent of waste on a Pepco right-of-way that traverses the Brandywine fly ash disposal site in Brandywine, Prince George's County, Maryland, owned by GenOn MD Ash Management, LLC (GenOn). In July 2013, while reserving its rights and related defenses under a 2000 asset purchase and sale agreement covering the sale of this site, Pepco indicated its willingness to investigate the extent of, and propose an appropriate closure plan to address, ash on the right-of-way. Pepco submitted a schedule for development of a closure plan to MDE on September 30, 2013 and, by letter dated October 18, 2013, MDE approved the schedule.

Pepco has determined that a loss associated with this matter for Pepco is probable and has estimated that the costs for implementation of a closure plan and cap on the site are in the range of approximately \$3 million to \$6 million. Pepco believes that the costs incurred in this matter will be recoverable from GenOn under the 2000 sale agreement.

The amount accrued for this matter is included in the table above in the column entitled "Transmission and Distribution."

Watts Branch Insulating Fluid Release

On September 13, 2013, a Washington Metropolitan Area Transit Authority contractor damaged a Pepco underground transmission feeder while drilling a grout column for a subway tunnel under a city street. The damage caused the release of approximately 11,250 gallons of insulating fluid, a small amount of which reached the Watts Branch, a tributary of the Anacostia River. The U.S. Coast Guard (USCG) issued a notice of federal interest for an oil pollution incident, informing Pepco of its responsibility under the Oil Pollution Act of 1990 for removal costs and damages from the release. In addition, on September 25, 2013, DDOE issued a compliance directive that required Pepco to prepare an incident investigation report describing the events leading up to the release. The compliance directive also required Pepco to prepare work plans for sampling the insulating fluid and for developing and implementing a biological assessment and physical habitat quality assessment to be conducted in Watts Branch. Pepco prepared the incident investigation report and work plans and submitted them to DDOE and USCG. In December 2013, Pepco received and responded to an EPA information request regarding this incident.

Pepco believes that a loss in this matter is probable; however, the costs to resolve this matter are expected to be less than $1 million and are being expensed as incurred. Pepco further believes that the costs incurred will be recoverable from the party or parties responsible for the release. On December 4, 2013, the USCG delivered a Notice of Violation with respect to this matter, which imposed a $3,000 penalty on Pepco, which Pepco has paid.

District of Columbia Tax Legislation

In 2011, the Council of the District of Columbia approved the Fiscal Year 2012 Budget Support Act of 2011, which requires that corporate taxpayers in the District of Columbia calculate taxable income allocable or apportioned to the District of Columbia by reference to the income and apportionment factors applicable to commonly controlled entities organized within the United States that are engaged in a unitary business. In the aggregate, this new tax reporting method reduced pre-tax earnings for the year ended December 31, 2011 by less than $1 million. During 2012, the District of Columbia Office of Tax and Revenue adopted regulations to implement this reporting method. PHI has analyzed these regulations and determined that the regulations did not impact PHI’s results of operations for the years ended December 31, 2013 and 2012.

Contractual Obligations

Power Purchase Contracts

As of December 31, 2013, Pepco had no contractual obligations under non-derivative power purchase contracts.

Lease Commitments

Rental expense for operating leases was $7 million, $6 million and $4 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Total future minimum operating lease payments for Pepco as of December 31, 2013 are $6 million in 2014, $6 million in 2015, $6 million in 2016, $5 million in 2017, $4 million in 2018 and $21 million thereafter.

(13) RELATED PARTY TRANSACTIONS

PHI Service Company provides various administrative and professional services to PHI and its regulated and unregulated subsidiaries, including Pepco. The cost of these services is allocated in accordance with cost allocation methodologies set forth in the service agreement using a variety of factors, including the subsidiaries' share of employees, operating expenses, assets and other cost methods. These intercompany transactions are eliminated by PHI in consolidation and no profit results from these transactions at PHI. PHI Service Company costs directly charged or allocated to Pepco for the years ended December 31, 2013, 2012 and 2011 were approximately $209 million, $211 million and $185 million, respectively.

Pepco Energy Services performs utility maintenance services and high voltage underground transmission cabling, including services that are treated as capital costs, for Pepco. Amounts charged to Pepco by Pepco Energy Services for the years ended December 31, 2013, 2012 and 2011 were approximately $20 million, $16 million and $20 million, respectively.

As of December 31, 2013 and 2012, Pepco had the following balances on its balance sheets due to related parties:

	2013	2012
	(millions of dollars)	
(Payable to) Receivable From Related Party (current) (a)		
PHI Service Company	$ (25)	$ (22)
Pepco Energy Services (b)	(7)	(18)
Other	—	(1)
Total	$ (32)	$ (41)

(a) Included in Accounts payable due to associated companies.
(b) Pepco bills customers on behalf of Pepco Energy Services where Pepco Energy Services has performed work for certain government agencies under a General Services Administration area-wide agreement. Amount also includes charges for utility work performed by Pepco Energy Services on behalf of Pepco. Prior to the wind-down of Pepco Energy Services' retail electric and natural gas businesses, Pepco billed customers on behalf of Pepco Energy Services where customers had selected Pepco Energy Services as their alternative energy supplier.

(14) QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

The quarterly data presented below reflect all adjustments necessary, in the opinion of management, for a fair presentation of the interim results. Quarterly data normally vary seasonally because of temperature variations and differences between summer and winter rates. Therefore, comparisons by quarter within a year are not meaningful.

	2013				
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
	(millions of dollars)				
Total Operating Revenue	$ 477	$ 469	$ 605	$ 475	$2,026
Total Operating Expenses	430	389	476	410	1,705
Operating Income	47	80	129	65	321
Other Expenses	(22)	(23)	(23)	(24)	(92)
Income Before Income Tax Expense	25	57	106	41	229
Income Tax Expense	2(a)	20	40	17	79
Net Income	$ 23	$ 37	$ 66	$ 24	$ 150

(a) Includes tax benefits of $5 million (after-tax) allocated to Pepco associated with interest on uncertain and effectively settled tax positions resulting from a change in assessment of tax benefits associated with the cross-border energy leases of a PHI affiliate.

	2012				
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
	(millions of dollars)				
Total Operating Revenue	$ 465	$ 456	$ 582	$ 445	$1,948
Total Operating Expenses	425	401	475	390	1,691
Operating Income	40	55	107	55	257
Other Expenses	(21)	(20)	(22)	(20)	(83)
Income Before Income Tax Expense	19	35	85	35	174
Income Tax (Benefit) Expense (a)	(5) (a)	8	35	10	48
Net Income	$ 24	$ 27	$ 50	$ 25	$ 126

(a) Includes tax benefits of $10 million (after-tax), primarily related to the settlement of an uncertain tax position with the IRS related to the methodology used historically to calculate deductible mixed service costs and the expiration of the statute of limitations associated with an uncertain tax position.

Management's Report on Internal Control over Financial Reporting

The management of Delmarva Power & Light Company (DPL) is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) and Rule 15d-15(f) under the Exchange Act. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management of DPL assessed DPL's internal control over financial reporting as of December 31, 2013 based on the framework in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its assessment, the management of DPL concluded that DPL's internal control over financial reporting was effective as of December 31, 2013.

Report of Independent Registered Public Accounting Firm

To the Shareholder and Board of Directors of
Delmarva Power & Light Company

In our opinion, the financial statements of Delmarva Power & Light Company (a wholly owned subsidiary of Pepco Holdings, Inc.) listed in the accompanying index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Delmarva Power & Light Company at December 31, 2013 and December 31, 2012, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule of Delmarva Power & Light Company listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

NOTES TO FINANCIAL STATEMENTS

DELMARVA POWER & LIGHT COMPANY

(1) ORGANIZATION

Delmarva Power & Light Company (DPL) is engaged in the transmission and distribution of electricity in Delaware and portions of Maryland and provides natural gas distribution service in northern Delaware. Additionally, DPL provides Default Electricity Supply, which is the supply of electricity at regulated rates to retail customers in its service territories who do not elect to purchase electricity from a competitive supplier. Default Electricity Supply is known as Standard Offer Service in both Delaware and Maryland. DPL is a wholly owned subsidiary of Conectiv, LLC (Conectiv), which is wholly owned by Pepco Holdings, Inc. (Pepco Holdings or PHI).

(2) SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make certain estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities in the financial statements and accompanying notes. Although DPL believes that its estimates and assumptions are reasonable, they are based upon information available to management at the time the estimates are made. Actual results may differ significantly from these estimates.

Significant matters that involve the use of estimates include the assessment of contingencies, the calculation of future cash flows and fair value amounts for use in asset and goodwill impairment evaluations, fair value calculations for derivative instruments, pension and other postretirement benefits assumptions, the assessment of the probability of recovery of regulatory assets, accrual of storm restoration costs, accrual of unbilled revenue, recognition of changes in network service transmission rates for prior service year costs, accrual of loss contingency liabilities for general and auto liability claims, and income tax provisions and reserves. Additionally, DPL is subject to legal, regulatory, and other proceedings and claims that arise in the ordinary course of its business. DPL records an estimated liability for these proceedings and claims when it is probable that a loss has been incurred and the loss is reasonably estimable.

Revenue Recognition

DPL recognizes revenues upon distribution of electricity and natural gas to its customers, including unbilled revenue for services rendered, but not yet billed. DPL’s unbilled revenue was $61 million and $62 million as of December 31, 2013 and 2012, respectively, and these amounts are included in Accounts receivable. DPL calculates unbilled revenue using an output-based methodology. This methodology is based on the supply of electricity or natural gas intended for distribution to customers. The unbilled revenue process requires management to make assumptions and judgments about input factors such as customer sales mix, temperature, and estimated line losses (estimates of electricity and natural gas expected to be lost in the process of its transmission and distribution to customers). The assumptions and judgments are inherently uncertain and susceptible to change from period to period, and if the actual results differ from the projected results, the impact could be material. Revenues from non-regulated electricity and natural gas sales are included in Electric revenues and Natural gas revenues, respectively.

Taxes related to the consumption of electricity and natural gas by its customers, such as fuel, energy, or other similar taxes, are components of DPL’s tariffs and, as such, are billed to customers and recorded in Operating revenue. Accruals for the remittance of these taxes by DPL are recorded in Other taxes.

Taxes Assessed by a Governmental Authority on Revenue-Producing Transactions

Taxes included in DPL's gross revenues were $17 million, $15 million and $18 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Accounting for Derivatives

DPL uses derivative instruments primarily to reduce natural gas commodity price volatility and to limit its customers' exposure to natural gas price fluctuations under a hedging program approved by the Delaware Public Service Commission (DPSC). Derivatives are recorded in the balance sheets as Derivative assets or Derivative liabilities and measured at fair value. DPL enters physical natural gas contracts as part of the hedging program that qualify as normal purchases or normal sales, which are not required to be recorded in the financial statements until settled. DPL's capacity contracts are not classified as derivatives. Changes in the fair value of derivatives that are not designated as cash flow hedges are reflected in income.

All premiums paid and other transaction costs incurred as part of DPL's natural gas hedging activity, in addition to all gains and losses related to hedging activities, are fully recoverable through the fuel adjustment clause approved by the DPSC, and are deferred under Financial Accounting Standards Board (FASB) guidance on regulated operations (Accounting Standards Codification (ASC) 980) until recovered.

Long-Lived Asset Impairment Evaluation

DPL evaluates certain long-lived assets to be held and used (for example, equipment and real estate) for impairment whenever events or changes in circumstances indicate that their carrying value may not be recoverable. Examples of such events or changes include a significant decrease in the market price of a long-lived asset or a significant adverse change in the manner in which an asset is being used or its physical condition. A long-lived asset to be held and used is written down to its estimated fair value if the expected future undiscounted cash flow from the asset is less than its carrying value.

For long-lived assets that can be classified as assets to be disposed of by sale, an impairment loss is recognized to the extent that the assets' carrying value exceeds its estimated fair value including costs to sell.

Income Taxes

DPL, as an indirect subsidiary of Pepco Holdings, is included in the consolidated federal income tax return of PHI. Federal income taxes are allocated to DPL based upon the taxable income or loss amounts, determined on a separate return basis.

The financial statements include current and deferred income taxes. Current income taxes represent the amount of tax expected to be reported on DPL's state income tax returns and the amount of federal income tax allocated from Pepco Holdings.

Deferred income tax assets and liabilities represent the tax effects of temporary differences between the financial statement basis and tax basis of existing assets and liabilities, and they are measured using presently enacted tax rates. The portion of DPL's deferred tax liability applicable to its utility operations that has not been recovered from utility customers represents income taxes recoverable in the future and is included in Regulatory assets on the balance sheets. See Note (7), "Regulatory Matters," for additional information.

Deferred income tax expense generally represents the net change during the reporting period in the net deferred tax liability and deferred recoverable income taxes.

DPL recognizes interest on underpayments and overpayments of income taxes, interest on uncertain tax positions, and tax-related penalties in income tax expense.

Investment tax credits are being amortized to income over the useful lives of the related property.

Consolidation of Variable Interest Entities

DPL assesses its contractual arrangements with variable interest entities to determine whether it is the primary beneficiary and thereby has to consolidate the entities in accordance with ASC 810. The guidance addresses conditions under which an entity should be consolidated based upon variable interests rather than voting interests. See Note (17), "Variable Interest Entities, " for additional information.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash invested in money market funds and commercial paper held with original maturities of three months or less. Additionally, deposits in PHI's money pool, which DPL and certain other PHI subsidiaries use to manage short-term cash management requirements, are considered cash equivalents. Deposits in the money pool are guaranteed by PHI. PHI deposits funds in the money pool to the extent that the pool has insufficient funds to meet the needs of its participants, which may require PHI to borrow funds for deposit from external sources.

Accounts Receivable and Allowance for Uncollectible Accounts

DPL's Accounts receivable balance primarily consists of customer accounts receivable arising from the sale of goods and services to customers within its service territory, other accounts receivable, and accrued unbilled revenue. Accrued unbilled revenue represents revenue earned in the current period but not billed to the customer until a future date (usually within one month after the receivable is recorded).

DPL maintains an allowance for uncollectible accounts and changes in the allowance are recorded as an adjustment to Other operation and maintenance expense in the statements of income. DPL determines the amount of the allowance based on specific identification of material amounts at risk by customer and maintains a reserve based on its historical collection experience. The adequacy of this allowance is assessed on a quarterly basis by evaluating all known factors such as the aging of the receivables, historical collection experience, the economic and competitive environment and changes in the creditworthiness of its customers. Accounts receivable are written off in the period in which the receivable is deemed uncollectible and collection efforts have been exhausted. Recoveries of Accounts receivable previously written off are recorded when it is probable they will be recovered. Although DPL believes its allowance is adequate, it cannot anticipate with any certainty the changes in the financial condition of its customers. As a result, DPL records adjustments to the allowance for uncollectible accounts in the period in which the new information that requires an adjustment to the reserve becomes known.

Inventories

Included in Inventories are transmission and distribution materials and supplies and natural gas. DPL utilizes the weighted average cost method of accounting for inventory items. Under this method, an average price is determined for the quantity of units acquired at each price level and is applied to the ending quantity to calculate the total ending inventory balance. Materials and supplies are recorded in Inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed.

The cost of natural gas, including transportation costs, is included in Inventory when purchased and charged to Gas purchased expense when used.

Goodwill

Goodwill represents the excess of the purchase price of an acquisition over the fair value of the net assets acquired at the acquisition date. DPL tests its goodwill for impairment annually as of November 1 and whenever an event occurs or circumstances change in the interim that would more likely than not (that is, a greater than 50% chance) reduce the estimated fair value of DPL below the carrying amount of its net assets. Factors that may result in an interim impairment test include, but are not limited to: a change in the identified reporting unit; an adverse change in business conditions; an adverse regulatory action; or an impairment of DPL's long-lived assets. DPL performed its most recent annual impairment test as of November 1, 2013, and its goodwill was not impaired as described in Note (6), "Goodwill."

Regulatory Assets and Regulatory Liabilities

Certain aspects of DPL's business are subject to regulation by the DPSC and the Maryland Public Service Commission (MPSC). The transmission of electricity by DPL is regulated by the Federal Energy Regulatory Commission (FERC). DPL's interstate transportation and wholesale sale of natural gas are regulated by FERC.

Based on the regulatory framework in which it has operated, DPL has historically applied, and in connection with its transmission and distribution business continues to apply, FASB guidance on regulated operations (ASC 980). The guidance allows regulated entities, in appropriate circumstances, to defer the income statement impact of certain costs that are expected to be recovered in future rates through the establishment of regulatory assets and defer certain revenues that are expected to be refunded to customers through the establishment of regulatory liabilities. Management's assessment of the probability of recovery of regulatory assets requires judgment and interpretation of laws, regulatory commission orders and other factors. If management subsequently determines, based on changes in facts or circumstances, that a regulatory asset is not probable of recovery, the regulatory asset would be eliminated through a charge to earnings.

Effective June 2007, the MPSC approved a bill stabilization adjustment (BSA) mechanism for retail customers. For customers to whom the BSA applies, DPL recognizes distribution revenue based on an approved distribution charge per customer. From a revenue recognition standpoint, the BSA has the effect of decoupling the distribution revenue recognized in a reporting period from the amount of power delivered during that period. Pursuant to this mechanism, DPL recognizes either (i) a positive adjustment equal to the amount by which revenue from Maryland retail distribution sales falls short of the revenue that DPL is entitled to earn based on the approved distribution charge per customer, or (ii) a negative adjustment equal to the amount by which revenue from such distribution sales exceeds the revenue that DPL is entitled to earn based on the approved distribution charge per customer (a Revenue Decoupling Adjustment). A net positive Revenue Decoupling Adjustment is recorded as a regulatory asset and a net negative Revenue Decoupling Adjustment is recorded as a regulatory liability.

Property, Plant and Equipment

Property, plant and equipment is recorded at original cost, including labor, materials, asset retirement costs and other direct and indirect costs including capitalized interest. The carrying value of Property, plant and equipment is evaluated for impairment whenever circumstances indicate the carrying value of those assets may not be recoverable. Upon retirement, the cost of regulated property, net of salvage, is charged to Accumulated depreciation. For additional information regarding the treatment of asset retirement obligations, see the "Asset Removal Costs" section included in this Note.

The annual provision for depreciation on electric and natural gas property, plant and equipment is computed on a straight-line basis using composite rates by classes of depreciable property. Accumulated depreciation is charged with the cost of depreciable property retired, less salvage and other recoveries. Non-operating and other property is generally depreciated on a straight-line basis over the useful lives of the assets. The system-wide composite annual depreciation rates for the years ended December 31, 2013, 2012 and 2011 for DPL's property were approximately 2.6%, 2.7% and 2.8%, respectively.

Capitalized Interest and Allowance for Funds Used During Construction

In accordance with FASB guidance on regulated operations (ASC 980), utilities can capitalize the capital costs of financing the construction of plant and equipment as Allowance for Funds Used During Construction (AFUDC). This results in the debt portion of AFUDC being recorded as a reduction of Interest expense and the equity portion of AFUDC being recorded as an increase to Other income in the accompanying statements of income.

DPL recorded AFUDC for borrowed funds of $2 million, $2 million and $1 million for the years ended December 31, 2013, 2012 and 2011, respectively.

DPL recorded amounts for the equity component of AFUDC of $2 million, $3 million and $3 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Leasing Activities

DPL’s lease transactions include plant, office space, equipment, software and vehicles. In accordance with FASB guidance on leases (ASC 840), these leases are classified as operating leases.

An operating lease in which DPL is the lessee generally results in a level income statement charge over the term of the lease, reflecting the rental payments required by the lease agreement. If rental payments are not made on a straight-line basis, DPL’s policy is to recognize rent expense on a straight-line basis over the lease term unless another systematic and rational allocation basis is more representative of the time pattern in which the leased property is physically employed.

Amortization of Debt Issuance and Reacquisition Costs

DPL defers and amortizes debt issuance costs and long-term debt premiums and discounts over the lives of the respective debt issuances. When refinancing or redeeming existing debt, any unamortized premiums, discounts and debt issuance costs, as well as debt redemption costs, are classified as Regulatory assets and are amortized generally over the life of the original issue.

Asset Removal Costs

In accordance with FASB guidance, asset removal costs are recorded as regulatory liabilities. At December 31, 2013 and 2012, $173 million and $202 million, respectively, of asset removal costs are included in Regulatory liabilities in the accompanying balance sheets.

Pension and Postretirement Benefit Plans

Pepco Holdings sponsors the PHI Retirement Plan, a non-contributory, defined benefit pension plan that covers substantially all employees of DPL and certain employees of other Pepco Holdings subsidiaries. Pepco Holdings also provides supplemental retirement benefits to certain eligible executives and key employees through nonqualified retirement plans and provides certain postretirement health care and life insurance benefits for eligible retired employees.

The PHI Retirement Plan is accounted for in accordance with FASB guidance on retirement benefits (ASC 715).

Dividend Restrictions

All of DPL’s shares of outstanding common stock are held by Conectiv, its parent company. In addition to its future financial performance, the ability of DPL to pay dividends to its parent company is subject to limits imposed by: (i) state corporate laws, which impose limitations on the funds that can be used to pay dividends, and (ii) the prior rights of holders of existing and future preferred stock, mortgage bonds and other long-term debt issued by DPL and any other restrictions imposed in connection with the incurrence of liabilities. DPL has no shares of preferred stock outstanding. DPL had approximately $637 million and $578 million of retained earnings available for payment of common stock dividends at December 31, 2013 and 2012, respectively. These amounts represent the total retained earnings balances at those dates.

Reclassifications and Adjustments

Certain prior period amounts have been reclassified in order to conform to the current period presentation. The following adjustments have been recorded and are not considered material individually or in the aggregate to either the current period or prior period financial results:

Natural Gas Operating Revenue Adjustment

During 2012, DPL recorded an adjustment to correct an overstatement of unbilled revenue in its natural gas distribution business related to prior periods. The adjustment resulted in a decrease in Operating revenue of $1 million for the year ended December 31, 2012.

Default Electricity Supply Revenue and Costs Adjustments

During 2011, DPL recorded adjustments to correct certain errors associated with the accounting for Default Electricity Supply revenue and costs. These adjustments primarily arose from the under-recognition of allowed returns on the cost of working capital and resulted in a pre-tax decrease in Other operation and maintenance expense of $11 million for the year ended December 31, 2011.

(3) NEWLY ADOPTED ACCOUNTING STANDARDS

Balance Sheet (ASC 210)

In December 2011, the FASB issued new disclosure requirements for financial assets and financial liabilities, such as derivatives, that are subject to contractual netting arrangements. The new disclosure requirements include information about the gross exposure of the instruments and the net exposure of the instruments under contractual netting arrangements, how the exposures are presented in the financial statements, and the terms and conditions of the contractual netting arrangements. DPL adopted the new guidance during the first quarter of 2013 and concluded it did not have a material impact on its financial statements.

(4) RECENTLY ISSUED ACCOUNTING STANDARDS, NOT YET ADOPTED

Joint and Several Liability Arrangements (ASC 405)

In February 2013, the FASB issued new recognition and disclosure requirements for certain joint and several liability arrangements where the total amount of the obligation is fixed at the reporting date. For arrangements within the scope of this standard, DPL will be required to include in its liabilities the additional amounts it expects to pay on behalf of its co-obligors, if any. DPL will also be required to provide additional disclosures including the nature of the arrangements with its co-obligors, the total amounts outstanding under the arrangements between DPL and its co-obligors, the carrying value of the liability, and the nature and limitations of any recourse provisions that would enable recovery from other entities.

The new requirements are effective retroactively beginning on January 1, 2014, with implementation required for prior periods if joint and several liability arrangement obligations exist as of January 1, 2014. DPL does not expect this new guidance to have a material impact on its financial statements.

Income Taxes (ASC 740)

In July 2013, the FASB issued new guidance that will require the netting of certain unrecognized tax benefits against a deferred tax asset for a loss or other similar tax carryforward that would apply upon settlement of the uncertain tax position. The new requirements are effective prospectively beginning with DPL's March 31, 2014 financial statements for all unrecognized tax benefits existing at the adoption date. Retrospective implementation and early adoption of the guidance are permitted. DPL does not expect this new guidance to have a material impact on its financial statements.

(5) SEGMENT INFORMATION

The company operates its business as one regulated utility segment, which includes all of its services as described above.

(6) GOODWILL

All of DPL's goodwill was generated by its acquisition of Conowingo Power Company in 1995. In order to estimate the fair value of the DPL reporting unit, DPL uses two valuation techniques: an income approach and a market approach. The income approach estimates fair value based on a discounted future cash flow analysis and a terminal value that is consistent with DPL's long-term view of the business. This approach uses a discount rate based on the estimated weighted average cost of capital (WACC) for the reporting unit. DPL determines the estimated WACC by considering appropriate market-based information for the cost of equity and cost of debt as of the measurement date . The market approach estimates fair value based on a multiple of earnings before interest, taxes, depreciation, and amortization (EBITDA) that management believes is consistent with EBITDA multiples for comparable utilities. DPL has consistently used this valuation technique to estimate the fair value of the DPL reporting unit.

The estimation of fair value is dependent on a number of factors including but not limited to interest rates, growth assumptions, returns on rate base, operating and capital expenditure requirements, and other factors, changes in which could materially affect the results of impairment testing. Assumptions used were consistent with historical experience, including assumptions concerning the recovery of operating costs and capital expenditures and current market-based information. Sensitive, interrelated and uncertain variables that could decrease the estimated fair value of the DPL reporting unit include utility sector market performance, sustained adverse business conditions, changes in forecasted revenues, higher operating and maintenance capital expenditure requirements, a significant increase in the weighted average cost of capital and other factors.

As of December 31, 2013 and 2012, DPL's goodwill balance was $8 million. There are no accumulated impairment losses.

(7) REGULATORY MATTERS

Regulatory Assets and Regulatory Liabilities

The components of DPL's regulatory asset and liability balances at December 31, 2013 and 2012 are as follows:

	2013	2012
	(millions of dollars)	
Regulatory Assets		
Smart Grid costs (a)	$ 83	$ 71
Recoverable income taxes	76	69
MAPP abandonment costs (a)	31	38
Demand-side management costs (a)	27	12
COPCO acquisition adjustment (a)	22	26
Deferred debt extinguishment costs (a)	13	15
Deferred energy supply costs (b)	13	13
Incremental storm restoration costs (a)	9	11
Deferred losses on gas derivatives	—	4
Other	37	29
Total Regulatory Assets	$ 311	$ 288
Regulatory Liabilities		
Asset removal costs	$ 173	$ 202
Deferred income taxes due to customers	37	38
Deferred energy supply costs	3	6
Deferred gains on gas derivatives	1	—
Other	15	12
Total Regulatory Liabilities	$ 229	$ 258

(a) A return is earned on these deferrals.
(b) A return is generally earned in Delaware on this deferral.

A description for each category of regulatory assets and regulatory liabilities follows:

Smart Grid Costs: Represents advanced metering infrastructure (AMI) costs associated with the installation of smart meters and the early retirement of existing meters throughout DPL's service territory that are recoverable from customers.

Recoverable Income Taxes: Represents amounts recoverable from DPL's customers for tax benefits applicable to utility operations that were previously recognized in income tax expense before the company was ordered to account for the tax benefits as deferred income taxes. As the temporary differences between the financial statement basis and tax basis of assets reverse, the deferred recoverable balances are reversed.

MAPP Abandonment Costs: Represents the probable recovery of abandoned costs prudently incurred in connection with the Mid-Atlantic Power Pathway (MAPP) project which was terminated on August 24, 2012. The regulatory asset includes the costs of land, land rights, supplies and materials, engineering and design, environmental services, and project management and administration. The regulatory asset will be reduced as the result of sale or alternative use of these assets. As of December 31, 2013, these assets were earning a return of 12.8%. For additional information, see "MAPP Project" discussion below.

Demand-Side Management Costs: Represents recoverable costs associated with customer energy efficiency and conservation programs in DPL's Maryland jurisdiction.

COPCO Acquisition Adjustment: On July 19, 2007, the MPSC issued an order which provided for the recovery of a portion of DPL's goodwill. As a result of this order, $41 million in DPL goodwill was transferred to a regulatory asset. This item is being amortized from August 2007 through August 2018. The return earned is 12.95%.

Deferred Debt Extinguishment Costs: Represents the costs of debt extinguishment associated with issuances of debt for which recovery through regulated utility rates is considered probable, and if approved, will be amortized to interest expense during the authorized rate recovery period.

Deferred Energy Supply Costs: The regulatory asset represents primarily deferred costs associated with a net under-recovery of Default Electricity Supply costs incurred by DPL that are probable of recovery in rates. The regulatory liability represents primarily deferred costs associated with a net over-recovery of Default Electricity Supply costs incurred that will be refunded by DPL to customers.

Incremental Storm Restoration Costs: Represents total incremental storm restoration costs incurred for repair work due to major storm events in 2012 and 2011, including Hurricane Sandy, the June 2012 derecho, and Hurricane Irene, that are recoverable from customers in the Maryland jurisdiction. DPL's costs related to Hurricane Sandy, the June 2012 derecho and Hurricane Irene are being amortized and recovered in rates, each over a five-year period.

Deferred Losses on Gas Derivatives: Represents losses associated with hedges of natural gas purchases that are recoverable through the Gas Cost Rate approved by the DPSC.

Other: Represents miscellaneous regulatory assets that generally are being amortized over 1 to 20 years.

Asset Removal Costs: The depreciation rates for DPL include a component for removal costs, as approved by the relevant federal and state regulatory commissions. Accordingly, DPL has recorded regulatory liabilities for its estimate of the difference between incurred removal costs and the amount of removal costs recovered through depreciation rates.

Deferred Income Taxes Due to Customers: Represents the portions of deferred income tax assets applicable to utility operations of DPL that have not been reflected in current customer rates for which future payment to customers is probable. As the temporary differences between the financial statement basis and tax basis of assets reverse, deferred recoverable income taxes are amortized.

Deferred Gains on Gas Derivatives: Represents gains associated with hedges of natural gas purchases that will be refunded to customers through the Gas Cost Rate approved by the DPSC.

Other: Includes miscellaneous regulatory liabilities.

Rate Proceedings

Bill Stabilization Adjustment

DPL has proposed in each of its respective jurisdictions the adoption of a mechanism to decouple retail distribution revenue from the amount of power delivered to retail customers. To date:

- A BSA has been approved and implemented for DPL electric service in Maryland.
- A proposed modified fixed variable rate design (MFVRD) for DPL electric and natural gas service in Delaware was filed in 2009 for consideration by the DPSC and while there was little activity associated with this filing in 2013, the proceeding remains open.

Under the BSA, customer distribution rates are subject to adjustment (through a credit or surcharge mechanism), depending on whether actual distribution revenue per customer exceeds or falls short of the revenue-per-customer amount approved by the applicable public service commission. The MFVRD proposed in Delaware contemplates a fixed customer charge (i.e., not tied to the customer's volumetric consumption of electricity or natural gas) to recover the utility's fixed costs, plus a reasonable rate of return.

<u>*Delaware*</u>

Electric Distribution Base Rates

On March 22, 2013, DPL submitted an application with the DPSC to increase its electric distribution base rates. The filing seeks approval of an annual rate increase of approximately $39 million (as adjusted by DPL on September 20, 2013), based on a requested return on equity (ROE) of 10.25%. The requested rate increase seeks to recover expenses associated with DPL's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. The DPSC suspended the full proposed increase and, as permitted by state law, DPL implemented an interim increase of $2.5 million on June 1, 2013, subject to refund and pending final DPSC approval. On October 8, 2013, the DPSC approved DPL's request to implement an additional interim increase of $25.1 million, effective on October 22, 2013, bringing the total interim rates in effect subject to refund to $27.6 million. A final DPSC decision is expected by the second quarter of 2014.

Forward Looking Rate Plan

On October 2, 2013, DPL filed a multi-year rate plan, referred to as the Forward Looking Rate Plan (FLRP). As proposed, the FLRP would provide for annual electric distribution base rate increases over a four-year period in the aggregate amount of approximately $56 million. The FLRP as proposed provides the opportunity to achieve estimated earned ROEs of 7.41% and 8.80% in years one and two, respectively, and 9.75% in both years three and four of the plan.

In addition, DPL proposed that as part of the FLRP, in order to provide a higher minimum required standard of reliability for DPL's customers than that to which DPL is currently subject, the standards by which DPL's reliability is measured would be made more stringent in each year of the FLRP. In addition, DPL has offered to refund an aggregate of $500,000 to customers in each year of the FLRP that it fails to meet the proposed stricter minimum reliability standards.

On October 22, 2013, the DPSC opened a docket for the purpose of reviewing the details of the FLRP, but stated that it would not address the FLRP until the pending electric distribution base rate case discussed above was concluded. DPL expects that the FLRP will be updated and re-filed at the conclusion of the electric distribution base rate case. A schedule for the FLRP docket has not yet been established.

Gas Distribution Base Rates

On December 7, 2012, DPL submitted an application with the DPSC to increase its natural gas distribution base rates. The filing sought approval of an annual rate increase of approximately $12.0 million (as adjusted by DPL on July 15, 2013), based on a requested ROE of 10.25%. The requested rate increase sought to recover expenses associated with DPL's ongoing efforts to maintain safe and reliable gas service. On October 22, 2013, the DPSC approved a settlement entered into on August 27, 2013 by the DPSC Staff, the Delaware Division of the Public Advocate and DPL, which provides for an annual rate increase of $6.8 million. While the approved settlement provided that no understanding was reached concerning the appropriate ROE, it specified that for reporting purposes and for calculating the AFUDC, construction work in process (CWIP), regulatory asset carrying costs and other accounting metrics, the rate of 9.75% should be used. The new rates became effective on November 1, 2013.

The approved settlement also provides for a phase-in of the recovery of the deferred costs associated with DPL's deployment of the interface management unit (IMU). The IMU is part of its AMI and allows for the remote reading of gas meters. Recovery of such costs will occur through base rates over a two-year period, assuming specific milestones are met and pursuant to the following schedule: 50% of the IMU portion of DPL's AMI will be put into rates on May 1, 2014, and the remainder will be put into rates on March 1, 2015. DPL also agreed in the settlement that its next natural gas distribution base rate application may be filed with the DPSC no earlier than January 1, 2015.

Gas Cost Rates

DPL makes an annual Gas Cost Rate (GCR) filing with the DPSC for the purpose of allowing DPL to recover natural gas procurement costs through customer rates. On August 28, 2013, DPL made its 2013 GCR filing. The rates proposed in the 2013 GCR filing would result in a GCR decrease of approximately 5.5%. On September 26, 2013, the DPSC issued an order authorizing DPL to place the new rates into effect on November 1, 2013, subject to refund and pending final DPSC approval.

Maryland

On March 29, 2013, DPL submitted an application with the MPSC to increase its electric distribution base rates by approximately $22.8 million, based on a requested ROE of 10.25%. The requested rate increase sought to recover expenses associated with DPL's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. DPL also proposed a three-year Grid Resiliency Charge rider for recovery of costs totaling approximately $10.2 million associated with its plan to accelerate investments in electric distribution infrastructure in a condensed timeframe. Acceleration of resiliency improvements was one of several recommendations included in a September 2012 report from Maryland's Grid Resiliency Task Force (as discussed below under "Resiliency Task Forces"). Specific projects under DPL's Grid Resiliency Charge plan included accelerating its tree-trimming cycle and upgrading five additional feeders per year for two years. In addition, DPL proposed a reliability performance-based mechanism that would allow DPL to earn up to $500,000 as an incentive for meeting enhanced reliability goals in 2015, but provided for a credit to customers of up to $500,000 in total if DPL did not meet at least the minimum reliability performance targets. DPL requested that any credits or charges would flow through the proposed Grid Resiliency Charge rider.

On August 30, 2013, the MPSC issued a final order approving a settlement among DPL, the MPSC staff and the Maryland Office of People's Counsel (OPC). The approved settlement provides for an annual rate increase of approximately $15 million. While the settlement does not specify an overall ROE, the parties did agree that the ROE for purposes of calculating the AFUDC and regulatory asset carrying costs would be 9.81%. The approved settlement also provides for (i) recovery of storm restoration costs incurred as a result of recent major storm events, including the derecho storm in June 2012 and Hurricane Sandy in October 2012, by amortizing the related deferred operation and maintenance expenses of approximately $6 million over a five-year period with the unamortized balance included in rate base, and (ii) a Grid Resiliency Charge for recovery of costs totaling approximately $4.2 million associated with DPL's proposed plan to accelerate investments related to certain priority feeders, provided that before implementing the surcharge, DPL provides additional information to the MPSC related to performance objectives, milestones and costs, and makes annual filings with the MPSC thereafter concerning this project, which will permit the MPSC to establish the applicable Grid Resiliency Charge rider for the following year. The approved settlement does not provide for approval of a portion of the Grid Resiliency Charge related to the proposed acceleration of the tree-trimming cycle, or DPL's proposed reliability performance-based mechanism. The new rates became effective on September 15, 2013.

Federal Energy Regulatory Commission

On October 17, 2013, FERC issued a ruling on challenges filed by the Delaware Municipal Electric Corporation, Inc. (DEMEC) to DPL's 2011 and 2012 annual formula rate updates. In 2006, FERC approved a formula rate for DPL that is incorporated into the PJM Interconnection, LLC (PJM) tariff. The formula rate establishes the treatment of costs and revenues and the resulting rates for DPL. Pursuant to the protocols approved by FERC and after a period of discovery, interested parties have an opportunity to file challenges regarding the application of the formula rate. The FERC order sets various issues in this proceeding for hearing, including challenges regarding formula rate inputs, deferred income items, prepayments of estimated income taxes, rate base reductions, various administrative and general expenses and the inclusion in rate base of CWIP related to the MAPP project (which has been abandoned). Settlement discussions began in this matter on November 5, 2013 before an administrative law judge at FERC.

On December 12, 2013, DEMEC filed a formal challenge to the DPL 2013 annual formula rate update, including a request to consolidate the 2013 challenge with the two prior challenges. This challenge is pending at FERC. PHI cannot predict when a final FERC decision in this proceeding will be issued.

On February 27, 2013, the public service commissions and public advocates of the District of Columbia, Maryland, Delaware and New Jersey, as well as DEMEC, filed a joint complaint with FERC against DPL and its affiliates Potomac Electric Power Company (Pepco) and Atlantic City Electric Company (ACE), as well as Baltimore Gas and Electric Company (BGE). The complainants challenged the base ROE and the application of the formula rate process, each associated with the transmission service that DPL and its utility affiliates provide. The complainants support an ROE within a zone of reasonableness of 6.78% and 10.33%, and have argued for a base ROE of 8.7%. The base ROE currently authorized by FERC for DPL and its utility affiliates is (i) 11.3% for facilities placed into service after January 1, 2006, and (ii) 10.8% for facilities placed into service prior to 2006. As currently authorized, the 10.8% base ROE for facilities placed into service prior to 2006 is eligible for a 50-basis-point incentive adder for being a member of a regional transmission organization. DPL believes the allegations in this complaint are without merit and is vigorously contesting it. On April 3, 2013, DPL filed its answer to this complaint, requesting that FERC dismiss the complaint against it on the grounds that it failed to meet the required burden to demonstrate that the existing rates and protocols are unjust and unreasonable. DPL cannot predict when a final FERC decision in this proceeding will be issued.

MPSC New Generation Contract Requirement

In September 2009, the MPSC initiated an investigation into whether Maryland electric distribution companies (EDCs) should be required to enter into long-term contracts with entities that construct, acquire or lease, and operate, new electric generation facilities in Maryland. In April 2012, the MPSC issued an order determining that there is a need for one new power plant in the range of 650 to 700 megawatts (MWs) beginning in 2015. The order requires DPL, its affiliate Pepco and BGE (collectively, the Contract EDCs) to negotiate and enter into a contract with the winning bidder of a competitive bidding process in amounts proportional to their relative Standard Offer Service (SOS) loads. Under the contract, the winning bidder will construct a 661 MW natural gas-fired combined cycle generation plant in Waldorf, Maryland, with an expected commercial operation date of June 1, 2015. The order acknowledged the Contract EDCs' concerns about the requirements of the contract and directed them to negotiate with the winning bidder and submit any proposed changes in the contract to the MPSC for approval. The order further specified that each of the Contract EDCs will recover its costs associated with the contract through surcharges on its respective SOS customers.

In April 2012, a group of generating companies operating in the PJM region filed a complaint in the U.S. District Court for the District of Maryland challenging the MPSC's order on the grounds that it violates the Commerce Clause and the Supremacy Clause of the U.S. Constitution. In May 2012, the Contract EDCs and other parties filed notices of appeal in circuit courts in Maryland requesting judicial review of the MPSC's order. The Maryland circuit court appeals were consolidated in the Circuit Court for Baltimore City.

On April 16, 2013, the MPSC issued an order approving a final form of the contract and directing the Contract EDCs to enter into the contract with the winning bidder in amounts proportional to their relative SOS loads. On June 4, 2013, DPL and Pepco each entered into identical contracts in accordance with the terms of the MPSC's order; however, under each contract's terms, it will not become effective, if at all, until all legal proceedings related to these contracts and the actions of the MPSC in the related proceeding have been resolved.

On September 30, 2013, the U.S. District Court for the District of Maryland issued a ruling that the MPSC's April 2012 order violated the Supremacy Clause of the U.S. Constitution by attempting to regulate wholesale prices. In contrast, on October 1, 2013, the Maryland Circuit Court for Baltimore City upheld the MPSC's orders requiring the Contract EDCs to enter into the contracts.

On October 24, 2013, the Federal district court issued an order ruling that the contracts are illegal and unenforceable. The Federal district court order and its associated ruling could impact the state circuit court appeal, to which the Contract EDCs are parties, although such impact, if any, cannot be determined at this time. The Contract EDCs, the Maryland Office of People's Counsel and one generating company have appealed the Maryland Circuit Court's decision to the Maryland Court of Special Appeals. In addition, in November 2013 both the winning bidder and the MPSC appealed the Federal district court decision to the U.S. Court of Appeals for the Fourth Circuit. These appeals remain pending.

Assuming the contracts, as currently written, were to become effective by the expected commercial operation date of June 1, 2015, DPL continues to believe that it may be required to account for its proportional share of the contracts as a derivative instrument at fair value with an offsetting regulatory asset because they would recover any payments under the contracts from SOS customers. DPL has concluded that any accounting for these contracts would not be required until all legal proceedings related to these contracts and the actions of the MPSC in the related proceeding have been resolved.

DPL continues to evaluate these proceedings to determine, should the contracts be found to be valid and enforceable, (i) the extent of the negative effect that the contracts may have on DPL's credit metrics, as calculated by independent rating agencies that evaluate and rate DPL and its debt issuances, (ii) the effect on DPL's ability to recover its associated costs of the contracts if a significant number of SOS customers elect to buy their energy from alternative energy suppliers, and (iii) the effect of the contracts on the financial condition, results of operations and cash flows of DPL.

Resiliency Task Force

In July 2012, the Maryland governor signed an Executive Order directing his energy advisor, in collaboration with certain state agencies, to solicit input and recommendations from experts on how to improve the resiliency and reliability of the electric distribution system in Maryland. The resulting Grid Resiliency Task Force issued its report in September 2012, in which it made 11 recommendations. The governor forwarded the report to the MPSC in October 2012, urging the MPSC to quickly implement the first four recommendations: (i) strengthen existing reliability and storm restoration regulations; (ii) accelerate the investment necessary to meet the enhanced metrics; (iii) allow surcharge recovery for the accelerated investment; and (iv) implement clearly defined performance metrics into the traditional ratemaking scheme. DPL's electric distribution base rate case filed with the MPSC on March 29, 2013 attempted to address the Grid Resiliency Task Force recommendations. In August 2013, the MPSC issued an order in the DPL Maryland electric distribution base rate case that only partially approved the proposed Grid Resiliency Charge. See "Rate Proceedings – Maryland" above for more information about these base rate cases.

MAPP Project

On August 24, 2012, the board of PJM terminated the MAPP project and removed it from PJM's regional transmission expansion plan. DPL had been directed to construct the MAPP project, a 152-mile high-voltage interstate transmission line, to address the reliability needs of the region's transmission system. In December 2012, DPL submitted a filing to FERC seeking recovery of approximately $38 million of abandoned MAPP costs over a five-year recovery period. The FERC filing addressed, among other things, the prudence of the recoverable costs incurred, the proposed period over which the abandoned costs are to be amortized and the rate of return on these costs during the recovery period.

In February 2013, FERC issued an order concluding that the MAPP project was cancelled for reasons beyond the control of DPL, finding that the prudently incurred costs associated with the abandonment of the MAPP project are eligible to be recovered, and setting for hearing and settlement procedures the prudence of the abandoned costs and the amortization period for those costs.

On December 18, 2013, DPL submitted a settlement agreement to FERC, which provides for recovery of DPL's abandoned MAPP costs over a three-year recovery period beginning June 1, 2013. The settlement agreement, which is subject to FERC approval, would resolve all issues concerning the recovery of abandonment costs associated with the cancellation of the MAPP project. DPL cannot predict the timing or results of a final FERC decision in this proceeding.

As of December 31, 2013, DPL had a regulatory asset related to the MAPP abandoned costs of approximately $31 million, representing the original filing amount of approximately $38 million of abandoned costs referred to above less: (i) approximately $1 million of disallowed costs written off in 2013; and (ii) $6 million of amortization expense recorded in 2013. The regulatory asset balance includes the costs of land, land rights, engineering and design, environmental services, and project management and administration.

(8) PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment is comprised of the following:

	Original Cost	Accumulated Depreciation	Net Book Value
		(millions of dollars)	
At December 31, 2013			
Distribution	$1,788	$ 492	$ 1,296
Transmission	982	243	739
Gas	481	142	339
Construction work in progress	158	—	158
Non-operating and other property	264	139	125
Total	$3,673	$ 1,016	$ 2,657
At December 31, 2012			
Distribution	$1,664	$ 498	$ 1,166
Transmission	877	233	644
Gas	458	137	321
Construction work in progress	206	—	206
Non-operating and other property	217	132	85
Total	$3,422	$ 1,000	$ 2,422

The non-operating and other property amounts include balances for general plant, plant held for future use, intangible plant and non-utility property. Utility plant is generally subject to a first mortgage lien.

(9) PENSION AND OTHER POSTRETIREMENT BENEFITS

DPL accounts for its participation in its parent's single-employer plans, Pepco Holdings' non-contributory retirement plan (the PHI Retirement Plan) and the Pepco Holdings, Inc. Welfare Plan for Retirees (the PHI OPEB Plan), as participation in multiemployer plans. For 2013, 2012 and 2011, DPL was responsible for $18 million, $23 million and $23 million, respectively, of the pension and other postretirement net periodic benefit cost incurred by PHI. DPL made discretionary tax-deductible contributions to the PHI Retirement Plan of $10 million, $85 million and $40 million for the years ended December 31, 2013, 2012 and 2011, respectively. In addition, DPL made contributions of $3 million, $7 million and $6 million, respectively, to the PHI OPEB Plan for the years ended December 31, 2013, 2012 and 2011. At December 31, 2013 and 2012, DPL's Prepaid pension expense of $228 million and $232 million, respectively, and Other postretirement benefit obligations of $23 million and $22 million, respectively, effectively represent assets and benefit obligations resulting from DPL's participation in the PHI benefit plans.

Other Postretirement Benefit Plan Amendments

During 2013, PHI approved two amendments to its other postretirement benefits plan. These amendments impacted the retiree health care and the retiree life insurance benefits, and were effective on January 1, 2014. As a result of the amendments, which were cumulatively significant, PHI remeasured its accumulated postretirement benefit obligation for other postretirement benefits as of July 1, 2013. The remeasurement resulted in a $3 million reduction in DPL's net periodic benefit cost for other postretirement benefits in 2013. Approximately 29% of net periodic other postretirement benefit costs were capitalized in 2013.

(10) DEBT

Long-Term Debt

The components of long-term debt are shown in the table below:

Type of Debt	Interest Rate	Maturity	2013	2012
			(millions of dollars)	
First Mortgage Bonds				
	6.40%	2013	$ —	$ 250
	5.22%(a)	2016	100	100
	3.50%	2023	300	—
	4.00%	2042	250	250
			650	600
Unsecured Tax-Exempt Bonds				
	5.40%	2031	78	78
			78	78
Medium-Term Notes (unsecured)				
	7.56%-7.58%	2017	14	14
	6.81%	2018	4	4
	7.61%	2019	12	12
	7.72%	2027	10	10
			40	40
Notes (unsecured)				
	5.00%	2014	100	100
	5.00%	2015	100	100
			200	200
Total long-term debt			968	918
Net unamortized discount			(1)	(1)
Current portion of long-term debt			(100)	(250)
Total net long-term debt			$ 867	$ 667

(a) Represents a series of Collateral First Mortgage Bonds securing a series of debt securities issued by DPL.

The outstanding first mortgage bonds issued by DPL are issued under a Mortgage and Deed of Trust and are secured by a first lien on substantially all of DPL's property, plant and equipment, except for certain property excluded from the lien of the mortgage.

Maturities of DPL's long-term debt outstanding at December 31, 2013 are $100 million for each year 2014 through 2016, $14 million in 2017, $4 million in 2018 and $650 million thereafter.

DPL's long-term debt is subject to certain covenants. As of December 31, 2013, DPL is in compliance with all such covenants.

The table above does not separately identify $100 million in aggregate principal amount of debt securities issued by DPL. These debt securities are secured by a like amount of first mortgage bonds (Collateral First Mortgage Bonds) of DPL. The principal terms of each such series of debt securities, are identical to the same terms of the corresponding series of Collateral First Mortgage Bonds. Payments of principal and interest made on a series of such debt securities, satisfy the corresponding obligations on the related series of Collateral First Mortgage Bonds. For these reasons, each such series of Collateral First Mortgage Bonds and the corresponding debt securities together effectively represent a single financial obligation and are not identified in the table above separately.

Bond Issuances

During 2013, DPL issued $300 million of 3.50% first mortgage bonds due November 15, 2023. The net proceeds from the issuance of the long-term debt were used to repay at maturity $250 million of 6.40% first mortgage bonds, plus accrued but unpaid interest thereon, to repay outstanding commercial paper and for general corporate purposes.

Bond Redemptions

During 2013, DPL repaid at maturity $250 million of its 6.40% first mortgage bonds.

Short-Term Debt

DPL has traditionally used a number of sources to fulfill short-term funding needs, such as commercial paper, short-term notes, and bank lines of credit. Proceeds from short-term borrowings are used primarily to meet working capital needs, but may also be used to temporarily fund long-term capital requirements. The components of DPL's short-term debt at December 31, 2013 and 2012 are as follows:

	2013	2012
	(millions of dollars)	
Variable rate demand bonds	$ 105	$ 105
Commercial paper	147	32
	$ 252	$ 137

Commercial Paper

DPL maintains an ongoing commercial paper program to address its short-term liquidity needs. As of December 31, 2013, the maximum capacity available under the program was $500 million, subject to available borrowing capacity under the credit facility.

DPL had $147 million and $32 million of commercial paper outstanding at December 31, 2013 and 2012, respectively. The weighted average interest rates for commercial paper issued by DPL during 2013 and 2012 were 0.29% and 0.43%, respectively. The weighted average maturity of all commercial paper issued by DPL during 2013 and 2012 was three days and four days, respectively.

Variable Rate Demand Bonds

Variable Rate Demand Bonds (VRDBs) are subject to repayment on the demand of the holders and, for this reason, are accounted for as short-term debt in accordance with GAAP. However, bonds submitted for purchase are remarketed by a remarketing agent on a best efforts basis. DPL expects that any bonds submitted for purchase will continue to be remarketed successfully due to the creditworthiness of the company and because the remarketing agent resets the interest rate to the then-current market rate. The bonds may be converted to a fixed rate, fixed term option to establish a maturity which corresponds to the date of final maturity of the bonds. On this basis, DPL views VRDBs as a source of long-term financing. The VRDBs outstanding in 2013 mature as follows: 2017 ($26 million), 2024 ($33 million), 2028 ($16 million), and 2029 ($30 million). The weighted average interest rate for VRDBs was 0.26% during 2013 and 0.38% during 2012. As of December 31, 2013, $105 million in VRDBs issued on behalf of DPL were outstanding (of which $72 million were secured by Collateral First Mortgage Bonds issued by DPL).

Credit Facility

PHI, Pepco, DPL and ACE maintain an unsecured syndicated credit facility to provide for their respective liquidity needs, including obtaining letters of credit, borrowing for general corporate purposes and supporting their commercial paper programs. On August 1, 2011, PHI, Pepco, DPL and ACE entered into an amended and restated credit agreement which, on August 2, 2012, was amended to extend the term of the credit facility to August 1, 2017 and to amend the pricing schedule to decrease certain fees and interest rates payable to the lenders under the facility. On August 1, 2013, as permitted under the existing terms of the credit agreement, a request by PHI, Pepco, DPL and ACE to extend the credit facility termination date to August 1, 2018 was approved. All of the terms and conditions as well as pricing remained the same.

The aggregate borrowing limit under the amended and restated credit facility is $1.5 billion, all or any portion of which may be used to obtain loans and up to $500 million of which may be used to obtain letters of credit. The facility also includes a swingline loan sub-facility, pursuant to which each company may make same day borrowings in an aggregate amount not to exceed 10% of the total amount of the facility. Any swingline loan must be repaid by the borrower within fourteen days of receipt. The credit sublimit is $750 million for PHI and $250 million for each of Pepco, DPL and ACE. The sublimits may be increased or decreased by the individual borrower during the term of the facility, except that (i) the sum of all of the borrower sublimits following any such increase or decrease must equal the total amount of the facility, and (ii) the aggregate amount of credit used at any given time by (a) PHI may not exceed $1.25 billion, and (b) each of Pepco, DPL or ACE may not exceed the lesser of $500 million or the maximum amount of short-term debt the company is permitted to have outstanding by its regulatory authorities. The total number of the sublimit reallocations may not exceed eight per year during the term of the facility.

The interest rate payable by each company on utilized funds is, at the borrowing company's election, (i) the greater of the prevailing prime rate, the federal funds effective rate plus 0.5% and the one month London Interbank Offered Rate plus 1.0%, or (ii) the prevailing Eurodollar rate, plus a margin that varies according to the credit rating of the borrower.

In order for a borrower to use the facility, certain representations and warranties must be true and correct, and the borrower must be in compliance with specified financial and other covenants, including (i) the requirement that each borrowing company maintain a ratio of total indebtedness to total capitalization of 65% or less, computed in accordance with the terms of the credit agreement, which calculation excludes from the definition of total indebtedness certain trust preferred securities and deferrable interest subordinated debt (not to exceed 15% of total capitalization), (ii) with certain exceptions, a restriction on sales or other dispositions of assets, and (iii) a restriction on the incurrence of liens on the assets of a borrower or any of its significant subsidiaries other than permitted liens. The credit agreement contains certain covenants and other customary agreements and requirements that, if not complied with, could result in an event of default and the acceleration of repayment obligations of one or more of the borrowers thereunder. Each of the borrowers was in compliance with all covenants under this facility as of December 31, 2013.

The absence of a material adverse change in PHI's business, property, results of operations or financial condition is not a condition to the availability of credit under the credit agreement. The credit agreement does not include any rating triggers.

As of December 31, 2013 and 2012, the amount of cash plus borrowing capacity under the credit facility available to meet the liquidity needs of PHI's utility subsidiaries in the aggregate was $332 million and $477 million, respectively. DPL's borrowing capacity under the credit facility at any given time depends on the amount of the subsidiary borrowing capacity being utilized by Pepco and ACE and the portion of the total capacity being used by PHI.

(11) INCOME TAXES

DPL, as an indirect subsidiary of PHI, is included in the consolidated federal income tax return of PHI. Federal income taxes are allocated to DPL pursuant to a written tax sharing agreement that was approved by the Securities and Exchange Commission in connection with the establishment of PHI as a holding company. Under this tax sharing agreement, PHI's consolidated federal income tax liability is allocated based upon PHI's and its subsidiaries' separate taxable income or loss.

The provision for income taxes, reconciliation of income tax expense, and components of deferred income tax liabilities (assets) are shown below.

Provision for Income Taxes

	For the Year Ended December 31, 2013	2012 (millions of dollars)	2011
Current Tax (Benefit) Expense			
Federal	$ (8)	$ (9)	$ (22)
State and local	—	(1)	8
Total Current Tax Benefit	(8)	(10)	(14)
Deferred Tax Expense (Benefit)			
Federal	53	44	53
State and local	12	11	4
Investment tax credit amortization	(1)	(1)	(1)
Total Deferred Tax Expense	64	54	56
Total Income Tax Expense	$ 56	$ 44	$ 42

Reconciliation of Income Tax Expense

	For the Year Ended December 31, 2013		2012 (millions of dollars)		2011	
Income tax at Federal statutory rate	$ 51	35.0%	$ 41	35.0%	$40	35.0%
Increases (decreases) resulting from:						
State income taxes, net of Federal effect	8	5.5%	6	5.1%	6	5.3%
Change in estimates and interest related to uncertain and effectively settled tax positions	—	—	—	—	(3)	(2.7)%
Other, net	(3)	(1.9)%	(3)	(2.5)%	(1)	(0.4)%
Income Tax Expense	$ 56	38.6%	$ 44	37.6%	$42	37.2%

Year ended December 31, 2013

On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which DPL is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. As a result of the court's ruling in this case, PHI determined in the first quarter of 2013 that it could no longer support its current assessment with respect to the likely outcome of tax positions associated with its cross-border energy lease investments held by its wholly-owned subsidiary Potomac Capital Investment Corporation, and PHI recorded an after-tax charge of $377 million in the first quarter of 2013. Included in the $377 million charge was an after-tax interest charge of $54 million and this amount was allocated to each member of PHI's consolidated group as if each member was a separate taxpayer, resulting in DPL recording a $1 million interest benefit in the first quarter of 2013.

Year ended December 31, 2011

During 2011, PHI reached a settlement with the Internal Revenue Service (IRS) with respect to interest due on its federal tax liabilities related to the November 2010 audit settlement for years 1996 through 2002. In connection with this agreement, PHI reallocated certain amounts that have been on deposit with the IRS since 2006 among liabilities in the settlement years and subsequent years. Primarily related to the settlement and reallocations, DPL recorded a $4 million (after-tax) interest benefit. This is partially offset by adjustments recorded in the third quarter of 2011 related to DPL's settlement with the state taxing authorities resulting in $1 million (after-tax) of additional tax expense and the recalculation of interest on its uncertain tax positions for open tax years based on different assumptions related to the application of its deposit made with the IRS in 2006 resulting in an additional tax expense of $1 million (after-tax).

Components of Deferred Income Tax Liabilities (Assets)

	As of December 31,	
	2013	2012
	(millions of dollars)	
Deferred Tax Liabilities (Assets)		
Depreciation and other basis differences related to plant and equipment	$ 712	$ 623
Deferred taxes on amounts to be collected through future rates	16	15
Federal and state net operating losses	(125)	(80)
Pension and other postretirement benefits	80	85
Electric restructuring liabilities	(5)	(5)
Other	80	49
Total Deferred Tax Liabilities, net	758	687
Deferred tax assets included in Current Assets	59	11
Deferred tax liabilities included in Other Current Liabilities	(1)	(1)
Total Deferred Tax Liabilities, net non-current	$ 816	$ 697

The net deferred tax liability represents the tax effect, at presently enacted tax rates, of temporary differences between the financial statement basis and tax basis of assets and liabilities. The portion of the net deferred tax liability applicable to DPL's operations, which has not been reflected in current service rates, represents income taxes recoverable through future rates, net, and is recorded as a regulatory asset on the balance sheet. No valuation allowance for deferred tax assets was required or recorded at December 31, 2013 and 2012. Federal and state net operating losses generally expire over 20 years from 2029 to 2032.

The Tax Reform Act of 1986 repealed the investment tax credit for property placed in service after December 31, 1985, except for certain transition property. Investment tax credits previously earned on DPL's property continue to be amortized to income over the useful lives of the related property.

Reconciliation of Beginning and Ending Balances of Unrecognized Tax Benefits

	2013	2012	2011
		(millions of dollars)	
Balance as of January 1	$ 9	$ 35	$ 40
Tax positions related to current year:			
Additions	—	—	—
Reductions	—	—	—
Tax positions related to prior years:			
Additions	—	—	7
Reductions	—	(26)(a)	(12)
Settlements	—	—	—
Balance as of December 31	$ 9	$ 9	$ 35

(a) These reductions of unrecognized tax benefits in 2012 primarily relate to a resolution reached with the IRS for determining deductible mixed service costs for additions to property, plant and equipment.

Unrecognized Benefits That, If Recognized, Would Affect the Effective Tax Rate

Unrecognized tax benefits are related to tax positions that have been taken or are expected to be taken in tax returns that are not recognized in the financial statements because management has either measured the tax benefit at an amount less than the benefit claimed, or expected to be claimed, or has concluded that it is not more likely than not that the tax position will be ultimately sustained. For the majority of these tax positions, the ultimate deductibility is highly certain, but there is uncertainty about the timing of such deductibility. At December 31, 2013, DPL had $1 million of unrecognized tax benefits that, if recognized, would lower the effective tax rate.

Interest and Penalties

DPL recognizes interest and penalties relating to its uncertain tax positions as an element of income tax expense. For the years ended December 31, 2013, 2012 and 2011, DPL recognized less than $1 million of pre-tax interest income, less than $1 million of pre-tax interest income and $6 million of pre-tax interest income ($4 million after-tax), respectively, as a component of income tax expense. As of December 31, 2013, 2012 and 2011, DPL had accrued interest receivable of $2 million, accrued interest receivable of $1 million and accrued interest receivable of $1 million, respectively, related to effectively settled and uncertain tax positions.

Possible Changes to Unrecognized Tax Benefits

It is reasonably possible that the amount of the unrecognized tax benefit with respect to some of DPL’s uncertain tax positions will significantly increase or decrease within the next 12 months. PHI and its subsidiaries have entered into discussions with the IRS with the intention of seeking a settlement of all tax issues of DPL for open tax years 2001 through 2011. PHI currently believes that it is possible that a settlement with the IRS may be reached in 2014, which could significantly impact the balances of unrecognized tax benefits and the related interest accruals of DPL. At this time, it is estimated that there will be a $4 million to $6 million decrease in unrecognized tax benefits within the next 12 months.

Tax Years Open to Examination

DPL, as an indirect subsidiary of PHI, is included on PHI’s consolidated Federal tax return. DPL’s federal income tax liabilities for all years through 2002 have been determined, subject to adjustment to the extent of any net operating loss or other loss or credit carrybacks from subsequent years. The open tax years for the significant states where DPL files state income tax returns (Maryland and Delaware) are the same as for the Federal returns.

Final IRS Regulations on Repair of Tangible Property

In September 2013, the IRS issued final regulations on expense versus capitalization of repairs with respect to tangible personal property. The regulations are effective for tax years beginning on or after January 1, 2014, and provide an option to early adopt the final regulations for tax years beginning on or after January 1, 2012. It is expected that the IRS will issue revenue procedures that will describe how taxpayers may implement the final regulations. The final repair regulations retain the operative rule that the Unit of Property for network assets is determined by the taxpayer's particular facts and circumstances except as provided in published guidance. In 2012, with the filing of its 2011 tax return, PHI filed a request for an automatic change in accounting method related to repairs of its network assets in accordance with IRS Revenue Procedure 2011-43. DPL does not expect the effects of the final regulations to be significant and will continue to evaluate the impact of the new guidance on its financial statements.

Other Taxes

Taxes other than income taxes for each year are shown below. These amounts are recoverable through rates.

	2013	2012	2011
	(millions of dollars)		
Gross Receipts/Delivery	$15	$14	$15
Property	24	21	19
Environmental, Use and Other	1	1	3
Total	$40	$36	$37

(12) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

DPL uses derivative instruments in the form of swaps and over-the-counter options primarily to reduce natural gas commodity price volatility and limit its customers' exposure to increases in the market price of natural gas under a hedging program approved by the DPSC. DPL uses these derivatives to manage the commodity price risk associated with its physical natural gas purchase contracts. The natural gas purchase contracts qualify as normal purchases, which are not required to be recorded in the financial statements until settled. All premiums paid and other transaction costs incurred as part of DPL's natural gas hedging activity, in addition to all gains and losses related to hedging activities, are deferred under FASB guidance on regulated operations (ASC 980) until recovered from its customers through a fuel adjustment clause approved by the DPSC.

The tables below identify the balance sheet location and fair values of derivative instruments as of December 31, 2013 and 2012:

	As of December 31, 2013				
Balance Sheet Caption	Derivatives Designated as Hedging Instruments	Other Derivative Instruments	Gross Derivative Instruments	Effects of Cash Collateral and Netting	Net Derivative Instruments
			(millions of dollars)		
Derivative assets (current assets)	$ —	$ 1	$ 1	$ (1)	$ —
Total Derivative asset	$ —	$ 1	$ 1	$ (1)	$ —

Balance Sheet Caption	As of December 31, 2012 Derivatives Designated as Hedging Instruments	Other Derivative Instruments	Gross Derivative Instruments	Effects of Cash Collateral and Netting	Net Derivative Instruments
			(millions of dollars)		
Derivative liabilities (current liabilities)	$ —	$ (4)	$ (4)	$ —	$ (4)
Total Derivative liability	$ —	$ (4)	$ (4)	$ —	$ (4)

All derivative assets and liabilities available to be offset under master netting arrangements were netted as of December 31, 2013 and 2012. The amount of cash collateral that was offset against these derivative positions is as follows:

	December 31, 2013	December 31, 2012
	(millions of dollars)	
Cash collateral received from counterparties with the obligation to return	$ (1)	$ —

As of December 31, 2013 and 2012, all DPL cash collateral pledged related to derivative instruments accounted for at fair value was entitled to be offset under master netting agreements.

Derivatives Designated as Hedging Instruments

Cash Flow Hedges

All premiums paid and other transaction costs incurred as part of DPL's natural gas hedging activity, in addition to all of DPL's gains and losses related to hedging activities, are deferred under FASB guidance on regulated operations until recovered from customers based on the fuel adjustment clause approved by the DPSC. For the years ended December 31, 2013, 2012 and 2011, DPL had no net unrealized derivative losses and zero, zero and $5 million, respectively, of net realized losses associated with cash flow hedges recognized in the statements of income (through Purchased energy or Gas purchased expense) that were deferred as Regulatory assets.

Other Derivative Activity

DPL holds certain derivatives that are not in hedge accounting relationships and are not designated as normal purchases or normal sales. These derivatives are recorded at fair value on the balance sheets with the gain or loss for changes in the fair value recorded in income. In accordance with FASB guidance on regulated operations, offsetting regulatory liabilities or regulatory assets are recorded on the balance sheets and the recognition of the derivative gain or loss is deferred because of the DPSC-approved fuel adjustment clause. For the years ended December 31, 2013, 2012 and 2011, the net unrealized derivative losses arising during the period that were deferred as Regulatory assets and the net realized losses recognized in the statements of income (through Purchased energy and Gas purchased expense) that were also deferred as Regulatory assets are provided in the table below:

	For the Year Ended December 31, 2013	2012	2011
	(millions of dollars)		
Net unrealized gain (loss) arising during the period	$ 1	$ (3)	$ (13)
Net realized loss recognized during the period	(4)	(16)	(22)

As of December 31, 2013 and 2012, DPL had the following net outstanding natural gas commodity forward contracts that did not qualify for hedge accounting:

	December 31, 2013		December 31, 2012	
Commodity	Quantity	Net Position	Quantity	Net Position
Natural Gas (One Million British Thermal Units (MMBtu))	3,977,500	Long	3,838,000	Long

Contingent Credit Risk Features

The primary contracts used by DPL for derivative transactions are entered into under the International Swaps and Derivatives Association Master Agreement (ISDA) or similar agreements that closely mirror the principal credit provisions of the ISDA. The ISDAs include a Credit Support Annex (CSA) that governs the mutual posting and administration of collateral security. The failure of a party to comply with an obligation under the CSA, including an obligation to transfer collateral security when due or the failure to maintain any required credit support, constitutes an event of default under the ISDA for which the other party may declare an early termination and liquidation of all transactions entered into under the ISDA, including foreclosure against any collateral security. In addition, some of the ISDAs have cross default provisions under which a default by a party under another commodity or derivative contract, or the breach by a party of another borrowing obligation in excess of a specified threshold, is a breach under the ISDA.

Under the ISDA or similar agreements, the parties establish a dollar threshold of unsecured credit for each party in excess of which the party would be required to post collateral to secure its obligations to the other party. The amount of the unsecured credit threshold varies according to the senior, unsecured debt rating of the respective parties or that of a guarantor of the party's obligations. The fair values of all transactions between the parties are netted under the master netting provisions. Transactions may include derivatives accounted for on-balance sheet as well as normal purchases and normal sales that are accounted for off-balance sheet. If the aggregate fair value of the transactions in a net loss position exceeds the unsecured credit threshold, then collateral is required to be posted in an amount equal to the amount by which the unsecured credit threshold is exceeded. The obligations of DPL are stand-alone obligations without the guarantee of PHI. If DPL's credit rating were to fall below "investment grade," the unsecured credit threshold would typically be set at zero and collateral would be required for the entire net loss position. Exchange-traded contracts are required to be fully collateralized without regard to the credit rating of the holder.

The gross fair value of DPL's derivative liabilities with credit-risk-related contingent features on December 31, 2013 and 2012, was zero and $4 million, respectively. As of those dates, DPL had posted no cash collateral in the normal course of business against its gross derivative liabilities. If DPL's debt ratings had been downgraded below investment grade as of December 31, 2013 and 2012, DPL's net settlement amounts would have been approximately zero and $2 million, respectively, and DPL would have been required to post collateral with the counterparties of approximately zero and $2 million, respectively. The net settlement and additional collateral amounts reflect the effect of offsetting transactions under master netting agreements.

DPL's primary sources for posting cash collateral or letters of credit are PHI's credit facilities, under which DPL is a borrower. As of December 31, 2013 and 2012, the aggregate amount of cash plus borrowing capacity under the credit facilities available to meet the liquidity needs of PHI's utility subsidiaries was $332 million and $477 million, respectively.

(13) FAIR VALUE DISCLOSURES

Financial Instruments Measured at Fair Value on a Recurring Basis

DPL applies FASB guidance on fair value measurement and disclosures (ASC 820) that established a framework for measuring fair value and expanded disclosures about fair value measurements. As defined in the guidance, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). DPL utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated or generally unobservable. Accordingly, DPL utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The guidance establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3).

The following tables set forth, by level within the fair value hierarchy, DPL's financial assets and liabilities that were accounted for at fair value on a recurring basis as of December 31, 2013 and 2012. As required by the guidance, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. DPL's assessment of the significance of a particular input to the fair value measurement requires the exercise of judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

	Fair Value Measurements at December 31, 2013			
Description	**Total**	**Quoted Prices in Active Markets for Identical Instruments (Level 1) (a)**	**Significant Other Observable Inputs (Level 2) (a)**	**Significant Unobservable Inputs (Level 3)**
	(millions of dollars)			
ASSETS				
Derivative instruments (b)				
Natural gas (c)	$ 1	$ 1	$ —	$ —
Executive deferred compensation plan assets

Life insurance contracts	1	—	—	1
	$ 3	$ 2	$ —	$ 1
LIABILITIES				
Executive deferred compensation plan assets				
Life insurance contracts	$ 1	$ —	$ 1	$ —
	$ 1	$ —	$ 1	$ —

(a) There were no transfers of instruments between level 1 and level 2 valuation categories during the year ended December 31, 2013.
(b) The fair value of derivative assets reflect netting by counterparty before the impact of collateral.
(c) Represents natural gas swaps purchased by DPL as part of a natural gas hedging program approved by the DPSC.

Description	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1) (a)	Significant Other Observable Inputs (Level 2) (a)	Significant Unobservable Inputs (Level 3)
	Fair Value Measurements at December 31, 2012			
	(millions of dollars)			
ASSETS				
Executive deferred compensation plan assets				
Money market funds	$ 2	$ 2	$ —	$ —
Life insurance contracts	1	—	—	1
	$ 3	$ 2	$ —	$ 1
LIABILITIES				
Derivative instruments (b)				
Natural gas (c)	$ 4	$ —	$ —	$ 4
	$ 4	$ —	$ —	$ 4

(a) There were no transfers of instruments between level 1 and level 2 valuation categories during the year ended December 31, 2012.
(b) The fair value of derivative liabilities reflect netting by counterparty before the impact of collateral.
(c) Represents natural gas options purchased by DPL as part of a natural gas hedging program approved by the DPSC.

DPL classifies its fair value balances in the fair value hierarchy based on the observability of the inputs used in the fair value calculation as follows:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis, such as the New York Mercantile Exchange (NYMEX).

Level 2 – Pricing inputs are other than quoted prices in active markets included in level 1, which are either directly or indirectly observable as of the reporting date. Level 2 includes those financial instruments that are valued using broker quotes in liquid markets and other observable data. Level 2 also includes those financial instruments that are valued using methodologies that have been corroborated by observable market data through correlation or by other means. Significant assumptions are observable in the marketplace throughout the full term of the instrument and can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace.

Level 2 executive deferred compensation plan liabilities associated with the life insurance policies represent a deferred compensation obligation, the value of which is tracked via underlying insurance sub-accounts. The sub-accounts are designed to mirror existing mutual funds and money market funds that are observable and actively traded.

Level 3 – Pricing inputs that are significant and generally less observable than those from objective sources. Level 3 includes those financial instruments that are valued using models or other valuation methodologies.

Derivative instruments categorized as level 3 represent natural gas options used by DPL as part of a natural gas hedging program approved by the DPSC. DPL applies a Black-Scholes model to value its options with inputs, such as forward price curves, contract prices, contract volumes, the risk-free rate and implied volatility factors that are based on a range of historical NYMEX option prices. DPL maintains valuation policies and procedures and reviews the validity and relevance of the inputs used to estimate the fair value of its options. As of December 31, 2013, all of these contracts classified as level 3 derivative instruments have settled.

The table below summarizes the primary unobservable input used to determine the fair value of DPL's level 3 instruments and the range of values that could be used for the input as of December 31, 2012:

Type of Instrument	Fair Value at December 31, 2012 (millions of dollars)	Valuation Technique	Unobservable Input	Range
Natural gas options	$ (4)	Option model	Volatility factor	1.57 – 2.00

DPL used values within this range as part of its fair value estimates. A significant change in the unobservable input within this range would have an insignificant impact on the reported fair value as of December 31, 2012.

Executive deferred compensation plan assets include certain life insurance policies that are valued using the cash surrender value of the policies, net of loans against those policies. The cash surrender values do not represent a quoted price in an active market; therefore, those inputs are unobservable and the policies are categorized as level 3. Cash surrender values are provided by third parties and reviewed by DPL for reasonableness.

Reconciliations of the beginning and ending balances of DPL's fair value measurements using significant unobservable inputs (Level 3) for the years ended December 31, 2013 and 2012 are shown below:

	Year Ended December 31, 2013		Year Ended December 31, 2012	
	Natural Gas	Life Insurance Contracts	Natural Gas	Life Insurance Contracts
	(millions of dollars)			
Balance as of January 1	$ (4)	$ 1	$ (15)	$ 1
Total gains (losses) (realized and unrealized):				
Included in income	—	—	—	—
Included in accumulated other comprehensive loss	—	—	—	—
Included in regulatory liabilities	—	—	(2)	—
Purchases	—	—	—	—
Issuances	—	—	—	—
Settlements	4	—	13	—
Transfers in (out) of Level 3	—	—	—	—
Balance as of December 31	$ —	$ 1	$ (4)	$ 1

Other Financial Instruments

The estimated fair values of DPL's Long-term debt instruments that are measured at amortized cost in DPL's financial statements and the associated level of the estimates within the fair value hierarchy as of December 31, 2013 and 2012 are shown in the tables below. As required by the fair value measurement guidance, debt instruments are classified in their entirety within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. DPL's assessment of the significance of a particular input to the fair value measurement requires the exercise of judgment, which may affect the valuation of fair value debt instruments and their placement within the fair value hierarchy levels.

The fair value of Long-term debt categorized as level 2 is based on a blend of quoted prices for the debt and quoted prices for similar debt on the measurement date. The blend places more weight on current pricing information when determining the final fair value measurement. The fair value information is provided by brokers and DPL reviews the methodologies and results.

The fair value of Long-term debt categorized as level 3 is based on a discounted cash flow methodology using observable inputs, such as the U.S. Treasury yield, and unobservable inputs, such as credit spreads, because quoted prices for the debt or similar debt in active markets were insufficient.

	Fair Value Measurements at December 31, 2013			
Description	**Total**	**Quoted Prices in Active Markets for Identical Instruments (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
		(millions of dollars)

	$ 960	$ —	$ 850	$ 110

(a) The carrying amount for Long-term debt is $967 million as of December 31, 2013.

	Fair Value Measurements at December 31, 2012			
Description	**Total**	**Quoted Prices in Active Markets for Identical Instruments (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
		(millions of dollars)		
LIABILITIES				
Debt instruments				
Long-term debt (a)	$ 990	$ —	$ 877	$ 113
	$ 990	$ —	$ 877	$ 113

(a) The carrying amount for Long-term debt is $917 million as of December 31, 2012.

The carrying amounts of all other financial instruments in the accompanying financial statements approximate fair value.

(14) COMMITMENTS AND CONTINGENCIES

General Litigation

From time to time, DPL is named as a defendant in litigation, usually relating to general liability or auto liability claims that resulted in personal injury or property damage to third parties. DPL is self-insured against such claims up to a certain self-insured retention amount and maintains insurance coverage against such claims at higher levels, to the extent deemed prudent by management. In addition, DPL's contracts with its vendors generally require the vendors to name DPL as an additional insured for the amount at least equal to DPL's self-insured retention. Further, DPL's contracts with its vendors require the vendors to indemnify DPL for various acts and activities that may give rise to claims against DPL. Loss contingency liabilities for both asserted and unasserted claims are recognized if it is probable that a loss will result from such a claim and if the amounts of the losses can be reasonably estimated. Although the outcome of the claims and proceedings cannot be predicted with any certainty, management believes that there are no existing claims or proceedings that are likely to have a material adverse effect on DPL's financial condition, results of operations or cash flows. At December 31, 2013, DPL had loss contingency liabilities for general litigation totaling approximately $2 million.

Environmental Matters

DPL is subject to regulation by various federal, regional, state, and local authorities with respect to the environmental effects of its operations, including air and water quality control, solid and hazardous waste disposal, and limitations on land use. Although penalties assessed for violations of environmental laws and regulations are not recoverable from DPL's customers, environmental clean-up costs incurred by DPL generally are included in its cost of service for ratemaking purposes. The total accrued liabilities for the environmental contingencies of DPL described below at December 31, 2013 are summarized as follows:

	Transmission and Distribution	Legacy Generation - Regulated	Other	Total
		(millions of dollars)		
Balance as of January 1	$ 1	$ 3	$ 2	$ 6
Accruals	—	—	1	1
Payments	—	(1)	(3)	(4)
Balance as of December 31	1	2	—	3
Less amounts in Other Current Liabilities	1	1	—	2
Amounts in Other Deferred Credits	$ —	$ 1	$ —	$ 1

Ward Transformer Site

In April 2009, a group of potentially responsible parties (PRPs) with respect to the Ward Transformer site in Raleigh, North Carolina, filed a complaint in the U.S. District Court for the Eastern District of North Carolina, alleging cost recovery and/or contribution claims against a number of entities, including DPL, based on its alleged sale of transformers to Ward Transformer, with respect to past and future response costs incurred by the PRP group in performing a removal action at the site. In a March 2010 order, the court denied the defendants' motion to dismiss. The litigation is moving forward with certain "test case" defendants (not including DPL) filing summary judgment motions regarding liability. The case has been stayed as to the remaining defendants pending rulings upon the test cases. In a January 31, 2013 order, the Federal district court granted summary judgment for the test case defendant whom plaintiffs alleged was liable based on its sale of transformers to Ward Transformer. The Federal district court's order, which plaintiffs have appealed to the U.S. Court of Appeals for the Fourth Circuit, addresses only the liability of the test case defendant. DPL has concluded that a loss is reasonably possible with respect to this matter, but is unable to estimate an amount or range of reasonably possible losses to which it may be exposed. DPL does not believe that it had extensive business transactions, if any, with the Ward Transformer site.

Indian River Oil Release

In 2001, DPL entered into a consent agreement with the Delaware Department of Natural Resources and Environmental Control for remediation, site restoration, natural resource damage compensatory projects and other costs associated with environmental contamination resulting from an oil release at the Indian River generating facility, which was sold in June 2001. The amount of remediation costs accrued for this matter is included in the table above in the column entitled "Legacy Generation – Regulated."

Metal Bank Site

In the first quarter of 2013, the National Oceanic and Atmospheric Administration (NOAA) contacted DPL on behalf of itself and other federal and state trustees to request that DPL execute a tolling agreement to facilitate settlement negotiations concerning natural resource damages allegedly caused by releases of hazardous substances, including polychlorinated biphenyls, at the Metal Bank Superfund Site located in Philadelphia, Pennsylvania. DPL has executed the tolling agreement and will participate in settlement discussions with the NOAA, the trustees and other PRPs.

The amount accrued for this matter is included in the table above in the column entitled "Transmission and Distribution."

Contractual Obligations

Power Purchase Contracts

As of December 31, 2013, DPL's contractual obligations under non-derivative power purchase contracts were $64 million in 2014, $131 million in 2015 to 2016, $131 million in 2017 to 2018, and $300 million in 2019 and thereafter.

Lease Commitments

DPL leases an 11.9% interest in the Merrill Creek Reservoir. The lease is an operating lease and payments over the remaining lease term, which ends in 2032, are $84 million in the aggregate. DPL also has long-term leases for certain other facilities and equipment. Total future minimum operating lease payments for DPL, including the Merrill Creek Reservoir lease, as of December 31, 2013, are $13 million in 2014, $13 million in 2015, $11 million in 2016, $10 million in 2017, $14 million in 2018, and $111 million thereafter.

Rental expense for operating leases, including the Merrill Creek Reservoir lease, was $13 million, $12 million and $11 million for the years ended December 31, 2013, 2012 and 2011, respectively.

(15) RELATED PARTY TRANSACTIONS

PHI Service Company provides various administrative and professional services to PHI and its regulated and unregulated subsidiaries, including DPL. The cost of these services is allocated in accordance with cost allocation methodologies set forth in the service agreement using a variety of factors, including the subsidiaries' share of employees, operating expenses, assets and other cost methods. These intercompany transactions are eliminated by PHI in consolidation and no profit results from these transactions at PHI. PHI Service Company costs directly charged or allocated to DPL for the years ended December 31, 2013, 2012 and 2011 were $154 million, $153 million and $133 million, respectively.

In addition to the PHI Service Company charges described above, DPL's financial statements include the following related party transactions in its statements of income:

	For the Year Ended December 31, 2013	2012	2011
		(millions of dollars)	
Purchased power under Default Electricity Supply contracts with Conectiv Energy Supply, Inc. (a)	$ —	$ —	$ 1
Intercompany lease transactions (b)	4	4	5

(a) Included in Purchased energy expense.
(b) Included in Electric revenue.

As of December 31, 2013 and 2012, DPL had the following balances on its balance sheets due to related parties:

	2013	2012
	(millions of dollars)	
Payable to Related Party (current) (a)		
PHI Service Company	$ (22)	$ (19)
Other	—	(1)
Total	$ (22)	$ (20)

(a) Included in Accounts payable due to associated companies.

(16) QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

The quarterly data presented below reflect all adjustments necessary, in the opinion of management, for a fair presentation of the interim results. Quarterly data normally vary seasonally because of temperature variations and differences between summer and winter rates. Therefore, comparisons by quarter within a year are not meaningful.

	2013 First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
			(millions of dollars)		
Total Operating Revenue	$ 370	$ 266	$ 296	$ 312	$1,244
Total Operating Expenses	317	235	249	258	1,059
Operating Income	53	31	47	54	185
Other Expenses	(11)	(10)	(10)	(9)	(40)
Income Before Income Tax Expense	42	21	37	45	145
Income Tax Expense	16	9	14	17	56
Net Income	$ 26	$ 12	$ 23	$ 28	$ 89

	2012 First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
			(millions of dollars)		
Total Operating Revenue	$ 333	$ 259	$ 340	$ 301	$1,233
Total Operating Expenses	290	229	297	263	1,079
Operating Income	43	30	43	38	154
Other Expenses	(8)	(8)	(10)	(11)	(37)
Income Before Income Tax Expense	35	22	33	27	117
Income Tax Expense	14	9	11	10	44
Net Income	$ 21	$ 13	$ 22	$ 17	$ 73

(17) VARIABLE INTEREST ENTITIES

DPL is required to consolidate a variable interest entity (VIE) in accordance with FASB ASC 810 if DPL is the primary beneficiary of the VIE. The primary beneficiary of a VIE is typically the entity with both the power to direct activities most significantly impacting economic performance of the VIE and the obligation to absorb losses or receive benefits of the VIE that could potentially be significant to the VIE. DPL performed a qualitative analysis to determine whether a variable interest provided a controlling financial interest in a VIE at December 31, 2013, which is described below.

DPL is subject to Renewable Energy Portfolio Standards (RPS) in the state of Delaware that require it to obtain renewable energy credits (RECs) for energy delivered to its customers. DPL's costs associated with obtaining RECs to fulfill its RPS obligations are recoverable from its customers by law. As of December 31, 2013, DPL is a party to three land-based wind power purchase agreements (PPAs) in the aggregate amount of 128 MWs and one solar PPA with a 10 MW facility. Each of the facilities associated with these PPAs is operational, and DPL is obligated to purchase energy and RECs in amounts generated and delivered by the wind facilities and solar renewable energy credits (SRECs) from the solar facility up to certain amounts (as set forth below) at rates that are primarily fixed under the respective PPA. DPL has concluded that while VIEs exist under these contracts, consolidation is not required for any of these PPAs under the FASB guidance on the consolidation of variable interest entities as DPL is not the primary beneficiary. DPL has not provided financial or other support under these arrangements that it was not previously contractually required to provide during the periods presented, nor does DPL have any intention to provide such additional support.

Because DPL has no equity or debt interest in these renewable energy transactions, the maximum exposure to loss relates primarily to any above-market costs incurred for power or RECs. Due to unpredictability in amount of MW's ultimately purchased under the PPAs for purchased renewable energy and SRECs, PHI and DPL are unable to quantify the maximum exposure to loss. The power purchase and REC costs are recoverable from DPL's customers through regulated rates.

DPL is obligated to purchase energy and RECs from one of the wind facilities through 2024 in amounts not to exceed 50 MWs, from the second wind facility through 2031 in amounts not to exceed 40 MWs, and from the third wind facility through 2031 in amounts not to exceed 38 MWs. DPL's purchases under the three wind PPAs totaled $30 million, $27 million and $18 million for the years ended December 31, 2013, 2012 and 2011, respectively.

The term of the agreement with the solar facility is 20 years and DPL is obligated to purchase SRECs in an amount up to 70 percent of the energy output at a fixed price. DPL's purchases under the solar agreement were $3 million, $2 million and $1 million for the years ended December 31, 2013, 2012 and 2011, respectively.

On October 18, 2011, the DPSC approved a tariff submitted by DPL in accordance with the requirements of the RPS specific to fuel cell facilities totaling 30 MWs to be constructed by a qualified fuel cell provider. The tariff and the RPS establish that DPL would be an agent to collect payments in advance from its distribution customers and remit them to the qualified fuel cell provider for each MW hour (MWh) of energy produced by the fuel cell facilities over 21 years. DPL has no obligation to the qualified fuel cell provider other than to remit payments collected from its distribution customers pursuant to the tariff. The RPS provides for a reduction in DPL's REC requirements based upon the actual energy output of the facilities. At December 31, 2013 and 2012, 15 MWs and 3 MWs of capacity were available from fuel cell facilities placed in service under the tariff, respectively. DPL billed $23 million and $4 million to distribution customers during the years ended December 31, 2013 and 2012, respectively. DPL has concluded that while a VIE exists under this arrangement, consolidation is not required for this arrangement under the FASB guidance on consolidation of variable interest entities as DPL is not the primary beneficiary.

Management's Report on Internal Control over Financial Reporting

The management of Atlantic City Electric Company (ACE) is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) and Rule 15d-15(f) under the Exchange Act. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management of ACE assessed ACE's internal control over financial reporting as of December 31, 2013 based on the framework in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its assessment, the management of ACE concluded that ACE's internal control over financial reporting was effective as of December 31, 2013.

Report of Independent Registered Public Accounting Firm

To the Shareholder and Board of Directors of
Atlantic City Electric Company

In our opinion, the consolidated financial statements of Atlantic City Electric Company (a wholly owned subsidiary of Pepco Holdings, Inc.) listed in the accompanying index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Atlantic City Electric Company and its subsidiary at December 31, 2013 and December 31, 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule of Atlantic City Electric Company listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

ATLANTIC CITY ELECTRIC COMPANY

(1) ORGANIZATION

Atlantic City Electric Company (ACE) is engaged in the transmission and distribution of electricity in southern New Jersey. ACE also provides Default Electricity Supply, which is the supply of electricity at regulated rates to retail customers in its service territory who do not elect to purchase electricity from a competitive energy supplier. Default Electricity Supply is known as Basic Generation Service in New Jersey. ACE is a wholly owned subsidiary of Conectiv, LLC (Conectiv), which is wholly owned by Pepco Holdings, Inc. (Pepco Holdings or PHI).

(2) SIGNIFICANT ACCOUNTING POLICIES

Consolidation Policy

The accompanying consolidated financial statements include the accounts of ACE and its wholly owned subsidiary Atlantic City Electric Transition Funding, LLC (ACE Funding). All intercompany balances and transactions between subsidiaries have been eliminated. ACE uses the equity method to report investments, corporate joint ventures, partnerships, and affiliated companies where it holds an interest and can exercise significant influence over the operations and policies of the entity. Certain transmission and other facilities currently held are consolidated in proportion to ACE's percentage interest in the facility.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make certain estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities in the consolidated financial statements and accompanying notes. Although ACE believes that its estimates and assumptions are reasonable, they are based upon information available to management at the time the estimates are made. Actual results may differ significantly from these estimates.

Significant matters that involve the use of estimates include the assessment of contingencies, the calculation of future cash flows and fair value amounts for use in asset impairment evaluations, fair value calculations for derivative instruments, pension and other postretirement benefits assumptions, the assessment of the probability of recovery of regulatory assets, accrual of storm restoration costs, accrual of unbilled revenue, recognition of changes in network service transmission rates for prior service year costs, accrual of loss contingency liabilities for general and auto liability claims, and income tax provisions and reserves. Additionally, ACE is subject to legal, regulatory, and other proceedings and claims that arise in the ordinary course of its business. ACE records an estimated liability for these proceedings and claims when it is probable that a loss has been incurred and the loss is reasonably estimable.

Revenue Recognition

ACE recognizes revenue upon distribution of electricity to its customers, including unbilled revenue for electricity delivered but not yet billed. ACE's unbilled revenue was $36 million and $39 million as of December 31, 2012 and 2011, respectively, and these amounts are included in Accounts receivable. ACE calculates unbilled revenue using an output-based methodology. This methodology is based on the supply of electricity intended for distribution to customers. The unbilled revenue process requires management to make assumptions and judgments about input factors such as customer sales mix, temperature, and estimated line losses (estimates of electricity expected to be lost in the process of its transmission and distribution to customers). The assumptions and judgments are inherently uncertain and susceptible to change from period to period, and if the actual results differ from the projected results, the impact could be material.

Taxes related to the consumption of electricity by its customers are a component of ACE's tariffs and, as such, are billed to customers and recorded in Operating revenue. Accruals for the remittance of these taxes by ACE are recorded in Other taxes.

Taxes Assessed by a Governmental Authority on Revenue-Producing Transactions

Taxes included in ACE's gross revenues were $11 million, $15 million and $22 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Accounting for Derivatives

ACE began applying derivative accounting to two of its Standard Offer Capacity Agreements (SOCAs), as of June 30, 2012 because the generators cleared the 2015-2016 PJM Interconnection, LLC (PJM) capacity auction in May 2012. Changes in the fair value of the derivatives embedded in the SOCAs are deferred as regulatory assets or liabilities because the New Jersey Board of Public Utilities (NJBPU) has ordered that ACE is obligated to distribute to or recover from its distribution customers, all payments received or made by ACE, respectively, under the SOCAs. See Note (6), "Regulatory Matters," for additional information on the SOCAs.

Long-Lived Asset Impairment Evaluation

ACE evaluates certain long-lived assets to be held and used (for example, equipment and real estate) for impairment whenever events or changes in circumstances indicate that their carrying value may not be recoverable. Examples of such events or changes include a significant decrease in the market price of a long-lived asset or a significant adverse change in the manner in which an asset is being used or its physical condition. A long-lived asset to be held and used is written down to its estimated fair value if the expected future undiscounted cash flow from the asset is less than its carrying value.

For long-lived assets that can be classified as assets to be disposed of by sale, an impairment loss is recognized to the extent that the asset's carrying value exceeds its estimated fair value including costs to sell.

Income Taxes

ACE, as an indirect subsidiary of Pepco Holdings, is included in the consolidated federal income tax return of PHI. Federal income taxes are allocated to ACE based upon the taxable income or loss amounts, determined on a separate return basis.

The consolidated financial statements include current and deferred income taxes. Current income taxes represent the amount of tax expected to be reported on ACE's state income tax returns and the amount of federal income tax allocated from Pepco Holdings.

Deferred income tax assets and liabilities represent the tax effects of temporary differences between the financial statement basis and tax basis of existing assets and liabilities, and they are measured using presently enacted tax rates. The portion of ACE's deferred tax liability applicable to its utility operations that has not been recovered from utility customers represents income taxes recoverable in the future and is included in Regulatory assets on the consolidated balance sheets. See Note (6), "Regulatory Matters," for additional information.

Deferred income tax expense generally represents the net change during the reporting period in the net deferred tax liability and deferred recoverable income taxes.

ACE recognizes interest on underpayments and overpayments of income taxes, interest on uncertain tax positions, and tax-related penalties in income tax expense.

Investment tax credits are being amortized to income over the useful lives of the related property.

Consolidation of Variable Interest Entities

ACE assesses its contractual arrangements with variable interest entities to determine whether it is the primary beneficiary and thereby has to consolidate the entities in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 810. The guidance addresses conditions under which an entity should be consolidated based upon variable interests rather than voting interests. See Note (16), “Variable Interest Entities,” for additional information.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash invested in money market funds and commercial paper held with original maturities of three months or less. Additionally, deposits in PHI’s money pool, which ACE and certain other PHI subsidiaries use to manage short-term cash management requirements, are considered cash equivalents. Deposits in the money pool are guaranteed by PHI. PHI deposits funds in the money pool to the extent that the pool has insufficient funds to meet the needs of its participants, which may require PHI to borrow funds for deposit from external sources.

Restricted Cash Equivalents

The Restricted cash equivalents included in Current assets and the Restricted cash equivalents included in Other assets consist of (i) cash held as collateral that is restricted from use for general corporate purposes and (ii) cash equivalents that are specifically segregated based on management’s intent to use such cash equivalents for a particular purpose. The classification as current or non-current conforms to the classification of the related liabilities.

Accounts Receivable and Allowance for Uncollectible Accounts

ACE’s Accounts receivable balance primarily consists of customer accounts receivable arising from the sale of goods and services to customers within its service territories, other accounts receivable, and accrued unbilled revenue. Accrued unbilled revenue represents revenue earned in the current period but not billed to the customer until a future date (usually within one month after the receivable is recorded).

ACE maintains an allowance for uncollectible accounts and changes in the allowance are recorded as an adjustment to Other operation and maintenance expense in the consolidated statements of income. ACE determines the amount of allowance based on specific identification of material amounts at risk by customer and maintains a reserve based on its historical collection experience. The adequacy of this allowance is assessed on a quarterly basis by evaluating all known factors such as the aging of the receivables, historical collection experience, the economic and competitive environment and changes in the creditworthiness of its customers. Accounts receivable are written off in the period in which the receivable is deemed uncollectible and collection efforts have been exhausted. Recoveries of Accounts receivable previously written off are recorded when it is probable they will be recovered. Although ACE believes its allowance is adequate, it cannot anticipate with any certainty the changes in the financial condition of its customers. As a result, ACE records adjustments to the allowance for uncollectible accounts in the period in which the new information that requires an adjustment to the reserve becomes known.

Inventories

Included in inventories are transmission and distribution materials and supplies. ACE utilizes the weighted average cost method of accounting for inventory items. Under this method, an average price is determined for the quantity of units acquired at each price level and is applied to the ending quantity to calculate the total ending inventory balance. Materials and supplies are recorded in Inventory when purchased and then expensed or capitalized to plant, as appropriate, when installed.

Regulatory Assets and Regulatory Liabilities

Certain aspects of ACE's business are subject to regulation by the NJBPU. The transmission of electricity by ACE is regulated by the Federal Energy Regulatory Commission (FERC).

Based on the regulatory framework in which it has operated, ACE has historically applied, and in connection with its transmission and distribution business continues to apply, FASB guidance on regulated operations (ASC 980). The guidance allows regulated entities, in appropriate circumstances, to defer the income statement impact of certain costs that are expected to be recovered in future rates through the establishment of regulatory assets and defer certain revenues that are expected to be refunded to customers through the establishment of regulatory liabilities. Management's assessment of the probability of recovery of regulatory assets requires judgment and interpretation of laws, regulatory commission orders and other factors. If management subsequently determines, based on changes in facts or circumstances, that a regulatory asset is not probable of recovery, the regulatory asset would be eliminated through a charge to earnings.

Property, Plant and Equipment

Property, plant and equipment is recorded at original cost, including labor, materials, asset retirement costs and other direct and indirect costs, including capitalized interest. The carrying value of Property, plant and equipment is evaluated for impairment whenever circumstances indicate the carrying value of those assets may not be recoverable. Upon retirement, the cost of regulated property, net of salvage, is charged to accumulated depreciation.

The annual provision for depreciation on electric property, plant and equipment is computed on a straight-line basis using composite rates by classes of depreciable property. Accumulated depreciation is charged with the cost of depreciable property retired, less salvage and other recoveries. Non-operating and other property is generally depreciated on a straight-line basis over the useful lives of the assets. The system-wide composite annual depreciation rates for the years ended December 31, 2013, 2012 and 2011 for ACE's property were approximately 2.8%, 3.0% and 3.0%, respectively.

In 2010, ACE was awarded $19 million from the U.S. Department of Energy (DOE) to fund a portion of the costs incurred for the implementation of direct load control, distribution automation and communications infrastructure in its New Jersey service territory. ACE has elected to recognize the award proceeds as a reduction in the carrying value of the assets acquired rather than grant income over the service period.

Capitalized Interest and Allowance for Funds Used During Construction

In accordance with FASB guidance on regulated operations (ASC 980), utilities can capitalize the capital costs of financing the construction of plant and equipment as Allowance for Funds Used During Construction (AFUDC). This results in the debt portion of AFUDC being recorded as a reduction of Interest expense and the equity portion of AFUDC being recorded as an increase to Other income in the accompanying consolidated statements of income.

ACE recorded AFUDC for borrowed funds of less than $1 million for the year ended December 31, 2013, $2 million for the year ended December 31, 2012 and $2 million for the year ended December 31, 2011.

ACE recorded amounts for the equity component of AFUDC of less than $1 million for the year ended December 31, 2013, $3 million for the year ended December 31, 2012 and less than $1 million for the year ended December 31, 2011.

Leasing Activities

ACE’s lease transactions include plant, office space, equipment, software and vehicles. In accordance with FASB guidance on leases (ASC 840), these leases are classified as operating leases.

An operating lease in which ACE is the lessee generally results in a level income statement charge over the term of the lease, reflecting the rental payments required by the lease agreement. If rental payments are not made on a straight-line basis, ACE’s policy is to recognize rent expense on a straight-line basis over the lease term unless another systematic and rational allocation basis is more representative of the time pattern in which the leased property is physically employed.

Amortization of Debt Issuance and Reacquisition Costs

ACE defers and amortizes debt issuance costs and long-term debt premiums and discounts over the lives of the respective debt issuances. When refinancing or redeeming existing debt, any unamortized premiums, discounts and debt issuance costs, as well as debt redemption costs, are classified as regulatory assets and are amortized generally over the life of the original issue.

Pension and Postretirement Benefit Plans

Pepco Holdings sponsors the PHI Retirement Plan, a non-contributory, defined benefit pension plan that covers substantially all employees of ACE and certain employees of other Pepco Holdings subsidiaries. Pepco Holdings also provides supplemental retirement benefits to certain eligible executives and key employees through nonqualified retirement plans and provides certain postretirement health care and life insurance benefits for eligible retired employees.

The PHI Retirement Plan is accounted for in accordance with FASB guidance on retirement benefits (ASC 715).

Dividend Restrictions

All of ACE’s shares of outstanding common stock are held by Conectiv, its parent company. In addition to its future financial performance, the ability of ACE to pay dividends to its parent company is subject to limits imposed by: (i) state corporate laws, which impose limitations on the funds that can be used to pay dividends and the regulatory requirement that ACE obtain the prior approval of the NJBPU before dividends can be paid if its equity as a percent of its total capitalization, excluding securitization debt, falls below 30%; (ii) the prior rights of holders of existing and future preferred stock, mortgage bonds and other long-term debt issued by ACE and any other restrictions imposed in connection with the incurrence of liabilities; and (iii) certain provisions of the charter of ACE which impose restrictions on payment of common stock dividends for the benefit of preferred stockholders. Currently, the restriction in the ACE charter does not limit its ability to pay common stock dividends. ACE had approximately $190 million and $200 million of retained earnings available for payment of common stock dividends at December 31, 2013 and 2012, respectively. These amounts represent the total retained earnings balances at those dates.

Reclassifications and Adjustments

Certain prior period amounts have been reclassified in order to conform to the current period presentation. The following adjustments have been recorded and are not considered material individually or in the aggregate to either the current period or prior period financial results:

Deferred Electric Service Costs Adjustments

In 2012, ACE recorded an adjustment to correct errors associated with its calculation of deferred electric service costs. This adjustment resulted in an increase of $3 million to deferred electric service costs, all of which relates to periods prior to 2012.

Income Tax Expense

During 2011, ACE completed a reconciliation of its deferred taxes associated with certain regulatory assets and recorded adjustments which resulted in an increase to income tax expense of $1 million for the year ended December 31, 2011.

(3) NEWLY ADOPTED ACCOUNTING STANDARDS

Balance Sheet (ASC 210)

In December 2011, the FASB issued new disclosure requirements for financial assets and financial liabilities, such as derivatives, that are subject to contractual netting arrangements. The new disclosure requirements include information about the gross exposure of the instruments and the net exposure of the instruments under contractual netting arrangements, how the exposures are presented in the financial statements, and the terms and conditions of the contractual netting arrangements. ACE adopted the new guidance during the first quarter of 2013 and concluded it did not have a material impact on its consolidated financial statements.

(4) RECENTLY ISSUED ACCOUNTING STANDARDS, NOT YET ADOPTED

Joint and Several Liability Arrangements (ASC 405)

In February 2013, the FASB issued new recognition and disclosure requirements for certain joint and several liability arrangements where the total amount of the obligation is fixed at the reporting date. For arrangements within the scope of this standard, ACE will be required to include in its liabilities the additional amounts it expects to pay on behalf of its co-obligors, if any. ACE will also be required to provide additional disclosures including the nature of the arrangements with its co-obligors, the total amounts outstanding under the arrangements between ACE and its co-obligors, the carrying value of the liability, and the nature and limitations of any recourse provisions that would enable recovery from other entities.

The new requirements are effective retroactively beginning on January 1, 2014, with implementation required for prior periods if joint and several liability arrangement obligations exist as of January 1, 2014. ACE does not expect this new guidance to have a material impact on its consolidated financial statements.

Income Taxes (ASC 740)

In July 2013, the FASB issued new guidance that will require the netting of certain unrecognized tax benefits against a deferred tax asset for a loss or other similar tax carryforward that would apply upon settlement of the uncertain tax position. The new requirements are effective prospectively beginning with ACE’s March 31, 2014 consolidated financial statements for all unrecognized tax benefits existing at the adoption date. Retrospective implementation and early adoption of the guidance are permitted. ACE does not expect this new guidance to have a material impact on its consolidated financial statements.

(5) SEGMENT INFORMATION

The company operates its business as one regulated utility segment, which includes all of its services as described above.

(6) REGULATORY MATTERS

Regulatory Assets and Regulatory Liabilities

The components of ACE's regulatory asset and liability balances at December 31, 2013 and 2012 are as follows:

	2013	2012
	(millions of dollars)	
Regulatory Assets		
Securitized stranded costs (a)	$ 350	$ 416
Deferred energy supply costs (a)	117	166
Recoverable income taxes	42	33
Incremental storm restoration costs	26	34
ACE SOCAs	—	11
Other	34	34
Total Regulatory Assets	$ 569	$ 694
Regulatory Liabilities		
Deferred energy supply costs	$ 38	$ 62
Federal and state tax benefits, related to securitized stranded costs	13	16
Excess depreciation reserve	—	11
ACE SOCAs	—	8
Other	6	5
Total Regulatory Liabilities	$ 57	$ 102

(a) A return is generally earned on these deferrals.

A description for each category of regulatory assets and regulatory liabilities follows:

Securitized Stranded Costs: Certain contract termination payments under a contract between ACE and an unaffiliated non-utility generator (NUG) and costs associated with the regulated operations of ACE's electricity generation business are no longer recoverable through customer rates (collectively referred to as "stranded costs"). The stranded costs are amortized over the life of Transition Bonds issued by ACE Funding to securitize the recoverability of these stranded costs. These Transition Bonds mature between 2013 and 2023. A customer surcharge is collected by ACE to fund principal and interest payments on the Transition Bonds.

Deferred Energy Supply Costs: The regulatory asset represents primarily deferred costs associated with a net under-recovery of Basic Generation Service costs incurred by ACE that are probable of recovery in rates. The regulatory liability represents primarily deferred costs associated with a net over-recovery of Basic Generation Service costs incurred that will be refunded by ACE to customers.

Recoverable Income Taxes: Represents amounts recoverable from ACE's customers for tax benefits applicable to utility operations previously recognized in income tax expense before the company was ordered to account for the tax benefits as deferred income taxes. As the temporary differences between the financial statement basis and tax basis of assets reverse, the deferred recoverable balances are reversed.

Incremental Storm Restoration Costs: Represents total incremental storm restoration costs incurred for repair work due to major storm events in 2012 and 2011, including Hurricane Sandy, the June 2012 derecho, and Hurricane Irene, that are recoverable from customers in the New Jersey jurisdiction. ACE's costs related to Hurricane Sandy, the June 2012 derecho and Hurricane Irene are being amortized and recovered in rates, each over a three-year period.

ACE SOCAs: The regulatory asset represented unrealized losses associated with the SOCAs that ACE had entered into by order of the NJBPU. The NJBPU had ordered full recovery from distribution customers of payments made by ACE related to the SOCAs. Since these unrealized losses were non-cash, the related regulatory asset does not earn a return. The regulatory liability represented unrealized gains associated with the SOCAs that ACE had entered into by order of the NJBPU. The NJBPU had ordered that any amounts that ACE receives related to the SOCAs be remitted to its distribution customers. As further discussed below, ACE has derecognized their regulatory assets and liabilities related to the SOCAs in the fourth quarter of 2013.

Other: Represents miscellaneous regulatory assets that generally are being amortized over 1 to 20 years.

Federal and State Tax Benefits, Related to Securitized Stranded Costs: Securitized stranded costs include a portion attributable to the future tax benefit expected to be realized when the higher tax basis of the generating facilities divested by ACE is deducted for New Jersey state income tax purposes, as well as the future benefit to be realized through the reversal of federal excess deferred taxes. To account for the possibility that these tax benefits may be given to ACE's customers through lower rates in the future, ACE established a regulatory liability. The regulatory liability related to federal excess deferred taxes will remain until such time as the Internal Revenue Service (IRS) issues its final regulations with respect to normalization of these federal excess deferred taxes.

Excess Depreciation Reserve: The excess depreciation reserve was recorded as part of an ACE New Jersey rate case settlement. This excess reserve is the result of a change in estimated depreciable lives and a change in depreciation technique from remaining life to whole life that caused an over-recovery for depreciation expense from customers when the remaining life method had been used. The excess was amortized as a reduction in Depreciation and amortization expense over an 8.25 year period, and expired in 2013.

Other: Includes miscellaneous regulatory liabilities.

Rate Proceedings

Bill Stabilization Adjustment

In 2009, ACE proposed in New Jersey the adoption of a bill stabilization adjustment (BSA) mechanism to decouple retail distribution revenue from the amount of power delivered to retail customers. The BSA proposal was not approved and there is no BSA proposal currently pending. Under the BSA, customer distribution rates are subject to adjustment (through a credit or surcharge mechanism), depending on whether actual distribution revenue per customer exceeds or falls short of the revenue-per-customer amount approved by the applicable public service commission.

Electric Distribution Base Rates

On December 11, 2012, ACE submitted an application with the NJBPU, updated on January 4, 2013, to increase its electric distribution base rates by approximately $70.4 million (excluding sales-and-use taxes), based on a requested return on equity (ROE) of 10.25%. This proposed net increase was comprised of (i) a proposed increase to ACE's distribution rates of approximately $72.1 million and (ii) a net decrease to ACE's Regulatory Asset Recovery Charge (a customer charge to recover deferred, NJBPU-approved expenses incurred as part of ACE's public service obligation) in the amount of approximately $1.7 million. The requested rate increase seeks to recover expenses associated with ACE's ongoing investments in reliability enhancement improvements and efforts to maintain safe and reliable service. and to recover system restoration costs associated with the derecho storm in June 2012 and Hurricane Sandy in October 2012. On June 21, 2013, the NJBPU approved a settlement of the parties providing for an increase in ACE's electric distribution base rates in the amount of $25.5 million, based on an ROE of 9.75%. The base distribution revenue increase includes full recovery of the approximately $70.0 million in incremental storm restoration costs incurred as a result of recent major storm events, including the derecho storm and Hurricane Sandy, by including the related capital costs of approximately $44.2 million in rate base and amortizing the related deferred operation and maintenance expenses of approximately $25.8 million over a three-year period. Rates were effective on July 1, 2013.

Update and Reconciliation of Certain Under-Recovered Balances

In February 2012 and March 2013, ACE submitted petitions with the NJBPU seeking to reconcile and update (i) charges related to the recovery of above-market costs associated with ACE's long-term power purchase contracts with the NUGs, (ii) costs related to surcharges for the New Jersey Societal Benefit Program (a statewide public interest program for low income customers) and ACE's uncollected accounts and (iii) operating costs associated with ACE's residential appliance cycling program. In June 2012, the NJBPU approved a stipulation of settlement related to ACE's February 2012 filing, which provided for an overall annual rate increase of $55.3 million that went into effect on July 1, 2012. In May 2013, the NJBPU approved a stipulation of settlement related to ACE's March 2013 filing, which provided for an overall annual rate increase of $52.2 million (in addition to the $55.3 million approved by the NJBPU in June 2012) that went into effect on June 1, 2013. These rate increases, which primarily provide for the recovery of above-market costs associated with the NUG contracts and will have no effect on ACE's operating income, were placed into effect provisionally and were subject to a review by the NJBPU of the final underlying costs for reasonableness and prudence. On February 19, 2014, the NJBPU approved a stipulation of settlement for both proceedings, which made final the provisional rates that went into effect on July 1, 2012 and June 1, 2013, respectively.

Service Extension Contributions Refund Order

On July 19, 2013, in compliance with a 2012 Superior Court of New Jersey Appellate Division (Appellate Division) court decision, the NJBPU released an order requiring utilities to issue refunds to persons or entities that paid non-refundable contributions for utility service extensions to certain areas described as "Areas Not Designated for Growth." The order is limited to eligible contributions paid between March 20, 2005 and December 20, 2009. ACE is processing the refund requests that meet the eligibility criteria established in the order as they are received. Although ACE believes it received approximately $11 million of contributions between March 20, 2005 and December 20, 2009, it is currently unable to reasonably estimate the amount that it may be required to refund using the eligibility criteria established by the order. At this time, ACE does not expect that any such amount refunded will have a material effect on its consolidated financial condition, results of operations or cash flows, as any amounts that may be refunded will generally increase the value of ACE's property, plant and equipment and may ultimately be recovered through depreciation and cost of service. It is anticipated that NJBPU will commence a rulemaking proceeding to further implement the directives of the Appellate Division decision.

Generic Consolidated Tax Adjustment Proceeding

In January 2013, the NJBPU initiated a generic proceeding to examine whether a consolidated tax adjustment (CTA) should continue to be used, and if so, how it should be calculated in determining a utility's cost of service. Under the NJBPU's current policy, when a New Jersey utility is included in a consolidated group income tax return, an allocated amount of any reduction in the consolidated group's taxes as a result of losses by affiliates is used to reduce the utility's rate base, upon which the utility earns a return. Consequently, this policy has substantially reduced ACE's rate base and ACE's position is that the CTA should be eliminated. A stakeholder process has been initiated by the NJBPU to aid in this examination. No formal schedule has been set for the remainder of the proceeding or for the issuance of a decision.

Federal Energy Regulatory Commission

On February 27, 2013, the public service commissions and public advocates of the District of Columbia, Maryland, Delaware and New Jersey, as well as the Delaware Municipal Electric Corporation, Inc., filed a joint complaint with FERC against ACE and its affiliates Potomac Electric Power Company (Pepco) and Delmarva Power & Light Company (DPL), as well as Baltimore Gas and Electric Company. The complainants challenged the base ROE and the application of the formula rate process, each associated with the transmission service that ACE and its utility affiliates provide. The complainants support an ROE within a zone of reasonableness of 6.78% and 10.33%, and have argued for a base ROE of 8.7%. The base ROE currently authorized by FERC for ACE and its utility affiliates is (i) 11.3% for facilities placed into service after January 1, 2006, and (ii) 10.8% for facilities placed into service prior to 2006. As currently authorized, the 10.8% base ROE for facilities placed into service prior to 2006 is eligible for a 50-basis-point incentive adder for being a member of a regional transmission organization. ACE believes the allegations in this complaint are without merit and is vigorously contesting it. On April 3, 2013, ACE filed its answer to this complaint, requesting that FERC dismiss the complaint against it on the grounds that it failed to meet the required burden to demonstrate that the existing rates and protocols are unjust and unreasonable. ACE cannot predict when a final FERC decision in this proceeding will be issued.

ACE Standard Offer Capacity Agreements

In April 2011, ACE entered into three SOCAs by order of the NJBPU, each with a different generation company, as more fully described in Note (13), “Derivative Instruments and Hedging Activities.” ACE and the other New Jersey electric distribution companies (EDCs) entered into the SOCAs under protest, arguing that the EDCs were denied due process and that the SOCAs violate certain of the requirements under the New Jersey law under which the SOCAs were established (the NJ SOCA Law). On October 22, 2013, in light of the decision of the U.S. District Court for the District of New Jersey described below, the state appeals of the NJBPU implementation orders filed by the EDCs and generators, were dismissed without prejudice subject to the parties exercising their appellate rights in the Federal courts.

In February 2011, ACE joined other plaintiffs in an action filed in the U.S. District Court for the District of New Jersey challenging the NJ SOCA Law on the grounds that it violates the Commerce Clause and the Supremacy Clause of the U.S. Constitution. On October 11, 2013, the Federal district court issued a ruling that the NJ SOCA Law is preempted by the Federal Power Act and violates the Supremacy Clause, and is therefore null and void. On October 21, 2013 a joint motion to stay the Federal district court’s decision pending appeal was filed by the NJBPU and one of the SOCA generation companies. In that motion, the NJBPU notified the Federal district court that it would take no action to force implementation of the SOCAs pending the appeal or such other action—such as FERC approval of the SOCAs—that would cure the constitutional issues to the Federal district court’s satisfaction. On October 25, 2013, the Federal district court issued an order denying the joint motion to stay and ruling that the SOCAs are void, invalid and unenforceable. On October 31, 2013, one of the SOCA generation companies filed a notice of appeal of the October 25, 2013 Federal district court decision with the U.S. Court of Appeals for the Third Circuit (the Federal circuit court). On November 8, 2013, the other remaining SOCA generating company filed a motion to intervene in the proceedings and a notice of appeal of the October 25, 2013 Federal district court decision. On November 21, 2013, the NJBPU filed its notice of appeal of the October 25, 2013 Federal district court decision. On November 14, 2013, the Federal circuit court granted the motion to intervene and on December 13, 2013, the Federal circuit court issued an order consolidating the appeals filed by the NJBPU and the SOCA generating companies of the October 25, 2013 Federal district court decision. The matter has been placed on an expedited schedule and appeal proceedings remain pending. The Federal circuit court is tentatively scheduled to hear the appeal on March 27, 2014.

One of the three SOCAs was terminated effective July 1, 2013 because of an event of default of the generation company that was a party to the SOCA. The remaining two SOCAs were terminated effective November 19, 2013, as a result of a termination notice delivered by ACE after the Federal district court’s October 25, 2013 decision.

In light of the Federal district court order (which has not been stayed pending appeal), ACE derecognized both the derivative assets (liabilities) for the estimated fair value of the SOCAs and the offsetting regulatory liabilities (assets) in the fourth quarter of 2013.

(7) PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment is comprised of the following:

	Original Cost	Accumulated Depreciation	Net Book Value
		(millions of dollars)	
At December 31, 2013			
Generation	$ 10	$ 9	$ 1
Distribution	1,821	442	1,379
Transmission	786	221	565
Construction work in progress	110	—	110
Non-operating and other property	174	79	95
Total	$2,901	$ 751	$ 2,150
At December 31, 2012			
Generation	$ 10	$ 9	$ 1
Distribution	1,707	461	1,246
Transmission	740	214	526
Construction work in progress	133	—	133
Non-operating and other property	181	103	78
Total	$2,771	$ 787	$ 1,984

The non-operating and other property amounts include balances for general plant, plant held for future use, intangible plant and non-utility property. Utility plant is generally subject to a first mortgage lien.

Jointly Owned Plant

ACE's consolidated balance sheets include its proportionate share of assets and liabilities related to jointly owned plant. At December 31, 2013 and 2012, ACE's subsidiaries had a net book value ownership interest of $8 million in transmission and other facilities in which various parties also have ownership interests. ACE's share of the operating and maintenance expenses of the jointly-owned plant is included in the corresponding expenses in the consolidated statements of income. ACE is responsible for providing its share of the financing for the above jointly-owned facilities.

(8) PENSION AND OTHER POSTRETIREMENT BENEFITS

ACE accounts for its participation in its parent's single-employer plans, Pepco Holdings' non-contributory retirement plan (the PHI Retirement Plan) and the Pepco Holdings, Inc. Welfare Plan for Retirees (the PHI OPEB Plan), as participation in multiemployer plans. For 2013, 2012 and 2011, ACE was responsible for $17 million, $24 million and $21 million, respectively, of the pension and other postretirement net periodic benefit cost incurred by PHI. ACE made discretionary tax-deductible contributions to the PHI Retirement Plan of $30 million in each of the years ended December 31, 2013, 2012 and 2011. In addition, ACE made contributions of $6 million, $7 million and $7 million, respectively, to the PHI OPEB Plan for the years ended December 31, 2013, 2012 and 2011. At December 31, 2013 and 2012, ACE's Prepaid pension expense of $106 million and $88 million, and Other postretirement benefit obligations of $35 million and $34 million, respectively, effectively represent assets and benefit obligations resulting from ACE's participation in the PHI benefit plans.

Other Postretirement Benefit Plan Amendments

During 2013, PHI approved two amendments to its other postretirement benefits plan. These amendments impacted the retiree health care and the retiree life insurance benefits, and were effective on January 1, 2014. As a result of the amendments, which were cumulatively significant, PHI remeasured its accumulated postretirement benefit obligation for other postretirement benefits as of July 1, 2013. The remeasurement resulted in a $2 million reduction in ACE's net periodic benefit cost for other postretirement benefits in 2013. Approximately 42% of net periodic other postretirement benefit costs were capitalized in 2013.

(9) DEBT

Long-Term Debt

The components of long-term debt are shown in the table below:

Type of Debt	Interest Rate	Maturity	2013	2012
			(millions of dollars)	
First Mortgage Bonds				
	6.63%	2013	$ —	$ 69
	7.63% (a)	2014	7	7
	7.68% (a)	2015-2016	17	17
	7.75%	2018	250	250
	6.80% (b)(c)	2021	39	39
	4.35%	2021	200	200
	4.875% (d)(c)	2029	23	23
	5.80% (b)(e)	2034	120	120
	5.80% (b)(e)	2036	105	105
			761	830
Variable Rate Term Loan			100	—
Total long-term debt			861	830
Net unamortized discount			(1)	(1)
Current portion of long-term debt			(107)	(69)
Total net long-term debt			$ 753	$ 760

(a) Represents a series of Collateral First Mortgage Bonds securing a series of medium term notes issued by ACE.
(b) Represents a series of Collateral First Mortgage Bonds (as defined herein) which must be cancelled and released as security for ACE's obligations under the corresponding series of issuer notes (as defined herein) or tax-exempt bonds, at such time as ACE does not have any first mortgage bonds outstanding (other than its Collateral First Mortgage Bonds).
(c) Represents a series of Collateral First Mortgage Bonds securing a series of tax-exempt bonds issued for the benefit of ACE.
(d) Represents a series of Collateral First Mortgage Bonds which must be cancelled and released as security for ACE's obligations under the corresponding series of issuer notes or tax-exempt bonds, at such time as ACE does not have any first mortgage bonds outstanding (other than its Collateral First Mortgage Bonds), except that ACE may not permit such release of collateral unless ACE substitutes comparable obligations for such collateral.
(e) Represents a series of Collateral First Mortgage Bonds securing a series of senior notes issued by ACE.

The outstanding first mortgage bonds issued by ACE are issued under a mortgage and deed of trust and are secured by a first lien on substantially all of ACE's property, plant and equipment, except for certain property excluded from the lien of the mortgage.

Maturities of ACE's long-term debt outstanding at December 31, 2013 are $107 million in 2014, $15 million in 2015, $2 million in 2016, zero in 2017, $250 million in 2018 and $487 million thereafter.

ACE's long-term debt is subject to certain covenants. As of December 31, 2013, ACE was in compliance with all such covenants.

The table above which does not separately identify $249 million in aggregate principal amount of senior notes and medium term notes (issuer notes) issued by ACE and $62 million in aggregate principal amount of tax-exempt bonds issued for the benefit of ACE. These issuer notes and tax-exempt bonds are secured by a like amount of first mortgage bonds (Collateral First Mortgage Bonds) of ACE. The principal terms of each such series of issuer notes, or ACE's obligations in respect of each such series of tax-exempt bonds, are identical to the same terms of the corresponding series of Collateral First Mortgage Bonds. Payments of principal and interest made on a series of such issuer notes, or the satisfaction of ACE obligations in respect of a series of such tax-exempt bonds, satisfy the corresponding obligations on the related series of Collateral First Mortgage Bonds. For these reasons, each such series of Collateral First Mortgage Bonds and the corresponding issuer notes or tax-exempt bonds together effectively represent a single financial obligation and are not identified in the table above separately.

Bond Redemptions

During 2013, ACE repaid at maturity $69 million of its 6.63% non-callable first mortgage bonds. ACE also funded the redemption, prior to maturity, of $4 million of outstanding weekly variable rate pollution control revenue refunding bonds due 2017, issued by the Pollution Control Financing Authority of Salem County, New Jersey for ACE's benefit.

Term Loan Agreement

On May 10, 2013, ACE entered into a $100 million term loan agreement, pursuant to which ACE has borrowed (and may not re-borrow) $100 million at a rate of interest equal to the prevailing Eurodollar rate, which is determined by reference to the London Interbank Offered Rate (LIBOR) with respect to the relevant interest period, all as defined in the loan agreement, plus a margin of 0.75%. ACE's Eurodollar borrowings under the loan agreement may be converted into floating rate loans under certain circumstances, and, in that event, for so long as any loan remains a floating rate loan, interest would accrue on that loan at a rate per year equal to (i) the highest of (a) the prevailing prime rate, (b) the federal funds effective rate plus 0.5%, or (c) the one-month Eurodollar rate plus 1%, plus (ii) a margin of 0.75%. As of December 31, 2013, outstanding borrowings under the loan agreement bore interest at an annual rate of 0.92%, which is subject to adjustment from time to time. All borrowings under the loan agreement are unsecured, and the aggregate principal amount of all loans, together with any accrued but unpaid interest due under the loan agreement, must be repaid in full on or before November 10, 2014.

Under the terms of the term loan agreement, ACE must maintain compliance with specified covenants, including (i) the requirement that ACE maintain a ratio of total indebtedness to total capitalization of 65% or less, computed in accordance with the terms of the loan agreement, which calculation excludes from the definition of total indebtedness certain trust preferred securities and deferrable interest subordinated debt (not to exceed 15% of total capitalization), (ii) a restriction on sales or other dispositions of assets, other than certain permitted sales and dispositions, and (iii) a restriction on the incurrence of liens (other than liens permitted by the loan agreement) on the assets of ACE. The loan agreement does not include any rating triggers. ACE was in compliance with all covenants under this loan agreement as of December 31, 2013.

Transition Bonds Issued by ACE Funding

The components of transition bonds are shown in the table below:

Type of Debt	Interest Rate	Maturity	2013	2012
			(millions of dollars)	
Transition Bonds				
	4.46%	2016	$ 8	$ 19
	4.91%	2017	46	75
	5.05%	2020	54	54
	5.55%	2023	147	147
			255	295
Current portion of long-term debt			(41)	(39)
Total net long-term Transition Bonds			$ 214	$ 256

For a description of the Transition Bonds, see Note (16), "Variable Interest Entities – ACE Funding." Maturities of ACE's Transition Bonds outstanding at December 31, 2013 are $41 million in 2014, $44 million in 2015, $46 million in 2016, $35 million in 2017, $31 million in 2018 and $58 million thereafter.

Short-Term Debt

ACE has traditionally used a number of sources to fulfill short-term funding needs, such as commercial paper, short-term notes, and bank lines of credit. Proceeds from short-term borrowings are used primarily to meet working capital needs, but may also be used to temporarily fund long-term capital requirements. The components of ACE's short-term debt at December 31, 2013 and 2012 are as follows:

	2013	2012
	(millions of dollars)	
Commercial paper	$ 120	$ 110
Variable rate demand bonds	18	23
Total	$ 138	$ 133

Commercial Paper

ACE maintains an ongoing commercial paper program to address its short-term liquidity needs. As of December 31, 2013, the maximum capacity available under the program was $350 million, subject to available borrowing capacity under the credit facility.

ACE had $120 million and $110 million of commercial paper outstanding at December 31, 2013 and 2012, respectively. The weighted average interest rates for commercial paper issued by ACE during 2013 and 2012 were 0.31% and 0.41%, respectively. The weighted average maturity of all commercial paper issued by ACE during 2013 and 2012 was four days and three days, respectively.

Variable Rate Demand Bonds

Variable Rate Demand Bonds (VRDBs) are subject to repayment on the demand of the holders and, for this reason, are accounted for as short-term debt in accordance with GAAP. However, bonds submitted for purchase are remarketed by a remarketing agent on a best efforts basis. ACE expects that any bonds submitted for purchase will be remarketed successfully due to the creditworthiness of the company and because the remarketing resets the interest rate to the then-current market rate. The bonds may be converted to a fixed rate, fixed term option to establish a maturity which corresponds to the date of final maturity of the bonds. On this basis, ACE views VRDBs as a source of long-term financing. As of December 31, 2013, $18 million of VRDBs issued on behalf of ACE were outstanding. The outstanding VRDBs all mature in 2014. The weighted average interest rate for VRDBs was 0.11% and 0.18% during 2013 and 2012, respectively.

Credit Facility

PHI, Pepco, DPL and ACE maintain an unsecured syndicated credit facility to provide for their respective liquidity needs, including obtaining letters of credit, borrowing for general corporate purposes and supporting their commercial paper programs. On August 1, 2011, PHI, Pepco, DPL and ACE entered into an amended and restated credit agreement which, on August 2, 2012, was amended to extend the term of the credit facility to August 1, 2017 and to amend the pricing schedule to decrease certain fees and interest rates payable to the lenders under the facility. On August 1, 2013, as permitted under the existing terms of the credit agreement, a request by PHI, Pepco, DPL and ACE to extend the credit facility termination date to August 1, 2018 was approved. All of the terms and conditions as well as pricing remained the same.

The aggregate borrowing limit under the amended and restated credit facility is $1.5 billion, all or any portion of which may be used to obtain loans and up to $500 million of which may be used to obtain letters of credit. The facility also includes a swingline loan sub-facility, pursuant to which each company may make same day borrowings in an aggregate amount not to exceed 10% of the total amount of the facility. Any swingline loan must be repaid by the borrower within fourteen days of receipt. The credit sublimit is $750 million for PHI and $250 million for each of Pepco, DPL and ACE. The sublimits may be increased or decreased by the individual borrower during the term of the facility, except that (i) the sum of all of the borrower sublimits following any such increase or decrease must equal the total amount of the facility, and (ii) the aggregate amount of credit used at any given time by (a) PHI may not exceed $1.25 billion, and (b) each of Pepco, DPL or ACE may not exceed the lesser of $500 million or the maximum amount of short-term debt the company is permitted to have outstanding by its regulatory authorities. The total number of the sublimit reallocations may not exceed eight per year during the term of the facility.

The interest rate payable by each company on utilized funds is, at the borrowing company's election, (i) the greater of the prevailing prime rate, the federal funds effective rate plus 0.5% and the one month LIBOR plus 1.0%, or (ii) the prevailing Eurodollar rate, plus a margin that varies according to the credit rating of the borrower.

In order for a borrower to use the facility, certain representations and warranties must be true and correct, and the borrower must be in compliance with specified financial and other covenants, including (i) the requirement that each borrowing company maintain a ratio of total indebtedness to total capitalization of 65% or less, computed in accordance with the terms of the credit agreement, which calculation excludes from the definition of total indebtedness certain trust preferred securities and deferrable interest subordinated debt (not to exceed 15% of total capitalization), (ii) with certain exceptions, a restriction on sales or other dispositions of assets, and (iii) a restriction on the incurrence of liens on the assets of a borrower or any of its significant subsidiaries other than permitted liens. The credit agreement contains certain covenants and other customary agreements and requirements that, if not complied with, could result in an event of default and the acceleration of repayment obligations of one or more of the borrowers thereunder. Each of the borrowers was in compliance with all covenants under this facility at December 31, 2013.

The absence of a material adverse change in PHI's business, property, results of operations or financial condition is not a condition to the availability of credit under the credit agreement. The credit agreement does not include any rating triggers.

As of December 31, 2013 and 2012, the amount of cash plus borrowing capacity under the credit facility available to meet the liquidity needs of PHI's utility subsidiaries in the aggregate was $332 million and $477 million, respectively. ACE's borrowing capacity under the credit facility at any given time depends on the amount of the subsidiary borrowing capacity being utilized by Pepco and DPL and the portion of the total capacity being used by PHI.

(10) INCOME TAXES

ACE, as an indirect subsidiary of PHI, is included in the consolidated federal income tax return of PHI. Federal income taxes are allocated to ACE pursuant to a written tax sharing agreement that was approved by the Securities and Exchange Commission in connection with the establishment of PHI as a holding company. Under this tax sharing agreement, PHI's consolidated federal income tax liability is allocated based upon PHI's and its subsidiaries' separate taxable income or loss.

The provision for consolidated income taxes, reconciliation of consolidated income tax expense, and components of consolidated deferred income tax liabilities (assets) are shown below.

Provision for Consolidated Income Taxes

	For the Year Ended December 31,		
	2013	2012	2011
		(millions of dollars)	
Current Tax (Benefit) Expense			
Federal	$ (23)	$ (31)	$ (9)
State and local	(10)	(12)	1
Total Current Tax Benefit	(33)	(43)	(8)
Deferred Tax Expense (Benefit)			
Federal	28	46	35
State and local	25	16	7
Investment tax credit amortization	(1)	(1)	(1)
Total Deferred Tax Expense	52	61	41
Total Consolidated Income Tax Expense	$ 19	$ 18	$ 33

Reconciliation of Consolidated Income Tax Expense

	For the Year Ended December 31,					
	2013		2012		2011	
			(millions of dollars)			
Income tax at Federal statutory rate	$24	35.0%	$19	35.0%	$ 25	35.0%
Increases (decreases) resulting from:						
State income taxes, net of Federal effect	5	7.2%	3	5.7%	4	6.0%
Change in estimates and interest related to uncertain and effectively settled tax positions	(9)	(13.0)%	(1)	(1.9)%	5	6.9%
Plant basis adjustments	(2)	(2.9)%	(1)	(1.9)%	—	—
Investment tax credit amortization	(1)	(1.4)%	(1)	(1.9)%	(1)	(1.3)%
Other, net	2	2.6%	(1)	(1.0)%	—	(0.8)%
Consolidated Income Tax Expense	$19	27.5%	$18	34.0%	$ 33	45.8%

Year ended December 31, 2013

ACE's consolidated effective income tax rate for the year ended December 31, 2013 of 27.5% includes income tax benefits totaling $9 million related to uncertain and effectively settled tax positions.

On January 9, 2013, the U.S. Court of Appeals for the Federal Circuit issued an opinion in *Consolidated Edison Company of New York, Inc. & Subsidiaries v. United States* (to which ACE is not a party) that disallowed tax benefits associated with Consolidated Edison's cross-border lease transaction. As a result of the court's ruling in this case, PHI determined in the first quarter of 2013 that it could no longer support its current assessment with respect to the likely outcome of tax positions associated with its cross-border energy lease investments held by its wholly-owned subsidiary Potomac Capital Investment Corporation, and PHI recorded an after-tax charge of $377 million in the first quarter of 2013. Included in the $377 million charge was an after-tax interest charge of $54 million and this amount was allocated to each member of PHI's consolidated group as if each member was a separate taxpayer, resulting in ACE recording a $6 million interest benefit in the first quarter of 2013.

Year ended December 31, 2012

ACE's consolidated effective income tax rate for the year ended December 31, 2012 of 34.0% reflects a $1 million benefit associated with the effective settlement with the Internal Revenue Service (IRS) with respect to the methodology used historically to calculate deductible mixed service costs.

Year ended December 31, 2011

ACE's consolidated effective income tax rate for the year ended December 31, 2011 of 45.8% includes a charge totaling $5 million related to uncertain and effectively settled tax positions.

During 2011, PHI reached a settlement with the IRS with respect to interest due on its federal tax liabilities related to the November 2010 audit settlement for years 1996 through 2002. In connection with this agreement, PHI reallocated certain amounts that have been on deposit with the IRS since 2006 among liabilities in the settlement years and subsequent years. Primarily related to the settlement and reallocations, ACE has recorded a $1 million (after-tax) interest charge in the second quarter of 2011. Additionally, in the third quarter of 2011, ACE recorded a $3 million (after-tax) interest charge related to the recalculation of interest on its uncertain tax positions for open tax years using different assumptions related to the application of its deposit made with the IRS in 2006.

Components of Consolidated Deferred Income Tax Liabilities (Assets)

	As of December 31,	
	2013	**2012**
	(millions of dollars)	
Deferred Tax Liabilities (Assets)		
Depreciation and other basis differences related to plant and equipment	$ 627	$ 538
Deferred taxes on amounts to be collected through future rates	16	15
Payment for termination of purchased power contracts with NUGs	43	47
Deferred electric service and electric restructuring liabilities	96	116
Pension and other postretirement benefits	29	34
Purchased energy	2	3
Federal and state net operating loss	(49)	(54)
Other	55	58
Total Deferred Tax Liabilities, net	819	757
Deferred tax assets included in Current Assets	15	10
Deferred tax liabilities included in Other Current Liabilities	(1)	(1)
Total Consolidated Deferred Tax Liabilities, net non-current	$ 833	$ 766

The net deferred tax liability represents the tax effect, at presently enacted tax rates, of temporary differences between the financial statement basis and tax basis of assets and liabilities. The portion of the net deferred tax liability applicable to ACE's operations, which has not been reflected in current service rates, represents income taxes recoverable through future rates, net, and is recorded as a regulatory asset on the balance sheet. No valuation allowance for deferred tax assets was required or recorded at December 31, 2013 and 2012. Federal and State net operating losses generally expire over 20 years from 2029 to 2032.

The Tax Reform Act of 1986 repealed the investment tax credit for property placed in service after December 31, 1985, except for certain transition property. Investment tax credits previously earned on ACE's property continue to be amortized to income over the useful lives of the related property.

Reconciliation of Beginning and Ending Balances of Unrecognized Tax Benefits

	2013	2012	2011
		(millions of dollars)	
Balance as of January 1	$ 17	$ 79	$ 83
Tax positions related to current year:			
Additions	2	1	2
Reductions	—	—	—
Tax positions related to prior years:			
Additions	1	8	4
Reductions	(5)	(69)(a)	(10)
Settlements	(6)	(2)	—
Balance as of December 31	$ 9	$ 17	$ 79

(a) These reductions of unrecognized tax benefits in 2012 primarily relate to a resolution reached with the IRS for determining deductible mixed service costs for additions to property, plant and equipment.

Unrecognized Benefits That, If Recognized, Would Affect the Effective Tax Rate

Unrecognized tax benefits are related to tax positions that have been taken or are expected to be taken in tax returns that are not recognized in the financial statements because management has either measured the tax benefit at an amount less than the benefit claimed, or expected to be claimed, or has concluded that it is not more likely than not that the tax position will be ultimately sustained. For the majority of these tax positions, the ultimate deductibility is highly certain, but there is uncertainty about the timing of such deductibility. At December 31, 2013, ACE had no unrecognized tax benefits that, if recognized, would lower the effective tax rate.

Interest and Penalties

ACE recognizes interest and penalties relating to its uncertain tax positions as an element of income tax expense. For the years ended December 31, 2013, 2012 and 2011, ACE recognized $12 million of pre-tax interest income ($7 million after-tax), $2 million of pre-tax interest income ($1 million after-tax), and $5 million of pre-tax interest expense ($3 million after-tax), respectively, as a component of income tax expense. As of December 31, 2013, 2012 and 2011, ACE had accrued interest receivable of $14 million, $7 million and $6 million, respectively, related to effectively settled and uncertain tax positions.

Possible Changes to Unrecognized Tax Benefits

It is reasonably possible that the amount of the unrecognized tax benefit with respect to some of ACE's uncertain tax positions will significantly increase or decrease within the next 12 months. PHI and its subsidiaries have entered into discussions with the IRS with the intention of seeking a settlement of all tax issues of ACE for open tax years 2001 through 2011. PHI currently believes that it is possible that a settlement with the IRS may be reached in 2014, which could significantly impact the balances of unrecognized tax benefits and the related interest accruals of ACE. At this time, it is estimated that there will be a $4 million to $6 million decrease in unrecognized tax benefits within the next 12 months.

Tax Years Open to Examination

ACE, as an indirect subsidiary of PHI, is included on PHI's consolidated Federal tax return. ACE's federal income tax liabilities for all years through 2002 have been determined, subject to adjustment to the extent of any net operating loss or other loss or credit carrybacks from subsequent years. The open tax years for the significant states where ACE files state income tax returns (New Jersey and Pennsylvania) are the same as for the Federal returns. As a result of the final determination of these years, ACE filed amended state returns receiving $1 million in refunds.

Final IRS Regulations on Repair of Tangible Property

In September 2013, the IRS issued final regulations on expense versus capitalization of repairs with respect to tangible personal property. The regulations are effective for tax years beginning on or after January 1, 2014, and provide an option to early adopt the final regulations for tax years beginning on or after January 1, 2012. It is expected that the IRS will issue revenue procedures that will describe how taxpayers may implement the final regulations. The final repair regulations retain the operative rule that the Unit of Property for network assets is determined by the taxpayer's particular facts and circumstances except as provided in published guidance. In 2012, with the filing of its 2011 tax return, PHI filed a request for an automatic change in accounting method related to repairs of its network assets in accordance with IRS Revenue Procedure 2011-43. ACE does not expect the effects of the final regulations to be significant and will continue to evaluate the impact of the new guidance on its consolidated financial statements.

Other Taxes

Taxes other than income taxes for each year are shown below. These amounts are recoverable through rates.

	2013	2012	2011
	(millions of dollars)		
Gross Receipts/Delivery	$10	$14	$20
Property	3	3	3
Environmental, Use and Other	1	1	2
Total	$14	$18	$25

(11) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

ACE was ordered to enter into the SOCAs by the NJBPU, and under the SOCAs, ACE would have received payments from or made payments to electric generation facilities based on (i) the difference between the fixed price in the SOCAs and the price for capacity that clears PJM and (ii) ACE's annual proportion of the total New Jersey load relative to the other EDCs in New Jersey. ACE began applying derivative accounting to two of its SOCAs as of June 30, 2012 because these generators cleared the 2015-2016 PJM capacity auction in May 2012. The fair value of the derivatives embedded in the SOCAs were deferred as Regulatory assets or Regulatory liabilities because the NJBPU allowed full recovery from ACE's distribution customers for any payments made by ACE, and ACE's distribution customers would be entitled to any payments received by ACE.

As further discussed in Note (6), "Regulatory Matters," in light of a Federal district court order, which ruled that the SOCAs are void, invalid and unenforceable, and ACE's subsequent termination of the SOCAs in the fourth quarter of 2013, ACE derecognized the derivative assets and derivative liabilities related to the SOCAs in the fourth quarter of 2013.

As of December 31, 2012, ACE had non-current Derivative assets of $8 million, and non-current Derivative liabilities of $11 million associated with the two SOCAs and offsetting Regulatory liability and Regulatory asset amounts, respectively. As of December 31, 2012, ACE had 180 megawatts (MWs) of capacity in a long position, with no collateral or netting applicable to the capacity. Unrealized gains and losses associated with these capacity derivatives, which netted to unrealized gains of $3 million and unrealized losses of $3 million for the years ended December 31, 2013 and 2012, respectively, have been deferred as Regulatory liabilities and Regulatory assets.

(12) FAIR VALUE DISCLOSURES

Financial Instruments Measured at Fair Value on a Recurring Basis

ACE applies FASB guidance on fair value measurement and disclosures (ASC 820) that established a framework for measuring fair value and expanded disclosures about fair value measurements. As defined in the guidance, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). ACE utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable. Accordingly, ACE utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The guidance establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3).

The following tables set forth by level within the fair value hierarchy ACE's financial assets and liabilities that were accounted for at fair value on a recurring basis as of December 31, 2013 and 2012. As required by the guidance, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. ACE's assessment of the significance of a particular input to the fair value measurement requires the exercise of judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

	Fair Value Measurements at December 31, 2013			
Description	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1) (a)	Significant Other Observable Inputs (Level 2) (a)	Significant Unobservable Inputs (Level 3)
		(millions of dollars)		
ASSETS				
Restricted cash equivalents				
Treasury fund	$ 24	$ 24	$ —	$ —
	$ 24	$ 24	$ —	$ —

(a) There were no transfers of instruments between level 1 and level 2 valuation categories during the year ended December 31, 2013.

	Fair Value Measurements at December 31, 2012			
Description	Total	Quoted Prices in Active Markets for Identical Instruments (Level 1) (a)	Significant Other Observable Inputs (Level 2) (a)	Significant Unobservable Inputs (Level 3)
		(millions of dollars)		
ASSETS				
Derivative instruments (b)				
Capacity (c)	$ 8	$ —	$ —	$ 8
Restricted cash equivalents				
Treasury fund	27	27	—	—
	$ 35	$ 27	$ —	$ 8
LIABILITIES				
Derivative instruments (b)				
Capacity (c)	$ 11	$ —	$ —	$ 11
Executive deferred compensation plan liabilities				
Life insurance contracts	1	—	1	—
	$ 12	$ —	$ 1	$ 11

(a) There were no transfers of instruments between level 1 and level 2 valuation categories during the year ended December 31, 2012.
(b) The fair value of derivative assets and liabilities reflect netting by counterparty before the impact of collateral.
(c) Represents derivatives associated with ACE SOCAs.

ACE classifies its fair value balances in the fair value hierarchy based on the observability of the inputs used in the fair value calculation as follows:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 – Pricing inputs are other than quoted prices in active markets included in level 1, which are either directly or indirectly observable as of the reporting date. Level 2 includes those financial instruments that are valued using broker quotes in liquid markets and other observable data. Level 2 also includes those financial instruments that are valued using methodologies that have been corroborated by observable market data through correlation or by other means. Significant assumptions are observable in the marketplace throughout the full term of the instrument and can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace.

The level 2 liability associated with the life insurance policies represents a deferred compensation obligation, the value of which is tracked via underlying insurance sub-accounts. The sub-accounts are designed to mirror existing mutual funds and money market funds that are observable and actively traded.

Level 3 – Pricing inputs that are significant and generally less observable than those from objective sources. Level 3 includes those financial instruments that are valued using models or other valuation methodologies.

Derivative instruments categorized as level 3 represent capacity under the SOCAs entered into by ACE.

ACE used a discounted cash flow methodology to estimate the fair value of the capacity derivatives embedded in the SOCAs. ACE utilized an external consulting firm to estimate annual zonal PJM capacity prices through the 2030-2031 auction. The capacity price forecast was based on various assumptions that impact the cost of constructing new generation facilities, including zonal load forecasts, zonal fuel and energy prices, generation capacity and transmission planning, and environmental legislation and regulation. ACE reviewed the assumptions and resulting capacity price forecast for reasonableness. ACE used the capacity price forecast to estimate future cash flows. A significant change in the forecasted prices would have a significant impact on the estimated fair value of the SOCAs. ACE employed a discount rate reflective of the estimated weighted average cost of capital for merchant generation companies since payments under the SOCAs are contingent on providing generation capacity. As further discussed in Note (6), "Regulatory Matters," ACE derecognized the derivative assets and derivative liabilities related to the SOCAs in the fourth quarter of 2013.

The table below summarizes the primary unobservable input used to determine the fair value of ACE's level 3 instruments and the range of values that could be used for the input as of December 31, 2012:

Type of Instrument	**Fair Value at December 31, 2012** *(millions of dollars)*	**Valuation Technique**	**Unobservable Input**	**Range**
Capacity contracts, net	$ (3)	Discounted cash flow	Discount rate	5% - 9%

ACE used a value within this range as part of its fair value estimates. A significant change in the unobservable input within this range would have an insignificant impact on the reported fair value as of December 31, 2012.

A reconciliation of the beginning and ending balances of ACE's fair value measurements using significant unobservable inputs (level 3) for the years ended December 31, 2013 and 2012 are shown below:

	Capacity Year Ended December 31, 2013 (millions of dollars)	Capacity Year Ended December 31, 2012 (millions of dollars)
Balance as of January 1	$ (3)	$ —
Total gains (losses) (realized and unrealized):		
Included in income	—	—
Included in accumulated other comprehensive loss	—	—
Included in regulatory liabilities and regulatory assets	3	(3)
Purchases	—	—
Issuances	—	—
Settlements	—	—
Transfers in (out) of level 3	—	—
Balance as of December 31	$ —	$ (3)

Other Financial Instruments

The estimated fair values of ACE's Long-term debt instruments that are measured at amortized cost in ACE's consolidated financial statements and the associated level of the estimates within the fair value hierarchy as of December 31, 2013 and 2012 are shown in the table below. As required by the fair value measurement guidance, debt instruments are classified in their entirety within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. ACE's assessment of the significance of a particular input to the fair value measurement requires the exercise of judgment, which may affect the valuation of fair value debt instruments and their placement within the fair value hierarchy levels.

The fair value of Long-term debt and Transition Bonds categorized as level 2 is based on a blend of quoted prices for the debt and quoted prices for similar debt on the measurement date. The blend places more weight on current pricing information when determining the final fair value measurement. The fair value information is provided by brokers and ACE reviews the methodologies and results.

The fair value of Long-term debt categorized as level 3 is based on a discounted cash flow methodology using observable inputs, such as the U.S. Treasury yield, and unobservable inputs, such as credit spreads, because quoted prices for the debt or similar debt in active markets were insufficient.

Description	Total	Fair Value Measurements at December 31, 2013: Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(millions of dollars)			
LIABILITIES				
Debt instruments				
Long-term debt (a)	$ 959	$ —	$ 744	$ 215
Transition Bonds (b)	285	—	285	—
	$1,244	$ —	$ 1,029	$ 215

(a) The carrying amount for Long-term debt is $860 million as of December 31, 2013.
(b) The carrying amount for Transition Bonds, including amounts due within one year, is $255 million as of December 31, 2013.

Description	Total	Fair Value Measurements at December 31, 2012 Quoted Prices in Active Markets for Identical Instruments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
		(millions of dollars)		
LIABILITIES				
Debt instruments				
Long-term debt (a)	$1,016	$ —	$ 884	$ 132
Transition Bonds (b)	341	—	341	—
	$1,357	$ —	$ 1,225	$ 132

(a) The carrying amount for Long-term debt is $829 million as of December 31, 2012.
(b) The carrying amount for Transition Bonds, including amounts due within one year, is $295 million as of December 31, 2012.

The carrying amounts of all other financial instruments in the accompanying consolidated financial statements approximate fair value.

(13) COMMITMENTS AND CONTINGENCIES

General Litigation

From time to time, ACE is named as a defendant in litigation, usually relating to general liability or auto liability claims that resulted in personal injury or property damage to third parties. ACE is self-insured against such claims up to a certain self-insured retention amount and maintains insurance coverage against such claims at higher levels, to the extent deemed prudent by management. In addition, ACE's contracts with its vendors generally require the vendors to name ACE as an additional insured for the amount at least equal to ACE's self-insured retention. Further, ACE's contracts with its vendors require the vendors to indemnify ACE for various acts and activities that may give rise to claims against ACE. Loss contingency liabilities for both asserted and unasserted claims are recognized if it is probable that a loss will result from such a claim and if the amounts of the losses can be reasonably estimated. Although the outcome of the claims and proceedings cannot be predicted with any certainty, management believes that there are no existing claims or proceedings that are likely to have a material adverse effect on ACE's financial condition, results of operations or cash flows. At December 31, 2013, ACE had loss contingency liabilities for general litigation totaling approximately $9 million (including amounts related to the matters specifically described below) and the portion of these loss contingency liabilities in excess of the self-insured retention amount was substantially offset by insurance receivables.

Asbestos Claim

In September 2011, an asbestos complaint was filed in the New Jersey Superior Court, Law Division, against ACE (among other defendants) asserting claims under New Jersey's Wrongful Death and Survival statutes. The complaint, filed by the estate of a decedent who was the wife of a former employee of ACE, alleges that the decedent's mesothelioma was caused by exposure to asbestos brought home by her husband on his work clothes. New Jersey courts have recognized a cause of action against a premise owner in a so-called "take home" case if it can be shown that the harm was foreseeable. In this case, the complaint seeks recovery of an unspecified amount of damages for, among other things, the decedent's past medical expenses, loss of earnings, and pain and suffering between the time of injury and death, and asserts a punitive damage claim. At December 31, 2013, ACE has concluded that a loss is probable with respect to this matter and has recorded an estimated loss contingency liability, which is included in the liability for general litigation referred to above as of December 31, 2013. However, due to the inherent uncertainty of litigation, ACE is unable to estimate a maximum amount of possible loss because the damages sought are indeterminate and the matter involves facts that ACE believes are distinguishable from the facts of the "take-home" cause of action recognized by the New Jersey courts.

Electrical Contact Injury Claims

In October 2010, a farm combine came into and remained in contact with a primary electric line in ACE's service territory in New Jersey. As a result, two individuals operating the combine received fatal electrical contact injuries. While attempting to rescue those two individuals, another individual sustained third-degree burns to his torso and upper extremities. In September 2012, the individual who received third-degree burns filed suit in New Jersey Superior Court, Salem County. In October 2012, additional suits were filed in the same court by or on behalf of the estates of the deceased individuals. Plaintiffs in each of the cases are seeking indeterminate damages and allege that ACE was negligent in the design, construction, erection, operation and maintenance of its poles, power lines, and equipment, and that ACE failed to warn and protect the public from the foreseeable dangers of farm equipment contacting electric lines. Discovery is ongoing in this matter and the litigation involves a number of other defendants and the filing of numerous cross-claims. ACE has notified its insurers of the incident and believes that the insurance policies in force at the time of the incident will offset ACE's costs associated with the resolution of this matter in excess of ACE's self-insured retention amount. At December 31, 2013, ACE has concluded that a loss is probable with respect to these claims and has recorded an estimated loss contingency liability, which is included in the liability for general litigation referred to above as of December 31, 2013. ACE has also concluded as of December 31, 2013 that realization of its insurance claims associated with this matter is probable and, accordingly, has recorded an estimated insurance receivable offsetting substantially all of the loss contingency liability in excess of ACE's self-insured retention amount.

Environmental Matters

ACE is subject to regulation by various federal, regional, state and local authorities with respect to the environmental effects of its operations, including air and water quality control, solid and hazardous waste disposal and limitations on land use. Although penalties assessed for violations of environmental laws and regulations are not recoverable from customers of ACE, environmental clean-up costs incurred by ACE generally are included in its cost of service for ratemaking purposes. The total accrued liabilities for the environmental contingencies of ACE described below at December 31, 2013 are summarized as follows:

	Legacy Generation - Regulated
	(millions of dollars)
Balance as of January 1	$ 1
Accruals	—
Payments	—
Balance as of December 31	1
Less amounts in Other Current Liabilities	—
Amounts in Other Deferred Credits	$ 1

Franklin Slag Pile Site

In November 2008, ACE received a general notice letter from the U.S. Environmental Protection Agency (EPA) concerning the Franklin Slag Pile site in Philadelphia, Pennsylvania, asserting that ACE is a potentially responsible party (PRP) that may have liability for clean-up costs with respect to the site and for the costs of implementing an EPA-mandated remedy. EPA's claims are based on ACE's sale of boiler slag from the B.L. England generating facility, then owned by ACE, to MDC Industries, Inc. (MDC) during the period June 1978 to May 1983. EPA claims that the boiler slag ACE sold to MDC contained copper and lead, which are hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), and that the sales transactions may have constituted an arrangement for the disposal or treatment of hazardous substances at the site, which could be a basis for liability under CERCLA. The EPA letter also states that, as of the date of the letter, EPA's expenditures for response measures at the site have exceeded $6 million. EPA's feasibility study for this site conducted in 2007 identified a range of alternatives for permanent remedial measures with varying cost estimates, and the estimated cost of EPA's preferred alternative is approximately $6 million.

ACE believes that the B.L. England boiler slag sold to MDC was a valuable material with various industrial applications and, therefore, the sale was not an arrangement for the disposal or treatment of any hazardous substances as would be necessary to constitute a basis for liability under CERCLA. ACE intends to contest any claims to the contrary made by EPA. In a May 2009 decision arising under CERCLA, which did not involve ACE, the U.S. Supreme Court rejected an EPA argument that the sale of a useful product constituted an arrangement for disposal or treatment of hazardous substances. While this decision supports ACE's position, at this time ACE cannot predict how EPA will proceed with respect to the Franklin Slag Pile site, or what portion, if any, of the Franklin Slag Pile site response costs EPA would seek to recover from ACE. Costs to resolve this matter are not expected to be material and are expensed as incurred.

Ward Transformer Site

In April 2009, a group of PRPs with respect to the Ward Transformer site in Raleigh, North Carolina, filed a complaint in the U.S. District Court for the Eastern District of North Carolina, alleging cost recovery and/or contribution claims against a number of entities, including ACE, based on its alleged sale of transformers to Ward Transformer, with respect to past and future response costs incurred by the PRP group in performing a removal action at the site. In a March 2010 order, the court denied the defendants' motion to dismiss. The litigation is moving forward with certain "test case" defendants (not including ACE) filing summary judgment motions regarding liability. The case has been stayed as to the remaining defendants pending rulings upon the test cases. In a January 31, 2013 order, the Federal district court granted summary judgment for the test case defendant whom plaintiffs alleged was liable based on its sale of transformers to Ward Transformer. The Federal district court's order, which plaintiffs have appealed to the U.S. Court of Appeals for the Fourth Circuit, addresses only the liability of the test case defendant. ACE has concluded that a loss is reasonably possible with respect to this matter, but is unable to estimate an amount or range of reasonably possible losses to which it may be exposed. ACE does not believe that it had extensive business transactions, if any, with the Ward Transformer site.

Contractual Obligations

Power Purchase Contracts

As of December 31, 2013, ACE's contractual obligations under non-derivative power purchase contracts were $214 million in 2014, $431 million in 2015 to 2016, $355 million in 2017 to 2018 and $1,086 million in 2019 and thereafter.

Lease Commitments

ACE leases certain types of property and equipment for use in its operations. Rental expense for operating leases was $12 million, $11 million and $10 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Total future minimum operating lease payments for ACE as of December 31, 2013 are $5 million in each of the years 2014 through 2016, $4 million in each of the years 2017 and 2018, and $29 million thereafter.

(14) RELATED PARTY TRANSACTIONS

PHI Service Company provides various administrative and professional services to PHI and its regulated and unregulated subsidiaries, including ACE. The cost of these services is allocated in accordance with cost allocation methodologies set forth in the service agreement using a variety of factors, including the subsidiaries' share of employees, operating expenses, assets and other cost methods. These intercompany transactions are eliminated by PHI in consolidation and no profit results from these transactions at PHI. PHI Service Company costs directly charged or allocated to ACE for the years ended December 31, 2013, 2012 and 2011 were $115 million, $117 million and $102 million, respectively.

In addition to the PHI Service Company charges described above, ACE's consolidated financial statements include the following related party transactions in its consolidated statements of income:

	For the Year Ended December 31, 2013	2012	2011
	(millions of dollars)		
Meter reading services provided by Millennium Account Services LLC (an ACE affiliate)(a)	$ (4)	$ (4)	$ (4)
Intercompany use revenue (b)	3	3	2

(a) Included in Other operation and maintenance expense.
(b) Included in Operating revenue.

As of December 31, 2013 and 2012, ACE had the following balances on its consolidated balance sheets due to related parties:

	2013	2012
	(millions of dollars)	
Payable to Related Party (current) (a)		
PHI Service Company	$ (15)	$ (13)
Other	—	(1)
Total	$ (15)	$ (14)

(a) Included in Accounts payable due to associated companies.

During 2011, PHI, through Conectiv, LLC, made a $60 million capital contribution to ACE.

(15) QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

The quarterly data presented below reflect all adjustments necessary, in the opinion of management, for a fair presentation of the interim results. Quarterly data normally vary seasonally because of temperature variations and differences between summer and winter rates. Therefore, comparisons by quarter within a year are not meaningful.

	2013 First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
	(millions of dollars)				
Total Operating Revenue	$ 277	$ 271	$ 396	$ 258	$1,202
Total Operating Expenses	254	242	341	229	1,066
Operating Income	23	29	55	29	136
Other Expenses	(17)	(18)	(17)	(15)	(67)
Income Before Income Tax Expense (Benefit)	6	11	38	14	69
Income Tax (Benefit) Expense	(3)	4	13	5	19
Net Income	$ 9	$ 7	$ 25	$ 9	$ 50

	2012 First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
	(millions of dollars)				
Total Operating Revenue	$ 256	$ 270	$ 413	$ 259	$1,198
Total Operating Expenses	239	230	364	246	1,079
Operating Income	17	40	49	13	119
Other Expenses	(16)	(17)	(16)	(17)	(66)
Income (Loss) Before Income Tax Expense (Benefit)	1	23	33	(4)	53
Income Tax (Benefit) Expense	(1)	9	13	(3)	18
Net Income (Loss)	$ 2	$ 14	$ 20	$ (1)	$ 35

(16) VARIABLE INTEREST ENTITIES

ACE is required to consolidate a variable interest entity (VIE) in accordance with FASB ASC 810 if ACE or a subsidiary is the primary beneficiary of the VIE. The primary beneficiary of a VIE is typically the entity with both the power to direct activities most significantly impacting economic performance of the VIE and the obligation to absorb losses or receive benefits of the VIE that could potentially be significant to the VIE. ACE performed a qualitative analysis to determine whether a variable interest provided a controlling financial interest in a VIE at December 31, 2013, which is described below.

ACE Power Purchase Agreements

ACE is a party to three power purchase agreements (PPAs) with unaffiliated NUGs totaling 459 MWs. One of the agreements ends in 2016 and the other two end in 2024. ACE was not involved in the creation of these contracts and has no equity or debt invested in these entities. In performing its VIE analysis, ACE has been unable to obtain sufficient information to determine whether these three entities were variable interest entities or if ACE was the primary beneficiary. As a result, ACE has applied the scope exemption from the consolidation guidance.

Because ACE has no equity or debt invested in the NUGs, the maximum exposure to loss relates primarily to any above-market costs incurred for power. Due to unpredictability in the PPAs pricing for purchased energy, ACE is unable to quantify the maximum exposure to loss. The power purchase costs are recoverable from ACE's customers through regulated rates. Purchase activities with the NUGs, including excess power purchases not covered by the PPAs, for the years ended December 31, 2013, 2012 and 2011 were approximately $221 million, $206 million and $218 million, respectively, of which approximately $206 million, $201 million and $206 million, respectively, consisted of power purchases under the PPAs.

ACE Funding

In 2001, ACE established ACE Funding solely for the purpose of securitizing authorized portions of ACE's recoverable stranded costs through the issuance and sale of Transition Bonds. The proceeds of the sale of each series of Transition Bonds were transferred to ACE in exchange for the transfer by ACE to ACE Funding of the right to collect a non-bypassable Transition Bond Charge from ACE customers pursuant to bondable stranded costs rate orders issued by the NJBPU in an amount sufficient to fund the principal and interest payments on the Transition Bonds and related taxes, expenses and fees (Bondable Transition Property). The assets of ACE Funding, including the Bondable Transition Property, and the Transition Bond Charges (representing revenue ACE receives, and pays to ACE Funding, to fund the principal and interest payments on Transition Bonds and related taxes, expenses and fees) collected from ACE's customers, are not available to creditors of ACE. The holders of Transition Bonds have recourse only to the assets of ACE Funding. ACE owns 100 percent of the equity of ACE Funding and consolidates ACE Funding in its consolidated financial statements as ACE is the primary beneficiary of ACE Funding under the variable interest entity consolidation guidance.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Pepco Holdings, Inc.

None.

Potomac Electric Power Company

None.

Delmarva Power & Light Company

None.

Atlantic City Electric Company

None.

Item 9A. CONTROLS AND PROCEDURES

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Each Reporting Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in such Reporting Company's reports under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to management of such Reporting Company, including such Reporting Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate, to allow timely decisions regarding required disclosure. This control system, no matter how well designed and operated, can provide only reasonable assurance that the objectives of the control system are met. Such Reporting Company's disclosure controls and procedures were designed to provide reasonable assurance of achieving their stated objectives. Under the supervision, and with the participation of management, including the CEO and the CFO, each Reporting Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of December 31, 2013, and, based upon this evaluation, the CEO and the CFO of such Reporting Company have concluded that these disclosure controls and procedures are effective to provide reasonable assurance that material information relating to such Reporting Company and its subsidiaries that is required to be disclosed in reports filed with, or submitted to, the SEC under the Exchange Act (i) is recorded, processed, summarized and reported within the time periods specified by the SEC rules and forms and (ii) is accumulated and communicated to management, including its CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Management's Annual Report on Internal Control Over Financial Reporting

See "Management's Report on Internal Control over Financial Reporting" with respect to each Reporting Company.

Attestation Report of the Registered Public Accounting Firm

The "Report of Independent Registered Public Accounting Firm" with respect to the attestation report of PHI's registered public accounting firm is hereby incorporated by reference in response to this Item 9A.

The Dodd-Frank Wall Street Reform and Consumer Protection Act enacted on July 21, 2010, exempts any company that is not a "large accelerated filer" or an "accelerated filer" (as defined by SEC rules) from the requirement that such company obtain an external audit of the effectiveness of its internal control over financial reporting pursuant to Section 404(b) of the Sarbanes-Oxley Act. As a result, each of Pepco, DPL and ACE is exempt from the requirement that it include in its Annual Report on Form 10-K an attestation report on internal control over financial reporting by an independent registered public accounting firm; however, management's annual report on internal control over financial reporting, pursuant to Section 404(a) of the Sarbanes-Oxley Act, is still required with respect to each of them.

Reports of Changes in Internal Control Over Financial Reporting

Under the supervision and with the participation of management, including the CEO and CFO of each Reporting Company, each such Reporting Company has evaluated changes in internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the three months ended December 31, 2013, and has concluded there was no change in such Reporting Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, such Reporting Company's internal control over financial reporting.

Part III

Item 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Pepco Holdings, Inc.

Information required by this Item 10 is incorporated herein by reference to (1) PHI's definitive proxy statement for its 2014 Annual Meeting of Stockholders, which is expected to be filed with the SEC no later than 120 days after December 31, 2013, and (2) the section entitled "Executive Officers of PHI" contained in Part I, Item 1. "Business," of this Form 10-K.

INFORMATION FOR THIS ITEM IS NOT REQUIRED FOR PEPCO, DPL AND ACE AS THEY MEET THE CONDITIONS SET FORTH IN GENERAL INSTRUCTIONS I(1)(a) AND (b) OF FORM 10-K AND THEREFORE ARE FILING THIS FORM WITH THE REDUCED FILING FORMAT.

Item 11. EXECUTIVE COMPENSATION

Pepco Holdings, Inc.

Information required by this Item 11 is incorporated herein by reference to PHI's definitive proxy statement for its 2014 Annual Meeting of Stockholders, which is expected to be filed with the SEC no later than 120 days after December 31, 2013.

INFORMATION FOR THIS ITEM IS NOT REQUIRED FOR PEPCO, DPL AND ACE AS THEY MEET THE CONDITIONS SET FORTH IN GENERAL INSTRUCTIONS I(1)(a) AND (b) OF FORM 10-K AND THEREFORE ARE FILING THIS FORM WITH THE REDUCED FILING FORMAT.

Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Pepco Holdings, Inc.

Information required by this Item 12 is incorporated herein by reference to PHI's definitive proxy statement for its 2014 Annual Meeting of Stockholders, which is expected to be filed with the SEC no later than 120 days after December 31, 2013.

INFORMATION FOR THIS ITEM IS NOT REQUIRED FOR PEPCO, DPL AND ACE AS THEY MEET THE CONDITIONS SET FORTH IN GENERAL INSTRUCTIONS I(1)(a) AND (b) OF FORM 10-K AND THEREFORE ARE FILING THIS FORM WITH THE REDUCED FILING FORMAT.

Item 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Pepco Holdings, Inc.

Information required by this Item 13 is incorporated herein by reference to PHI's definitive proxy statement for its 2014 Annual Meeting of Stockholders, which is expected to be filed with the SEC no later than 120 days after December 31, 2013.

INFORMATION FOR THIS ITEM IS NOT REQUIRED FOR PEPCO, DPL AND ACE AS THEY MEET THE CONDITIONS SET FORTH IN GENERAL INSTRUCTIONS I(1)(a) AND (b) OF FORM 10-K AND THEREFORE ARE FILING THIS FORM WITH THE REDUCED FILING FORMAT.

Item 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Pepco Holdings, Pepco, DPL and ACE

Audit Fees

The aggregate fees billed by PricewaterhouseCoopers LLP for professional services rendered for the audit of the annual financial statements of Pepco Holdings and its subsidiary reporting companies for the 2013 and 2012 fiscal years, reviews of the financial statements included in the 2013 and 2012 Forms 10-Q of Pepco Holdings and its subsidiary reporting companies, reviews of other public filings, comfort letters and other attest services were $6,180,416 and $6,140,106, respectively. The amount for 2012 includes a reduction of $65,564 to reflect actual invoices received that were less than the estimated invoices included within the 2012 audit amount that was disclosed in Pepco Holdings' proxy statement for the 2013 Annual Meeting of Stockholders.

Audit-Related Fees

The aggregate fees billed by PricewaterhouseCoopers LLP for audit-related services rendered for the 2013 and 2012 fiscal years were $497,177 and zero, respectively. The 2013 fees consist of amounts billed in connection with advice and recommendations related to financial and accounting systems implementation, and for attest services performed in connection with public service commission rate case filings.

Tax Fees

The aggregate fees billed by PricewaterhouseCoopers LLP for tax services rendered for the 2013 and 2012 fiscal years were $1,292,685 and $644,012, respectively. These services generally consisted of tax compliance, tax advice and tax planning. In addition, the amount for the 2013 fiscal year included $560,236 in fees for assistance with issues related to the evaluation of potential settlement scenarios with respect to the former cross-border energy lease investments.

All Other Fees

The aggregate fees billed by PricewaterhouseCoopers LLP for all other services other than those covered under "Audit Fees," "Audit-Related Fees" and "Tax Fees" were $7,200 for each of the 2013 and 2012 fiscal years. These fees for 2013 and 2012 represented the costs of an online accounting and financial reporting research tool.

All of the services described in "Audit Fees," "Audit-Related Fees," "Tax Fees" and "All Other Fees" were approved in advance by the Audit Committee, in accordance with the Audit Committee Policy on the Approval of Services Provided By the Independent Auditor, which will be attached as Annex A to Pepco Holdings' definitive proxy statement for the 2014 Annual Meeting of Stockholders, which is expected to be filed with the SEC no later than 120 days after December 31, 2013, and is incorporated herein by reference.

NOTES TO FINANCIAL INFORMATION

(1) BASIS OF PRESENTATION

Pepco Holdings, Inc. (Pepco Holdings) is a holding company and conducts substantially all of its business operations through its subsidiaries. These condensed financial statements and related footnotes have been prepared in accordance with Rule 12-04, Schedule I of Regulation S-X. These statements should be read in conjunction with the consolidated financial statements and notes thereto of Pepco Holdings included in Part II, Item 8 of this Form 10-K.

Pepco Holdings owns 100% of the common stock of all its significant subsidiaries.

(2) RECLASSIFICATIONS AND ADJUSTMENTS

Certain prior period amounts have been reclassified in order to conform to the current period presentation.

Revision to Prior Period Financial Statements

PCI Deferred Income Tax Liability Adjustment

Since 1999, PCI had not recorded a deferred tax liability related to a temporary difference between the financial reporting basis and the tax basis of an investment in a wholly owned partnership. In the second quarter of 2013, PHI re-evaluated this accounting treatment and found it to be in error, requiring an adjustment related to prior periods. PHI determined that the cumulative adjustment required, representing a charge to earnings of $32 million, related to a period prior to the year ended December 31, 2009 (the earliest period for which selected consolidated financial data were presented in the table entitled "Selected Financial Data" in Part II, Item 6 of this Annual Report on Form 10-K). Consistent with PHI's Quarterly Report on Form 10-Q for the quarter ended June 30, 2013, the accompanying PHI parent company financial statements reflect the correction of this error as an adjustment to shareholders' equity for the earliest period presented. The adjustment to correct the error did not affect PHI's parent company statements of income and cash flows for each of the three years in the period ended December 31, 2013, and only affected the reported balances of investment in consolidated companies and retained earnings as reflected in PHI's parent company balance sheets as of December 31, 2013 and 2012. The adjustment is not considered to be material to the reported balances of retained earnings and total equity reflected in PHI's parent company financial statements included in this Annual Report on Form 10-K. The table below illustrates the effects of the revision on reported balances in PHI's parent company financial statements.

	As Filed	Adjustment (millions of dollars)	As Revised
December 31, 2012			
Investment in consolidated companies	$ 2,665(a)	$ (32)	$ 2,633
Total investments and other assets	5,350	(32)	5,318
Retained earnings	1,109	(32)	1,077
Total equity	4,446	(32)	4,414
December 31, 2011			
Investment in consolidated companies	$ 2,351(a)	$ (32)	$ 2,319
Total investments and other assets	5,230	(32)	5,198
Retained earnings	1,072	(32)	1,040
Total equity	4,336	(32)	4,304
December 31, 2010			
Investment in consolidated companies	$ 1,664	$ (32)	$ 1,632
Total investments and other assets	4,959	(32)	4,927
Retained earnings	1,059	(32)	1,027
Total equity	4,230	(32)	4,198

(a) The amount differs from the amount originally reported in the 2012 Form 10-K due to the reclassification of net assets associated with investment in consolidated companies to assets held for disposition.

(3) DEBT

For information concerning Pepco Holdings' long-term debt obligations, see Note (10), "Debt," to the consolidated financial statements of Pepco Holdings.

(4) COMMITMENTS AND CONTINGENCIES

For information concerning Pepco Holdings' material contingencies and guarantees, see Note (15), "Commitments and Contingencies" to the consolidated financial statements of Pepco Holdings.

Pepco Holdings guarantees the obligations of Pepco Energy Services under certain contracts in its energy savings performance contracting businesses and underground transmission and distribution construction business. At December 31, 2013, Pepco Holdings' guarantees of Pepco Energy Services' obligations under these contracts totaled $190 million. PHI also guarantees the obligations of Pepco Energy Services under surety bonds obtained by Pepco Energy Services for construction projects in these businesses. These guarantees totaled $229 million at December 31, 2013.

In addition, Pepco Holdings guarantees certain obligations of Pepco, DPL, and ACE under surety bonds obtained by these subsidiaries, for construction projects and self-insured workers compensation matters. These guarantees totaled $29 million at December 31, 2013.

Pepco Holdings, pursuant to an intercompany guarantee agreement with Potomac Capital Investment Corporation (PCI), guarantees certain intercompany obligations of PCI to its subsidiaries. This guarantee totaled $725 million at December 31, 2013.

(5) INVESTMENT IN CONSOLIDATED COMPANIES

Pepco Holdings' majority owned subsidiaries are recorded using the equity method of accounting. A breakout of the balance in Investment in consolidated companies is as follows:

	2013	2012
	(millions of dollars)	
Conectiv LLC	$1,730	$1,473
Potomac Electric Power Company	1,922	1,643
Potomac Capital Investment Corporation (a)	29	(729)
Pepco Energy Services, Inc.	250	242
PHI Service Company	4	4
Total investment in consolidated companies	$3,935	$2,633

(a) The investment in PCI excludes net assets held for disposition at December 31, 2012 and primarily represents income tax obligations related to the assets held for disposition.

(6) DISCONTINUED OPERATIONS

During the second and third quarters of 2013, PCI terminated all of its interests in its six remaining cross-border energy lease investments. PCI received aggregate net cash proceeds from these early terminations of $873 million (net of aggregate termination payments of $2.0 billion used to retire the non-recourse debt associated with the terminated leases) and recorded an aggregate pre-tax loss, including transaction costs, of approximately $3 million ($2 million after-tax), representing the excess of the carrying value of the terminated leases over the net cash proceeds received. As a result, PHI has reported the results of operations of the cross-border energy lease investments as discontinued operations in all periods presented in the accompanying statements of (loss) income. Further, the assets and liabilities related to the cross-border energy lease investments are reported as held for disposition as of each date in the accompanying balance sheets.

In December 2009, PHI announced the wind-down of the retail energy supply component of the Pepco Energy Services business, which was comprised of the retail electric and natural gas supply businesses. Pepco Energy Services implemented the wind-down by not entering into any new retail electric or natural gas supply contracts while continuing to perform under its existing retail electric and natural gas supply contracts through their respective expiration dates. On March 21, 2013, Pepco Energy Services entered into an agreement whereby a third party assumed all the rights and obligations of the remaining retail natural gas supply customer contracts, and the associated supply obligations, inventory and derivative contracts. The transaction was completed on April 1, 2013. In addition, Pepco Energy Services completed the wind-down of its retail electric supply business in the second quarter of 2013 by terminating its remaining customer supply and wholesale purchase obligations beyond June 30, 2013. The operations of Pepco Energy Services' retail electric and natural gas supply businesses have been classified as discontinued operations for financial reporting purposes.

In April 2010, the Board of Directors approved a plan for the disposition of PHI's competitive wholesale power generation, marketing and supply business, which had been conducted through Conectiv Energy. On July 1, 2010, PHI completed the sale of Conectiv Energy's wholesale power generation business to Calpine for $1.64 billion. The disposition of Conectiv Energy's remaining assets and businesses, consisting of its load service supply contracts, energy hedging portfolio, certain tolling agreements and other assets not included in the Calpine sale, has been completed.

(7) RELATED PARTY TRANSACTIONS

As of December 31, 2013 and 2012, PHI had the following balances on its balance sheets due (to) from related parties:

	2013	2012
	(millions of dollars)	
(Payable to) Receivable from Related Party (current) (a)		
Conectiv Communications, Inc.	$ (4)	$ (4)

* Management contract or compensatory plan or arrangement.

** The information required by this Exhibit is set forth in Note (12), "Stock-Based Compensation, Dividend Restrictions and Calculations of Earnings Per Share of Common Stock," of the consolidated financial statements of Pepco Holdings, Inc. included in Part II, Item 8 "Financial Statements and Supplementary Data" of this Form 10-K.

Regulation S-K Item 10(d) requires registrants to identify the physical location, by SEC file number reference, of all documents incorporated by reference that are not included in a registration statement and have been on file with the SEC for more than five years. The SEC file number references for PHI, those of its subsidiaries that are currently registrants, Conectiv and ACE Funding are provided below:

Pepco Holdings, Inc. (File Nos. 001-31403 and 030-00359)
Potomac Electric Power Company (File No. 001-01072)
Delmarva Power & Light Company (File No. 001-01405)
Atlantic City Electric Company (File No. 001-03559)
Conectiv (File No. 001-13895)
Atlantic City Electric Transition Funding LLC (File No. 333-59558)

Certain instruments defining the rights of the holders of long-term debt of PHI, Pepco, DPL and ACE (including medium-term notes, unsecured notes, senior notes and tax-exempt financing instruments) have not been filed as exhibits in accordance with Regulation S-K Item 601(b)(4)(iii) because such instruments do not authorize securities in an amount which exceeds 10% of the total assets of the applicable registrant and its subsidiaries on a consolidated basis. Each of PHI, Pepco, DPL or ACE agrees to furnish to the SEC upon request a copy of any such instruments omitted by it.

INDEX TO FURNISHED EXHIBITS

The documents listed below are being furnished herewith:

Exhibit No.	Registrant(s)	Description of Exhibit
32.1	PHI	Certificate of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. Section 1350

Pepco Holdings, Inc.

2014 NON-MANAGEMENT DIRECTOR COMPENSATION ELECTION AGREEMENT

I understand that I am permitted to elect, with respect to the compensation due me for my services as a director of the Company, either (i) to receive my cash compensation currently in the form of either, or a combination of, cash and shares of Company common stock ("Common Stock") pursuant to the Non-Management Director Compensation Plan or (ii) to defer the receipt of my cash compensation under the terms of the Company's Second Revised and Restated Executive and Director Deferred Compensation Plan (the "Deferred Compensation Plan"). In addition, I understand that I am permitted to elect to receive my stock-based compensation granted pursuant to the terms of the 2012 Long-Term Incentive Plan (the "2012 LTIP"), or to defer the settlement of such stock-based compensation as permitted by the 2012 LTIP pursuant to a deferral program approved by the Board of Directors. If I choose to defer the receipt of my cash compensation, I must also complete and return to the Company the attached Cash Retainer Deferral Allocation Form directing how the deferred funds are to be credited.

I am making the following election with the understanding that the elections (i) will apply to all of the compensation paid to me for service as a director in 2014, (ii) once made, cannot be altered or revoked, and (ii) apply to all such compensation paid to me in subsequent years for services as a director, unless I notify the Company of any changes, either in writing or by execution of a new election form prior to January 1 of the year for which the changes are to take effect.

1. **Current Receipt or Deferral Election.**

I hereby elect to receive my compensation for services as a director of the Company as follows (the percentages for each type of compensation must total 100%):

a. **Annual Cash Retainer**

______% Cash (by check or direct deposit).

______% Common Stock (registered as indicated in Item 4 below).

______% Credit to my account under the Deferred Compensation Plan, to be paid in cash at the time I elect in Item 2 below.

b. **Retainer Paid in Form of Restricted Stock Units ("RSUs")**

I will receive an annual stock-based retainer award in the form of RSUs (and any associated dividend equivalents) under the 2012 LTIP, to be settled in Common Stock as indicated below:

______% Common Stock (registered as indicated herein) to be received upon settlement of the RSUs (and any associated dividend equivalents), shall be issued to me upon vesting of the RSUs as provided in the award agreement.

______% Common Stock (registered as indicated herein) to be received upon settlement of the RSUs (and any associated dividend equivalents), shall be deferred under the 2012 LTIP and paid in Common Stock at the time I elect in Item 3 below.

c. **Meeting Fees**

______% Cash (by check or direct deposit).

______% Common Stock (registered as indicated in Item 4 below).

______% Credit to my account under the Deferred Compensation Plan, to be paid in cash at the time I elect in Item 2 below.

d. **Committee Chairman Retainer** (please complete whether or not you currently are a committee chairman):

______% Cash (by check or direct deposit).

______% Common Stock (registered as indicated in Item 4 below).

______% Credit to my account under the Deferred Compensation Plan, to be paid in cash at the time I elect in Item 2 below.

2. **Cash Deferral Instructions.**

If you have elected to have all or any portion of your cash retainer(s) or meeting fees credited to your account under the Deferred Compensation Plan, please complete the following:

a. **Payment Instructions Related to Cash Amounts Deferred**

I hereby elect to have the cash amounts I have deferred under the Deferred Compensation Plan (and accruals thereon) paid to me beginning on the date selected below (check one):

______ On the first day of the month immediately following the month in which I cease to be a director.

______ On January 31 of the year immediately following the month in which I cease to be a director.

______ On January 31 of the year following the calendar year in which (i) I cease to be a director or (ii) I attain the age __, whichever is later.

______ On January 31 of ______ [insert year] or, if later, January 31 of the second calendar year following the calendar year which includes the first day of the Plan year for which the election is made.

b. **Manner of Payment**

I hereby elect to have the cash amounts I have deferred under the Deferred Compensation Plan (and accruals thereon) paid to me in the following manner (check one):

______ In a lump sum on the date of payment selected above.

______ In equal annual installments over __________ consecutive years [insert a number of years between 2 and 15] beginning on the date selected above, with subsequent installments to be paid on each succeeding January 31.

______ In equal monthly installments over __________ consecutive months [insert a number of months between 24 and 180] beginning on the date selected above.

3. **Stock-Based Award Deferral Instructions**

If I have elected to defer the settlement of my RSU award (and any associated dividend equivalents) under Item 1.b. above, I hereby elect payment to me (or, if applicable, my beneficiary) in a lump sum solely in shares of Common Stock on one of the dates I designate below (but only to the extent that such award has vested):

______ On the date I cease to be a director of the Company.

______ On the January 31 following the date I cease to be a director.

______ On a specified date (which may not be prior to January 31, 2017):

____

More information on the deferral of Stock-Based Awards under the 2012 Long-Term Incentive Plan is provided in Item 6 below.

4. **Registration of Stock Certificates.**

With respect to any shares of Common Stock that may be issued (a) upon settlement of an RSU (and any associated dividend equivalents) granted to me under the 2012 LTIP, whether or not deferred under Item 1.b above, or (b) in payment of any portion of my retainer or meeting fees, please register the stock certificates for those shares in the name set forth below, and provide a mailing or street address for such person:

____

____

____

6. **Material Terms Related to My Deferral of an Annual Stock-Based Retainer Award.**

If I have elected in Item 1.b. above to defer settlement of my annual stock-based retainer award (and any associated dividend equivalents), I hereby acknowledge and agree that such deferral shall be subject to the following material terms, which have been approved by the Board of Directors:

a. This deferral election applies only to Common Stock underlying RSUs and/or performance shares or units granted under the 2012 LTIP.

b. Such award will be settled, to the extent vested, in accordance with my irrevocable deferral election set forth herein.

c. To the extent vested, such retainer will be paid in a lump sum and solely in shares of Common Stock, and will not be credited to any of the options set forth on the Cash Retainer Deferral Allocation Form provided herewith.

d. If a dividend equivalent award has been granted with a deferred RSU or performance share or unit award, such dividend equivalent award shall also be deferred under the terms provided herein. Such dividends shall continue to be credited, when and as declared and paid by the Board of Directors, in additional shares or units of the same type and tenor as the stock-based award, based on the Fair Market Value (as defined in the 2012 LTIP) on the business day prior to the payment date of such dividend.

e. Upon payment of deferred awards, fractional shares shall be eliminated without compensation. Any fractional shares shall be rounded up to the next whole share if greater than or equal to a half-share, and rounded down to the next whole share if less than a half-share.

f. The award and deferral is subject to the other terms and conditions of the 2012 LTIP, as well as vesting, forfeiture, tax withholding and other legal requirements and conditions with respect to such award and deferral.

g. The Board of Directors retains full discretion over the terms of this deferral arrangement and may amend, suspend or terminate such arrangement at any time or from time to time, or impose additional or different restrictions, conditions or limitations on such deferral at any time as permitted or not prohibited by the terms of 2012 LTIP.

h. The terms of my deferral election are intended to comply, and should be interpreted consistently with, Section 409A of the Internal Revenue Code of 1986, as amended.

IN WITNESS WHEREOF, the undersigned has executed this Agreement effective for all purposes as of the __ day of __________, 2013.

Pepco Holdings, Inc.
Executive and Director Deferred Compensation Plan
2014 Plan Year Salary Election Form – Executive

Please complete and sign this form and send it to the attention of Ned Dove – Rm. 4025 at Edison Place.

Personal Information

Last	**First**	**Middle**
Social Security Number		**E-mail Address**

I elect to participate in the Pepco Holdings, Inc. Executive and Director Deferred Compensation Plan (the “Plan”) with respect to the time period January 1, 2014 to December 31, 2014. I have received a copy of the Plan and understand the terms and conditions of the Plan. I further understand that with respect to the deferral election I have made herein, notwithstanding the terms of the Plan, the following shall apply:

1. I can only receive the deferrals elected herein in accordance with my election below or, in the case of death or an unforeseen financial emergency; and
2. I further understand that if I meet the definition of “Specified Employee” under the applicable provisions of the Internal Revenue Code, notwithstanding my election herein, the earliest I can receive my compensation deferred herein that is payable upon a separation from service is six (6) months and one day after my separation from service; and
3. I cannot change the time or form of my deferral made herein unless
   a. such revised election is not effective for 12 months after it is made;
   b. such revised election if made for a distribution at a specified time or on a fixed schedule is made at least 12 months prior to the first scheduled payment; and
   c. an election to delay a distribution must be for a period of at least five years.

Deferral Election – Base Salary

Please select all that apply.

• **Defer Evenly Throughout the Year** (no matching credits)	I hereby elect to defer ______% of my Base Salary paid each pay period in 2014. I understand that none of my deferrals under this deferral option will be credited with matching contributions.
• **Defer to Obtain Missed Matching Contributions in 401 (k) Plan**	I hereby elect to defer 6% of my Base Salary to the extent (if any) that my Base Salary exceeds $260,000. My deferrals under this option will be matched with credits in my Plan account based on the matching contribution formula in the 401(k) plan in which I participate. I understand that this deferral option is intended to provide an amount of deferrals necessary to obtain matching contributions that the Internal Revenue Code prevents from being made under the 401(k) plan. However, my deferrals under this deferral option will be made without regard to any election I actually make (or do not make) under the 401(k) Plan.
• **Non-Participation**	I elect not to defer any portion of my Base Salary in the 2014 Plan Year.

Benefit Payout Election

I elect to have the above-referenced deferred amounts paid to me beginning *(check one)*:

- (i) on the first day of the month following my separation from service.
- (ii) on January 31 of the calendar year following my separation from service.
- (iii) on January 31 of the calendar year following the later of my attainment of age ______ or separation from service.
- (iv) on January 31 of ______ *(Note: The designated year may not be earlier than 2016)*.

Manner of Payment

Benefits deferred under the Plan shall be paid to me (or, if applicable, my beneficiary) in the following manner *(check one)*. Note that recent changes to the tax law may require that payments to an executive who is a "Specified Employee" be delayed for a period of six (6) months and one day following the executive's termination of employment:

- a lump sum.
- annual installments over ______ *(2-15)* years.
- monthly installments over ______ *(24-180)* months.

I further recognize that nothing contained herein or in the Plan shall be construed as a contract of employment between me and Pepco Holdings, Inc., as a right to continue employment or as a limitation of Pepco Holdings, lnc.'s right of discharge. In addition, Pepco Holdings, Inc. and its subsidiaries reserve the right to amend or terminate its employee benefit plans, including this Plan, at any time, subject to the terms of those plans.

I understand that if I die during active service, my beneficiary shall receive an amount equal to two times my account balance resulting from deferrals under this agreement.

Asset Allocation Election

I elect to allocate my new deferrals to the following Measurement Funds (percentage total must equal 100%):

Prudential Conservative Balanced	%
Prudential Flexible Managed	%
Prudential Money Market	%
Prudential Government Income	%
Prudential Diversified Bond	%
Prudential High Yield Bond	%

Exhibit 10.51

NAMED EXECUTIVE OFFICER COMPENSATION DETERMINATIONS

2014 Named Executive Officer Compensation Determinations

The following is a description of certain compensation decisions made in 2014 by the Pepco Holdings, Inc. (PHI) Board of Directors (the Board) and/or the Compensation/Human Resources Committee of the Board (the Committee) with respect to compensation to be earned or payable in 2014 to (i) persons set forth in the first table below who are identified as named executive officers (each, a Named Executive Officer) in the Summary Compensation Table in PHI's proxy statement for its 2013 Annual Meeting of Stockholders (the 2013 Proxy Statement), and (ii) one executive officer of PHI who was not identified as a named executive officer in the 2013 Proxy Statement but who is anticipated to be identified as a named executive officer of PHI in PHI's proxy statement for its 2014 Annual Meeting of Stockholders.

As to each Named Executive Officer listed in the table immediately below, the compensation decisions consisted of (i) the establishment of annual base salary for 2014; (ii) the establishment of the Named Executive Officer's 2014 annual cash incentive award opportunities under the Amended and Restated Executive Incentive Compensation Plan (the EICP); and (iii) the grant of long-term restricted stock unit (RSU) awards under the Pepco Holdings, Inc. 2012 Long-Term Incentive Plan (the LTIP). In addition, with respect to Joseph M. Rigby, PHI's Chairman of the Board, President and Chief Executive Officer, the performance goals for a performance-based RSU award pursuant to the terms of his employment agreement were established in February 2014, as discussed below.

				LTIP Awards (2)			
				Performance-Based RSU Awards (# of RSUs) (3)			
Named Executive Officer	Title	2014 Annual Base Salary	Target 2014 Annual Cash EICP Award Opportunity as a Percentage of Annual Base Salary (1)	Threshold	Target	Maximum	Time-Based RSU Award (# of RSUs) (4)
Joseph M. Rigby (5)	Chairman of the Board, President and Chief Executive Officer	$1,015,000	100%	22,317	89,270	178,540	44,635
David M. Velazquez	Executive Vice President	$ 534,000	60%	5,871	23,482	46,964	11,741
Frederick J. Boyle	Senior Vice President and Chief Financial Officer	$ 500,000	60%	5,497	21,987	43,974	10,993
Kevin C. Fitzgerald (5)	Executive Vice President and General Counsel	$ 550,000	60%	6,047	24,186	48,372	12,093

(1) Each executive may earn a cash incentive award of up to 180% (subject to the exercise of negative discretion as described below) of his target award opportunity under the EICP as determined by the Committee, depending on the extent to which the pre-established performance goals are achieved. See "Amended and Restated Executive Incentive Compensation Plan" below for a discussion of 2014 performance goals.

(2) The shares of PHI common stock, $.01 par value per share (Common Stock), underlying performance-based and time-based RSU awards in the aggregate had a fair market value on the date of grant equal to the following percentage of the Named Executive Officer's 2014 annual base salary: 250% for Mr. Rigby and 125% for each of Messrs. Velazquez, Boyle and Fitzgerald.

(3) See "2014 LTIP Awards — Performance-Based RSU Awards" below for a description of the annual performance-based RSU awards granted under the LTIP.

(4) See "2014 LTIP Awards — Time-Based RSU Awards" below for a description of the annual time-based RSU awards granted under the LTIP.

(5) In addition to the awards listed in the table above, in February 2014, Mr. Rigby received, and Mr. Fitzgerald is eligible to receive, a performance-based RSU award pursuant to the terms of his employment agreement. Each such award has or will have a performance period beginning on January 1, 2014 and ending on December 31, 2014 and which will vest: (i) if the executive remains continuously employed by PHI during the performance period and (ii) to the extent that performance goals (described below) with respect to such performance period are met. Mr. Fitzgerald also received in 2014 a $15,000 non-base adjustment in cash with respect to his performance in 2013.

As to the executive officer of PHI listed in the table immediately below, the compensation decisions consisted of (i) the establishment of annual base salary for 2014; (ii) the establishment of a 2014 annual cash incentive award opportunity under the EICP; and (iii) the grant of long-term RSU awards under the LTIP.

				LTIP Awards (2)			
				Performance-Based RSU Award (# of RSUs) (3)			
Executive Officer	Title	2014 Annual Base Salary	Target 2014 Annual Cash EICP Award Opportunity as a Percentage of Annual Base Salary (1)	Threshold	Target	Maximum	Time-Based RSU Award (# of RSUs) (4)
John U. Huffman	President, Pepco Energy Services, Inc.	$ 388,000	60%	3,412	13,649	27,298	6,824

(1) Mr. Huffman may earn a cash incentive award of up to 180% (subject to the exercise of negative discretion as described below) of his target award opportunity under the EICP as determined by the Committee, depending on the extent to which the pre-established performance goals are achieved. See "Amended and Restated Executive Incentive Compensation Plan" below for 2014 performance goals.

(2) The shares of Common Stock underlying performance-based and time-based RSU awards in the aggregate had a market value on the date of grant equal to 100% of Mr. Huffman's 2014 annual base salary.

(3) See "2014 LTIP Awards — Performance-Based RSU Awards" below for a description of the performance-based RSU award issued under the LTIP.

(4) See "2014 LTIP Awards — Time-Based RSU Awards" below for a description of the time-based RSU award issued under the LTIP.

Amended and Restated Executive Incentive Compensation Plan

Each of the executives listed in the tables above is a participant in the EICP. On February 27, 2014, the Committee established the following performance goals to be used for the determination of 2014 EICP awards for each of the executives named below:

- Messrs. Rigby, Boyle and Fitzgerald: (1) net earnings per share, (2) electric system reliability, (3) customer satisfaction, (4) diversity, and (5) safety.
- Mr. Velazquez: (1) Power Delivery earnings per share (excluding certain items), (2) core capital expenditures, compared to budget (excluding certain items), (3) operation and maintenance spending, compared to budget, (4) compliance results, (5) electric system reliability, (6) customer satisfaction, (7) diversity, and (8) safety.
- Mr. Huffman: (1) Pepco Energy Services' net income (excluding power plants), (2) performance of Pepco Energy Services' energy savings performance contracting business, (3) net income from power plants, (4) performance of Pepco Energy Services' undergrounding transmission and distribution business, (5) diversity, and (6) safety.

The payment of awards under the EICP to each of these PHI executives is also conditioned upon the achievement by PHI of specified threshold earnings requirements in order for an EICP award to be paid to the executive, regardless of the extent to which the other performance goals may be achieved. The EICP award opportunities discussed in the tables above do not reflect any discretion by the Compensation Committee under the terms of the EICP to increase or reduce an award by up to 30% (subject to compliance with Section 162(m) of the Internal Revenue Code of 1986 (the Code)).

2014 LTIP Awards

The Committee has granted awards of performance-based RSUs and time-based RSUs under the LTIP with respect to the 2014 to 2016 performance/retention cycle. Participants in the LTIP are key employees and officers of PHI and its subsidiaries selected by the Chairman of the Board of PHI and approved by the Committee, as well as non-management directors of PHI, including each of the persons listed in the tables above. Subject to the terms and conditions of each RSU award, each RSU represents a contractual right to receive one share of Common Stock at the end of the restriction or performance period. When a dividend is paid on the Common Stock, the award is credited with additional RSUs equal to the number of RSUs subject to such award multiplied by the per share cash dividend, divided by the then current market price of a share of Common Stock. Additional RSUs credited as dividend equivalents will vest only to the extent the underlying RSUs vest.

Performance-Based RSU Awards

A performance-based RSU award accounts for two-thirds of an executive's aggregate 2014 equity award under the LTIP. Depending on the extent to which the pre-established performance goal, which is based on PHI's total shareholder return relative to a PHI-selected group of peer companies (the 2014 Utility Peer Group) over a three-year period beginning on January 1, 2014 and ending on December 31, 2016, has been met, an amount of each award ranging from 25% to 200% of the target number of RSUs (including dividend equivalents credited in the form of additional RSUs) subject to the award may vest. If during the course of the three-year performance period, a significant event occurs, as determined in the discretion of the Committee, which the Committee expects to have a substantial effect on total shareholder return during the period, the Committee may revise such measures, other than with respect to awards to "covered employees" subject to Section 162(m) of the Code. No adjustment shall be made that causes an award to fail to comply with Section 162(m) of the Code. Vesting amounts related to threshold (representing 25% of the target award opportunity), target and maximum (representing 200% of the target award opportunity), with respect to each performance-based award of RSUs for each executive, are shown in the tables above.

Subject to certain exceptions provided for in the LTIP and/or in the award agreement (or, with respect to Mr. Rigby, his employment agreement), performance-based awards are subject to forfeiture if (i) the employment of the executive terminates before the end of the three-year performance period or (ii) the performance goal has not been achieved as of the end of the three-year performance period.

Time-Based RSU Awards

Each executive listed above has received a grant of time-based RSUs, which accounts for one-third of the executive's aggregate 2014 equity award under the LTIP. Subject to certain exceptions provided for in the LTIP or in the award agreement (or, with respect to Mr. Rigby, his employment agreement), time-based RSUs are subject to forfeiture if the employment of the executive terminates prior to the third anniversary of the date of grant.

Performance-Based RSU Awards Pursuant to Employment Agreements

Mr. Rigby

Pursuant to the terms of his employment agreement with PHI, Mr. Rigby is entitled to receive a series of three annual performance-based awards of 36,945 RSUs, each granted under the LTIP, over the three-year term of his employment agreement. Each award will have a performance period that begins on January 1 and ends on December 31. Each award will vest if Mr. Rigby remains continuously employed with PHI during the related performance period and to the extent that the Committee determines that the performance goals established for that performance period have been met. The performance goals for each award are established on or as soon as practicable after the beginning of each performance period, but no later than 90 days after such date. The performance goals established by the Committee in February 2014 with respect to Mr. Rigby's 2014 performance-based award under his employment agreement are as follows:

- Reliability of electric service to customers (20% weight);
- Residential customer satisfaction (15% weight);
- Achievement of at least the mid-point of PHI's 2014 earnings guidance range (15% weight); and
- Achievement of total shareholder return relative to 2014 Utility Peer Group based on measurement period from January 1, 2014 to December 31, 2014 (50% weight).

Mr. Fitzgerald

Pursuant to the terms of his employment agreement with PHI, Mr. Fitzgerald is entitled to receive a series of three annual performance-based awards, each granted under the LTIP, over the three-year term of his employment agreement. Each award will have a performance period that begins on January 1 and ends on December 31. The awards will consist of a number of RSUs to be determined by dividing $166,666.67 by the closing price of a share of Common Stock on the last trading day immediately preceding the first day of the performance period. These awards will vest if Mr. Fitzgerald remains continuously employed with PHI during each annual performance period and to the extent that the Committee determines that the performance goals established for the performance period covered by the award have been met. The performance goals for each award will be established on or as soon as practicable after the beginning of each performance period, but no later than 90 days after such date, from among the performance criteria set forth in the LTIP.

Exhibit 10.52

ELECTION OF TAX WITHHOLDING FOR SERVICE-BASED AND PERFORMANCE-BASED AWARDS

As a Participant in the Pepco Holdings, Inc. Long-Term Incentive Plan (the "Plan"), I was granted Service-Based Restricted Stock Unit Awards and Performance-Based Restricted Stock Unit Awards during the year 2011, for the performance cycle 2011 to 2013. I understand that minimum statutory withholdings for certain federal, state, local or other taxes are required for Awards which I have been granted under the Plan, which in the case of Performance-Based Awards will be determined after the Board of Directors has determined if, and to what extent, the performance goals related to such Award have been met. I elect to use the following method to meet the minimum statutory withholding requirements (**please check one of the boxes below**).

☐ I hereby elect that such number of shares of Stock having a Fair Market Value equal to the minimum statutory requirement for federal, state and local withholding and other taxes due upon vesting of Awards which I have been granted under the Plan, shall be withheld from the settlement of such Awards.

☐ I will satisfy the minimum statutory requirement for taxes due with respect to such Awards by the payment of cash immediately upon notification by the Company of the minimum statutory requirement for federal, state and local withholding and other taxes due upon vesting of such Awards.

☐ I will satisfy the minimum statutory requirement for taxes due with respect to such Awards by delivery to the Company, immediately upon its notification to me, of the number of shares of Stock I own (other than the shares I receive under the Award) having a Fair Market Value equal to the minimum statutory requirement for federal, state and local withholding and other taxes due upon vesting of such Awards.

Capitalized terms used herein, which are not defined herein, have the meanings given in the Plan.

Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

ARTICLE VI

Covenants

ARTICLE VII

Conditions

ARTICLE VIII

Termination

ARTICLE IX

Miscellaneous and General

AGREEMENT AND PLAN OF MERGER

AGREEMENT AND PLAN OF MERGER (hereinafter called this "Agreement"), dated as of April 29, 2014, among Pepco Holdings, Inc., a Delaware corporation (the "Company"), Exelon Corporation, a Pennsylvania corporation ("Parent"), and Purple Acquisition Corp., a Delaware corporation and a wholly-owned subsidiary of Parent ("Merger Sub," the Company and Merger Sub sometimes being hereinafter collectively referred to as the "Constituent Corporations").

RECITALS

WHEREAS, the respective boards of directors of each of Parent, Merger Sub and the Company have approved and declared advisable this Agreement and the merger of Merger Sub with and into the Company (the "Merger") upon the terms and subject to the conditions set forth in this Agreement and have authorized the execution hereof, and the board of directors of the Company has adopted a resolution recommending that the plan of merger set forth in this Agreement be adopted by the stockholders of the Company;

WHEREAS, pursuant to a subscription agreement between the Company and Parent entered into on the date hereof (the "Subscription Agreement"), the Company will issue, sell and deliver to Parent, and Parent will subscribe for and purchase from the Company, up to 18,000 new shares of preferred stock, par value $0.01 per share, having the relative rights, preferences, limitations and restrictions as set forth in a certificate of designation substantially in the form of Exhibit C hereto (the "Nonvoting Preferred Stock"), on the terms and subject to the conditions set forth in the Subscription Agreement (as of any date of determination, the purchase price actually paid to the Company for such shares is referred to as the "Nonvoting Preferred Stock Purchase Price"); and

WHEREAS, the Company, Parent and Merger Sub desire to make certain representations, warranties, covenants and agreements in connection with this Agreement.

NOW, THEREFORE, in consideration of the premises, and of the representations, warranties, covenants and agreements contained herein, the parties hereto agree as follows:

ARTICLE I

The Merger; Closing; Effective Time

1.1. The Merger. Upon the terms and subject to the conditions set forth in this Agreement, at the Effective Time, Merger Sub shall be merged with and into the

Company and the separate corporate existence of Merger Sub shall thereupon cease. The Company shall be the surviving corporation in the Merger (sometimes hereinafter referred to as the "Surviving Corporation"), and the separate corporate existence of the Company, with all of its rights, privileges, immunities, powers and franchises, shall continue unaffected by the Merger, except as set forth in Article II. The Merger shall have the effects specified in the Delaware General Corporation Law, as amended (the "DGCL").

1.2. Closing. Unless otherwise mutually agreed in writing between the Company and Parent, the closing for the Merger (the "Closing") shall take place at the offices of Sullivan & Cromwell LLP, 1700 New York Avenue, N.W. Suite 700, Washington, D.C., at 9:00 a.m. (Eastern Time) on the second business day (the "Closing Date") following the day on which the last to be satisfied or waived of the conditions set forth in Article VII (other than those conditions that by their nature are to be satisfied at the Closing, but subject to the fulfillment or waiver of those conditions) shall be satisfied or waived in accordance with this Agreement. For purposes of this Agreement, the term "business day" shall mean any day ending at 11:59 p.m. (Eastern Time) other than a Saturday or Sunday or a day on which banks are required or authorized to close in the City of New York.

1.3. Effective Time. At the Closing, the Company and Parent will cause a certificate of merger (the "Certificate of Merger") to be executed, acknowledged and filed with the Secretary of State of the State of Delaware as provided in Section 251 of the DGCL. The Merger shall become effective at the time when the Certificate of Merger has been duly filed with the Secretary of State of the State of Delaware or at such later time as may be agreed by the parties in writing and specified in the Certificate of Merger (the "Effective Time").

ARTICLE II

Certificate of Incorporation and Bylaws of the Surviving Corporation

2.1. The Certificate of Incorporation. At the Effective Time, the certificate of incorporation of the Surviving Corporation (the "Charter") shall be amended in its entirety to read as set forth in Exhibit A hereto, until thereafter amended as provided therein or by applicable Law.

2.2. The Bylaws. The parties hereto shall take all actions necessary so that the bylaws of the Company in effect immediately prior to the Effective Time shall be the bylaws of the Surviving Corporation (the "Bylaws"), until thereafter amended as provided therein or by applicable Law.

ARTICLE III

Directors and Officers of the Surviving Corporation

3.1. Directors. The parties hereto shall take all actions necessary so that the board of directors of Merger Sub at the Effective Time shall, from and after the Effective Time, consist of the directors of the Surviving Corporation until their successors have been duly elected or appointed and qualified or until their earlier death, resignation or removal in accordance with the Charter and the Bylaws.

3.2. Officers. The officers of the Company at the Effective Time shall, from and after the Effective Time, be the officers of the Surviving Corporation until their successors shall have been duly elected or appointed and qualified or until their earlier death, resignation or removal in accordance with the Charter and Bylaws.

ARTICLE IV

Effect of the Merger on Capital Stock; Exchange of Certificates

4.1. Effect on Capital Stock. At the Effective Time, as a result of the Merger and without any action on the part of the holder of any capital stock of the Company or the sole stockholder of Merger Sub:

(a) Merger Consideration. Each share of the common stock, par value \$0.01 per share, of the Company (a "Share" or, collectively, the "Shares") issued and outstanding immediately prior to the Effective Time other than (i) Shares owned by Parent, Merger Sub or any other direct or indirect wholly-owned Subsidiary of Parent and Shares owned by the Company or any direct or indirect wholly-owned Subsidiary of the Company, and in each case not held on behalf of third parties (but not including Shares held by the Company in any "rabbi trust" or similar arrangement in respect of any compensation plan or arrangement) and (ii) Shares that are owned by stockholders ("Dissenting Stockholders") who have perfected and not withdrawn a demand for appraisal rights pursuant to Section 262 of the DGCL (each Share referred to in clause (i) or clause (ii) being an "Excluded Share" and collectively, "Excluded Shares") shall be converted into the right to receive \$27.25 per Share in cash, without interest (the "Per Share Merger Consideration"). At the Effective Time, all of the Shares shall cease to be outstanding, shall be cancelled and shall cease to exist, and each certificate (a "Certificate") formerly representing any of the Shares (other than Excluded Shares) and each non-certificated Share represented by book-entry (a "Book Entry Share") (other than Excluded Shares) shall thereafter represent only the right to receive the Per Share Merger Consideration, without interest, and each Certificate formerly representing Shares or Book Entry Shares owned by Dissenting Stockholders shall thereafter only represent the right to receive the payment to which reference is made in Section 4.2(f).

(b) Cancellation of Excluded Shares. Each Excluded Share shall, by virtue of the Merger and without any action on the part of the holder thereof, cease to be outstanding, shall be cancelled without payment of any consideration therefor and shall cease to exist, subject to any rights the holder thereof may have under Section 4.2(f).

(c) Merger Sub. At the Effective Time, each share of common stock, par value $0.01 per share, of Merger Sub issued and outstanding immediately prior to the Effective Time shall be converted into one share of common stock, par value $0.01 per share, of the Surviving Corporation.

(d) Nonvoting Preferred Stock. Each share of Nonvoting Preferred Stock issued and outstanding at the Effective Time shall remain outstanding following the Effective Time.

4.2. Exchange of Shares.

(a) Paying Agent. Immediately prior to the Effective Time, Parent shall deposit, or shall cause to be deposited, with a paying agent selected by Parent with the Company's prior approval (such approval not to be unreasonably withheld or delayed) (the "Paying Agent"), for the benefit of the holders of Shares, a cash amount in immediately available funds necessary for the Paying Agent to make payments under Section 4.1(a) (such cash being hereinafter referred to as the "Exchange Fund"). The Paying Agent agreement pursuant to which Parent shall appoint the Paying Agent shall be in form and substance reasonably acceptable to the Company. The Paying Agent shall invest the Exchange Fund as directed by Parent; provided that such investments shall be in obligations of or guaranteed by the United States of America, in commercial paper obligations rated A-1 or P-1 or better by Moody's Investors Service, Inc. or Standard & Poor's, respectively, in certificates of deposit, bank repurchase agreements or banker's acceptances of commercial banks with capital exceeding $1 billion, or in money market funds having a rating in the highest investment category granted by a recognized credit rating agency at the time of investment. Any interest and other income resulting from such investment shall become a part of the Exchange Fund, and any amounts in excess of the amounts payable under Section 4.1(a) shall be promptly returned to the Surviving Corporation. To the extent that there are any losses with respect to any such investments, or the Exchange Fund diminishes for any reason below the level required for the Paying Agent to make prompt cash payment under Section 4.1(a), Parent shall, or shall cause the Surviving Corporation to, promptly replace or restore the cash in the Exchange Fund so as to ensure that the Exchange Fund is at all times maintained at a level sufficient for the Paying Agent to make such payments under Section 4.1(a).

(b) Exchange Procedures. (i) Promptly after the Effective Time (and in any event within two business days), the Surviving Corporation shall cause the Paying Agent to mail to each holder of record of a Certificate representing Shares (other than holders of Excluded Shares) (A) a letter of transmittal in customary form specifying that delivery shall be effected, and risk of loss and title to the Certificates shall pass, only upon delivery of the Certificates (or affidavits of loss in lieu thereof as provided in

Section 4.2(e)) to the Paying Agent, such letter of transmittal to be in such form and have such other provisions as Parent and the Company may reasonably agree, and (B) instructions for use in effecting the surrender of the Certificates (or affidavits of loss in lieu thereof as provided in Section 4.2(e)) in exchange for the Per Share Merger Consideration. Upon surrender of a Certificate (or affidavit of loss in lieu thereof as provided in Section 4.2(e)) to the Paying Agent in accordance with the terms of such letter of transmittal, duly executed, the holder of such Certificate shall be entitled to receive in exchange therefor a cash amount in immediately available funds (after giving effect to any required Tax withholdings as provided in Section 4.2(g)) equal to (x) the number of Shares represented by such Certificate (or affidavit of loss in lieu thereof as provided in Section 4.2(e)) multiplied by (y) the Per Share Merger Consideration, and the Certificate so surrendered shall forthwith be cancelled. No interest will be paid or accrued on any amount payable upon due surrender of the Certificates. In the event of a transfer of ownership of Shares that is not registered in the transfer records of the Company, a check for any cash to be exchanged upon due surrender of the Certificate may be issued to such transferee if the Certificate formerly representing such Shares is presented to the Paying Agent, accompanied by all documents reasonably required to evidence and effect such transfer and to evidence that any applicable stock transfer taxes have been paid or are not applicable.

(ii) Notwithstanding anything to the contrary in this Agreement, any holder of Book Entry Shares shall not be required to deliver a Certificate or an executed letter of transmittal to the Paying Agent to receive the Per Share Merger Consideration that such holder is entitled to receive pursuant to this Article IV. In lieu thereof, each holder of record of one or more Book Entry Shares whose Shares were converted into the right to receive the Per Share Merger Consideration shall upon receipt by the Paying Agent of an "agent's message" in customary form (or such other evidence, if any, as the Paying Agent may reasonably request), be entitled to receive, and Parent shall cause the Paying Agent to pay and deliver as promptly as reasonably practicable after the Effective Time, the Per Share Merger Consideration in respect of each such Share and the Book Entry Shares of such holder shall forthwith be cancelled.

(c) Transfers. From and after the Effective Time, there shall be no transfers on the stock transfer books of the Company of the Shares that were outstanding immediately prior to the Effective Time. If, after the Effective Time, any Certificate or Book Entry Share is presented to the Surviving Corporation, Parent or the Paying Agent for transfer, it shall be cancelled and exchanged for the cash amount in immediately available funds to which the holder thereof is entitled pursuant to this Article IV.

(d) Termination of Exchange Fund. Any portion of the Exchange Fund (including the proceeds of any investments thereof) that remains unclaimed by the stockholders of the Company 180 days after the Effective Time shall be delivered to the Surviving Corporation. Any holder of Shares (other than Excluded Shares) who has not theretofore complied with this Article IV shall thereafter look only to the Surviving Corporation for payment of the Per Share Merger Consideration (after giving effect to any required Tax withholdings as provided in Section 4.2(g)) upon due surrender of its Certificates (or affidavits of loss in lieu thereof as provided in Section 4.2(e)) or Book Entry Shares, without any interest thereon. Notwithstanding the foregoing, none of the Surviving Corporation, Parent, the Paying Agent or any other Person shall be liable to any former holder of Shares for any amount properly delivered to a public official pursuant to applicable abandoned property, escheat or similar Laws. For the purposes of this Agreement, the term "Person" shall mean any individual, corporation (including not-for-profit), general or limited partnership, limited liability company, joint venture, estate, trust, association, organization, Governmental Entity or other entity of any kind or nature.

(e) Lost, Stolen or Destroyed Certificates. In the event any Certificate shall have been lost, stolen or destroyed, upon the making of an affidavit of that fact by the Person claiming such Certificate to be lost, stolen or destroyed and, if required by Parent, the posting by such Person of a bond in customary amount and upon such terms as may be required by Parent as indemnity against any claim that may be made against it or the Surviving Corporation with respect to such Certificate, the Paying Agent will issue a check in the amount (after giving effect to any required Tax withholdings as provided in Section 4.2(g)) equal to (i) the number of Shares represented by such lost, stolen or destroyed Certificate multiplied by (ii) the Per Share Merger Consideration.

(f) Appraisal Rights. No Person who has perfected a demand for appraisal rights pursuant to Section 262 of the DGCL shall be entitled to receive the Per Share Merger Consideration with respect to the Shares owned by such Person unless and until such Person shall have effectively withdrawn or lost such Person's right to appraisal under the DGCL. Each Dissenting Stockholder shall be entitled to receive only the payment provided by Section 262 of the DGCL with respect to Shares owned by such Dissenting Stockholder. The Company shall give Parent (i) prompt notice of any demands for appraisal, threatened demands for appraisal, attempted withdrawals of such demands, and any other instruments that are received by the Company relating to stockholders' rights of appraisal (any of the foregoing, a "Demand") and (ii) the opportunity to participate in and control all negotiations and proceedings with respect to any Demand. The Company shall not, except with the prior written consent of Parent, voluntarily make any payment with respect to any Demand, offer to settle or settle any such Demand.

(g) Withholding Rights. Each of the Company, Parent, the Surviving Corporation and the Paying Agent shall be entitled to deduct and withhold from the consideration otherwise payable pursuant to this Agreement to any holder of Shares, Company RSUs, Company PSUs and Company Awards (each as defined in Section 4.3) such amounts as it is required to deduct and withhold with respect to the making of such payment under the Internal Revenue Code of 1986, as amended (the "Code") or any other applicable state, local or foreign Tax Law. To the extent that amounts are so withheld by the Company, the Surviving Corporation, Parent or the Paying Agent, as the case may be, such withheld amounts (i) shall be remitted by the Company, Parent, the Surviving Corporation or the Paying Agent, as applicable, to the applicable Governmental Entity, and (ii) shall be treated for all purposes of this Agreement as having been paid to the holder of Shares in respect of which such deduction and withholding was made by the Company, the Surviving Corporation, Parent or the Paying Agent, as the case may be.

4.3. Treatment of Stock Plans.

(a) Company Restricted Stock Units. At the Effective Time, each outstanding Company restricted stock unit that vests based solely on continued service to the Company and its Subsidiaries (a "Company RSU") under the Stock Plans (as defined in Section 5.1(b)), vested or unvested, shall be cancelled and converted into the right of the holder thereof to receive, as soon as reasonably practicable (but no later than three business days) after the Effective Time (or, to the extent such Company RSU is deferred compensation subject to Section 409A of the Code, at the earliest time permitted under the applicable Stock Plan or Benefit Plan that will not trigger a tax or penalty under Section 409A of the Code, with interest at the U.S. prime rate as shown at the end of the day on Bloomberg screen BTMM or PRIME INDEX HP, whichever is higher (the "Interest Rate") from the Closing Date through such payment date), an amount in cash equal to the product of (x) the total number of Shares subject to such Company RSU immediately prior to the Effective Time, multiplied by (y) the Per Share Merger Consideration; provided, however, that any Company RSUs granted after the date hereof will only payout on a prorated basis based on the number of days elapsed from the grant date (or, in the case of the annual 2015 grants, January 1, 2015) through the Closing Date relative to 1,095 days (and the remainder of such awards will be cancelled without payment).

(b) Company Performance Stock Units. At the Effective Time, each outstanding Company restricted stock unit that vests, in whole or in part, based on the achievement of performance objectives (a "Company PSU") under the Stock Plans, vested or unvested, shall be cancelled and converted into the right of the holder thereof to receive, as soon as reasonably practicable (but no later than three business days) after the Effective Time (or, to the extent such Company PSU is deferred compensation subject to Section 409A of the Code, at the earliest time permitted under the applicable Stock Plan or Benefit Plan that will not trigger a tax or penalty under Section 409A of the Code, with interest at the Interest Rate from the Closing Date through such payment date), an amount in cash equal to the product of (x) the total number of Shares subject to such Company PSU immediately prior to the Effective Time, determined (without proration) based on achievement of applicable performance objectives at the greater of (1) actual performance as reasonably determined by the compensation committee of the board of directors of the Company prior to the Effective Time based on performance through a day that is no more than five business days prior to the Effective Time and (2) the target level of 100%, multiplied by (y) the Per Share Merger Consideration; provided, however, that any Company PSUs granted after the date hereof will have performance determined based on the greater of (1) actual performance (determined as described above) and (2) the target level of 100%, and will only payout on a prorated basis based on the number of days elapsed from the grant date (or, in the case of the annual 2015 grants, January 1, 2015) through the Closing Date relative to 1,095 days (and the remainder of such awards will be cancelled without payment).

(c) Company Awards. At the Effective Time, each right of any kind, contingent or accrued, vested or unvested, to acquire or receive Shares or benefits measured by the value of Shares, and each award of any kind consisting of Shares that may be held, awarded, outstanding, payable or reserved for issuance under the Stock Plans and any other Benefit Plans, other than Company RSUs and Company PSUs (the "Company Awards"), shall be cancelled and shall only entitle the holder thereof to receive, as soon as reasonably practicable after the Effective Time (or, to the extent such Company Award is deferred compensation subject to Section 409A of the Code, at the earliest time permitted under the applicable Stock Plan or Benefit Plan that will not trigger a tax or penalty under Section 409A of the Code, with interest at the Interest Rate from the Closing Date through such payment date), an amount in cash equal to (x) the number of Shares subject to such Company Award immediately prior to the Effective Time determined (without proration) based on achievement of any applicable performance objectives at the greater of (1) actual performance as reasonably determined by the compensation committee of the board of directors of the Company prior to the Effective Time based on performance through a day that is no more than five business days prior to the Effective Time and (2) the target level of 100%, multiplied by (y) the Per Share Merger Consideration (or, if the Company Award provides for payments to the extent the value of the Shares exceeds a specified reference or exercise price, the amount, if any (or zero, if no such excess), by which the Per Share Merger Consideration exceeds such reference or exercise price).

(d) Corporate Actions. At or prior to the Effective Time, the Company, the board of directors of the Company and the compensation committee of the board of directors of the Company, as applicable, shall adopt any resolutions and take any actions which are necessary to effectuate the provisions of Sections 4.3(a) through 4.3(c).

4.4. Adjustments to Prevent Dilution. In the event that the Company changes the number of Shares or securities convertible or exchangeable into or exercisable for Shares issued and outstanding prior to the Effective Time as a result of a reclassification, stock split (including a reverse stock split), stock dividend or distribution, recapitalization, merger, issuer tender or exchange offer, or other similar transaction, the Per Share Merger Consideration shall be equitably adjusted.

ARTICLE V

Representations and Warranties

5.1. Representations and Warranties of the Company. Except as set forth in (x) the Company Reports filed with or furnished to the Securities and Exchange Commission (the "SEC") by the Company on or after January 1, 2012 and prior to the date hereof (excluding any disclosures of information, factors or risks contained or referenced therein under the captions "Risk Factors," "Forward-Looking Statements," or "Quantitative and Qualitative Disclosures About Market Risk," to the extent they are statements that are predictive, cautionary or forward-looking in nature, and provided that nothing in the Company Reports shall be deemed to modify or qualify the representations and warranties set forth in Sections 5.1(a) (Organization, Good Standing and Qualification), 5.1(b) (Capital Structure), Section 5.1(c) (Corporate Authority; Approval and Fairness), 5.1(l) (Takeover Statutes) or 5.1(s) (Brokers and Finders), or (y) the corresponding sections or subsections of the disclosure letter delivered to Parent by the Company prior to entering into this Agreement (the "Company Disclosure Letter") (it being agreed that disclosure of any item in any section or subsection of the Company Disclosure Letter shall be deemed disclosure with respect to any other section or subsection to which the relevance of such item is reasonably apparent), the Company hereby represents and warrants to Parent and Merger Sub that:

(a) Organization, Good Standing and Qualification. Each of the Company and its Subsidiaries is a legal entity duly organized, validly existing and in good standing under the Laws of its respective jurisdiction of organization and has all requisite corporate or similar power and authority to own, lease and operate its properties and assets and to carry on its business as presently conducted and is qualified to do business and is in good standing as a foreign corporation or similar entity in each jurisdiction where the ownership, leasing or operation of its assets or properties or conduct of its business requires such qualification, except where the failure to be so organized, qualified or in good standing, or to have such power or authority, are not, individually or in the aggregate, reasonably likely to have a Company Material Adverse Effect. The Company has made available to Parent complete and correct copies of the Company's and its Significant Subsidiaries' certificates of incorporation and bylaws or comparable governing documents, each as amended to the date hereof, and each as so made available is in effect on the date hereof.

As used in this Agreement, the term (i) "Subsidiary" means, with respect to any Person, any other Person of which at least a majority of the securities or ownership interests having by their terms ordinary voting power to elect a majority of the board of directors or other persons performing similar functions is directly or indirectly owned or controlled by such Person and/or by one or more of its Subsidiaries; (ii) "Significant Subsidiary" has the meaning set forth in Rule 1.02(w) of Regulation S-X under the Securities Exchange Act of 1934, as amended (the "Exchange Act"); (iii) "Affiliate" means, with respect to any Person, any other Person, directly or indirectly, controlling, controlled by, or under common control with, such Person. For purposes of this definition, the term "control" (including the correlative terms "controlling," "controlled by" and "under common control with") means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise; and (iv) "Company Material Adverse Effect" means any change, event, occurrence or effect that, individually or taken together with other changes, events, occurrences or effects, has a material adverse effect on the financial condition, business or results of operations of the Company and its Subsidiaries, taken as a whole; provided, however, that none of the following shall constitute or be taken into account in determining whether there is or, where applicable, has been a Company Material Adverse Effect:

(A) changes in general economic or political conditions or the securities, credit, commodities or financial markets in general in the United States or the geographic area within which PJM Interconnection, LLC ("PJM") operates as a regional transmission organization (the "PJM Region"), or the Mid-Atlantic Area Council within the PJM Region;

(B) (i) acts of war or terrorism or (ii) changes, events, circumstances or developments that are weather-related or result from any natural disasters, "acts of God" or other "force majeure" events;

(C) any adoption, implementation, promulgation, repeal, modification, reinterpretation or proposal of any rule, regulation, ordinance, order, protocol or any other Law of or by any national, regional, state or local Governmental Entity or of or by the North American Electric Reliability Corporation ("NERC") or PJM;

(D) changes, events or developments in the (x) electric generating, transmission or distribution industries or natural gas transmission or distribution industries (including any changes in the operations thereof), (y) engineering or construction industries, or (z) wholesale or retail markets for commodities, materials or supplies (including equipment supplies, steel, concrete, electric power, fuel, coal, natural gas, water or coal transportation) or the hedging markets therefor;

(E) changes or developments in wholesale or retail electric power prices;

(F) system-wide changes or developments in electric transmission or distribution systems (other than changes solely affecting the Company or any of its Subsidiaries);

(G) any changes in customer usage patterns or customer selection of third-party suppliers for electricity;

(H) any loss or overtly threatened loss, or adverse change or overtly threatened adverse change, in the relationship of the Company or any of its Subsidiaries with its customers, employees, regulators, financing sources, labor unions or suppliers caused by the pendency or the announcement of the transactions contemplated by this Agreement;

(I) changes or effects from the entry into, the announcement or pendency of, or the performance of obligations required by this Agreement or consented to or requested by Parent or Merger Sub, including any change resulting from a failure to file rate cases as planned or to receive orders from State Commissions approving rate increases as contemplated by the Company's financial plans, any change in the Company's credit ratings and any actions taken by the Company and its Subsidiaries that is expressly permitted or required pursuant to this Agreement or is consented to or requested by Parent to obtain approval from any Governmental Entity for consummation of the Merger (including (i) any actions taken by Parent, the Company or any of their respective Subsidiaries to settle the Rate Cases as permitted by Section 6.5(f), (ii) any actions required to be taken by Parent, the Company or any of their respective Affiliates to obtain any Parent Approval or any Company Approval, (iii) any action by any Governmental Entity that requires Parent or the Company or any of their respective Subsidiaries or Affiliates to accept the commitments and agreements set forth in Exhibit B hereto (the "Regulatory Commitments"), (iv) the issuance, sale and delivery of the Nonvoting Preferred Stock to Parent pursuant to the Subscription Agreement and (v) any agreements consented to by Parent to obtain the Regulatory Approvals, including to implement the Regulatory Commitments);

(J) changes in GAAP or interpretation thereof after the date hereof;

(K) any failure by the Company to meet any internal or public projections or forecasts or estimates of revenues or earnings for any period ending on or after the date of this Agreement, provided that the exception in this clause shall not prevent or otherwise affect a determination that any change, event, occurrence, effect, circumstance or development underlying such failure has resulted in, or contributed to, a Company Material Adverse Effect;

(L) changes that arise out of or relate to the identity of Parent or any of its Affiliates as the acquirer of the Company;

(M) a decline in the price or trading volume of the Company common stock on the New York Stock Exchange (the "NYSE") on or after the date of this Agreement, provided that the exception in this clause shall not prevent or otherwise affect a determination that any change, event, occurrence, effect, circumstance or development underlying such decline has resulted in, or contributed to, a Company Material Adverse Effect; and

(N) changes that result from any shutdown or suspension of operations at the power plants from which the Company obtains electricity or facilities from which the Company obtains natural gas;

provided, further, however, that matters, changes, events, occurrences, effects or developments set forth in clauses (A), (B), (C), (D), (E), (F), and (G), above may be taken into account in determining whether there has been or is a Company Material Adverse Effect to the extent such matters, changes, events, occurrences, effects or developments have a materially disproportionate adverse effect on the Company and its Subsidiaries, taken as a whole, as compared to other entities (if any) engaged in the relevant business in the geographic area affected by such matters, changes, events, occurrences, effects or developments.

(b) Capital Structure. The authorized capital stock of the Company consists of 400,000,000 Shares, of which 251,025,051 Shares were outstanding as of the close of business on April 28, 2014 and 40,000,000 shares of preferred stock, par value $0.01 per share, none of which are outstanding as of the close of business on April 28, 2014, of which 9,000 shares of Nonvoting Preferred Stock are to be authorized, issued and outstanding pursuant to the Subscription Agreement on the Initial Closing Date (as such term is defined in the Subscription Agreement). All of the outstanding Shares have been duly authorized and are validly issued, fully paid and nonassessable. When issued pursuant to the Subscription Agreement, the shares of Nonvoting Preferred Stock issued to Parent will be validly issued, fully paid and nonassessable. As of April 28, 2014, other than 774,201 Shares reserved for issuance in respect of Company RSUs, 2,468,233 Shares reserved for issuance in respect of Company PSUs, and 5,725,564 Shares reserved for issuance under the Direct Stock Purchase and Dividend Reinvestment Plan, and 20,143,400 Shares reserved for issuance in respect of Company Awards under the Pepco Holdings, Inc. Long-Term Incentive Plan, the Pepco Holdings, Inc. 2012 Long-Term Incentive Plan, the Pepco Holdings, Inc. Non-Management Directors Compensation Plan, and the Pepco Holdings, Inc. Retirement Savings Plan (collectively, the "Stock Plans"), the Company has no Shares reserved for issuance. Each of the outstanding shares of capital stock or other equity securities of each of the Company's Subsidiaries is duly authorized, validly issued, fully paid and nonassessable and owned by the Company or by a direct or indirect wholly-owned Subsidiary of the Company, free and clear of any lien, charge, pledge, security interest, claim, or other encumbrance (each, a "Lien"). Except as set forth above, there are no preemptive or other outstanding rights, options, warrants, conversion rights, stock appreciation rights, performance units, redemption rights, repurchase rights, agreements, arrangements, calls, commitments or rights of any kind that obligate the Company or any of its Subsidiaries to issue or sell any shares of capital stock or other equity securities of the Company or any of its Subsidiaries or any securities or obligations convertible or exchangeable into or exercisable for, or giving any Person a right to subscribe for or acquire, any equity securities of the Company or any of its Subsidiaries, and no securities or obligations evidencing such rights are authorized, issued or outstanding. Upon any issuance of any Shares in accordance with the terms of the Stock Plans, such Shares will be duly authorized, validly issued, fully paid and nonassessable and free and clear of any Liens. The Company does not have outstanding any bonds, debentures, notes or other obligations the holders of which have the right to vote (or convertible into or exercisable for securities having the right to vote) with the stockholders of the Company on any matter. For purposes of this Agreement, a wholly-owned Subsidiary of the Company shall include any Subsidiary of the Company of which all of the shares of capital stock of such Subsidiary are owned by the Company (or a wholly-owned Subsidiary of the Company).

(c) Corporate Authority; Approval and Fairness.

(i) The Company has all requisite corporate power and authority and has taken all corporate action necessary in order to execute and deliver this Agreement and, subject only to adoption of this Agreement by the holders of a majority of the outstanding Shares entitled to vote on such matter at a stockholders' meeting duly called and held for such purpose (the "Company Requisite Vote"), to perform its obligations under this Agreement and to consummate the Merger. This Agreement has been duly executed and delivered by the Company and constitutes a valid and binding agreement of the Company enforceable against the Company in accordance with its terms, subject to bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium and similar Laws of general applicability relating to or affecting creditors' rights and to general equity principles (the "Bankruptcy and Equity Exception").

(ii) The board of directors of the Company has (A) unanimously determined that the Merger is in the best interests of the Company and its stockholders, approved and declared advisable this Agreement and the Merger and resolved to recommend adoption of this Agreement to the holders of Shares (the "Company Recommendation"), (B) directed that this Agreement be submitted to the holders of Shares for their adoption and (C) received the opinion of its financial advisors, Lazard Frères & Co. LLC and Morgan Stanley & Co. LLC, to the effect that the Per Share Merger Consideration to be received by the holders of Shares in the Merger is fair from a financial point of view, as of the date of such opinions, to such holders. It is agreed and understood that such opinions are for the benefit of the Company's board of directors and may not be relied on by Parent or Merger Sub. The board of directors of the Company has taken all action so that Parent will not be an "interested stockholder" or prohibited from entering into or consummating a "business combination" with the Company (in each case as such term is used in Section 203 of the DGCL) as a result of the execution of this Agreement or the consummation of the transactions in the manner contemplated hereby.

(d) Governmental Filings and Approvals; No Violations; Certain Contracts.

(i) Other than the filings, approvals and/or notices (A) pursuant to Section 1.3, (B) under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended (the "HSR Act"), (C) under the Exchange Act, (D) under stock exchange rules, (E) with the Federal Energy Regulatory Commission (the "FERC") under the Federal Power Act (the "FERC Approval"), (F) with the Federal Communications Commission (the "FCC") (the "FCC Approval"), (G) with the Delaware Public Service Commission, the District of Columbia Public Service Commission, the Maryland Public Service Commission, the New Jersey Board of Public Utilities, the Virginia State Corporation Commission (collectively, the "State Commissions") under applicable state Laws (the "State Approvals") and (H) the filings, approvals and/or notices listed in Section 5.1(d)(i) of the Company Disclosure Letter (together with the other approvals referred to in clauses (B) through (G) of this Section 5.1(d)(i), the "Company Approvals"), no notices, reports or other filings are required to be made by the Company or any of its Subsidiaries with, nor are any consents, registrations, approvals, permits or authorizations required to be obtained by the Company from, any domestic or foreign governmental or regulatory authority, agency, commission, body, court or other legislative, executive or judicial governmental entity (each, a "Governmental Entity"), NERC or PJM, in connection with the execution, delivery and performance of this Agreement by the Company and the consummation of the Merger, except those, the failure to make or obtain are not, individually or in the aggregate, reasonably likely to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation of the Merger.

(ii) The execution, delivery and performance of this Agreement by the Company do not, and the consummation of the Merger will not, constitute or result in (A) a breach or violation of, or a default under, the certificate of incorporation or bylaws of the Company or the comparable governing documents of any of its Subsidiaries, (B) with or without notice, lapse of time or both, a breach or violation of, a termination (or right of termination) or a default under, the creation or acceleration of any obligations under, or the creation of a Lien on any of the assets of the Company or any of its Subsidiaries pursuant to, any agreement, lease, license, contract, note, mortgage, indenture, arrangement or other obligation (each, a "Contract") not otherwise terminable by the other party thereto on 90 days' or less notice without penalty, binding upon the Company or any of its Subsidiaries or (C) assuming compliance with the matters referred to in Section 5.1(d)(i), a violation of any Law to which the Company or any of its Subsidiaries is subject, except, in the case of clause (B) or (C) of this Section 5.1(d)(i), for any such breach, violation, termination, default, creation, acceleration or change that, individually or in the aggregate, is not reasonably likely to have a Company Material Adverse Effect or prevent, materially delay or materially impair the consummation of the Merger.

(e) Company Reports; Financial Statements.

(i) The Company has filed or furnished, as applicable, on a timely basis, all forms, statements, certifications, reports and documents required to be filed or furnished by it with the SEC pursuant to the Exchange Act or the Securities Act of 1933, as amended (the "Securities Act"), since December 31, 2011 (the "Applicable Date") (the forms, statements, certifications, reports and documents filed or furnished since the Applicable Date and those filed or furnished subsequent to the date hereof, including any amendments thereto, the "Company Reports"). Each of the Company Reports, at the time of its filing or being furnished complied or, if not yet filed or furnished, will comply in all material respects with the applicable requirements of the Securities Act and the Exchange Act and any rules and regulations promulgated thereunder applicable to the Company Reports. As of their respective dates (or, if amended prior to the date hereof, as of the date of such amendment), the Company Reports did not, and any Company Reports filed with or furnished to the SEC subsequent to the date hereof will not, contain any untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements made therein, in light of the circumstances in which they were made, not misleading.

(ii) The Company is in compliance in all material respects with the applicable listing and corporate governance rules and regulations of the NYSE.

(iii) Each of the consolidated balance sheets included in or incorporated by reference into the Company Reports (including the related notes and schedules) fairly presents in all material respects, or, in the case of Company Reports filed after the date hereof, will fairly present in all material respects the consolidated financial position of the Company and its consolidated Subsidiaries as of its date and each of the consolidated statements of (loss) income, comprehensive (loss) income, cash flows and equity included in or incorporated by reference into the Company Reports (including any related notes and schedules) fairly presents in all material respects, or, in the case of Company Reports filed after the date hereof, will fairly present in all material respects, the financial position, results of operations and cash flows, as the case may be, of the Company and its consolidated Subsidiaries for the periods set forth therein (subject, in the case of unaudited statements, to notes and year-end adjustments), in each case in accordance with U.S. generally accepted accounting principles ("GAAP") applied consistently during the periods presented, except as may be noted therein.

(iv) The Company maintains internal control over financial reporting (as defined in Rule 13a-15 or 15d-15, as applicable, under the Exchange Act). Such internal control over financial reporting is effective in providing reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP in all material respects. Except as has not had, and would not be reasonably likely to have, individually or in the aggregate, a Company Material Adverse Effect, (A) the Company maintains disclosure controls and procedures required by Rule 13a-15 or 15d-15 under the Exchange Act that are effective to ensure that information required to be disclosed by the Company is recorded and reported on a timely basis to the individuals responsible for the preparation of the Company's filings with the SEC and other public disclosure documents and (B) the Company has disclosed, based on its most recent evaluation prior to the date of this Agreement, to the Company's outside auditors and the audit committee of the board of directors of the Company (1) any significant deficiencies and material weaknesses in the design or operation of internal controls over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that are reasonably likely to adversely affect the Company's ability to record, process, summarize and report financial information and (2) any fraud, known to the Company, whether or not material, that involves management or other employees who have a significant role in the Company's internal controls over financial reporting.

(f) Absence of Certain Changes. Since December 31, 2013, the Company and its Subsidiaries have conducted their respective businesses only in, and have not engaged in any material transaction other than according to, the ordinary and usual course of such businesses and there has not been:

(i) any change, event, occurrence or effect in the financial condition, business or results of operations that, individually or in the aggregate, has had or is reasonably likely to have, a Company Material Adverse Effect;

(ii) any material damage, destruction or other casualty loss with respect to any material asset or property owned, leased or otherwise used by the Company or any of its Subsidiaries, whether or not covered by insurance that, individually or in the aggregate, has had or is reasonably likely to have, a Company Material Adverse Effect;

(iii) other than regular quarterly dividends on Shares, any declaration, setting aside or payment of any dividend or other distribution with respect to any shares of capital stock of the Company or any of its Subsidiaries (except for dividends or other distributions by any direct or indirect wholly-owned Subsidiary to the Company or to any other wholly-owned Subsidiary of the Company);

(iv) any material change in any method of accounting or accounting practice by the Company or any of its Subsidiaries; or

(v) any action taken that, if taken after the date of this Agreement without Parent's consent, would constitute a breach of the covenants set forth in clauses (v), (vii), (viii) or (xiv) of Section 6.1.

(g) Litigation and Liabilities.

(i) There are no civil, criminal or administrative actions, suits, claims, hearings, arbitrations, investigations or other proceedings pending or, to the Knowledge of the Company, threatened against the Company or any of its Subsidiaries that, individually or in the aggregate, has or are reasonably likely to have a Company Material Adverse Effect. Neither the Company nor any of its Subsidiaries is a party to or subject to the provisions of any judgment, order, settlement, writ, injunction, decree or award of any Governmental Entity specifically imposed upon the Company or any of its Subsidiaries which, individually or in the aggregate, has or is reasonably likely to have a Company Material Adverse Effect.

(ii) Neither the Company nor any of its Subsidiaries has any liabilities or obligations of any nature (whether accrued, absolute, contingent or otherwise) required by GAAP to be set forth on a consolidated balance sheet of the Company and its Subsidiaries, other than liabilities and obligations (A) set forth in the Company's consolidated balance sheet (and the notes thereto) included in the Company Reports filed prior to the date of this Agreement, (B) incurred in the ordinary course of business since December 31, 2013, (C) incurred in connection with the Merger or any other transaction or agreement contemplated by this Agreement, or (D) that are not, individually or in the aggregate, reasonably likely to have a Company Material Adverse Effect.

The term "Knowledge" when used in this Agreement with respect to the Company shall mean the actual knowledge of those persons set forth in Section 5.1(g) of the Company Disclosure Letter.

(h) Employee Benefits.

(i) All material benefit and compensation plans, contracts (including employment and consulting contracts), policies or arrangements covering current or former employees, directors or other individual service providers of the Company and its Subsidiaries that are maintained, sponsored or administered by the Company or its Subsidiaries, under which the Company or its Subsidiaries is subject to continuing financial obligations or with respect to which the Company or its Subsidiaries could reasonably be expected to incur any liability, including, but not limited to, "employee benefit plans" within the meaning of Section 3(3) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), and deferred compensation, severance, pension, retirement, bonus, health and welfare, stock option, stock purchase, stock appreciation rights, stock based, and incentive plans (whether or not material, the "Benefit Plans") are listed on Section 5.1(h)(i) of the Company Disclosure Letter. True and complete copies of all Benefit Plans listed on Section 5.1(h)(i) of the Company Disclosure Letter and, as applicable, the most recent actuarial valuation and audit reports, and the IRS determination letter currently in effect have been made available to Parent.

(ii) All Benefit Plans, other than "multiemployer plans" within the meaning of Section 3(37) of ERISA (each, a "Multiemployer Plan") have been established, maintained, funded and administered and are in compliance with their terms, the terms of any applicable collective bargaining agreement, ERISA, the Code and other applicable Laws, except as would not, individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect. No Benefit Plan is a Multiemployer Plan. Each Benefit Plan (other than any Multiemployer Plan) which is subject to ERISA (an "ERISA Plan") that is an "employee pension benefit plan" within the meaning of Section 3(2) of ERISA intended to be qualified under Section 401(a) of the Code, has received a favorable determination or opinion letter from the Internal Revenue Service (the "IRS") or has applied to the IRS for such favorable determination or opinion letter under Section 401(b) of the Code. To the Knowledge of the Company, neither the Company nor any of its Subsidiaries nor any other Person has engaged in a transaction with respect to any ERISA Plan that, assuming the taxable period of such transaction expired as of the date hereof, would reasonably be expected to subject the Company or any Subsidiary to a tax or penalty imposed by either

Section 4975 of the Code or Section 502(i) of ERISA in an amount which would be material.

(iii) Neither the Company nor any of its Subsidiaries has or is reasonably expected to incur any liability under Subtitle C or D of Title IV of ERISA with respect to any ongoing, frozen or terminated "single-employer plan", within the meaning of Section 4001(a)(15) of ERISA, currently or formerly maintained by any of them, or the single-employer plan of any entity which is considered one employer with the Company under Section 4001 of ERISA or Section 414 of the Code (an "ERISA Affiliate"), except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect. The Company and its Subsidiaries have not incurred and do not expect to incur any withdrawal liability with respect to a Multiemployer Plan under Subtitle E of Title IV of ERISA (regardless of whether based on contributions of an ERISA Affiliate) that has not been satisfied, except as would not reasonably be expected, individually or in the aggregate, to have a Company Material Adverse Effect.

(iv) There are no pending or, to the Knowledge of the Company threatened, claims, audits, investigations, proceedings or litigation relating to the Benefit Plans, other than routine claims for benefits, except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect. Other than pursuant to an existing collective bargaining or similar agreement between the Company and any labor union, neither the Company nor any of its Subsidiaries has any obligations for retiree health and life benefits under any ERISA Plan.

(v) Neither the execution of this Agreement, the approval of the Merger by the stockholders of the Company nor the consummation of the Merger will (A) entitle any Designated Officer to severance pay or any material increase in severance pay upon any termination of employment after the date hereof (other than severance pay required by any Law) or (B) accelerate the time of payment or vesting or result in any material payment or funding (through a grantor trust or otherwise) of compensation or benefits under, increase the amount payable or result in any other material obligation pursuant to, any of the Benefit Plans.

(vi) No amount that could be received (whether in cash or property or the vesting of property), as a result of the consummation of the Merger, by any employee, director or other individual service provider of the Company or its Subsidiaries under any Benefit Plan or otherwise would not be deductible by reason of Section 280G of the Code or would be subject to an excise tax under Section 4999 of the Code, except as would not individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect. Neither the Company nor any of its Subsidiaries has any indemnity obligation on or after the Effective Time for any Taxes imposed under Section 4999 or 409A of the Code.

The term "Designated Officer" when used in this Agreement shall mean an "officer" of the Company for purposes of Rule 16a-1(f) under the Exchange Act. Section 5.1(h) of the Company Disclosure Letter contains a correct and complete list of the Designated Officers as of the date of this Agreement.

(i) Compliance with Laws; Licenses. The businesses of each of the Company and its Subsidiaries have not been since the Applicable Date, and are not being, conducted in violation of any federal, state, local or foreign law, statute or ordinance, common law, or any rule, regulation, standard, judgment, order, writ, injunction, decree, arbitration award, agency requirement, license or permit of any Governmental Entity (collectively, "Laws"), except for violations that, individually or in the aggregate, are not reasonably likely to have a Company Material Adverse Effect. Except with respect to regulatory matters covered by Section 6.5, no investigation or review by any Governmental Entity, NERC or PJM with respect to the Company or any of its Subsidiaries is pending or, to the Knowledge of the Company, threatened, nor has any Governmental Entity indicated an intention to conduct the same, except for such investigations or reviews, the outcome of which is not, individually or in the aggregate, reasonably likely to have a Company Material Adverse Effect. The Company and its Subsidiaries each has obtained and is in compliance with all permits, certifications, approvals, registrations, consents, authorizations, franchises, variances, exemptions and orders issued or granted by a Governmental Entity, NERC or PJM ("Licenses") necessary to conduct its business as presently conducted, except those the absence of which would not, individually or in the aggregate, reasonably be expected to have a Company Material Adverse Effect.

(j) Company Material Contracts. Except as has not had (since December 31, 2013) or would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect, (i) neither the Company nor any Subsidiary of the Company is in breach of or default under the terms of any Contract that would be required to be filed by the Company as a "material contract" (as such term is defined in item 601(b)(10) of Regulation S-K of the Securities Act, except for any such Contract that is a Benefit Plan or would be a Benefit Plan but for the word "material" in the definition thereof) (each such Contract a "Company Material Contract"), (ii) as of the date hereof, to the Knowledge of the Company, no other party to any Company Material Contract is in breach of or default under the terms of any Company Material Contract and (iii) each Company Material Contract is a valid and binding obligation of the Company or its Subsidiary that is a party thereto and, to the Knowledge of the Company, is in full force and effect unless terminated in accordance with its terms.

(k) Real Property. Except as would not be reasonably expected to have, individually or in the aggregate, a Company Material Adverse Effect, the Company and its Subsidiaries have either good title, in fee or valid leasehold, easement or other rights, to the land, buildings, wires, pipes, structures and other improvements thereon and fixtures thereto, necessary to permit the Company and its Subsidiaries to conduct their business as currently conducted free and clear of any Liens.

(l) Takeover Statutes. No "fair price," "moratorium," "control share acquisition" or any anti-takeover statute or regulation (each, a "Takeover Statute") or any anti-takeover provision in the Company's certificate of incorporation or bylaws is applicable to the Company, the Shares or the Merger.

(m) Environmental Matters. Except for such matters that, individually or in the aggregate, have not had a Company Material Adverse Effect: (A) the Company and its Subsidiaries are and since the Applicable Date have been in compliance with applicable Environmental Laws; (B) the Company and its Subsidiaries possess all permits, licenses, registrations, identification numbers, authorizations and approvals required under applicable Environmental Laws for the operation of the business as presently conducted; (C) neither the Company nor any Subsidiary has received any written claim, notice of violation or citation concerning any violation or alleged violation of, or liability under, any applicable Environmental Law during the past two years which has not been fully resolved without future obligation; and (D) there are no writs, injunctions, decrees, orders or judgments outstanding, or any judicial actions, suits or proceedings pending or, to the Knowledge of the Company, threatened, concerning compliance by the Company or any Subsidiary with, or liability under, any Environmental Law; and (E) neither the Company nor any Subsidiary has any obligation or liability for the disposal, handling or release of, contamination by, or exposure of any Person to, any Hazardous Substance in violation of any Environmental Laws in the case of (A) or (B) that has given rise to liabilities under any Environmental Laws.

Notwithstanding any other representation or warranty in Article V of this Agreement, the representations and warranties contained in this Section 5.1(m) constitute the sole representations and warranties of the Company relating to any Environmental Law.

As used herein, the term "Environmental Law" means any applicable Law, regulation, code, license, permit, order, judgment, decree or injunction from any Governmental Entity concerning (A) pollution or the protection of the environment (including air, water, soil and natural resources), (B) the use, storage, handling, release or disposal of, or exposure to, Hazardous Substances or (C) public or worker health and safety as it relates to Hazardous Substance exposure, in each case in effect on or prior to Closing.

As used herein, the term "Hazardous Substance" means any substance presently listed, defined, designated or classified as hazardous, toxic, a pollutant, or radioactive under any applicable Environmental Law, including petroleum and any derivative or by-products thereof.

(n) Taxes. Except as would not reasonably be expected to have, individually or in the aggregate, a Company Material Adverse Effect:

(i) The Company and each of its Subsidiaries (A) have prepared in good faith and duly and timely filed (taking into account any extension of time within which to file) all Tax Returns required to be filed by any of them, and all such filed Tax Returns are true, complete and accurate; (B) have paid all Taxes that are shown as due on such filed Tax Returns or that the Company or any of its Subsidiaries are obligated to withhold from amounts owing to any employee, creditor or third party, (C) have adequate accruals and reserves, in accordance with GAAP, on the Company Reports for all Taxes payable by the Company and each of its Subsidiaries for all taxable periods and portions thereof through the date of such Company Reports; (D) have not, since the date of the Company Reports, incurred any liability for Taxes outside the ordinary course of business or otherwise inconsistent with past custom and practice (unless adequate accruals and reserves, in accordance with GAAP, have been established on the Company Reports in advance of, and with respect, to the incurrence of such liability); and (E) have not waived any statute of limitations with respect to any material amount of Taxes or agreed to any extension of time with respect to any material amount of Tax assessment or deficiency.

(ii) As of the date hereof, there are not pending or, to the Knowledge of the Company, threatened in writing, any audits (or other similar proceedings initiated by a Governmental Entity) in respect of Taxes or Tax matters to which the Company is a party.

(iii) Neither the Company nor any of its Subsidiaries is obligated by any written contract, agreement or other agreement to indemnify any other person (other than the Company and its Subsidiaries) with respect to Taxes. Neither the Company, nor any of its Subsidiaries is a party to or bound by any written Tax allocation, indemnification or sharing agreement (other than an agreement with the Company or its Subsidiaries). To the knowledge of the Company, neither the Company nor any of its Subsidiaries is liable under Treasury Regulation Section 1.1502-6 (or any similar provision of the Tax Laws of any state, local or foreign jurisdiction) or as a transferee or successor for any Tax of any person other than the Company and its Subsidiaries.

(iv) Notwithstanding any other representation or warranty in Article V of this Agreement, the representations and warranties contained in this Section 5.1(n) constitute the sole representations and warranties of the Company relating to any Tax, Tax Return or Tax matter.

As used in this Agreement, (A) the term "Tax" (including, with correlative meaning, the term "Taxes") includes all federal, state, local and foreign income, profits, franchise, gross receipts, environmental, customs duty, capital stock, severances, stamp, payroll, sales, employment, unemployment, disability, use, property, withholding, excise, production, value added, occupancy and other taxes, duties or assessments of any nature whatsoever, together with all interest, penalties and additions imposed with respect to such amounts and any interest in respect of such penalties and additions, and (B) the term "Tax Return" includes all returns and reports (including elections, declarations, disclosures, schedules, estimates and information returns) required to be supplied to a Tax authority relating to Taxes.

(o) Labor Matters. As of the date of this Agreement: (i) neither the Company nor any of its Subsidiaries is a party to or otherwise bound by any collective bargaining agreement or other Contract with a labor union or labor organization (a "CBA"), nor is the Company or any of its Subsidiaries the subject of any material proceeding asserting that the Company or any of its Subsidiaries has committed an unfair labor practice or seeking to compel it to bargain with any labor union or labor organization and (ii) there is no pending or, to the Knowledge of the Company, threatened, labor strike, dispute, walk-out, work stoppage or lockout involving the Company or any of its Subsidiaries, except in either case of clause (i) or (ii) as would not be reasonably likely to have, individually or in the aggregate, a Company Material Adverse Effect.

(p) Intellectual Property. (i) To the Knowledge of the Company, (A) the Company and its Subsidiaries have sufficient rights to use all material Intellectual Property used in its business as presently conducted, and (B) no person is violating any material Intellectual Property owned by the Company except as would not be reasonably likely to have, individually or in the aggregate, a Company Material Adverse Effect.

(ii) For purposes of this Agreement, the following term has the following meaning:

"Intellectual Property" means any intellectual property, including trademarks, service marks, Internet domain names, logos, trade dress, trade names, and all goodwill associated therewith and symbolized thereby, inventions, discoveries, patents, processes, technologies, confidential information, trade secrets, know-how, copyrights and copyrightable works, software, databases and related items.

(q) Insurance. All material fire and casualty, general liability, director and officer, business interruption, product liability, and sprinkler and water damage insurance policies maintained by the Company or any of its Subsidiaries ("Insurance Policies") are in full force and effect and all premiums due with respect to all Insurance Policies have been paid as of the date of this Agreement, with such exceptions that, individually or in the aggregate, are not reasonably likely to have a Company Material Adverse Effect.

(r) Regulatory Matters.

(i) The Company is not subject to regulation as an "electric utility" or a "gas utility", a "public utility" or "utility" under applicable state Law. Each of Atlantic City Electric Company, Delmarva Power & Light Company and Potomac Electric Power Company is a "public utility" under and as defined in the Federal Power Act and as such each is subject to regulation thereunder. Atlantic City Electric Company is also regulated as a "public utility" under New Jersey state

Law; Delmarva Power & Light Company is also regulated as a "public utility" under Delaware state Law and Virginia state Law and as an "electric company" under Maryland state Law; and Potomac Electric Power Company is also regulated as a "public utility" under the Laws of the District of Columbia, and as an "electric company" under Maryland state Law, and as a "public utility" under Virginia state Law. Pepco Energy Services is licensed as a retail electricity supplier in the jurisdictions set forth on Section 5.1(r) of the Company Disclosure Letter and is subject to the regulations generally applicable to retail electricity suppliers operating in those jurisdictions. Except for regulation of the Company and its Subsidiaries as set forth in this Section, neither the Company nor any of its Subsidiaries is subject to regulation as a public utility or public service company (or similar designation) by the FERC, any state in the United States or in any foreign nation.

(ii) Except for the Rate Cases, neither the Company nor any of its Subsidiaries (A) has rates which have been or are being collected subject to refund, pending final resolution of any proceedings pending before a Governmental Entity or on appeal to the courts, or (B) is a party (solely with respect to the business of the Company and its Subsidiaries) to any proceeding before a Governmental Entity or on appeal from orders of a Governmental Entity, in each case which individually or in the aggregate, has had or is reasonably likely to have a Company Material Adverse Effect.

(s) Brokers and Finders. Neither the Company nor any of its officers, directors or employees has employed any broker or finder or incurred any liability for any brokerage fees, commissions or finders' fees in connection with the Merger other than Lazard Frères & Co. LLC and Morgan Stanley & Co. LLC.

5.2. Representations and Warranties of Parent and Merger Sub. Except as set forth in any forms, statements, certifications, reports or documents filed with or furnished to the SEC by Parent prior to the date hereof, or the corresponding sections or subsections of the disclosure letter delivered to the Company by Parent prior to entering into this Agreement (the "Parent Disclosure Letter") (it being agreed that disclosure of any item in any section or subsection of the Parent Disclosure Letter shall be deemed disclosure with respect to any other section or subsection to which the relevance of such item is reasonably apparent), Parent and Merger Sub each hereby represent and warrant to the Company that:

(a) Organization, Good Standing and Qualification. Each of Parent and Merger Sub is a legal entity duly organized, validly existing and in good standing under the Laws of its respective jurisdiction of organization and has all requisite corporate or similar power and authority to own, lease and operate its properties and assets and to carry on its business as presently conducted and is qualified to do business and is in good standing as a foreign corporation in each jurisdiction where the ownership, leasing or operation of its assets or properties or conduct of its business requires such qualification, except where the failure to be so organized, qualified or in such good standing, or to have such power or authority, would not, individually or in the aggregate, reasonably be expected to prevent, materially delay or impair the ability of Parent and Merger Sub to consummate the Merger and the other transactions contemplated by this Agreement. Parent has made available to the Company a complete and correct copy of the certificate of incorporation and bylaws or comparable governing documents of Parent and Merger Sub, each as in effect on the date of this Agreement.

(b) Corporate Authority. No vote of holders of capital stock of Parent is necessary to approve this Agreement and the Merger and the other transactions contemplated hereby. Each of Parent and Merger Sub has all requisite corporate power and authority and has taken all corporate action necessary in order to execute, deliver and perform its obligations under this Agreement, subject only to the adoption of this Agreement by Parent as the sole stockholder of Merger Sub, which will occur immediately following the execution of this Agreement, and to consummate the Merger. This Agreement has been duly executed and delivered by each of Parent and Merger Sub and is a valid and binding agreement of Parent and Merger Sub, enforceable against each of Parent and Merger Sub in accordance with its terms, subject to the Bankruptcy and Equity Exception.

(c) Governmental Filings and Approvals; No Violations; Etc.

(i) Other than the filings, approvals and/or notices (A) pursuant to Section 1.3, (B) under the HSR Act, (C) under the Exchange Act, (D) under stock exchange rules, (E) with the FERC under the Federal Power Act (the "Parent FERC Approval") and (F) the State Approvals (collectively, the "Parent Approvals"), no notices, reports or other filings are required to be made by Parent or Merger Sub with, nor are any consents, registrations, approvals, permits or authorizations required to be obtained by Parent or Merger Sub from, any Governmental Entity in connection with the execution, delivery and performance of this Agreement by Parent and Merger Sub and the consummation by Parent and Merger Sub of the Merger and the other transactions contemplated hereby, except those, the failure to make or obtain are not, individually or in the aggregate, reasonably likely to have a material adverse effect on Parent and its subsidiaries, taken as a whole, or prevent, materially delay or materially impair the ability of Parent and Merger Sub to consummate the Merger and the other transactions contemplated by this Agreement.

(ii) The execution, delivery and performance of this Agreement by Parent and Merger Sub do not, and the consummation by Parent and Merger Sub of the Merger and the other transactions contemplated hereby will not, constitute or result in (A) a breach or violation of, or a default under, the certificate of incorporation, certificate of formation or bylaws or comparable governing documents of Parent or Merger Sub or the comparable governing instruments of any of its Subsidiaries; (B) with or without notice, lapse of time or both, a breach or violation of, a termination (or right of termination) or a default under, the creation or acceleration of any obligations or the creation of a Lien on any of the assets of Parent or any of its Subsidiaries pursuant to, any Contracts binding upon Parent or any of its Subsidiaries or any Laws or governmental or non-governmental permit or license to which Parent or any of its Subsidiaries is subject; or (C) any change in the rights or obligations of any party under any of such Contracts, except, in the case of clause (B) or (C) above, for any breach, violation, termination, default, creation, acceleration or change that would not, individually or in the aggregate, reasonably be expected to prevent or materially delay the ability of Parent or Merger Sub to consummate the Merger and the other transactions contemplated by this Agreement.

(d) Litigation. There are no civil, criminal or administrative actions, suits, claims, hearings, investigations or proceedings pending or, to the Knowledge of Parent, threatened against Parent or Merger Sub by or before any Governmental Entity that seek to enjoin, or would reasonably be expected to have the effect of preventing, making illegal, or otherwise interfering with, any of the transactions contemplated by this Agreement, except as would not, individually or in the aggregate, reasonably be expected to prevent or materially delay the ability of Parent and Merger Sub to consummate the Merger and the other transactions contemplated by this Agreement.

The term "Knowledge" when used in this Agreement with respect to Parent shall mean the actual knowledge of the Chief Executive Officer, Chief Financial Officer and General Counsel.

(e) Available Funds. Parent and Merger Sub will have available to them on or before the Effective Time all funds necessary for the payment to the Paying Agent of the aggregate Per Share Merger Consideration and to satisfy all of their obligations under this Agreement, including amounts payable under Section 4.3. Parent currently has available to it all funds necessary for the payment to the Company of the aggregate consideration payable for the Nonvoting Preferred Stock to be issued, sold and delivered by the Company to Parent on the date hereof pursuant to the Subscription Agreement.

(f) Capitalization of Merger Sub. The authorized capital stock of Merger Sub consists solely of 1,000 shares of common stock, par value $0.01 per share, all of which are validly issued and outstanding. All of the issued and outstanding capital stock of Merger Sub is, and at the Effective Time will be, owned by Parent or a direct or indirect wholly-owned Subsidiary of Parent. Merger Sub has not conducted any business prior to the date hereof and has no, and prior to the Effective Time will have no, assets, liabilities or obligations of any nature other than those incident to its formation and pursuant to this Agreement and the Merger and the other transactions contemplated by this Agreement.

(g) Regulatory Matters. Each of Parent's Subsidiaries that engages in the sale of electricity at wholesale (other than any such Subsidiaries that own one or more facilities that constitute a "qualifying facility" as such term is defined under the Public Utility Regulatory Policies Act of 1978 and the rules and regulations of FERC that are entitled to exemption from regulation under Section 205 of the Federal Power Act) is regulated as a "public utility" under the Federal Power Act and has market-based rate authorization to make such sales at market-based rates. Each of Parent's Subsidiaries that directly owns generating facilities and operates their power generation facilities is in compliance with all applicable standards of NERC, other than non-compliance that would not reasonably be expected to prevent, materially delay or impair Parent from consummating the Merger and the other transactions contemplated by the Agreement or have, individually or in the aggregate, a material impact on Parent. There are no pending, or to the Knowledge of Parent, threatened, judicial or administrative proceedings (i) that would reasonably be expected to interfere with Parent's timely receipt of the Regulatory Approvals or (ii) that would revoke a Parent's Subsidiary's market-based rate authorization.

(h) Foreign Ownership, Control or Influence. Each officer and manager of Parent is a U.S. citizen, and to the Knowledge of Parent, none of the holders owning 5% or more of Parent's equity interests is, or is controlled by, a foreign Person or entity.

(i) Brokers. No agent, broker, finder or investment banker is entitled to any brokerage, finder's or other fee or commission in connection with the transactions contemplated by this Agreement based upon arrangements made by or on behalf of Parent or Merger Sub for which the Company could have any liability.

(j) Non-Reliance on Company Estimates, Projections, Forecasts, Forward-Looking Statements and Business Plans. In connection with the due diligence investigation of the Company by Parent and Merger Sub, Parent and Merger Sub have received and may continue to receive from the Company certain estimates, projections, forecasts and other forward-looking information, as well as certain business plan and cost-related plan information, regarding the Company, its Subsidiaries and their respective businesses and operations. Parent and Merger Sub hereby acknowledge that there are uncertainties inherent in attempting to make such estimates, projections, forecasts and other forward-looking statements, with which Parent and Merger Sub are familiar, that Parent and Merger Sub are taking full responsibility for making their own evaluation of the adequacy and accuracy of all estimates, projections, forecasts and other forward-looking information, as well as such business plans and cost-related plans, so furnished to them (including the reasonableness of the assumptions underlying such estimates, projections, forecasts, forward-looking information, business plans or cost-related plans), and that Parent and Merger Sub will have no claim against the Company or any of its Subsidiaries, or any of their respective stockholders, directors, officers, employees, Affiliates, advisors, agents or representatives, or any other Person, with respect thereto. Accordingly, Parent and Merger Sub hereby acknowledge that neither the Company nor any of its Subsidiaries, nor any of their respective stockholders, directors, officers, employees, Affiliates, advisors, agents or representatives, nor any other Person, has made or is making any representation or warranty with respect to such estimates, projections, forecasts, forward-looking statements, business plans or cost-related plans (including the reasonableness of the assumptions underlying such estimates, projections, forecasts, forward-looking statements, business plans or cost-related plans).

ARTICLE VI

Covenants

6.1. Interim Operations.

(a) The Company covenants and agrees as to itself and its Subsidiaries that, after the date hereof and prior to the Effective Time (unless Parent shall otherwise approve in writing (such approval not to be unreasonably withheld, delayed or conditioned)), and except as otherwise expressly permitted by this Agreement or as required by a Governmental Entity or applicable Laws, the business of it and its Subsidiaries shall be conducted in all material respects in the ordinary course and, to the extent consistent with the foregoing, the Company and its Subsidiaries shall use their respective commercially reasonable efforts to preserve their business organizations substantially intact, maintain satisfactory relationships with Governmental Entities, NERC, PJM, customers and suppliers having significant business dealings with them and keep available the services of their key employees; provided, however, that no action taken by the Company or its Subsidiaries with respect to matters specifically addressed by clauses (i)-(xx) of this Section 6.1(a) shall be deemed a breach of this sentence unless such action would constitute a breach of such other provision. In furtherance of the foregoing, from the date of this Agreement until the Effective Time, except (A) as otherwise expressly permitted by this Agreement, (B) as Parent may approve in writing (such approval not to be unreasonably withheld, delayed or conditioned), (C) as is required by applicable Law or any Governmental Entity or (D) as set forth in Section 6.1(a) of the Company Disclosure Letter, the Company will not and will not permit its Subsidiaries to:

(i) adopt any change in its certificate of incorporation or bylaws or other applicable governing instruments;

(ii) merge or consolidate the Company or any of its Subsidiaries with any other Person or restructure, reorganize or completely or partially liquidate the Company or any of its Subsidiaries, except for any such transactions among wholly-owned Subsidiaries of the Company;

(iii) acquire (including by merger, consolidation or acquisition of equity interests or assets or any other business combination) (A) any other Person or any organization or division of any other Person or (B) any assets outside of the ordinary course of business, other than acquisitions (1) pursuant to Contracts in effect as of the date of this Agreement (copies of which have been made available to Parent), (2) made in connection with any transaction solely between the Company and a wholly-owned Subsidiary of the Company or between wholly-owned Subsidiaries of the Company or (3) that would be permissible under clause (ix) below;

(iv) issue, sell, pledge, dispose of, grant, transfer, encumber, or authorize the issuance, sale, pledge, disposition, grant, transfer, lease, license, guarantee or encumbrance of, any shares of capital stock or other equity interests of the Company or any of its Subsidiaries (other than (A) the issuance of Shares upon the vesting, exercise or settlement of Company RSUs, Company PSUs, and Company Awards (and dividend equivalents thereon, if applicable) or (B) the issuance of shares by a wholly-owned Subsidiary of the Company to the Company or another wholly-owned Subsidiary), or securities convertible or exchangeable into or exercisable for any shares of such capital stock or other equity interests, or any options, warrants or other rights of any kind to acquire any shares of such capital stock or such convertible or exchangeable securities;

(v) make any loans, advances or capital contributions to or investments in any Person (other than among the Company and any direct or indirect wholly-owned Subsidiary of the Company or among the Company's wholly-owned subsidiaries) in excess of $10,000,000 in the aggregate other than loans, advances, capital contributions or investments made in the ordinary course of business;

(vi) declare, set aside, make or pay any dividend or other distribution, payable in cash, stock, property or otherwise, with respect to any of its capital stock (except for (A) regular quarterly dividends paid to holders of Shares in an amount and on a schedule consistent with the Company's past practices and not in excess of $0.27 per Share per quarter, (B) a "stub period" dividend to stockholders of record as of immediately prior to the Effective Time equal to the product of (x) the number of days from the record date for payment of the last quarterly dividend paid by the Company prior to the Effective Time through and including immediately prior to the Effective Time and (y) a daily dividend rate determined by dividing the amount of the last quarterly dividend prior to the Effective Time by ninety-one (91), and (C) dividends paid by any direct or indirect wholly-owned Subsidiary to the Company or to any other direct or indirect wholly-owned Subsidiary) or enter into any agreement with respect to the voting of its capital stock;

(vii) except for transactions among the Company and its wholly-owned Subsidiaries or among the Company's wholly-owned Subsidiaries, reclassify, split, combine, subdivide or redeem, purchase or otherwise acquire, directly or indirectly, any of its capital stock or securities convertible or exchangeable into or exercisable for any shares of its capital stock (other than the retention or acquisition of any Shares tendered by current or former employees or directors in order to pay Taxes in connection with the vesting, exercise or settlement of Company RSUs, Company PSUs, and Company Awards (and dividend equivalents thereon, if applicable));

(viii) incur, assume or otherwise become liable for any indebtedness for borrowed money or guarantee such indebtedness of another Person (other than of a wholly-owned Subsidiary of the Company), or issue or sell any debt securities or warrants or other rights to acquire any debt security of the Company or any of its Subsidiaries, other than (A) in the ordinary course of business (including to fund expenditures permissible under clauses (iii), (v) and (ix) of this Section 6.1(a)) or (B) other indebtedness in an aggregate principal amount not to exceed $50,000,000 outstanding at any time;

(ix) except for expenditures related to operational emergencies, equipment failures or outages make or authorize any capital expenditure in excess of $100,000,000 in the aggregate during any calendar year;

(x) make any material changes with respect to financial accounting policies or procedures, except as required by GAAP;

(xi) other than with respect to Rate Cases and the regulatory approval process, which are addressed in Section 6.5 and Transaction Litigation, which is addressed in Section 6.14, settle, release, waive or compromise any litigation claim, or other pending or threatened proceedings by or before a Governmental Entity if such settlement, release, waiver or compromise (A) with respect to the payment of monetary damages, involves the payment by the Company or any of its Subsidiaries of monetary damages that together with all other settlements, releases, waivers or compromises by the Company or any of its Subsidiaries exceed $50,000,000 individually or in the aggregate during any calendar year, net of any amount covered by insurance or third-party indemnification or (B) with respect to any non-monetary terms and conditions therein, imposes or requires actions that would or would be reasonably likely to have a material effect on the continuing operations of the Company or any of its Subsidiaries or Parent or any of its Subsidiaries after the Closing;

(xii) other than with respect to the Rate Cases, initiate, file or pursue any rate cases, or make any public announcement regarding an intent to file any rate cases;

(xiii) fail to make any regulatory filings required by Law, other than those regulatory filings that are otherwise addressed by this Agreement, except to the extent such failure would not have a material adverse effect on the continuing operations of the Company or any of its Subsidiaries or Parent or any of its Subsidiaries after the Closing;

(xiv) make, revoke or amend any material Tax election, enter into any closing agreement, settlement or compromise of any claim or assessment with respect to any material Tax liability (unless such closing agreement, settlement or compromise is not materially greater than the reserves established in accordance with GAAP in respect of the claim or assessment that is the subject of such closing agreement, settlement or compromise), amend any material Tax Return, surrender a claim for a material refund of Taxes or consent to any extension or waiver of the statute of limitations period applicable to any material Tax claim or assessment;

(xv) transfer, sell, lease, license, mortgage, pledge, surrender, encumber, divest, cancel, abandon or allow to lapse or expire or otherwise dispose of any material amount of assets, product lines or businesses of the Company or its Subsidiaries, including capital stock of any of its Subsidiaries, other than sales and dispositions of inventory, supplies and other assets (A) in the ordinary course of business or (B) pursuant to Contracts in effect prior to the date of this Agreement (copies of which have been made available to Parent);

(xvi) except as required pursuant to Contracts or Benefit Plans in effect prior to the date of this Agreement (including the Company Change in Control Severance Plan), (A) grant any equity awards, or grant or provide any material severance or material termination payments or benefits to any executive employee of the Company or its Subsidiaries who have individual employment agreements with severance or termination provisions or who participate in the Change of Control Severance Plan ("Executive Employees"), (B) accelerate or materially increase the compensation or employee benefits of any Executive Employee, except for annual merit-based or promotion-based pay increases in the ordinary course of business, (C) establish, adopt, terminate or materially amend any Benefit Plan (other than routine changes to welfare plans or any changes to Benefit Plans that would not result in more than a de minimis increase to the Company's costs under such Benefit Plans), including any severance benefit plan or (D) accelerate or materially increase the compensation of other employees of the Company or its Subsidiaries, except for (1) merit-based or promotion-based pay increases in the ordinary course of business, (2) acceleration or increases required by any CBA, or (3) any acceleration or increase done after consultation with Parent;

(xvii) enter into any Company Material Contract that contains a change of control or similar provision that would require a payment to any Person counterparty thereto in connection with the consummation of the Merger that would not otherwise be due;

(xviii) grant or incur any new Lien material to the Company and its Subsidiaries, other than (A) pledges or deposits by the Company or any of its Subsidiaries in the ordinary course of business under workmen's compensation Laws, unemployment insurance Laws or similar Laws; (B) good faith deposits in connection with Contracts (other than for the payment of indebtedness) to which the Company or one of its Subsidiaries is a party, or (C) in connection with securing indebtedness permitted to be incurred under the terms of this Agreement by granting or incurring Liens on the assets of the utility Subsidiaries of the Company, in each case, in the ordinary course of business; or

(xix) agree, authorize or commit to do any of the foregoing.

(b) Nothing contained in this Agreement is intended to give Parent, directly or indirectly, the right to control or direct the Company's or its Subsidiaries' operations prior to the Effective Time, and nothing contained in this Agreement is intended to give the Company, directly or indirectly, the right to control or direct Parent's or its Subsidiaries' operations. Prior to the Effective Time, each of Parent and the Company shall exercise, consistent with the terms and conditions of this Agreement, complete control and supervision over its and its Subsidiaries' respective operations.

6.2. Acquisition Proposals.

(a) No Solicitation or Negotiation. The Company agrees that except as expressly permitted by this Section 6.2, neither it nor any of its Subsidiaries, nor any of its or their respective directors, officers or employees, shall, and that it shall instruct and use its reasonable best efforts to cause its and its Subsidiaries' investment bankers, attorneys, accountants and other advisors and representatives not to (such investment bankers, attorneys, accountants and other advisors and representatives, collectively, "Representatives"), directly or indirectly:

(i) initiate, solicit or encourage any inquiries or the making of any proposal or offer that constitutes, or could reasonably be expected to lead to, any Acquisition Proposal;

(ii) engage in, continue or otherwise participate in any discussions or negotiations regarding, or provide any non-public information or data to any Person relating to, or that could reasonably be expected to lead to, any Acquisition Proposal;

(iii) facilitate knowingly any effort or attempt to make an Acquisition Proposal;

(iv) grant any waiver, amendment or release under any standstill agreement, or otherwise fail to enforce any standstill agreement (other than in each case, the right to waive or fail to enforce any prohibition on requests for amendments to any standstill agreement (or other similar "don't ask, don't waive" provisions) with any Person who, or any of whose Affiliates, did not submit an Acquisition Proposal between April 1, 2014 and the date of this Agreement); provided, however, that the Company shall not be prohibited from taking (or, in the case of enforcement, shall not be required to take) any such action if the board of directors of the Company shall have determined in good faith, after consultation with outside legal counsel, that failing to take such action (or in the case of enforcement, taking such action) would be reasonably likely to be inconsistent with the directors' fiduciary duties under applicable Law;

(v) execute or enter into any letter of intent, agreement in principle, term sheet, memorandum of understanding, merger agreement, acquisition agreement or other similar agreement relating to an Acquisition Proposal (other than an Acceptable Confidentiality Agreement) (an "Alternative Acquisition Agreement"); or

(vi) resolve or agree to do any of the foregoing.

(b) Notwithstanding anything in the foregoing to the contrary, prior to the time, but not after, the Company Requisite Vote is obtained, the Company may (A) provide information in response to a request therefor by a Person who has made an unsolicited *bona fide* written Acquisition Proposal if prior to providing such information the Company receives from the Person so requesting such information an executed confidentiality agreement on terms that are not less restrictive to the other party than those contained in the Confidentiality Agreement, it being understood that such confidentiality agreement need not prohibit the making, or amendment, of an Acquisition Proposal (an "Acceptable Confidentiality Agreement"); and promptly discloses (and, if applicable, provides copies of) any such information to Parent to the extent not previously disclosed or provided; (B) engage or participate in any discussions or negotiations with any Person who has made such an unsolicited *bona fide* written Acquisition Proposal; or (C) after having complied with Section 6.2(d), make a Change of Recommendation or approve, recommend, or otherwise declare advisable or propose to approve, recommend or declare advisable (publicly or otherwise) with respect to such Acquisition Proposal; if and only to the extent that, (x) prior to taking any action described in clause (A), (B) or (C) above, the board of directors of the Company shall have determined in good faith, after consultation with its outside legal counsel, that failure to take such action would be reasonably likely to be inconsistent with the directors' fiduciary duties under applicable Law, (y) in each case referred to in clause (A) and (B), the board of directors of the Company shall have determined in good faith, after consultation with its financial advisors and outside legal counsel, that such Acquisition Proposal either constitutes a Superior Proposal or is reasonably likely to result in a Superior Proposal, and (z) in the case referred to in clause (C) above, the board of directors of the Company determines in good faith (after consultation with its financial advisor and outside legal counsel) that such Acquisition Proposal is a Superior Proposal.

(c) Definitions. For purposes of this Agreement:

"Acquisition Proposal" means (i) any proposal or offer with respect to a merger, joint venture, partnership, consolidation, dissolution, liquidation, tender offer, recapitalization, reorganization, share exchange, business combination or similar transaction involving the Company and/or any of its Significant Subsidiaries or (ii) any direct or indirect acquisition by any Person or "group" (as defined in the Exchange Act) resulting in, or proposal or offer, which if consummated would result in, any Person or "group" (as defined in the Exchange Act) becoming the beneficial owner, directly or indirectly, in one or a series of related transactions, of 15% or more of the total voting power or of any class of equity securities of the Company, or assets representing 15% or more of the net revenues, net income or consolidated total assets (measured by fair market value) of the Company and its Subsidiaries, taken as a whole (including equity securities of its Subsidiaries), in each case other than the Merger.

"Superior Proposal" means a *bona fide* Acquisition Proposal (for purposes of this definition, replacing all references in the definition of "Acquisition Proposal" to 15% with 75%), that the board of directors of the Company has determined in its good faith judgment is reasonably likely to be consummated in accordance with its terms, after consultation with its financial advisors and outside legal counsel, taking into account all legal, financial, and regulatory aspects of the Acquisition Proposal, and the Person making the Acquisition Proposal, and, if consummated would result in a transaction more favorable to the Company's stockholders from a financial point of view than the transaction contemplated by this Agreement (after taking into account any proposed revisions to the terms of the transactions contemplated by Section 6.2(d) of this Agreement).

(d) No Change in Recommendation or Alternative Acquisition Agreement. The board of directors of the Company and each committee of the board of directors shall not:

(i) (A) withhold, withdraw, qualify or modify (or publicly propose or resolve to withhold, withdraw, qualify or modify), in a manner adverse to Parent, the Company Recommendation (B) fail to include the Company Recommendation in the Proxy Statement, (C) approve, recommend or otherwise declare advisable or propose or resolve to approve, recommend or otherwise declare advisable (publicly or otherwise), any Acquisition Proposal, or (D) fail to publicly reaffirm the Company Recommendation within ten business days after Parent so requests in writing (provided, that Parent shall be entitled to make such a written request for reaffirmation only once for each Acquisition Proposal and once for each material amendment to such Acquisition Proposal) (any action described in clauses (A) and (D) a "Change of Recommendation"); or

(ii) Except as expressly permitted by, and after compliance with this Section 6.2(d), cause or permit the Company to enter into any Alternative Acquisition Agreement.

Notwithstanding anything to the contrary set forth in this Agreement, prior to the time, but not after, the Company Requisite Vote is obtained, the board of directors of the Company (x) may make a Change of Recommendation and in connection therewith, approve, recommend or otherwise declare advisable, and enter into an Alternative Acquisition Agreement in connection with a Superior Proposal made after the date of this Agreement (if such Superior Proposal did not result from a material breach of Section 6.2(a) and such Superior Proposal is not withdrawn) or (y) may make a Change of Recommendation as a result of the occurrence of an Intervening Event, if, the board of directors of the Company determines in good faith, after consultation with its outside legal counsel, that failure to do so would be reasonably likely to be inconsistent with the directors' fiduciary duties under applicable Law; provided, however, that the board of directors of the Company shall not (i) in the case of clause (x) make a Change of Recommendation with respect to a Superior Proposal and authorize the Company to enter into any Alterative Acquisition Agreement or (ii) in the case of clause (y) make a Change of Recommendation unless:

(i) the Company has notified Parent in writing that it intends to effect a Change of Recommendation, describing in reasonable detail the reasons for such Change of Recommendation (a "Recommendation Change Notice") (it being agreed that the Recommendation Change Notice and any amendment or update to such notice and the determination to so deliver such notice, or update or amend public disclosures with respect thereto shall not constitute a Change of Recommendation for purposes of this Agreement), and if such proposed Change of Recommendation relates to an Acquisition Proposal, has provided copies of the most current version of all documents relating to such Acquisition Proposal, and if such proposed Change of Recommendation relates to an Intervening Event, such Recommendation Change Notice specifies the facts and circumstances of such Intervening Event; and

(ii) (x) if requested by Parent, the Company shall have made its Representatives available to discuss and negotiate in good faith with Parent and its Representatives any proposed modifications to the terms and conditions of this Agreement during the three business days following the date on which the Recommendation Change Notice is delivered to Parent and (y) if Parent shall have delivered to the Company a written, binding and irrevocable offer to alter the terms or conditions of this Agreement during such three business day period, the board of directors of the Company shall have determined in good faith after consultation with its financial advisors and outside legal counsel, after considering the terms of such offer by Parent, that the failure to effect a Change of Recommendation would be reasonably likely to be inconsistent with its fiduciary duties under applicable Law, and that in the case of a Change of Recommendation with respect to an Acquisition Proposal, such Acquisition Proposal would continue to constitute a Superior Proposal if the changes offered by Parent were given effect, and that in the case of an Intervening Event, the board of directors of the Company still intends to effect a Change of Recommendation if the changes offered by Parent were given effect; provided that in the event the Acquisition Proposal is thereafter modified by the party making such Acquisition Proposal, the Company shall notify Parent in writing of such modified Acquisition Proposal and shall again comply with the requirements of this clause (ii).

"Intervening Event" shall mean any change, event or occurrence that is (a) unknown to or by the board of directors of the Company as of the date of this Agreement (or if known, the magnitude or material consequences of which were not known or understood by the board of directors of the Company as of the date of this Agreement) and (b) becomes known to or by the board of directors of the Company prior to obtaining the Company Requisite Vote.

(e) Certain Permitted Disclosure. Nothing contained in this Section 6.2 shall be deemed to prohibit the Company or the board of directors of the Company from (i) complying with its disclosure obligations under U.S. federal or state Law with regard to an Acquisition Proposal, including taking and disclosing to its stockholders a position contemplated by Rule 14d-9 or Rule 14e-2(a) under the Exchange Act (or any similar communication to stockholders); or (ii) making any "stop, look and listen" communication to the stockholders of the Company pursuant to Rule 14d-9(f) under the Exchange Act.

(f) Existing Discussions. The Company agrees that it and its Subsidiaries will, and that it will instruct and use its reasonable best efforts to cause its and its Subsidiaries' Representatives to immediately cease and cause to be terminated any existing activities, discussions or negotiations with any parties conducted heretofore with respect to any Acquisition Proposal. The Company agrees that it will take the necessary steps to promptly inform the individuals or entities referred to in the first sentence hereof of the obligations undertaken in this Section 6.2.

(g) Notice. The Company agrees that it will promptly (and, in any event, within 24 hours) notify Parent if any proposals or offers with respect to an Acquisition Proposal are received by, any non-public information is requested from, or any discussions or negotiations are sought to be initiated or continued with, the Company or any of its Representatives indicating, in connection with such notice, the identity of the Person or group of Persons making the proposal, offer or request and the material terms and conditions of any proposals or offers (including, if applicable, copies of any written requests, proposals or offers, including proposed agreements) and thereafter shall keep Parent reasonably informed, on a prompt basis (and, in any event, within 24 hours), of the status and terms of any such proposals or offers (including any material amendments thereto or any change to the scope or material terms or conditions thereof, and including copies of additional written materials or material modifications thereof) and the status of any such discussions or negotiations, including any change in the Company's intentions as previously notified.

6.3. Proxy Statement.

(a) The Company shall, as promptly as practicable after the date of this Agreement (and in any event within 30 business days following the date of this Agreement), prepare and file a proxy statement in preliminary form relating to the Stockholders Meeting (such proxy statement, including any amendment or supplement thereto, the "Proxy Statement") with the SEC. The Company agrees that as of the date of mailing to stockholders of the Company and at the time of the Stockholders Meeting, (i) the Proxy Statement will comply in all material respects with the applicable provisions of the Exchange Act and the rules and regulations thereunder and (ii) none of the information supplied by it or any of its Subsidiaries for inclusion or incorporation by reference in the Proxy Statement will contain any untrue statement of a material fact or omit to state any material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading. Parent and Merger Sub agree that none of the information supplied by either of them or any of their Affiliates for inclusion in the Proxy Statement will contain any untrue statement of a material fact or omit to state any material fact required to be stated therein or necessary in order to make the statements therein, in light of the circumstances under which they were made, not misleading.

(b) The Company shall promptly notify Parent of the receipt of all comments from the SEC with respect to the Proxy Statement and of any request by the SEC for any amendment or supplement thereto or for additional information and shall promptly provide to Parent copies of all correspondence between the Company and/or any of its Representatives and the SEC with respect to the Proxy Statement. The Company and Parent shall each use its reasonable best efforts to promptly provide responses to the SEC with respect to all comments received on the Proxy Statement from the SEC. The Company shall cause the definitive Proxy Statement to be mailed promptly after the date the SEC staff advises that it has no further comments thereon or that the Company may commence mailing the Proxy Statement.

6.4. Stockholders Meeting. Subject to fiduciary obligations under applicable Law, the Company will take, in accordance with applicable Law and its certificate of incorporation and bylaws, all reasonable action necessary to convene a meeting of holders of Shares (the "Stockholders Meeting") as promptly as practicable (but in any event within 60 days) after the date on which the SEC staff advises that it has no further comments thereon or that the Company may commence mailing the Proxy Statement to consider and vote upon the adoption of this Agreement; provided, that the Company shall not postpone, recess or adjourn such meeting except (a) to the extent required by Law, (b) to allow reasonable additional time for the filing and/or mailing of any supplemental or amended disclosure that the board of directors of the Company has determined in good faith after consultation with outside legal counsel is necessary under applicable Law and for such supplemental or amended disclosure to be disseminated and reviewed by the Company's stockholders prior to the Stockholders Meeting, or (c) one adjournment for a period of up to 10 days only to solicit additional proxies so as to establish a quorum or to obtain the Company Requisite Vote, with the consent of Parent (such consent not to be unreasonably withheld, conditioned or delayed). Subject to Section 6.2, the board of directors of the Company and any committee thereof shall recommend such adoption and, unless and until there has been a Change of Recommendation, shall include the Company Recommendation in the Proxy Statement and take all reasonable lawful action to solicit such adoption of this Agreement. Notwithstanding any Change of Recommendation, unless this Agreement is terminated pursuant to Article VIII, this Agreement shall be submitted to the holders of Shares at the Stockholders Meeting for the purpose of adopting this Agreement.

6.5. Filings; Other Actions; Notification.

(a) Cooperation. Subject to the terms and conditions set forth in this Agreement, including Section 6.5(e) below, the Company and Parent shall cooperate with each other and use (and shall cause their respective Subsidiaries to use) their respective reasonable best efforts to take or cause to be taken all actions, and do or cause to be done all things, reasonably necessary, proper or advisable on its part under this Agreement and applicable Laws to consummate and make effective the Merger as soon as practicable, including preparing and filing as promptly as practicable (and in any event shall make all filings with the State Commissions, the FERC, the FCC and pursuant to the HSR Act within 60 days of the date hereof) all documentation to effect all necessary notices, reports and other filings and to obtain as promptly as practicable all consents, registrations, approvals, permits and authorizations necessary or advisable to be obtained from any third party and/or any Governmental Entity in order to consummate the Merger. The Company and Parent will each request early termination of the waiting period with respect to the Merger under the HSR Act. Subject to applicable Laws relating to the exchange of information, Parent and the Company shall have the right to review in advance and, to the extent practicable, each will consult with the other on and consider in good faith the views of the other in connection with, all of the information relating to Parent or the Company, as the case may be, and any of their respective Subsidiaries, that appears in any filing made with, or written materials submitted to, any third party and/or any Governmental Entity in connection with the Merger (including the Proxy Statement). In exercising the foregoing rights, each of the Company and Parent shall act reasonably and as promptly as practicable. Nothing in this Agreement shall require the Company or its Subsidiaries to take or agree to take any action with respect to its business or operations unless the effectiveness of such agreement or action is conditioned upon Closing.

(b) Information. Subject to applicable Laws, the Company and Parent each shall, upon request by the other, furnish the other with all information concerning itself, its Subsidiaries, directors, officers and stockholders and such other matters as may be reasonably necessary or advisable in connection with the Proxy Statement or any other statement, filing, notice or application made by or on behalf of Parent, the Company or any of their respective Subsidiaries to any third party and/or any Governmental Entity in connection with the Merger and the transactions contemplated by this Agreement, including under the HSR Act and any other applicable antitrust Law; provided, however, that either party may designate information "for outside counsel only" and either party may redact information related to the value of the transaction. Subject to applicable Laws relating to the exchange of information and except as otherwise provided in this Agreement, Parent and the Company shall have the right to review in advance, and to the extent practicable each will consult with the other regarding, and consider in good faith the views of the other in connection with, all of the information relating to Parent or the Company, as the case may be, and any of their respective Affiliates and Representatives, that appears in any filing made with, or written materials submitted to, any Governmental Entity in connection with the Merger and the other transactions contemplated by this Agreement. In exercising the foregoing rights, each of the Company and Parent shall act reasonably and as promptly as practicable.

(c) Status. Subject to applicable Laws and the instructions of any Governmental Entity, the Company and Parent each shall keep the other apprised of the status of matters relating to completion of the transactions contemplated hereby, including promptly furnishing the other with copies of notices or other communications received by Parent or the Company, as the case may be, or any of their respective Representatives, from any third party and/or any Governmental Entity with respect to the Merger; provided, however, that either party may designate information or notices or other communications as "for outside counsel only". Neither the Company nor Parent shall permit any of its officers or any other Representatives to participate in any meeting or substantive telephone discussion with any Governmental Entity in respect of any filings, investigation or other inquiry with respect to the Merger unless to the extent practicable (i) it consults with the other party in advance and (ii) and to the extent permitted by such Governmental Entity, gives the other party the opportunity to attend and participate in such meeting or substantive telephone discussion.

(d) Regulatory Matters. Subject to the terms and conditions set forth in this Agreement, without limiting the generality of the other undertakings pursuant to this Section 6.5, each of the Company (in the case of Sections 6.5(d)(i) and 6.5(d)(iii) set forth below) and Parent (in all cases set forth below) agree to take or cause to be taken the following actions:

(i) the prompt provision to each and every federal, state, local or foreign court or Governmental Entity (including the FERC, the FCC and the State Commissions) with jurisdiction over any Company Approvals or Parent Approvals of non-privileged information and documents requested by any such Governmental Entity that are necessary, proper or advisable to permit consummation of the Merger;

(ii) the prompt use of its reasonable best efforts to avoid the entry or enactment of any permanent, preliminary or temporary injunction or other order, decree, decision, determination, judgment or Law that would delay, restrain, prevent, enjoin or otherwise prohibit consummation of the Merger; and

(iii) the prompt use of its reasonable best efforts to take, in the event that any permanent, preliminary or temporary injunction, decision, order, judgment, determination, decree or Law is entered, issued or enacted, or becomes reasonably foreseeable to be entered, issued or enacted, in any proceeding, review or inquiry of any kind that would make consummation of the Merger in accordance with the terms of this Agreement unlawful or that would delay, restrain, prevent, enjoin or otherwise prohibit consummation of the Merger, any and all steps (including the appeal thereof, the posting of a bond or the taking of the steps contemplated by clause (ii) of this Section 6.5(d)) necessary to resist, vacate, modify, reverse, suspend, prevent, eliminate, avoid or remove such actual, anticipated or threatened injunction, decision, order, judgment, determination, decree or enactment so as to permit such consummation on a schedule as close as possible to that contemplated by this Agreement;

provided that nothing herein shall require (and reasonable best efforts shall in no event require) any party or its Subsidiaries to agree to or take any action that would otherwise constitute a Burdensome Condition. A "Burdensome Condition" shall mean any terms, conditions, liabilities, obligations, commitments or sanctions imposed upon Parent, the Company or their respective Subsidiaries (A) in the Regulatory Approvals, or (B) in any Laws enacted for the purpose of imposing terms, conditions, liabilities, obligations, commitments or sanctions in connection with the Merger (any of the foregoing in clause (B) a "Merger Law"), that, individually or in the aggregate, would constitute or be reasonably likely to constitute a Regulatory Failure (as defined below), provided, however, that any such terms, conditions, liabilities, obligations, commitments or sanctions shall not be taken into account in determining whether there has been or is such a Regulatory Failure to the extent they implement the Regulatory Commitments. A "Regulatory Failure" shall mean terms, conditions, liabilities, obligations, commitments or sanctions (giving effect to the value of any negative effects net of their benefits) that in an aggregate amount constitute a material and adverse effect on the condition (financial or otherwise), assets, liabilities, businesses or results of operations of the Company and its Subsidiaries, taken as a whole, provided, that, for the purposes of determining the existence of a Regulatory Failure, (i) the Company and its Subsidiaries shall be deemed to have 50% of the assets, liabilities, businesses and results of operations of the Company and its Subsidiaries, taken as a whole, and (ii) any terms, conditions, liabilities, obligations, commitments or sanctions imposed upon Parent and its Subsidiaries shall be deemed to have been imposed on the Company and its Subsidiaries.

(e) Regulatory Commitments. The Company and Parent agree (i) that the applications submitted to FERC and the State Commissions with respect to the Merger shall include the information concerning the Merger, the Company and its Subsidiaries, and Parent required by applicable Laws of the District of Columbia, the States of Delaware, Maryland, and New Jersey, the Commonwealth of Virginia and such other jurisdictions as may be mutually determined by the Company and Parent, as the case may be, (ii) that such applications and any amendments or supplements thereto shall include the Regulatory Commitments to the extent applicable to such jurisdictions and such additional agreements or commitments as the Company and Parent agree are advisable to obtain prompt approval of such applications, and (iii) that neither the Company nor Parent shall agree to, or accept, any additional or different agreements, commitments or conditions in connection with the Merger pursuant to any settlement or otherwise with any State Commissions or any other Person, in the case of any agreement, commitment or condition to which the Company of any of its Subsidiaries is a party or otherwise affecting the Company or any of its Subsidiaries, without the prior written consent of Parent, and in the case of any agreement, commitment or condition to which Parent is a party and affecting the Company or any of its Subsidiaries, without the prior written consent of the Company if such agreement, commitment or condition is effective prior to the Effective Time. Parent further agrees that, subject to obtaining the consent of the Company as required by this Section 6.5(e), it will agree to, or accept, any additional or different agreements, commitments or conditions that do not, individually or in the aggregate, constitute a Burdensome Condition to obtain any governmental approvals necessary to promptly consummate the Merger, including any Parent Approval or the FERC Approval, the State Approvals and the FCC Approval.

(f) Rate Cases. Between the date of this Agreement and the Closing, the Company and its Subsidiaries shall be permitted to continue to diligently pursue the rate cases set forth on Section 6.5(f) of the Company Disclosure Letter (collectively, the "Rate Cases") consistent with past practice, and to the extent permitted by Law, notify Parent about any material developments, or material communications with the FERC or the applicable State Commission, relating thereto. Except as required by Exhibit B, prior to making any commitments or settlement offers in the Rate Cases, the Company shall (and shall cause its Subsidiaries to) consult with Parent and consider in good faith any suggestions made by Parent in connection therewith. The Company shall not (and shall cause its Subsidiaries not to) settle the Rate Cases without the prior written consent of Parent (such consent not to be unreasonably withheld, conditioned or delayed) to the extent that such settlement would result in an outcome for the Company and its Subsidiaries that would be materially adverse to the Company or any of its Subsidiaries, taking into account the requests made by the Company and its Subsidiaries in the proceeding, the resolution of similar recent proceedings by the Company and its Subsidiaries and the reasonable expectations of Parent as of the date hereof for such outcome.

6.6. Access and Reports.

(a) Subject to applicable Law, upon reasonable notice, the Company shall (and shall cause its Subsidiaries to) afford Parent's officers and other authorized Representatives (including financing sources) reasonable access, during normal business hours throughout the period prior to the Effective Time, to its employees, properties, books, contracts and records and, during such period, the Company shall (and shall cause its Subsidiaries to) furnish promptly to Parent all information concerning its business, properties and personnel as may reasonably be requested, provided that no investigation pursuant to this Section 6.6 shall affect or be deemed to modify any representation or warranty made by the Company herein, and provided, further, that the foregoing shall not require the Company (i) to permit any inspection, or to disclose any information, that in the reasonable judgment of the Company would result in the disclosure of any trade secrets of third parties or violate any obligations of the Company or any of its Subsidiaries with respect to confidentiality if the Company shall have used reasonable best efforts to obtain the consent of such third party to such inspection or disclosure or (ii) to disclose any privileged information of the Company or any of its Subsidiaries. All requests for information made pursuant to this Section 6.6 shall be directed to the executive officer or other Person designated by the Company. All such information shall be governed by the terms of the Confidentiality Agreement.

(b) Financing Cooperation. The Company shall, and shall cause its Subsidiaries to, use its and their reasonable best efforts to provide such cooperation as may be reasonably requested by Parent in connection with the financing of the Transactions, including using reasonable best efforts to (i) provide reasonable assistance with the preparation of any discussions of business, financial statements, pro forma financials, projections, management discussion and analysis, and other customary financial data of the Company and its Subsidiaries, all for use in connection therewith and (ii) direct its independent accountants to provide customary and reasonable assistance to Parent including in connection with providing customary comfort letters. Parent shall reimburse the Company for all reasonable out-of-pocket costs or expenses incurred by the Company and its Subsidiaries in connection with cooperation provided for in this Section 6.6(b) to the extent the information requested of the Company was not otherwise prepared or available in the ordinary course of business. For the avoidance of doubt, Parent hereby expressly acknowledges that its obligations under this Agreement are not subject to the availability of any financing.

6.7. Stock Exchange De-listing. Prior to the Closing Date, the Company shall cooperate with Parent and use reasonable best efforts to take, or cause to be taken, all actions, and do or cause to be done all things, reasonably necessary, proper or advisable on its part under applicable Laws and rules and policies of the NYSE to enable the delisting by the Surviving Corporation of the Shares from the NYSE and the deregistration of the Shares under the Exchange Act as promptly as practicable after the Effective Time.

6.8. Publicity. The initial press release regarding the Merger shall be a joint press release and thereafter the Company and Parent each shall consult with each other prior to issuing any press releases or otherwise making public announcements with respect to the Merger and the other transactions contemplated by this Agreement and prior to making any filings with any third party and/or any Governmental Entity (including any national securities exchange or interdealer quotation service) with respect thereto, and no public release or announcement concerning the Merger or any other transactions contemplated by this Agreement shall be issued or made by any party without the prior consent of the other parties except as may be required by Law or by obligations pursuant to any listing agreement with or rules of any national securities exchange or interdealer quotation service or by the request of any Governmental Entity (in which case the party required to issue or make such press release or announcement shall give reasonable notice to the other party or parties, including the opportunity to review or comment on such press release or announcement to the extent practicable).

6.9. Employee Benefits.

(a) Parent agrees that, during the period commencing at the Effective Time and ending two years after the Effective Time ("Benefit Period"), Parent shall provide, or shall cause to be provided (1) to each employee of the Company and its Subsidiaries (other than any employee who is covered by a collective bargaining or similar agreement between the Company and any labor union) who is employed as of immediately prior to the Effective Time and continues employment with the Company or its Subsidiaries immediately after the Effective Time (each, a "Continuing Employee"), base salary, annual incentive opportunity and long-term incentive compensation opportunities, which are, in each case, no less than those provided by the Company and its Subsidiaries immediately prior to the Effective Time to each such Continuing Employee, (2) to the Continuing Employees, pension and welfare benefits and perquisites (to the extent described in the Company Disclosure Letter) that are no less favorable in the aggregate than those provided by the Company and its Subsidiaries immediately prior to the Effective Time and (3) to the Continuing Employees, severance benefits that are no less favorable than the severance benefits provided by the Company and its Subsidiaries to such Continuing Employees immediately prior to the Effective Time.

(b) For purposes of vesting, benefit accrual (but not for benefit accrual purposes under any defined benefit pension plan), vacation and sick time credit and eligibility to participate under the employee benefit plans, programs and policies of Parent and its Subsidiaries providing benefits to any Continuing Employee after the Effective Time (including the Benefit Plans) (the "New Plans"), each Continuing Employee shall be credited with his or her years of service with the Company and its Subsidiaries and their respective predecessors before the Effective Time, to the same extent and for the same purpose as such Continuing Employee was entitled, before the Effective Time, to credit for such service under any similar Benefit Plan in which such Continuing Employee participated or was eligible to participate immediately prior to the Effective Time; provided that the foregoing shall not apply to the extent that its application would result in a duplication of benefits with respect to the same period of service. In addition, and without limiting the generality of the foregoing, Parent shall cause (i) each Continuing Employee to be immediately eligible to participate, without any waiting time, in any and all New Plans to the extent coverage under such New Plan is replacing comparable coverage under a Benefit Plan in which such Continuing Employee participated immediately before the Effective Time (such plans, collectively, the "Old Plans"), and (ii) for purposes of each New Plan providing medical, dental, pharmaceutical and/or vision benefits to any Continuing Employee, any evidence of insurability requirements, all pre-existing condition exclusions and actively-at-work requirements of such New Plan to be waived for such Continuing Employee and his or her covered dependents, to the extent such conditions were inapplicable or waived under the comparable Old Plan. Parent shall cause any eligible expenses incurred by any Continuing Employee and his or her covered dependents during the portion of the plan year of the Old Plan ending on the date such Continuing Employee's participation in the corresponding New Plan begins to be taken into account under such New Plan for purposes of satisfying all deductible, coinsurance and maximum out-of-pocket requirements applicable to such Continuing Employee and his or her covered dependents for the applicable plan year; provided that such amount was taken into account for the same purpose under the similar Benefit Plan for such period and would not result in the duplication of benefits.

(c) Parent hereby acknowledges that a "change in control" or other event with similar import, within the meaning of the Benefit Plans that contain such terms will occur upon the Effective Time. Parent shall, and shall cause the Surviving Corporation and any successor thereto to, honor, assume, fulfill and discharge the Company's and its Subsidiaries' obligations under the Company's Change in Control Severance Plan and the other Benefit Plans listed on Section 6.9(c) of the Company Disclosure Letter. Parent agrees that it will not (nor cause any other Person or entity to) request that the Company or any Continuing Employee waive or relinquish any compensation or benefit entitlement or right (including any severance entitlement) existing as of the Effective Time.

(d) (i) If the Effective Time occurs during calendar year 2014, at the Effective Time the Company shall pay each participant in the Company's incentive plans (the "Incentive Plans") who remains employed through the Effective Time, an annual incentive amount in respect of the 2014 fiscal year, equal to the higher of (A) the target level (at 100% funding) and (B) the actual level of performance achieved as of the Effective Time (with such performance measure pro-rated, if applicable, for the portion of the performance cycle completed at the Effective Time), as determined by the compensation committee of the board of directors of the Company prior to the Effective Time in accordance with the terms of the applicable Incentive Plans and based on performance through the day that is no more than five business days prior to the Effective Time.

(ii) If the Effective Time has not occurred by December 31, 2014 (or December 31, 2015), the Company shall (A) determine the amounts earned under the Incentive Plans in respect of the 2014 fiscal year (or 2015 fiscal year), with performance based on either (x) the target level (at 100% funding) or (y) the actual level of performance for the 2014 fiscal year (or 2015 fiscal year), (B) pay such amounts in respect of the 2014 fiscal year (or 2015 fiscal year) no later than the Closing Date and (C) establish annual incentive award targets, maximums and performance award levels and performance measures for the 2015 fiscal year (or 2016 fiscal year) under the Incentive Plans.

(iii) If the Effective Time occurs during calendar year 2015, the Company shall pay such amounts in respect of the 2015 fiscal year on the Closing Date, with performance determined at the higher of (x) target level (at 100% funding) and (y) the actual level of performance for the 2015 fiscal year achieved as of the Effective Time (with such performance measure pro-rated, if applicable, for the portion of the performance cycle completed at the Effective Time), as determined by the compensation committee of the board of directors of the Company prior to the Effective Time based on performance through the day that is no more than five business days prior to the Effective Time.

(iv) If the Effective Time occurs during calendar year 2016, the Company shall pay such amounts in respect of the 2016 fiscal year on the Closing Date, pro-rated based on the number of calendar days elapsed in the 2016 fiscal year through the Closing Date, with performance determined at the higher of (x) target level (at 100% funding) and (y) the actual level of performance for the 2016 fiscal year achieved as of the Effective Time (with such performance measure pro-rated, if applicable, for the portion of the performance cycle completed at the Effective Time), as determined by the compensation committee of the board of directors of the Company prior to the Effective Time based on performance through the day that is no more than five business days prior to the Effective Time, and Parent shall, and shall cause the Surviving Corporation to, honor and pay incentive award amounts for the remainder of the 2016 fiscal year (with an offset for the pro rata portion previously paid) in accordance with the targets, levels and measures established by the Company prior to the Closing Date and the terms of the applicable Incentive Plans.

(e) After the Effective Time, except as required by Section 304 of the Sarbanes-Oxley Act of 2002, the Company shall have no further rights to seek recovery from employees of amounts paid under the Stock Plans or the Incentive Plans for periods ending on or prior to the Effective Time.

(f) No later than the Effective Time, the Company shall take all actions reasonably necessary to cause each Continuing Employee to become 100% vested in such Continuing Employee's accounts under each Company 401(k) plan (excluding for the avoidance of doubt any 401(k) plans maintained pursuant to any collective bargaining or similar agreement between the Company and any labor union), effective as of the Closing Date.

(g) With respect to each individual who is employed by the Company or any of its Subsidiaries immediately before the Effective Time whose terms and conditions of employment are governed by a CBA between the Company and any labor union, Parent shall, or shall cause the Surviving Corporation to, continue to honor such CBA, through its expiration, modification or termination in accordance with its terms or applicable Law.

(h) The provisions of this Section 6.9 are solely for the benefit of the parties to this Agreement, and nothing in this Agreement, whether express or implied, is intended to, or shall, (i) constitute the establishment or adoption of or an amendment to any employee benefit plan for purposes of ERISA or otherwise be treated as an amendment or modification of any Benefit Plan, New Plan or other benefit plan, agreement or arrangement, other than Section 6.9(f), (ii) limit the right of Parent, the Company or their respective Subsidiaries to amend, terminate or otherwise modify any Benefit Plan, New Plan or other benefit plan, agreement or arrangement following the Effective Time, or (iii) create any third-party beneficiary or other right (including, but not limited to, a right to employment) in any Person, including any current or former employee of the Company or any Subsidiary of the Company, any participant in any Benefit Plan, New Plan or other benefit plan, agreement or arrangement (or any dependent or beneficiary thereof).

6.10. Expenses. The Surviving Corporation shall pay all charges and expenses, including those of the Paying Agent, in connection with the transactions contemplated in Article IV, and Parent shall reimburse the Surviving Corporation for such charges and expenses. Except as otherwise provided in Section 8.5, whether or not the Merger is consummated, all costs and expenses incurred in connection with this Agreement and the Merger and the other transactions contemplated by this Agreement shall be paid by the party incurring such expense.

6.11. Indemnification; Directors' and Officers' Insurance. (a) From and after the Effective Time, each of Parent and the Surviving Corporation agrees that it will indemnify and hold harmless, to the fullest extent permitted under applicable Law (and Parent shall also advance expenses as incurred to the fullest extent permitted under applicable Law, provided that the Person to whom expenses are advanced provides an undertaking to repay such advances if it is ultimately determined that such Person is not entitled to indemnification), each present and former director and officer of the Company and its Subsidiaries (collectively, the "Indemnified Parties") against any costs or expenses (including reasonable attorneys' fees), judgments, fines, losses, claims, damages or liabilities incurred in connection with any claim, action, suit, proceeding or investigation, whether civil, criminal, administrative or investigative, arising out of or related to such Indemnified Parties' service as a director or officer of the Company or its Subsidiaries or services performed by such persons at the request of the Company or its Subsidiaries at or prior to the Effective Time, whether asserted or claimed prior to, at or after the Effective Time, including the transactions contemplated by this Agreement.

(b) Prior to the Effective Time, the Company shall and, if the Company is unable to, Parent shall cause the Surviving Corporation as of the Effective Time to, obtain and fully pay the premium for the extension of (i) the directors' and officers' liability coverage of the Company's existing directors' and officers' insurance policies, and (ii) the Company's existing fiduciary liability insurance policies, in each case for a claims reporting or discovery period of six years from and after the Effective Time from an insurance carrier with the same or better credit rating as the Company's current insurance carrier with respect to directors' and officers' liability insurance and fiduciary liability insurance (collectively, "D&O Insurance") with terms, conditions, retentions and limits of liability that are at least as favorable as the Company's existing policies with respect to any actual or alleged error, misstatement, misleading statement, act, omission, neglect, breach of duty or any matter claimed against a director or officer of the Company or any of its Subsidiaries by reason of him or her serving in such capacity that existed or occurred at or prior to the Effective Time (including in connection with this Agreement or the transactions or actions contemplated hereby). If the Company and the Surviving Corporation for any reason fail to obtain such "tail" insurance policies as of the Effective Time, the Surviving Corporation shall, and Parent shall cause the Surviving Corporation to, continue to maintain in effect for a period of at least six years from and after the Effective Time the D&O Insurance in place as of the date hereof with terms, conditions, retentions and limits of liability that are at least as favorable as provided in the Company's existing policies as of the date hereof, or the Surviving Corporation shall, and Parent shall cause the Surviving Corporation to, use reasonable best efforts to purchase comparable D&O Insurance for such six-year period with terms, conditions, retentions and limits of liability that are at least as favorable as provided in the Company's existing policies as of the date hereof; provided, however, that in no event shall Parent or the Surviving Corporation be required to expend for such policies pursuant to this sentence an annual premium amount in excess of 300% of the annual premiums currently paid by the Company for such insurance; and provided, further, that if the annual premiums of such insurance coverage exceed such amount, the

Surviving Corporation shall obtain a policy with the greatest coverage available for a cost not exceeding such amount.

(c) If Parent or the Surviving Corporation or any of their respective successors or assigns shall (i) consolidate with or merge into any other corporation or entity and shall not be the continuing or surviving corporation or entity of such consolidation or merger or (ii) transfer all or substantially all of its properties and assets to any individual, corporation or other entity, then, and in each such case, proper provisions shall be made so that the successors and assigns of Parent or the Surviving Corporation shall assume all of the obligations set forth in this Section 6.11.

(d) The provisions of this Section 6.11 are intended to be for the benefit of, and shall be enforceable by, each of the Indemnified Parties.

(e) The rights of the Indemnified Parties under this Section 6.11 shall be in addition to any rights such Indemnified Parties may have under the certificate of incorporation, certificate of formation or bylaws of the Company or any of its Subsidiaries, or under any applicable Contracts or Laws. All rights to indemnification and exculpation from liabilities for acts or omissions occurring at or prior to the Effective Time and rights to advancement of expenses relating thereto now existing in favor of any Indemnified Party as provided in the certificate of incorporation, certificate of formation or bylaws of the Company or of any Subsidiary of the Company or any indemnification agreement between such Indemnified Party and the Company or any of its Subsidiaries, in each case as in effect on the date of this Agreement, shall survive the Merger and shall not be amended, repealed or otherwise modified in any manner that would adversely affect any right thereunder of any such Indemnified Party.

6.12. Takeover Statutes. If any Takeover Statute is or may become applicable to the Merger, the Company and its board of directors shall grant such approvals and take such actions as are necessary so that such transactions may be consummated as promptly as practicable on the terms contemplated by this Agreement and otherwise act to eliminate or minimize the effects of such statute or regulation on such transactions.

6.13. No Transfer or Encumbrance of Nonvoting Preferred Stock. Parent agrees that from the date hereof until the Closing, it shall not sell, pledge, dispose of, grant, transfer or encumber any of the shares of Nonvoting Preferred Stock, and shall not enter into any agreement to do any of the foregoing.

6.14. Transaction Litigation. In the event that any stockholder litigation related to this Agreement, the Merger or the other transactions contemplated by this Agreement is brought, or, to the Knowledge of the Company, threatened in writing, against the Company and/or the members of the board of directors of the Company after the date of this Agreement and prior to the Effective Time ("Transaction Litigation"), the Company shall promptly notify Parent of any such Transaction Litigation and shall keep Parent reasonably informed with respect to the status thereof.

The Company shall give Parent the opportunity to participate in the defense of any Transaction Litigation, and the Company shall not settle or agree to settle any Transaction Litigation, without Parent's prior written consent (which consent shall not be unreasonably withheld, delayed or conditioned).

6.15. Agreements Concerning Parent and Merger Sub.

(a) During the period from the date of this Agreement through the Effective Time, Merger Sub shall not engage in any activity of any nature except for activities related to or in furtherance of the Merger.

(b) Parent hereby guarantees the due, prompt and faithful payment, performance and discharge by Merger Sub of, and the compliance by Merger Sub with, all of the covenants, agreements, obligations and undertakings of Merger Sub under this Agreement in accordance with the terms of this Agreement, and covenants and agrees to take all actions necessary or advisable to ensure such payment, performance and discharge by Merger Sub hereunder. Parent shall, immediately following execution of this Agreement, approve this Agreement in its capacity as sole stockholder of Merger Sub in accordance with applicable Law and the articles of incorporation and bylaws of Merger Sub.

ARTICLE VII

Conditions

7.1. Conditions to Each Party's Obligation to Effect the Merger. The respective obligation of each party to effect the Merger is subject to the satisfaction or waiver at or prior to the Effective Time of each of the following conditions:

(a) Stockholder Approval. This Agreement shall have been duly adopted by holders of Shares constituting the Company Requisite Vote in accordance with applicable Law and the certificate of incorporation and bylaws of the Company.

(b) Regulatory Consents. The waiting period applicable to the consummation of the Merger under the HSR Act shall have expired or been earlier terminated; each of the FERC Approval, the Parent FERC Approval, the State Approvals and the FCC Approval shall have been obtained and be in effect, and any waiting period prescribed by Law with respect to such approvals before the Merger may be consummated shall have expired (the "Regulatory Approvals").

(c) Orders. No court or other Governmental Entity of competent jurisdiction shall have enacted, issued, promulgated, enforced or entered any Law (whether temporary, preliminary or permanent) that is in effect and restrains, enjoins or otherwise prohibits or makes illegal the consummation of the Merger (collectively, an "Order").

7.2. Conditions to Obligations of Parent and Merger Sub. The obligations of Parent and Merger Sub to effect the Merger are also subject to the satisfaction or waiver by Parent at or prior to the Effective Time of the following conditions:

(a) Representations and Warranties. (i) The representation and warranty of the Company set forth in Section 5.1(f)(i) shall be true and correct in all respects as of the date of this Agreement and as of the Closing Date as though made on and as of such time; (ii) the representations and warranties of the Company set forth in the first through fourth sentences of Section 5.1(b) shall be true and correct in all respects as of the Closing Date as though made on and as of such date and time (except for such inaccuracies that are not material), (iii) the representations and warranties of the Company set forth in Section 5.1(c), and Section 5.1(l) shall be true and correct in all material respects as of the Closing Date as though made on and as of such date and time (except to the extent that any such representation and warranty expressly speaks as of an earlier date, in which case such representation and warranty shall be true and correct as of such earlier date); (iv) the representations and warranties of the Company set forth in this Agreement (other than those described in clauses (i), (ii) and (iii) above) shall be true and correct (without giving effect to any "materiality" or "Company Material Adverse Effect" qualifiers contained therein) as of the Closing Date as though made on and as of such date and time (except to the extent that any such representation and warranty expressly speaks as of an earlier date, in which case such representation and warranty shall be true and correct as of such earlier date), provided, however, that notwithstanding anything herein to the contrary, the condition set forth in this Section 7.2(a)(iii) shall be deemed to have been satisfied even if any such representations and warranties of the Company are not so true and correct unless the failure of such representations and warranties of the Company to be so true and correct, individually or in the aggregate, has had or is reasonably likely to have a Company Material Adverse Effect; and (v) Parent shall have received at the Closing a certificate signed on behalf of the Company by a senior executive officer of the Company to the effect that such officer has read this Section 7.2(a) and the conditions set forth in this Section 7.2(a) have been satisfied.

(b) Performance of Obligations of the Company. The Company shall have performed in all material respects all obligations required to be performed by it under this Agreement at or prior to the Closing Date, and Parent shall have received a certificate signed on behalf of the Company by a senior executive officer of the Company to such effect.

(c) Regulatory Approvals. The regulatory consents referred to in Section 7.1(b), together with any Merger Laws, shall not, individually or in the aggregate, impose terms, conditions, liabilities, obligations, commitments or sanctions that constitute a Burdensome Condition.

7.3. Conditions to Obligation of the Company. The obligation of the Company to effect the Merger is also subject to the satisfaction or waiver by the Company at or prior to the Effective Time of the following conditions:

(a) Representations and Warranties. (i) The representations and warranties of Parent set forth in this Agreement shall be true and correct in all respects as of the Closing Date as though made on and as of such date and time (except to the extent that any such representation and warranty expressly speaks as of an earlier date, in which case such representation and warranty shall be true and correct as of such earlier date), provided, however, that notwithstanding anything herein to the contrary, the condition set forth in this Section 7.3(a)(i) shall be deemed to have been satisfied even if any such representations and warranties of Parent are not so true and correct unless the failure of such representations and warranties of Parent to be so true and correct, individually or in the aggregate, would prevent or materially delay the ability of Parent and Merger Sub to consummate the Merger and the other transactions contemplated by this Agreement and (ii) the Company shall have received at the Closing a certificate signed on behalf of Parent by a senior executive officer of Parent to the effect that such officer has read this Section 7.3(a) and the conditions set forth in this Section 7.3(a) have been satisfied.

(b) Performance of Obligations of Parent and Merger Sub. Each of Parent and Merger Sub shall have performed in all material respects all obligations required to be performed by it under this Agreement at or prior to the Closing Date, and the Company shall have received a certificate signed on behalf of Parent and Merger Sub by a senior executive officer of Parent to such effect.

ARTICLE VIII

Termination

8.1. Termination by Mutual Consent. This Agreement may be terminated and the Merger may be abandoned at any time prior to the Effective Time, whether before or after the adoption of this Agreement by the stockholders of the Company referred to in Section 7.1(a), by mutual written consent of the Company and Parent by action of their respective boards of directors.

8.2. Termination by Either Parent or the Company. This Agreement may be terminated and the Merger may be abandoned at any time prior to the Effective Time by action of the board of directors of either Parent or the Company if:

(a) the Merger shall not have been consummated by July 29, 2015 whether such date is before or after the date of adoption of this Agreement by the stockholders of the Company referred to in Section 7.1(a) (the "Termination Date"); provided, however, that if on July 29, 2015 (i) the condition set forth in Section 7.1(b) is not satisfied but all of the other conditions to Closing shall have been satisfied or waived (other than Section 7.2(c) or those conditions that by their nature are to be satisfied at the Closing) and the condition set forth in Section 7.1(b) remains capable of being satisfied and (ii) no final and non-appealable order or any Merger Law imposed by any Governmental Entity shall be in effect as of such date of determination that constitutes a Burdensome Condition, then the Termination Date may be extended until October 29, 2015 at the election of Parent or the Company by written notice to the other party (and such date shall then be the "Termination Date"). Notwithstanding the foregoing, the Company shall not have the right to terminate this Agreement pursuant to this Section 8.2(a) if Parent has the right to terminate this Agreement pursuant to Section 8.4(a);

(b) the adoption of this Agreement by the stockholders of the Company referred to in Section 7.1(a) shall not have been obtained at the Stockholders Meeting or at any adjournment or postponement thereof; or

(c) any Order permanently restraining, enjoining or otherwise prohibiting or making illegal the consummation of the Merger shall have become final and non-appealable (whether before or after the adoption of this Agreement by the stockholders of the Company referred to in Section 7.1(a)); provided, however, that the right to terminate this Agreement pursuant to this Section 8.2(c) shall not be available to any party whose failure to comply with any provision of this Agreement has been the cause of, or materially contributed to, either the imposition of such Order or the failure of such Order to be resisted, resolved, lifted or vacated, as applicable.

8.3. Termination by the Company. This Agreement may be terminated and the Merger may be abandoned by the Company:

(a) at any time prior to the time the Company Requisite Vote is obtained, if (i) the board of directors of the Company authorizes the Company, subject to complying with the terms of this Agreement (including Section 6.2), to enter into an Alternative Acquisition Agreement with respect to a Superior Proposal and the Company notifies Parent in writing that it intends to enter into such an agreement, attaching the most current version of such agreement to such notice; (ii) concurrently with the termination of this Agreement the Company enters into an Alternative Acquisition Agreement with respect to such Superior Proposal; and (iii) the Company prior to or concurrently with such termination pays to Parent in immediately available funds any fees required to be paid pursuant to Section 8.5; or

(b) if there has been a breach of any representation, warranty, covenant or agreement made by Parent or Merger Sub in this Agreement, or any such representation and warranty shall have become untrue after the date of this Agreement, such that Section 7.3(a) or 7.3(b) would not be satisfied and such breach or condition is not curable or, if curable, is not cured prior to the earlier of (i) 30 days after written notice thereof is given by the Company to Parent or (ii) two business days prior to the Termination Date.

8.4. Termination by Parent. This Agreement may be terminated and the Merger may be abandoned at any time prior to the Effective Time by Parent if:

(a) the board of directors of the Company or the Company (i) shall have effected a Change of Recommendation, (ii) shall have delivered a Recommendation Change Notice or (iii) shall have authorized the Company to enter into an Alternative Acquisition Agreement with respect to a Superior Proposal; or

(b) there has been a breach of any representation, warranty, covenant or agreement made by the Company in this Agreement, or any such representation and warranty shall have become untrue after the date of this Agreement, such that Section 7.2(a) or 7.2(b) would not be satisfied and such breach or condition is not curable or, if curable, is not cured prior to the earlier of (i) 30 days after written notice thereof is given by the Company to Parent or (ii) two business days prior to the Termination Date.

8.5. Effect of Termination and Abandonment.

(a) Except as provided in paragraphs (b), (c), (d) and (e) below, in the event of termination of this Agreement and the abandonment of the Merger pursuant to this Article VIII, this Agreement shall become void and of no effect with no liability to any Person on the part of any party hereto (or of any of its Representatives or Affiliates); provided, however, and notwithstanding anything in the foregoing to the contrary, that (i) except as otherwise provided herein, no such termination shall relieve any party hereto of any liability or damages to the other party hereto resulting from any willful or intentional material breach of this Agreement and (ii) the provisions set forth in this Section 8.5 and Section 9.1 shall survive the termination of this Agreement.

(b) In the event that:

(i) a bona fide Acquisition Proposal shall have been made or any Person shall have made or publicly announced or otherwise communicated to the Company, the board of directors of the Company or any Representatives of the Company an intention (whether or not conditional) to make an Acquisition Proposal with respect to the Company or any of its Subsidiaries (and such Acquisition Proposal or publicly announced intention shall not have been publicly withdrawn without qualification (A) no more than 75 days following the date such Acquisition Proposal has been made, with respect to any termination pursuant to Section 8.2(a), and (B) no fewer than five business days prior to, with respect to termination pursuant to Section 8.2(b), the date of the Stockholders Meeting) and thereafter this Agreement is terminated by either Parent or the Company pursuant to Section 8.2(a), 8.2(b) or 8.4(b);

(ii) this Agreement is terminated by Parent pursuant to Section 8.4(a); or

(iii) this Agreement is terminated by the Company pursuant to Section 8.3(a);

then the Company shall promptly pay Parent the Termination Fee, payable by wire transfer of immediately available funds, (A) in the case of clause (i), immediately prior to or substantially concurrent with the entry by the Company or any of its Subsidiaries into an Alternative Acquisition Agreement with respect to, or upon consummation or approval or recommendation to the Company’s stockholders of, an Acquisition Proposal (substituting “50%” for “15%” in the definition thereof) (whether or not such Acquisition

Proposal is the same Acquisition Proposal referred to in clause (i)) within 12 months of such termination, (B) in the case of clause (ii), in no event later than five days after the date of such termination or (C) in the case of the clause (iii), immediately prior to or concurrently with, but as a condition to, the termination of this Agreement. As used herein, "Termination Fee" shall mean a cash amount equal to (x) $259,000,000 or (y) $293,000,000 plus Parent Expenses if (i) the Company terminates this Agreement pursuant to Section 8.3(a) to enter into an Alternative Acquisition Agreement from a Bidding Party, (ii) Parent terminates this Agreement pursuant to Section 8.4(a) and the action by the board of directors of the Company that gave rise to Parent's termination under Section 8.4(a) was the result of an Acquisition Proposal by a Bidding Party or (iii) the Termination Fee becomes payable in accordance with Section 8.5(b)(i) and a Bidding Party made the Acquisition Proposal referred to in Section 8.5(b)(i) or the Acquisition Proposal referred to in Section 8.5(b)(i)(A). "Bidding Party" means any Person or group of Persons, or any of their respective controlled Affiliates, who has made an Acquisition Proposal on or after April 1, 2014 and prior to the date hereof. Notwithstanding anything to the contrary in this Agreement, the parties hereby acknowledge that in the event that the Termination Fee (together with the Parent Expenses) is paid by the Company pursuant to this Section 8.5(b), the Termination Fee (together with the Parent Expenses) shall be Parent's and Merger Sub's sole and exclusive remedy for monetary damages under this Agreement.

(c) If (i) the Company or Parent terminates this Agreement pursuant to Section 8.2(a) or 8.2(c) or (ii) the Company terminates this Agreement pursuant to Section 8.3(b) because of a failure by Parent to comply with its obligations under Section 6.5(d) or Section 6.5(e), and, in each of (i) and (ii), at the time of such termination, any of the conditions set forth in Sections 7.1(b), 7.1(c) or 7.2(c) shall not have been satisfied, and in addition, in the case of a termination under 8.2(c), at the time of termination a Governmental Entity shall have enacted such Order with respect to the Regulatory Approvals, and in each of (i) and (ii), at the time of such termination, all other conditions to the Closing set forth in Sections 7.1 and 7.2 shall have been satisfied or waived (other than those conditions that by their terms are to be satisfied at the Closing but which conditions would be satisfied or would be capable of being satisfied if the Closing Date were the date of such termination, or those conditions that have not been satisfied as a result of a breach by Parent) (each of (i) and (ii), a "Regulatory Termination"), then (A) Parent shall pay Company a termination fee equal to the Nonvoting Preferred Stock Purchase Price (the "Parent Termination Fee") which Parent Termination Fee shall be paid by Parent by means of the Company redeeming, as of the time of such termination, all of the outstanding shares of Nonvoting Preferred Stock for no consideration, and all of the outstanding shares of Nonvoting Preferred Stock will no longer be outstanding as of the time of such redemption, and (B) Parent shall promptly, but in no event later than five days after being notified of such by the Company, pay all of the documented out-of-pocket expenses incurred by the Company in connection with this Agreement and the transactions contemplated by this Agreement, up to a maximum amount of $40,000,000, payable by wire transfer of immediately available funds. Notwithstanding anything to the contrary in this Agreement, the parties hereby acknowledge that in the event that the Parent Termination Fee (together with the expense reimbursement contemplated by the immediately preceding sentence) is paid by Parent pursuant to this Section 8.5(c), the Parent Termination Fee (together with the expense reimbursement contemplated by the immediately preceding sentence) shall be the Company's sole and exclusive remedy for monetary damages under this Agreement, unless at the time of such termination Parent is in breach of its obligations under Section 6.5; provided, that the Company is not then in breach of Section 6.5.

(d) In the event this Agreement is terminated by the Company or Parent pursuant to this Article VIII other than pursuant to a Regulatory Termination, the Company will redeem, within five business days of such termination, all of the outstanding shares of Nonvoting Preferred Stock for an aggregate amount equal to the Nonvoting Preferred Stock Purchase Price, payable by the Company to Parent by wire transfer of immediately available funds, and all of the outstanding shares of Nonvoting Preferred Stock will no longer be outstanding as of the time of such redemption.

(e) In the event that this Agreement is terminated either (x) by Parent or the Company pursuant to Section 8.2(b) or (y) in the case of termination of this Agreement of the type contemplated by Section 8.5(b)(i) other than (i) pursuant to Section 8.2(a) and the Parent Termination Fee is payable or (ii) pursuant to Section 8.4(b) and (B) the Termination Fee is not then payable pursuant to Section 8.5(b), the Company shall promptly, but in no event later than five days after being notified of such by Parent, pay all of the documented out-of-pocket expenses incurred by Parent or Merger Sub in connection with this Agreement and the transactions contemplated by this Agreement up to a maximum amount of $40,000,000, payable by wire transfer of immediately available funds ("Parent Expenses"); provided, that the payment by the Company of Parent Expenses pursuant to this Section 8.5(e) shall be credited against any amount that may become payable pursuant to clause (x) of the definition of Termination Fee. The existence of circumstances which could require the Termination Fee to become subsequently payable by the Company pursuant to Section 8.5 shall not relieve the Company of its obligations to pay the Parent Expenses pursuant to this Section 8.5(e). The payment by the Company of Parent Expenses pursuant to this Section 8.5(e) shall not relieve the Company of any subsequent obligation to pay the Termination Fee pursuant to Section 8.5(b) (less a credit in the amount of Parent Expenses, if applicable).

(f) The parties acknowledge that the agreements contained in this Section 8.5 are an integral part of the transactions contemplated by this Agreement, and that, without these agreements, the parties would not enter into this Agreement; accordingly, if the Company fails to promptly pay the amounts due pursuant to Section 8.5(b) or Section 8.5(d), or Parent fails to promptly pay the amount due pursuant to Section 8.5(c), and, in order to obtain such payment, Parent or Merger Sub, on the one hand, or the Company, on the other hand, commences a suit that results in a judgment against the Company for the amounts set forth in Section 8.5(b) or Section 8.5(d), or any portion thereof, or a judgment against Parent for the amount set forth in Section 8.5(c) or any portion thereof, the Company shall pay to Parent or Merger Sub, on the one hand, or Parent shall pay to the Company, on the other hand, its costs and expenses (including attorneys' fees) in connection with such suit, together with interest on the amount of such amount or portion thereof at the Interest Rate in effect on the date such payment was required to be made through the date of payment.

ARTICLE IX

Miscellaneous and General

9.1. Survival. This Article IX and the agreements of the Company, Parent and Merger Sub contained in Article IV and Sections 6.9 (Employee Benefits), 6.10 (Expenses) and 6.11 (Indemnification; Directors' and Officers' Insurance) shall survive the consummation of the Merger. This Article IX and the agreements of the Company, Parent and Merger Sub contained in Section 6.10 (Expenses) and Section 8.5 (Effect of Termination and Abandonment) and the Confidentiality Agreement shall survive the termination of this Agreement. All other representations, warranties, covenants and agreements in this Agreement shall not survive the consummation of the Merger or the termination of this Agreement.

9.2. Modification or Amendment. Subject to the provisions of the applicable Laws, at any time prior to the Effective Time, the parties hereto may modify or amend this Agreement, by written agreement executed and delivered by duly authorized officers of the respective parties.

9.3. Waiver of Conditions. The conditions to each of the parties' obligations to consummate the Merger are for the sole benefit of such party and may be waived by such party in whole or in part to the extent permitted by applicable Laws. Any agreement on the part of a party to any such waiver shall be valid only if set forth in an instrument in writing signed by such party. The failure of any party to assert any of its rights hereunder or under applicable Law shall not constitute a waiver of such rights and, except as otherwise expressly provided herein, no single or partial exercise by any party of any of its rights hereunder precludes any other or further exercise of any such rights or any other rights hereunder or under applicable Law.

9.4. Counterparts. This Agreement may be executed in any number of counterparts, each such counterpart being deemed to be an original instrument, and all such counterparts shall together constitute the same agreement. This Agreement and any signed agreement or instrument entered into in connection with this Agreement, and any amendments or waivers hereto or thereto, to the extent signed and delivered by means of a facsimile machine or by email delivery of a ".pdf" format data file, shall be treated in all manner and respects as an original agreement or instrument and shall be considered to have the same binding legal effect as if it were the original signed version thereof delivered in person.

9.5. GOVERNING LAW AND VENUE; WAIVER OF JURY TRIAL; SPECIFIC PERFORMANCE.

(a) THIS AGREEMENT SHALL BE DEEMED TO BE MADE IN AND IN ALL RESPECTS SHALL BE INTERPRETED, CONSTRUED AND GOVERNED BY AND IN ACCORDANCE WITH THE LAW OF THE STATE OF DELAWARE WITHOUT REGARD TO THE CONFLICTS OF LAW PRINCIPLES THEREOF TO THE EXTENT THAT SUCH PRINCIPLES WOULD DIRECT A MATTER TO ANOTHER JURISDICTION. The parties hereby irrevocably submit to the exclusive personal jurisdiction of the Court of Chancery of the State of Delaware or to the extent such Court does not have jurisdiction, the United States District Court of the District of Delaware, solely in respect of the interpretation and enforcement of the provisions of this Agreement and of the documents referred to in this Agreement, and in respect of the transactions contemplated hereby, and hereby waive, and agree not to assert, as a defense in any action, suit or proceeding for the interpretation or enforcement hereof or of any such document, that it is not subject thereto or that such action, suit or proceeding may not be brought or is not maintainable in such courts or that such courts are an inconvenient forum, or that the venue of such courts may not be appropriate or that this Agreement or any such document may not be enforced in or by such courts, and the parties hereto irrevocably agree that all claims relating to such action, suit or proceeding shall be heard and determined in such a Delaware State or Federal court. The parties hereby consent to and grant any such court jurisdiction over the person of such parties and, to the extent permitted by Law, over the subject matter of such dispute and agree that mailing of process or other papers in connection with any such action, suit or proceeding in the manner provided in Section 9.6 shall be valid, effective and sufficient service thereof.

(b) EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES, AND THEREFORE EACH SUCH PARTY HEREBY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT SUCH PARTY MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY ACTION, SUIT OR PROCEEDING DIRECTLY OR INDIRECTLY ARISING OUT OF OR RELATING TO THIS AGREEMENT, OR THE TRANSACTIONS CONTEMPLATED BY THIS AGREEMENT. EACH PARTY CERTIFIES AND ACKNOWLEDGES THAT (i) NO REPRESENTATIVE, AGENT OR ATTORNEY OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT, IN THE EVENT OF ANY ACTION, SUIT OR PROCEEDING, SEEK TO ENFORCE THE FOREGOING WAIVER, (ii) EACH PARTY UNDERSTANDS AND HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (iii) EACH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (iv) EACH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION 9.5.

(c) The parties agree that irreparable damage would occur in the event that any of the provisions of this Agreement were not performed in accordance with their specific terms or were otherwise breached. It is accordingly agreed that the parties shall be entitled to an injunction or injunctions to prevent breaches of this Agreement and to enforce specifically the terms and provisions of this Agreement in the Court of Chancery of the State of Delaware, this being in addition to any other remedy to which such party is entitled at law or in equity.

9.6. Notices. Any notice, request, instruction or other document to be given hereunder by any party to the others shall be in writing and delivered personally or sent by registered or certified mail, postage prepaid, by facsimile, email or overnight courier:

Email: frumkinj@sullcrom.com
cohena@sullcrom.com

or to such other persons or addresses as may be designated in writing by the party to receive such notice as provided above. Any notice, request, instruction or other document given as provided above shall be deemed given to the receiving party upon actual receipt, if delivered personally; three business days after deposit in the mail, if sent by registered or certified mail; upon confirmation of successful transmission, if sent by facsimile or email (provided that if given by facsimile or email such notice, request, instruction or other document shall be followed up within one business day by dispatch pursuant to one of the other methods described herein); or on the next business day after deposit with an overnight courier, if sent by an overnight courier.

9.7. Entire Agreement. This Agreement (including any exhibits hereto), the Company Disclosure Letter, the Parent Disclosure Letter, the Subscription Agreement, the Confidentiality Agreement, dated March 7, 2014, between Parent and the Company (provided that the Confidentiality Agreement shall not be deemed to prevent Parent from exercising its rights under this Agreement) (as may be amended from time to time, the "Confidentiality Agreement") and the other agreements entered into in connection with preserving the confidentiality of information, constitute the entire agreement, and supersede all other prior agreements, understandings, representations and warranties both written and oral, among the parties, with respect to the subject matter hereof. EACH PARTY HERETO AGREES THAT, EXCEPT FOR THE REPRESENTATIONS AND WARRANTIES CONTAINED IN THIS AGREEMENT, NEITHER PARENT AND MERGER SUB NOR THE COMPANY MAKES OR RELIES ON ANY OTHER REPRESENTATIONS, WARRANTIES OR INDUCEMENTS, AND EACH HEREBY DISCLAIMS ANY OTHER REPRESENTATIONS, WARRANTIES OR INDUCEMENTS, EXPRESS OR IMPLIED, AS TO THE ACCURACY OR COMPLETENESS OF ANY OTHER INFORMATION, MADE BY, OR MADE AVAILABLE BY, ITSELF OR ANY OF ITS REPRESENTATIVES, WITH RESPECT TO, OR IN CONNECTION WITH, THE NEGOTIATION, EXECUTION OR DELIVERY OF THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY, NOTWITHSTANDING THE DELIVERY OR DISCLOSURE TO THE OTHER OR THE OTHER'S REPRESENTATIVES OF ANY DOCUMENTATION OR OTHER INFORMATION WITH RESPECT TO ANY ONE OR MORE OF THE FOREGOING.

9.8. No Third Party Beneficiaries. Except as provided in Section 6.11 (Indemnification; Directors' and Officers' Insurance) only, Parent and the Company hereby agree that their respective representations, warranties and covenants set forth herein are solely for the benefit of the other party hereto, in accordance with and subject to the terms of this Agreement, and this Agreement is not intended to, and does not, confer upon any Person other than the parties hereto any rights or remedies hereunder, including the right to rely upon the representations and warranties set forth herein. The parties hereto further agree that the rights of third party beneficiaries under Section 6.11 shall not arise unless and until the Effective Time occurs. The representations and warranties in this Agreement are the product of negotiations among the parties hereto and are for the sole benefit of the parties hereto. Any inaccuracies in such representations and warranties are subject to waiver by the parties hereto in accordance with Section 9.3

without notice or liability to any other Person. In some instances, the representations and warranties in this Agreement may represent an allocation among the parties hereto of risks associated with particular matters regardless of the knowledge of any of the parties hereto. Consequently, Persons other than the parties hereto may not rely upon the representations and warranties in this Agreement as characterizations of actual facts or circumstances as of the date of this Agreement or as of any other date.

9.9. Obligations of Parent and of the Company. Whenever this Agreement requires a Subsidiary of Parent to take any action, such requirement shall be deemed to include an undertaking on the part of Parent to cause such Subsidiary to take such action. Whenever this Agreement requires a Subsidiary of the Company to take any action, such requirement shall be deemed to include an undertaking on the part of the Company to cause such Subsidiary to take such action and, after the Effective Time, on the part of the Surviving Corporation to cause such Subsidiary to take such action.

9.10. Transfer Taxes. All transfer, documentary, sales, use, stamp, registration and other such Taxes and fees (including penalties and interest) incurred in connection with the Merger shall be paid by Parent and Merger Sub when due.

9.11. Definitions. Each of the terms set forth in Annex A is defined in the Section of this Agreement set forth opposite such term.

9.12. Severability. The provisions of this Agreement shall be deemed severable and the invalidity or unenforceability of any provision shall not affect the validity or enforceability of the other provisions hereof. If any provision of this Agreement, or the application thereof to any Person or any circumstance, is invalid or unenforceable, (a) a suitable and equitable provision shall be substituted therefor in order to carry out, so far as may be valid and enforceable, the intent and purpose of such invalid or unenforceable provision and (b) the remainder of this Agreement and the application of such provision to other Persons or circumstances shall not be affected by such invalidity or unenforceability, nor shall such invalidity or unenforceability affect the validity or enforceability of such provision, or the application thereof, in any other jurisdiction.

9.13. Interpretation; Construction. (a) The table of contents and headings herein are for convenience of reference only, do not constitute part of this Agreement and shall not be deemed to limit or otherwise affect any of the provisions hereof. Where a reference in this Agreement is made to a Section or Exhibit, such reference shall be to a Section of or Exhibit to this Agreement unless otherwise indicated. Whenever the words "include," "includes" or "including" are used in this Agreement, they shall be deemed to be followed by the words "without limitation."

(b) The parties have participated jointly in negotiating and drafting this Agreement. In the event that an ambiguity or a question of intent or interpretation arises, this Agreement shall be construed as if drafted jointly by the parties, and no presumption or burden of proof shall arise favoring or disfavoring any party by virtue of the authorship of any provision of this Agreement.

(c) Each party here has or may have set forth information in its respective Disclosure Letter in a section thereof that corresponds to the section of this Agreement to which it relates. The fact that any item of information is disclosed in a Disclosure Letter to this Agreement shall not be construed to mean that such information is required to be disclosed by this Agreement.

9.14. Assignment. This Agreement shall not be assignable by operation of law or otherwise; provided, however, that, prior to the mailing of the Proxy Statement to the Company's stockholders, Parent may designate, by written notice to the Company, another wholly-owned direct or indirect Subsidiary to be a Constituent Corporation in lieu of Merger Sub, in which event all references herein to Merger Sub shall be deemed references to such other Subsidiary, except that all representations and warranties made herein with respect to Merger Sub as of the date of this Agreement shall be deemed representations and warranties made with respect to such other Subsidiary as of the date of such designation; provided that any such designation shall not impede or delay the consummation of the Merger or otherwise materially impede the rights of the stockholders of the Company under this Agreement. Any purported assignment in violation of this Agreement is void.

IN WITNESS WHEREOF, this Agreement has been duly executed and delivered by the duly authorized officers of the parties hereto as of the date first written above.

CERTIFICATE OF INCORPORATION

OF

PURPLE ACQUISITION CORP.

The undersigned natural person of the age of eighteen years or more for the purpose of organizing a corporation for conducting the business and promoting the purposes hereafter stated, under the provisions and subject to the requirements of the laws of the State of Delaware (particularly Chapter 1, Title 8 of the Delaware Code and the acts amendatory thereof and supplemental thereto, and known, identified, and referred to as the "General Corporation Law of the State of Delaware"), hereby certifies that:

ARTICLE FIRST:

The name of the corporation is Purple Acquisition Corp. (hereafter the "Corporation").

ARTICLE SECOND:

The address of the Corporation's registered office in the State of Delaware is 2711 Centerville Road, Suite 400, Wilmington, Delaware, 19808, County of New Castle. The name of the registered agent at such address is the Corporation Service Company.

ARTICLE THIRD:

The nature of the business or purposes to be conducted or promoted is to engage in any lawful act or activity for which corporations may be organized under the General Corporation Law of the State of Delaware.

ARTICLE FOURTH:

The total number of shares of stock which the Corporation has the authority to issue is One Thousand (1,000) shares of Common Stock, with a par value of $0.01 per share.

ARTICLE FIFTH:

The name and address of the sole incorporator is as follows:

NAME:	**ADDRESS:**
Donna M.McClurkin-Fletcher	% Kirkland & Ellis LLP 655 Fifteenth Street, NW Washington, DC 20005

ARTICLE SIXTH:

The Corporation is to have perpetual existence.

ARTICLE SEVENTH:

In furtherance and not in limitation of the powers conferred by statute, the board of directors of the Corporation is expressly authorized to make, alter or repeal the Bylaws of the Corporation.

ARTICLE EIGHTH:

Meetings of stockholders may be held within or without the State of Delaware, as the Bylaws of the Corporation may provide. The books of the Corporation may be kept outside the State of Delaware at such place or places as may be designated from time to time by the board of directors or in the Bylaws of the Corporation. Election of directors need not be by written ballot unless the Bylaws of the Corporation so provide.

ARTICLE NINTH:

To the fullest extent permitted by the General Corporation Law of the State of Delaware, as the same exists or may hereafter be amended, a director of this Corporation shall not be liable to the Corporation or its stockholders for monetary damages for a breach of fiduciary duty as director. Any repeal or modification of this ARTICLE NINTH shall not adversely affect any right or protection of a director of the Corporation existing at the time of such repeal or modification.

ARTICLE TENTH:

The Corporation may, to the fullest extent permitted by Section 145 of the General Corporation Law of the State of Delaware, as the same may be amended and supplemented from time to time, indemnify any and all persons whom it shall have power to indemnify under said section from and against any and all of the expenses, liabilities or other matters referred to in or covered by said section, and the indemnification provided for herein shall not be deemed exclusive of any other rights to which a person indemnified may be entitled under any Bylaw, agreement, vote of stockholders or disinterested directors or otherwise, both as to action in his official capacity and as to action in another capacity while holding such office, and shall continue as to a person who has ceased to be a director, officer, employee or agent and shall inure to the benefit of the heirs, executors and administrators of such a person.

ARTICLE ELEVENTH:

The Corporation expressly elects not to be governed by Section 203 of the General Corporation Law of the State of Delaware.

ARTICLE TWELFTH:

The Corporation reserves the right to amend, alter, change or repeal any provision contained in this certificate of incorporation in the manner now or hereafter prescribed herein and by the laws of the State of Delaware, and all rights conferred upon stockholders herein are granted subject to this reservation.

I, the undersigned, being the sole incorporator hereinbefore named, for the purpose of forming a corporation pursuant to the General Corporation Law of the State of Delaware, do make and file this certificate, hereby declaring and certifying that the facts herein stated are true, and accordingly, have hereunto set my hand this 28th day of April, 2014.

/s/ Donna M. McClurkin-Fletcher

Donna M. McClurkin-Fletcher, Sole Incorporator

EXHIBIT B

Regulatory Commitments

[*This Page Intentionally Left Blank*]

Regulatory Commitments

The Company and Parent agree (a) that the applications submitted to the Governmental Entities with respect to the Merger shall include the information concerning the Merger, the Company and its Subsidiaries and Parent and its Subsidiaries required by applicable Law, (b) that such applications and any amendments or supplements thereto shall include such agreements or commitments as the Company and Parent agree are advisable to obtain prompt approval of such applications, (c) that such applications and any amendments or supplements thereto submitted to the Delaware Public Service Commission, the District of Columbia Public Service Commission, the Maryland Public Service Commission and the New Jersey Board of Public Utilities (collectively, the "State Commissions") shall include the commitments and agreements set forth below to the extent applicable to such jurisdictions and (d) that neither the Company nor Parent shall agree to, or accept, any additional or different agreements, commitments or conditions in connection with the Merger pursuant to any settlement or otherwise with any State Commission or any other Person without the prior written consent of the Company or Parent, as applicable, which consent shall not be unreasonably withheld, conditioned or delayed.

1. *Commitments Generally*. Parent affirms its support of each commitment set forth below that is made by the Company, Potomac Electric Power Company ("Pepco"), Delmarva Power & Light Company ("Delmarva Power") or Atlantic City Electric Company ("ACE"), as applicable, and Parent commits to cooperate with and support the Company in fulfilling and causing each of Pepco, Delmarva Power and ACE to fulfill each such commitment following the consummation of the Merger.

2. *The Merger*
    a. None of Pepco, Delmarva Power or ACE will seek to recover any acquisition premium or transaction costs in rates.
    b. None of Pepco, Delmarva Power or ACE will incur or assume any debt, including the provision of guarantees or collateral support, directly related to the Merger.

3. *Rates and Costs*
    a. Pepco, Delmarva Power and ACE will collectively provide tangible customer benefits with an aggregate value of $100 million, calculated to be at least $50 per distribution customer of Pepco, Delmarva Power and ACE.

4. *Reliability; Quality of Service*
    a. Each of Pepco, Delmarva Power and ACE commits to continue to implement its current plan to improve system reliability, and to improve upon each of their respective reliability targets. In the event that system reliability does not achieve increased performance levels, each utility will propose to suffer financial penalties as will be described in the applications for approval of the Merger to the State Commissions.
    b. Each of Parent and the Company commits to cause Pepco to continue to implement its District of Columbia undergrounding project as currently planned.

5. *Local Presence*
    a. As detailed in the applications for approval of the Merger to State Commissions following completion of the Merger:
        i. The Company will maintain the headquarters of the the Company system, with appropriate levels of senior management, at Edison Place in the District of Columbia.
        ii. Pepco will maintain its local operational headquarters in the District of Columbia at Edison Place.
        iii. Delmarva Power will maintain in place the New Castle Regional Office (NCRO).
        iv. ACE will maintain in place the Atlantic Regional Office at Mays Landing.
        v. Exelon Board, Committee or Subsidiary Board meetings or Leadership meetings will be periodically held in the District of Columbia.

6. *Labor and Employees*
    a. Each of Pepco, Delmarva Power and ACE will honor all existing collective bargaining agreements.
    b. Upon Approval of the transaction and for at least the first two years following consummation of the transaction, Parent shall not permit a net reduction, due to involuntary attrition as a result of the transaction integration process, in the employment levels at Pepco, Delmarva Power or ACE and shall provide current and former employees at Pepco, Delmarva Power and ACE compensation and benefits that are at least as favorable in the aggregate as the compensation and benefits provided to those employees immediately before the date of the Merger Agreement.
    c. The Company and Pepco, Delmarva Power, and ACE will continue their commitments to workforce diversity.

7. *Supplier Diversity*
    a. Each of Pepco, Delmarva Power and ACE will honor and maintain its commitment to existing supplier diversity programs.

8. *Low-Income Assistance*
    a. Each of Pepco, Delmarva Power and ACE will maintain and promote programs that provide assistance to low-income customers.

9. *Charitable Contributions and Community Initiatives*
    a. The Company and its subsidiaries will maintain aggregate charitable contributions and community support in the service territory of the Company system at Company's and its subsidiaries' 2013 levels, and continue such charitable contributions and community support at such levels for at least ten years following completion of the Merger, as will be described in more detail in the applications for approval of the Merger.

10. *Energy Efficiency*

a. The Company and its subsidiaries will maintain and promote existing energy efficiency and demand response programs.

11. Jurisdiction over Parent and its Affiliates

a. Parent submits to the jurisdiction of each State Commission for all matters related to the Merger and the enforcement of these commitments.
b. Parent submits to the jurisdiction of each applicable State Commission for matters relating to affiliate transactions between Pepco, Delmarva Power or ACE, as applicable on the one hand, and Parent and its other affiliates, on the other hand, and will cause each of its affiliates that supplies goods or services to Pepco, Delmarva Power or ACE to submit to the jurisdiction of each applicable State Commission for matters relating to the provision or cost of such goods or services to Pepco, Delmarva Power or ACE.

12. Organization; Financial Integrity; Ring-Fencing

a. Customers of Pepco, Delmarva Power and ACE will be protected from business and financial risk exposures associated with Parent's unregulated operations and activities through appropriate ring fencing provisions involving the placement of a bankruptcy-remote special purpose entity as the Parent subsidiary holding the equity interests in the Company, as will be described in more detail in the applications for approval of the Merger.
b. Parent and the Company will commit to implement the following ring-fencing arrangements for at least five years following completion of the Merger absent permission from the state commissions to act otherwise:
    i. Each of Pepco, Delmarva Power and ACE will maintain its separate existence and its separate franchises and privileges.
    ii. Each of Pepco, Delmarva Power and ACE will maintain separate books and records.
    iii. Each of Pepco, Delmarva Power and ACE will commit that all books and records of it pertaining to its operations in each of the jurisdictions in which it has regulated operations will be available for inspection and examination by each applicable State Commission with jurisdiction over such operations.
    iv. Each of Pepco, Delmarva Power and ACE will maintain separate debt so that none will be responsible for the debts of affiliated companies and preferred stock, if any, and will maintain its own corporate and debt credit rating as well as ratings for long-term debt and preferred stock.
    v. Maintenance of common equity ratio:
        - Pepco will maintain at least a common equity ratio consistent with the common equity ratios accepted in recent rate cases by the District of Columbia Public Service Commission and the Maryland Public Service Commission for Pepco.
        - Delmarva Power will maintain at least a common equity ratio consistent with the common equity ratios accepted in recent rate cases by the Delaware Public Service Commission and the Maryland Public Service Commission for Delmarva Power.

- ACE will maintain at least a common equity ratio consistent with the common equity ratios accepted in recent rate cases by the New Jersey Board of Public Utilities for ACE.

13. Affiliate Transactions

a. Parent commits to comply and to cause Pepco, Delmarva Power and ACE and other affiliates of Parent to comply with the statutes and regulations applicable to Pepco, Delmarva Power and ACE regarding affiliate transactions.
b. Parent commits that each applicable State Commission may examine accounting records of its affiliates that are the basis for charges to Pepco, Delmarva Power or ACE to determine the reasonableness of allocation factors used by Parent to assign costs to Pepco, Delmarva Power and ACE and amounts subject to allocation and direct charges.

EXHIBIT C

Form of Certificate of Designation for Nonvoting Preferred Stock

[*This Page Intentionally Left Blank*]

CERTIFICATE OF DESIGNATION

OF

SERIES A NON-VOTING NON-CONVERTIBLE PREFERRED STOCK

OF

PEPCO HOLDINGS, INC.

Pursuant to Section 151 of the
General Corporation Law of the State of Delaware

Pepco Holdings, Inc., a Delaware corporation (the "Company"), hereby certifies that:

1. The Restated Certificate of Incorporation of the Company (the "Certificate of Incorporation") fixes the total number of shares of all classes of capital stock that the Company shall have the authority to issue at four hundred million (400,000,000) shares of common stock, par value $0.01 per share, and forty million (40,000,000) shares of preferred stock, par value $0.01 per share.

2. The Certificate of Incorporation expressly grants to the Board of Directors of the Company (the "Board of Directors") authority to provide for the issuance of the shares of preferred stock in series, and to establish from time to time the number of shares to be included in each such series and to fix the designation, preferences, privileges, voting powers and other rights of the shares of each such series and the qualifications, limitations or restrictions thereon.

3. The following resolution was adopted by action duly taken by the Board of Directors on April 29, 2014:

RESOLVED, that, pursuant to Article IV, Section C, of the Restated Certificate of Incorporation of the Company, the Board hereby authorizes the issuance of the Preferred Stock and the designation, preferences, privileges, voting powers and other rights of the shares of such Preferred Stock and the qualifications, limitations or restrictions thereon are as set forth in the certificate of designations establishing the Preferred Stock (the "Certificate of Designations"):

Section 1. Designation.

The designation of the series of preferred stock shall be "Series A Non-Voting Non-Convertible Preferred Stock" (the "Series A Preferred Stock"). Each share of Series A Preferred Stock shall be identical in all respects to every other share of Series A Preferred Stock. Series A Preferred Stock will rank equally with Parity Stock, if any, will rank senior to Junior Stock and will rank junior to Senior Stock, if any, with respect to the distribution of assets in the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Company.

Section 2. Number of Shares.

The number of authorized shares of Series A Preferred Stock shall be 18,000. That number from time to time may be decreased (but not below the number of shares of Series A Preferred Stock then outstanding) by further resolution duly adopted by the Board of Directors, or any duly authorized committee thereof and by the filing of a certificate pursuant to the provisions of the General Corporation Law of the State of Delaware stating that such reduction has been so authorized. The Company shall have the authority to issue fractional shares of Series A Preferred Stock. Shares of Series A Preferred Stock that are redeemed, purchased or otherwise acquired by the Company shall be canceled and shall revert to authorized but unissued shares of preferred stock undesignated as to series.

Section 3. Definitions. As used herein with respect to Series A Preferred Stock:

"Affiliate" of any specified Person means any other Person directly or indirectly controlling or controlled by or under direct or indirect common control with such specified Person. For the purposes of this definition, "control" when used with respect to any specified Person, means the power to direct the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise; and the terms "controlling" and "controlled" have meanings correlative to the foregoing.

"Board of Directors" has the meaning set forth in the recitals above.

"Business Day" means any weekday that is not a legal holiday in New York, New York and is not a day on which banking institutions in New York, New York are authorized or required by law or regulation to be closed.

"Common Stock" means the common stock of the Company, par value $0.01 per share, or any other shares of the capital stock of the Company into which such shares of common stock shall be reclassified or changed.

"Dividend Payment Date" has the meaning set forth in Section 4(a).

"Dividend Period" has the meaning set forth in Section 4(a).

"Dividend Record Date" has the meaning set forth in Section 4(a).

"Holder" means the Person in whose name the shares of the Series A Preferred Stock are registered, which may be treated by the Company and, if applicable, any transfer agent, registrar and paying agent as the absolute owner of the shares of Series A Preferred Stock for the purpose of making payment and for all other purposes.

"Junior Stock" means the Common Stock and any other class or series of stock of the Company now existing or hereafter authorized over which Series A Preferred Stock has preference or priority in the payment of dividends or in the distribution of assets on any voluntary or involuntary liquidation, dissolution or winding up of the Company.

"Liquidation Preference Amount" means $10,000.

"Merger Agreement" means the Agreement and Plan of Merger, dated as of April 29, 2014, by and among the Company, Exelon Corporation, a Pennsylvania corporation, and Purple Acquisition Corp., a Delaware corporation and wholly-owned subsidiary of Exelon Corporation.

"Other Merger Agreement Termination Event" means any termination of the Merger Agreement that is not a Regulatory Termination (as such term is defined in the Merger Agreement).

"Parity Stock" means any class or series of stock of the Company hereafter authorized that ranks equally with the Series A Preferred Stock in the payment of dividends and in the distribution of assets on any liquidation, dissolution or winding up of the Company.

"Person" means a legal person, including any individual, corporation, estate, partnership, joint venture, association, joint-stock company, limited liability company or trust.

"Redemption Event" has the meaning set forth in Section 4(a).

"Regulatory Failure Merger Agreement Termination Event" means the occurrence of a Regulatory Termination (as such term is defined in the Merger Agreement).

"Senior Stock" means any class or series of stock of the Company now existing or hereafter authorized which has preference or priority over the Series A Preferred Stock as to the payment of dividends or in the distribution of assets on any voluntary or involuntary liquidation, dissolution or winding up of the Company.

"Series A Preferred Stock" has the meaning set forth in Section 1.

Section 4. Dividends.

(a) **Rate.** Holders shall be entitled to receive, if, as and when declared by the Board of Directors, or any duly authorized committee thereof, but only out of assets legally available therefor, cumulative, non-participating cash dividends on the Liquidation Preference Amount per share of Series A Preferred Stock at the rate per annum specified below, and no more, payable quarterly in arrears on March 31, June 30, September 30 and December 31 of each year; provided, however, if any such day is not a Business Day, then payment of any dividend otherwise payable on that date will be made on the next succeeding day that is a Business Day, unless that day falls in the next calendar year, in which case payment of such dividend will occur on the immediately preceding Business Day (in either case, without any interest or other payment in respect of such delay) (each such day on which dividends are payable a "Dividend Payment Date"). The period from and including the date of issuance of the Series A Preferred Stock or any Dividend Payment Date to, but excluding, the next Dividend Payment Date is a "Dividend Period." Dividends on each share of Series A Preferred Stock will accrue daily on the

Liquidation Preference Amount per share (as from the date on which a Holder acquires such share of Series A Preferred Stock until the occurrence of a Regulatory Failure Merger Agreement Termination Event, an Other Merger Agreement Termination Event, or any redemption pursuant to Section 6(a)(i) (each, a "Redemption Event") at a rate per annum equal to 0.1% (one-tenth of one percent). If, on any Dividend Payment Date, the Company fails to pay dividends in respect of the Series A Preferred Stock equal to all dividends on the Series A Preferred Stock accrued but unpaid as of such date, the accrued but unpaid dividends on the Series A Preferred Stock shall nonetheless accumulate and compound (at a rate per annum equal to 0.1% (one-tenth of one percent)) on such Dividend Payment Date and shall remain accumulated, compounding dividends at such 0.1% rate, until paid pursuant hereto. The record date for payment of dividends on the Series A Preferred Stock will be the fifteenth day of the calendar month in which the Dividend Payment Date falls or such other record date fixed by the Board of Directors, or any duly authorized committee thereof, that is not more than 30 nor less than 10 days prior to such Dividend Payment Date (each, a "Dividend Record Date"). Any such day that is a Dividend Record Date will be a Dividend Record Date whether or not such day is a Business Day. The amount of dividends payable will be computed on the basis of a 360 day year of twelve 30 day months. As from the date and time of a Redemption Event, any pending dividend payments in respect of the Series A Preferred Stock shall be canceled and no further dividends in respect of the Series A Preferred Stock shall be payable.

(b) **Priority of Dividends.** Such dividends payable in cash, stock or otherwise, as may be determined by the Board of Directors or a duly authorized committee thereof, may be declared and paid on any Senior Stock, Junior Stock and Parity Stock from time to time out of any assets legally available for such payment, and Holders will not be entitled to participate in those dividends. Neither the declaration nor the paying by the Company of, nor the failure by the Company to declare or pay, dividends to the Holders of the Series A Preferred Stock shall be a pre-condition to, prohibit or otherwise have any effect on, the declaration or payment of any dividend in respect of any Senior Stock, Junior Stock or Parity Stock or any other class or series of authorized stock of the Company.

Section 5. Liquidation Rights.

(a) **Liquidation.** In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Company, Holders shall be entitled, out of assets legally available therefor, before any distribution or payment out of the assets of the Company may be made to or set aside for the holders of any Junior Stock and subject to the rights of the holders of any class or series of securities ranking senior to or on parity with Series A Preferred Stock upon liquidation and the rights of the Company's depositors and other creditors, to receive in full a liquidating distribution in the amount of the Liquidation Preference Amount per share, plus any any unpaid accrued and accumulated dividends thereon from the last dividend payment date to, but excluding, the date of the liquidation, dissolution or winding up, if and to the extent declared. Holders shall not be entitled to any further payments in the event of any such voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Company other than what is expressly provided for in this Section 5.

(b) **Partial Payment.** If the assets of the Company are not sufficient to pay in full the liquidation preference plus any dividends which have been declared but not yet paid to all

Holders and all holders of any Parity Stock, the amounts paid to the Holders and to the holders of all Parity Stock shall be *pro rata* in accordance with the respective aggregate liquidating distributions to which they would otherwise be entitled.

(c) **Residual Distributions.** If the respective aggregate liquidating distributions to which all Holders and all holders of any Parity Stock are entitled have been paid, the holders of Junior Stock shall be entitled to receive all remaining assets of the Company according to their respective rights and preferences.

(d) **Merger, Consolidation and Sale of Assets Not Liquidation.** For purposes of this Section 5, unless waived by Holders of a majority of the shares of Series A Preferred Stock, the sale, conveyance, exchange or transfer (for cash, shares of stock, securities or other consideration) of all or substantially all of the property and assets of the Company shall be deemed a voluntary or involuntary dissolution, liquidation or winding up of the affairs of the Company, and the merger, consolidation or any other business combination transaction of the Company into or with any other corporation or person or the merger, consolidation or any other business combination transaction of any other corporation or person into or with the Company other than the Merger contemplated by the Merger Agreement shall be deemed to be a voluntary or involuntary dissolution, liquidation or winding up of the affairs of the Company.

Section 6. Redemption.

(a) **Optional Redemption.**

(i) *Optional Redemption at Any Time.* The Company, at the option of its Board of Directors, or any duly authorized committee thereof, may, at any time, redeem out of funds legally available therefor, in whole or in part, the shares of Series A Preferred Stock at the time outstanding, upon notice given as provided in Section 6(c) below, at a redemption price equal to the Liquidation Preference Amount per share, *plus* any unpaid accrued and accumulated dividends thereon.

(ii) *Optional Redemption in Connection with a Regulatory Failure Merger Agreement Termination Event.* In the event that a Regulatory Failure Merger Agreement Termination Event occurs, the Company, at the option of its Board of Directors, or any duly authorized committee thereof, may redeem all of the shares of Series A Preferred Stock at the time outstanding, which redemption shall be effective as of the time of such Regulatory Failure Merger Agreement Termination Event, at a redemption price equal to $0.01 per share. As of the time of such Regulatory Failure Merger Agreement Termination Event, all of the shares of Series A Preferred Stock shall be considered redeemed and no longer outstanding. For the avoidance of doubt, the delivery, pursuant to the Merger Agreement, of a notice of the Regulatory Termination (as such term is defined in the Merger Agreement) of the Merger Agreement shall be sufficient notice to the Holders of the redemption of the Series A Preferred

Stock pursuant to this Section 6(a)(ii) and shall be effective immediately upon delivery.

(b) **Mandatory Redemption in Connection with an Other Merger Agreement Termination Event.** In the event that an Other Merger Agreement Termination Event occurs, the Company shall promptly provide notice as contemplated by Section 6(c) below and redeem out of funds legally available therefor, in whole, the shares of Series A Preferred Stock at the time outstanding, at a redemption price equal to the Liquidation Preference Amount per share, *plus* any unpaid accrued and accumulated dividends thereon.

(c) **Notice of Redemption.** Notice of any redemption of shares of Series A Preferred Stock pursuant to Section 6(a)(i) or Section 6(b) shall be mailed by first class mail, postage prepaid, addressed to the Holders of such shares to be redeemed at their respective last addresses appearing on the stock register of the Company. Such mailing shall be at least five business days and not more than 30 days before the date fixed for redemption. Any notice mailed as provided in this Section 6(c) shall be conclusively presumed to have been duly given, whether or not the Holder receives such notice, but failure duly to give such notice by mail, or any defect in such notice or in the mailing thereof, to any Holder of shares of Series A Preferred Stock designated for redemption shall not affect the validity of the proceedings for the redemption of any other shares of Series A Preferred Stock. Each notice shall state:

(i) the redemption date;

(ii) the number of shares of Series A Preferred Stock to be redeemed;

(iii) the redemption price;

(iv) the place or places where the certificates for such shares are to be surrendered for payment of the redemption price; and

(v) that dividends on the shares to be redeemed will cease to accrue on the redemption date.

Section 7. Conversion Rights.

Series A Preferred Stock shall not be convertible into Senior Stock, Junior Stock or any other security, and does not otherwise have any conversion rights.

Section 8. Voting Rights.

(a) Except as otherwise provided in Section 8(b) hereof or as otherwise required by law, the holders of Series A Preferred Stock shall have no right or power to vote on any matter submitted to a vote of stockholders.

(b) The Company shall not (by amendment, merger, consolidation or otherwise), without the prior approval, by vote or written consent, of the holders of a majority of the Series

A Preferred Stock then outstanding, voting as a separate class, (i) increase the authorized number of shares of Series A Preferred Stock or (ii) amend or repeal the Certificate of Incorporation in any manner which adversely affects the rights, preferences or voting powers of the Series A Preferred Stock.

Section 9. Preemption.

The Holders shall not have any rights of preemption.

Section 10. Rank.

Notwithstanding anything set forth in the Certificate of Incorporation or this Certificate of Designation to the contrary, the Board of Directors, or any duly authorized committee thereof, without the vote of the Holders, may authorize and issue additional shares of Junior Stock, Parity Stock or any class or series of Senior Stock or any other securities ranking senior to the Series A Preferred Stock as to dividends and/or the distribution of assets upon any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Company.

Section 11. Repurchase.

Subject to the limitations imposed herein, the Company may purchase and sell Series A Preferred Stock from time to time to such extent, in such manner, and upon such terms as the Board of Directors, or any other duly authorized committee thereof, may determine; provided, however, that the Company shall not use any of its funds for any such purchase when there are reasonable grounds to believe that the Company is, or by such purchase would be, rendered insolvent.

Section 12. Unissued or Reacquired Shares.

Shares of Series A Preferred Stock not issued or which have been issued and redeemed or otherwise purchased or acquired by the Company shall be restored to the status of authorized but unissued shares of preferred stock without designation as to series.

Section 13. No Sinking Fund.

Shares of Series A Preferred Stock are not subject to the operation of a sinking fund.

Section 14. Transfer Agent, Registrar and Paying Agent.

The Company shall be the initial transfer agent, registrar and paying agent for the Series A Preferred Stock and may, at its discretion, appoint a substitute, transfer agent, registrar or paying agent, provided that the Company provides notice of such substitution by first-class mail, postage prepaid, to the Holders.

Section 15. Replacement Certificates.

If physical certificates are issued, the Company shall replace any mutilated certificate at the Holder's expense upon surrender of that certificate to the Company. The Company shall replace certificates that become destroyed, stolen or lost at the Holder's expense upon delivery to the Company of satisfactory evidence that the certificate has been destroyed, stolen or lost, together with any indemnity that may be required by the Company.

Section 16. Transfer Taxes.

The Company shall pay any and all stock transfer, documentary, stamp and similar taxes that may be payable in respect of any issuance or delivery of shares of Series A Preferred Stock or certificates representing such shares. The Company shall not, however, be required to pay any such tax that may be payable in respect of any transfer involved in the issuance or delivery of shares of Series A Preferred Stock in a name other than that in which the shares of Series A Preferred Stock with respect to which such shares or other securities are issued or delivered were registered, or in respect of any payment to any Person other than a payment to the registered holder thereof, and shall not be required to make any such issuance, delivery or payment unless and until the Person otherwise entitled to such issuance, delivery or payment has paid to the Company the amount of any such tax or has established, to the satisfaction of the Company, that such tax has been paid or is not payable.

Section 17. Notices.

All notices referred to herein shall be in writing, and, unless otherwise specified herein, all notices hereunder shall be deemed to have been given upon the earlier of receipt thereof or three Business Days after the mailing thereof if sent by registered or certified mail (unless first class mail shall be specifically permitted for such notice under the terms of this Certificate of Designation) with postage prepaid, addressed: (i) if to the Company, to its office at 701 Ninth Street, N.W., Washington, D.C. 20068 (Attention: Corporate Secretary) or other agent of the Company designated as permitted by this Certificate of Designation or (ii) if to any Holder, to, 10 S. Dearborn, Corporate Headquarters, 54th Floor, Chicago, IL 60603 (Attention: General Counsel).

Section 18. Derivative Actions.

The shares of Series A Preferred Stock shall not confer upon its Holders any right to bring derivative actions against or on behalf of the Company.

Section 19. Restrictions On Transfer.

The Series A Preferred Stock is non-transferrable, except as expressly permitted pursuant to the redemption provisions of Section 6. No Holder may offer, reoffer, sell, assign, transfer, pledge, encumber, hypothecate, grant or otherwise dispose of any of the shares of Series A Preferred Stock, and no Holder shall enter into any agreement to do any of the foregoing. Any transfer or purported transfer of Series A Preferred Stock in violation of the foregoing restrictions shall be null, void and of no effect.

Section 20. Other Rights.

The shares of Series A Preferred Stock shall not have any powers, preferences or relative, participating, optional or other special rights, other than as specifically set forth herein or in the Certificate of Incorporation.

IN WITNESS WHEREOF, this Certificate of Designation has been executed on behalf of the Company by its Chairman of the Board, President and Chief Executive Officer this 29th day of April, 2014.

FORM OF
SERIES A NON-VOTING NON-CONVERTIBLE PREFERRED STOCK

FACE OF SECURITY

THIS SECURITY HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE SECURITIES ACT OF 1933, AS AMENDED (TOGETHER WITH THE RULES AND REGULATIONS PROMULGATED THEREUNDER, THE "SECURITIES ACT"), OR THE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES OR ANY OTHER JURISDICTION.

THE SERIES A PREFERRED STOCK IS NON-TRANSFERRABLE, EXCEPT AS EXPRESSLY PERMITTED PURSUANT TO THE REDEMPTION PROVISIONS OF SECTION 6 OF THE CERTIFICATE OF DESIGNATION, AS THE SAME MAY BE AMENDED FROM TIME TO TIME. NO HOLDER MAY OFFER, REOFFER, SELL, ASSIGN TRANSFER, PLEDGE, ENCUMBER, HYPOTHECATE, GRANT OR OTHERWISE DISPOSE OF ANY OF THE SHARES OF SERIES A PREFERRED STOCK, AND NO HOLDER SHALL ENTER INTO ANY AGREEMENT TO DO ANY OF THE FOREGOING. ANY TRANSFER OR PURPORTED TRANSFER OF SERIES A PREFERRED STOCK IN VIOLATION OF THE FOREGOING RESTRICTIONS SHALL BE NULL, VOID AND OF NO EFFECT.

Certificate Number_______ Number of Shares of Series A Preferred Stock______

Series A Non-Voting Non-Convertible Preferred Stock
(par value $0.01 per share)
(liquidation preference U.S.$10,000 per share)
of
PEPCO HOLDINGS, INC.

Pepco Holdings, Inc., a Delaware corporation (the "Company"), hereby certifies that [ ] (the "Holder") is the registered owner of [ ] fully paid and non-assessable preferred shares of the Company designated the Series A Non-Voting Non-Convertible Preferred Stock, with a par value of $0.01 per share and a liquidation preference of U.S.$10,000 per share (the "Series A Preferred Stock"). The Series A Preferred Stock is non-transferrable, except as expressly permitted pursuant to the redemption provisions of Section 6 of the Certificate of Designation (as defined below). No Holder may offer, reoffer, sell, assign, transfer, pledge, encumber, hypothecate, grant or otherwise dispose of any of the shares of Series A Preferred Stock, and no Holder shall enter into any agreement to do any of the foregoing. Any transfer or purported transfer of Series A Preferred Stock in violation of the foregoing restrictions shall be null, void and of no effect. The designations, rights, privileges, restrictions, preferences and other terms and provisions of the Series A Preferred Stock represented hereby are issued and shall in all respects be subject to the provisions of the Certificate of Designation dated April [29], 2014 as the same may be amended from time to time (the "Certificate of Designation"). Capitalized terms used herein but not defined shall have the meaning given them in the Certificate of Designation. The Company will provide a copy of the Certificate of Designation to a Holder without charge upon written request to the Company at its principal place of business.

Reference is hereby made to select provisions of the Series A Preferred Stock set forth on the reverse hereof, and to the Certificate of Designation, which select provisions and the Certificate of Designation shall for all purposes have the same effect as if set forth at this place.

Upon receipt of this certificate, the Holder is bound by the Certificate of Designation and is entitled to the benefits thereunder.

IN WITNESS WHEREOF, this certificated has been executed on behalf of the Company by its [*Title*] this [29th] day of April, 2014.

PEPCO HOLDINGS, INC.

REVERSE OF SECURITY

Dividends on each share of Series A Preferred Stock shall be payable at the rate provided in the Certificate of Designation.

The shares of Series A Preferred Stock are not convertible into any other securities and bear no other conversion rights.

The shares of Series A Preferred Stock shall be redeemable at option of the Company in the manner and accordance with the terms set forth in the Certificate of Designation.

The shares of Series A Preferred Stock are subject to mandatory redemption by the Company in the manner and accordance with the terms set forth in the Certificate of Designation.

The Series A Preferred Stock is non-transferrable, except as expressly permitted pursuant to the redemption provisions of Section 6 of the Certificate of Designation. No Holder may offer, reoffer, sell, assign, transfer, pledge, encumber, hypothecate, grant or otherwise dispose of any of the shares of Series A Preferred Stock, and no Holder shall enter into any agreement to do any of the foregoing. Any transfer or purported transfer of Series A Preferred Stock in violation of the foregoing restrictions shall be null, void and of no effect.

The shares of Series A Preferred Stock shall not have voting rights or consent rights on any matter except in each case as required by Delaware law.

The shares of Series A Preferred Stock shall not confer upon its Holders any right to bring derivative actions against or on behalf of the Company.

The Company shall furnish without charge to each holder who so requests the powers, designations, preferences and relative, participating, optional or other special rights of each class or series of share capital issued by the Company and the qualifications, limitations or restrictions of such preferences and/or rights.

EXHIBIT 5

EXHIBIT 5 – JOINT APPLICANTS' COMMITMENTS

Commitment 1 – Merger Impact on Rates

Potomac Electric Power Company ("Pepco") will not seek recovery in rates of: (1) any acquisition premium associated with the Merger; or (2) any transaction costs incurred in connection with the Merger by Exelon Corporation ("Exelon"), Pepco Holdings, Inc. ("PHI"), or their subsidiaries. In addition, Pepco will not incur or assume any debt, including the provision of guarantees or collateral support, directly related to the Merger.

Commitment 2 – Customer Investment Fund

After consummation of the Merger, Exelon will establish a $14 million Exelon-funded Customer Investment Fund to be used across Pepco's District of Columbia service territory at the District of Columbia Public Service Commission's discretion. This fund represents a benefit of at least $50 per District of Columbia distribution customer of Pepco.

Commitment 3 – Reliability and Quality of Service

Pepco commits to continue to implement its current plan to improve system reliability and to improve upon each of its reliability targets. Specifically, Exelon commits to Pepco achieving the following reliability performance levels by 2020, based on a three-year historical average calculated over the 2018-2020 period: (1) the System Average Interruption Frequency Index will not exceed 0.54 interruptions; and (2) the System Average Interruption Duration Index will not exceed 107 minutes. In the event that system reliability does not achieve increased performance levels, Pepco will be subject to financial penalties as described in the direct testimony of Carim V. Khouzami. PHI and Exelon commit to cause Pepco to continue to implement its District of Columbia undergrounding project as currently planned.

Commitment 4 – Local Presence

PHI will maintain its headquarters, with appropriate levels of senior management, in the District of Columbia. Pepco will maintain its local operational headquarters in the District of Columbia. Exelon Board of Directors' meetings and other leadership meetings will be periodically held in the District of Columbia.

Commitment 5 – Labor, Employment and Compensation

Pepco will honor all existing collective bargaining agreements. Upon approval of the Merger and for at least the first two years following consummation of the Merger, Exelon: (1) will not permit a net reduction, due to involuntary attrition as a result of the Merger integration process, in the employment levels at Pepco, and (2) will provide current and former Pepco employees compensation and benefits that are at least as favorable in the aggregate as the compensation and benefits provided to those employees immediately before April 29, 2014. PHI and Pepco will also continue its commitments to workforce diversity.

Commitment 6 – Supplier Diversity

Pepco will honor and maintain its commitment to existing supplier diversity programs.

Commitment 7 – Low-Income Assistance

Pepco will maintain and promote programs that provide assistance to low-income customers.

Commitment 8 – Charitable Contributions and Community Initiatives

In the District of Columbia, Exelon and its subsidiaries shall, during the ten-year period following consummation of the Merger, provide at least an annual average of charitable contributions and traditional local community support that exceeds PHI's and Pepco's 2013 level.

Commitment 9 – Energy Efficiency

PHI and Pepco will maintain and promote existing energy efficiency and demand response programs.

Commitment 10 – Exelon's Consent to Jurisdiction

Exelon submits to the jurisdiction of the District of Columbia Public Service Commission for: (1) all matters related to the Merger and the enforcement of the commitments set forth herein; and (2) matters relating to affiliate transactions between Pepco and Exelon or its affiliates. Exelon will also cause each of its affiliates that supplies goods or services to Pepco to submit to the jurisdiction of the District of Columbia Public Service Commission for matters relating to the provision or costs of such goods or services to Pepco.

Commitment 11 – Corporate Organization, Financial Integrity and Ring-Fencing

A bankruptcy-remote special purpose entity will be established as the Exelon subsidiary holding the equity interests in PHI. In addition, Exelon and PHI commit to implement the following ring-fencing arrangements for at least five years following completion of the Merger, absent permission from the District of Columbia Public Service Commission to act otherwise: (1) Pepco will maintain its separate existence and its separate franchises and privileges; (2) Pepco will maintain separate books and records; (3) Pepco's books and records pertaining to its operations in the District of Columbia will be available for inspection and examination by the District of Columbia; (4) Pepco will maintain separate debt so that it will not be responsible for the debts of affiliate companies and preferred stock, if any, and Pepco will maintain its own corporate and debt credit rating, as well as ratings for long-term debt and preferred stock; and (5) Pepco will maintain a common equity ratio consistent with such ratios accepted in recent rate cases by the District of Columbia Public Service Commission.

Commitment 12– Affiliate Transactions

Exelon commits to comply and cause Pepco and other Exelon affiliates to comply with the statutes and regulations applicable to Pepco regarding affiliate transactions. Exelon also commits that the District of Columbia Public Service Commission may examine the accounting records of Exelon's affiliates that are the basis for charges to Pepco to determine the reasonableness of allocation factors used by Exelon to assign those costs and amounts subject to allocation and direct charges.

EXHIBIT 6

EXHIBIT 6

Proposed List of Issues[1]

(1) What are the Joint Applicants' estimates of the costs, benefits, and net savings associate with the merger?

(2) How will the costs and savings be measure, monitored, and demonstrated?

(3) What are the short and long-term effects of the merger on Pepco's prices charged to District of Columbia customers?[2]

(4) How will the merger affect employment at Pepco and PHI?

(5) Will the Commission's ability to regulate Pepco, or its regulated and unregulated subsidiaries, be impaired by the proposed merge, including gaining access to accounts and financial records?

(6) How, if at all, would the merger affect the ability or willingness of Pepco to provide standard offer or default service to customers in the District of Columbia?

(7) What effect, if any, will the merger have on the quality of customer electricity services in the District of Columbia?

(8) What will be the effect, if any, of the merger on the safety and reliability of providing electricity in the District of Columbia?

(9) What are the short and long-term effects of the merger on the distribution facilities of Pepco employed in serving District of Columbia customers?

(10) Are the reliability guarantees and associated penalty mechanisms proposed by the Joint Applicants reasonable, necessary and appropriate?[3]

(11) What safeguards, if any, should the Commission establish to ensure that PHI regulated subsidiaries (i.e., Pepco) do not subsidize unregulated subsidiaries, affiliates, or the overall corporate structure?

---

[1] With the exception of Issue Nos. 15 and 16, the proposed list of issues are the issues that were designated by the Commission for consideration of the proposed merger in Formal Case No. 1002. The Company also proposing removing what was designated as Issue No. 14 - What authority will the Commission have over the issuance of securities by the parent companies?

[2] Issue No. 3 was modified to remove the reference to "price caps" which were in place at the time of consideration of Formal Case No. 1002.

[3] Issue No. 10 modified to reflect that the Company is making both a reliability guarantee and proposing an associated penalty mechanism.

(12) What will be the impact of the merger on local electricity competition in the District of Columbia?

(13) What impact, if any, will the merger of the Joint Applicants' transmission facilities operated by the PJM Interconnection LLC have on ratepayers in the District of Columbia?

(14) What effect will the merger have on the capital structure of the District of Columbia jurisdictional operations?

(15) What risks, costs, and benefits associate with Exelon's nuclear operations will District of Columbia customers be required to bear as a result of the merger?

(16) What impact will the merger, if any, have on plans to underground Pepco's distribution feeders in the District of Columbia?

EXHIBIT 7

GENERAL SERVICES AGREEMENT

BETWEEN

EXELON BUSINESS SERVICES COMPANY

AND

EXELON CORPORATION; EXELON ENERGY DELIVERY COMPANY, LLC; COMMONWEALTH EDISON COMPANY; PECO ENERGY COMPANY; EXELON VENTURES COMPANY, LLC; EXELON GENERATION COMPANY, LLC; EXELON ENTERPRISES COMPANY, LLC; UNICOM INVESTMENT INC.; AND THE SUBSIDIARIES, AFFILIATES AND ASSOCIATES OF EACH LISTED ENTITY.

THIS AGREEMENT, made and entered into this 1st day of January, 2001, by and between the following Parties: EXELON BUSINESS SERVICES COMPANY ("Services Company"), EXELON CORPORATION; EXELON ENERGY DELIVERY COMPANY, LLC; COMMONWEALTH EDISON COMPANY; PECO ENERGY COMPANY; EXELON VENTURES COMPANY, LLC; EXELON GENERATION COMPANY, LLC; EXELON ENTERPRISES COMPANY, LLC; UNICOM INVESTMENT INC; AND THE SUBSIDIARIES, AFFILIATES AND ASSOCIATES OF EACH LISTED ENTITY (collectively, the "Client Companies");

WITNESSETH:

WHEREAS, Client Companies, including EXELON CORPORATION, which is registered under the terms of the Public Utility Holding Company Act of 1935 (the "Act") and its other subsidiaries, affiliates and associates desire to enter into this agreement providing for the performance by Services Company for the Client Companies of certain services as more particularly set forth herein;

WHEREAS, Services Company is organized, staffed and equipped and has filed with the Securities and Exchange Commission ("the SEC") to be a subsidiary service company under Section 13 of the Act to render to EXELON CORPORATION, and other subsidiaries, affiliates and associates of EXELON CORPORATION, certain services as herein provided; and

WHEREAS, to maximize efficiency, and to achieve merger related savings, the Client Companies desire to avail themselves of the advisory, professional, technical and other services of persons employed or to be retained by Services Company, and to compensate Services Company appropriately for such services;

NOW, THEREFORE, in consideration of these premises and of the mutual agreements set forth herein, the Parties agree as follows:

Section 1. Agreement to Provide Services

Services Company agrees to provide to Client Companies, upon the terms and conditions set forth herein, the services hereinafter referred to and described in Section 2, at such times, for such period and in such manner as Client Companies may from time to time request. Except with respect to "Corporate Governance Services" as defined in Section 7 hereof, the Services Company shall perform only those services as are requested by the Client Companies. Services Company will keep itself and its personnel available and competent to provide to Client Companies such services so long as it is authorized to do so by the appropriate federal and state regulatory agencies. In providing such services, Services Company may arrange, where it deems appropriate, for the services of such experts, consultants, advisers and other persons with necessary qualifications as are required for or pertinent to the provision of such services.

Section 2. Services to be Provided

The services expected to be provided by Services Company hereunder may, upon request by a Client Company, include the services as set out in Schedule 2, attached hereto and made a part hereof. In addition to those identified in Schedule 2, Services Company shall provide such additional general or special services, whether or not now contemplated, as Client Companies may request from time to time and Services Company determines it is able to provide.

Notwithstanding the foregoing paragraph, no change in the organization of the Services Company, the type and character of the companies to be serviced, the factors for allocating costs to associate companies, or in the broad general categories of services to be rendered subject to Section 13 of the Act, or any rule, regulation or order thereunder, shall be made unless and until the Services Company shall first have given the SEC written notice of the proposed change not less than 60 days prior to the proposed effectiveness of any such change. If, upon the receipt of any such notice, the SEC shall notify the Services Company within the 60-day period that a question exists as to whether the proposed change is consistent with the provisions of Section 13 of the Act, or of any rule, regulation or order thereunder, then the proposed change shall not become effective unless and until the Services Company shall have filed with the SEC an appropriate declaration regarding such proposed change and the SEC shall have permitted such declaration to become effective.

Section 3. Changes in Parties

New direct or indirect subsidiaries, affiliates and associates of EXELON CORPORATION, which may come into existence after the effective date of this Services Agreement, may become additional Client Companies of Services Company and subject to this General Services Agreement. In addition, entities which are, as of the effective date of this General Services Agreement, direct or indirect subsidiaries, affiliates and associates of EXELON CORPORATION, may thereafter leave the holding company system, in which case they will no longer be subject to this General Services Agreement. The parties hereto shall make such changes in the scope and character of the services to be provided and the method of assigning, distributing or allocating costs of such services as may become necessary to achieve a fair and equitable assignment, distribution, or allocation of Services Company costs among associate companies taking into account both the new subsidiaries and the subsidiaries which have left the holding company system, subject to the provisions of Section 2 above.

Section 4. Compensation of Services Company

As compensation for the services to be rendered hereunder, Client Companies listed in Attachment A hereto, as revised from time to time, shall pay to Services Company all costs which reasonably can be identified and related to particular services provided by Services Company for or on Client Company's behalf (except as may otherwise be permitted by the SEC). All other Client Companies and their affiliates and associates (see Attachment B) shall pay to Services Company charges for services that are to be no less than cost (except as may otherwise be permitted by the SEC), insofar as costs can reasonably be identified and related by Services Company to its performance of particular services for or on behalf of Client Company.

The services described herein or contemplated to be provided hereunder shall be directly assigned, distributed or allocated by activity, project, program, work order or other appropriate basis. The factors for assigning or allocating Services Company costs to Client Company, as well as to other associate companies, are set forth in Schedules 1 and 2 attached hereto. Attachments A and B and Schedules 1 and 2 are each expressly incorporated herein and made a part hereof.

Any charges to the Client Companies on account of use of capital shall reflect a reasonable and efficient capital structure.

Section 5. Securities and Exchange Commission Rules

It is the intent of the Parties that the determination of the costs as used in this Agreement shall be consistent with, and in compliance with, the rules and regulations of the SEC, as they now exist or hereafter may be modified by the Commission.

Section 6. Service Review

The parties shall review each service covered by this Agreement on an as needed basis, to assess the quality of the service and to determine the continued need therefor, and shall, subject to the provisions of Section 2 above, amend the scope of services, delete services entirely from this Agreement, and/or decline services which are not "Corporate Governance Services," as defined in Section 7 hereof, as they determine to be necessary or desirable.

Section 7. Corporate Governance Services.

Whether or not requested by the Client Companies, the Services Company may provide to all Client Companies, and Client Companies shall pay Services Company for, "Corporate Governance Services." Corporate governance consists of those activities and services reasonably determined to be necessary for the lawful and effective management of Exelon System businesses. Corporate Governance Services may be supplied from functions such as accounting, finance, executive, strategic planning, legal, human resources/benefits, audit, corporate communications and public affairs, environmental, health and safety, government affairs and policy, and investor relations. Corporate Governance Services may include, but are not limited to, the following: planning and project evaluation; finance and treasury; accounting and analysis; risk management; tax; shareholder and investor relations; merger and acquisition services; strategic planning; diversity; employee and labor relations; HR planning and development; compensation and benefits; legal services in the areas of securities, PUHCA, employment, regulatory, contract, litigation and intellectual property laws; legal and administrative support to the Board of Directors; environmental compliance activities; ethics and compliance programs; management services for compliance with Federal laws, regulations and other policy requirements, including relationship management with the U.S. Congress and Federal agencies; corporate communications; branding; corporate events; charitable support; community relations and communications to local organizations; and communications to employees.

Section 8. Payment

Payment shall be by making remittance of the amount billed or by making appropriate accounting entries on the books of the companies involved. Invoices shall be prepared on a monthly basis for services provided hereunder.

Section 9. EXELON CORPORATION

Except as authorized by rule, regulation, or order of the SEC, nothing in this Agreement shall be read to permit EXELON CORPORATION, or any person employed by or acting for EXELON CORPORATION, to provide services for other Parties, or any companies associated with said Parties.

Section 10. Client Companies

Except as limited by law or order of the SEC, Client Companies, their subsidiaries, affiliates and associates may provide services described herein to other Client Companies, their subsidiaries, affiliates and associates on the same terms and conditions as set out for the Services Company.

Section 11. Effective Date and Termination

This Agreement is executed subject to the consent and approval of all applicable regulatory agencies, and if so approved in its entirety, shall be deemed effective from the date that the merger between PECO ENERGY COMPANY and UNICOM CORPORATION was consummated, and shall remain in effect from said date unless terminated by mutual agreement or by any Party giving at least 90 days' written notice to the other Parties prior to the beginning of any calendar year, each Party fully reserving the right to so terminate this Agreement.

This Agreement may also be terminated or modified to the extent that performance may conflict with any rule, regulation or order of the SEC adopted before or after the making of this Agreement. This Agreement shall be terminated with respect to any Client Company immediately upon such Client Company ceasing to be a member of the Exelon holding company system.

The Parties' obligations under this Agreement which by their nature are intended to continue beyond the termination or expiration of this Agreement shall survive such termination or expiration.

Section 12. Access to Records

Records will be maintained in accordance with 17 C.F.R. §257 and in any event no less than seven years following a transaction under this Agreement. The Client Company may request access to and inspect the accounts and records of the Services Company, provided that the scope of access and inspection is limited to accounts and records that are related to such transaction.

Section 13. Assignment

This Agreement and the rights hereunder may not be assigned without the mutual written consent of all Parties hereto.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed and attested by their authorized officers as of the day and year first above written.

JOINT APPLICANTS
BEFORE THE
PUBLIC SERVICE COMMISSION OF THE DISTRICT OF COLUMBIA
DIRECT TESTIMONY OF CHRISTOPHER M. CRANE
FORMAL CASE NO. _____

I. INTRODUCTION AND PURPOSE

1. Q. Please state your full name and business address.

A. My name is Christopher M. Crane. My business address is 10 Dearborn Street, Chicago, Illinois 60603.

2. Q. By whom are you employed and in what capacity?

A. I am the President and Chief Executive Officer of Exelon Corporation ("Exelon"). I became the Chief Executive Officer of Exelon in March 2012 upon the retirement of John W. Rowe.

3. Q. Please describe your professional and educational background.

A. I began my career in 1979 in the Engineering Department at the Comanche Peak Nuclear Station. From October 1981 to October 1988, I worked at the Palo Verde Nuclear Generating Station in a number of positions. From October 1988 to 1998, I worked for the Tennessee Valley Authority in progressively more responsible positions, including site vice president of the Brown's Ferry Nuclear Plant.

In 1998, I moved to Commonwealth Edison Company ("ComEd") to help improve the performance of that company's fleet of nuclear generating plants. From September 1998 to July 1999, I served as Vice President for Boiling Water Reactor Operations and played a major role in the ComEd nuclear program recovery. In July 1999, I was promoted to Senior Vice President of Nuclear

Operations. My responsibilities in that role expanded to include the daily operation and the regulatory and technical performance of all five ComEd nuclear plants.

In 2000, Unicom Corporation ("Unicom") and PECO Energy Company ("PECO") merged to form Exelon. In June 2003, I was promoted to Chief Operating Officer of Exelon Nuclear. My responsibilities in that role focused on the daily operations of Exelon's nuclear generating facilities. I was also president and Chief Executive Officer of AmerGen, the joint venture between Exelon and British Energy ("BE") that owned and operated three nuclear plants. I remained in that position until BE sold its interest to Exelon. In January 2004, I was promoted to President and Chief Nuclear Officer of Exelon and, in that capacity, oversaw strategy development as well as the daily operations of all of Exelon's nuclear generating facilities.

In 2007, I was promoted to Chief Operating Officer of Exelon Generation, which owns all of Exelon's generation resources. In 2008, I was promoted to President and Chief Operating Officer of Exelon. In that capacity, I directed a broad range of business initiatives, including acquisitions, and was responsible for transmission strategy, cost management, major capital programs, Exelon's nuclear up-rating program, generation asset optimization and the development of renewable energy projects.

As I previously explained, I became the President and Chief Executive Officer of Exelon in 2012 upon the retirement of Mr. Rowe.

I have held a senior reactor operator certification, studied electricity at New Hampshire Technical College, and attended Harvard Business School's Advanced Management Program. I am a member of the board, a member of the Executive Committee and one of the Vice Chairs of the Edison Electric Institute. I am Vice Chairman of the Institute of Nuclear Power Operations and Chairman of the Nuclear Energy Institute. I also serve on the Board of Governors of the World Association of Nuclear Operators ("WANO") and on the Board of Governors of WANO's Atlanta Center.

4. Q. Please identify your other community leadership roles.

A. I am a member of the Civic Committee of The Commercial Club of Chicago and a member of the Board of Trustees of the Rush University Medical Center. I am a director of the Museum of Science & Industry Chicago and of Get IN Chicago, an innovative public/private partnership with the mission of eliminating juvenile violence.

5. Q. Have you previously testified before a utility regulatory agency?

A. Yes. I submitted rebuttal testimony before the New Jersey Board of Public Utilities at BPU Docket No. EM05020106, which was the proceeding for approval of the proposed merger of Exelon and Public Service Enterprise Group, Inc. That merger was not consummated. More recently, I submitted direct and rebuttal testimony before the Public Service Commission of Maryland on behalf of the applicants in Case No. 9271, which was the proceeding for approval of the merger of Exelon and Constellation Energy Group, Inc. ("Constellation").

6. Q. What is the purpose of your direct testimony?

A. In Section II, I provide an overview of the proposed merger of Exelon and Pepco Holdings, Inc. ("PHI") ("Merger"), and explain how it will strengthen the combined company's utilities to better serve our customers. I also want to introduce Exelon, and the best way to do that is to describe its vision and core values, as I do in Section III of my testimony. As part of this discussion, I explain how our vision and core values align with those of PHI and why that alignment will facilitate the integration of our companies. In Section IV of my testimony, I explain why Exelon decided to merge with PHI and, in particular, why the Merger will help meet the challenges facing distribution utilities. In Section V, I provide an overview of the benefits the Merger will produce and explain why it is in the best interest of PHI's utilities, their customers and the communities they serve. As part of this discussion, I will explain Exelon's approach to achieving top-tier performance at reasonable cost through the rigorous application of best practices and a management philosophy that continuously challenges us to improve productivity and efficiency. In Section VI, I introduce other witnesses submitting direct testimony in support of the Merger.

II. OVERVIEW OF THE MERGER

7. Q. Please provide an overview of the Merger.

A. On April 29, 2014, Exelon and PHI entered into an Agreement and Plan of Merger ("Merger Agreement") with the approval of their respective Boards of Directors. When the Merger is consummated, PHI will become an indirect subsidiary of Exelon, and PHI's common stockholders will be entitled to receive

$27.25 per share in exchange for the PHI stock they hold. The terms of the Merger are discussed in greater detail in the direct testimony of Carim V. Khouzami.

8. Q. Will the Merger strengthen the PHI and Exelon utilities?

A. Yes, it will. I am confident that the Merger will create the premier Mid-Atlantic energy distribution utility system. Potomac Electric Power Company ("Pepco"), Delmarva Power & Light Company ("Delmarva Power") and Atlantic City Electric Company ("ACE") (collectively, the "PHI Utilities") will join an organization that includes three outstanding utilities – Baltimore Gas and Electric Company ("BGE"), ComEd and PECO– with proven track records of furnishing safe, reliable and efficient energy delivery service. Significantly, the PHI Utilities share Exelon's commitment to safety, operational excellence, customer service, environmental stewardship, and community service. These shared commitments establish a solid foundation for building strong, high-performing, post-Merger utilities. To cite one important example of how this will occur, the Merger will leverage the combined expertise of the PHI and Exelon utilities to enhance reliability at a reasonable cost. As Mark F. Alden explains in his direct testimony, the recent merger of Exelon and Constellation, which led to significant improvements in BGE's reliability metrics without increasing its capital or operating and maintenance ("O&M") budgets, demonstrates the many benefits that accrue from successfully integrating two outstanding organizations and the resultant sharing of best practices. Additionally, the PHI Utilities will join a larger enterprise and, in that way, gain access to a number of additional resources, including the financial strength of Exelon. They will also benefit from greater bargaining power throughout the supply chain and realize economies of scale at many levels within the post-Merger organization. As I will explain in more detail later in my testimony, the Merger will expand emergency response capabilities, drive operational excellence, and facilitate the use of innovative technology to deliver high quality customer service and reduce customers' energy use and carbon footprint.

III. VISION AND CORE VALUES

9. Q. Please state the overarching vision that expresses what Exelon stands for as an organization.

A. At Exelon, we believe that reliable, clean and affordable energy is essential to a brighter, more sustainable future. That is why we are committed to providing innovative, best-in-class performance and thought leadership to help drive progress for customers, communities and our nation. Exelon believes in performance that drives progress.

10. Q. What are the core strengths of Exelon as an organization that support its vision?

A. Exelon has established five "pillars" that reflect its core strengths, support its vision, and are designed to translate that vision into a clear path for action:

1. **Performance Excellence**. We are committed to excellence and continuous improvement. We strive to be the best in everything we do.

2. **A Balanced Perspective**. Because we have a presence in each stage of the energy business, we have unique insights into the energy challenges we face today and will face in the future.

3. **Effective Collaboration**. We build strong working partnerships. We know that it is only through teamwork that we can develop and deliver smarter, cleaner, more efficient energy solutions.

4. **Driving Competition And Choice**. We believe that competition drives choice, innovation and savings and, in that way, empowers our customers and moves our nation forward.

5. **Advancing Clean Energy**. We are committed to connecting customers to cleaner, more cost-effective energy resources and to taking a leadership role in the process of shaping the future of clean energy.

11. Q. Please describe the core values that guide Exelon's decision making and behavior.

A. Exelon has five core values that cut across its organization and inform every aspect of its decision-making and behavior:

1. **We are dedicated to safety**. We are committed to maintaining the highest standards of safety and reliability for our people, our customers and the communities in which we work. As a fundamental part of our culture and operations, every member of the Exelon team is dedicated to putting safety first.

2. **We actively pursue excellence**. We are driven to excel. Recognizing the value of constant improvement, we strive to advance our processes and develop more efficient ways to meet our customers' energy needs. In all we do, we strive to surpass the standards of our industry and the standards we set for ourselves in order to create value for customers, communities and our shareholders.

3. **We innovate to better serve our customers**. We see every challenge as an opportunity to exercise our ingenuity and our competitive spirit. We encourage curiosity and exploration to develop better ways of delivering clean energy. We focus on innovation with the goal of creating energy solutions that have a meaningful, positive impact on our customers.

4. **We act with integrity and are accountable to our communities and the environment**. We are committed to doing what is right. We have a deep connection to the communities we serve, which compels us to take responsibility for our work. We actively look for ways to engage and give back. We value the environment and work to reduce our impact with future generations in mind.

5. **We succeed as an inclusive and diverse team.** We foster an inclusive culture of trust, collaboration and performance. We welcome and respect people with different perspectives, backgrounds, and traits because we know that diverse teams drive powerful outcomes.

12. Q. Mr. Crane, please explain how Exelon's core values relate to the commitments being made in connection with the Merger.

A. As I explained above, Exelon is dedicated to acting with integrity and accountability. That means we keep our promises and honor our commitments. Exelon has made regulatory commitments in connection with the mergers of Unicom and PECO that created Exelon in 2000 and Exelon and Constellation in 2012. Exelon has kept all the regulatory commitments that it made in connection with those transactions.

13. Q. Have you reviewed the statement of PHI's vision and core values set forth in Mr. Rigby's direct testimony?

A. Yes, I have. I concur with Mr. Rigby that, while Exelon and PHI each express their vision and values in their own, somewhat different words, the important substantive elements of our vision and core values are closely aligned.

14. Q. Why is it important to Exelon that it and PHI have substantially the same vision and core values?

A. The alignment of vision and core values is important on two levels. Following the effective date of the Merger, both Exelon and PHI will be working to integrate the Merger partners' operations and business processes. Functional integration will be facilitated if their operations and business processes are compatible. A common vision and shared values are strong evidence that our two companies' operations are generally consistent, which is an important reason that Exelon and PHI are excellent merger partners. A shared vision and common core values are also important because they express a common corporate culture. The cultural aspect of a business combination is one of the intangible factors that directly affects the successful longer-term operation of the enterprise. While there are many similarities in the corporate cultures of Exelon and PHI, I believe the common trait most important for forging a strong, post-Merger organization is the shared belief that we should never be content with "business as usual" in any aspect of our company and, therefore, we must continuously challenge ourselves to be better at everything we do, including, of course, managing and containing costs for the benefit of our customers, while providing safe, reliable service.

IV. REASONS FOR THE MERGER AND STRATEGIC FIT

15. Q. Mr. Crane, why did Exelon decide to merge with PHI?

A. Exelon has embarked on the Merger to create the premier Mid-Atlantic energy distribution utility and, as part of achieving that goal, to improve the overall customer experience in a meaningful way. The Merger furthers Exelon's strategic goals of increasing its focus on its core competency of operating best-in-class distribution utilities and diversifying its business. With the Merger, 60% to 65% of Exelon's pro forma earnings projected for 2015 and 2016 will be derived from its regulated distribution business.

16. Q. How will the Merger facilitate Exelon's goal of becoming the premier Mid-Atlantic energy distribution utility?

A. The Merger will join two companies that have an excellent strategic fit given their geographic location and other operational similarities. Together, they will form a post-Merger utility platform that possesses the scope, financial strength and operational expertise needed to adapt to the evolving role of distribution utilities. The wide-spread use of new and existing technology; the development, operation and management of an interactive grid; and the need to match load with a pool of widely distributed, customer-based resources demands the kind of large, geographically contiguous, interconnected system that the Merger will help to produce.

17. Q. Earlier you noted that Exelon and PHI are "an excellent strategic fit." Please explain why that is so.

A. The first significant factor is geography. Attached as JOINT APPLICANTS (A)-1 is a map showing the location of the PHI Utilities' service territories relative to those of BGE and PECO. Following the Merger, the Exelon family of utilities in the Mid-Atlantic region will have contiguous service territories stretching across southeastern Pennsylvania, southern New Jersey, Delaware, Maryland and the District of Columbia. Geographic proximity provides substantial opportunities to capture economies of scale and share best practices. Additionally, and perhaps most importantly, the geographic proximity of utilities within a single corporate family will give the post-Merger enterprise much more robust mutual support capabilities and substantially greater combined resources to respond promptly and effectively to major storms and other emergencies.

Additionally, in several important areas, the PHI and Exelon utilities have adopted similar programs, including advanced metering infrastructure ("AMI"), energy efficiency and demand response, and vendor/supplier diversity. Having these initiatives in common across the post-Merger enterprise will enable the sharing of knowledge and best practices, capture economies of scale and create opportunities to improve service and reduce costs. Moreover, these programs reflect a shared vision of the future in which the post-Merger Exelon utilities will continue to embrace innovative technology including through the use of the grid as an evolving platform for energy services for our customers, will partner with our customers to prudently manage energy use, and will strengthen their organization and the communities they serve by fostering a culture of diversity and inclusiveness.

V. BENEFITS THE MERGER WILL PRODUCE

18. Q. Please provide an overview of the benefits that the Merger will produce.

A. The Merger will create benefits for Pepco and the other PHI Utilities, their customers and the communities and states which they serve. First, it will create a strong foundation for meeting the challenges created by the evolving role of distribution utilities as the developers, operators and managers of an interactive grid that works as a platform to integrate renewable and distributed energy resources and accommodates customers' dual function as end users and producers of electricity. Second, the Merger will generate distribution-related synergies at

PHI that Exelon is proposing to reflect as an immediate – and longer term – direct and traceable financial benefit to Pepco's District of Columbia customers. Third, the Merger will leverage Exelon's resources and expertise to sustain and enhance reliability for Pepco and the other PHI Utilities within Pepco's and PHI's reliability related capital and O&M budgets. Fourth, PHI's charitable contributions and community support will be embodied in a firm commitment to maintain spending for ten years following the Merger in each of the PHI Utilities' service areas, including the District of Columbia, that, on average, exceeds 2013 levels.

Additionally, Exelon is proposing to take several important steps to protect customers and employees and to maintain the local presence of Pepco in the District of Columbia as well as the other PHI Utilities in their respective jurisdictions. I will discuss this issue later in my testimony.

19. Q. Please explain how customers of the PHI Utilities, including District of Columbia customers, will benefit from the distribution system synergies the Merger is expected to produce.

A. Distribution customers of all classes will realize an immediate direct and traceable financial benefit from the savings the Merger is expected to produce for Pepco and the other PHI Utilities by the creation of a $100 million Customer Investment Fund, of which $14 million will be allocated to Pepco operations in the District of Columbia. Exelon will fund this benefit, and the PHI Utilities will not seek to recover in rates any part of that fund. The Customer Investment Fund represents a direct and traceable benefit of more than $50 per District of

Columbia distribution customer. The disposition of each jurisdiction's share of that fund will be determined by the applicable regulatory authority in each jurisdiction following the consummation of the Merger. A regulatory authority could decide to use its share of the Customer Investment Fund to provide a bill credit to customers, to support low-income customer assistance programs or to strengthen energy-efficiency measures, although these are just examples and a regulatory authority could combine these and other or additional customer-benefit uses as it sees fit. Additionally, Exelon is making commitments to maintain and promote the PHI Utilities' low-income customer assistance, energy-efficiency and demand response programs, and those commitments are separate and apart from the commitment to create and fund the Customer Investment Fund.

20. Q. Is the Customer Investment Fund the only way in which Pepco customers will realize benefits from distribution-related Merger synergies?

A. No, it is not. District of Columbia customers will realize additional direct and traceable financial benefits as transmission-related and distribution-related Merger synergies are fully recognized in future rate proceedings in the form of costs that are lower than they would have been absent the Merger. The Merger integration process and the distribution-related savings it is expected to produce are addressed in greater detail by Mr. Khouzami.

21. Q. Please explain how the reliability-related benefits of the Merger will be produced.

A. As I previously noted, the Merger will leverage Exelon's resources and expertise to enhance reliability for Pepco and the other PHI Utilities without increasing Pepco's reliability-related capital and O&M budgets. It is important to acknowledge the significant improvement in reliability that the PHI Utilities, including Pepco, have accomplished, which Exelon plans to build upon. Similarly, Exelon acknowledges the regulatory performance requirements that are already in place for Pepco and the other PHI Utilities. Exelon intends not only to achieve compliance with the current regulatory performance requirements, but also to make further improvements in reliability metrics. Exelon is also proposing to back-up its commitment with a performance guaranty that will trigger a financial penalty if our performance-improvement goal is not achieved. Exelon's performance guaranty, its reliability-related capabilities, and the track record of top-tier operational performance by its utilities are discussed in more detail in Mr. Alden's direct testimony. The details of the proposed financial penalty are discussed in Mr. Khouzami's direct testimony.

22. Q. How will Exelon ensure that its efforts to enhance reliability will be cost-effective?

A. Exelon understands that expenditures for reliability can reach a point of diminishing returns at which the level of investment, or increase in maintenance expense, may not be justified by the incremental improvements in reliability they produce. Exelon has no intention of trying to achieve improvements in reliability simply by spending more. We don't do business that way. As I explained before, an integral part of our management model is to continuously challenge ourselves to be more efficient and more productive – to always strive to do things better and at a lower cost. We have demonstrated that this approach works in improving system reliability. The most recent example is the performance of BGE following Constellation's merger with Exelon. At BGE, we made significant improvements in reliability metrics without increasing BGE's reliability-related capital or O&M budgets, as Mr. Alden discusses in his direct testimony. We plan to do the same for the PHI Utilities. The reliability performance improvements we propose for Pepco and the other PHI Utilities will be accomplished without increasing Pepco's or the other PHI Utilities's reliability-related capital or O&M budgets in their existing long-range plans.

Exelon's hard work to control costs does not mean it intends to scrimp on needed capital improvements. In fact, BGE, ComEd and PECO have approved plans to spend $15 billion in aggregate over five years for capital improvements to their systems. To state it simply, if capital investment is needed, the necessary resources will be provided.

23. Q. The District of Columbia and the other service areas of the PHI Utilities, like those of PECO and BGE, have experienced several severe weather events over the past several years. Please describe Exelon's emergency response performance and explain how the Merger will enhance emergency response capability of Pepco and the other PHI Utilities.

A. PECO and, following the Constellation merger, BGE, have performed well in responding to major storm events, as Mr. Alden explains. In large part, this performance was made possible by the ability of the utilities in the Exelon system to marshal their forces from across the enterprise to provide prompt and effective storm restoration. Those benefits will be extended to Pepco in order to support and enhance its emergency response efforts in the District of Columbia following the Merger. Additionally, as I previously explained, the geographic proximity of the PHI Utilities to BGE and PECO will enhance mutual support capabilities for all of Exelon's Mid-Atlantic utility systems and create a much larger pool of combined resources to respond quickly and effectively to major storm events or other emergencies.

24. Q. Is there anything else you would like to add on the issue of reliability?

A. Yes, I want to make it clear that Exelon takes reliability very seriously. We understand the importance of keeping the lights on throughout the areas we serve. We also acknowledge the special responsibility – and the corresponding honor and privilege – of serving as the electricity supplier for our nation's capital. We understand that Washington, D.C. is the image we project to the world and the showcase for our country's energy policy. We will work tirelessly to make sure that Pepco continues to provide Washington, D.C. the world class electric service that it expects and deserves from its electric utility.

25. Q. Please explain how the Merger will strengthen PHI's charitable contributions and community support.

A. The Merger will strengthen PHI's charitable and community involvement by converting what are now voluntary contributions into a binding commitment. As explained in the direct testimony of Calvin G. Butler, Jr., Exelon is committing to provide for ten years following the Merger an annual average in charitable contributions and traditional local community support that exceeds the 2013 levels of the PHI Utilities. Additionally, as part of Exelon, the PHI Utilities will continue to play an important role in supporting the communities in their service areas and will remain a significant employer and responsible corporate citizen, as evidenced by the commitments to community service made by the Exelon companies and their employees and the civic and charitable activities of BGE following the Constellation merger, as Mr. Butler also describes.

26. Q. Mr. Crane, did Exelon and PHI consider how the District of Columbia and the states in which the PHI Utilities operate will be affected by the Merger?

A. Yes. Exelon and PHI retained Susan F. Tierney, Ph.D., to study the economic effects of the Merger upon the District of Columbia and the three states in which the PHI Utilities furnish service. Dr. Tierney conducted a detailed study using well-recognized and widely-accepted analytic techniques to quantify the effects of the Merger in those locations, including the effects of an increase in reliability at each of the PHI Utilities from their current three-year average performance levels to the reliability levels described by Mr. Alden. The value of the benefits accruing to Pepco's residential and commercial customers and to the District of Columbia from reduced outages with shorter duration, together with the portion of the Customer Investment Fund to be distributed to Pepco customers, is expected to be within a range of $95.4 million to $133.6 million over the period 2015 to 2020 on a net present value basis. In addition – depending upon how the District of Columbia Public Service Commission (the "Commission") decides to allocate the Customer Investment Fund – the expected benefits from the Merger will include the creation of between 907 and 1,281 jobs in the District of Columbia.

I know the Commission recognizes the value of reliability. In my view, the Merger is a crucial step to ensure that District of Columbia and the customers of Pepco can realize the significant benefits described by Dr. Tierney. Upon completion, the Merger will create a real partnership to achieve a level of utility service reliability that not only meets the future requirements that the PHI Utilities have today but exceeds those requirements. This partnership will be backed by Exelon's commitment to share best practices with the PHI Utilities to increase reliability within the reliability-related capital and O&M budgets that the PHI Utilities have already planned, and financial penalties if we fail to achieve what we are promising to do.

27. Q. Earlier, you indicated that Exelon proposes to take additional steps to protect customers. Please discuss those measures.

A. While PHI has non-regulated businesses that are operated as part of Pepco Energy Services, it is predominantly a "pipes and wires" distribution utility company. With the Merger PHI will be joining a company that has a generation component, including substantial nuclear generation, which some may contend could expose Pepco and the other PHI Utilities to a qualitatively different array of business risks. I believe that perception is not warranted. Exelon is a leader in nuclear safety and has been recognized for the world-class performance of its nuclear generating facilities. Moreover, Exelon has the expertise, experience and broadly diversified exposure to multiple energy markets to effectively mitigate market risks in its generation business. Nonetheless, in order to put this issue to rest, Exelon proposes to implement ring-fencing measures designed to isolate

Pepco and the other PHI Utilities from the potential financial and credit consequences of unrelated business risks, including financial risks that could arise from Exelon's nuclear operations. The specific ring-fencing measures that will be implemented and their effectiveness in insulating Pepco and the other PHI Utilities are discussed in greater detail in Mr. Khouzami's direct testimony.

28. Q. Please describe the protections Exelon is offering for Pepco employees and the employees of the other PHI Utilities.

A. I fully concur with Mr. Rigby's statement that the strength of any business lies in its people. That is why Exelon prides itself on treating its employees fairly. The Merger will result in some reductions in force. For example, certain positions in the managerial and administrative ranks will no longer be necessary as duplicative positions are consolidated. However, Exelon has committed that for a period of two years after consummation of the Merger, there will be no net reductions due to involuntary attrition as a result of the Merger integration process in the employment levels of the PHI Utilities. In that regard, Exelon has clearly stated it will honor all existing collective bargaining agreements. Moreover, as Mr. Rigby explains in his direct testimony, Locals 210, 1238, 1307 and 1900 of the International Brotherhood of Electrical Workers, which comprise all of the collective bargaining units that represent employees of PHI Utilities, agree the Merger is in the best interest of Pepco and its employees and have recently agreed to contract extensions for an additional three years. Also consistent with the Merger Agreement, Exelon has agreed that for at least two years after closing the Merger, Exelon will provide current and former PHI Utilities' employees compensation and benefits that are at least as favorable in the aggregate than the compensation and benefits provided to those employees immediately before the Merger. These commitments are discussed by Denis P. O'Brien in his direct testimony.

Additionally, Exelon will ensure that, after the Merger, PHI and the PHI Utilities, including Pepco, will continue their commitments to workforce diversity. Exelon believes it is critical that its workforce reflect the diversity of the communities it serves because diverse teams drive powerful and successful outcomes. For that reason, diversity and inclusiveness are key elements of Exelon's core values, as I explained in Section III of my testimony. Moreover, Exelon has received national and local recognition for its dedication to diversity and inclusiveness.

29. Q. How will the Merger affect the local presence and local control of PHI and Pepco?

A. Currently, PHI is a publicly traded holding company that owns the stock of the PHI Utilities. Following the Merger, PHI will no longer have a publicly traded common stock and, as a consequence, a number of corporate functions associated with public common-stock ownership will no longer be performed at the PHI level. However, based on the explanation of the PHI operating structure provided by Mr. Rigby, it is anticipated that PHI will continue to play much the same role in the day-to-day operations of the Pepco and the other PHI Utilities that it does today, and the existing operational structure of PHI will remain substantially the same. PHI and Pepco will continue to maintain their headquarters in Washington, D.C. Additional details about the post-Merger operational and management structure and the importance of maintaining local control and local presence are provided in the direct testimony of Mr. O'Brien. Mr. Butler's direct testimony details the BGE experience where Exelon has maintained local control and a local presence after its merger with Constellation.

30. Q. How will the Merger affect the access and accountability of management?

A. The Merger will not affect access to and the accountability of management. Regulators, government officials, community leaders and customers will know the people working at the utility level. Moreover, both Mr. O'Brien, who leads Exelon Utilities, and I are committing to being accessible and accountable to regulators, state and local governments, and all of the utilities' other constituencies. In that regard, as Mr. O'Brien explains in his direct testimony, Exelon has a straightforward utility management model with clear, direct lines of authority and reporting. Thus, Exelon's utility management model allows the operating utilities, which, post-Merger, will include PHI as the operating arm of the PHI Utilities, to access the resources, expertise and financial strength of a large organization while maintaining the ability to respond to local conditions and priorities. Simply stated, the Merger will not create multiple tiers of management that have to be penetrated to access the decision-makers in the organization.

31. Q. Mr. Crane, in light of the importance Exelon places on reducing carbon emissions through renewable technology and other means, please explain

Exelon's experience in carbon reduction and expansion of renewable energy sources.

A. Under Exelon's 2020 Plan, each Exelon utility took a variety of additional actions to reduce its own carbon footprint, such as minimizing internal building electricity use through aggressive building modernization, using clean technologies and alternative fuels in fleet vehicles and delivering customer energy efficiency savings through PECO's and ComEd's award winning "Smart Ideas" programs. Through these combined efforts, Exelon met – indeed, surpassed – the ambitious target of reducing its carbon footprint by 17.5 million metric tons of greenhouse gas emissions and did so in 2013 – thus achieving the goal and completing the mission of Exelon 2020 seven years ahead of its planned completion date.

Exelon is an industry leader in adopting renewable energy technology, as evidenced by the nearly 1,300 megawatts ("MW") of wind generation and approximately 240 MW of utility-scale and distributed solar generation owned and operated by its generation companies. Similarly Exelon's retail companies have installed more than 173 MW in distributed generation for customers and supplied renewable electricity to more than 82,300 customers. The post-Merger organization will consolidate the intellectual capital, technical expertise and experience of a deeper and more diverse workforce that has developed skill sets vital to implementing renewable energy solutions and energy savings programs.

32. Q. Have the Exelon utilities received special recognition for their environmental stewardship?

A. Yes, they have. Each of the Exelon utilities was recognized in 2012 and 2013 as a United States Environmental Protection Agency Energy Star award winner for Sustained Excellence for continued leadership in protecting the environment through its energy efficiency efforts. Additionally, on June 11, 2014, Exelon was recognized for its corporate sustainability and environmental performance by ranking second among utilities in the 2014 *Newsweek* Green Rankings.

33. Q. Mr. Crane, will the public interest be served by completing the Merger?

A. Yes. The Merger definitely will benefit the public, rather than merely leave it unharmed, for all of the reasons that I set forth above, which are explained in more detail in the Joint Application and the direct testimony of other witnesses supporting the Merger.

34. Q. In your discussion of the benefits the Merger will produce, you referred to commitments that Exelon and the PHI Utilities are making in connection with the Merger. Is Exelon providing a complete list of those commitments?

A. Yes, all of the commitments being proposed by Exelon and the PHI Utilities are set forth in Exhibit 5 to the Joint Application.

VI. INTRODUCTION OF OTHER WITNESSES

35. Q. Please identify the other witnesses that have submitted direct testimony in support of the Merger.

A. The witnesses that submitted direct testimony with the Joint Application are listed below along with a general description of the subject matter of their direct testimony:

Joseph M. Rigby is the Chairman of the Board, President and Chief Executive Officer of PHI. Mr. Rigby provides PHI's perspective on the Merger, describes the vision and values of PHI and explains why the Merger is in the best interests of the PHI Utilities, their customers and the communities they serve. (JOINT APPLICANTS (B))

Denis P. O'Brien is Senior Executive Vice President of Exelon and Chief Executive Officer of Exelon Utilities. Mr. O'Brien describes how the PHI Utilities will be managed following the Merger, including how the operational structure, governance principles and delegation of authority will maintain substantial local control. Mr. O'Brien also discusses the experience of integrating utility operations following the merger of PECO and Unicom and the merger of Exelon and Constellation, which brought BGE into the Exelon family of utility companies. Finally, Mr. O'Brien describes Exelon's commitments regarding employment levels and employee compensation. (JOINT APPLICANTS (C))

Mark F. Alden is the Vice President of Utility Oversight and Integration for Exelon. Mr. Alden explains Exelon's commitments to enhance reliability across the PHI Utilities' service area and discusses Exelon's track record of reliability and high-quality service. He also identifies some of the more significant technological solutions that can be employed to cost-effectively strengthen reliability across the PHI Utilities' service area following the Merger. (JOINT APPLICANTS (D))

William M. Gausman is Senior Vice President, Strategic Initiatives, of PHI. Mr. Gausman describes the regulatory requirements for reliability that currently apply to Pepco and the commitments that it has made with regard to achieving specified reliability performance goals. (JOINT APPLICANTS (E))

Carim V. Khouzami, a Senior Vice President of BGE, is Exelon's Chief Integration Officer. Until recently assuming the position of Chief Integration Officer, he served as BGE's Chief Financial Officer and Treasurer. Mr. Khouzami provides an overview of the planned integration of Exelon and PHI, explains the process for identifying merger savings and costs to achieve those savings, and discusses the cost-reducing synergies that were achieved through the successful integration of BGE following the Exelon-Constellation merger. Additionally, Mr. Khouzami discusses the financial impacts of the Merger, merger accounting principles, the measures Exelon will implement to ring-fence the PHI Utilities and the financial penalty Exelon is proposing in the event that Pepco fails to meet Exelon's reliability commitment. (JOINT APPLICANTS (F))

Susan F. Tierney, Ph.D. is a Senior Advisor with the Analysis Group. Dr. Tierney discusses the quantitative and qualitative economic benefits that the proposed Merger brings to the District of Columbia and to the customers of Pepco in that jurisdiction. (JOINT APPLICANTS (G))

Calvin G. Butler, Jr. is BGE's Chief Executive Officer. Mr. Butler describes Exelon's approaches to electric system reliability, charitable giving, community involvement, and supplier diversity. He also provides relevant background information about Exelon's existing programs in each of these areas. (JOINT APPLICANTS (H))

VII. CONCLUSION

36. Q. Does this conclude your direct testimony at this time?

A. Yes, it does.

C.M. Crane Direct Testimony
DC P.S.C. - - June 18, 2014

Introduced as:
Joint Applicants _____ (A)-1

JOINT APPLICANTS
BEFORE THE
PUBLIC SERVICE COMMISSION OF THE DISTRICT OF COLUMBIA
DIRECT TESTIMONY OF JOSEPH M. RIGBY

I. INTRODUCTION AND PURPOSE

1. Q. Please state your full name and business address.

A. My name is Joseph M. Rigby. My business address is 701 9th Street, NW, Washington, DC 20068.

2. Q. By whom are you employed and in what capacity?

A. I am the Chairman of the Board of Directors, President and Chief Executive Officer of Pepco Holdings, Inc. ("PHI"). PHI is the parent of Potomac Electric Power Company ("Pepco"), which provides electric delivery service in Washington, D.C., and Montgomery and Prince George's Counties in Maryland. PHI is also the parent of Delmarva Power & Light Company ("Delmarva Power"), an electric and gas utility serving Delaware and portions of the Delmarva Peninsula, and Atlantic City Electric Company ("ACE"), an electric utility serving southern New Jersey. I will refer to Pepco, Delmarva Power and ACE collectively as the "PHI Utilities."

3. Q. Please describe your professional and educational background.

A. I joined ACE in 1979 and advanced through a number of management positions. My responsibilities have included accounting, financial services, treasury operations, business transformation, human resources, and the ACE/Delmarva Power merger transition. Upon the merger of ACE and Delmarva Power that formed Conectiv, I became Vice President/General Manager of Gas

Delivery, then Vice President/General Manager of Electric Delivery for those utilities. I was elevated to President of Conectiv Power Delivery in 2002. From May 2004 to September 2007, I served as Senior Vice President and Chief Financial Officer of PHI and was responsible for all financial activity and investor relations.

From September 2007 to March 2008, I served as Executive Vice President and Chief Operating Officer of PHI. In that capacity, I was responsible for the day-to-day operations of Pepco, Delmarva Power and ACE and was also responsible for those companies' information technology and corporate communication functions. In March 2008, I was elected President and Chief Operating Officer of PHI.

I was elected President and Chief Executive Officer of PHI effective March 1, 2009, and was elected Chairman of the Board on May 15, 2009.

I earned a bachelor's degree in accounting from Rutgers University and an MBA from Monmouth University. I am a licensed Certified Public Accountant ("CPA") in the state of New Jersey.

4. Q. Please identify relevant business or professional associations.

A. I am the immediate past chair of the United Way of the National Capital Area. I am currently a member of the senior council of the Greater Washington Board of Trade and previously served as the chairman of that organization. I also serve on the boards of the U.S. Chamber of Commerce, the Edison Electric Institute, the Federal City Council, the Greater Washington Initiative, and the Economic Club of Washington. I am a member of the Rutgers-Camden School of

Business Executive Advisory Board, the New Jersey Society of CPAs and the American Institute of CPAs.

5. Q. What is the purpose of your direct testimony?

A. I will provide PHI's perspective on the proposed merger ("Merger") of PHI and Exelon Corporation ("Exelon"), which was announced on April 30, 2014. In particular I will discuss the values and vision that PHI and Exelon share, describe the current PHI management structure and explain why I believe that the Merger is in the best interest of the PHI Utilities, their customers and the communities they serve and, therefore, is in the public interest.

II. VALUES, VISION AND MANAGEMENT STRUCTURE

6. Q. Please describe the core values of PHI.

A. PHI organizes all aspects of its business around the following five core values:

1. **Safety –** We make safety the most important part of everything we do.
2. **Accountability –** We accept responsibility for our actions and behavior.
3. **Integrity –** We do the right thing.
4. **Diversity –** We treat everyone with dignity and respect.
5. **Excellence –** We strive to be the best.

7. Q. Please describe PHI's overarching vision for its utility operations.

A. PHI's vision is expressed in the following comprehensive statement:

> We aspire to become the best in class in safety, reliability, customer service and innovation by engaging our talented workforce, leveraging operational excellence and applying advanced technology. We seek to empower our customers through a smarter grid, create energy solutions for our

> business partners, protect our environment and deliver value to our shareholders.

Let me expand briefly on the principal elements of that statement. By "best in class," we mean outperforming our peers while meeting the needs of customers. "Innovation" refers to our focus on leveraging expertise in order to optimize energy resources and energy use by our customers and business partners. We strive to achieve the goal of "engaging our talented workforce" by building high-performing teams through leadership, teamwork, enterprise focus, accountability and communication. The second sentence of our aspiration statement expresses our emphasis on operational excellence and the need to face the challenges of the future by working to achieve creative energy solutions that continue to reliably deliver a vital service to our customers while reducing energy costs and protecting the environment.

8. Q. How do PHI's vision and core values compare with those of Exelon, which are summarized in Mr. Crane's direct testimony?

A. While each company expresses concepts in its own words, the substance of the visions and core values of PHI and Exelon are closely aligned.

9. Q. Why is it significant to the success of the Merger that PHI and Exelon share a common vision and core values?

A. Having a common vision and sharing core values will facilitate the alignment of various business processes and the integration of the operations of the PHI and Exelon utilities following the Merger. This is an important reason why PHI and Exelon are excellent merger partners. Proper alignment of business processes will simplify and expedite the integration process and, in that way, help the post-Merger enterprise achieve fully and in a shorter time the performance improvements and cost savings expected from the Merger.

10. Q. Please describe the priorities of PHI for 2014 with respect to providing utility service.

A. Consistent with the vision and values I discussed previously, PHI has established the following priorities for power delivery operation:

1. **Safety –** Everyone goes home safely every day.
2. **Reliability –** We seek to improve our customers' experience by reducing power outages and improving communications during restorations.
3. **Customer Satisfaction –** We seek to improve the customer experience through a comprehensive process management and technology approach, and we work together to make PHI a better, more challenging and rewarding place to work.
4. **Regulatory Compliance –** We meet our regulatory and compliance commitments.
5. **Financial Results –** We meet our financial commitments.

Joining Exelon's top-performing family of utilities will provide additional resources to allow PHI's operating subsidiaries, including Pepco, to enhance their ability to achieve the priorities listed above and likely accelerate the achievement of those priorities in an efficient and cost-effective manner.

11. Q. Please describe the PHI management structure.

A. Pepco, along with its affiliates ACE and Delmarva Power, are separate corporations, although their financial results are reported as a single business segment of PHI for Securities and Exchange Commission reporting purposes. The three PHI Utilities provide service in four jurisdictions because Pepco furnishes service in the District of Columbia and Maryland, Delmarva Power furnishes service in Delaware and Maryland and ACE furnishes service in New Jersey. The utilities are operated under the supervision of the Executive Vice President, Power Delivery of PHI. Each utility has a complement of its own employees that provides certain engineering and customer service functions, operational support, and maintenance of the transmission and distribution system for that utility. In addition, personnel employed by the PHI Service Company, such as substation engineers and designers, perform utility-specific work for one or more of the utilities. Corporate and administrative support functions, such as accounting, legal and regulatory, generally are performed by employees of the PHI Service Company because those employees typically provide similar services to more than one utility company.

Each utility also has a Regional President that reports to the Senior Vice President, Government Affairs and Public Policy of PHI. The individual Regional Presidents work closely with the operational side of the business, provide a strong local connection in each jurisdiction and maintain relationships with government and regulatory officials and other stakeholders in the communities we serve.

Our management structure enables cost efficiencies across the jurisdictions by sharing services where appropriate while also maintaining a local presence in each of our jurisdictions. As explained in Mr. O'Brien's direct testimony this general management structure, including a focus on Pepco's local presence and control, will be maintained following the Merger.

III. THE MERGER IS IN THE BEST INTEREST OF THE PHI UTILITIES, THEIR CUSTOMERS AND THE COMMUNITIES THEY SERVE

12. Q. Please provide an overall assessment of the Merger from your perspective.

A. I am convinced that the Merger will create a strong, well-managed, financially stable family of transmission and distribution utilities that are committed to providing high-quality service at reasonable cost. During my tenure as CEO, the PHI Utilities have been placed on a path of continuous improvement in reliability and customer satisfaction. As Mr. Gausman describes in his direct testimony, Pepco has an extensive set of multi-year programs designed to meet its reliability commitments and, as a result, has made significant progress in its reliability performance Pepco is currently exceeding the District of Columbia's reliability requirements.

Pepco strives to continue the progress it has made in these areas and, in so doing, to fully meet and, indeed, exceed, our customers' expectations. There is no question in my mind that joining Exelon's outstanding distribution utilities will help us to do that by providing significant additional resources to sustain and improve current levels of performance and customer satisfaction. My assessment of the Merger's benefits is backed by the package of explicit and substantial commitments that Exelon is offering in connection with the Merger. It is also backed by the well-established track record of reliable service, sensitivity to local priorities and concerns, cost-consciousness, environmental stewardship and outstanding corporate citizenship that Exelon has established.

On a personal level, throughout the Merger process I have spent a good deal of time with, and come to know, the senior management at Exelon and Exelon Utilities. As a result, I have had an excellent opportunity to learn and understand their approach to Merger integration and, more importantly, their approach to the on-going management and operation of distribution utilities within their corporate family. I am confident that the post-Merger organization will continue to be managed by a team of skilled professionals who are customer-focused and committed to the sustainable, long-term performance of Pepco at the highest levels. I am certain that, upon my retirement, which I have now deferred until the Merger is consummated, I will be leaving the Pepco in good hands. I firmly believe that Exelon will maintain high-quality service, meet customers' needs reliably and efficiently, respect all of the constituencies we serve and actively engage in the civic and charitable life of our service areas.

13. Q. Why are PHI and Exelon well suited as merger partners?

A. There are three principal reasons why PHI and Exelon are well suited as merger partners. First, as I explained earlier, they share a common vision and core values. The two organizations' visions of the future and their approach to delivering safe, reliable and efficient service are closely aligned. I believe these factors will promote a smooth transition throughout the Merger integration process and, as a result, allow the companies to achieve a higher level of sustainable merger savings.

Second, the PHI and Exelon utilities share a number of factors that are critical to their structural and operational integration. These factors are described in Section IV of Mr. Crane's direct testimony, and I will not repeat them here. However, I want to emphasize the importance of geographic proximity. The service territory map that Mr. Crane is providing as JOINT APPLICANTS (A)-1 tells this story graphically. Geographic proximity will facilitate coordinated management across the combined utility service territories in the Mid-Atlantic Region and will maximize the opportunities to capture economies of scale. However, in my view, the principal benefit from the close geographic fit of the PHI Utilities', BGE and PECO service areas is the strong mutual support structure it will create. This mutual support structure will enhance performance and lower costs. The most significant beneficial impact of enhanced mutual support will be derived from the ability to marshal the greater combined resources of contiguous utilities within the same corporate organization to respond to major storms or other emergency situations and reduce recovery time.

Third, the PHI operational goals that I identified in Section II closely align with initiatives that have been adopted and are being implemented among the Exelon utilities. Thus, the combined enterprise will be on the same page in terms of deploying resources and management attention to drive the performance of their utilities. To cite just one important example, the Exelon utilities, like Pepco, are implementing Smart Grid and advanced metering infrastructure ("AMI") solutions and planning to use that technology to reduce costs, improve service, expedite emergency response, and provide customers more options for managing their energy needs.

14. Q. Is the proposed Merger in the best interest of Pepco and its customers?

A. Yes, it is, for the reasons I discussed in some detail above. In summary, the Merger will enable the PHI and Exelon utilities to leverage each other's expertise through effective sharing of best practices. The Merger will also strengthen the Pepco's emergency response capabilities by providing access to greater resources available from a larger enterprise and provide financial resources that assure sustainable, long-term operational excellence. All of these factors generate significant benefits for District of Columbia customers. Moreover, Exelon is proposing firm reliability guarantees, which would trigger financial penalties if performance-improvement goals are not achieved. Significantly, as Mr. Crane explains, Exelon anticipates that Pepco will meet its heightened performance goals without increasing existing reliability-related capital and operating and maintenance budgets. Exelon also is committed to the District of Columbia undergrounding project, which will provide significant benefits to District of Columbia customers.

Additionally, Pepco customers in the District of Columbia will realize an immediate tangible benefit of more than $50 per distribution customer from the Exelon-funded Customer Investment Fund that will be established to allow customers to realize Merger-related savings. At the same time, Exelon is committing to flow-through all actual test-year distribution-related Merger savings, net of costs to achieve, in future rate cases. Exelon is also making an explicit commitment to maintain the PHI Utilities' low-income customer assistance, energy efficiency and demand response programs.

15. Q. Are there any other factors that are important to you?

A. Yes. I believe that the strength of any business lies in its people. Consequently, we cannot think about delivering safe, reliable and efficient utility service without considering our employees. Exelon shares my view. In that regard, Exelon has clearly stated it will honor all existing collective bargaining agreements, and I am pleased to report that all of the collective bargaining units that represent our employees, namely, Locals 210, 1238, 1307 and 1900 of the International Brotherhood of Electrical Workers, agree the Merger is in the best interest of Pepco and its employees and have recently agreed to contract extensions for an additional three years. Additionally, Exelon is making specific commitments that for two years following the Merger there will be no net reduction due to involuntary attrition as a result of the Merger integration process in the employment level at Pepco and that there will be provided to current and former employees of Pepco compensation and benefits that are at least as favorable, in the aggregate, as the compensation and benefits provided to those employees immediately before the Merger. These commitments are explained in the direct testimony of Denis P. O'Brien.

16. Q. Why is the Merger in the best interest of the District of Columbia?

A. The Merger will maintain the local presence of Pepco, as evidenced by specific commitments in this regard made by Exelon and discussed by Mr.

O'Brien. Additionally, as Mr. O'Brien explains, Pepco and the other PHI Utilities will continue to be operated in largely the same manner as they are today. Regulators, government officials, community leaders and customers will continue to know the people who are working at the utility level to keep their lights on. Clear lines of communication will continue to be in place. As Mr. Crane emphasizes in his direct testimony, Exelon is just as committed as Pepco and PHI are to being accessible to regulators, state and local governments, businesses, and civic and charitable organizations.

The District of Columbia will also benefit from Exelon's express commitment to provide, for ten years following the Merger, an annual average in charitable contributions and traditional local community support that exceed 2013 levels.

Finally, the District of Columbia will realize substantial tangible benefits from the Merger, which have been identified and quantified by Susan F. Tierney, Ph.D. in her direct testimony and accompanying analysis.

17. Q. Is the Merger in the public interest?

A. Yes, it is, for the reasons I discussed previously. In summary, PHI and its utility subsidiaries will be better positioned to meet the challenges of furnishing safe, reliable and efficient service currently and in the future with the added resources they will gain from joining the Exelon family of utilities. The Merger, along with the Merger-related commitments being made by Exelon, will provide immediate and long-term tangible benefits to customers, the communities the PHI Utilities serve and the District of Columbia. I have no reservations in recommending that the Merger be approved. Indeed, the sooner the Merger can be consummated the sooner District of Columbia customers and the District of Columbia itself will begin to realize the substantial benefits that the Merger will produce.

IV. CONCLUSION

18. Q. Does this conclude your direct testimony at this time?

A. Yes, it does.

D.P. O'BRIEN Direct Testimony
DC P.S.C. - - June 18, 2014

Introduced as:
Joint Applicants ___________(C)

JOINT APPLICANTS
BEFORE THE
PUBLIC SERVICE COMMISSION OF THE DISTRICT OF COLUMBIA
DIRECT TESTIMONY OF DENIS P. O'BRIEN
FORMAL CASE NO. _____

I. INTRODUCTION AND PURPOSE

1. Q. Please state your full name and business address.

A. My name is Denis P. O'Brien. My business address is 2301 Market Street, Philadelphia, Pennsylvania 19103.

2. Q. By whom are you employed and in what capacity?

A. I am Senior Executive Vice President of Exelon Corporation ("Exelon") and Chief Executive Officer of Exelon Utilities ("EU"). In that capacity, I am responsible for the activities of Exelon's regulated transmission and distribution businesses, which serve approximately 7.8 million customers. EU is an unincorporated division of Exelon, which I will describe below.

3. Q. Please describe your educational and professional background.

A. I have a Bachelor's Degree in Industrial Engineering from Rutgers University and a Master's Degree in Business from Drexel University. I have over 30 years of utility experience in engineering and operations, strategic planning, and executive management.

I began my career in 1982 as an engineer in PECO Energy Company's ("PECO") Transmission and Distribution Department performing a variety of engineering, project management, and supervisory duties. In 1987, I was promoted to Division Engineer of the Philadelphia Division. From 1989 to 1991, I was assigned to the PECO Corporate Planning Department where I supported

PECO's implementation of Total Quality Management. From 1991 to 2000, I progressed through various supervisory and managerial positions in PECO's Operations Department.

In 2000, I was promoted to Vice President of Operations for PECO. In that capacity, I was responsible for the operation and maintenance of PECO's electric and gas transmission and distribution systems and the construction of additions and replacements to those systems. In 2002, I was appointed Executive Vice President and, in that capacity, was responsible for all of PECO's day-to-day operations. In 2003, I was promoted to President of PECO, and, in 2007, was named its CEO.

In March 2012, upon completion of the merger of Exelon and Constellation Energy Group, Inc. ("Constellation"), I assumed my current position with Exelon.

4. Q. Please identify your other business, professional and civic affiliations.

A. I am chairman of the board of directors of the Electric Power Research Institute ("EPRI") and serve on the board of directors of Independence Blue Cross. I am also chair-elect of the Greater Philadelphia Chamber of Commerce and a member of the boards of trustees of the Pennsylvania Business Council, the CEO Council for Growth, the Franklin Institute, and Drexel University. I previously served on the boards of the American Gas Association, the Energy Association of Pennsylvania, the Pennsylvania Economy League, the YMCA of Greater Philadelphia and WHYY, Inc.

5. Q. Have you previously testified before a utility regulatory agency?

A. Yes. I submitted direct, supplemental direct and rebuttal testimony before the Pennsylvania Public Utility Commission at Docket No. A-110550F0160, which was the proceeding for approval of the proposed merger of Exelon and Public Service Enterprise Group, Inc. ("PSEG"). I also submitted rebuttal testimony before the New Jersey Board of Public Utilities ("BPU") at BPU Docket No. EM05020106, which was the proceeding for BPU approval of the same transaction. The proposed merger of Exelon and PSEG was not consummated. In addition, I submitted rebuttal testimony before the Public Service Commission of Maryland on behalf of the applicants in Case No. 9271, which was the proceeding for approval of the merger of Exelon and Constellation.

6. Q. What is the purpose of your direct testimony?

A. My testimony supports the proposed merger ("Merger") of Exelon and Pepco Holdings, Inc. ("PHI"). As CEO of EU, upon consummation of the Merger, I will have a direct role in the management of Potomac Electric Power Company ("Pepco"), Atlantic City Electric Company ("ACE") and Delmarva Power & Light Company ("Delmarva Power") (collectively, the "PHI Utilities"). I will describe Exelon's approach to managing its electric and natural gas delivery utilities, including the role of EU and my role within EU. As part of that discussion, I will explain the role that PHI will play within the Exelon corporate and management structure after the Merger is consummated. I will also describe Exelon's commitment to maintaining substantial local control of utility operations, summarize the institutional measures that Exelon has in place for its existing utilities to define and preserve local control, and explain how those measures will be extended to PHI after the Merger is completed. Additionally, because sharing of best practices is critical to realizing the benefits expected from the Merger, I discuss my experience in the successful processes of sharing best practices following the merger of PECO and Unicom Corporation ("Unicom") to form Exelon and the merger of Exelon and Constellation, which added Baltimore Gas and Electric Company ("BGE") to the Exelon family of electric and gas distribution and transmission utilities. I will also describe the commitments Exelon and PHI are making with regard to post-Merger employment and compensation at ACE, Delmarva Power and Pepco. Finally, I will explain that the Merger will not affect standard offer/default service or local electricity competition in the District of Columbia nor will it affect wholesale competition or raise any market power concerns.

II. THE EXELON UTILITY MANAGEMENT STRUCTURE

7. Q. Please describe where PHI and the PHI Utilities will be located in the Exelon corporate structure post-Merger.

A. The pre-Merger and post-Merger corporate structures of PHI and Exelon are depicted in the organization charts provided as Exhibit 4 to the Joint Application. Consequently, I will provide only a brief overview of the relevant elements of the before and after corporate structures.

Exelon. All three of Exelon's utilities – BGE, Commonwealth Edison Company ("ComEd") and PECO – are subsidiaries of Exelon Energy Delivery Company, LLC ("EEDC"), which is a direct subsidiary of Exelon. EEDC is a holding company and has no employees. ComEd and PECO are direct subsidiaries of EEDC, while BGE is a subsidiary of RF Holdco, LLC ("RF Holdco"), which is, in turn, a subsidiary of EEDC. RF Holdco is a special purpose entity ("SPE") created to implement "ring-fencing" measures designed to insulate BGE from the risks the Commission perceived with Constellation's competitive businesses. There will be no change in the positions of Exelon's utilities, RF Holdco or EEDC within the Exelon corporate structure as a result of the Merger.

PHI. Currently, Pepco is a direct subsidiary of PHI. Post-Merger, PHI will become a subsidiary of EEDC. However, another special purpose entity will be placed between PHI and EEDC in order to implement the ring-fencing measures that Exelon is proposing, which are described in greater detail in the direct testimony of Carim V. Khouzami. Specifically, a new SPE will be created with provisions in its organizational documents designed to insulate PHI and Pepco from potential credit, default and bankruptcy risks of unrelated businesses in the Exelon holding company system, as Mr. Khouzami explains. Pepco, along with the other PHI Utilities, will continue to be subsidiaries of PHI.

8. Q. Does the post-Merger corporate structure mean that there will be multiple layers of management between Exelon and Pepco corresponding to each corporate tier that you described above?

A. No, it does not. Simply because multiple tiers exist within the Exelon corporate structure does not mean that there are ascending layers of corporate management at each tier. To the contrary, Exelon employs a straightforward management structure, which maintains clear, direct lines of reporting and responsibility that do not necessarily track the various intermediary legal entities within Exelon's corporate structure. In that regard, both RF Holdco and the SPE to be created between EEDC and PHI exist only to ring-fence BGE and the PHI Utilities, respectively, and will have no operational role or management responsibility.

9. Q. Explain the role PHI will have in the operation of Pepco following consummation of the Merger.

A. As Mr. Rigby explains in his direct testimony, PHI currently plays an important role in the overall management of Pepco. Based on Mr. Rigby's description of the PHI management structure, PHI's role in the operation of Pepco will align with the management of BGE, ComEd and PECO. As a consequence, when I or other witnesses providing direct testimony refer to "local management" in the context of PHI and Pepco, that term refers generally to PHI and not necessarily the Boards of Directors and officers of Pepco. Mr. Rigby also describes the role of the Regional Presidents for Pepco and each of the PHI Utilities. Exelon plans to retain the Regional President positions with their current duties and responsibilities. As Mr. Rigby explains, the Regional Presidents work closely with the operational side of the business, provide a strong local connection in each jurisdiction and maintain relationships with state and local governments, regulatory officials and other stakeholders in the communities they serve. We envision Pepco's Regional President playing the same role after the Merger.

On or shortly after the effective date of the Merger, PHI will be converted from a corporation to a limited liability company or "LLC." As an LLC, PHI will have a Board of Directors that will function in a fashion similar to that of the Board of Directors of a corporation. Currently, Exelon anticipates a seven-member board with three outside members from the Pepco, ACE and Delmarva Power service areas and four members who will consist of some combination of officers or directors of Exelon and officers of one or more of PHI or the PHI Utilities. The PHI Board of Directors will select the Board of Directors of Pepco, and the Pepco board will choose Pepco's officers.

PHI's common stock will cease to be publicly traded on and after the effective date of the Merger. Therefore, a number of corporate functions associated with having publicly traded common stock, such as investor relations, will no longer need to be performed at the PHI level because Exelon already has those capabilities. The elimination of these functions at the PHI level is one important source of synergies the Merger is expected to produce. PHI will, however, have a President/Chief Executive Officer, Chief Financial Officer, Treasurer and a limited number of other officers, but likely fewer than currently exist.

The authority of the PHI Board of Directors and officers to act on behalf of Pepco and the other PHI Utilities will be delineated in a Delegation of Authority, which I describe in more detail later in my testimony.

10. Q. Please describe the role of the operating utilities' management in Exelon's existing utility management model.

A. The senior management of each Exelon utility is given the authority and responsibility for developing its respective utility business plan and operating and maintenance (“O&M”) and capital budgets. While those business plans and budgets are reviewed by me, Exelon’s CEO and the Executive Committee of Exelon, they have to be approved by the Boards of Directors of the respective utilities. As I previously explained, following the Merger, PHI’s management will align at the same level as the senior management of Exelon’s existing utilities and, therefore, business plans and budgets for Pepco would have to be approved by the PHI Board of Directors that I described previously.

Additionally, the authority and responsibility delegated to local management is clearly delineated in two formal, written documents, namely, a statement of Corporate Governance Principles and a Delegation of Authority. The Delegation of Authority includes, among other things, levels of expenditures and defined categories of decisions that can be authorized solely by the utility’s CEO or by the utility CEO with utility board approval.

Consistent with the clearly established direction, goals and priorities provided by the utility’s business plan and budgets, each utility CEO is held accountable for assuring that safe, reliable and efficient service is furnished to customers and that appropriate fiscal discipline is maintained, consistent with the utility’s service obligations, to remain on-budget. For PHI, its CEO will have this authority and responsibility on behalf of Pepco. As part of this process, Exelon will provide the resources that BGE, ComEd, PECO and PHI, together with its subsidiary utilities, will need to execute their business plans and fulfill their service obligations.

11. Q. What is EU and what is its role in the Exelon utility management model?

A. EU was formed in 2012 upon the completion of the Exelon-Constellation merger. With that merger, BGE joined ComEd and PECO in Exelon's family of utilities. As a result, the utility segment increased to more than 50% of Exelon's earnings before income taxes, depreciation and amortization. Given the greater size of its post-merger utility operations, Exelon determined that it should create a structural vehicle to coordinate the development and oversight of its regulated business. Exelon also concluded that the new management structure should be assigned responsibility for realizing the value inherent in the larger scale of post-merger operations by unlocking the knowledge, expertise and practical experience that otherwise could be isolated within each utility company or within "silos" inside each of those companies. Simply stated, given the breadth and depth of Exelon's utility operations, there was likely to be a precedent or best practice within one or more of its utility operating companies for many aspects of utility operations, and the new management structure was tasked with working with the individual utilities to identify those precedents and best practices and deploy them across the entire enterprise. I describe various examples of the successful cross-pollination and sharing of best practices from the PECO-Unicom and Exelon-Constellation mergers in Section III of my testimony. In short, EU was the solution Exelon developed to facilitate the horizontal distribution of knowledge and expertise and sharing of best practices across all of Exelon's utilities.

As I previously noted, EU is not a legal entity but, rather, is an unincorporated divisional structure that maintains direct lines of reporting between Exelon's utilities and Exelon's senior management. As part of this process, EU helps local utility management develop business plans and budgets and also helps identify and marshal skills, knowledge and resources within Exelon that local utilities may need to successfully implement those plans. EU is also the organizational tool embedded in the management structure for the express purpose of focusing management attention on cooperation and collaboration across the utility business. While there are many ways in which EU pursues that part of its mission, some of the more important ways include driving the processes for identifying and sharing best practices, leveraging economies of scale, and creating efficiencies by standardizing business and operating processes as appropriate and consistent with each company's service obligations. To that end, EU works with each utility's management: (i) to develop its business strategy and establish appropriate performance goals in areas such as safety, reliability and customer satisfaction; (ii) to ensure that the utility remains on track to implement its business plan and achieve its performance goals; (iii) to maintain clear lines of reporting to Exelon management on the performance of EU and each utility; and (iv) to formalize the process for sharing knowledge and best practices among utilities by creating cross-company "communities of practice" organized around common functions, objectives and operational challenges. Additionally, EU has primary responsibility for overseeing and monitoring each utility's compliance with regulatory requirements and adherence to applicable Exelon policies and standards.

12. Q. What is your role in EU?

A. As I previously indicated, I am CEO of EU, a position I assumed when EU was created. While I continue to live in the Philadelphia area, I maintain offices in Philadelphia, Baltimore and Chicago. Following the completion of the Merger, I will have an office in the District of Columbia. As CEO of EU, I have general oversight responsibility for BGE, ComEd and PECO. I am also responsible for EU fulfilling its mission of assisting Exelon’s utilities to work collaboratively to achieve superior operational performance and to provide their customers safe, reliable and efficient service at just and reasonable rates.

13. Q. Earlier, you mentioned that Exelon’s management structure maintains straightforward, direct lines of reporting. Please describe those lines of reporting.

A. The CEOs of individual utilities report to me as Senior Executive Vice President with overall responsibility for Exelon’s regulated utility business. I report directly to Exelon’s CEO, Christopher M. Crane.

The CEOs of the regulated utilities are members of the Exelon Management Executive Committee, which also includes members from other areas of Exelon’s business that are selected by Exelon’s CEO. The Management Executive Committee exists to assist Mr. Crane in leading Exelon. The Management Executive Committee is the body where important policy and operating decisions for Exelon, including Exelon’s utilities, are discussed, analyzed and decided. As members of the Management Executive Committee, the utility CEOs – which will include the CEO of PHI post-Merger – meet with Mr.

Crane at least monthly. Consequently, the CEOs of the operating utilities have direct and frequent access to Mr. Crane and other members of Exelon's senior management team.

14. Q. Will EU and the Exelon management model continue to function in the way you described after the Merger is consummated and the PHI Utilities join Exelon?

A. Yes, they will. Following the Merger, regulated utility operations are projected to contribute 60% and 65% of Exelon's pro forma 2015 and 2016 earnings, respectively. Consequently, the original rationale for creating EU and employing the Exelon utility management model will continue and, in fact, be reinforced by the Merger. Based on the success EU and the Exelon management model achieved with the integration and subsequent operation of BGE, I am confident that PHI and Pepco will also be successfully integrated and operated following the Merger.

15. Q. Does Exelon expect that the local management of Pepco will remain in place following the Merger?

A. Yes, Exelon expects that managers who are "on the ground" in District of Columbia and whom the Commission, stakeholders and customers have come to know and trust will still be on the job after the Merger is completed.

16. Q. Will PHI and Pepco continue to have a strong local presence in the District of Columbia?

A. Yes, they will. In fact, Exelon intends to maintain the headquarters of PHI and Pepco in the District of Columbia. Additionally, Exelon is making specific commitments with respect to charitable giving and community initiatives, which are discussed in the direct testimony of Calvin G. Butler, Jr.

III. SHARING OF BEST PRACTICES FOLLOWING THE PECO-UNICOM AND EXELON-CONSTELLATION MERGERS

17. Q. Briefly describe your experience and involvement in the successful sharing of best practices that followed the PECO-Unicom and Exelon-Constellation mergers.

A. I was directly involved in the integration and sharing of best practices following the PECO-Unicom and Exelon-Constellation mergers. When the PECO-Unicom merger was consummated, I was Vice-President of PECO and, in that capacity, had overall responsibility for the operation and maintenance of PECO's electric and gas transmission and distribution systems. Following the Exelon-Constellation merger, I assumed my current position where I have general oversight responsibility for BGE, ComEd and PECO. After both mergers, the utilities of the merged company became stronger organizations, improved their reliability metrics and had enhanced ability to provide our customers high-quality service. Large numbers of individual best practices were shared across the enterprise following each merger. Some of the most notable examples of best practice sharing following the PECO-Unicom merger involved PECO's adoption of ComEd's seasonal readiness program and detailed capacity planning process and ComEd's adoption of PECO's Preventive Maintenance Program and rigorous safety programs.

Following the Exelon-Constellation merger, best practices identified from among BGE, ComEd and PECO were deployed across all three companies. Some of the more significant examples include the following:

- Extending Exelon's "lock out" and "tag out" ("LOTO") procedures throughout all of Exelon's utilities: LOTO consists of safety procedures used in the electric power industry to ensure that power lines are properly de-energized and not re-energized again before maintenance or servicing work has been completed. Exelon's carefully developed and well-tested LOTO procedures have now been standardized across ComEd, PECO and BGE. In addition to helping our employees stay safe and improving productivity, standardizing "best practice" LOTO procedures enables crews from any one of Exelon's utilities to seamlessly work on the facilities of any other Exelon utility. As a consequence, the performance of inter-company mutual assistance is enhanced and restoration times following system emergencies are reduced. In addition, standardized procedures for working on de-energized equipment were adopted, which improved productivity and reduced outage durations.
- Adoption of criteria developed by ComEd and PECO for prioritizing corrective maintenance work that is identified by circuit patrols: Circuit patrols conduct inspections of distribution circuits. These inspections are designed to do several things, including helping to identify maintenance needs. Implementing an appropriate system for prioritizing corrective

maintenance based on carefully designed criteria has reduced the number of outages caused by equipment failures.

- Optimizing the use and placement of "reclosers": Based on their shared experience, Exelon's utilities have been able to optimize the criteria for, and the use and placement of, "reclosers." Reclosers are circuit breakers designed to automatically open or close, as applicable, when a problem is detected on a line, such as when a tree makes contact with a conductor. Optimal use and placement of reclosers reduce the number of sustained customer outages by isolating the segment of a line where a problem is detected while maintaining service on parts of the line that are not adversely affected.
- BGE's adoption of procedures for rejuvenating the insulation of insulated cable: The extension of this ComEd/PECO best practice to BGE has improved reliability, avoided the need to replace insulated cable prior to the end of its service life, and reduced projected equipment replacement costs.
- BGE's adoption of standards employed by ComEd and PECO to protect its facilities from harmful wildlife interactions: Animals may use man-made structures for dens or nesting sites, foraging sites, or as travel routes, and these activities can cause damage to structures and the equipment they contain. For example, wildlife intrusions into electric power substations and the resulting damage they cause to the electrical equipment can trigger outages of all of the circuits served from those substations. Adopting the

Exelon approach to controlling wildlife interaction with electrical facilities has contributed to a reduction in outages experienced at BGE while also protecting wildlife and the environment.

- BGE's avian management program, analysis of accelerated gas asset replacement programs, use of social media to improve customer satisfaction and lessons learned for supporting fleet warranty claims were identified as best practices and used to align common practices across all of Exelon's utilities.

The process of sharing best practices was an important factor driving BGE's improved reliability metrics. As Mr. Alden explains in his direct testimony, as a result of sharing best practices, the reliability improvements at BGE were achieved without increasing BGE's planned expenditure levels. In addition, as noted in some of the examples cited above, sharing best practices can enhance employee safety and reduce costs.

IV. EXELON'S EMPLOYMENT RELATED COMMITMENTS

18. Q. Please describe Exelon's commitment with regard to post-Merger employment at Pepco.

A. Exelon is committing that, upon approval of the Merger and for two years following consummation of the transaction, it will not permit a net reduction in the employment levels at Pepco due to involuntary attrition resulting from the Merger integration process.

19. Q. Please describe Exelon's commitment with regard to post-Merger compensation.

A. Exelon and PHI are committing to honor the PHI Utilities' existing collective bargaining agreements. It is significant that, as Mr. Rigby explains, Locals 210, 1238, 1307 and 1900 of the International Brotherhood of Electrical Workers, which comprise all of the collective bargaining units that represent employees of PHI, agree the Merger is in the best interest of Pepco and its employees. These four Locals have also recently agreed to contract extensions for an additional three years. Exelon is also committing that for two years following consummation of the transaction, it will provide current and former employees at Pepco compensation and benefits that, in the aggregate, are at least as favorable as the compensation and benefits provided to those employees immediately before the Merger.

V. STANDARD OFFER/DEFAULT SERVICE; LOCAL ELECTRIC COMPETITION; AND WHOLESALE COMPETITION/MARKETPOWER

20. Q. Will the Merger affect the ability or willingness of Pepco to provide standard offer or default service to customers in the District of Columbia?

A. No. Pepco will continue to provide Standard Offer Service ("SOS") to its customers in the District consistent with the District of Columbia Code and Affiliate Code of Conduct. Exelon Generation is currently an active participant in the Power Supply Procurement Process for SOS and, following the closing of the Merger, intends to continue to participate in that process.

21. Q. Will the Merger impact local electricity competition in the District of Columbia?

A. No. The Merger will not have any adverse competitive effects on the District of Columbia's retail energy markets. Each of the PHI Utilities, including Pepco, has divested all of its generation facilities and purchases power only pursuant to requirements contracts to serve its default service load and must-take contracts with Qualifying Facilities entered into under the Public Utility Regulatory Policies Act of 1978 or pursuant to Commission-approved programs such as net energy metering in the District of Columbia. Exelon, under the name Constellation, provides competitive retail service in Washington, D.C., and it plans to continue to do so post-Merger. Exelon will be bound by District of Columbia's Affiliate Code of Conduct and will have in place standards and procedures to prevent preferences and the improper flow of information between Pepco and Exelon's subsidiaries. As a consequence, the Merger will not have any impact on retail competition.

22. Q. Will District of Columbia customers be affected by the Merger of the Joint Applicants' transmission facilities operated by the PJM Interconnection LLC ("PJM")?

A. No. The Merger will not have any impact on wholesale competition and does not raise any market power concerns because all of the PHI Utilities' transmission assets are under the operational control of PJM, which furnishes transmission service pursuant to its FERC-approved Open Access Transmission Tariff.

VI. CONCLUSION

23. Q. Does this conclude your direct testimony at this time?

A. Yes, it does.

M.F. ALDEN Direct Testimony
DC P.S.C. - - June 18, 2014

Introduced as:
Joint Applicants _______(D)

TABLE OF CONTENTS

Page

JOINT APPLICANTS
BEFORE THE
PUBLIC SERVICE COMMISSION OF THE DISTRICT OF COLUMBIA
DIRECT TESTIMONY OF MARK F. ALDEN
FORMAL CASE NO. _____

I. INTRODUCTION AND PURPOSE

1. Q. Please state your full name and business address.

A. My name is Mark F. Alden. My business address is 110 West Fayette Street, Baltimore, Maryland 21201.

2. Q. By whom are you employed and in what capacity?

A. I am employed by Exelon Corporation ("Exelon") as Vice President, Utility Oversight and Integration. I am responsible for overseeing and ensuring consistency and best practice application across the operations of the three Exelon utilities – Baltimore Gas and Electric Company ("BGE"), Commonwealth Edison Company ("ComEd"), and PECO Energy Company ("PECO"). I report directly to Denis P. O'Brien, Chief Executive Officer of Exelon Utilities.

3. Q. Please describe your professional and educational background.

A. I received a bachelor's degree in civil engineering from Pennsylvania State University and a master's degree in business administration from Saint Joseph's University. I have worked for PECO or its corporate affiliates for the past thirty-two years, starting out as a project manager in PECO's nuclear group and, prior to my current position, serving as Vice President, Customer Operations, for PECO. I have also served as Vice President, Engineering and Services, for PECO and ComEd and my responsibilities in that position included development of investment strategies for overall system reliability improvements at those utilities.

4. Q. Have you previously testified before a utility regulatory agency?

A. Yes. I submitted direct and rebuttal testimony before the Pennsylvania Public Utility Commission ("PA PUC") on behalf of PECO with respect to its 2008 gas base rate filing at PA PUC Docket No. R-2008-2028394.

5. Q. What is the purpose of your direct testimony in this proceeding?

A. The purpose of my direct testimony is as follows: (1) to provide an overview of Exelon's approach to utility service reliability and the levels of reliability at Exelon utilities, including improved reliability at BGE after its acquisition by Exelon; and (2) to describe the enhanced reliability metrics which Exelon is committed to achieving at Potomac Electric Power Company ("Pepco") upon approval of Exelon's proposed merger with Pepco Holdings, Inc. ("PHI").

II. EXELON'S APPROACH TO RELIABILITY

6. Q. What is Exelon's approach to utility service reliability?

A. Exelon is committed to continuously improving the reliability of its service in each of its utility service territories. This commitment incorporates numerous programs to maintain, protect and improve the electric distribution system at each utility, including proactive inspection, electric infrastructure replacement (such as new substations), and general reliability construction programs (e.g., cable replacement).

7. Q. How does Exelon effectuate this commitment?

A. In order to implement this reliability commitment, Exelon has developed the Exelon Management Model (the "Management Model"), a management system designed to identify and generate best practices for operational excellence at each of its utilities and to share and implement those practices system-wide. The Management Model includes forty-four system-wide core functional area teams (such as Operate and Restore, Preventative and Corrective Maintenance, and System Performance) which are directed by senior leaders and staffed by managers who lead the corresponding functional area at each utility. This structure helps ensure alignment, sharing, and implementation of best practices and initiatives across all utilities and drives improved performance and increased customer satisfaction.

8. Q. How does Exelon measure reliability at its utilities?

A. Our primary measure of reliability is a set of standard metrics established by the Institute for Electrical and Electronics Engineers ("IEEE") which are used in some form by public utility commissions across the country. We are particularly focused on the following two key metrics:

- **System Average Interruption Frequency Index ("SAIFI")**: The average number of sustained interruptions per customer during a year.
- **Customer Average Interruption Duration Index ("CAIDI")**: The average duration of interruptions that a customer experiences during a year.

SAIFI is useful as it indicates the average number of times that a customer may be interrupted over the course of a year, while CAIDI provides the average length of time of those interruptions. I understand from Mr. Gausman's direct testimony that in February 2012 the District of Columbia Public Service

Commission (the "Commission") implemented the Electricity Quality of Service Standards ("EQSS") in the District and that these standards are applicable to SAIFI as well as System Average Interruption Duration Index ("SAIDI") levels for the years 2013 through 2020. SAIDI is another measure of the length of time that customers are without service and is based on the system-wide average duration of outages. As a result, for the District of Columbia, we will also regularly calculate SAIDI, in addition to SAIFI and CAIDI.[1]

We also utilize a variety of other metrics to measure reliability. For example, we track a Customer Satisfaction Index for each Exelon utility, which measures customer satisfaction with a variety of service components, including the ability to restore electric service after an outage.

In addition to calculating and analyzing each utility's performance on these important metrics, we compare Exelon utility performance to the performance of other similar utilities utilizing industry peer groups and best-practice sessions to drive continuous improvement.

9. Q. How have Exelon utilities performed on the key reliability metrics you have described?

A. The effectiveness of Exelon's approach to reliability is reflected in the fact that, in 2013, each Exelon utility maintained its continuing trend of improvement and exceeded its 2012 performance in the key metrics of SAIFI, SAIDI, and CAIDI.

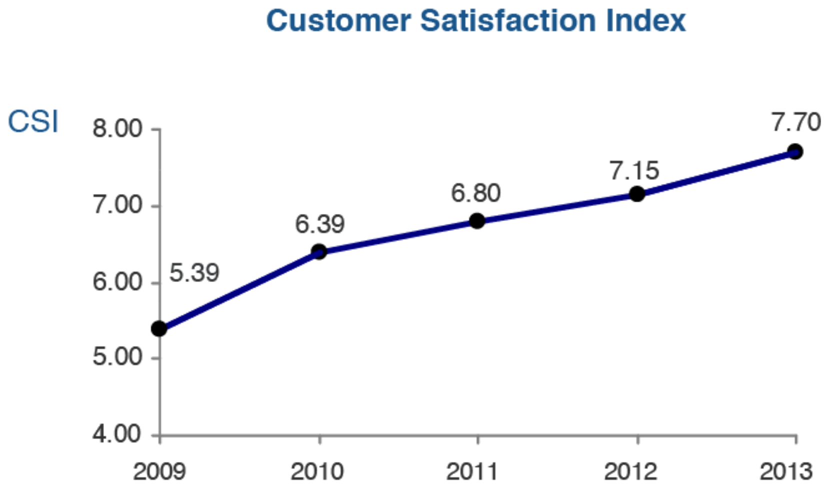
[1] CAIDI=SAIDI÷SAIFI.

I have included a set of graphs in JOINT APPLICANTS (D)-1 to my testimony, which depicts 2013 performance levels on these metrics as well as the trend of improvement over the last four years for the Exelon utilities. In each graph, the declining index reflects improved reliability for customers: a lower SAIFI corresponds to a reduced number of interruptions and a lower SAIDI and CAIDI (which are shown in minutes over time) correspond to shorter outage duration.[2] We also compare the performance of Exelon utilities to other utilities, and the SAIFI, SAIDI and CAIDI results place both ComEd and PECO in the top quartile of similar utilities in the U.S.

10. Q. Mr. Alden, how would you characterize the change in reliability metrics at BGE since its acquisition by Exelon?

A. BGE's reliability metrics have improved significantly since BGE became part of the Exelon family of utilities in 2012. For example, as shown in the JOINT APPLICANTS (D)-1, the average time to restore service to BGE customers who experienced a sustained interruption declined by almost 32%. That enhanced reliability is also reflected in other metrics that we measure, such as the Customer Satisfaction Index, which also improved following Exelon's acquisition of BGE, as shown below:

[2] The calculations reflected in the following graphs are based on the IEEE 2.5 Beta methodology, which is a common standard developed by IEEE to address the inclusion and exclusion of major event days in the calculation of IEEE reliability metrics.



11. Q. Mr. Alden, did Exelon increase capital spending or operations and maintenance expenditures at BGE after the merger in order to obtain these reliability improvements?

A. No, it did not. ComEd and PECO worked closely with their colleagues at BGE to share best practices, as described by Mr. O'Brien. As a result, we were able to achieve the improved reliability and customer satisfaction metrics at BGE without increasing planned expenditure levels.

12. Q. What types of assistance do Exelon utilities provide to each other in the event of major storms?

A. The Exelon utilities are integrated with each other in a variety of ways that enhance reliability. Perhaps most importantly for many customers, BGE is now fully integrated with ComEd and PECO in its response to major storms. This integration facilitates the deployment of Exelon utility crews quickly and safely between utility service territories and permits teams from all three companies to begin work almost immediately upon arrival in another Exelon utility service territory through the use of such practices as the standardized "Lock Out" and "Tag Out" ("LOTO") program described by Mr. O'Brien.

13. Q. Is the ability to dispatch utility crews from other Exelon utilities any different than the resources that are available under mutual assistance agreements between unaffiliated utilities?

A. Yes. Under utility mutual assistance agreements, there is no guarantee that other utilities will provide resources during or after a storm event, particularly when those other utilities may also be facing a large number of actual or potential outages from a large regional storm. By contrast, Exelon utilities are committed to making their storm restoration resources available to their affiliates on a priority basis, and the use of LOTO and other best practices enables those resources to be more efficient and productive than those that may be obtained from an unaffiliated utility. We are also able to pre-position Exelon-affiliated crews before actual storm events to ensure that those crews will be ready to go to work as soon as an actual storm subsides.

As an example, in response to the 2012 Derecho storm that resulted in more than 748,000 outages in BGE's service territory, PECO utility crews were able to provide over 25,000 full-time equivalent hours of assistance to BGE. The work of these crews reduced the duration of storm restoration efforts by approximately 24 hours.

Further, because Exelon utilities serve several major cities including Chicago, Philadelphia, and Baltimore, we are very familiar with and experienced in the special issues that arise in serving a large metropolitan service territory such as Washington, D.C.

III. ENHANCED RELIABILITY COMMITMENTS FOR PEPCO

14. Q. In his testimony, Mr. Gausman explained that Pepco must meet certain reliability requirements under District of Columbia EQSS standards. Will Exelon achieve those requirements?

A. Yes, all EQSS requirements will be achieved by Exelon and Pepco following the merger. Furthermore, as Mr. Crane has explained, we are confident that the Exelon/PHI combination will allow Pepco to do better than merely meet the minimum requirements. Following the merger, the combined companies expect that Pepco we will be able to exceed the EQSS requirements and improve Pepco's reliability through the integration of Pepco with the other Exelon utilities consistent with the Exelon approach to reliability I have described.

Exelon will therefore commit to Pepco achieving the following SAIFI and SAIDI average calculated for the three-year 2018-2020 period:

SAIFI: 0.54

SAIDI: 107

Compliance with the above commitments will be measured following the end of 2020 using the Commission's current methodology for calculating SAIFI and SAIDI, and exclusion of major event days. Pepco will report its performance against these commitments to the Commission no later than April 1, 2021. Pepco's failure to achieve these commitments will result in financial penalties, as described by Mr. Khouzami in his testimony.

Exelon's proposed levels of SAIFI and SAIDI, on average, for the 2018-2020 period, backed by financial penalties, reflect our substantial commitment to Pepco's customers that reliability will continue to improve and, in fact, will exceed the EQSS reliability requirements described in Mr. Gausman's direct testimony. Furthermore, the reliability improvements I have described will be achieved without increasing reliability-related capital and operations and maintenance expenditures above the levels in Pepco's existing long-range plans absent changes in law, regulations, or extreme weather events such as the Derecho storm, requiring increases in reliability-related spending to restore service and facilities.

15. Q. Is Exelon committed to support the Pepco DC undergrounding project described by Mr. Gausman in his direct testimony?

A. Yes. I understand from Mr. Gausman that on June 17, 2014, Pepco filed its Application, Testimony and Triennial Plan with the Commission for final approval prior to the start of work. Exelon fully supports this undergrounding work to improve reliability in the District of Colombia. The improved SAIFI and SAIDI commitments above are in addition to those to be achieved by the DC undergrounding project.

16. Q. Have you calculated Pepco's performance using the same methodology for the most recent three years?

A. Yes. Using the same methodology, Pepco's three-year historical averages (2011-13) of SAIFI and SAIDI are as follows:

SAIFI: 1.03

SAIDI: 149

The three-year average reliability commitments proposed by Exelon which I have described above represent an increase of 47.9% and 27.9% above these three-year actual average performance levels.

17. Q. Why are you proposing to calculate whether or not Exelon has met its reliability commitment at Pepco using a three-year average of performance in the 2018-2020 period?

A. We have proposed using a three-year historical average to account for any abnormal weather variability that could distort results if only the year 2020 was selected for measurement of Pepco's performance. If a three-year average is used, no additional weather normalization of Pepco's performance will be required.

18. Q. If Pepco is not measured on its reliability commitments until the conclusion of 2020, will that delay enhancements to Pepco's reliability?

A. No. As Mr. Gausman explains, Pepco already is required to achieve higher reliability metrics. Exelon is committed to ensuring that Pepco achieves those improvements, and therefore Exelon's additional reliability enhancements are best measured at the end of the period in which Pepco is expected to achieve its current reliability goals. Measurement of our success following 2020 will not delay deployment of Exelon best practices at Pepco, or Pepco's achievement of its current reliability obligations.

IV. CONCLUSION

19. Q. Does this conclude your direct testimony?

A. Yes

W.M. GAUSMAN Direct Testimony
DC P.S.C. - - June 18, 2014

Introduced as:
Joint Applicants _____(E)

TABLE OF CONTENTS

JOINT APPLICANTS
BEFORE THE
PUBLIC SERVICE COMMISSION OF THE DISTRICT OF COLUMBIA
DIRECT TESTIMONY OF WILLIAM M. GAUSMAN
FORMAL CASE NO. _____

I. INTRODUCTION AND PURPOSE

1. Q. Please state your full name and business address.

A. My name is William M. Gausman. My business address is 701 Ninth Street NW, Washington, DC 20068.

2. Q. By whom are you employed and in what capacity?

A. I am employed by Pepco Holdings, Inc. ("PHI") as Senior Vice President, Strategic Initiatives. I am responsible for the oversight of strategic projects that focus on the long term support of the transmission and distribution systems. This includes the implementation of PHI's Advanced Metering Infrastructure, the procurement of energy (both gas and electric), and compliance with both North American Electric Reliability Corporation and state reliability standards to ensure the safe and reliable operation of the electric system. I have previously been responsible for the engineering of all reliability programs and the design of all assets that support the transmission and distribution of electric service across the service areas of all PHI utilities.

3. Q. Please describe your professional and educational background.

A. I hold a Bachelor of Science degree in Electrical Engineering Technology from Temple University. I joined Potomac Electric Power Company ("Pepco") in 1974 as a Project Engineer overseeing the construction of high voltage transmission facilities. I have served in various management positions within

Pepco and PHI, with increasing responsibility for the operation, maintenance, and construction of both the transmission and distribution systems. From 1977 through 1988, I served as Superintendent of Underground Lines and as Manager of Electric System Operation and Construction. In 1988, I was promoted to General Manager – Power Delivery, and in 2001 I became General Manager – Asset Management. In 2002, I was named Vice President – Asset Management of Pepco. After Pepco's merger with Conectiv, I became Vice President – Asset Management over the combined PHI organization. In 2008, I was promoted to Senior Vice President Asset Management and Planning, and assumed my current position in October 2010.

During my career with PHI, I have also served as an advisor to various industry organizations including the Electric Power Research Institute Distribution Committee, the Southeastern Electric Exchange Executive Committee and the Edison Electric Institute ("EEI") Distribution Committee. I am currently a member of the EEI Transmission Executive Advisory Committee. I am also a member of Leadership Greater Washington.

4. Q. Have you previously testified before a utility regulatory agency?

A. Yes. I have testified before The District of Columbia Public Service Commission (the "Commission") on numerous occasions on reliability, system performance, AMI, and other issues.

5. Q. What is the purpose of your direct testimony?

A. The purpose of my direct testimony is to describe the current reliability commitments of Pepco.

II. DISTRICT OF COLUMBIA RELIABILITY REQUIREMENTS

6. Q. Mr. Gausman, please provide an overview of Pepco's reliability commitments.

A. Certainly. Pepco is committed to delivering safe and reliable service to all of its customers, and Pepco's success in meeting this commitment is measured using a set of standard reliability metrics created by the Institute for Electrical and Electronics Engineers ("IEEE"). The following metrics are used in the District of Columbia:

- **System Average Interruption Frequency Index ("SAIFI")**: The average number of sustained interruptions per customer during a year.
- **System Average Interruption Duration Index ("SAIDI")**: The average duration of sustained interruptions per customer during a year.

SAIFI is calculated by dividing the total number of sustained customer interruptions in a year by the total number of utility customers, and provides insight into the frequency of customer interruptions on a system-wide basis. Similarly, SAIDI is calculated by dividing the sum of all sustained customer interruption durations by the total number of customers served, and indicates how long customers were without service. Lower SAIFI and SAIDI values reflect fewer interruptions and shorter outage durations, respectively.

7. Q. What are the reliability performance standards in the District of Columbia?

A. Pepco is required to meet reliability standards contained in the Electricity Quality of Service Standards ("EQSS") as enacted by the District of Columbia

Public Service Commission in February 2012.[1] Under the EQSS, Pepco is required to meet the following levels of reliability under the above metrics:

	2014	2015	2016	2017	2018	2019	2020
SAIDI (hours)	2.43	2.21	2.00	1.81	1.65	1.44	1.35
SAIFI	1.09	1.05	1.02	0.98	0.95	0.92	0.89

These reliability performance targets established by the Commission exclude major service outages. Consistent with Commission requirements, Pepco files an annual report describing its success in achieving the required level.

8. Q. What types of programs does Pepco currently have in place to meet its reliability commitments?

A. Pepco has an extensive set of programs designed to meet these commitments. These programs incorporate proactive replacement and upgrading of existing infrastructure, the addition of new facilities to increase capacity, and corrective maintenance to maintain and improve the reliable operation and performance of system equipment and to reduce the frequency and duration of outages as measured by SAIFI and SAIDI, respectively. Pepco's reliability programs include the following initiatives:

- Vegetation Management: For overhead systems, vegetation management (i.e., tree trimming) is Pepco's largest single preventive maintenance program. Pepco currently has a four year cyclical program of tree trimming. This program is designed to maintain clearances between

[1] District of Columbia Municipal Regulations Title 15, Chapter 36, Electricity Quality of Service Standards, (§3603). Formal Case No. 982, *In re Investigation of the Potomac Elec. Power Co. Regarding Interruption to Elec. Energy Service*; Formal Case No. 1002, *In re Joint Application of Pepco and the New RC, Inc. for Authorization and Approval of Merger Transaction, Notice of Final Rulemaking*, §3603.11 (Feb. 24, 2012).
[1] *Id*. §3603.11(a).

vegetation and overhead facilities, to reduce tree caused outages and to minimize equipment failures. Efficient implementation of strategic and definitive cyclical vegetation management programs throughout the electric distribution industry has proven to minimize incidental contact between vegetation and overhead distribution circuits, leading to improved SAIFI and SAIDI.

- Feeder Improvement: These projects consist of activities designed to address reliability based on historic performance of distribution feeders, which are medium voltage power lines transferring power from the substation to the distribution transformers. The focus of these projects is to arrest negative trends and return a feeder's performance to acceptable levels.
- Underground Residential Distribution ("URD") Cable Replacement and Enhancement: The purpose of the URD Program is to identify, analyze and initiate corrective actions for the mitigation of URD cable failures (mostly due to aged cable, 1970's and 1980's vintages) and to ensure the ongoing integrity of the URD system, in terms of reliability, safety and cost. A focused approach is used to identify sections of underground cable that are approaching the end of their reliable life and to replace and/or repair such sections of cable before multiple interruptions are experienced by customers. The selection criteria for the URD Program include recent cable failure history, number of customers served, system design, cable design and cable vintage.

- Distribution Automation: Pepco recognizes the benefits of deploying smart grid technology to improve infrastructure reliability, enhance the customer experience, and increase interaction levels with the grid. Pepco's distribution automation approach involves the deployment of advanced control systems across the distribution system, which can automatically identify and isolate trouble spots in the system in real time and restore service to customers in the unaffected parts of the system.
- Load Growth and Load Maintenance: Planning for future load growth starts with the development of load growth projections. Peak load forecasts are developed for three years to allow adequate time to complete routine construction work. Longer range forecasting (4 to 10 years) is used to develop advance plans for large construction projects that require more than two or three years to complete, to identify the need for additional supply capacity at existing substations, for new substation capacity and to develop advanced plans for the higher voltage substation supply (i.e., 34.5 kV to 230 kV systems). Accordingly, the foregoing planning process supports both new customer growth as well as increased reliability of the electric system.
- PEPCO-DC Undergrounding Project: Over the past several years, severe weather resulted in a large number of power outages in the District, imposing significant costs and problems for District residents and businesses. In response to the outages, Mayor Vincent Gray formed a task force to provide advice on actions that may be taken to reduce future

storm-related power outages, including the undergrounding of power lines. The recommendations also enumerated the need for a significant plan to be implemented in order to upgrade electric distribution infrastructure so that it may withstand more frequent weather events. On June 17, 2014 Pepco filed its Application, Testimony and Triennial Plan with the Commission for final approval prior to the start of work. We expect this plan to reduce the number of outages that District of Columbia customers will experience and improve the overall performance of the distribution system.

9. Q. Mr. Gausman, do you believe that Pepco will meet the EQSS reliability requirements if the proposed merger is approved?

A. Yes, I do. Pepco's management and engineers have reviewed the commitments and programs I have described with Mr. Alden and other members of Exelon Corporation's ("Exelon's") utility integration team, and we are confident that we will continue to meet our current and proposed reliability commitments following the merger. I am also confident that, as part of the Exelon family of utilities, we will identify additional best practices from the Exelon utilities so that our reliability programs will continue to improve and we will be able to achieve the enhanced reliability commitments that Mr. Alden discusses in his testimony.

10. Q. Mr. Gausman, do you believe that Pepco will complete the Pepco-DC Undergrounding project if the Merger is approved?

A. Yes. Based on my discussions with Mr. Alden and members of Exelon's integration team, Exelon is committed to moving forward with and completing the undergrounding project for the benefit of the District of Columbia and its residents.

III. CONCLUSION

11. Q. Does this conclude your direct testimony?

A. Yes.

C.V. Khouzami Direct Testimony
DC P.S.C. - - June 18, 2014

Introduced as:
Joint Applicants _____ (F)

TABLE OF CONTENTS

JOINT APPLICANTS
BEFORE THE
PUBLIC SERVICE COMMISSION OF THE DISTRICT OF COLUMBIA
DIRECT TESTIMONY OF CARIM V. KHOUZAMI
FORMAL CASE NO. _____

I. INTRODUCTION AND PURPOSE OF TESTIMONY

1. Q. Please state your name and business address.

A. My name is Carim V. Khouzami. My business address is 750 East Pratt Street, Baltimore, Maryland 21202.[1]

2. Q. By whom are you employed and in what capacity?

A. I am a Senior Vice President of Baltimore Gas and Electric Company ("BGE") and am now serving as Chief Integration Officer for the proposed Merger (the "Merger") of Exelon Corporation ("Exelon") and Pepco Holdings, Inc. ("PHI") (including its utility subsidiaries, Potomac Electric Power Company ("Pepco"), Delmarva Power & Light Company ("Delmarva Power") and Atlantic City Electric ("ACE") (the "PHI utilities")).[2] Prior to assuming the position of Chief Integration Officer, I served as BGE's Chief Financial Officer and Treasurer.

3. Q. Please describe your responsibilities as Chief Integration Officer.

A. As the Chief Integration Officer for Exelon, I am working with Donna Kinzel (the PHI Chief Integration Officer) to lead the Integration Office for the Merger and report directly to an Integration Steering Committee comprised of

---

[1] This is my interim business address associated with my role as Chief Integration Officer. My BGE business address is 2 Center Plaza, 110 West Fayette Street, Baltimore, Maryland 21201.

[2] In my testimony, I will refer to the applicants identified in the Application as the "Joint Applicants". The Joint Applicants include Pepco, Exelon, and PHI.

top-level executives from all Exelon business areas involved in the Merger. The Integration Office has oversight of Merger integration activities with responsibilities for establishing strategic, financial, and operational priorities, overseeing development and execution of integration plans, and making recommendations to resolve integration issues.

4. Q. Please describe the responsibilities you have held as Senior Vice President, CFO and Treasurer.

A. My responsibilities have included managing the financial condition of BGE and employing financial policies that maintain the financial health and stability of the utility, enabling BGE to obtain the capital necessary to both provide safe and reliable service and maintain a sound capital structure. In my capacity as CFO, I have had oversight of BGE's accounting, financial reporting, financial planning and budgeting, and tax functions, as well as BGE's internal control structure. As Treasurer, I have been responsible for managing BGE's relationship with the financial community and with the credit rating agencies.

5. Q. What is your educational background?

A. I hold a Bachelor of Arts degree in Economics and Communication Studies from Vanderbilt University and a Master's Degree in Business Administration from Columbia University.

6. Q. Please describe your professional experience and affiliations.

A. I joined Constellation Energy Group, Inc. ("Constellation Energy") in February 2005 and served in various positions of increasing responsibility before being appointed Executive Director, Investor Relations in 2009. During that time, I managed Constellation Energy's relationships with shareholders and analysts. In January 2010, I assumed the additional responsibility of leading Constellation Energy's corporate financial planning and analysis activities. In January of 2011, I was appointed to my position as Treasurer and CFO of BGE. In 2013, I was promoted to Senior Vice President, Treasurer, and CFO of BGE.

Prior to joining Constellation Energy, I worked as an Associate at Bear, Stearns & Co. Inc., primarily focusing on mergers and acquisitions and financing transactions within the financial institutions and insurance sectors. I currently serve on the Board of Directors of two local non-profit organizations – the Port Discovery Children's Museum and the Baltimore Urban Debate League.

7. Q. Have you previously testified before a state utility commission?

A. Yes. I testified before the Maryland Public Service Commission in Case No. 9299, *In the Matter of the Application of Baltimore Gas and Electric Company for Adjustment in Its Electric and Gas Base Rates*, which was filed in July 2012.

8. Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to discuss: (1) finance and accounting issues associated with the Merger, including Exelon's related commitments; and (2) the Merger integration process and estimated savings and synergies. Specifically as to the finance and accounting matters, I will describe the economic terms of the Merger, the source of funds to be used for the Merger, and the combined company's financial strength. I also will describe Exelon's accounting commitments, its commitment to ring-fence PHI and Pepco, from Exelon's other entities and operations, and Exelon's commitments to ensure the financial strength of Pepco. Additionally, I will testify regarding the accounting treatment of the Merger for Pepco following the closing of the Merger and why that treatment will not impact customer rates. As to Merger integration and synergies, I will provide an overview of the integration process and associated timelines as well as the estimated savings we project to be realized by Pepco. Finally, I will describe changes in affiliated agreements for shared services..

II. OVERVIEW OF THE MERGER TRANSACTION

9. Q. Please describe the economic terms of the Merger.

A. Exelon will acquire PHI for approximately $6.8 billion. Upon consummation of the Merger, each PHI shareholder will receive $27.25 in cash for each outstanding share of PHI common stock not held by PHI, Exelon, Merger Sub, a PHI or Exelon affiliate, or a dissenting PHI stockholder properly asserting appraisal rights.[3] The common stock of Exelon will be unaffected by the merger, with each issued and outstanding share of stock remaining outstanding following the Merger. Moreover, the Merger will not change the terms or character of the debt of Exelon currently outstanding and will have no effect on the outstanding debt securities or the capital structure of Pepco or any other PHI subsidiary utilities.

[3] Additionally, to protect PHI shareholders, Exelon is pre-funding a "reverse break-up fee" through a Subscription Agreement for Series A Non-Voting Non-Convertible Preferred Stock (the "Subscription Agreement"). Per the terms of the Subscription Agreement, on April 30, 2014, Exelon purchased 9,000 shares of Series A Non-Voting Non-Convertible Preferred Stock ("Preferred Shares") issued by PHI for an aggregate purchase price of $90 million ("Initial Purchase"). Exelon will purchase an additional 1,800 Preferred Shares for a purchase price of $18 million every ninety days following the Initial Purchase until the earlier of: (1) the purchase of an aggregate of 18,000 Preferred Shares; (2) the closing of the Merger; or (3) the termination of the Merger Agreement. The Preferred Shares will be entitled to receive a cumulative, non-participating cash dividend of 0.1% per annum, payable quarterly.

10. Q. Please explain how Exelon proposes to finance the Merger.

A. Exelon has the necessary financial ability to complete this transaction and has obtained a bridge loan agreement to fund the acquisition pending completion of the permanent financing. Exelon's strong balance sheet will enable it to source permanent financing for the purchase price using a balanced mix of debt and equity along with cash on its balance sheet. We plan to fund roughly 50 percent of the acquisition price from the proceeds of debt to be issued and serviced by Exelon at the holding company level. The remaining portion of the transaction will be funded with proceeds from issuing Exelon common stock and mandatory convertible securities and cash from the sale of non-core assets at Exelon Generation. Exelon plans that the permanent financing will be in place before the Merger closing.

11. Q. Will transaction costs associated with the Merger be recovered in Pepco's rates?

A. No. As stated in the Application, and consistent with Exelon's practice in the Exelon-Constellation Energy merger, Exelon will not pass along to Pepco customers transaction costs incurred in connection with consummation of the Merger. The categories of transaction costs incurred in connection with consummation of the Merger which will not be recovered from utility customers are: (1) consultant, investment banker and legal fees, (2) change in control payments, (3) costs associated with the shareholder meetings and a proxy statement related to the Merger approval by PHI shareholders and (4) costs associated with Exelon's financing for the Merger.

12. Q. Please describe the corporate structure that will result from the Merger transaction.

A. PHI will become a limited liability company and an indirect, wholly-owned subsidiary of Exelon; PHI's stock will no longer be publicly traded. Specifically, PHI will become the direct subsidiary of a bankruptcy-remote special purpose entity ("SPE") being created to "ring-fence" PHI and the PHI utilities, which, in turn, will be a direct subsidiary of Exelon Energy Delivery Company, LLC ("EEDC").[4] EEDC is, and will remain, the direct parent of Commonwealth Edison Company ("ComEd"), PECO Energy Company ("PECO"), and RF Holdco, LLC, which is the SPE that owns BGE. PHI's current unregulated businesses (including PHI Service Company, Potomac Capital Investment Corp., Pepco Energy Services, Inc. and related companies) will be transferred from the PHI portion of the holding company structure and will become subsidiaries outside the PHI ring-fenced structure. Pepco and Conectiv will remain as PHI's direct subsidiaries, while Delmarva Power and ACE will continue as Conectiv's subsidiaries.

A corporate organization chart of the post-Merger corporate structure, showing the placement of PHI and its regulated utilities, is attached to the Application as Exhibit 4.

13. Q. What is an SPE and what is its role?

A. An SPE – special purpose entity - is a corporate entity created to provide structural separation of a subsidiary from its parent or affiliates. For a regulated

[4] Ring-fencing is explained later in my testimony.

utility, the structural separation provides protections from exposure to financial risks that may be experienced by the parent company or by unregulated affiliates, such as Exelon generation and nuclear operations. Here, because the SPE serves to separate PHI from EEDC and its other Exelon affiliates, PHI will be an indirect, rather than a direct, subsidiary of Exelon, and as a result, Pepco will benefit from additional insulation from perceived potential risks associated with Exelon's holding company structure and its ownership and operation of nuclear generation.

III. FINANCIAL STRENGTH OF EXELON AND PEPCO, POST-MERGER

14. Q. Please provide an overview of the financial position of the combined company.

A. The Merger builds upon the existing financial strength of Exelon and of PHI to create, both immediately and in the long term, a combined company that is on firm financial footing, with a financial strength similar to that of each of the Joint Applicants currently. The combined company will strive to maintain strong financial metrics, with investment grade ratings and financial discipline.

Exelon is dedicated to maintaining solid investment grade ratings for the combined company and for Pepco. Since the announcement of the Merger, the credit rating agencies have affirmed the credit ratings and stable outlook for Exelon, PHI, and their respective utilities. Exelon places great importance on the maintenance of investment grade credit ratings. Since Exelon's addition of BGE, BGE has not only maintained, but improved, its credit ratings.

15. Q. What is the proposed capital structure of Pepco post-merger?

A. To support the financial condition and solid investment ratings of Pepco, Exelon is committed to target an average equity level of at least 48% in Pepco as well as the other PHI utilities for ratemaking purposes.

IV. RING-FENCING MEASURES

16. Q. What is meant by ring-fencing?

A. "Ring-fencing" refers to the implementation of measures, including certain key legal protections, for specific affiliates within a holding company structure in order to protect such affiliates and their assets. A primary goal of ring-fencing is to provide the ring-fenced entities with "bankruptcy remoteness" from the rest of the holding company structure, such that a bankruptcy filing associated with other parts of the corporate organization, including the holding company itself, would not be expected to result in a bankruptcy of the ring-fenced entities. In practical terms, ring-fencing measures serve as safeguards to ensure a utility is shielded from events at a parent corporation or its other subsidiaries. Such measures legally wall-off elements of a utility's finances and assets from the parent company and its businesses, while still allowing operational efficiencies and the positive flow of best business practices from one utility to another. An additional benefit of ring-fencing is that it allows differentiation of risk profiles among affiliates or between an affiliate and its corporate parent.

17. Q. Are ring-fencing measures currently in effect at any of Exelon's utilities?

A. Yes. The Maryland Public Service Commission adopted a series of ring-fencing measures for BGE in both Case No. 9173, Phase II, Order No. 82986 (Oct. 30, 2009) and in Case No. 9271, Order No. 84698 (Feb. 17, 2012). In addition, both PECO and ComEd have in place respective sets of ring-fencing measures that are intended to maintain independence in the management and direction of the companies.

18. Q. Is Exelon committing to employ any ring-fencing measures for the PHI utilities?

A. Yes. Exelon has committed to a suite of ring-fencing measures that are some of the strongest safeguards employed nationwide. The protection afforded by ring-fencing measures has been recognized by both regulators and credit rating agencies, as I explain later. The PHI utilities will be protected from business, financial and operational risk exposures associated with the other Exelon subsidiaries, including the other Exelon utilities and Exelon's unregulated operations and activities (*e.g.* nuclear operations), through the creation and use of a bankruptcy-remote SPE. In addition, Exelon and PHI will commit to implement the following ring-fencing arrangements for at least five years following completion of the Merger, absent permission from the District of Columbia Public Service Commission (the "Commission") to act otherwise:

- Pepco will maintain its separate existence and separate franchise privileges;
- Pepco will maintain separate books and records;
- Pepco's books and records pertaining to its operations in the District of Columbia will be available for inspection and examination by the Commission;
- Pepco will maintain separate debt so that it will not be responsible for the debts of affiliate companies and preferred stock, if any, and Pepco will

maintain its own corporate and debt credit rating, as well as ratings for long-term debt and preferred stock.

Provisions comparable to those described above will also be adopted by PHI to assure its separateness from the SPE, the PHI utilities, Exelon and other Exelon affiliates.

19. Q. Please describe the ring-fencing measures associated with the SPE that Exelon is proposing to protect the PHI utilities.

A. As previously explained, PHI will become a subsidiary of the SPE being created to ring-fence the PHI utilities, which in turn, will be a subsidiary of EEDC. The sole purpose of the SPE will be to hold 100% of the equity interests in PHI. Exelon will cause EEDC to transfer the PHI shares to the SPE as an absolute conveyance or "true sale" with the intention of removing the PHI shares from the bankruptcy estate of Exelon. Exelon has committed that the SPE will have adequate capitalization for the nature of its business. The SPE will have no employees and no operational functions other than those related to holding the equity interests in PHI.

The Board of Directors of the SPE will have one independent director. The independent director will be an employee of an SPE administration company in the business of protecting SPEs. A voluntary petition for bankruptcy by the SPE or any amendment to the organizational documents of the SPE that would remove this requirement or other ring-fencing requirements will require the approval of the entire Board of Directors of the SPE, including the independent director. In addition, the SPE will issue a non-economic interest (the "Golden

Share") in the SPE to an SPE administration company in the business of protecting SPEs and separate from the SPE administration company retained for the SPE independent director position. A voluntary petition for bankruptcy by the SPE or any amendment to the organizational documents of the SPE that would remove this requirement or other ring-fencing requirements will require the affirmative consent of the holder of the Golden Share.

The SPE will maintain arms-length relationships with Exelon, PHI, and PHI's subsidiaries, including Pepco. At all times, the SPE will hold itself out as a separate entity from each of Exelon, PHI, and PHI's subsidiaries, will conduct business in its own name, and will not assume liability for the debts of Exelon, PHI, or PHI's subsidiaries. To this end, the SPE's funds will not be commingled with the funds of Exelon, PHI, or PHI's subsidiaries; the SPE will maintain a separate name from and will not use the trademarks, service marks or other intellectual property of Exelon, PHI, or PHI's subsidiaries; and the SPE will maintain separate books, accounts and financial statements reflecting its separate assets and liabilities.

Exelon anticipates obtaining a legal opinion that, as a result of the ring-fencing measures it proposes to implement, a bankruptcy court would not consolidate the assets and liabilities of the SPE with those of Exelon, in the event of an Exelon bankruptcy, or the assets and liabilities of PHI with those of either the SPE or Exelon, in the event of a bankruptcy of either of those entities.

20. Q. Do the rating agencies treat BGE differently, relative to the rest of Exelon, due to the ring-fencing measures that were previously put in place?

A. Yes. In light of the credit insulation provided by the ring-fencing measures adopted for BGE, the rating agencies have indicated that they view the credit quality of BGE on a stand-alone basis, which is reflected in the credit ratings of BGE. Specifically, subsequent to institution of BGE's ring-fencing measures in 2009, S&P raised the corporate credit rating of BGE to BBB+, which became two notches higher than the BBB- rating of its then-parent, Constellation. The upgrade reflected the stand-alone credit quality for BGE. This ratings change reflected S&P's views on the structural protections put in place to insulate BGE from Constellation. Currently, BGE enjoys a credit rating of A-, which is still two notches higher than the BBB rating of its parent, Exelon.

21. Q. Have the rating agencies indicated how they will treat the ring-fencing of the PHI Utilities?

A. Yes. S&P has already commented that, in affirming the ratings of PHI and its subsidiaries, the expectation is that the transaction will provide credit insulation for the subsidiaries sufficient to support ratings above the group credit profile of Exelon.

22. Q. Is Exelon making any commitments regarding the administration of the ring-fencing measures you have described?

A. Yes. PHI and Pepco will amend their charters and by-laws to include a unanimous vote of the Board of Directors is required to file a voluntary bankruptcy petition.

V. MERGER ACCOUNTING

23. Q. Please describe the general requirements associated with purchase accounting as they relate to the Merger.

A. For accounting purposes, Exelon is considered the purchaser of PHI pursuant to the terms of the Merger. As such, Exelon will be required by U.S. Generally Accepted Accounting Principles ("GAAP") to apply purchase accounting to record the Merger transaction in its consolidated financial statements. Under purchase accounting, the sum of the purchase price paid for the common stock of PHI plus the consolidated debt recorded on PHI's balance sheet would be allocated to the assets acquired and the liabilities assumed from PHI based on the fair values of such assets and liabilities as of the acquisition date. If the purchase price for PHI common stock plus PHI debt exceeds the fair value of the net assets acquired, the excess will be recorded as goodwill. Alternatively, if the fair value of the net assets acquired exceeds the purchase price for PHI common stock plus PHI debt, the resulting "negative goodwill" will be recognized as income in the accounting period in which the Merger closes.

24. Q. Please describe "push-down" accounting and its relevance to this Merger.

A. Under push-down accounting, Exelon, in its consolidated financial reporting, will be required to adjust the recorded amounts of the assets and liabilities of PHI and each of its subsidiaries to fair value as of the acquisition date. While the U.S. Securities and Exchange Commission ("SEC") generally prefers that such asset and liability adjustments also be reflected on the separate financial statements of each of the acquired company's subsidiaries (referred to as "push down" purchase accounting), such treatment is not always required by the

SEC when an acquired company's subsidiary has significant amounts of public debt or preferred stock securities outstanding.

Here, Exelon currently anticipates that no adjustments will be made to the amounts of assets and liabilities recorded by Pepco in its stand-alone financial statements. Exelon employed this approach to the reporting of BGE's assets and liabilities in the Exelon-Constellation transaction, and it was approved by the SEC. Exelon intends to employ the same approach with Pepco and is seeking SEC approval of this accounting treatment.

25. Q. Will Exelon's application of purchase accounting result in the creation of any regulatory assets or liabilities on Pepco's financial statements or the allocation of any additional costs to Pepco?

A. No costs will be allocated to Pepco related to purchase accounting. As previously discussed, subject to SEC concurrence, Exelon does not currently intend to apply "push down" purchase accounting to Pepco. As such, Exelon expects that Pepco will continue to prepare its financial statements using historical book values, with no adjustments for any new purchase-related regulatory assets or liabilities on their respective books and no additional allocation of costs or credits pursuant to purchase accounting.

26. Q. Will the accumulated deferred income taxes and accumulated deferred investment tax credits on Pepco's books be affected by the Merger?

A. No. The tax basis and book basis of Pepco's assets will be unchanged on the date that the Merger closes from what they were immediately preceding the closing, assuming no "push down" purchase accounting is required. Thus, Exelon does not anticipate any impact on accumulated deferred income taxes, accumulated deferred investment tax credits or the expected utilization of net operating loss carryforwards.

27. Q. Will the Merger affect the PHI money pool?

A. Yes. Currently, Pepco and Delmarva are eligible to fully participate in (i.e. invest in and borrow from) a money pool with one another and their non-utility affiliates; ACE, in contrast, is only permitted to borrow from the money pool. Following the Merger, there will not be any non-utility operating entities within the PHI portion of the combined holding company structure, and the money pool, therefore, will only have the three utility participants (plus PHI and the PHI Service Company, which will only be lenders to the money pool and will facilitate pool transactions).

Given the change in nature of the money pool, Exelon and PHI believe it would be appropriate for ACE to become a full participant in the money pool following the Merger. The three PHI utilities would only participate to the extent they can obtain a more favorable investment or borrowing rate from the money pool than available in the public market. For at least five years following completion of the Merger, no entities other than the PHI utilities (plus PHI and PHI Services Company) will participate in the PHI utilities' money pool, the PHI utilities will not participate in the money pool operated by Exelon, and there will be no commingling of funds with Exelon.

VI. THE MERGER INTEGRATION PROCESS

28. Q. Please provide an overview of the planned merger integration process.

A. Exelon and the PHI utilities have assembled a group of officers, senior managers, and other employees to plan, execute, and coordinate the business integration of the combined companies. Our goal is to ensure execution of integration plans so that upon closing the Merger partners are combined into a unified organization that operates effectively and efficiently, is well managed and is able to realize the goals and objectives established for the post-Merger operation of Pepco and the other PHI utilities.

29. Q. Please describe the integration process in more detail

A. In order to accomplish this goal, we will use an approach to merger integration developed by Exelon which consists of five distinct phases:

1. **Framework Development –** Establishment of an appropriate foundation for the merger integration process, including formation of "business area teams" ("BATs") and decision-making and issue-resolution processes. A BAT is created for each business area that may be affected by the Merger and its membership includes employees of each company with responsibility for the affected area. The BATs are responsible for developing and executing detailed functional plans so that the combined organization is fully operational upon consummation of the Merger, as well as developing initiatives to achieve synergy targets;

2. **Analysis –** Assessment of the current state of both companies, with an understanding of differences that need to be aligned for "Day 1" (the day on which the companies are merged) and for the long-term realization of savings and synergy opportunities;

3. **Design –** Development of a high-level description of the proposed "end state" for the merged companies, including updating of organizational structures and policies;

4. **Implementation Planning –** Development of an implementation plan to achieve the "end state," with a detailed schedule for completion; and final "Day 1" plans.

5. **Implementation –** During implementation, business areas execute the developed plans. Key activities include transitioning work from the integration teams to the "go forward" management and complying with all merger commitments, so that on "Day 1" the companies can operate as an integrated enterprise.

As Chief Integration Officer, I work with the PHI Chief Integration Officer to lead an extensive integration management structure to plan and guide the integration effort. Given the nature of the integration requirements, other executives from Exelon and PHI are also engaged with this effort to provide insights into current operations.

Additionally, we have developed a Project Management Office ("PMO") to oversee and coordinate all activities related to the planning and execution of the integration process. The PMO is supported by a "Core Team" – comprised of Exelon and PHI employees – from the Information Technology ("IT"), Finance, Human Resources, Supply, Communications and Operations areas of the companies. The Core Team provides integration guidance to all BATs and coordinates with the BATs to identify requirements and constraints (e.g., the impact of IT integration on specific business areas) and resolve cross-functional issues.

The structure I have described is illustrated in an organizational chart as JOINT APPLICANTS (F)-1, which shows how employees from various corporate organizations, operations, and support functions work cooperatively with each other as we work towards integrating the companies: The members of the Integration Office, the Core Teams, and the BATs will be selected based on their knowledge and experience relevant to each core area of the integration process.

30. Q. Are there particular factors that will guide the Joint Applicants' plans for the integration of the PHI utilities into the Exelon family of utilities?

A. Yes. As Mr. Crane has described, the Merger is intended to create the premier Mid-Atlantic energy distribution utility. As such, I expect the integration process to be particularly focused on ensuring that the PHI utilities are aligned with the existing family of Exelon utilities so that best practices for operational excellence can be easily shared.

As Messrs. Crane, Rigby, and O'Brien have also emphasized, Exelon's utility management model allows operating utilities to access the resources, expertise and financial strength of Exelon and all of its utilities while maintaining a strong local presence and remaining fully responsive to local conditions and priorities. As a result, the integration process will also be designed to reflect the fact that Pepco will remain a separate corporate entity, with a Board of Directors, and issue its own debt and preferred stock. The utility management model currently employed by PHI and the PHI utilities and the integration of PHI and the PHI utilities into Exelon's utility management model are described in the direct testimony of Mr. Rigby and Mr. O'Brien, respectively.

31. Q. Will the integration process take into account the Joint Applicants' Merger commitments?

A. Yes, it will. Exelon has been successful in complying with its current merger commitments, and our planned integration process for this Merger will include careful monitoring and compliance with the Merger commitments and the integration of those commitments into Merger implementation plans. By way of example, the integration process and plans will reflect a commitments to maintain PHI's and Pepco's corporate headquarters in the District of Columbia. These plans will also incorporate the commitments Mr. O'Brien has described with respect to employment levels and employee compensation and benefits.

32. Q. What is the current timeline for the integration process?

A. The five-phase integration process I have described is structured so that each phase builds upon the objectives and conclusions of the preceding phase. The companies have already begun the Framework Development phase, and I expect that Framework Development will be complete in July 2014 with formation of all of the necessary BATs. Based upon our work to date, we are focusing on a close in the second or third quarter of 2015 and a thus a "Day 1" for the combined companies in the second or third quarter of 2015.

While the companies will use that timeframe for Day 1 readiness and preparing for effective and efficient operation of the combined organization in the first year of operations, the integration process will continue for several years because the actual combination of business structures, systems and processes must "ramp up" on a carefully staged basis over time. As a consequence, the anticipated savings from the Merger will not be fully realized until several years after the Merger is consummated. To cite just one example, the integration of technology platforms will take place over several years in order to accommodate the priorities of the business and constraints on available resources.

VII. PROJECTED MERGER-RELATED SAVINGS

33. Q. Please describe the level of Merger-related savings that you expect to be achieved at the PHI utilities.

A. Exelon conducted an analysis, utilizing publicly available data, of the potential savings that can reasonably be realized by combining Exelon and PHI and the portion of such savings allocable to the PHI utilities. As shown in Table 1, below, positive Merger-related savings at the PHI utilities, net of the costs that will be incurred to achieve those savings, are projected to begin in the second year after the Merger and grow to approximately $43 million annually by the fifth year. The estimated savings for the PHI utilities, net of the costs to achieve the savings, will total $95 million over that five-year period, as shown below:

TABLE 1

($ Million)	Pre-Closing	Year 1	Year 2	Year 3	Year 4	Year 5	Total
PHI Utilities Synergies		18	25	35	39	43	160
Costs to Achieve	(11)	(49)	(5)	(0)	(0)	(0)	(65)
PHI Utilities Net Synergies	(11)	(31)	20	35	39	43	95

Additional details of the estimated savings and costs-to-achieve are provided in JOINT APPLICANTS (F)-2.

As Mr. Crane explains in his direct testimony, Exelon is proposing to fund a Customer Investment Fund of $100 million to provide an immediate tangible benefit to PHI customers from the Merger-related savings the PHI utilities are expected to achieve during the first five years following completion of the Merger. As the data in Table 1 show, the proposed Customer Investment Fund actually exceeds the estimated PHI utilities' Merger savings during that period. Additionally, Exelon and PHI are committing to flow through net Merger savings allocable to the PHI utilities in future rate proceedings. Consequently, if any PHI utility were to file a rate case utilizing a test year within that five-year post-Merger window, customers will benefit from receiving some portion of the net Merger savings twice – once through the Customer Investment Fund and a second time through lower post-Merger expenses reflected in the ratemaking process.

Of course, annual Merger savings (estimated to be $43 million as shown above) will continue beyond five years following the completion of the Merger. As a result, customers will realize additional benefits, in future rate cases, from avoided expenses that continue to accrue during those future periods beyond the $100 million tangible benefit the companies propose to provide immediately following the Merger. The Customer Investment Fund is not subject to downward adjustment if Exelon does not achieve the expected Merger-related savings attributable to the PHI utilities.

34. Q. How were these estimates of savings developed?

A. Exelon engaged the Boston Consulting Group ("BCG"), a global management consulting firm, to analyze the potential savings that could be realized through the Merger. BCG undertook this project in two phases.

First, BCG conducted an "outside-in" analysis of the PHI companies. In this phase, BCG collected publicly available information, such as PHI investor communications and documents filed with regulatory agencies (e.g., annual reports to the SEC and Federal Energy Regulatory Commission). BCG then estimated potential synergies and savings that could be achieved at the combined Exelon-PHI company based on information from other mergers of electric and gas utilities and additional data provided by Exelon regarding its operations. The additional data used in this "outside-in" analysis included information on synergies and savings achieved at BGE after Exelon's merger with Constellation Energy and the actual costs to achieve those synergies and savings, but did not include any non-public PHI information.

Second, BCG conducted a "bottom-up" analysis. For this analysis, BCG obtained information from PHI about how various corporate, support and utility functions are performed at the PHI companies and the levels of expenditures and full-time equivalent employees for each function. Using this information, BCG "mapped" the functions performed at the PHI companies to the equivalent functions at Exelon and the Exelon utilities. Based on information Exelon provided about how these functions would likely be staffed and performed for the combined enterprise, BCG calculated expected Merger savings in each functional area and estimated the cost and time necessary to achieve those savings.

Each approach has strengths and limitations, which are generally associated with the type of data available for each. However, together they serve as a useful "check" on each other to validate projected savings and the associated costs to achieve those savings.

From the "outside-in" analysis, BCG concluded that, at the end of the fifth year following the Merger, the combination of Exelon and the PHI companies (including utility and non-utility operations) would be expected to achieve annual operational expense savings of between $109 million and $151 million. The second "bottom-up" analysis, using more detailed data from the PHI utilities, produced a lower estimate of $96 million in annual savings. In both cases, the estimated annual savings reflect synergies across the entire post-merger company (*i.e.* all Exelon and PHI utilities and non-utility businesses).

In light of these two estimates and the way each was derived, BCG recommended – and Exelon adopted – a projected level of annual savings from the Merger for the entire company of $130 million beginning at the end of the fifth year following the Merger. Although the $130 million is greater than the "bottom-up" analysis, we believe that this estimate is justified because the "bottom-up" analysis does not capture all of the savings that could be achieved, such as additional performance improvements at the PHI utilities and other opportunities that may be found through the integration process.

Once the estimated steady-state annual savings target of $130 million had been established, BCG was able to project the savings and costs to achieve that would be expected at the PHI utilities in each of the first five years following completion of the Merger. After the Merger was announced, Exelon requested that BCG prepare a revised estimate of synergies and savings in light of Exelon's Merger commitments (including commitments relating to PHI employees and facilities). BCG's examination projected net savings of $95 million at the PHI utilities in the first five years of the Merger, as shown in Table 1. JOINT APPLICANTS (F)-2 is a copy of BCG's revised estimate of synergies and savings.

35. Q. Please explain the nature of the synergies and savings that the Joint Applicants expect to achieve.

A. The Merger of Exelon and PHI will create the opportunity to realize savings by eliminating overlap and duplication in company-wide operations, realizing economies of scale and streamlining corporate functions. For example:

- Information Technology: Significant economies of scale are expected to be achieved through integration and select migration of technology environments, with additional savings from eliminating duplicative investments in technology and reducing expenditures on a combined company basis for data centers, network infrastructure, applications, and technology support.
- Corporate Functions and Support Services: Certain corporate functions required by two distinct companies – such as investor relations and employee benefits administration – become duplicative when those functions are combined. By eliminating this functional duplication and streamlining corporate services, the Merger will result in lower overhead expense and more efficient use of resources to meet the needs of the combined companies and, in that way, create substantial savings over time.

While most of the projected savings are associated with eliminating duplication and achieving economies of scale in corporate functions, Exelon also expects to achieve some additional savings through the application of best practices in transmission and distribution functions and customer operations and in supply procurement.

The savings Exelon has projected are based entirely on operational expense savings. Savings in future capital expenditures arising from the Merger at Pepco and the other PHI utilities are expected to be reinvested in other needed capital projects.

36. Q. Mr. Khouzami, what are the "costs to achieve" the savings you have described?

A. Costs to achieve are actual expenditures that will be incurred as a result of the Merger, and include expenses in such areas as employee compensation, communications, technology migration, financing, accounting, and many others. As shown in the table of estimated merger savings I have provided, we expect the costs-to-achieve to be incurred in the early years after the Merger. Because the Joint Applicants have committed that Pepco and the other PHI utilities will not seek recovery in rates of transaction costs incurred in connection with consummating the Merger, those costs are not considered to be "costs to achieve" in estimating savings from the Merger.

37. Q. Mr. Khouzami, how were the estimated savings and costs to achieve at the combined company allocated to the PHI utilities?

A. Because certain functions and resources – such as computer systems and human resource management – at both Exelon and PHI are shared among both regulated and non-regulated or competitive activities, the first step in the allocation process is to determine whether an estimated savings or costs to achieve category could be directly assigned to the regulated or non-regulated business segments based on the nature of the savings or costs to achieve category.

For those savings or costs to achieve that can be directly assigned to the PHI utilities (for example, supply chain benefits within the regional transmission and distribution businesses), the net savings assigned to PHI were allocated among the PHI utilities based on a Modified Massachusetts Formula ("MMF") calculation.[5]

For those savings that could not be directly assigned to the regulated or non-regulated or competitive business segments (for example, consolidation of corporate support functions supporting both the regulated and competitive business segments), the PHI utilities were allocated a portion of the savings among all of the combined company subsidiaries (regulated and non-regulated) based on the MMF calculation. The results of this allocation process are shown in JOINT APPLICANTS (F)-2

38. Q. Mr. Khouzami in light of the fact that the proposed Customer Investment Fund actually exceeds the estimated PHI utilities' Merger savings will it be necessary to monitor the costs and savings of the Merger on a going forward basis?

~~A.~~ No. As Mr. Crane explains in his direct testimony, Exelon is proposing a Customer Investment Fund of $100 million to provide an immediate tangible benefit to PHI customers from the Merger-related savings the PHI utilities are expected to achieve during the first five years following completion of the Merger. As a result, Pepco's customers in the District of Columbia will experience direct and traceable financial benefits resulting from the merger. Additionally, Exelon and PHI are committing to flow through net Merger savings

[5] The MMF calculation reflects a three-part formula consisting of revenues, assets and direct labor.

allocable to the PHI utilities in future rate proceedings. Consequently, if any PHI utility were to file a base rate case within that five-year post-Merger window, customers will benefit from receiving some portion of the net Merger savings twice – once through the Customer Investment Fund and a second time through lower post-Merger expenses reflected in the ratemaking process. The added savings will be reflected in lower test-period costs and expenses. Thus, there is no reason to track merger costs and savings on a going forward basis.

VIII. RELIABILITY COMMITMENTS AND FINANCIAL PENALTIES

39. Q. Mr. Khouzami, Mr. Crane has stated that Exelon will back-up its reliability commitments at Pepco with a performance guaranty that will trigger a financial penalty if reliability performance-improvement goals are not achieved. Can you please explain the performance guaranty and financial penalty proposed by Exelon?

A. Yes. Exelon is providing a performance guaranty that Pepco will achieve a level of improvement by 2020 in two key reliability metrics: its System Average Interruption Frequency Index ("SAIFI") and its System Average Interruption Duration Index ("SAIDI"). As Mr. Alden explains, Exelon is committing that Pepco will achieve a SAIFI of 0.54 and SAIDI of 107 based on a three-year average calculation in 2021 for the 2018-2020 period. The calculation of SAIFI and SAIDI will be performed using the same procedures as the Commission now uses in calculating Pepco's reliability performance. Exelon is proposing to use a three-year average to avoid the effects of weather variability in a single measurement year.

If this level of reliability improvement is not achieved, the return on equity ("ROE") to which Pepco would otherwise be entitled in its next electric distribution rate case filed after January 1, 2021, will be reduced by twenty-five basis points. This financial penalty would be in addition to any other financial penalty the Commission might impose for if Pepco failed to meet its Commission-set reliability requirements in 2020.

40. Q. How long does Exelon propose that the ROE penalty, if imposed, would remain in place?

A. The ROE reduction would apply throughout the period that the rates established by that rate proceeding are in effect. Pepco would be required to initiate a new rate proceeding and obtain an order from the Commission approving new rates in order to end the ROE penalty.

41. Q. Under Exelon's proposal would Pepco be penalized if it meets one reliability commitment but not both?

A. Yes, because the two metrics measure different components of reliability: SAIFI is a measure of the number of sustained customer interruptions, while SAIDI is a measure of the duration of sustained customer outages. Under Exelon's proposal, if Pepco achieves its performance commitment on one metric but not the other metric, the penalty will still be imposed but it would be reduced by half (i.e., 12.5 basis points instead of 25 basis points).

IX. AFFILIATED INTEREST AGREEMENT

42. Q. Please explain the affiliated interest agreement that Pepco will enter into upon the consummation of the Merger.

A. Pepco will participate in Exelon's existing General Services Agreement ("GSA"). A copy of the GSA is attached as part of JOINT APPLICANTS (F)-3. The GSA is an agreement under which Exelon Business Service Company (the "EBSC") provides a variety of services to Exelon utilities and other Exelon subsidiaries. Upon approval and close of the Merger, Pepco will become a party to the GSA and be able to receive services from the EBSC. As a party to the GSA, Pepco will also be able to receive services from (and provide services to) other Exelon utilities, including services relating to storm management.

43. Q. What is the EBSC?

A. Like many other energy holding-company systems, including PHI, Exelon created a service company, the Exelon Business Services Company, or EBSC, to house specific support functions that it believed could be staffed more efficiently and economically on a centralized basis. The EBSC is designed to provide a range of what would typically be regarded as in-house services in the case of a stand-alone utility. In broad terms, those services fall into the following categories: information technology; supply; finance; human resources; government and environmental affairs and public policy; general counsel/legal; corporate secretary; strategy; and communications. The EBSC offers its services to the members of the Exelon family of companies, including PECO, ComEd and BGE, and enables those companies to realize economies of scale and scope that could be very difficult to achieve on an individual-company basis.

44. Q. Will Pepco be required to use the EBSC?

A. No. Under the terms of the GSA, each utility has the discretion to determine whether and to what extent it will utilize the EBSC's services. The only exception to this general policy falls in the area of "corporate governance," where the EBSC provides services to each party to the GSA.

45. Q. How will Pepco be charged for services provided by EBSC?

A. The GSA provides that the services furnished by the EBSC to Pepco will be billed at the EBSC's cost, and direct charges of those costs will be made wherever possible. If a cost cannot be assigned directly to a utility, it is allocated on the basis of the allocation factors/methodologies identified in the EBSC Associate Transaction Procedures Manual ("ATPM"), which is attached as JOINT APPLICANTS (F)-3. The ATPM will be filed with the Commission within thirty days after the effective date of Pepco's first use of EBSC services. After the Merger, the Commission will have the same access to EBSC's books and records and the same transparency into EBSC as it has with PHI Service Company.

46. Q. Will the PHI Service Company be maintained after the Merger?

A. A. The PHI Service Company will remain in place for an undetermined period of time during post-merger integration. As integration proceeds and systems and functions are combined in phases, Pepco may receive different services from the EBSC and the PHI Service Company until all shared corporate support functions are consolidated under EBSC.

X. CONCLUSION

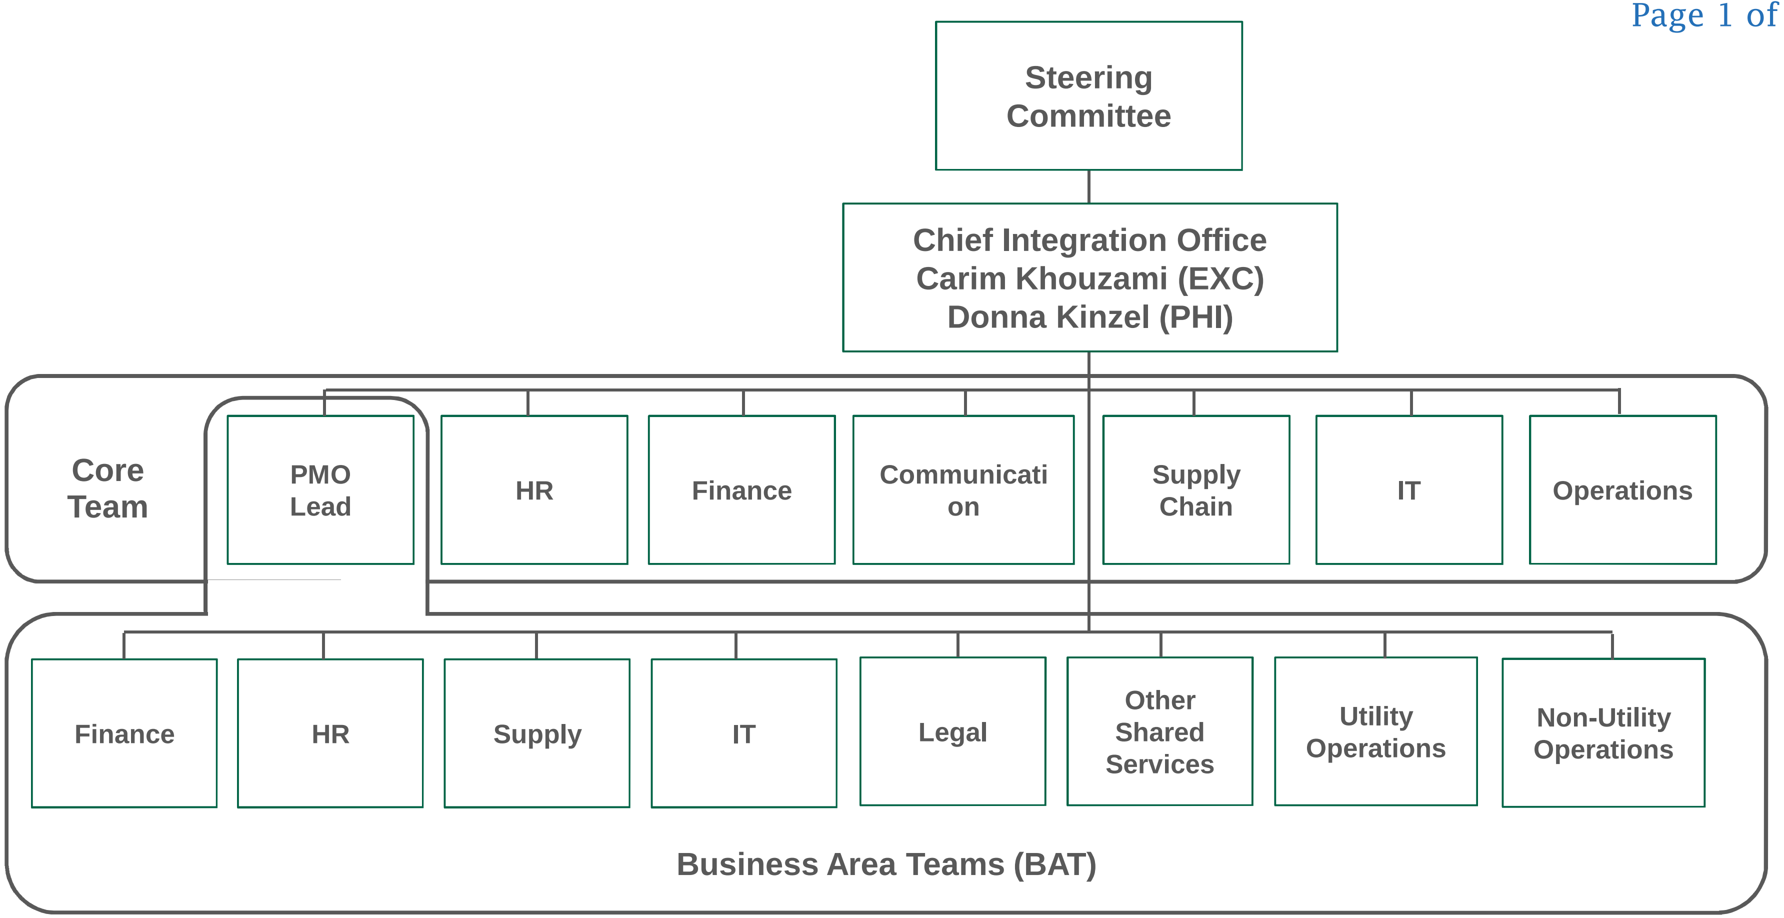
47. Q. Does this conclude your direct testimony?

A. Yes, it does.

C.V. Khouzami Direct Testimony
DC P.S.C. - - June 18, 2014

Introduced as:
Joint Applicants _____ (F)-1

PMO Organization



C.V. Khouzami Direct Testimony

Joint Applicants _____ (F)-2

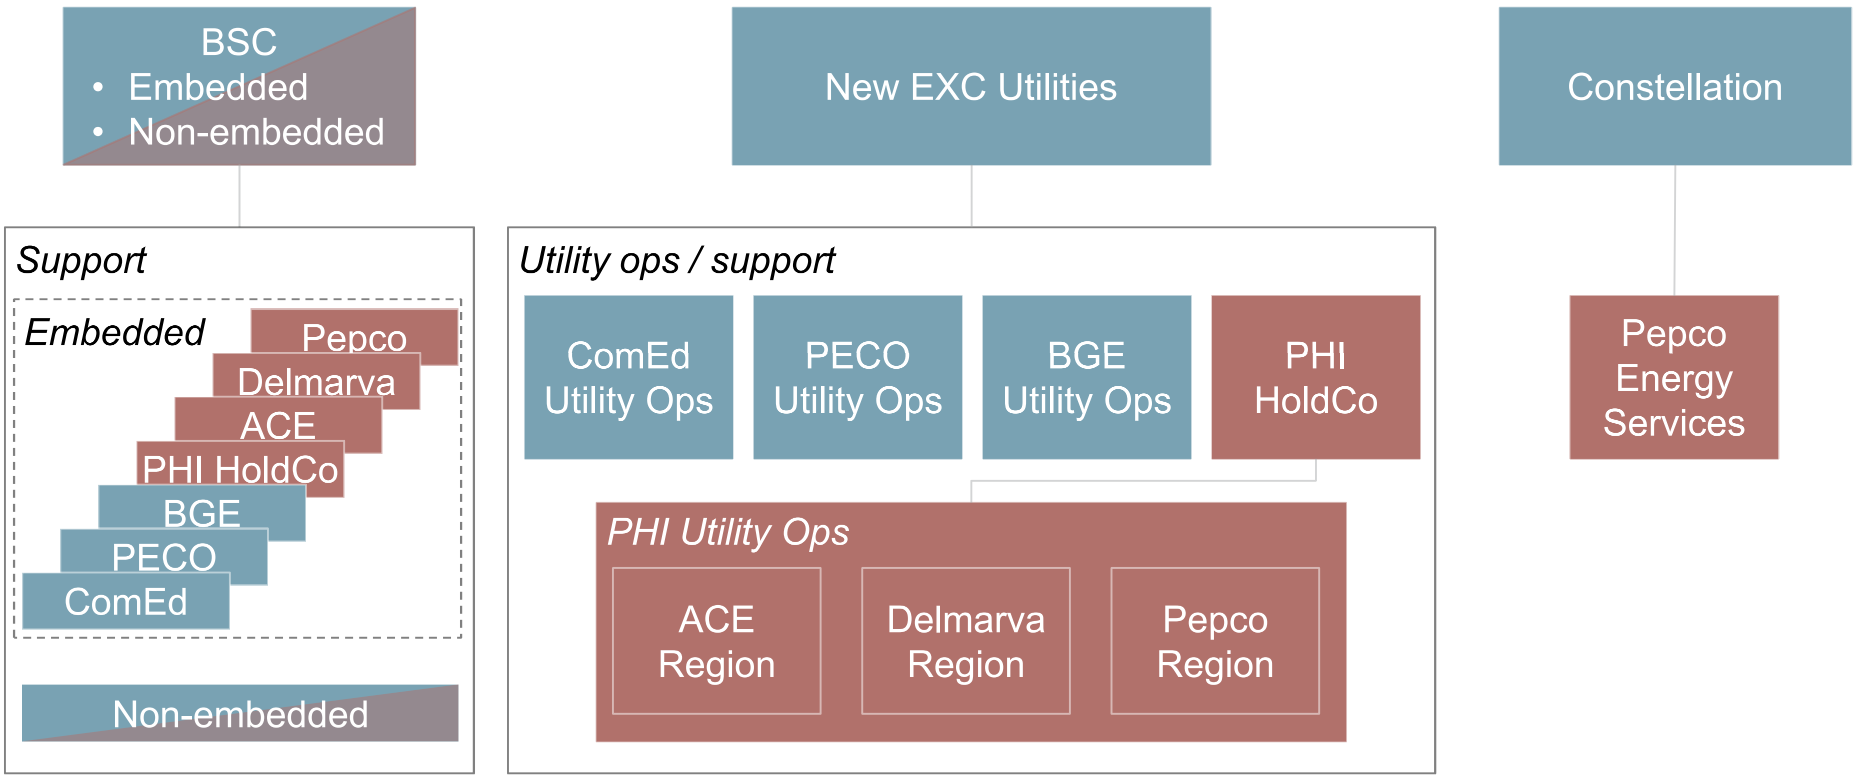
Net synergy estimates

June 2014

Exelon.

Target operating model: Incorporate PHI as fourth utility

Non-embedded BSC to be shared, PES to be incorporated into Constellation



Note: "Embedded" represents employees and associated costs (including all departmental costs) that are part of an actual Operating Company (yet role up to BSC); "Non-embedded" represents employees and associated costs that are all shared service company costs

Synergy estimate: Approach overview

Outside-in and bottom-up estimates

Outside-in: Based on publicly available data[1] (FERC, 10-K, PHI external communications)

Scale[2] applied to utility ops/support[3] and BSC

Scale[2] applied to each function

Synergy estimate

Bottom-up: Based on PHI data from due diligence

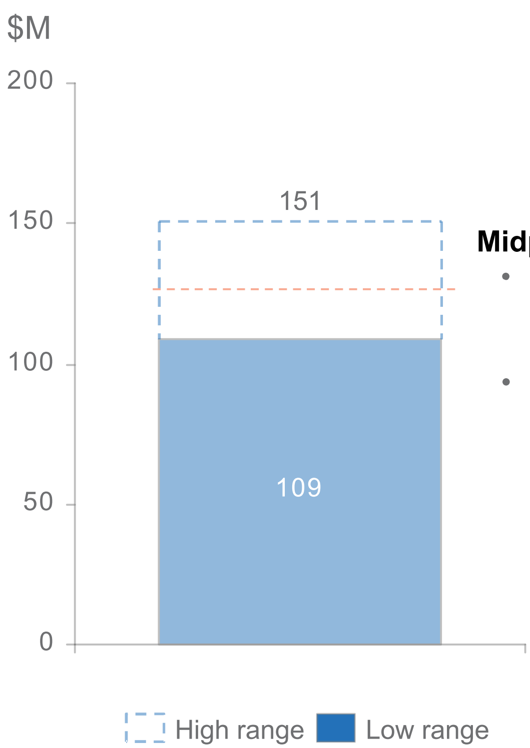
Bottom-up: Performance improvement and scale[3,4] applied to each subfunction

1. No internal information was provided by PHI 2. Based on BCG synergy database for power & gas 3. No labor synergies included for utility ops 4. Estimated by working team without any synergy target

Overview of O&M synergy estimates for EXC and PHI

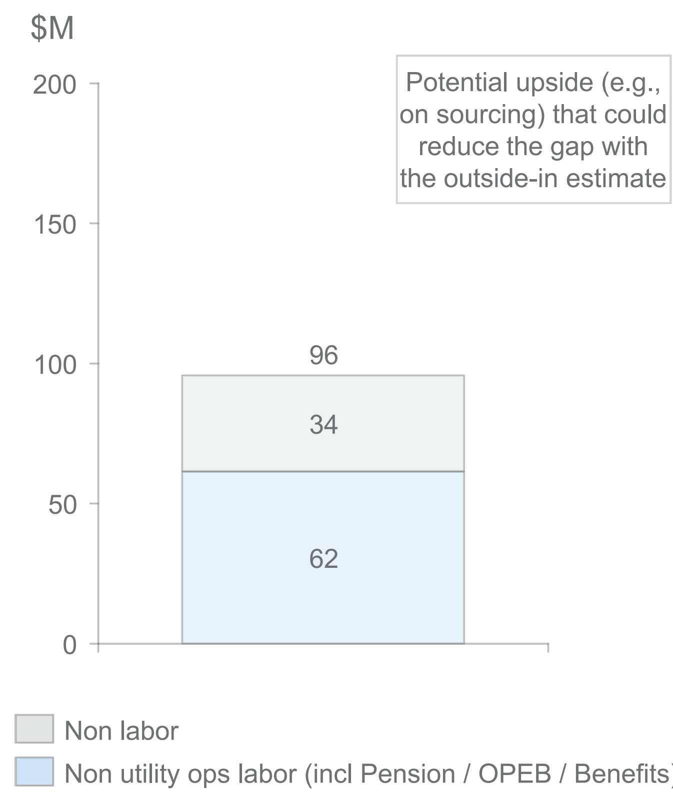
$130M outside-in vs. $96M bottom-up

"Outside-in" Y5 steady state synergy estimate: $130M



Midpoint: $130M
- Non utility ops labor (incl Pension/ OPEB): $*57M*
- Non-labor: $*73M*

"Bottom-up" Y5 steady state synergy estimate: $96M



Recommend targeting $130M annual run rate synergy to capture unidentified upside to bottom-up estimate

Outside-in estimate of O&M synergies: ~$130M /yr in year 5

Estimate ranges from $109M to $151M

O&M synergy estimate for EXC and PHI – Year 5 steady state synergies

	Utility support services	BSC (non embedded)	Total
Combined EXC/PHI O&M baseline	$2,598M[1]	$1052M	$3650M
Synergy (% EXC /PHI O&M baseline)	~1%	8-12%	3-4%
PHI O&M baseline	$488M[1]	$213M	$701M
Synergy (% PHI baseline)	5%	40-60%	16-22%

Phase 1 baseline

1. Baseline includes utility ops

Exelon.

Bottom-up estimate of O&M synergies: ~$96M / yr in year 5

Breakdown by cost category

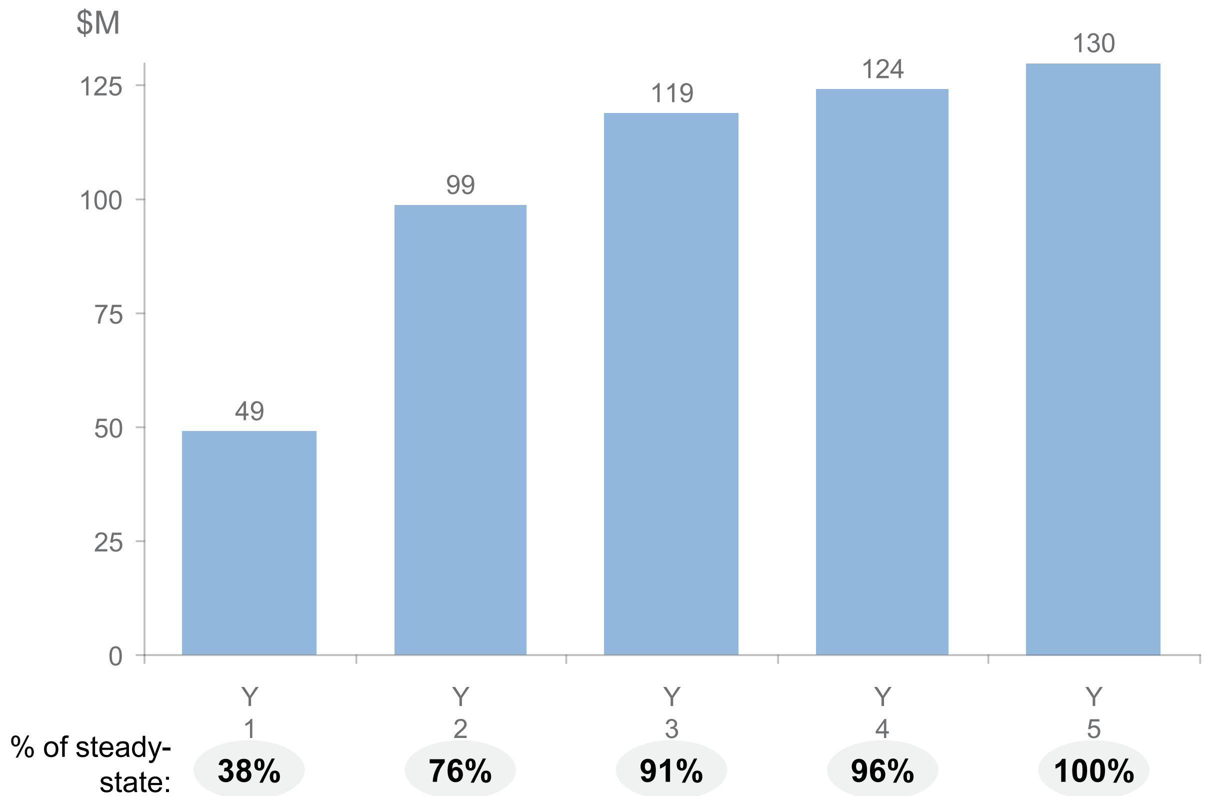
	Labor (unloaded)	Non Labor	Pension / OPEB / Benefits	Bad debt + pass through & deferred costs	Total non-fuel O&M
PHI O&M baseline ($M)	323	561	131	32 + 122	1,169
Synergy (% PHI baseline)	14%	6%	13%	0%	8%

1. Includes sourcing synergies 2. Pension / OPEB / Benefits synergy assumed to be 30% of unloaded labor benefit + SERP

Exelon.

Glidepath of O&M synergies for EXC and PHI

Estimated synergy glidepath realization



Assumptions / data sources

BSC labor synergies interdependent with IT integration

- Year 1 FTE reduction: ~30% of target
- Year 2 FTE reduction : ~80% of target
- Years 3-5 FTE reduction: 100% of target

Utility support performance improvement[1] assumed to begin in Year 3 (2-yr commitment not to impact utility)

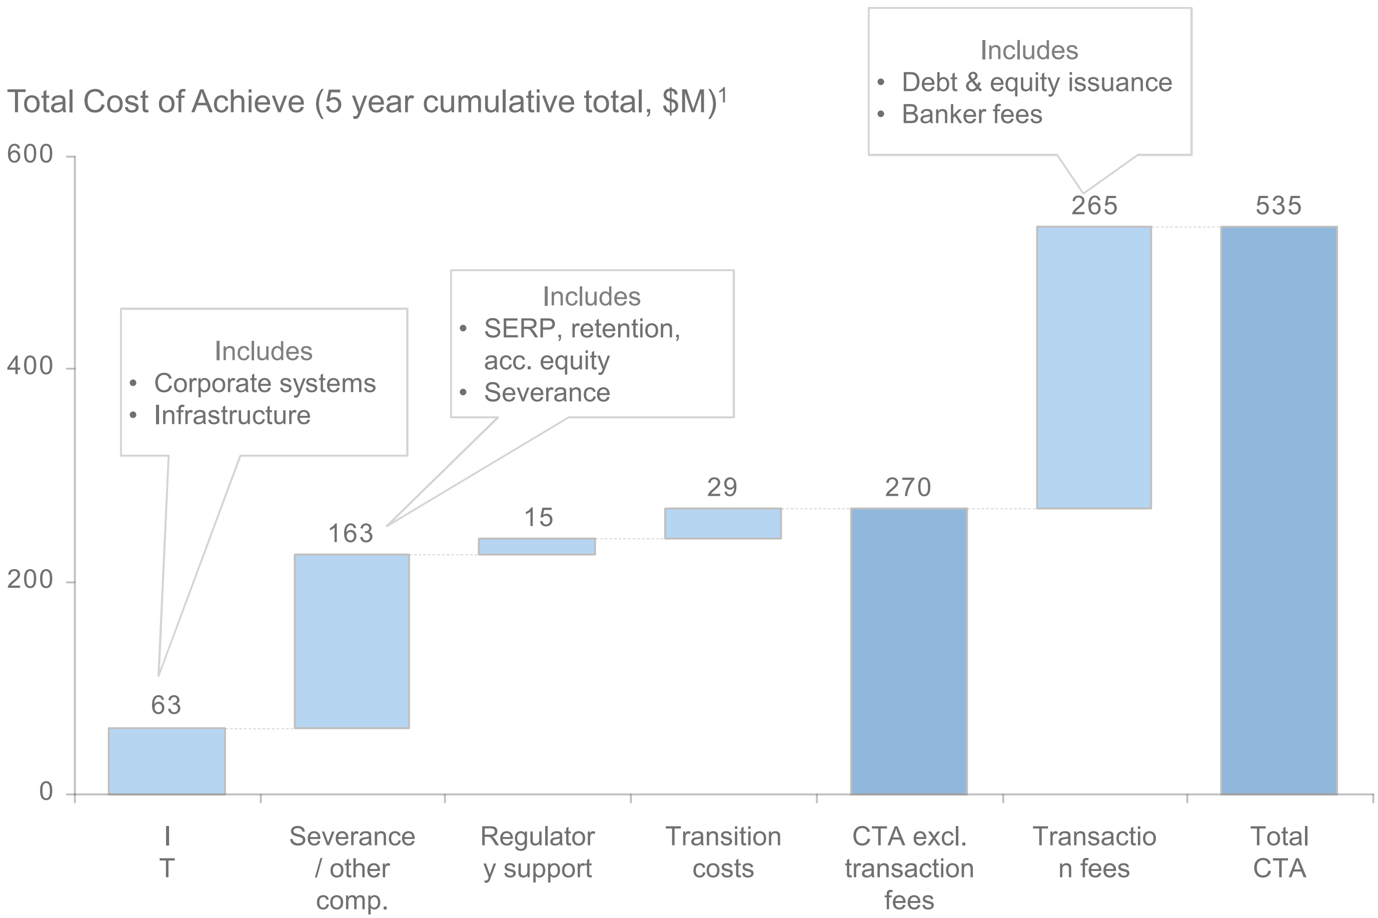
- Year 1 FTE reduction[1]: 0% of target
- Year 2 FTE reduction[1]: 0% of target
- Year 3 FTE reduction[1]: ~50% of target
- Year 4 FTE reduction[1]: ~75% of target
- Year 5 FTE reduction[1]: 100% of target

Assumes no reduction of utility ops FTEs

Non-labor synergies (primarily IT) driven by system decommissioning and not realized until Year 2

1. FTE reductions assumed on utility support (e.g., engineering)
Source: Glide path based on bottom-up glide path, grossed up to reach $130M outside-in target synergy

Preliminary estimate of transaction Cost To Achieve



1. Includes O&M (~94%) and Capex. (~6%)

EXELON BUSINESS SERVICES COMPANY

ASSOCIATE TRANSACTION PROCEDURES MANUAL

January 2014

Introduction

Exelon Business Services Company, LLC (BSC or Services Company) provides a variety of administrative, management and support services to Exelon Corporation and other Exelon system companies and business units (Client Companies). BSC is subject to the rules and regulations of the Federal Energy Regulatory Commission (FERC) pursuant to the Public Utility Holding Company Act of 2005 (PUHCA). In addition, each of the individual state regulated public utility companies have additional requirements related to associate transactions. Where applicable, these requirements have been incorporated into these Policies and Procedures.

Service Agreements and Work Orders

BSC has entered into a General Services Agreement or Service Agreement with Client Companies that is substantially similar to the General Services Agreement (GSA) attached hereto as Exhibit A. The Service Agreement sets forth in general terms the services to be performed by BSC directly or indirectly for Client Companies. BSC and each Client Company will prepare Work Orders, in the form of Service Level Arrangements (SLA), to specify the services to be performed by BSC for a Client Company. A sample SLA is attached hereto as Exhibit B. Additional documentation of work to be performed pursuant to SLAs may be used by the parties.

The purpose of the SLA is to establish service expectations between BSC and each Client Company. Each SLA will be reviewed and agreed upon on an as needed basis by authorized representatives of BSC and each Client Company. In conjunction with this review of SLAs, the allocation methods and ratios presented in Service Agreement Schedules 1 and 2, attached to the GSA, shall be reviewed and agreed upon by the parties.

An SLA typically contains the following elements:

1. Scope of Services

2. Service Level Expectations

3. Unit Cost Expectations

4. Performance Measures

5. Billing Process

6. Major Contingencies

Each SLA is approved by the individual(s) authorized to represent BSC and the Client Company related to the services to be provided.

BSC currently has three distinct processes related to SLAs.

1. The SLA process starts with the BSC Service Providers and the Client Companies representatives meeting to agree upon services to be provided over a future period of time, generally one to three years in duration. As BSC has been in operation for over ten years, most services have been defined and have been agreed to by the parties, and have been delivered efficiently and consistently to the Client Companies for a period of time. New service areas and services may be added in the future, or may be removed from the BSC services offerings. The SLA meetings focus on changes to service offerings and on refining the expected quantities to be consumed, as well as on improvements in providing the services or changes in the operational requirements around providing the services, including benchmarking and performance metrics, definition of responsibilities and other provisions between Service Providers and customer. The Service Providers are responsible for the over-all content in each SLA. Portions of the SLA template are reviewed by Legal. Early in the SLA process, the Legal review concentrates on the purpose, scope, governing agreement and certain terms and conditions. The Accounting review of SLA drafts takes place near the end of the process and concentrates on the billing approach and pricing table sections of the SLAs for compliance to the GSA and other PUHCA 2005 requirements. The billing / pricing sections of the SLAs are broken down into billing components for entry into the BSC Billing Systems. BSC Finance will check completed SLAs to make sure that changes are not made after Legal and Accounting review, or if such changes have been made, will obtain Legal and/or Accounting review of the changes. BSC Finance shall retain documentation evidencing the required SLA reviews in accordance with the record retention requirements. BSC works with the accounting and finance departments in the Client Companies to set-up the code block that the customer wants to be charged for the various services, and the level (company level, intermediate level, or department level) at which they wish to be billed. BSC Accounting works with BSC Finance to set up the appropriate accounting – cost capture pools on BSC's books. For most customers, the BSC Billing Systems journalize the actual monthly charges on the customer's books during the financial close.

2. The second process relates to change orders and other emergent work that appear after budgets have been locked down and the actual year has begun. Similar to the SLA process, BSC Accounting is involved to review any change orders for GSA and PUHCA compliance, and work with the customers' accounting departments to set-up and bill each item appropriately.

3. The third process relates to acquisitions or other new potential business for BSC. The BSC Service Providers interface with the M&A Team. The BSC support services costs are developed and include one-time and on-going support costs. Emergent work projects are set-up to collect one-time charges of adding the acquisition into BSC established services. BSC may prepare a proposal capturing integrated support service scope, schedule, budget, and assumptions. Linkage to an existing customer SLA is generally preferred, otherwise a new SLA may need to be created. For new SLA work, general terms and conditions are reviewed and signed by the controlling customer authorizing the work to proceed. BSC Finance and BSC Accounting gets involved in similar roles as mentioned above for the other processes.

Accounting Procedures

BSC will maintain processes which allow it to accumulate costs in Cost Centers and cost pools. Where possible, these costs will be charged out to Client Companies using direct charging methodologies, including time and materials and unit price (standard rate) basis. Cost Centers and cost pools collect resource costs for services and activities described in the SLA. This process supports the philosophy of billing costs to the Client Company on an appropriate basis. BSC will use this process to maintain accounting systems to record all of its costs.

Costs will be billed to Client Companies as work is performed and costs are incurred. When a service requested by a Client Company has not been previously specified, a new SLA may be created or the existing one revised. BSC Accounting is responsible for ensuring that all of the billing methodologies are consistent with the GSA.

Direct Costs are defined as those that can be identified as applicable to services performed for a single Client Company or group of Client Companies. Direct costs include the fully distributed cost of providing a particular service. The fully distributed costs include labor costs, labor related costs (such as pensions and benefit costs, and facility costs), IT costs, outside services where applicable, back office support costs of running BSC, and other non-labor costs such as materials and supplies. Direct Costs will be charged to the Client Company or Companies responsible for the activity.

BSC will use direct charging (e.g., standard costing or unit prices and/or time and materials) and cost allocations to bill Client Companies. Under a standard costing methodology, as product or service units are used by the Client Companies, the services are directly billed to Client Companies at standard rates. Standard rates are fully cost burdened billing unit rates used by a specific department for a specified service. These rates are established for a number of services offered by the Services Company including invoice processing cost per invoice, mainframe computing cost per CPU minute, and IT desktop support cost per desktop computer. In general, these standard rates are calculated by estimating the fully distributed cost of providing the service for the year divided by the expected number of units (selected as the unit of measurement) to be consumed by all associated customers.

Residual amounts or costs that cannot be directly billed using reasonable measures will remain in the Cost Center to be allocated to Client Companies on an appropriate basis.

Indirect Costs include those costs of a general nature such as general services, and other support costs which cannot be specifically identified to a specific client company or smaller group of companies or to a specific service and therefore must be allocated. An example of Indirect Costs includes most corporate governance services that benefit all companies, which consists of, for example, functions such as accounting, finance, executive, strategic planning, investor relations, government affairs and policy, and corporate communications. The allocation methods used to assign costs to Client Companies will be based on factors identified in Schedule 1 attached to the GSA.

Services and Service Level Arrangements (SLA)

Based on experience and discussions with the Client Companies, BSC has made available a list of service offerings that are defined in each SLA for the SLA period. Responsibilities of Client Companies for requesting services are defined in the SLAs. A listing of current SLAs can be found on the Exelon Intranet under Organizations – Business Services (under Popular Links).

Services provided will be reviewed on an as needed basis by BSC and Client Companies. SLAs will be prepared for on-going and for special services, which benefit one or more Client Companies. Examples of on-going services are payroll processing and IT desktop support. SLAs will be approved by the individual(s) authorized to represent BSC and each Client Company in accordance with Company Capital Approval Policies. In all cases, the authorized approvers representing BSC and the Client Company will be different individuals.

When a new service or project is identified, BSC Finance and BSC Accounting will determine whether a new SLA shall be used or whether the costs shall be captured in an existing SLA. One or more of the following criteria should be considered in determining the need for a new SLA:

1. No existing SLA uses the billing methodology that is needed for the new service project.

2. No existing SLA charges costs to the benefiting Client Company for the new service or project.

3. There is a specific regulatory requirement to allocate costs in a specific manner regardless of amount for the new project/service.

4. No existing SLA captures similar activity or services.

5. The total estimated annual cost of the new service or project is greater than $500,000.

SLA (Work Order) Monitoring and Control

BSC Finance and BSC Accounting are responsible for reviewing, monitoring and maintaining the SLA (Work Order) documentation. BSC Finance and BSC Accounting will also authorize new SLAs as necessary. A formal annual review will be required of all SLAs including a review by legal. As part of the annual review, inactive SLAs will be removed from the manual.

Allocation Factors Update and Revisions

Allocation factors will be based on cost drivers specifically applicable to the service provided. BSC Accounting will have the primary responsibility for ensuring that allocation factors are correct, accurate and current. BSC Finance and the Service Providers will assist in gathering required usage and other data to calculate the allocation factors.

BSC Accounting will be responsible for evaluating new allocation methodologies in coordination with the Legal Department. Adequate supporting documentation shall be obtained from all associate companies/business units for the raw data used in the allocation methodologies, and maintained in accordance with record retention requirements set forth in the Exelon record retention policy and schedule.

A list of current allocations will be filed annually with the FERC on FERC Form No. 60.

Time Reporting

All BSC employees, including executives, shall keep, within reasonable cost, time records supporting labor charged to separately identifiable goods and services performed for Client Companies. Time records are kept in a timekeeping management system or manually on time sheets.

Employees will record time weekly in a minimum of one-hour increments. Departments may elect to record employees' time in increments smaller than an hour to meet special needs.

The employee's immediate supervisor will review and approve time reports. The BSC Controller's organization will be the authorized delegate for the review of executive time records. Time records will be maintained in accordance with record retention requirements set forth in the Exelon record retention policy and schedule.

Billing and Review

BSC shall prepare a monthly invoice report detailing the services / products provided by Service Area for each Client Company. Payment shall be made by the Client Company by making remittance or by making (offsetting) accounting entries of the amount billed. Payment term (or appropriate offsetting accounting entries) is within thirty days of receipt.

Dispute Resolution Procedure

In the event there is a dispute between the Client Company and BSC regarding a billing methodology and/or amount, representatives of the Services and Client Companies will meet to discuss the issue. If a resolution cannot be reached among the Parties, the issue will be referred to each Party's executive management for final resolution.

Internal Audit Control

Internal Audit, under the direction of the General Auditor, will conduct periodic reviews of BSC's business processes and systems to ensure that the services provided are properly documented and charged to the Client Companies on an appropriate basis. Reviews shall be performed such that all major service areas are evaluated over time. Internal Audit will also conduct reviews of transactions and SLA charge methods to assess whether they comply with regulatory requirements. Internal Audit will also review the BSC allocations and corporate governance costs every two years.

Internal Audit maintains an independent role and has direct contact to Exelon's Audit Committee. Audit findings, recommendations and progress toward resolution of findings are reported to the Audit Committee and Senior Management as appropriate.

Budgeting

Budgeting for BSC will be a joint effort between it and other Client Companies. Renewal / revision of SLAs for the upcoming budget period will provide the basis for preparing budgets.

Evaluation

BSC will review its costs for competitiveness on a regular basis. Benchmarking and other measurement techniques will be used to the extent deemed appropriate by senior management. Additionally, BSC will also initiate a customer review process to gauge the value and quality of the services provided. Results will be shared with the Client Companies to allow them to evaluate cost effectiveness and assess alternate options.

EXHIBIT A

GENERAL SERVICES AGREEMENT

BETWEEN

EXELON BUSINESS SERVICES COMPANY

AND

EXELON CORPORATION; EXELON ENERGY DELIVERY COMPANY, LLC; COMMONWEALTH EDISON COMPANY; PECO ENERGY COMPANY; EXELON VENTURES COMPANY, LLC; EXELON GENERATION COMPANY, LLC; EXELON ENTERPRISES COMPANY, LLC; UNICOM INVESTMENT INC.; AND THE SUBSIDIARIES, AFFILIATES AND ASSOCIATES OF EACH LISTED ENTITY.

THIS AGREEMENT, made and entered into this 1st day of January, 2001, by and between the following Parties: EXELON BUSINESS SERVICES COMPANY ("Services Company"), EXELON CORPORATION; EXELON ENERGY DELIVERY COMPANY, LLC; COMMONWEALTH EDISON COMPANY; PECO ENERGY COMPANY; EXELON VENTURES COMPANY, LLC; EXELON GENERATION COMPANY, LLC; EXELON ENTERPRISES COMPANY, LLC; UNICOM INVESTMENT INC; AND THE SUBSIDIARIES, AFFILIATES AND ASSOCIATES OF EACH LISTED ENTITY (collectively, the "Client Companies");

WITNESSETH:

WHEREAS, Client Companies, including EXELON CORPORATION, which is registered under the terms of the Public Utility Holding Company Act of 1935 (the "Act") and its other subsidiaries, affiliates and associates desire to enter into this agreement providing for the performance by Services Company for the Client Companies of certain services as more particularly set forth herein;

WHEREAS, Services Company is organized, staffed and equipped and has filed with the Securities and Exchange Commission ("the SEC") to be a subsidiary service company under Section 13 of the Act to render to EXELON CORPORATION, and other subsidiaries, affiliates and associates of EXELON CORPORATION, certain services as herein provided; and

WHEREAS, to maximize efficiency, and to achieve merger related savings, the Client Companies desire to avail themselves of the advisory, professional, technical and other services of persons employed or to be retained by Services Company, and to compensate Services Company appropriately for such services;

NOW, THEREFORE, in consideration of these premises and of the mutual agreements set forth herein, the Parties agree as follows:

Section 1. Agreement to Provide Services

Services Company agrees to provide to Client Companies, upon the terms and conditions set forth herein, the services hereinafter referred to and described in Section 2, at such times, for such period and in such manner as Client Companies may from time to time request. Except with respect to "Corporate Governance Services" as defined in Section 7 hereof, the Services Company shall perform only those services as are requested by the Client Companies. Services Company will keep itself and its personnel available and competent to provide to Client Companies such services so long as it is authorized to do so by the appropriate federal and state regulatory agencies. In providing such services, Services Company may arrange, where it deems appropriate, for the services of such experts, consultants, advisers and other persons with necessary qualifications as are required for or pertinent to the provision of such services.

Section 2. Services to be Provided

The services expected to be provided by Services Company hereunder may, upon request by a Client Company, include the services as set out in Schedule 2, attached hereto and made a part hereof. In addition to those identified in Schedule 2, Services Company shall provide such additional general or special services, whether or not now contemplated, as Client Companies may request from time to time and Services Company determines it is able to provide.

Notwithstanding the foregoing paragraph, no change in the organization of the Services Company, the type and character of the companies to be serviced, the factors for allocating costs to associate companies, or in the broad general categories of services to be rendered subject to Section 13 of the Act, or any rule, regulation or order thereunder, shall be made unless and until the Services Company shall first have given the SEC written notice of the proposed change not less than 60 days prior to the proposed effectiveness of any such change. If, upon the receipt of any such notice, the SEC shall notify the Services Company within the 60-day period that a question exists as to whether the proposed change is consistent with the provisions of Section 13 of the Act, or of any rule, regulation or order thereunder, then the proposed change shall not become effective unless and until the Services Company shall have filed with the SEC an appropriate declaration regarding such proposed change and the SEC shall have permitted such declaration to become effective.

Section 3. Changes in Parties

New direct or indirect subsidiaries, affiliates and associates of EXELON CORPORATION, which may come into existence after the effective date of this Services Agreement, may become additional Client Companies of Services Company and subject to this General Services Agreement. In addition, entities which are, as of the effective date of this General Services Agreement, direct or indirect subsidiaries, affiliates and associates of EXELON CORPORATION, may thereafter leave the holding company system, in which case they will no longer be subject to this General Services Agreement. The parties hereto shall make such changes in the scope and character of the services to be provided and the method of assigning, distributing or allocating costs of such services as may become necessary to achieve a fair and equitable assignment, distribution, or allocation of Services Company costs among associate companies taking into account both the new subsidiaries and the subsidiaries which have left the holding company system, subject to the provisions of Section 2 above.

Section 4. Compensation of Services Company

As compensation for the services to be rendered hereunder, Client Companies listed in Attachment A hereto, as revised from time to time, shall pay to Services Company all costs which reasonably can be identified and related to particular services provided by Services Company for or on Client Company's behalf (except as may otherwise be permitted by the SEC). All other Client Companies and their affiliates and associates (see Attachment B) shall pay to Services Company charges for services that are to be no less than cost (except as may otherwise be permitted by the SEC), insofar as costs can reasonably be identified and related by Services Company to its performance of particular services for or on behalf of Client Company.

The services described herein or contemplated to be provided hereunder shall be directly assigned, distributed or allocated by activity, project, program, work order or other appropriate basis. The factors for assigning or allocating Services Company costs to Client Company, as well as to other associate companies, are set forth in Schedules 1 and 2 attached hereto. Attachments A and B and Schedules 1 and 2 are each expressly incorporated herein and made a part hereof.

Any charges to the Client Companies on account of use of capital shall reflect a reasonable and efficient capital structure.

Section 5. Securities and Exchange Commission Rules

It is the intent of the Parties that the determination of the costs as used in this Agreement shall be consistent with, and in compliance with, the rules and regulations of the SEC, as they now exist or hereafter may be modified by the Commission.

Section 6. Service Review

The parties shall review each service covered by this Agreement on an as needed basis, to assess the quality of the service and to determine the continued need therefor, and shall, subject to the provisions of Section 2 above, amend the scope of services, delete services entirely from this Agreement, and/or decline services which are not "Corporate Governance Services," as defined in Section 7 hereof, as they determine to be necessary or desirable.

Section 7. Corporate Governance Services.

Whether or not requested by the Client Companies, the Services Company may provide to all Client Companies, and Client Companies shall pay Services Company for, “Corporate Governance Services.” Corporate governance consists of those activities and services reasonably determined to be necessary for the lawful and effective management of Exelon System businesses. Corporate Governance Services may be supplied from functions such as accounting, finance, executive, strategic planning, legal, human resources/benefits, audit, corporate communications and public affairs, environmental, health and safety, government affairs and policy, and investor relations. Corporate Governance Services may include, but are not limited to, the following: planning and project evaluation; finance and treasury; accounting and analysis; risk management; tax; shareholder and investor relations; merger and acquisition services; strategic planning; diversity; employee and labor relations; HR planning and development; compensation and benefits; legal services in the areas of securities, PUHCA, employment, regulatory, contract, litigation and intellectual property laws; legal and administrative support to the Board of Directors; environmental compliance activities; ethics and compliance programs; management services for compliance with Federal laws, regulations and other policy requirements, including relationship management with the U.S. Congress and Federal agencies; corporate communications; branding; corporate events; charitable support; community relations and communications to local organizations; and communications to employees.

Section 8. Payment

Payment shall be by making remittance of the amount billed or by making appropriate accounting entries on the books of the companies involved. Invoices shall be prepared on a monthly basis for services provided hereunder.

Section 9. EXELON CORPORATION

Except as authorized by rule, regulation, or order of the SEC, nothing in this Agreement shall be read to permit EXELON CORPORATION, or any person employed by or acting for EXELON CORPORATION, to provide services for other Parties, or any companies associated with said Parties.

Section 10. Client Companies

Except as limited by law or order of the SEC, Client Companies, their subsidiaries, affiliates and associates may provide services described herein to other Client Companies, their subsidiaries, affiliates and associates on the same terms and conditions as set out for the Services Company.

Section 11. Effective Date and Termination

This Agreement is executed subject to the consent and approval of all applicable regulatory agencies, and if so approved in its entirety, shall be deemed effective from the date that the merger between PECO ENERGY COMPANY and UNICOM CORPORATION was consummated, and shall remain in effect from said date unless terminated by mutual agreement or by any Party giving at least 90 days' written notice to the other Parties prior to the beginning of any calendar year, each Party fully reserving the right to so terminate this Agreement.

This Agreement may also be terminated or modified to the extent that performance may conflict with any rule, regulation or order of the SEC adopted before or after the making of this Agreement. This Agreement shall be terminated with respect to any Client Company immediately upon such Client Company ceasing to be a member of the Exelon holding company system.

The Parties' obligations under this Agreement which by their nature are intended to continue beyond the termination or expiration of this Agreement shall survive such termination or expiration.

Section 12. Access to Records

Records will be maintained in accordance with 17 C.F.R. §257 and in any event no less than seven years following a transaction under this Agreement. The Client Company may request access to and inspect the accounts and records of the Services Company, provided that the scope of access and inspection is limited to accounts and records that are related to such transaction.

Section 13. Assignment

This Agreement and the rights hereunder may not be assigned without the mutual written consent of all Parties hereto.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed and attested by their authorized officers as of the day and year first above written.

JOINT APPLICANTS
BEFORE THE
PUBLIC SERVICE COMMISSION OF THE DISTRICT OF COLUMBIA
DIRECT TESTIMONY
OF
SUSAN F. TIERNEY, Ph.D.
FORMAL CASE NO.____

I. INTRODUCTION AND PURPOSE

1. Q. Please state your full name and business address.

A. My name is Susan Fallows Tierney. I am employed at Analysis Group, Inc., 111 Huntington Avenue, 10^{th} Floor, Boston, Massachusetts, 02199.

2. Q. What is your position?

A. I am one of Analysis Group's Senior Advisors.

3. Q. What are your duties as a senior advisor at Analysis Group?

A. I am a lead consultant for many of our engagements with businesses, government agencies, non-governmental organizations, and other clients on matters relating to the electric and natural gas industries. For these projects, I supervise and work with teams of consultants with training in economics, business and finance, public policy and planning, math and computer science, and other fields.

4. Q. Please summarize your educational background and training.

A. I hold a Ph.D. in regional planning (1980) and a Masters in Regional Planning (1976), both from Cornell University. I was an assistant professor for

3.5 years at the University of California at Irvine, and have taught on a part-time basis at the Massachusetts Institute of Technology. I have lectured at numerous universities, including Harvard University, Yale University, MIT, New York University, Tufts University, the University of Pennsylvania, the University of Michigan, and others.

5. Q. Please describe your professional experience.

A. I have been involved in issues related to public utilities, ratemaking and regulation, and energy and environmental economics and policy for nearly 30 years. During this period, I have worked on electric and gas industry issues as a utility regulator and energy/environmental policy maker, educator, consultant, and expert witness. For more than 15 years, I have been a consultant and advisor on a variety of economic and policy issues in the energy sector. Prior to joining Analysis Group in July 2003, I was a consultant at Lexecon, Inc., and its predecessor, the Economics Resource Group, Inc.

Before that, I served in senior state and federal policy and regulatory positions for 13 years. I was the Assistant Secretary for Policy at the U.S. Department of Energy from 1993 through mid-1995. I held senior positions in the Massachusetts state government as Secretary of Environmental Affairs (1991-1993); Commissioner of the Department of Public Utilities (1988-1991); Executive Director of the Energy Facilities Siting Council (during the mid-1980s); and Senior Economist for the Executive Office of Energy Resources.

I currently sit on several non-profit boards and commissions, including serving as chair of the External Advisory Board of the National Renewable Energy Laboratory ("NREL"), chair of the Board of the ClimateWorks Foundation, and a director of World Resources Institute, the Alliance to Save Energy, and the Energy Foundation. I co-chair the NAESB Gas-Electric Harmonization Committee, am a member of the National Academy of Sciences panel on shale gas risk, and am co-lead author of the energy chapter of the National Climate Assessment. I am a member of the Bipartisan Policy Center's Energy Project, and the Environmental Advisory Council of the New York Independent System Operator. Previously, I served on the U.S. Secretary of Energy Advisory Board (and its Shale Gas Subcommittee), was a director of several companies (including EnerNOC, Inc.; Evergreen Solar; and Ze-gen, Inc), and served on the boards of several non-governmental organizations. On several occasions, I have served on technical review panels conducting peer reviews of DOE's national labs, including NREL's and the Energy Division of the Lawrence Berkeley National Laboratory ("LBNL"). I served as chair of the Policy Subgroup of the National Petroleum Council's study of the North American natural gas and oil resource base; chair of the Massachusetts Ocean Advisory Commission; co-chair of the National Commission on Energy Policy; a director of the Electric Power Research Institute; chair of the Electricity Innovation Institute's Board of Directors; a representative to committees of the North American Electric Reliability Council; a member of the National Academy of Sciences' Committee on Enhancing the Robustness and Resilience of Electrical Transmission and

Distribution in the United States to Terrorist Attack; and a member of the U.S. Secretary of Energy's Electric Reliability Task Force. My complete vita is attached as JOINT APPLICANTS (G)-1.

6. Q. Have you previously submitted testimony before state or federal bodies?

A. Yes. I have testified before utility regulatory agencies in many states, the Federal Energy Regulatory Commission, the U.S. Congress, several state legislatures, arbitration panels, and federal and state courts.

7. Q. What is the purpose of your testimony in this proceeding?

A. I have been asked by Exelon Corporation ("Exelon"), Pepco Holdings Inc. ("PHI"), and Potomac Electric Power Company ("Pepco") (together, the "Applicants") to provide testimony on the direct and indirect economic and policy benefits of their proposed merger (the "Merger"). At the request of the Applicants, I have reviewed the Application and have familiarized myself with the various commitments (the "Regulatory Commitments") the Applicants are making to the customers of Pepco and to the District of Columbia in support of the request for the District of Columbia Public Service Commission's ("Commission") approval of the proposed Merger. The Regulatory Commitments are enumerated in the Application. They are also described in more detail in the testimonies of the Applicants' witnesses.

8. Q. What are your overall conclusions about the economic benefits of the proposed Merger for Pepco customers and the economy of the District of Columbia?

A. As I describe in detail in my testimony below, the Merger offers many benefits to Pepco's District of Columbia customers and to the District of Columbia, itself, as a result of the Regulatory Commitments, which I summarize in Table SFT-1, below.

In terms of basic monetary commitments, Exelon pledges an amount of $100 million for the direct benefit of retail customers of all of the PHI companies, which is apportioned to the various companies based on the number of customers of each distribution company. In the District of Columbia, this Customer Investment Fund amounts to $14 million, or $52.95 per customer.

Additionally, Exelon has strengthened Pepco's commitments to reliability improvements for customers by pledging to be held financially accountable for the achievement of enhanced reliability performance goals ("Enhanced Reliability Commitments") by 2020.[1] Combined with reliability improvement projects already announced by PHI and underway (including the undergrounding project in Washington, D.C.), I calculate that the direct value to Pepco's retail customers of experiencing fewer and shorter service outages is $75.9 million.

[1] See the direct testimonies of Mr. Mark Alden ((Exelon's Vice President for Utilities Oversight) and Mr. Carim Khouzami (Exelon's Chief Integration Officer) for a description of Exelon's proposal to back-up its enhanced reliability commitments with a performance guaranty that will trigger a financial penalty if performance-improvement goals are not achieved.

Table SFT-1
Summary of Overall Benefits of the Proposed Merger

Benefits to:	Type of Benefits	Estimated Economic Benefits Associated with Merger's Regulatory Commitments to the District of Columbia:
Pepco customers	Tangible, quantifiable benefits	**Customer Investment Fund:** ▪ The Applicants will provide $14 million, which equates to $52.95 per distribution customer of Pepco. **Enhanced Reliability Commitments:** ▪ Pepco will continue implementation of its District of Columbia undergrounding project as currently planned and, moreover, to improve upon its reliability targets, with financial penalties in the event that Pepco does not achieve increased performance levels for system reliability. These benefits amount to $75.9 million in direct economic benefits to customers.

	Other unquantified benefits and commitments	**Rates and Costs:**
		▪ Pepco customers receive the benefit of synergy savings to Pepco in the future if/when rates are reset (assuming that such relies on a test year covering at least part of the first five years after the Merger is consummated).
		▪ Reliability and customer-service benefits from sharing best practices among the merged company's distribution companies.
		Regulatory Supervision and Governance:
		▪ Pepco and its parent submit to the jurisdiction of the Public Service Commission of the District of Columbia for all matters related to the Merger and the enforcement of these commitments, as well as to all matters relating to affiliate transactions among the various companies.
		▪ Customers of Pepco will be protected from business and financial risk exposures associated with its parent's unregulated operations and activities through appropriate ring-fencing provisions, which include a commitment to the following arrangements for at least 5 years following completion of the Merger:
		  ▪ Pepco will maintain its separate existence and its separate franchises and privileges, as well as maintaining separate books and records and will commit that all books and records pertaining to its regulated operations in the District of Columbia will be available for inspection and examination by the Commission.
		  ▪ Pepco will maintain separate debt so that it will not be responsible for the debts of affiliated companies and preferred stock, if any, and will maintain its own corporate and debt credit rating as well as ratings for long-term debt and preferred stock.
		  ▪ Pepco will maintain at least a common equity ratio consistent with the common equity ratios accepted in recent rate cases by the Commission for Pepco.
		Low Income Assistance:
		▪ Pepco commits to maintain and promote programs that provide assistance to low-income customers.
		Merger-Related Costs:
		▪ Pepco will not seek to recover any acquisition premium or transaction costs in rates, nor will it incur or assume any debt directly related to the Merger.

District of Columbia economy	Tangible, quantifiable benefits	**Direct, indirect and induced effects of the combined Customer Investment Fund and Enhanced Reliability Commitments on the economy of the District of Columbia:** ▪ 907 – 1,281 new jobs in the District of Columbia. ▪ Approximately $95.4 million – $133.6 million in overall economic value to the District of Columbia. ▪ Approximately $3.6 million – $5.5 million in incremental tax benefits to the District of Columbia.
	Other unquantified benefits and commitments	**Support for the District of Columbia's economic goals:** ▪ Continued local presence of a major corporation with strong community, economic and other goals: The Applicants will maintain the headquarters of Pepco's system, with appropriate levels of senior management, in the District of Columbia. The Exelon Board, Committee or Subsidiary Board meetings or Leadership meetings will be periodically held in the District of Columbia. ▪ Continued commitment to existing supplier diversity programs. **Support for community and charitable organizations in the District of Columbia**: ▪ Approximately $16 million over 10 years. In 2013, contributions amounted to about $1.6 million. **Employment benefits:** ▪ Commitment to honor all existing collective bargaining agreements. ▪ Commitment that, for at least 2 years following consummation of the Merger, there will not be a net reduction, due to involuntary attrition as a result of the Merger integration process, in the employment levels at Pepco and shall provide current and former employees at Pepco with compensation and benefits that are at least as favorable in the aggregate as the compensation and benefits provided to the employees immediately before the Merger Agreement.

Those two sets of tangible, quantifiable benefits to Pepco customers – the District-specific Customer Investment Fund and the Enhanced Reliability Commitments – provide not only direct and traceable financial benefits to Pepco's retail customers totaling $89.9 million in value, but also other, larger economic benefits to the District of Columbia's economy. Taking those two monetary commitments into account, I estimate conservatively that the Applicants' Regulatory Commitments introduce the following ranges of quantifiable economic benefits to the District of Columbia's economy (with the ranges based on different assumptions about how the Commission will decide to use the money in the Customer Investment Fund)[2]:

- 907 – 1,281 new jobs,
- $95.4 million – $133.6 million in overall economic value to the District of Columbia[3], and
- $3.6 million – $5.5 million in incremental tax revenues to the District of Columbia.

I say that those quantitative estimates of Merger benefits are conservative because they do not include several of the Applicants' other Regulatory Commitments that provide value to customers and the District of Columbia. For customers of Pepco, these other benefits (as shown on Table SFT-1) include[4]: the expectation that retail customers will receive the benefit of synergy savings at the next time that rates are reset (assuming that a test year is within the first five years after the Merger is consummated); the benefits associated with the Applicants'

[2] The estimates of economic impacts on the District reflect different scenarios and assumptions regarding potential uses of the Customer Investment Fund in the District of Columbia, including for (a) a one-time credit of $52.95 on each customer's electricity bill; (b) use of the funds for low-income customer bill assistance; and (c) energy efficiency programs. See further explanation in my testimony below.

[3] As described later in my testimony, overall economic value to the District is presented as economic "value added" in the macroeconomic model I use to calculate these benefits. This "value added" is separate from the direct value of the commitments that Pepco customers would receive.

[4] These other Merger commitments are described in detail in the testimony of Mr. Khouzami.

submitting to the jurisdiction of the Commission, their proposed "ring-fencing" provisions, the Applicants' commitment to retain low-income assistance programs, and the Applicants' commitment to not seek recovery of merger-related costs or any debt directly related to the Merger. For the District of Columbia, these other unquantified but nonetheless real benefits include Exelon's commitment to maintain Pepco's contributions to community and charitable organizations (which amounted to approximately $1.6 million in 2013); to maintain a "local presence" in the District of Columbia; to maintain existing supplier diversity programs; to honor all existing collective bargaining agreement and other labor-related actions during at least the first two years following consummation of the Merger. These various Regulatory Commitments provide real benefits to the communities in which Pepco conducts its utility service, but I have not quantified their monetary value here in my analysis.

9. Q. In reaching these conclusions and in your testimony more generally, did you focus on all aspects of the Merger?

A. No. I focused on the two elements of the package of Regulatory Commitments to the District of Columbia that the Applicants are making as part of their proposed Merger and that provide tangible, quantifiable benefits to Pepco customers. These Regulatory Commitments include those investments, expenditures, and other activities devoted to Pepco customers and the District of Columbia and pledged by Exelon and PHI as part of the Merger package. The Application provides substantial information on these commitments which has allowed me to provide quantitative estimates and qualitative assessments of the Merger's overall benefits in the District of Columbia.

10. Q. How is your testimony organized?

A. After this introductory section, I describe my analysis in Section II and provide a detailed discussion of my analytic framework, my analysis of benefits to Pepco customers, and my assessment of economic and policy benefits to the District of Columbia. In Section III, I briefly summarize my conclusions about the benefits to Pepco customers and to the District of Columbia.

11. Q. Before describing your analysis, please comment on whether there are aspects of the District of Columbia's electric reliability and economic-development policy goals that you found to be important as you reviewed the economic benefits of the proposed Merger.

A. I noted the attention of public officials and regulators on ensuring gradual improvement in Pepco's reliability performance for the benefit of customers. For example, I am aware that the Commission adopted new quality of service standards in 2011.[5] Also, I understand that after the 2012 Derecho and other extreme weather events, the Commission reviewed Pepco's planning and preparation prior to the storms,[6] and that the Power Line Undergrounding Task

5 "District Regulators Tighten Reliability Standards for Pepco," Public Service Commission of the District of Columbia, Press Release, July 8, 2011, available at: http://205.177.170.130/pdf_files/pressreleases/DRTRS_for_Pepco.pdf.

6 "District Regulators Require Answers about Pepco's Performance," Public Service Commission of the District of Columbia, Press Release, July 5, 2012, available at: http://205.177.170.130/pdf_files/pressreleases/PR_PSC_Pepco_Performance.pdf.

Force further investigated reliability issues in the District of Columbia.[7] Additionally, I am aware of the 2014 legislation authorizing revenue bonds to help support undergrounding of parts of the Pepco distribution system. [8]

I note further that Pepco has already made significant progress to accomplish reliability improvements, as reflected in its recent reliability metrics.[9] I also recognized that the Commission has sought to balance the level and speed of reliability improvements with customer rate impacts. I conducted my assessment of the Merger with these electric-reliability and ratemaking goals in mind, and noted that the Merger builds upon the sound policy guidance expressed by the Commission while strengthening the Company's ability to reach the targeted improvements through the institutional and financial commitments accompanying the Merger.

[7] "This summer's [2012] severe weather events resulted in multi-day power outages. Mayor Gray has voiced his strong concern about the repeated outages and said the District needed a 'game changer' to prevent the hardship caused by such power failures in the future. To that end, he has appointed top administrators, financial officials, utility industry leaders and residents of heavily impacted areas to study the feasibility of burying power lines underground, potential associated costs, and other alternatives for short-term solutions." Source: "Mayor Vincent C. Gray to Hold First Meeting of the Power Line Undergrounding Task Force," Executive Office of the Mayor, Press Release, August 22, 2012, available at: http://205.177.170.130/pdf_files/pressreleases/Undergrounding_Task_Force_Meeting_Advisory.pdf.

[8] Please note that one of the commitments in the preliminary Merger Agreements was that Pepco would continue to implement the undergrounding project as planned.

[9] I have reviewed the testimony of Mr. Alden and Mr. William Gausman (PHI's Senior Vice President for Strategic Initiatives).

II. ANALYSIS OF THE ECONOMIC BENEFITS OF THE PROPOSED MERGER'S REGULATORY COMMITMENTS

A. Overview

12. Q. Please provide an overview of your analysis of the benefits of the proposed Merger.

A. As stated previously, I focused my review and assessment on the Applicants' Regulatory Commitments in the District of Columbia. I performed two types of quantitative analyses: one focused specifically on the measurable and direct benefits that will flow to the District of Columbia *customers* of Pepco as a result of two elements of the Regulatory Commitments (i.e., the Customer Investment Fund and the Enhanced Reliability Commitments); in the other, I calculated economic impacts of these two regulatory commitments on the *overall economy of the District of Columbia* in which Pepco provides utility service. As part of the latter analysis, I utilized IMPLAN, a commonly used proprietary modeling tool, to quantify these effects.[10] Specifically, I estimated the direct, indirect and induced impacts of the relevant Regulatory Commitments on employment, income, and the creation of net economic value ("value added") in the District of Columbia.

In addition, I have noted other elements of the Regulatory Commitments that provide intangible but still important benefits to the customers of Pepco and to the District of Columbia as a result of an approved Merger.

13. Q. Please describe IMPLAN in general terms.

[10] IMPLAN (the "IMpact analysis for PLANning") model, available at http://implan.com.

A. The IMPLAN model is a social accounting/input-output model that attempts to replicate the structure and functioning of a specific economy. The model allows one to investigate various interactions in a defined economy (in this case, the District of Columbia) and to calculate various economic impacts in that economy when a new activity introduces a change in the conditions in the economy. A typical change could be an investment in a new facility being built in the District, or a new government program to support an economic development strategy. IMPLAN is widely used by government agencies, companies, academics, and others to evaluate the economic impacts of such different activities. JOINT APPLICANTS (G)-2 provides a sampling of applications of IMPLAN in analyses conducted for agencies of the District of Columbia.

In this particular instance, the changes in economic activity that are occurring as part of the Applicants' Regulatory Commitments are: (a) the monetary payment associated with the new "Customer Investment Fund," supplied by shareholders of one utility (e.g., Exelon) as part of its acquisition of another utility (e.g., PHI) and to be used for the benefit of customers of the acquired utility; and (b) the economic value that customers will experience associated with their being exposed to fewer and shorter electric service outages (i.e., the Enhanced Reliability Commitments).

IMPLAN relies on a detailed system of accounting for relationships among different parts of an economy, and employs state-specific national economic data for the relevant region. The model provides estimates of impacts such as new income and employment, "value added" effects (the net economic value to the economy after taking into account the input costs), and the impacts on state and local taxes.

While the model is focused on economic activity inside an economy, the model tracks the movement of money and people into and out of that economy. For example, IMPLAN tracks the effects of money injected into an economy (e.g., the provision of funding for the new Customer Investment Fund in the District of Columbia) from an outside source, with various economic interactions and dollars flowing from that new activity. At the same time, activities that occur outside of the economy (such as the local utility's purchases of new electric distribution equipment or very-efficient lighting devices manufactured or produced outside of the District of Columbia) show up in the model's accounts in the form of money or people exiting the economy. The model thus examines inflows, outflows, and interactions within the economy under study.

In JOINT APPLICANTS (G)-3, I have provided more information on the IMPLAN model and certain definitions of terms it uses.

14. Q. What are the key concepts and IMPLAN terms that you use in your analysis?

A. As described in more technical terms in JOINT APPLICANTS (G)-3, I track several core impacts of new economic activity associated with the two elements of the Regulatory Commitments that I have quantified (the Customer Investment Fund and the value of Enhanced Reliability Commitments to customers):

- *Employment effects* (the total number of jobs created); and
- *"Value-added" effects* (the total economic value added to the economy, which reflects the gross economic output of the area less the cost of the inputs).

There are various ways in which the new activity creates impacts, each of which is separately tracked by the model:

- *Direct effects* (the initial set of inputs that are being introduced into the economy, such as dollars associated with the Customer Investment Fund, or the value (or avoided costs) to customers of experiencing shorter and/or fewer electric outages as a result of Enhanced Reliability Commitments to improve electric distribution system reliability);
- *Indirect effects* (the new demand for local goods, services and jobs as a result of the new activity, such as use of the Customer Investment Fund to purchase goods and services related to energy efficiency, or the indirect effects of having shorter/fewer outages); and
- *Induced effects* (the increased spending of workers resulting from income earned from direct and indirect economic activity, or customers' purchases as a result of having received a credit on their utility bill).

Finally, I also track the District of Columbia taxes that flow from these direct, indirect and induced effects.

15. Q. When you used IMPLAN to model the economic impacts of the Applicants' Regulatory Commitments in the District of Columbia, how did you frame your analysis?

A. I made appropriately different assumptions for modeling the economic impacts of the two types of Regulatory Commitments I analyzed quantitatively.

16. Q. Please explain your core assumptions about modeling the economic impacts of the Customer Investment Fund.

A. I assumed that the Customer Investment Fund would operate as a one-time infusion of dollars in 2015 leading to some potential economic activity as directed by the Commission. The direct infusion of money flowing into the District of Columbia's economy amounts to $14 million, provided by Exelon for the benefit of Pepco customers through the Customer Investment Fund. Depending upon the Commission's decisions about how to use that fund, the combined direct, indirect and induced impacts of that initial investment amount could vary, and my analysis (described further below) provides illustrations of the types of macroeconomic effects that could occur through different uses of the fund.

17. Q. Regarding the economic impacts of the Enhanced Reliability Commitments, how did you frame your analysis through IMPLAN?

A. Based on the expectation that the Enhanced Reliability Commitments will cause customers to experience fewer outages and service disruptions of shorter length, and that the fact that the Enhanced Reliability Commitments will enable avoidance of cost impacts (i.e., out-of-pocket costs and/or lost opportunity costs) or other damages associated with outages, I then used estimates of those avoided costs as inputs to IMPLAN in order to calculate the economic value to the economy of the District of Columbia that will result from shorter/less-frequent electric distribution-system outages.

I made a number of assumptions about the ways in which the Regulatory Commitments would show up in economic activity in the District of Columbia's economy; I list these core assumptions in JOINT APPLICANTS (G)-4. I provide the results of the basic analyses in the description of my assessment, below.

18. Q. Does IMPLAN provide an estimate of the impacts of the Regulatory Commitments on Pepco customers *per se*?

A. No. The IMPLAN analysis focuses on the effects on the District of Columbia economy at large, and does not track how those would specifically affect the customers of Pepco. That is why I chose to specifically discuss those singular impacts on Pepco customers as a separate piece of analysis and in a separate portion of my testimony, below.

B. Assessment of the Tangible and Intangible Impacts of the Regulatory Commitments on Pepco Customers

19. Q. Please describe the ways that the customers of Pepco will be directly affected by the proposed Merger.

A. Several aspects of the proposed Merger will result in direct, tangible, and measurable benefits to Pepco customers. Together, these amount to approximately $89.9 million in direct benefits that will flow to Pepco customers if the Merger is approved and consummated. This estimate is based on the combined monetary benefits to customers from the Customer Investment Fund and the Enhanced Reliability Benefits.

20. Q. Which Regulatory Commitment provides the highest monetary value to Pepco customers?

A. Although the Applicants' upfront cash contribution to the Customer Investment Fund is a highly concrete and visible commitment being offered for the benefit of Pepco's customers, the Enhanced Reliability Commitments ends up providing more value to customers than the Customer Investment Fund. The value associated with these two types of commitments may affect how the Commission weighs options for use of the money in the Customer Investment Fund. Although the decision as to how to direct the Customer Investment Fund will be up to the Commission, my analysis could provide some early insights into the trade-offs of how to spend the money to allow different customer segments to share in the value of the Merger benefits. My discussion below highlights some of the relevant issues.

21. Q. Please describe the value of the Customer Investment Fund to Pepco customers.

A. The Regulatory Commitment with the most direct benefit and obvious monetary value to Pepco customers is the one-time contribution by Exelon of $14 million to the Customer Investment Fund, which equates to $52.95 for every customer buying utility service from Pepco.

For context, this particular Regulatory Commitment equates to roughly 2.7 weeks of "free" bundled electricity service (or 1.7 months of free electric delivery service) for a typical residential electric customer.[11] Alternatively, it reflects approximately 102 percent of the District of Columbia Sustainable Energy Utility's spending on customer-funded energy efficiency programs in 2013.[12]

22. Q. How does the size of this customer contribution compare to other recent mergers?

A. Based on my review of other recent utility mergers and acquisitions, the $52.95/customer contribution is larger than in most other corporate consolidations approved by utility regulators. Among all mergers or acquisitions of investor-owned electric and electric/gas utilities since 2010, the per-customer amounts range from $11/customer to $100/customer, with all but one falling below $30/customer, as summarized in Table SFT-2, below.

[11] This assumes that average bills for a residential Pepco electric customer are as follows: delivery service at $374 per year, or $31 per month; and bundled electric service at $1,022 per year, or $85 per month. These estimated rates are based on 2012 data, and assume no change in base rates (for distribution charges) and known supply rates for standard offer service customers. Source: the Applicants and Energy Information Administration ("EIA") Form-861 2012 data. The $52.95 on-bill credit to each residential customer could also be seen as approximately 14 percent of the typical residential electric customer's annual delivery charges, or five percent of his/her typical total annual electric bill.

[12] 2013 energy efficiency totals come from the District of Columbia Sustainable Energy Utility's 2013 Annual Report.

TABLE SFT-2
Monetary Commitments of the Acquiring Utility to the Direct Benefit of Customers of the Acquired Utility: Recent Mergers/Acquisitions of Investor-Owned Electric and Electric/Gas Utilities Since 2011

Acquirer	Target Acquisition	State	Year	Pledge	Total Amount (million $)	# of Customers Receiving Credit	Average Amount per Customer	Sources
FirstEnergy	Allegheny (Potomac Edison)	MD	2011	$/Customer and Total $	$6.5 million	~224,138 (residential)	$29.00	[1], [2]
	Allegheny (Potomac Edison, Monongahela Power Co.)	WV	2011	Total $	$7.5 million (over 2 years)	522,864 (all classes)	$14.34	[3], [4]
	Allegheny (West Penn Power Co.)	PA	2011	Total $	$10.8 million (over 3 years)	620,151 (residential)	$17.42	[4], [5]
Northeast Utilities (NU, Western Massachusetts Electric Co, Connecticut Light & Power)	NSTAR	CT	2012	Total $	$25 million	1,215,257 (all classes)	$20.57	[6], [7]
	NSTAR (NSTAR Electric)	MA	2012	Total $	$15 million	1,172,997 (all classes)	$12.79	[6], [8], [9]
	NSTAR (NSTAR Gas)	MA	2012	Total $	$3 million	~272,000 (all classes)	$11.03	[7], [8], [9], [10]
	NSTAR (Western Massachusetts Electric Co.)	MA	2012	Total $	$3 million	211,185 (all classes)	$14.21	[6], [8], [9]
MidAmerican	NV Energy (Nevada Power Company; Sierra Pacific Power Company)	NV	2013	Total $	$20 million	1,300,000 (all classes)	$15.38	[6], [11], [12]
Exelon	Constellation (BGE)	MD	2012	$/Customer and Total $	$112 million	~1,120,000 (residential)	$100.00	[13], [14]

Notes:

[1] Unless otherwise specified, rate credits are assumed to be spread across all rate classes.

[14] "In the Matter of the Merger of Exelon Corporation and Constellation Energy Group, Inc., - Supplemental Testimony of Susan F. Tierney, Ph.D. In Support of the Joint Petition for Approval of Settlement," Before the PSC of Maryland, Case No. 9271, December 15, 2011.

All mergers and acquisitions are different and provide different opportunities for contributing value to customers at the outset of the transaction versus over time (as synergy opportunities end up affecting the utility's cost of service and customer rates). Exelon's proposed contribution to a Customer Investment Fund based on $52.95/customer represents an amount above the range of all but one recent merger and acquisition approved by state regulators (i.e., the Exelon/Constellation Merger).

23. Q. Do you know whether each customer will actually receive exactly $52.95 as contributed by the Applicants?

A. No. The Applicants have offered this Regulatory Commitment in a form that anticipates the Commission determining the appropriate use of the Customer Investment Fund. The Commission might choose to disburse the Customer Investment Fund to customers in the form of a one-time customer credit on each customer's electric bill. Or, the Commission might decide to use the funds to support incremental energy efficiency investments, which might not only fund efficiency measures on customer premises but also lead, over time, to lower demand in the relevant wholesale markets with resulting effects on lowering energy prices paid by customers over many years. Or, the Commission might allocate some portion to low-income customer assistance, or to targeted reliability improvements, and/or any other public-interest benefit deemed to be valuable to customers of Pepco. These diverse examples underscore that different uses of the funds will likely lead to different types of impacts for different types of customers.

As I explain further below, the Commission might decide to distribute this benefit on an equal basis to all customers (e.g., through a $52.95/customer credit on each customer's bill), or disproportionally in favor of those customers who receive fewer of the other types of benefits likely to flow from the Merger (e.g., to residential customers and/or low-income residential customers, for whom the economic value of other Regulatory Commitments, such as the Enhanced Reliability Commitments, may be lower than it is to commercial and industrial customers), or exclusively through investments that will lead to longer-term additional benefits over time (e.g., through use of the money for energy efficiency programs that end up lowering costs to all customers over time). But from a system-wide point of view, the $52.95/customer contribution to the Customer Investment Fund is a direct and traceable financial benefit of the proposed Merger for District of Columbia customers, totaling $14 million.

24. Q. Have you quantified any other Regulatory Commitment in terms of benefits provided to customers of Pepco in the District of Columbia?

A. Yes. I have quantified the value to customers associated with the Applicants' strengthened commitments to achieve improvements in the local distribution-system reliability that accrue to the benefit of customers (i.e., the Enhanced Reliability Commitments).

25. Q. Please describe the Enhanced Reliability Commitments and how you have estimated the economic value of this benefit to customers.

A. Based on the direct testimonies of Mr. Mark Alden (Exelon's Vice President for Utilities Oversight) and Mr. William Gausman (PHI's Senior Vice President for Strategic Initiatives), I understand that Exelon has committed to further strengthening Pepco's recently demonstrated progress to improving reliability in two ways: first, by committing to performance outcomes by 2020 that will result in less frequent outages of utility service to customers; and second, by committing to putting shareholders' money on the line (i.e., in the form of financial penalties) in the event that the utility does not meet those guaranteed performance outcomes by 2020, as measured by a set of quantifiable metrics reflecting actual performance in a three-year period (2018-2020).

26. Q. Please define the foregoing reliability metrics.

A. There are several metrics that are commonly used in the electric industry to measure how often and how long customers undergo outages of electricity service. The more common metrics are "SAIFI," "SAIDI," and "CAIDI". "SAIFI" stands for "system average interruption frequency index," and reflects the average number of sustained service interruptions per customer during a time period. "SAIDI" stands for "system average interruption duration index," and reflects the length of time that customers are without service. "CAIDI" stands for the "customer average interruption duration index," and reflects the average duration of interruptions experienced by a customer during a time period.

SAIFI is typically calculated through the following formula:

SAIFI = total number of customer interruptions divided by the total number of customers served.

SAIDI, in turn, is typically calculated according to the following formula:

SAIDI = sum of all customer interruption durations divided by the total number of customers served.

CAIDI is typically calculated according to the following formula:

CAIDI = the sum of the duration of all customer interruptions divided by the total number of customer interruptions (or, SAIDI divided by SAIFI).

Thus, SAIFI indicates how often a customer has a service interruption, SAIDI expresses how long all customers go without power (i.e., the average length of service disruptions faced by customers), and CAIDI represents how long each customer experiences an outage on average.

Utilities commonly use these indices to benchmark reliability, because they provide a reference point for characterizing the frequency and duration of interruptions for a particular company during a reporting period, how that utility compares to other utilities' service, and how a utility's performance changes over time.

27. Q. Are there factors that affect a company's performance with regard to service frequency and service duration outages?

A. Yes. There are many factors that can affect a company's performance on these metrics. For example, the extent to which a system's distribution and transmission system is located underground may affect outages (both their frequency and the length of time to repair equipment in the event of damage). Similarly, the amount of tree coverage and the tree-trimming practices of the utility could affect performance. Other factors can include weather events, age of facilities, utility metering and data-management systems used to collect information on and address outage conditions, and utility practices for system restoration. In recent years, for example, extreme weather events have wreaked havoc on energy and other critical infrastructure in the District of Columbia, and have disrupted electric service to homes, businesses and other critical systems.

28. Q. Are you aware of any studies that estimate the economic costs of unreliable electric service to customers?

A. Yes. One early study (2004) conducted by the LBNL estimated the national cost of power interruptions at $80 billion annually, with a likely range of $30 billion to $130 billion after a sensitivity analysis.[13] More recently, a 2013 study issued by the Executive Office of the President estimated the average cost to the U.S. economy of power outages caused only by severe weather at between $18 billion to $33 billion annually for the years 2003 to 2012.[14] The report notes that annual costs can fluctuate significantly and are greatest in the years of major

[14] "Economic Benefits of Increasing Electric Grid Resilience to Weather Outages," Executive Office of the President, August 2013, available at http://energy.gov/sites/prod/files/2013/08/f2/Grid%20Resiliency%20Report_FINAL.pdf.

storms such as Hurricane Ike in 2008, a year in which cost estimates range from $40 billion to $75 billion, and Superstorm Sandy in 2012, a year in which cost estimates range from $27 billion to $52 billion. A 2012 Congressional Research Service study estimates the inflation-adjusted cost of weather-related outages at $20 to $55 billion annually.[15] Additionally, as co-lead convening author of the recent National Climate Assessment's chapter on "Energy Supply and Use," I am aware of the literature on the impacts of extreme weather events and other climate-related conditions and trends on energy infrastructure (such as electric transmission and distribution systems) and of related impacts on customers of critical services (like electricity) that depend upon that infrastructure.[16]

29. Q. What is your understanding of Exelon's commitments to improving service-quality performance of Pepco?

A. I understand that Exelon proposes to use the following metrics to enable the Commission to measure Pepco's reliability outcomes by 2020, as summarized in Table SFT-3:

[15] Richard J. Campbell, "Weather-Related Power Outages and Electric System Resiliency," Congressional Research Service, August 28, 2012. http://www.fas.org/sgp/crs/misc/R42696.pdf.

Table SFT-3
Applicants' Enhanced Reliability Commitments for Pepco

	Historical Performance (3-Year Average: 2011-2013)	Average Performance Commitment from the Merger by 2020 (Based on 3-Year Average: 2018-2020)	Change in Performance
SAIFI	1.03	0.54	48%
SAIDI	149	107	28%
Source: Testimony of Mr. Mark Alden.			

I understand that these Enhanced Reliability Commitments result in part from the Applicants' plan to share best practices across all of the distribution utilities that will be part of the merged entity's holding company, with opportunities for improvements for Pepco operations and for customer service.[17]

30. Q. In light of Pepco's expected requirements, why do you think that the Merger will provide benefits to customers in terms of reliability of service?

A. This Merger commitment will provide value to customers by avoiding outages of electricity service which otherwise have well-known and adverse impacts on customers' household activities, their business operations, and other aspects of their day-to-day lives. The value to customers of shorter and fewer outages is that they will experience lower economic and other negative impacts from outages.

31. Q. How have you translated this Enhanced Reliability Commitments into a specific benefit to customers?

---

[17] For example, in his testimony, Mr. Alden describes Exelon's Management Model (a management system designed to identify and generate best practices for operational excellence at each of its utilities and to share and implement those practices system-wide), including such things as standardized "Lock Out" and "Tag Out" ("LOTO") practices to restore service during emergency response events.

A. I have interpreted Exelon's new Regulatory Commitment to absorb a financial penalty for non-performance on guaranteed reliability metrics as a strengthening of Pepco's prior commitment to improve electric system reliability for customers. In addition, Exelon has committed to reliability improvements by the end of 2020 that go beyond those commitments now in place for Pepco. My understanding is based substantially on other witnesses testifying on behalf of the Applicants, including Mr. Alden and Mr. Gausman.

32. Q. What is the basis for your view that such reliability improvements will provide economic benefits to Pepco's customers?

Much has been written about the value of reliability to customers in recent years.[18] Studies have examined the types of costs incurred by electricity customers during outages, which include out-of-pocket costs associated with business disruptions (e.g., damage to equipment), opportunity costs resulting from inability to access electric service (e.g., inability to provide restaurant services that cannot be made up when electricity service is resumed on another day), lost perishables (e.g., food lost due to loss of refrigeration), diminished capability to provide critical services (e.g., street lighting, telecommunications, pumping of gasoline), public health impacts (e.g., due to loss of heating or cooling during extreme weather periods), adverse impacts on quality of life (e.g., due to loss of

[18] Michael J. Sullivan, Ph.D., Matthew Mercurio, Ph.D., Josh Schellenberg, M.A Freeman, Sullivan & Co, "Estimated Value of Service Reliability for Electric Utility Customers in the United States," Prepared for Office of Electricity Delivery and Energy Reliability, U.S. Department of Energy, by the Energy Analysis Department (Environmental Energy Technologies Division), Ernest Orlando Lawrence Berkeley National Laboratory, June 2009, http://certs.lbl.gov/pdf/lbnl-2132e.pdf; Michael J. Sullivan, Matthew G. Mercurio, Josh A. Schellenberg, and Joseph H. Eto, LBNL, "How to Estimate the Value of Service Reliability Improvements," 2010, http://certs.lbl.gov/pdf/lbnl-3529e.pdf.

electricity for cooking, lighting, electronic equipment at homes), and many other impacts. These impacts vary by type of customer; time of day, day of the week, and season of the year during which an outage occurs; length and frequency of outages; extent to which there are substitutes for electricity service; the extent to which an economy depends upon electricity (i.e., its electricity intensity); and other factors. Economic studies have examined these various impacts and quantified the cost of outages and the related value of reliable service. These studies consistently indicate that the value that customers place on reliable electricity service exceeds the cost of paying for electricity service.

33. Q. How have you quantified the value to customers of such reliability improvements?

A. I have based my assessment on an economic analysis of the 'value of reliability.' which is customers' avoided economic loss(es) associated with outages. The value of reliability shows up in customers experiencing lower costs and other lower adverse impacts as a result of having fewer and shorter interruptions of electricity service.

More specifically, I have quantified the value to customers as a whole by using a publicly available, on-line calculator (the "Interruption Cost Estimator" ("ICE Calculator")[19]) provided by the U.S. Department of Energy ("DOE") and based on research and analysis from the DOE's national laboratory, LBNL.[20]

[19] "The Interruption Cost Estimate (ICE) Calculator is an electric reliability planning tool developed by Freeman, Sullivan & Co. and LBNL. This tool is designed for electric reliability planners at utilities, government organizations or other entities that are interested in estimating interruption costs and/or the

Using information about the value of reliability and the costs of outages to customers, I proceeded as follows to estimate the value of Enhanced Reliability Commitments (and associated reliability improvements) to customers. First, I entered the three-year average historical values (2011-2013) from Table SFT-3 into the ICE Calculator to populate the "without reliability improvements" scenario in the model.[21] Second, to determine the inputs for the "with reliability improvements" scenario, I entered an annual value for each year between 2015 and 2020 by calculating a linear trend between the historical values and the 2018-2020 average commitment values from Table SFT-3. I also entered the number of residential and non-residential customers, and otherwise accepted the District-specific default values that the ICE Calculator contains.

The resulting output from the ICE Calculator provides two important results that I used in my quantification of benefits: the annual benefits resulting from the reliability improvements for each year between 2015 and 2020, and the portion of benefits attributable to residential versus non-residential (i.e., commercial and industrial) customers. I then calculated the net present value of

---

benefits associated with reliability improvements in the United States. The ICE Calculator was funded by the Office of Electricity Delivery and Energy Reliability at the U.S. Department of Energy." http://www.icecalculator.com/ice/

[20] As indicated in a prior footnote, LBNL has conducted much of the research to compile information about value of reliability service to retail electricity customers.

[21] The ICE Calculator includes three settings: 1) calculating the cost of an interruption event, 2) estimating the value of a reliability improvement in a static setting (where reliability does not improve over time), and 3) estimating the value of a reliability improvement in a dynamic setting based on forecasts of SAIDI, SAIFI, and CAIDI. I used the setting that allows for calculating benefits in a dynamic environment.

these reliability benefits over the period from 2015 through 2020 using a social discount rate.[22]

34. Q. What are the results of your assessment of the direct value of the Enhanced Reliability Commitments to Pepco's customers?

A. The results, shown in Table SFT-4, reflect the different economic impacts on residential customers as well as commercial and industrial customers, who often experience direct business losses and opportunity costs in addition to the inconvenience of service disruptions. As indicated, these customer benefits are substantial.

Table SFT-4
Total Dollar Benefit:
Pepco Customers (DC)

	All Company Customers	Average Benefit per Customer
Residential	$2,276,047	$9.56
Commercial and Industrial	$73,592,171	$2,786

Note: Amounts are shown as Net Present Value ("NPV") of Benefits (2014$), 2015-2020.

35. Q. What is your estimate of the total value to customers of the Applicants' two Regulatory Commitments (i.e., the Customer Investment Fund and the Enhanced Reliability Commitments)?

---

22 The discount rate is the tool that accounts for the time value of money – the concept that a dollar today is typically worth more than the same amount of money in the future because of the opportunity cost of money to various private and public entities in society. I used a social discount rate (i.e., 3 percent) in my analysis because it reflects dollars in the hands of producers, who are largely private enterprises, and consumers, made up of households, businesses, government energy users, and others. See, e.g., U.S. Environmental Protection Agency (National Center for Environmental Economics, Office of Policy), "Guidelines for Preparing Economic Analyses," EPA 240-R-10-001, December 2010, pages 6-7 to 6-8 ("As of the date of this publication, current estimates of the consumption rate of interest, based on recent returns to Government-backed securities, are close to 3%.").

A. Based on $14 million in the Applicants' payments to the Customer Investment Fund and the $75.9 million in value associated with the Enhanced Reliability Commitments, I conservatively calculate that the Merger will provide $89.9 million in direct and traceable financial benefits to customers. These benefits are summarized in Table SFT-1.

36. Q. Are there other benefits that Pepco customers will receive, on top of the $89.9 million you describe above?

A. Yes. There are other, less-easily-measurable but still-important benefits that will flow to Pepco's customers if the Merger is consummated.

First, Pepco's customers will receive the benefit of the Merger's synergy savings to Pepco.[23] In future rate cases based on test years after the Merger is consummated, Pepco's cost of service will be lower than it would otherwise have been in the absence of the Merger. This is the effect of the incremental synergy savings from the Merger (net of costs to achieve those savings) that arise over time. In fact, the company's customers will receive the benefits of synergy savings twice: once in the form of the immediate share of the Customer Investment Fund (equivalent to approximately $52.95 per-distribution-customer credit in 2015); and then again when rates are reset in the future (assuming that such relies on a test year covering at least part of the first five years after the Merger is consummated).

[23] Mr. Khouzami describes such merger synergies in his direct testimony.

Second, the Applicants have committed to retain and promote current assistance provided to low-income customers.

Third, the Applicants have made commitments to the District of Columbia with respect to regulatory supervision and corporate governance, all of which will provide protections to customers of Pepco. As described by Mr. Khouzami, these protections include not only the commitment to submit to the jurisdiction of the Commission on matters related to the Merger and the enforcement of commitments and on matters related to affiliate transactions, but also the commitment to 'ring-fence' the distribution company Pepco to separate it from the business and financial risks associated with the Applicants' unregulated business activities. These latter commitments support the financial integrity of Pepco and the role of the Commission in supervising it.

Finally, the Applicants have committed to not seek recovery of any acquisition premium or transaction costs in rates, and to not incur or assume any debt, including the provision of guarantees or collateral support, directly related to the Merger.

Together, these regulatory, organizational and financial commitments will support and further enhance the performance of Pepco's utility business units in meeting their public service obligations. In sum, the Applicants are putting in place a number of safeguards that appropriately address and mitigate both perceived and potential risks from the Merger – all of which will accrue to the benefits of Pepco's customers.

C. Assessment of the Economic Impacts of the Regulatory Commitments to the District of Columbia

37. Q. In addition to those measurable direct benefits and less measurable benefits to Pepco customers in the District of Columbia, are there other measurable economic benefits of the proposed Merger to the District of Columbia's economy and local community?

A. Yes. I examined these other measurable economic benefits through my IMPLAN analysis, to which I referred above.

38. Q. Before you describe the specific economic impacts of the different pieces of the Merger package, please summarize your assessment.

A. The Regulatory Commitments will result in substantial economic benefits for the District of Columbia's economy. These various benefits derive from the infusion of dollars and economic value into the local economy.

The *direct* benefits derive from two things: the Customer Investment Fund and the Enhanced Reliability Commitments affecting Pepco's distribution system. Both of these two Regulatory Commitments provide direct value to customers, but both also have larger impacts on the District's economy.

For example, as I described previously, the Customer Investment Fund will have different impacts on the local economy, depending upon how the Commission decides to deploy the dollars in the Customer Investment Fund. Without knowing how the Commission will choose to use that fund for the benefit of customers of Pepco, and without meaning to suggest that one particular use of the fund is preferable to others, I have modeled the impacts under three different sets of assumptions about potential use of the Customer Investment Fund's monies:

- In one scenario, I assumed that the Customer Investment Fund would be fully deployed in the form of a $52.95 credit on each distribution customer's bill, including residential and commercial and industrial customers. In this analysis, the money in the fund would go into the pockets of households, businesses and other organizations, as if it were new after-tax income to each of them.

- In another analysis, I assumed instead the money in the fund would be used to pay for energy efficiency measures. Spending the money this way would lead to the direct expenditure of the funds to hire contractors to install energy efficiency measures and to purchase more energy-efficient electricity-using equipment, and to lower electricity usage in general, resulting in savings on customers' electricity bills. My analysis assumed that such expenditures on energy efficiency would lower customers' purchases of electricity, but I only counted the avoided cost of commodity supply but not the distribution portion of customers' bills.[24] Thus, from a larger economic point of view, the use of the Customer Investment Fund for energy efficiency leads to expenditures on goods and services in the

[24] I made this assumption because of ratemaking policies which end up – over time – resetting distribution rates to ensure recovery of fixed costs of distribution service from all customers. In light of different investment recovery assumptions for commodity supply, I did not assume that lost revenues from lower sales resulting from energy efficiency would be made up by suppliers over time.

local economy, as well as to new after-tax income to consumers in the form of lower electricity bills.[25]

- I also explored the implications of using the Customer Investment Fund to provide direct credits on the electricity bills of low-income residential electricity customers alone. This impact shows up in the form of new after-tax income to such customers.

In each instance where I quantified benefits for customers in the form of direct impacts, there are also indirect and "induced" effects of the Customer Investment Fund and the Enhanced Reliability Commitments.

Indirect impacts flow from purchases of goods and services associated with the direct activity. An example might be the use of the Customer Investment Fund to invest in energy efficiency measures, with the direct impact being the original $14 million contribution from the Applicants, and the indirect impact being the purchase of more energy efficient appliances or equipment. Regarding

---

[25] My analysis is conservative in that it does not track the impact of any avoided distribution or 'wires' charges, nor does it project the impact of energy efficiency on wholesale electricity prices (i.e., reflecting any reduction in such prices because demand is lower than it otherwise would be). I presumed that because of ratemaking for utility distribution service, loss of revenues from energy efficiency measures' impact on total sales would be addressed in subsequent rate case or revenue decoupling mechanisms. With respect to estimating the value to Pepco's customers and the economy associated with lower wholesale energy prices from investments in energy efficiency, I did not calculate the value of this indirect impact through the IMPLAN tool, in part because quantifying this impact involves more complicated modeling that would be required to simulate the specific dispatch of the PJM electric energy market with a lower demand curve and the consequent impact on lowering locational marginal clearing prices in wholesale markets. That said, my knowledge of and participation in prior studies leads me to conclude that the benefits of the Merger for customers that I did quantify are conservative because such impacts on wholesale electric energy clearing prices are not quantified in my analysis submitted here. See, for example, Paul J. Hibbard, and Susan F. Tierney, "Carbon Control and the Economy: Economic Impacts of RGGI's First Three Years." Electricity Journal, December 2011; and Paul J. Hibbard, Susan F. Tierney, Andrea M. Okie, Pavel G. Darling, "The Economic Impacts of the Regional Greenhouse Gas Initiative on Ten Northeast and Mid-Atlantic States: Review of the Use of RGGI Auction Proceeds from the First Three-Year Compliance Period, November 15, 2011.

the value of fewer or shorter outages, customers receive the direct value of avoided outages, and the indirect impacts reflect economic transactions between those residential and business customers that experience fewer/shorter outages and other businesses and economic actors with whom the customers can interact in the absence of the outage.

For both the Customer Investment Fund and the Enhanced Reliability Commitments, there are also "induced" effects associated with the direct and indirect economic impacts. These induced impacts result from the increased spending of workers who either get new income from the direct activity (e.g., the $52.95 in each household's or business' pocket) or are employed in the activities funded by the initial projects (e.g., the workers hired to install energy efficiency or reliability improvements on the distribution system). Together, these effects add new economic value to the local economy and generate tax revenues to governments in the District of Columbia.

39. Q. What are the results of your assessment?

A. Using IMPLAN and the core assumptions I previously described (and summarized in JOINT APPLICANTS (G)-4), I estimate that the Merger will result in: (a) 907 – 1,281 new jobs; (b) $95.4 million – $133.6 million in added value to the District of Columbia economy; and (c) incremental tax benefits (revenues) to the District of Columbia and local communities totaling $3.6 million

– $5.5 million dollars.[26] These results are summarized in Table SFT-5 (and in more detail in JOINT APPLICANTS (G)-5).

Table SFT-5
Economic Benefits Resulting from the Merger:
Applicants' Customer Investment Fund and Enhanced Reliability Commitments for Pepco in the District of Columbia:
Net Present Value (2014 $)

	Customer Investment Fund			Enhanced Reliability Commitments	Total Economic Benefits
	Assuming a $52.95 per Customer Credit on Each Customer's Utility Bill	Assuming the Funds are Spent on Energy Efficiency Measures	Assuming a Credit on Low-Income Residential Customers' Utility Bill		
Jobs	62	436	73	846	907 – 1,281
Value Added (NPV, 2014$)	$19.1 million	$57.3 million	$22.2 million	$76.3 million	$95.4 – $133.6 million
Incremental Tax Revenues (NPV, 2014$)	$0.5 million	$2.4 million	$0.6 million	$3.2 million	$3.6 – $5.5 million

As indicated, I have estimated economic impacts based on various scenarios reflecting different ways the Commission might decide to spend the money in the Customer Investment Fund, and the quantitative economic impacts vary according to these scenarios. I fully and respectfully recognize that there are intangible unquantified benefits that the Commission may want to take into consideration in determining how to use the Customer Investment Fund, and therefore my assumptions are illustrative and not intended to suggest a

[26] In general, I am rounding the numbers that were produced in my IMPLAN analyses. See JOINT APPLICANTS (G)-4 and (G)-5 for the back-up information for these estimates. District of Columbia taxes include personal income and corporate profit taxes, along with indirect personal and business taxes and dividends. Federal taxes are assumed to exit the District of Columbia economy.

recommendation as to the Commission's decision. I have thus described the results in terms of ranges of economic impacts, with a reasonable representation of the economic value of the Merger for the District of Columbia's economy.

40. Q. Are there any parts of the Regulatory Commitments that you did not include in the IMPLAN results reported above? If so, please explain.

A. Yes. To be conservative, there are several aspects of the Regulatory Commitments that I did not attempt to quantify. Many such commitments are described in the testimonies of Mr. Crane and Mr. Rigby, as well as in the testimony of Mr. Calvin Butler, Chief Executive Officer of Baltimore Gas and Electric Company.

For example, I did not include in my IMPLAN analysis any of the approximately $16.4 million that the Applicants have committed to provide to community and charitable organizations in the District of Columbia over the next 10 years. In 2013, for example, the direct economic value of such charitable contributions was approximately $1.6 million.

Also, I did not quantify the economic impacts associated with the Applicants' commitment to "local presence" – that is, retaining various business operations in places where they now exist before the Merger. The Regulatory Commitments include support for labor and other economic activity through maintaining the headquarters of the Company's system, with appropriate levels of senior management, and Pepco's local operational headquarters in the District of Columbia at Edison Place, as well as the Exelon Board, Committee or Subsidiary

Board meetings or Leadership meetings being held periodically in the District of Columbia.

Additionally, I did not quantify the economic benefits of the Applicants committing to retain existing supplier diversity programs, to honor all existing collective bargaining agreements, and to labor-related actions during at least the first two years following consummation of the Merger. The latter commitment would preclude, for several years, any net reduction (due to involuntary attrition as a result of the Merger integration process) in the employment levels at Pepco and would maintain compensation and benefits for current and former employees at Pepco that are at least as favorable in the aggregate as the compensation and benefits provided to the employees immediately before the Merger Agreement.

These various Regulatory Commitments provide real but unquantified benefits to the communities in which Pepco conducts its utility service.

III. CONCLUSIONS ON ECONOMIC IMPACTS OF THE PROPOSED MERGER

41. Q. Please summarize your overall conclusions.

A. Based on my review of the Application and the Regulatory Commitments in particular, along with my assessment of the economic impacts for Pepco customers and for the larger economy in the District of Columbia, I conclude that the proposed Merger will provide significant tangible and intangible benefits, including direct and traceable financial benefits, to customers of Pepco and to the economy of the District of Columbia.

42. Q. Does this conclude your testimony?

A. Yes.

S.F. Tierney Direct Testimony
DC P.S.C. - - June 18, 2014

Dr. Tierney, a Senior Advisor at Analysis Group, is an expert on energy economics, regulation and policy, particularly in the electric and gas industries. She has consulted to businesses, government, tribes, environmental groups, and other organizations on energy markets, economic and environmental regulation and strategy, and energy projects. Her expert witness and consulting services have involved market analyses, wholesale and retail market design, contract disputes, resource planning and procurements, regional transmission organizations, the siting of electric and gas infrastructure projects, electric system reliability, ratemaking for electric and gas utilities (including cost allocation, rate design, incentive ratemaking mechanisms), clean energy resources, climate change policy, and other environmental policy and regulation. She has participated as an expert in civil litigation cases, regulatory proceedings before state and federal agencies, and business consulting engagements.

Previously, she served as the Assistant Secretary for Policy at the U.S. Department of Energy in the Clinton Administration. She was the Secretary for Environmental Affairs in Massachusetts, Commissioner at the Massachusetts Department of Public Utilities, Chairman of the Board of the Massachusetts Water Resources Authority, and executive director of the Massachusetts Energy Facilities Siting Council.

Dr. Tierney has authored numerous articles and speaks frequently at industry conferences. She serves on a number of boards of directors and advisory committees, including chairing the External Advisory Council of the National Renewable Energy Laboratory (NREL) and the board of ClimateWorks Foundation. She is a director of the World Resources Institute, the Alliance to Save Energy, and the Energy Foundation. She is a member of the Bipartisan Policy Center's Energy Project, the National Petroleum Council (NPC), the China Sustainable Energy Program's Policy Advisory Council, and the Environmental Advisory Council of the New York Independent System Operator (NYISO). She co-chairs the NAESB Gas-Electric Harmonization Committee, the Bipartisan Policy Center's cyber security and the electric grid, is a member of the National Academy of Sciences panel on shale gas risk, and is co-lead author of the energy chapter of the National Climate Assessment. She chaired the Policy Subgroup of the NPC's study of the natural gas and oil resource base in North America, and served on the U.S. Secretary of Energy Advisory Board (and its Shale Gas Subcommittee). Previously, she chaired several non-profit organizations (the National Commission on Energy Policy; the Electricity Innovations Institute; and the Massachusetts Ocean Commission); was formerly a director of several companies (EnerNOC, Inc.; Evergreen Solar, Inc.; Ze-gen, Inc.; Catalytica Energy Systems Inc.), and several non-profit organizations (Clean Air Task Force; Clean Air – Cool Planet; the Electric Power Research Institute); and was a member of the Advisory Council of the New England Independent System Operator (ISO-NE) and the Massachusetts Renewable Energy Trust Advisory Council. She taught at the Department of Urban Studies and Planning at MIT and at the University of California at Irvine, and has lectured at Harvard University, Yale University, New York University, Tufts University, Northwestern University, and University of Michigan. She earned her Ph.D. and M.A. degrees in regional planning at Cornell University and her B.A. at Scripps College.

EDUCATION

1980	Ph.D. in Regional Planning, Public Policy, Cornell University, Ithaca, NY Dissertation: *Congressional policy making on energy policy issues*
1976	M.A. in Regional Planning, Public Policy, Cornell University, Ithaca, NY
1973	B.A. in Art History, Scripps College, Claremont, CA (studied political science at L'Institute d'Etudes Politiques, Paris, France)

PROFESSIONAL EXPERIENCE

2003-present	Analysis Group, Inc., Boston, MA *Senior Advisor (April 2014 – present); Managing Principal (July 2003 – March 2014)*
1999-2003	Lexecon, Inc., Cambridge, MA (formerly The Economics Resource Group, Inc.) *Senior Vice President*
1995-1999	Economics Resource Group, Inc., Cambridge, MA *Principal and Managing Consultant*
1993-1995	U.S. Department of Energy, Washington, DC *Assistant Secretary for Policy*
1991-1993	Commonwealth of Massachusetts, Executive Office of Environmental Affairs, Boston *Secretary of Environmental Affairs*
1988-1991	Commonwealth of Massachusetts, Department of Public Utilities, Boston, MA *Commissioner*
1984-1988	Commonwealth of Massachusetts, Energy Facilities Siting Council, Boston, MA *Executive Director*
1983-1984	Commonwealth of Massachusetts, Executive Office of Energy Resources, Boston, MA *Senior Economist*
1982-1983	Commonwealth of Massachusetts, Energy Facilities Siting Council, Boston, MA *Policy Analyst*
1982	National Academy of Sciences, Washington, DC *Researcher*
1978-1982	University of California at Irvine, Irvine, CA *Assistant Professor*

SELECTED CONSULTING EXPERIENCE

- **Various confidential engagements** involving power sales agreements, gas supply contracts, advisory services on gas and electric matters, transmission policy, oil market issues, water utility issues, and market power and monitoring issues.
- **Entergy Wholesale Commodities**
  Provided strategic advice on wholesale and retail market issues. (2013-ongoing)
- **Barr Foundation**

Prepared a report on the impacts of the Massachusetts Green Communities Act of 2008 on the Massachusetts economy. (2013-2014)

- **Five California Utilities (LADWP, PG&E, SCE, SDG&E, SMUD)**
  Served on the four-person expert Independent Advisory Panel for the third-party study of integration of renewable energy into California's Electric System ("Investigating a Higher Renewables Portfolio Standard in California"). (2013-2014)
- **State of Colorado**
  Prepared expert report on behalf of the three public utility commissioners in Colorado, in support of the complaint against them on implementing Colorado's renewable energy standard under alleged violations of interstate commerce clause. (2013-2014)
- **Energy Foundation**
  Wrote white paper on the implications for electric system reliability of the Environmental Protection Agency's implementation of its authority under Section 111(d) of the Clean Air Act, to regulate greenhouse gas emissions from existing power plants. (2013-2014)
- **Ambri (battery company)**
  Analyzed energy system issues related to integration of renewables on a military base. (2013-2014)
- **Advanced Energy Economy Institute**
  Facilitated workshop for state utility commissioners in Midwest states, on advanced energy technologies and related regulatory issues. (2013)
- **Environmental Defense Fund – North Carolina**
  Testified on energy efficiency program design issues. (2013)
- **Advanced Energy Economy Institute (with the New England Clean Energy Council and the New England Conference of Regulatory Utility Commissioners)**
  Supported workshop on advanced energy technologies and related regulatory issues. (2013)
- **Lawrence Berkeley National Laboratory Energy Program**
  Support on regulatory issues at workshop for the New Jersey Board of Public Utilities on smart grid issues. (2013)
- **Advanced Energy Economy Ohio**
  Testimony before the Ohio Senate Public Utilities Committee in support of the Ohio Energy Efficiency Resource Standard. (2013)
- **Pepco Holdings Inc., and its operating affiliates, Potomac Electric Power Company, Delmarva Power & Light Company, and Atlantic City Electric Company**
  Testimony in support of appropriate incentives for investment in electric transmission. (2013)
- **Baltimore Gas and Electric Company**
  Testimony in support of appropriate incentives for investment in electric transmission. (2013)
- **Advanced Energy Economy Institute**
  Survey of CEOs of advanced energy companies doing business in California, with regard to the state's energy and environmental policies. (2012-2013)
- **NSTAR and Cape Wind**
  Testimony in support of the long-term power purchase agreement of NSTAR and Cape Wind. (2012)
- **Energy Foundation**
  Strategic planning for the China Sustainable Energy Program. (2012)
- **Pacific Gas & Electric Company**
  Testimony on ratemaking issues for PG&E's proposed pipeline safety enhancement plan. (2012)
- **COMPETE Coalition**
  Testimony on energy efficiency as part of the performance of state and wholesale electric markets in New Jersey. (2011)
- **Compressed Air Energy Storage Company**

Confidential engagement to analyze regional wholesale markets for baseload and renewable energy power generation. (2011)

- **Merck Family Foundation**
  Analysis of the economic impacts of the funds collected through the auction of allowances under the Regional Greenhouse Gas Initiative. (2011)
- **American Clean Skies Foundation Corporation**
  Analysis of the reliability and air emission issues associated with potential retirement of the Potomac River Generating Station. (2011)
- **Colorado Public Utilities Commission**
  Analysis of the Colorado solar photovoltaic incentive program. (2011)
- **Exelon Corporation and Constellation Energy (Baltimore Gas & Electric)**
  Analysis of the economic impacts on the Maryland economy associated with the proposed clean-energy commitments tied to the proposed merger of Exelon and Constellation Energy. (2011-2012)
- **New England Power Generators Association**
  Analysis of competition issues associated with the proposed merger of Northeast Utilities and NSTAR. (2011)
- **Dominion Generation**
  Analysis of proposed state tax on output from in-state power generation. (2011)
- **Exelon Corporation and Clean Energy Group**
  Analysis of electric industry issues involved in responding to the U.S. Environmental Protection Agency's air emission regulations. (2010-present)
- **Major electric distribution company and independent power producer**
  Analysis of the net benefits of retiring a set of generating units, and replacing it with a long-term contract to provide power from a gas-fired power plant and biomass power plant. Modeled locational energy prices, capacity prices, and revenue streams in the region. (2010)
- **Major electric utility company**
  Analysis of changing fuel-market conditions affecting the value of gas-fired power generation in the context of litigation. (2010)
- **Commonwealth Edison Company**
  Analysis of the ratemaking issues for a electric distribution utility with respect to energy efficiency program effects in Illinois. (2010-2011)
- **National Grid – Massachusetts electric distribution companies**
  Analysis of the market for and other attributes of the long-term contract for power from the Cape Wind project. (2010)
- **Spectra Energy (with the Interstate Natural Gas Association of America)**
  Analysis of the markets for natural gas, and analysis of the implications of the U.S. Environmental Protection Agency's Advanced Notice of Proposed Rulemaking on PCBs. (2010-2011)
- **Renewable energy company**
  Analysis of transmission access, planning, cost allocation and siting conditions in regions through the U.S. (2010-present)
- **Indian tribe in MidWest**
  Analysis of the value of an oil pipeline right-of-way. (2010)
- **Dominion Generation**
  Analysis of the proposed legislation in Connecticut to establish a windfall profits tax on all generating assets located in the state. (2010)
- **Transmission consortium**
  Analysis of cost-allocation models for an interstate transmission project involving transmission utilities and merchant transmission companies. (2009-2010)

- **Massachusetts renewable energy trust**
  Analysis of transmission-related models and considerations for the development of offshore renewable energy. (2009)
- **Major electric utility**
  Development of business models and approaches for deploying energy efficiency within the context of the American Climate and Energy Security Act framework. (2009)
- **Major industrial electricity consumer**
  Assistance in analyzing the implications of the American Climate and Energy Security Act for the company, in light of impacts on energy prices and trade considerations. (2009)
- **National Grid**
  Assistance in developing a revenue decoupling mechanism for retail distribution service, and providing expert witness assistance in electric and natural gas distribution rate cases in Massachusetts, Rhode Island, New York and New Hampshire. (2009-2011)
- **Sandia Pueblo**
  Assistance in valuing a transmission corridor on tribal reservation land. (2008-present)
- **Major electric and gas company**
  Analytic and strategic support for company's development of a business plan for energy efficiency and other energy-related investments on the customer side of the meter. (2008)
- **AEP Transmission**
  Prepared a white paper on the design and cost allocation framework for a high-voltage transmission system designed to support renewable and other resources. (2008)
- **Reliant**
  Prepared study assessing competition in the wholesale and retail electricity markets in ERCOT. (2008)
- **Major environmental organization**
  Analytic and strategic support for utility ratemaking policies for advancing energy efficiency in many states. (2008-present)
- **New York Independent System Operator**
  Supported strategic planning and assessment for the Board of Directors. (2008-2010)
- **Commonwealth Edison Company**
  Provided testimony on ratemaking policy issues relating to regulatory lag. (2008)
- **Energy Association of Pennsylvania (EGA)**
  Analysis of proposed legislation to cap retail electricity rates in Pennsylvania after the expiration of rate caps. (2008)
- **National Association of Regulatory Utility Commissioners (NARUC)**
  Preparing study on best practices relating to state regulatory agency policies and utility practices on competitive procurement of resources to serve retail electricity customers. (2007)
- **KeySpan/Boston Gas**
  Analysis of the implications of utility ratemaking for valuation of utility assets for property taxation purposes. (2008)
- **Electric company**
  Analysis of state's retail and wholesale power market structure. (2008)
- **Electric company**
  Preparation of expert report on electric industry structure in the 1990s and 2000s. (2007-2008)
- **Major electric company**
  Analytic support for company's development of strategic plan for company-wide greenhouse gas reduction commitments. (2008)
- **Sierra Pacific Power Company**

Provided testimony on policy issues relating to the use of historic, future, and hybrid test years in state utility rate cases. (2007-2008)

- **Harvard University**
  Provided strategic assistance relating to regulatory issues affecting the planning and design of Harvard's "green campus" development in Allston Landing. (2007-2008)

- **Public Service Gas & Electric Company of New Jersey (PSEG)**
  Provided assistance in facilitating the development of a policy to address "leakage" of greenhouse gas emissions associated with the adoption of a cap-and-trade program in various Northeast states and the interstate sales of electricity in various Northeast/MidAtlantic power markets. (2007)

- **Electric Power Supply Association**
  Prepared white paper on economic, environmental & regulatory trends in the electric industry (2007).

- **Sempra Energy Company – San Diego Gas & Electric Company and SoCalGas Company**
  Provided testimony on policy issues relating to the provision of financial incentives to electric and gas utilities for the successful provision of energy efficiency programs. (2007)

- **PECO Energy Company**
  Provided advice on various economic and policy issues relating to electric industry restructuring policy. (2007)

  Provided testimony on issues relating to the market for alternative energy credits and the proposal of PECO to voluntarily solicit, procure and bank alternative energy credits. (2007)

- **Commonwealth Edison Company**
  Provided testimony on issues relating to the relationship of auctions for wholesale supply for basic service customers and alternative proposals for utility resource procurement. (2007)

- **ISO New England**
  Assisting Regional Transmission Organization in scenario planning process examining various future technology mixes for New England's electric system. (2006-2007)

- **PJM**
  Preparing report on market monitoring functions performed under various federal regulatory agencies with responsibility to oversee electricity and energy markets (i.e., the Federal Energy Regulatory Commission and the Commodities Futures Trading Commission). (2006-2007)

- **Major Industrial and Power Plant Company**
  Assisted company (located outside of New England) in analyzing market and negotiating the price and other terms and conditions for long-term gas supply (2006-2007). Assisted company in valuing a power plant asset. (2007)

- **State of North Carolina**
  Provided expert witness services on electric utility economics and regulatory issues, on behalf of the North Carolina Attorney General in a nuisance lawsuit to require the Tennessee Valley Authority to put in place air pollution control equipment on coal-fired power plants in TVA's system. (2006-2008)

- **Major Regional Transmission Organization**
  Performed analysis of market conditions and trends, and benchmarking market rules and reliability performance with other comparable organizations – in support of RTO's strategic planning process. (2006-2007)

- **Special LNG Committee, Commonwealth of Massachusetts**
  Prepared report on the need for natural gas and liquefied natural gas in the Northeast, the need for LNG facilities, the role of government in the LNG facility siting process, and other issues relating to LNG proposals in the Commonwealth. Provided on *pro-bono* basis to the Commonwealth. (2006)

- **Ute Indian Tribe of the Uintah and Ouray Reservation**
  Prepared a report on economic and policy issues relating to use of tribal lands for energy rights-of-way, as called for in Section 1813 of the Energy Policy Act of 2005. (2006)

- **New York ISO**
  Prepared white paper on fuel diversity issues in the New York market. (2008)

  Prepared white papers on long-term contracting issues in states with restructured electric industries, and on the economic foundations for single-clearing-price markets versus pay-as-bid markets. (2007)

Performed economic benefit/cost study of the introduction of competition into the wholesale electric market in the region. (2006-2007)

- **Commonwealth Edison Company**
  Provided testimony on appropriate ratemaking principles for recovery of pension-related costs in proceeding to set rates to go into effect following the transition period. (2006)
- **Commonwealth Edison Company**
  Provided testimony on economic principles associated with single-price auction design versus pay-as-bid auction design, for the procurement of wholesale power supplies to meet the needs of retail all-requirements customers. (2006)
- **Exelon Corporation**
  Provided analysis of designs of mandatory carbon control policies. (2005-2007)
- **Sonosky, Chambers, Sachse, Endreson & Perry, LLP, on behalf of various Indian Tribes**
  Provided analysis in support of comments filed with the Departments of Interior and Energy with respect to the study of energy rights of way on tribal land which was called for in Section 1813 of the Energy Policy Act of 2005. (2005-2006)

  Provided analysis in support of various tribal negotiations with energy companies with respect to valuation of energy rights of way on tribal reservation lands. (2007)
- **Electric utility company**
  Performed independent evaluator services in procurement for power resources. (2005-2006)
- **Power Generation Company**
  Provided analysis of product market development in MidWest and Eastern RTOs. (2005)
- **New England Energy Alliance**
  Prepared a white paper on energy infrastructure needs in the New England states. (2005)
- **Committee on Regional Electric Power Cooperation (of the Western Interstate Energy Board)**
  Provides research and advising with respect to market monitoring and assessment for the Western wholesale electric markets. (2005-2007)
- **Southern California Edison Company**
  Provided Independent Evaluator services for a competitive procurement of new long-term generation resources and renewable resources. (2005)
- **LNG / Interstate Gas Pipeline project – Duke Energy/Excelerate project**
  Prepared regional market study for the project proposed for Massachusetts. (2004-2005)
- **Electric Generating Company**
  In a contract dispute, provided expert witness services relating to whether changes in a region's wholesale power market rules nullified a power sales agreement. (2004-2006)
- **Louisville Gas & Electric and Kentucky Utilities**
  For two vertically integrated electric companies, provided expert witness services in a state investigation of which regional transmission approach satisfies state policy objectives. (2004)
- **Independent Generating Company**
  For a power company owned by commercial lenders in a Northeast power market, provided consulting services to monitor state regulatory policies and actions with respect to utility regulation and environmental regulation, and legislation affecting power plants. (2004)
- **Major Electric and Gas Company**
  Performed confidential study of the benefits, costs and current conditions in certain wholesale and retail electric power markets. (2004-2005)
- **Regional Transmission Organization**
  For a confidential project, analyzed market monitoring and mitigation approaches. (2004-2005)

- **Major Commercial Bank**
  For a confidential project, advise with regard to electric industry restructuring and profitability of large energy marketer and trading organization. (2004-2005)
- **Consumer Energy Council of America**
  For a group of electric industry market participants, regulators, and interest groups, prepared white papers on the need for transmission enhancements in U.S. power markets. (2004)
- **Retail electric company**
  Provides confidential analysis of business models and regulation approaches for providing retail electric service in the state. (2004)
- **Independent system operator**
  Provided confidential analysis and research on aligning retail and wholesale market policies. (2004)
- **California State attorney general**
  Provided expert witness services with regard to state resource adequacy & planning practices. (2004)
- **Pacific Gas & Electric Company**
  Provided expert witness services relating to the public benefits of the settlement between PG&E and the California Public Utility Commission, to enable PG&E to emerge from bankruptcy. (2003)
- **Independent power company**
  Provided consulting advice on economics of compliance strategies for air and water permits. (2003)
- **Major public utility company**
  Provided expert advisory services to a buyer of power supplies relating to the pricing and other terms for a long-term purchase power agreement. (2003)
- **Duke Power**
  Provided expert advisory services relating to rate-making and other regulatory practices. (2003)
- **Exelon Generation**
  Provided strategic advice and analytic services relating to market conditions affecting the client's generating assets in New England. (2003)
- **Entergy Services Inc.**
  Provides services as the independent monitor of Entergy's Fall 2002, Spring 2003 and Fall 2003 Requests for Proposals for Supply-Side Resources. (2002-2005)
- **Power generation company in New England**
  Provided expert testimony in contract dispute regarding allocation of uplift costs in an agreement concerning the supply of wholesale power for standard offer service. (2002)
- **Connecticut Light and Power Company**
  Provided expert testimony in contract dispute regarding allocation of congestion costs in an agreement concerning the supply of wholesale power for standard offer service. (2002-2003)
- **Ocean State Power**
  Provided arbitration services in a dispute regarding a gas purchase contract between Ocean State Power and ProGas Ltd. (2002-2003)
- **Regional independent system operator**
  Provided strategic advice on regional transmission organization strategy. (2002)
- **PJM Interconnection**
  Provided advice to the appointed mediator as part of the Alternative Dispute Resolution process, in a dispute involving PJM and a market participant. (2002)
- **Duke Energy Corporation**
  Provided analysis on strategic issues in gas and electric regulatory policy for Duke Energy's corporate office, including with regard to code of conduct issues, wholesale competition, regional transmission organization policy. (2001-2002)

- **Pacific Gas and Electric Corporation**
  Provided expert witness testimony in proceedings of the Federal Energy Regulatory Commission on public benefits of the proposed restructuring of PG&E assets as part of its emergence from bankruptcy. (2001-2002)

- **Massachusetts Renewables Trust**
  Provided assistance in support of the Trust's renewables and power quality program. (2001-2002)

- **Major electric holding company**
  Prepared an analysis of the regulatory policies for reviewing merger applications in states where potential merger candidates are located. (2001)

- **Western Massachusetts Electric Company**
  Provided expert testimony in contract disputes regarding allocation of congestion costs in agreements concerning the supply of wholesale power for standard offer service. (2001-2002)

- **The Energy Foundation**
  Researched and wrote a white paper on California's process for permitting new power plants. (2001)

- **Cross-Sound Cable Company**
  Provided expert testimony regarding public benefits of proposal to construct merchant transmission facility across Long Island Sound. (2001-2002)

- **Major independent power company**
  Provides expert witness support in litigation surrounding power plant development project, involving viability of project's environmental and siting permitting. (2001-2004)

- **MASSPOWER Inc.**
  Mediator in a contract dispute involving pricing of power purchases. (2001)

- **NRG Energy and Dynegy**
  Provided expert witness support in regulatory proceeding to review these companies' acquisition of power plants being divested by Sierra Pacific and Nevada Power. (2001)

- **Occidental Chemical Corporation**
  Provided expert witness support and economic analysis of a major electric utility's transmission policies and practices, and review of the proposed RTO. (2000)

- **PP&L Global**
  Provided economic and environmental analysis and expert witness support for proposal to build the Kings Park Energy power plant in Long Island, New York. (2000)

- **Calpine Corporation**
  Provided economic and environmental analysis and expert witness support for proposal to build the Wawayanda power project in Rockland County, New York. (2000)

  Provided environmental analysis and expert witness support for proposal to build the Towantic power plant in Oxford, Connecticut. (2001)

- **American National Power, Calpine, El Paso, NRG Energy, Sithe, Southern Energy**
  Provided support for the development of a proposal for a Regional Transmission Organization for New England. (2000-2001)

- **Duke Energy/Maritimes and Northeast Pipeline**
  Provided expert reports on the market and environmental impacts of new natural gas infrastructure and supply in New England and the public benefits of the Maritimes and Northeast Phase III and Hubline project. (2000-2003)

- **Arkansas Electric Distribution Cooperatives and Arkansas Electric Cooperative Corporation**
  Provided expert witness support and analysis on economic and public policy issues associated with various aspects of wholesale and retail competition in Arkansas. (2000-2001)

- **TransÉnergie U.S.**
  Provided expert testimony regarding public benefits of proposal to construct merchant transmission facility. (2000-2001)

- **Conectiv**
  Provided strategic wholesale market analysis and support for procurement of supplies for distribution utility company's provision of Basic Generation Services to retail customers. (2000)

- **SCS Energy Corp. – Astoria Energy**
  Provided economic and environmental analysis and expert witness support for proposal to build new power plant in New York City. (2000-2001)

- **HEFA Power Options**
  Provided strategic advice regarding wholesale power market for retail buyers' group. (2000-2003)

- **Major real estate development company**
  Provided strategic support for configuration of electric and gas infrastructure for large regional mixed-use development project. (2000-2001)

- **Investment company**
  Provided strategic advice to investment company with regard to potential investment in major electric generating equipment manufacturing company. (2000)

- **Major independent power company**
  Provided economic and environmental support for company's application to construct a merchant power plant in Florida. (2000)

- **Major railroad company**
  Provided expert witness support on economic and regulatory policy issues for railroad in state regulatory proceeding on a proposed utility merger. (2000)

- **Coalition of Wireless Telecommunications Carriers**
  Prepared an expert report on economic benefits of wireless telecommunications. (2000)

- **Major brownfield property developer**
  Provided valuation of property to be developed as site for new electric generating facility. (2000)

- **Fitchburg Gas and Electric Company**
  Provided litigation support for a gas and electric company on rate design policy. (2000)

- **Consortium of electric companies**
  Provided economic analysis, contract review, and litigation support for a consortium of electric companies with power purchase agreements with PURPA projects. (1999)

- **FirstEnergy Corp.**
  Provided expert witness support regarding generation asset valuation and the impacts of a new electric industry restructuring law on the company. (1999-2000)

- **Ozone Attainment Coalition**
  Provided strategic analysis and advice on electric system reliability issues relating to electric companies' implementation of 2003 NOx requirements issued by the U.S. EPA. (1999)

- **Municipal electric department**
  Provided expert witness services and analysis of the economics and need for a new natural gas pipeline proposed to serve an existing electric power plant in Massachusetts. (1998-2001)

- **Seneca Nation**
  Provided expert analysis and strategic advice regarding the value of transmission rights of way, in a dispute with an electric utility company. (1998-2000)

- **Major cable company**
  Provided strategic advice in a series of regulatory and court cases involving inter-affiliate transactions of electric utility company entering into competitive telecommunications and cable markets. (1998)

- **Major electric utility company**
  Provided expert witness support regarding structural changes in the electric industry, in litigation pertaining to the company's restructuring plans. (1998-1999)

- **Sithe Energies, Inc.**
  Provided strategic advice and regulatory support on a variety of issues (market analysis, transmission and ISO issues, federal and state market rules, legislation, siting, environmental strategy) relating to the company's participation in the New England, New York, and PJM markets. (1997-2003**)**

  Provided transition assistance to the company in its acquisition and integration of approximately 2,000 MW of existing fossil fuel generation from Boston Edison Company. (1997-1998)

  Provided transition assistance to the company in its acquisition and integration of approximately 4,100 MW of existing fossil and hydroelectric generation capacity from GPU Genco. (1998-1999)

  Provided support for the company's participation in electricity product markets structured by NEPOOL and operated by the Independent System Operator-New England, the New York power pool and the New York ISO, and PJM. (1997-2002)

  Provided strategic project development advice and expert witness support for the company's applications to construct three natural gas merchant power plants (totaling 2865 megawatts) in Everett, Weymouth, and Medway, Massachusetts. (1998-2001)

  Provided strategic guidance and regulatory support regarding design of air quality improvement plan for existing fossil units at Mystic Station. (1998-2001)

  Provided strategic guidance regarding company's natural gas-fired merchant power plant development projects in Ontario, Canada. (2000-2001)

- **Natural Resources Canada**
  Prepared a white paper on the implications for electric system reliability in Canada that are associated with restructuring the electric industry in the United States. (1999)

- **Cummins Engine Company, Inc.**
  Provided strategic analysis on implications of national energy and environmental policies for the Company's long-term business opportunities. (1999)

- **Electric utility company**
  Provided advice and regulatory support with regard to the economics and prudency of an existing long-term power purchase agreement. (1998)

- **National Association of Regulatory Utility Commissioners (NARUC)**
  Assisted the Executive Director and NARUC leadership in updating its strategic plan and in preparing a business plan for its implementation. (1998)

- **State energy office**
  Assisted the office in analyzing options for supporting renewable resource development in the state and in designing a market-based strategy to implement a new legislative mandate for a "renewables portfolio standard." (1997-1998)

- **U.S. Generating Company (now PG&E Generating Company)**
  Provided analysis of the economic, reliability, and environmental benefits to the host state and region of a new merchant power generation facility: the 360-megawatt Millennium project in Massachusetts. Provided expert witness testimony on the results of this analysis to the Massachusetts Energy Facility Siting Board. (1996-1997)

  Provided analysis of the economic, reliability, and environmental benefits of a new merchant power generation facility: the 792-megawatt Lake Road Generating Project in Connecticut. Provided expert witness testimony on the need for this project to the Connecticut Siting Board. (1997-1998)

- **Pennsylvania Power & Light Company**
  Provided strategic guidance, economic and policy analysis, and regulatory support for electric utility company as it developed and proposed its plan for restructuring its company for retail competition. Issues and tasks included electricity market price estimation, rate design, revenue analysis, consumer protection, corporate structure, and regulatory strategy. Provided expert witness testimony on rate design policy issues. (1996-1998)

- **Major diversified electric equipment company**
  Provided strategic advice and analysis on market opportunities and risk in various regions of the U.S. electric industry, under numerous restructuring scenarios. (1996-1997)

- **Major nationwide electricity consumer**
  Conducted analysis of buying options and strategies for acquisition of electricity services in states with customer choice in retail generation markets. Analysis included review and comparison of eight states' implementation of customer choice, from the perspective of how retail rate and function are unbundled, how the commercial and reliability functions are structured in the regional generation market, and how the customer should approach the market to competitively procure power across various states. (1997)

- **National Council on Competition in the Electric Industry**
  Prepared a Briefing Paper on Regional Issues in Electric Industry Restructuring, for the NCCEI—a joint project of the National Association of Regulatory Utility Commissioners, the National Conference of State Legislatures, the U.S. Department of Energy, and the U.S. Environmental Protection Agency. Analyzed regional issues, including electric system reliability, transmission access and siting, environmental protection, market power, interstate reciprocity in retail access policies, and regulation of multi-state electric utility companies. (1997)

- **Major western coal company**
  Analysis of western states' electric industry restructuring policies and market prices for power in various states within the Western Systems Coordinating Council area. (1996-1997)

- **Major gas pipeline company**
  Provided analysis of market structures and prices for generation and delivery services in electric service territories where the gas pipeline would locate facilities that use electricity. (1997)

- **Major electric supply company**
  Provided analysis of regional electricity market conditions to support this company's analysis of the value of various utility assets that were being divested as part of an electric utility company's corporate restructuring. (1997)

- **Massachusetts Division of Energy Resources**
  Analyzed Boston Gas Company's proposal for unbundling its retail service, its proposal for performance-based rates, and its plan for departing the merchant function. Provided analytic, policy and negotiation support on gas industry restructuring issues in a variety of cases. (1996-1998)

- **Massachusetts Division of Energy Resources**
  Assisted the state's energy office in developing policies for establishing a statewide fund to support renewable resource development as part of the state's electric industry restructuring plan. Provided analytic support to the energy office as it participated in a working group of stakeholders attempting to reach consensus on the institutional design of such a renewables fund. Drafted legislative language to create the fund and the non-bypassable charge on distribution service in the state. (1997)

- **Massachusetts Water Resources Authority Advisory Board**
  Analyzed opportunities for the MWRA, a public authority with major energy-using and -producing assets, to position itself beneficially as a participant in a restructured retail electricity market in New England. (1996-1997).

- **Coalition of marketers and independent power producers**
  Analyzed state public utility commission proposed rules for restructuring the electric industry, from the point of view of whether the proposed structure would assure a workably competitive market. Examined the transmission owners' proposal for an independent system operator. (1996-1997)

- **Major independent power producer**
  Analyzed market opportunities and risks for merchant plant development in a U.S. region. (1996)

- **Major independent power producer**
  Analyzed the expected market price of power in two regions of the U.S. electricity markets. Presented results to company board of directors. (1996)

- **MCI, Inc.**
  Provided strategic regulatory advice in local competition proceeding before a state public utility commission. Provided testimony on local competition policy issues in public utility commission proceedings in Massachusetts and New York. (1996)

- **Group of municipal electric companies in New York State**
  Provided expert witness testimony on cost allocation issues in court litigation on wholesale power contracts. (1996)

- **Intercontinental Energy Corporation**
  Provided strategic guidance, analytic support, and regulatory support for the company, a major independent power producer, as it developed its position in the state's electric industry restructuring proceeding. Issues involved regional industry structure (including independent system operator proposals), stranded cost recovery policy, stranded cost calculation methodologies, horizontal and vertical market power issues, environmental protection, and securitization. Provided expert witness testimony in state retail restructuring proceedings in Massachusetts and New Jersey. (1995-1997).

- **Nextel Communications**
  Provided economic and policy analysis on barriers to entry in the local commercial mobile radio service market in region. Provided expert witness testimony before the Massachusetts Department of Public Utilities. (1995-1998)

- **Arizona Public Service Company**
  Provided expert witness testimony on regulatory reforms necessary to align traditional existing utility planning proceedings with competitive retail markets as being proposed in the state. (1995)

TESTIMONY ON BEHALF OF CLIENTS

Many confidential expert reports, testimonies, declarations, affidavits, and depositions in confidential arbitrations and mediations.

- **On her own behalf**
  Before the Oregon State Legislature's House Interim Committee on Revenue, Senate Interim Committee on Finance and Revenue, on "Consideration of the Feasibility and Implications of a Clean Air Tax or Fee in Oregon: Implementing Greenhouse Gas Emission Reduction Policies – Experience from Other States," January 15-16, 2014.

- **On her own behalf**
  Before the U.S. House of Representatives Energy and Commerce Subcommittee on Energy and Power, "Hearing on EPA's Proposed GHG Standards for New Power Plants and H.R. _, Whitfield-Manchin Legislation," November 14, 2013**.**

- **Joshua Epel, James Tarpey, and Pamela Patto, et. al.**
  Before the U.S. District Court of the State of Colorado, on behalf of Joshua Epel, James Tarpey, and Pamela Patton (commissioners of the Colorado Public Utilities Commission), and Environment Colorado, Conservation Colorado Education Fund, Sierra Club, The Wilderness Society, Solar Energy Industries Association, and Interwest Energy Alliance, in re: *American Tradition Institute and Rod Lueck, v. Epel at al*., Civil Action Number 11-cv-00859-WJM-BMB, expert report, November 7, 2013.

- **On her own behalf**
  Before the Federal Energy Regulatory Commission, in the Matters of Centralized Capacity Markets in Regional Transmission Organizations and Independent System Operators," Docket No. AD13-7-000, re: considerations for the future, September 9, 2013.

- **Environmental Defense Fund and North Carolina Sustainable Energy Association**
  Before the Public Utilities Commission of North Carolina, Docket E-7, SUB 1032, August 7, 2013.

- **Advanced Energy Economy Ohio**
  Before the Ohio Senate Public Utilities Committee in support of the Ohio Energy Efficiency Resource Standard, April 9, 2013.

- **Pepco Holdings, Inc., and its operating affiliates, Potomac Electric Power Company, Delmarva Power & Light Company, and Atlantic City Electric Company**
  Before the Federal Energy Regulatory Commission, in Delaware Division of Public Advocate, *et. al*., v. Baltimore Gas and Electric Company and Pepco Holdings Inc., Docket No. EL13-48-000, April 3, 2013.

- **Baltimore Gas and Electric Company**
  Before the Federal Energy Regulatory Commission, in Delaware Division of Public Advocate, *et. al*., v. Baltimore Gas and Electric Company and Pepco Holdings Inc., Docket No. EL13-48-000, April 3, 2013.

- **NSTAR Electric Company and Cape Wind LLC**
  Before the Massachusetts Department of Public Utilities, in the Petition of NSTAR Electric Company for Approval

of a Proposed Long-Term Contract for Renewable Energy with Cape Wind Associates, LLC Pursuant to St. 2008, c. 169, §83, Prefiled Direct Testimony, March 30, 2012; testimony under cross-examination, August 2, 2012.

- **Pacific Gas and Electric Company**
  Before the California Public Utilities Commission, in the Rulemaking on the Commission's Own Motion to Adopt New Safety and Reliability Regulations for Natural Gas Transmission and Distribution Pipelines and Related Ratemaking Mechanisms, Rulemaking 11-02-019, Rebuttal Testimony filed on February 28, 2012; testimony under cross-examination, March 20, 2012.

- **COMPETE Coalition**
  Before the New Jersey Board of Public Utilities, In the Matter, In the Matter of the Board's Investigation of Capacity Procurement and Transmission Planning, Docket No. EO11050309, October 14, 2011.

- **On her own behalf**
  Before the U.S. House Energy and Commerce Committee, Subcommittee on Energy and Power, EPA Regulations and Electric System Reliability, September 14, 2011.

- **On her own behalf**
  Before the U.S. Senate Environment and Public Works Committee, Subcommittee on Clean Air and Nuclear Safety, June 30, 2011, Oversight Hearing: Review of EPA Regulations Replacing the Clean Air Interstate Rule (CAIR) and the Clean Air Mercury Rule (CAMR).

- **Exelon Corporation and Constellation Energy Group**
  Before the *Maryland Public Service Commission*, In the Matter of the Merger of Exelon Corporation and Constellation Energy Group, Case No. 9271, prefiled direct testimony (May 25, 2011); rebuttal testimony (October 12, 2011), supplemental testimony (December 15, 2011), testimony under cross-examination (November 10, 2011, January 25, 2012).

- **New England Power Generators Association**
  Before the *Massachusetts Public Utilities Commission, In the Matter of the Joint Petition for Approval of Merger [of Northeast Utilities and NSTAR] Pursuant to G.L. c. 164* , § 96, Docket D.P.U. 10-170, prefiled direct testimony (May 20, 2011); testimony under cross-examination (July 15 and 18, 2011).

- **Commonwealth Edison Company**
  Before the *Illinois Commerce Commission*, Investigation of Proposed General Increase in Electric Rates of Commonwealth Edison Company, Docket No. 10-0467, ComEd Exhibit 13.0, prefiled direct testimony (filed June 30, 2010); rebuttal testimony (filed November 22, 2010); surrebuttal testimony (filed January 2, 2011), testimony under cross-examination (January 18, 2011).

- **National Grid: Massachusetts Electric Company and Nantucket Electric Company**
  Before the *Massachusetts Department of Public Utilities*, Investigation as to the Petition of Massachusetts Electric Company and Nantucket Electric Company each d/b/a National Grid for approval by the Department of Public Utilities of two long-term contracts to purchase wind power and renewable energy certificates, pursuant to G.L. c. 169, § 83 and 220 C.M.R. § 17.00 et seq. – Docket D.P.U. 10-54 (the Cape Wind contract proceeding), prefiled direct testimony (filed June 4, 2010), rebuttal testimony (filed September 1, 2010), testimony under cross examination (September 8, 13, 14, 23, 24, 2010).

- **National Grid: Boston Gas Company, Essex Gas Company, Colonial Gas Company**
  Before the *Massachusetts Department of Public Utilities*, Investigation as to the Propriety of Proposed Tariff Changes, Docket No. D.P.U. 10-55, prefiled direct testimony (filed April 16, 2010); testified under cross-examination, June 28-29, 2010.

- **National Grid: EnergyNorth Natural Gas, Inc., d/b/a National Grid NH**
  Before the *New Hampshire Public Utilities Commission*, Investigation as to the Propriety of Proposed Natural Gas Tariff Changes, Docket DG 10-017, prefiled direct testimony (filed February 26, 2010).

- **National Grid: Niagara Mohawk Power Corporation**
  Before the *New York Public Service Commission*, Investigation as to the Propriety of Proposed Electric Tariff Changes, Docket No. 10-E-0050, prefiled direct testimony (filed January 29, 2009), rebuttal testimony (filed August 2010).

- **National Grid: Narragansett Electric Company**
  Before the *Rhode Island Public Utilities Commission,* Investigation as to the Propriety of Proposed Tariff Changes, Docket No. R.I.P.U.C. 4065, prefiled direct testimony (filed June 1, 2009; testimony under cross-examination, November 4, 2009).

- **National Grid: Massachusetts Electric Company and Nantucket Electric Company**
  Before the *Massachusetts Department of Public Utilities*, Investigation as to the Propriety of Proposed Tariff Changes, Docket No. D.P.U. 09-39, prefiled direct testimony (filed May 15, 2009; testimony under cross-examination, August 7 and 25, 2009, and September 8, 2009).

- **Amerada Hess Corp., et al.**
  Before the District Court of the United States for the Southern District of New York, on behalf of Amerada Hess Corp., et al., in *City of New York v. Amerada Hess Corp. et al.*, Case No. 1:00-1898, testimony in deposition, May 12, 2009.

- **State of North Carolina**
  Before the District Court of the United States for the Western District of North Carolina, on behalf of North Carolina in *State of North Carolina, ex rel. Roy Cooper, Attorney General, v. Tennessee Valley Authority*, Case No. 1:06CV20, testimony in deposition, May 17, 2007; testimony at July 22, 2008.

- **KeySpan Energy Delivery (National Grid)**
  Before the Massachusetts Appellate Tax Board, Boston Gas Company, d/b/a KeySpan Energy Delivery New England v. City of Boston, Docket No. F275055-F275056 (FY 2004), F279207-F279208 (FY 2005), F284088-F286194 (FY 2006), testimony and cross-examination, May 20-21, 28, June 4, 2008.

- **Commonwealth Edison Company**
  Before the *Illinois Commerce Commission*, Investigation of Proposed General Increase in Electric Rates of Commonwealth Edison Company, Docket No. 07-0566, ComEd Exhibit 18.0, prefiled rebuttal testimony (filed April 12, 2008).

- **Sierra Pacific Power Company**
  Before the Public Utilities Commission of Nevada, In the Matter of the Application of Sierra Pacific Power, filed pursuant to NRS 704.110(3), for authority to increase its general rates charged to all classes of electric customers to reflect an increase in annual revenue requirement, Docket No. 07-12 (filed December 3, 2007), Prefiled Direct Testimony; cross examination, April 17-18, 2008.

- **Amerada Hess Corp., et al.**
  Before the District Court of the United States for the Southern District of New York, on behalf of Amerada Hess Corp., et al., in *County of Suffolk and Suffolk County Water Authority v. Amerada Hess Corp. et al.*, Case No. 1:00-1898, testimony filed October 1, 2007.

- **Sempra Energy Company – San Diego Gas & Electric Company and SoCalGas Company**
  Before the *California Public Utility Commission*, Order Instituting Rulemaking to Examine the Commission's post-2005 Energy Efficiency Policies, Programs, Evaluation, Measurement and Verification and Related Issues, Rulemaking Docket 06-04-010 (Filed April 13, 2006), testimony filed May 3, 2007, cross examination, May 29, 2007.

- **Commonwealth Edison Company**
  Before the *Illinois Commerce Commission*, Investigation of Rider CPP of Commonwealth Edison Company, and Rider MV of Central Illinois Light Company d/b/a AmerenCILCO, of Central Illinois Public Service Company d/b/a/ AmerenCIPS, and of Illinois Power Company d/b/a Ameren IP, pursuant to Commission Orders regarding the Illinois Auction, Docket No. 06-0800, testimony filed April 6, 2007; cross-examination, April 24, 2007.

- **PECO Energy Company**
  Before the *Pennsylvania Public Utility Commission*, Petition of PECO for Approval of (1) a Process to Procure Alternative Energy Credits During the AEPS Banking Period, and (2) A Section 1307 Surcharge and Tariff to Recover AEPS Costs, Prefiled Direct Testimony, March 19, 2007.

- **Masspower**
  Before the Superior Court Department of Suffolk County, Massachusetts, *Massachusetts Municipal Wholesale Electric Company v. Masspower, et al*., Civil No. 05-02710 (BLS1), on the changes in conditions in the electric industry in New England as they relate to Masspower's performance under its power supply agreement with

MMWEC; Expert Report, September 11, 2006; oral testimony under cross examination at trial, October 16-17, 2006.

- **Commonwealth Edison Company**
  Before the *Illinois Commerce Commission*, Proposed general increase in electric rates, general restructuring of rates, price unbundling of bundled service rates, and revision of other terms and conditions of service, Docket No. 05-0597, Rebuttal Testimony, January 30, 2006; Surrebuttal Testimony, March 14, ,2006; oral testimony under cross-examination, March 23, 2006. Testimony on rehearing, September 20, 2006.

- **Commonwealth Edison Company**
  Before the *Illinois House of Representatives, Electric Utility Oversight Committee*, on the Pay-as-Bid versus Uniform Price Auction Approach To Procurement of Wholesale Power for ComEd's Full-Requirements Customers, January 18, 2006, Springfield, Illinois.

- **Louisville Gas & Electric Company and Kentucky Utilities Company**
  Before the *Kentucky Public Service Commission*, Application of LG&E and KU to transfer functional control of their transmission assets, Case No. 2005-xxxx, Direct Testimony, November 19, 2005.

- **Western Massachusetts Electric Company**
  Before the Superior Court Department of Norfolk County, Massachusetts, *Alternative Power Source, Inc., v. Western Massachusetts Electric Company*, Civil Action No. 00-1967, on the allocation of costs related to transmission congestion in wholesale power contract for standard offer service. Expert Report, September 19, 2001; deposition, October 15, 2001; testimony at trial, July 15, 2005.

- **Entergy Louisiana, Inc. and Entergy Gulf States Inc.**
  Before the *Louisiana Public Service Commission*, Application of Entergy Louisiana, Inc. for Approval of the Purchase of Electric Generating Facilities and Entergy Gulf States, Inc. for Authority to Participate in Contract for the Purchase of Capacity and Electric Power, Docket No. U27836, January 21, 2005.

- **Louisville Gas & Electric Company and Kentucky Utilities Company**
  Before the *Kentucky Public Service Commission*, Investigation Into The Membership of Louisville Gas and Electric Company and Kentucky Utilities Company In The Midwest Independent Transmission System Operator, Inc., Case No. 2003-00266, September 29, 2004; Supplemental Rebuttal Testimony, January 10, 2005; testimony at hearing, June 2005.

- **Entergy Services Inc.**
  Before the *Federal Energy Regulatory Commission,* Entergy Services Inc., et al., in support of the application for approval of market-based power purchase agreements under Section 205 of the Federal Power Act. Affidavit, February 28, 2003; Affidavit, March 31, 2003; Testimony, September 2003; Testimony at deposition, November 20, 2003; Rebuttal Testimony, May 11, 2004; Deposition, May 27, 2004, and June 10-11, 2004; Testimony under cross-examination, July 19-23, 26-27, 2004.

- **Pacific Gas & Electric Company**
  Before the *California Public Utilities Commission*, In Re: Order Instituting Investigation into the ratemaking implications for Pacific Gas and Electric Company (PG&E) pursuant to the Commission's Alternative Plan of Reorganization under Chapter 11 of the Bankruptcy Code for PG&E, in the United States Bankruptcy Court, Northern District of California, San Francisco Division, In re Pacific Gas and Electric Company, Investigation 02-04-026, Pre-Filed Testimony, July 23, 2003, Testimony under cross-examination, September 12, 2003.

- **Entergy Louisiana, Inc.**
  Before the *Louisiana Public Service Commission, Entergy Service*, In Re: Application of Entergy Louisiana, Inc., for Authorization to Enter into Certain Contracts for the Purchase of Capacity and Energy, Docket No. U-27136, Rebuttal Testimony, April 25, 2003.

- **Pacific Gas and Electric Company/PG&E Corporation**
  Before the *Federal United States Bankruptcy Court, Northern District of California, San Francisco Division*, In Re: Pacific Gas and Electric Company, Debtor, Federal I.D. No. 94-0742640, on the public policy concerns raised by the proposed reorganization plan of PG&E Corporation. Expert report, November 8, 2002; rebuttal report, November 26, 2002.

- **PP&L Global**
  Before the *New York Public Service Commission, Article X Siting Board*, on the economic and environmental

benefits of the Kings Park Energy power plant. Prefiled direct testimony (with James Potter, Stephen T. Marron, David J. Kettler, and Thomas Conoscenti), January 2002; rebuttal testimony (with James Potter, Stephen T. Marron, William C. Miller, Jr., N. Dennis Eryou, and Robert W. Brown), October 23, 2002.

- **Connecticut Light & Power Company**
  Before the *Federal United States District Court, District of Connecticut, Connecticut Light & Power Company v. NRG Power Marketing Inc.*, on their standard offer service wholesale sales agreement. Expert report, August 30, 2002; deposition, September 27, 2002.

- **Pacific Gas and Electric Company/PG&E Corporation**
  Before the *Federal Energy Regulatory Commission, in the Matter of Pacific Gas and Electric Company, PG&E Corporation, on behalf of its Subsidiaries Electric Generation LLC, ETrans LLC, and GTrans LLC,* on the public benefits of the application seeking approval under Section 203 of the Federal Power Act and Section 12 of the Natural Gas Act for various actions relating to restructuring of the company to emerge from bankruptcy, November 30, 2001.

- **Cross-Sound Cable Company LLC**
  Before the *Connecticut Siting Council*, on the public benefits of the proposed Cross Sound Cable Project's *Application for a Certificate of Environmental Compatibility and Public Need*, Docket No. 208. Prepared direct testimony, July 23, 2001; oral testimony under cross-examination, October 24-26, 29-30, 2001.

- **Sithe New England (Sithe Edgar LLC, Sithe New Boston LLC, Sithe Framingham LLC, Sithe West Medway LLC, Sithe Mystic LLC)**
  Before the *Federal Energy Regulatory Commission, in the Matter of NSTAR Electric & Gas Corp., v. Sithe Edgar LLC, Sithe New Boston LLC, Sithe Framingham LLC, Sithe West Medway LLC, Sithe Mystic LLC, and PG&E Energy Trading*, Docket No. EL01-79-000. Affidavit comparing historical cost recovery by Boston Edison for its fossil generation units (pre-divestiture) under rate regulation, versus Sithe's revenue recovery for these same units (post-divestiture) under market prices, June 5, 2001.

- **NRG Energy Inc. and Dynegy Holdings Inc.**
  Before the *Public Utilities Commission of Nevada*, In Re: petition of the Attorney General's Bureau of Consumer Protection to issue an Order staying further proceedings regarding divestiture of Nevada's electric generation assets and to open a docket to consider whether to issue a moratorium on divestiture in Nevada. Supplemental prepared direct testimony on behalf of Valmy Power LLC, April 6, 2001; testimony under cross-examination.

  Before the *Public Utilities Commission of Nevada*, In Re: petition of the Attorney General's Bureau of Consumer Protection to issue an Order staying further proceedings regarding divestiture of Nevada's electric generation assets and to open a docket to consider whether to issue a moratorium on divestiture in Nevada, prepared direct testimony on behalf of Reid Gardner Power LLC and Clark Power LLC, April 3, 2001; testimony under cross-examination.

- **Sithe New England, LLC**
  Before the *Federal Energy Regulatory Commission, In the Matter of Maine Public Utilities Commission and The United Illuminating Company v. ISO New England, Inc.*, affidavit on the role of price "spikes" in compensating generators for the services that they provide in the region, September 7, 2000.

- **Arkansas Electric Distribution Cooperatives**
  Before the *Arkansas Public Service Commission, In the Matter of a Generic Proceeding to Establish Uniform Policies and Guidelines for a Standard Service Package*. Prepared joint reply testimony (with Janet Gail Besser), July 21, 2000; prepared joint surreply testimony (with Janet Gail Besser), August 3, 2000.

- **TransEnergie U.S.**
  Before the *Connecticut Siting Council*, on the public benefits of the proposed Cross Sound Cable Project. Expert report, July, 2000; prepared direct testimony, September 20, 2000; oral testimony, September 27, 2000; supplemental written testimony, December 7, 2000; oral testimony under cross-examination, December 14, 2000; oral testimony January 9-11, 2001.

- **SCS Energy Corp.**
  Before the *New York State Public Service Commission*, on the economic and environmental impact of a new combined cycle power plant in Queens, NY, June 19, 2000.

- **Reading Municipal Light Department**

Before the *Massachusetts Energy Facilities Siting Board, Docket No. EFSB 97-4*, on the economics and need for a new natural gas pipeline, June 19, 2000; testimony under cross-examination September 19, 2000, September 21-22, 2000, October 5, 2000, and October 17, 2000.

- **Fitchburg Gas and Electric Light Company**
  Before the *Massachusetts Department of Telecommunications and Energy, Docket D.T.E. 99-66*, on gas and electric company rate design policy, testimony under cross-examination, January 14, 2000.

- **FirstEnergy Corp.**
  Before the *Public Utilities Commission of Ohio*, In the Matter of the Application of FirstEnergy Corp. on behalf of Ohio Edison Company, the Toledo Edison Company, and The Cleveland Electric Illuminating Company: for Approval of an Electric Transition Plan and for Authorization to Recover Transition Revenues (Case No. 99-1212-EL-ETP); for Approval of New Tariffs (Case No. 99-1213-EL-ATA); for Certain Accounting Authority (Case No. 99-1214-EL-AAM), on recovery of transition costs and calculation of the market value of generation assets. Joint testimony (with Dr. Scott T. Jones), December 22, 1999; supplemental testimony (with Dr. Scott T. Jones), April 4, 2000; deposition, April 7, 2000.

- **Sithe New England, LLC**
  Before the *Massachusetts Energy Facilities Siting Board, Docket EFSB 98-10*, in support of an application to construct a 540 MW gas-fired single cycle peaking power plant in Medway, Massachusetts. Prepared direct testimony, April 1999; oral testimony under cross-examination, July 27, 1999.

- **Village of Bergen, et al.**
  Before the *Supreme Court of the State of New York, Index No. 081556*, Affidavit in Response to Defendant's Submission of February 25, 1999, in *Village of Bergen, et al., Plaintiffs, v. Power Authority of the State of New York, Defendant*, March 3, 1999.

  Before the *Supreme Court of the State of New York*, *Index No. 081556*, Affidavit in Support of Petition to Correct Rates, in *Village of Bergen, et al., Plaintiffs, v. Power Authority of the State of New York, Defendant*, October 17, 1996.

- **Sithe New England, LLC**
  Before the *Massachusetts Energy Facilities Siting Board, Docket EFSB 98-7*, in support of an application to construct a 750 MW gas-fired combined cycle power plant at the Fore River Station in Weymouth, Massachusetts (Edgar). Prepared direct testimony, February 10, 1999; oral testimony under cross-examination, July 26, 1999.

- **Sithe New England, LLC**
  Before the *Massachusetts Energy Facilities Siting Board, Docket EFSB 98-8*, in support of an application to construct a 1500 MW gas-fired combined cycle power plant at the Mystic Station in Everett, Massachusetts. Prepared direct testimony, February 10, 1999; oral testimony under cross-examination, May 25, June 2, 1999.

- **U.S. Generating Company**
  Before the *Connecticut Siting Board, Docket No. 189*, on an application to construct a new Lake Road Generating Project, September 1998. Oral testimony under cross-examination.

- **Central Hudson Gas & Electric Corporation**
  Before the *Supreme Court of New York, Index No. 255/1998, CHGE v. West Delaware Hydro Associates*, on issues relating to ratemaking treatment of costs relating to power contracts, April 13, 1998.

- **Sithe New England Holdings, LLC**
  Before the *Massachusetts Department of Telecommunications and Energy and the Massachusetts Energy Facilities Siting Board, Docket Nos. DTE98-84 and EFSB98-5,* on issues pertinent to forecast and supply planning by electric companies, September 14, 1998.

- **Sithe Energies, Inc.**
  Before the *Massachusetts Energy Facilities Siting Board, Docket No. EFSB98-3,* on issues related to the agency's rulemaking establishing a Technology Performance Standard, June 8, 1998.

  Before the *Massachusetts Energy Facilities Siting Board, Docket No. EFSB98-1,* on issues related to the agency's review of project viability as part of review of power plant applications, March 16, 1998.

- **Pennsylvania Power & Light**
  Rebuttal testimony on codes of conduct governing affiliate relations. *Pennsylvania Public Utility Commission*,

Docket Nos. A-122050F0003, A-120650F0006, testimony under cross-examination, February 17, 1998.

Rebuttal testimony on rate unbundling and rate design issues, on consumer protection issues. *Pennsylvania Public Utility Commission, Docket No. R-00973954,* testimony under cross-examination, August 5, 1997.

Before the *Penn Public Utility Commission, Docket No. R-00973954*, on rate design, April 1, 1997.

- **Nextel Communications**
  Before the *Massachusetts Department of Public Utilities, Docket 95-59-B,* on telecommunications facility matters, testimony under cross-examination, January 1997.
- **Arizona Public Service Company**
  Before the *Arizona Corporation Commission, Docket No. U-0000-95-506,* on integrated resource planning and competition, October 1996.
- **U.S. Generating Company**
  Before the *Massachusetts Energy Facilities Siting Board, Docket 96-4,* on an application to construct a new Millennium power generating facility, testimony under cross-examination, October 1996.
- **MCI Communications, Inc.**
  Before the *Massachusetts Department of Public Utilities*, in the NYNEX interconnection docket. Opening up the Local Exchange Market to Competition: Common Themes with Retail Competition in Electricity and Natural Gas Industries, August 30, 1996.
- **Intercontinental Energy Corporation**
  Before the *New Jersey Board of Public Utilities, No. EX94120585Y,* on the Energy Master Plan Phase I Proceeding to Investigate the Future Structure of the Electric Power Industry, July 1996.

  Before the *Massachusetts Department of Public Utilities, DPU 96-100,* on the Investigation Commencing a Notice of Inquiry/Rulemaking for Electric Industry Restructuring, July 1996.

"2020: What can we expect? Where we are now, and how it influences where we'll be a decade from now," Law Seminars International conference, "Energy in the Northeast," September 29, 2010.

"Today's Energy Landscape: Exploring economic, environmental and technological trends," presentation to the annual meeting of the Independent Power Producers of New York, September 22, 2010.

"Transforming America's Energy Systems: Challenges and opportunities along the nation's coastal and marine environments," Annual Lecture at the Metcalf Institute, University of Rhode Island, June 8, 2010.

"New England at the Crossroads: The Intersection between Regulatory Policy and Future Energy Supply," presentation to the Northeast Energy and Commerce Association, 17th New England Energy Conference, Green Thumb on the Scale: Impact on Future Energy Choices, June 8, 2010.

"Is Competition Dead?" presentation to the Annual Meeting of the New England Conference of Public Utility Commissioners, May 17, 2010.

"Why it is so Darn Hard to Adopt Advanced Energy Technologies, But So Worth the Effort," presentation to the Tufts University Energy Conference, "The Evolution of Energy," April 17, 2010.

"The Prospects for Natural Gas, Coal, and Nuclear Power in America's Energy Future," discussions with members of Congress at the Aspen Institute's Congressional Program on Energy Security and Climate Change: Policy Challenges for the Congress, April 6-10, 2010.

"Why is Modernizing Our Energy Technologies So Darn Hard, But Worth the Effort?" presentation to the MIT Energy Initiative Lecture Series, February 2, 2010.

"Themes in federal energy and climate policy issues in Washington – end of 3rd Q, 2009," presentation to the Kennedy School, Harvard University, November 18, 2009.

"Update on federal energy and climate policy issues in Washington – end of 3rd Q, 2009," presentation to the New York Independent System Operator Environmental Advisory Council, October 23, 2009.

"Challenges and Opportunities in Colorado's New Energy Economy – A View From Washington," presentation to the "Powering the Future – Colorado's New Energy Economy," Denver, Colorado –October 20th, 2009.

Financial Meltdown and Recovery: Challenges and Opportunities in the New Clean Energy Economy – Taking Stock in 3rd Q 2009," ABA Environment, Energy and Resources Law Summit 17th Section Meeting – Baltimore, September 25, 2009.

"Off-Shore Renewable Energy Development in NE: Massachusetts's New Ocean Management Plan," presentation to the New England Electric Restructuring Roundtable, September 18, 2009.

"Energy Policy for the 'Climate Change Era' – What's Your Definition of Green?" presentation to the 55th Annual Rocky Mountain Mineral Law Institute, San Francisco, July 23, 2009.

"The Goals for an Electricity Grid for the 21st Century: Where You Stand Depends Upon Where You Sit," presentation to the Aspen Institute Energy Policy Forum, Aspen, Colorado, July 9, 2009

"Linking Ends and Means in Energy & Environmental Policy: Intended and Unintended Consequences," presentation to the Harvard Electricity Policy Group, Cambridge, Massachusetts, May 28, 2009.

"Today's Energy Landscape: What's Coming Next for Energy & Resources Policy & Regulations," presentation to the Chief EH&S Officers Council (Joint with EH&S Legal Officers), The Conference Board – Washington, DC, May 14, 2009.

"Scanning Today's Energy Landscape in New England: Objects are Closer Than They Appear," Presentation to the New England Conference of Public Utility Commissioners, Newport, Rhode Island, May 3, 2009.

"Today's Energy Landscape: Objects are Closer Than They Appear." Presentation to the Energy Bar Association's 63rd Annual Meeting: Infrastructure, Policy, and Practice Amidst Economic Turmoil, Washington, D.C., April 23, 2009.

"Regulatory Treatment of Purchased Power: Pass Through or Profit Center? Give Away or Value Creation?" presentation to Harvard Electricity Policy Group, October 3, 2008., Harvard Electric Policy Group – Chicago, Illinois, October 3, 2008.

"Leadership Panel: Barriers to Acting in Time on Energy, and Strategies for Overcoming Them," Harvard University Conference: Acting in Time on Energy Policy, September 18, 2008.

"New England's Power Markets: The context for renewables development," Law Seminars International, September 8, 2008.

OTHER PROFESSIONAL ACTIVITIES

Chair, ClimateWorks Foundation (2013-present)

Participant in studies of the Colorado State University's Center for Clean Energy Economy ("*Powering Forward: Presidential and Executive Agency Actions to Drive Clean Energy in America*," January 2014.

Co-Lead Convening Author, Energy Supply and Use Chapter, National Climate Assessment (2012-present)

Member, Committee on Risk Management and Government Issues in Shale Gas Development, of the National Academy of Sciences, Board on Environmental Change and Society (of the Division of Behavioral and Social Sciences and Education) (2013-2014)

Co-chair, Bipartisan Policy Center's Cyber-security and the Electric Grid project (2013-2014)

Co-chair, National American Energy Standards Board (NAESB) Gas-Electric Harmonization Committee (2012, 2014)

Alliance Commission on National Energy Efficiency Policy (2012-2013): Report (Energy 2030: Doubling Energy Productivity by 2030; February 2013).

Bipartisan Policy Center – Energy Project (2011 to present): Report ("America's Energy Resurgence: Sustaining Success, Confronting Challenges," February 2013).

U.S. Secretary of Energy Advisory Board (July 2010 to May 2013). Member of the Natural Gas Subcommittee examining shale gas development. (2011-2013)

Chair, Policy Subgroup of the National Petroleum Council's study on North American Gas and Oil Resource Development (2010-2011)

Member, Board of Directors, Alliance to Save Energy (2011 to present)

Visiting Professor, Department of Urban Studies and Planning, Massachusetts Institute of Technology, Spring 2010.

Massachusetts Clean Energy Grand Prize Judge, May 11, 2010.

Member, Board of Directors, EnerNOC, Inc. (February 2010 to May 2013)

Member, Board of Directors, World Resources Institute (2009 to present). Chair of Presidential Search Committee (2011).

Co-Lead, Department of Energy Agency Review Team, Obama/Biden Presidential Transition Team, Washington D.C., 2008-2009 (while on full-time leave for four months from Analysis Group).

Chair, Massachusetts Ocean Advisory Commission, 2008 to 2010.

Member, Board of Directors, Evergreen Solar, Inc., 2008 to 2011.

Member, Board of Directors, Ze-gen Inc., 2009 to 2011, Market Advisory Board, 2008-2009.

Member, Board of Directors, Renegy Holdings, 2007 to 2009.

Member, Blue Ribbon Commission on Cost-Allocation Issues for Transmission Investment, WIRES, 2007.

Chair, External Advisory Council, National Renewables Energy Laboratory (2009 to present).

Member, National Academy of Sciences Committee on Enhancing the Robustness and Resilience of Electrical Transmission and Distribution in the United States to Terrorist Attack, 2005 to 2008.

Member, New York Independent System Operator, Environmental Advisory Council, 2004 to present.

Member, National Commission on Energy Policy, member, 2002 to 2011; co-chair, 2009-2011.

Member, Board of Directors, Clean Air Task Force, 2008-June 3, 2013; Advisory Council, 2002 to 2008.

Member, Board of Directors, Catalytica Energy Systems Inc., 2001 to 2007.

Member, Board of Directors, Climate Policy Center, 2001 to 2007.

Member, Advisory Committee, Carnegie Mellon Electricity Industry Center, 2001 to 2009.

Member, Policy Advisory Committee, China Sustainable Energy Project–A Joint Project of The Packard Foundation and The Energy Foundation (1999 to present).

Director, NorthEast States Center for a Clean Air Future, 1998 to 2010.

Chair of the Board of Directors, The Energy Foundation, 2000 to 2011; Vice-Chair, 1999-2000; Director, 1997 to 2011; Director, 2013 to present.

Chair of the Board of Directors, Clean Air–Cool Planet / Climate Policy Center, 2004 to 2009; director, 1999-present.

Member, Board of Directors, ACORE (American Council on Renewable Energy), 2006-2007.

Co-Chair, Energy/Environment Working Group, Governor Deval Patrick Transition Team (2006-2007).

Presenter, Economic Issues, National LNG Forums, U.S. Department of Energy, Boston Massachusetts; Astoria, Oregon (2006).

Chair of the Technical Review Panel, Critical Infrastructure Protection Decision Support Systems (CIP-DSS), Argonne, Los Alamos and Sandia National Laboratories, 2006.

Advisory Council member, New England Energy Alliance, 2005-2006.

Member, Board of Directors, Electric Power Research Institute, 1998 to 2003, 2005-2006.

Chair of the Laboratory Direction's Division Review Panel for the Environmental Energy Technologies Division, Lawrence Berkeley National Laboratory, 2005.

Chair, Ocean Management Task Force, Commonwealth of Massachusetts, 2003-2004.

Co-Chair, RTO Futures: Regional Power Working Group, 2001-2002.

Chair, Board of Directors, Electricity Innovations Institute, 2002 to 2004; Director, 2001 to 2002.

Member, Florida Energy 2020 Study Commission, Environmental Technical Advisory Committee, 2001.

Technical Advisor, Mid-Atlantic Area Council/PJM, Dispute Resolution Procedure, 1998 to 2008.

Member, "ISO-New England" (Independent System Operator) Advisory Committee, 1998 to 2003.

Director, The Randers Group (subsidiary of Thermo TERRATEK), 1997 to 2000.

Director, MHI, Inc. (electric utility aggregator in Massachusetts), 1997 – 1999.

Director, Thermo ECOTEK Corporation, 1996 – 1999.

Member, United States Department of Energy, Electricity Reliability Task Force, 1996-1998.

Member, Harvard Electricity Policy Group, 1993 to 2005.

HONORS AND AWARDS

Champions Award, Charles River Watershed Association, 2013

Leadership Award, New England Women in Energy and the Environment, 2013.

Clean Energy Hall of Fame, New England Clean Energy Council, 2012.

DOE Women in Clean Energy Initiative, C3 Ambassador, 2012

Climate Champion Award, Clean Air – Cool Planet, 2009.

Distinguished Alumna Award, Scripps College, Claremont, CA, 1998

Award for Individual Leadership in Public Service, *The Energy Daily*, 1995

Special Recognition Award for Outstanding Contribution to the Industry, Cogeneration and Competitive Power Institute, Association of Energy Engineers, 1994

Leadership Award, National Association of State Energy Officials, 1994

Commencement Speaker and Honorary Doctorate of Laws, Regis College, Weston, MA, 1992.

Examples of the District of Columbia Agency Studies that Use IMPLAN

In preparation for this testimony, I searched the internet to find instances where a District of Columbia government agency had used or contracted for, or had submitted before it, a study that used IMPLAN for an economic impacts analysis. A few of the examples include:

- Report prepared by Mayor's Power Line Undergrounding Task Force pursuant to EO 2012-130, "Findings and Recommendations" (May 2013), available at: http://oca.dc.gov/sites/default/files/dc/sites/oca/page_content/attachments/Mayor%27s%20Power%20Line%20Undergrounding%20Task%20Force%20-%20Findings%20and%20Recommendations%20Report%20%28Abridged%20Version%29-May%202013.pdf.
- Report prepared for Metropolitan Washington Airports Authority by the Louis Berger Group, Inc., "Technical Report: Economic Impact Study - 2009" (October 2010), available at: http://www.mwaa.com/file/mwaa_-_economic_impact_study_2009_-_02_tech_report_final_10_20_2010.pdf.
- Report prepared for the DC Office of Motion Picture and Television Development by ECONorthwest, "An Analysis of the Entertainment and Media Industry in Washington, D.C." (July 2013), available at: http://www.dcfpi.org/wp-content/uploads/2013/09/ECONorthwest-Study.pdf.
- Report commissioned by DC Office of Local Business Development, "Evaluation: Local Small Disadvantage Business Enterprise Program: Cost Effectiveness and Financial Impact Analysis" (December 2002), available at: http://www.dcps.dc.gov/DC/DSLBD/DSLBD%20Publication%20Files/Evaluation%20LSDBE%20Enterprise%20Program.pdf.

Description and Overview of IMPLAN and Definition of Terms[27]

IMPLAN's Social Accounting Matrices ("SAMs") capture the actual dollar amounts of all business transactions taking place in a regional economy as reported each year by businesses and governmental agencies. SAM accounts are a better measure of economic flow than traditional input-output accounts because they include "non-market" transactions. Examples of these transactions would be taxes and unemployment benefits.

SAMs can be constructed to show the effects of a given change on the economy of interest. These are called Multiplier Models. Multiplier Models study the impacts of a user-specified change in the chosen economy for 440 different industries. Because the Multiplier Models are built directly from the region specific SAMs, they will reflect the region's unique structure and trade situation. Multiplier Models are the framework for building impact analysis questions. Derived mathematically, these models estimate the magnitude and distribution of economic impacts, and measure three types of effects which are displayed in the final report. These are the direct, indirect, and induced changes within the economy.

Direct effects are determined by the Event as defined by the user (i.e. a $10 million dollar order is a $10 million dollar direct effect). The indirect effects are determined by the amount of the direct effect spent within the study region on supplies, services, labor and taxes. Finally the induced effect measures the money that is re-spent in the study area as a result of spending from the indirect effect. Each of these steps recognizes an important leakage from the economic study region spent on purchases outside of the defined area. Eventually these leakages will stop the cycle. More specifically, the effects are:

> *Direct effects* - The set of expenditures applied to the predictive model (i.e., I/O multipliers) for impact analysis. It is a series (or single) of production changes or expenditures made by producers/consumers as a result of an activity or policy. These initial changes are determined to be a result of this activity or policy. Applying these initial changes to the multipliers in an IMPLAN model will then display how the region will respond, economically, to these initial changes.
>
> *Indirect effects* - The impact of local industries buying goods and services from other local industries. The cycle of spending works its way backward through the supply chain until all money leaks from the local economy, either through imports or by payments to value added. The impacts are calculated by applying Direct Effects to the Type I Multipliers.
>
> *Induced effects* - The response by an economy to an initial change (direct effect) that occurs through re-spending of income received by a component of value added. IMPLAN's default multiplier recognizes that labor income (employee compensation and proprietor income components of value added) is not a leakage to the regional economy. This money is recirculated through the household spending patterns causing further local economic activity.

Overview of Core Inputs and Assumptions Used in
IMPLAN Analysis of Economic Benefits of the Regulatory Commitments to the District of Columbia

Activity	Actual Commitment and Modeled Use	Input Assumption in IMPLAN Study
Customer Investment Fund: Assuming a $52.95 credit on Each Customer's Utility Bill	$14 million, modeled as a $52.95 credit to each distribution customer	Residential benefits: Modeled as increased income to households Commercial/industrial benefits: Modeled as increased sales to businesses
Customer Investment Fund: Assuming the Funds are Spent on Energy Efficiency Measures	$14 million, modeled based on current District energy efficiency spending	Modeled in two parts: Part 1: Spending on appliance programs (retail sales) and residential and commercial/industrial retrofits/new construction programs (construction and maintenance) – ten year lifespan assumed Part 2: Customer electricity savings resulting from reduced usage modeled as increased income to residential customers, increased sales to commercial and industrial customers – ten year lifespan assumed
Customer Investment Fund: Assuming a Credit on Low-Income Residential Customers' Utility Bills	$14 million, modeled as a credit to low-income residential customers	Modeled as increased income to lowest residential income bracket
Reliability Benefits	Reliability benefits determined using Department of Energy ICE Calculator, commitments based on testimony of Mark Alden	Residential benefits: Modeled as increased income to households Commercial/industrial benefits: Modeled as increased sales to businesses

TABLE OF CONTENTS

JOINT APPLICANTS
BEFORE THE
PUBLIC SERVICE COMMISSION OF THE DISTRICT OF COLUMBIA
DIRECT TESTIMONY OF CALVIN G. BUTLER, JR.
FORMAL CASE NO. _____

I. INTRODUCTION AND PURPOSE OF TESTIMONY

1. Q. Please state your name and business address.

A. My name is Calvin G. Butler, Jr. My business address is 110 West Fayette Street, Baltimore, Maryland 21201.

2. Q. By whom are you employed and in what capacity?

A. I am the Chief Executive Officer ("CEO") of Baltimore Gas and Electric Company ("BGE" or the "Company").

3. Q. What is your professional and educational background?

A. I began my career at Central Illinois Light Company, where I worked in a variety of positions in the government affairs, legal, and operations areas before moving to R.R. Donnelley & Sons, Co. ("RR Donnelley"), a global producer of integrated communications. I spent eight years at RR Donnelley, first as senior director of government affairs and eventually as senior vice president of external affairs. I also managed the firm's supplier diversity and government sales groups and served as president of the R.R. Donnelley Foundation. I joined Commonwealth Edison Company ("ComEd") in 2008 as its Vice President of Legislative Affairs, where I managed all state and local legislative initiatives while overseeing real estate and facilities and economic development functions. In 2009, I was promoted to Senior Vice President of Corporate Affairs for ComEd.

On August 16, 2010, I accepted a position with Exelon Corporation ("Exelon") as its Senior Vice President of Human Resources and, on May 2, 2011, I became Senior Vice President of Corporate Affairs at Exelon. Following Exelon's 2012 acquisition of Constellation Energy Group ("Constellation") and its operating subsidiaries, I was named Senior Vice President, Regulatory and External Affairs at BGE. On March 1, 2014, I was named CEO of BGE. I also serve on BGE's Board of Directors and the Management Executive Committee of Exelon.

I received my bachelor's degree from Bradley University in Peoria, Illinois. I also hold a Juris Doctor from Washington University School of Law in St. Louis, Missouri.

4. Q. Are you currently involved with any civic organizations?

A. Yes. I am on the Board of Directors for the Economic Alliance of Greater Baltimore and the Maryland Zoological Society (the Maryland Zoo in Baltimore). I was also appointed as the Chair of the American Heart Association's Greater Baltimore Heart Walk 2014, which will take place in Baltimore on October 11, 2014.

5. Q. Have you previously testified before the District of Columbia Public Service Commission (the "Commission")?

A. No. This is the first time I have provided testimony before this Commission.

6. Q. What is the purpose of your testimony?

A. The purpose of my testimony is to discuss the approach of Exelon Corporation ("Exelon") to honoring past commitments made when acquiring utilities and to managing its utility company subsidiaries with respect to the following important areas: electric system reliability, supplier diversity, charitable giving and community involvement. I will also discuss how BGE, since being acquired by Exelon in 2012, has been able to benefit in these particular areas. Finally, I will reference specific commitments that Exelon is making in certain of these areas in connection with its proposed acquisition and integration of Pepco Holdings, Inc. ("PHI") and its utility company subsidiaries Potomac Electric Power Company ("Pepco"), Delmarva Power & Light Company ("Delmarva Power"), and Atlantic City Electric Company ("ACE").

7. Q. Mr. Butler, how are you qualified to testify regarding Exelon's dedication to various key initiatives and programs, both at the corporate and utility company levels?

A. I have had the distinct opportunity to serve in leadership positions at each of Exelon, ComEd and now BGE. This background gives me a unique perspective on how Exelon runs its programs at the corporate level, and how it integrates and then supports the operations and goals of its utility companies. Perhaps most importantly, as the CEO of BGE, I am able to discuss how the employees and customers of a utility company that recently merged with Exelon have benefitted from the resources and opportunities available as the result of being part of the Exelon family of companies.

II. HONORING COMMITMENTS

8. Q. Mr. Butler, please explain Exelon's general approach to honoring commitments it makes in merger transactions.

A. Certainly. Exelon carefully tracks its merger commitments and ensures that it follows through on all commitments made as part of any merger transaction. I can testify from personal experience that Exelon honors the merger commitments it makes to utilities, their employees, customers and regulators.

When Exelon merged with Constellation and its subsidiary companies in 2012, it made a variety of commitments that encompassed employment level protections; preservation of employee compensation and benefits; contributions to a customer investment fund; ring-fencing requirements; maintenance of local presence; support for supplier diversity initiatives; and a concrete, long-term funding commitment for local charitable and community involvement efforts. I am happy to report that Exelon has followed through on these commitments and continues to do so.

9. Q. Will Exelon similarly honor all commitments made regarding PHI and its utility company subsidiaries, including Pepco?

A. Yes. I realize that there may be some apprehension associated with the merger of Exelon and PHI and its three utility company subsidiaries, which is normal in the face of change. As an individual who worked for Exelon when it was in the process of merging with BGE, and then who subsequently went to work for BGE as a Senior Vice President and now as CEO, I can assure all stakeholders that Exelon is a company that honors its commitments to its utility operating subsidiaries. The Exelon approach described by Mr. Crane and Mr. O'Brien of providing all necessary resources and support to Exelon utilities while also allowing those utilities to manage their business and maintain their local identity and ties to the communities and customers they serve has been clearly demonstrated throughout the fulfillment of Exelon's commitments with respect to BGE, and I expect nothing less in terms of Exelon's commitments with respect to Pepco.

III. DEDICATION TO ENHANCING ELECTRIC SYSTEM RELIABILITY

10. Q. Mr. Butler, please discuss Exelon's dedication to enhancing the electric system reliability of its subsidiary utility companies.

A. Exelon strives to enhance the electric system reliability of its utility company subsidiaries. This is accomplished through ensuring that appropriate resources and personnel work at all levels to keep the lights on, and that whenever possible, all of the Exelon utilities share best practices to promote the safe, efficient and reliable delivery of utility service to customers in the communities Exelon serves. The results have been improved reliability at all of the Exelon utilities, as discussed in the direct testimony of Mr. Alden.

11. Q. Since merging with Exelon in 2012, has BGE's electric system reliability improved?

A. Yes. BGE has seen significant improvements in its reliability metrics since becoming part of the Exelon family of utilities. In 2013, the first full year following the Exelon-Constellation transaction, BGE achieved the best reliability performance – both in fewer outages and shorter outage duration – in its history.

Among other things, BGE reduced the average time to restore service to BGE customers by almost 32%. BGE customer satisfaction scores also improved following BGE's acquisition by Exelon, as Mr. Alden explains.

12. Q. Has BGE demonstrated enhanced storm response capabilities at BGE since it became part of the Exelon family of companies?

A. Yes. As a result of the 2012 merger, BGE now has access to many additional Exelon resources to assist BGE crews in restoring power during a storm or other emergency event. For instance, during the devastating June 2012 Derecho storm, many PECO Energy Company ("PECO") crews were quickly dispatched to the BGE service territory to assist BGE personnel in restoring power. In advance of the arrival of Hurricane Sandy, BGE was able to call on ComEd crews to travel from Illinois to Maryland to assist BGE personnel in restoring power. Being able to rely on the additional resources from affiliated Exelon utility companies during storm events has been of great benefit to BGE and its customers.

13. Q. Earlier you mentioned the sharing of best practices to enhance electric service reliability. Could you provide an example of an Exelon best practices that BGE adopted?

A. Certainly. After the 2012 merger, BGE began utilizing ComEd and PECO's practice of establishing and tracking daily metrics to ensure the timely repair of system equipment. In addition, operational personnel from around the company hold a conference call every weekday morning to review system performance and any operational events from the past 24 hours to determine – in real time – any steps that may be necessary to improve service. Breaking down and reviewing performance in 24-hour increments is a best practice that yields important customer benefits. Mr. O'Brien describes other best practices that ComEd and PECO shared with BGE which have substantially enhanced reliability for our customers.

14. Q. Mr. Butler, do you believe that with respect to electric service reliability, Pepco will benefit from joining Exelon?

A. I certainly do. For instance, upon consummation of the merger, Pepco will be an Exelon utility company with service territories geographically contiguous or close to the service territories of two other Exelon utilities, BGE and PECO. This proximity will allow BGE and PECO crews to quickly respond to events in Pepco's service territory, assisting crews in safely and expeditiously restoring power. I know that Pepco has been working in recent years with success to enhance electric system reliability in its service territory, and Exelon will continue to support and enhance those efforts after the Merger, as reflected in the reliability commitments it is making as part of this Merger.

IV. DEDICATION TO SUPPLIER DIVERSITY

15. Q. Mr. Butler, please discuss Exelon's dedication to supplier diversity.

A. Exelon is focused on obtaining a variety of equipment, goods, supplies and services from a diverse array of vendors. To reach that goal, Exelon maintains a mature and strategically focused supplier diversity program. Exelon implements its supplier diversity strategy by increasing spending with certified Minority and

Women Business Enterprises ("MWBEs"), including professional service firms, investment banks and law firms.

Exelon's supplier diversity program is managed by its Diverse Business Empowerment Office ("DBEO"), reporting ultimately to the Executive Vice President and Chief Administrative and Diversity Officer. The DBEO, led by Emmett Vaughn, Exelon's Director of Diverse Business Empowerment, manages the four core elements of Exelon's supplier diversity program: (1) planning and tracking supplier diversity spend; (2) diverse business advocacy; (3) supplier development; and (4) managing a supplier diversity center of expertise.

Furthermore, Exelon is a long-standing member of the National Minority Supplier Development Council and holds a leadership position with the group's affiliated National Utilities Industry Group. Exelon is a past recipient of the Utility Leadership Award presented by the National Association of Regulatory Utility Commissioners' ("NARUC") Utility Access Partnership Committee – an award given annually to one utility company demonstrating national leadership and excellence in supplier diversity.

16. Q. How does the Exelon DBEO promote the supplier diversity program?

A. The DBEO supports multiple diverse business advocacy organizations of regional and national scope. These organizations facilitate conferences, meetings, and technical assistance workshops in support of developing diverse suppliers. Exelon's DBEO initiatives have been recognized for excellence and contributions to diverse supplier development by such organizations as the National Minority

Supplier Development Council and the United States Department of Commerce Minority Business Development Agency.

17. Q. Mr. Butler, what has been Exelon's recent direct support for Minority and Women Business Enterprises?

A. In 2013, Exelon's diverse supplier spend increased $155 million, or 21%, over the prior year, to approximately $906 million. Of the total spend, $714 million was with prime ("Tier 1") suppliers and $192 million was with subcontractor ("Tier 2") suppliers. Exelon's utility companies – ComEd, PECO and BGE – played a critical role in Exelon's supplier diversity strategy, collectively accounting for 64% of 2013 year-end diversity spend totals. In addition, as part of its commitment to expand opportunities for MWBEs outside of the supply chain facilitated spend, Exelon's spending with diverse professional service firms totaled nearly $82 million in 2013. This initiative is known as Exelon's "high-margin strategy" and focuses on eight categories: Advertising and Marketing, Business Consulting, Engineering and Technical Consulting, Financial Services, Human Resources Services, Information Technology Professional Services, Legal, and Banking. The high-margin strategy was undertaken because these businesses typically have higher profit margins and, therefore, have an increased capacity to contribute to community economic development.

Additionally, Exelon maintains a community and minority banking initiative. Launched in 2003, the initiative establishes credit facilities with community and minority-owned banks. Through these arrangements, Exelon and its subsidiaries get access to liquidity at competitive rates, and community banks gain experience with more complex transactions and the opportunity to strengthen their businesses by building a relationship with a Fortune 500 company. Local economies are also supported through the business the initiative brings. Exelon's community and minority banking initiative has grown from $36 million in 2003 to $123 million in 2013. In 2013, Exelon established a $123 million credit facility with 31 community and minority banks.

18. Q. Mr. Butler, what has been BGE's experience with supplier diversity since merging with Exelon in 2012?

A. The experience has been very positive. As part of the Exelon family of companies, BGE maintains a robust and successful supplier diversity program. Frank Kelly, BGE's Manager of Diverse Business Empowerment, oversees BGE's efforts to grow relationships with diverse suppliers and ultimately increase BGE's spending with certified MWBEs – efforts that have proven to be successful. BGE has had particular success in encouraging prime suppliers to utilize diverse subcontractors, and has realized year-over-year gains in spending on goods and services from diverse firms. Regarding the Exelon "high-margin strategy" I described above, BGE has been a significant contributor to the overall effort, establishing financial services relationships with 32 diversity certified professional services firms, including many local firms such as The Harbor Bank of Maryland, Industrial Bank, and Brown Capital Management.

BGE's recent supplier diversity efforts stem from the February 6, 2009, Memorandum of Understanding ("MOU") BGE signed with the Maryland Public Service Commission that established a target of awarding 25 percent of BGE's total eligible annual dollar spend for contracts, subcontracts, and purchase orders for products and services with diverse suppliers by 2025. When Exelon merged with BGE, it committed to fully supporting the goals of the MOU and to using its best efforts to assist BGE in meeting BGE's obligations. Exelon has honored that commitment and today BGE continues to make progress toward meeting the goals of the MOU, awarding 16.3% of total eligible dollar spend in 2013 to diverse suppliers, an amount equal to $151 million. This represents an increase of $35 million or 30% from 2012 levels. In July 2013, with the full support of Exelon, BGE launched its own internal supplier development program known as Focus 25, which was inspired by the 2009 MOU goal of achieving 25% diverse supplier spend by 2025. The underlying purpose of the program is to provide a selected group of diversity certified suppliers with the tools and knowledge to attain their next level of growth in their business through on-going one-on-one mentorship, technical assistance workshops highlighting business development processes, safety policies, and the nuances of BGE sourcing processes. The inaugural Focus 25 participants include professional services firms that are part of the "high margin strategy" I described above.

19. Q. Mr. Butler, do you expect Exelon to continue to support the current supplier diversity efforts of Pepco following the merger with PHI?

A. Yes, I do. Exelon has a longstanding track record of fully supporting the supplier diversity efforts of its operating utility companies, including providing resources and sharing best practices, experiences and expertise. As I mentioned previously, when it merged with Constellation and BGE, Exelon committed to maintaining BGE's supplier diversity efforts. Exelon has followed through on that commitment and the result is that BGE's supplier diversity efforts have continued to grow and succeed. I understand that Pepco has a MOU with the Public Service Commission of the District of Columbia. Exelon is committed to promoting the supplier diversity efforts at Pepco, through the provision of resources and the sharing of best practices, experiences and expertise.

I know that PHI is a strong supporter of efforts to increase supplier diversity, with both total company and utility-specific diverse spend increasing in 2013. Indeed, PHI has received many accolades in the past two years for its efforts in this area, including the Minority Business News USA "101 Companies Supplier Diversity Best in Class" award and being named one of Black Enterprise Magazine's "40 Best Companies for Diversity" for Supplier Diversity, Senior Management and Board of Director Diversity. By becoming part of the Exelon family, the PHI utility companies, including Pepco, will gain the full support of Exelon and its existing utility companies to build upon what have been very successful efforts to increase supplier diversity. Personally, I look forward to seeing the benefits that will result from combining the resources and initiatives of these two ardent supporters of supplier diversity efforts.

V. DEDICATION TO COMMUNITY INITIATIVES AND CHARITABLE GIVING

20. Q. Mr. Butler, please describe Exelon's focus on community initiatives and charitable giving in the communities it serves.

A. Exelon has always been focused on supporting organizations and groups within the areas and communities its subsidiary utilities serve. Over the past five years, Exelon and its distribution companies have donated over $134 million to local charitable and civic organizations that focus their efforts in four primary areas: (1) education; (2) the environment; (3) arts and culture; and (4) neighborhood development. Exelon also provides community support through the Exelon Foundation, an independent, nonprofit philanthropic organization that is funded solely by Exelon. Since its creation at the end of 2007, the Exelon Foundation has donated nearly $13.5 million to nonprofits.

In addition to monetary support, Exelon's Corporate Citizenship program strives to improve the quality of life for the people who live and work in Exelon's utility service territories. Exelon seeks to accomplish these goals through employee volunteer activities and executive involvement on non-profit boards. Exelon's employee volunteer engagement program is called "Energy for the Community." This program is designed to help Exelon employees practice the company's community service values through volunteerism. Employees can easily find and sign up for service projects in their area of interest or near where they live. In 2013, Exelon employees devoted many hours to various projects and activities benefitting the communities Exelon serves.

Exelon also sponsors its Energy for the Community Employee Volunteer Awards program, which recognizes employees who demonstrate extraordinary dedication and commitment to community service. Winning employees receive grants that are directed to the non-profit organizations at which they volunteer. In

2013, Exelon awarded 18 grants totaling $140,000 to non-profit organizations to honor employee volunteer service. Furthermore, Exelon's Dollars for Doers program rewards dedicated employee volunteers with grants to non-profit organizations where they serve at least 25 hours per year.

21. Q. Since merging with Exelon in 2012, has BGE been supportive of community initiatives and charitable giving?

A. Yes. With Exelon's support, BGE has been a significant contributor to community initiatives and charities, including several new grant initiatives. In 2013, BGE employees, friends and family logged over 25,000 hours to more than 135 community organizations through 230 events. Each year, hundreds of BGE employees volunteer their time and/or donate to the United Way of Central Maryland as part of an annual campaign. Many employees make their financial contributions through payroll deductions. In 2013, BGE employees raised over $1 million for this cause. BGE employees also serve as board members on more than 124 local non-profit organizations.

In 2014, BGE is supporting a new event – the American Heart Association's Baltimore Heart Walk on Saturday, October 11. As I mentioned previously, I have the honor of serving as the Chairman of this year's event and, in that role, I will be bringing BGE employees together to raise funds for the event as well as reaching out to other Baltimore-area businesses for support. In subsequent years, I expect that many other worthy causes will receive support as part of a long-term commitment from BGE.

BGE has also maintained its high level of direct contributions to local organizations, with more than $3.5 million donated to 237 organizations in Central Maryland in 2013. We have also initiated new programs since merging with Exelon. For example, in 2013, BGE initiated a Green Grants Program whereby BGE provided more than $415,000 in grants to nearly 50 nonprofit organizations in support of environmental stewardship initiatives. Individual grant amounts ranged from $500 to $10,000 and were focused on the areas of conservation, energy efficiency, education, pollution prevention and community activism. Additionally, as part of an Emergency Response and Safety Grants Program started in September 2012, BGE has provided more than $670,000 in grants to 80 nonprofit organizations that support emergency response and safety efforts. Grant monies from that program are used to fund equipment, programs or services that are critical to the safety of the communities BGE serves.

22. Q. Mr. Butler, do you expect Exelon to continue supporting the community initiatives of PHI and Pepco following the Merger?

A. Absolutely. Much like the charitable giving commitment Exelon made when it merged with Constellation and BGE, Exelon and its subsidiaries have agreed to provide at least an annual average of charitable contributions and traditional local community support that exceeds the 2013 level of contributions and support of PHI and Pepco for the decade following consummation of the merger. Exelon has honored the charitable giving commitments it made as part of acquiring BGE, and I am confident that Exelon will honor its charitable commitment regarding PHI and Pepco as well.

VI. CONCLUSION

23. Q. Does this conclude your prepared direct testimony?

A. Yes, it does.
